AMPHIOXUS.

FROG.

MAN.

FISH.

CRAB.

PLATE I. GASTRULATION. (After Haeckel.)

Figs. 1 to 17 represent holoblastic eggs (with total cleavage); Figs. 18 to 30 show meroblastic eggs (with partial cleavage). The animal halves are colored gray, the vegetative halves red. The nutritive yolk is shaded vertically. All the figures show vertical meridian sections through the axis of the primitive intestine. In all, the letters indicate the same parts: *c*, the parent-cell (*cytula*); *f*, cleavage-cells (*segmentella*); *m*, the mulberry-germ (*morula*); *b*, the germ-vesicle (*blastula*); *g*, the cup-germ (*gastrula*); *s*, the cleavage-cavity; *d*, the primitive intestinal cavity; *o*, the primitive mouth; *n*, the nutritive yolk; *i*, the intestinal layer; *e*, the skin-layer.

Figs. 1-6.—Original or primordial egg-cleavage of the lowest vertebrate (*amphioxus*). Fig. 1, parent-cell (*cytula*); Fig. 2, cleavage-stage with 4 cleavage-cells; Fig. 3, mulberry-germ (*morula*); Fig. 4, germ-vesicle (*blastula*); Fig. 5, the same, in process of inversion (*invagination*); Fig. 6, bell-gastrula (*archigastrula*).

Figs. 7-11.—Unequal egg-cleavage of an amphibian (frog). Fig. 7, parent-cell (*cytula*); Fig. 8, cleavage-stage with 4 cleavage-cells; Fig. 9, mulberry-germ (*morula*); Fig. 10, germ-vesicle (*blastula*); Fig. 11, hood-gastrula (*amphigastrula*).

Figs. 12-17.—Unequal egg-cleavage of a mammal (man). Fig. 12, parent-cell (*cytula*); Fig. 13, cleavage-stage with 2 cleavage-cells (*e*, mother-cell of the exoderm; *i*, mother-cell of the entoderm); Fig. 14, cleavage-stage with 4 cleavage-cells; Fig. 15, beginning of the inversion of the germ-vesicle; Fig. 16, further advanced inversion; Fig. 17, hood-gastrula (*amphigastrula*).

Figs. 18-24.—Discoidal egg-cleavage of an osseous fish (*Motella*? *Cottus*?). The greater part of the nutritive yolk (*n*) is omitted. (Cf. Figs. 42, 43, pp. 217, 219, Haeckel's "Evolution of Man.") Fig. 18, parent-cell (*cytula*); Fig. 19, cleavage-stage with 2 cells; Fig. 20, cleavage-stage with 32 cells; Fig. 21, mulberry-germ (*morula*); Fig. 22, germ-vesicle (*blastula*); Fig. 23, the same, in process of inversion; Fig. 24, disc-gastrula (*discogastrula*).

Figs. 25-30.—Superficial egg-cleavage of a crab (*peneus*). Fig. 25, parent-cell (*cytula*); Fig. 26, cleavage-stage with 4 cells; Fig. 27, cleavage-stage with 32 cells; Fig. 28, mulberry-germ (*morula*), and at the same time the germ-vesicle (*blastula*); Fig. 29, bladder-gastrula (*perigastrula*); Fig. 30, nauplius-germ; the pharynx-cavity has formed in front of the primitive mouth (*d*), owing to an inversion from without.

## PREFACE.

---

THE time was when almost all important medical writing was in Latin ; hence, the older medical dictionaries dealt for the most part with Latin terms only. But the science of the present age is recorded in no one language ; to learn it, one must at least read its exposition in English, French, and German. Each of these languages has its technical words, and words which acquire a special meaning in technical expressions, and it is only with difficulty, if at all, that their meaning can be made out from general dictionaries. This fact points to the need of a medical dictionary including the terms of the three languages mentioned, as well as those of Latin or Greek origin or form. The want seems to have been recognized by Littré and Robin, as is shown by the brief Greek, Latin, German, English, Italian, and Spanish vocabularies appended to their revision of Nysten's "Dictionnaire de médecine." It was more fully, but still insufficiently, met in Palmer's "Pentaglot Dictionary." A comprehensive medical dictionary giving adequate attention to English, French, and German terms in the same vocabulary has not hitherto been produced. To make such a dictionary, and at the same time one founded as far as possible on independent reading, was the leading idea on which the present work was undertaken. When the first hundred pages had been completed, a few copies were printed and submitted to the judgment of a number of representative American physicians, with the request that they should examine the pages and acquaint the author with any criticisms that might occur to them. Replies were received from nearly all those gentlemen, and the burden of them was that both the plan and its execution were acceptable.

Early in the year 1881 I began the preparation of this work. It soon became apparent, however, that the need of a comprehensive dictionary of medical terms was urgently felt, and it was therefore decided to hasten the completion of this one so far as it could be accomplished by dividing the preliminary work among a corps of collaborators. The list given on the title-page includes the names of those gentlemen who kindly consented to take part in the work. Most of them worked during the two years 1883 and 1884, under instructions to draw their definitions from systematic courses of reading in their several departments, and to consult other dictionaries only as a final step, if at all. The instructions issued to them contained the following passage : "As regards definitions—the most important point in a work of this sort—it should be borne in mind not only that the etymological signification of a word is to be elucidated, but that the reader must be enabled to form a satisfactory idea of the *thing* the word represents. The definition should apply to that thing, and to nothing else. Definitions must not be taken *verbatim* from books ; let the contributor read books to assure himself of the meanings that various authors attach to words, but let him express those meanings in his own terms. Least of all should other dictionaries be followed. Dictionaries may be used—indeed, they must be—but only as testimony from any other source is to be used, not as conclusive, but as worthy of attention." It is believed that these instructions were faithfully carried out by the collaborators, and it is certain that the matter which they furnished was prepared by them almost wholly on the basis of their independent courses of reading. It is only just to these

gentlemen that the precise share which each of them has taken in the preparation of the work should be indicated as specifically as practicable.

Dr. Ayres was originally charged with the whole subject of anatomy, including histology. On account of the magnitude of the work in these departments, together with its great practical importance, it was soon thought best to relieve him of histology altogether, as well as of the anatomy of the central nervous system. Soon after entering upon the work, he changed his residence to New Orleans, and a large part of his contributions, in the shape of a package of manuscript, was destroyed by fire while on its way from New Orleans to New York. A great portion of the work in anatomy had, therefore, to be done over again, and it devolved upon another collaborator, as will be explained farther on.

Professor Bronson undertook the departments of cutaneous and venereal diseases, including the special anatomy and physiology of the skin and the genito-urinary organs.

Dr. Bull took charge of the anatomy, physiology, and pathology of the organs of sight and hearing.

Dr. Coe dealt with the greater part of general physiology and with the anatomy of the central nervous system.

Dr. Currier was charged with general pathology (non-surgical) and with the theory and practice of medicine. In addition to this share in the preliminary work, he also spent a year in assisting in the final revision.

Dr. Duane undertook the subjects of chemistry, botany, zoology (in part), and pharmacology (in part). Besides the enormous labor involved in his treatment of these branches, his continued assistance in the final revision has placed the author under a debt of gratitude which it is impossible to express in words. His original work in the branches mentioned was so comprehensive and exact that it scarcely needed editorial revision. In the final preparation of the manuscript for the entire work, Dr. Duane kindly undertook everything relating to the Oriental languages, and throughout he has materially assisted in the laborious work of proof-reading.

Professor Gage worked in the departments of histology and the physiology of digestion, respiration, and circulation. He also did a portion of the work in embryology.

Dr. Garrigues's part in the work was of brief duration, from the fact that the state of his health at the time made it advisable for him to give up all literary labor for a considerable period. The work which he did related chiefly to the writings of ancient and medieval authors.

Dr. Kelsey's work was in the department of surgery, including all the special branches not otherwise provided for.

Dr. Nevins dealt with zoology, general anatomy, comparative anatomy, anthropology, and pharmacology (in part). He also rendered valuable assistance in the final revision and in the proof-reading.

Professor Wilder furnished lists of the terms used by writers on the anatomy of the central nervous system, with bibliographical references. These lists were referred to Dr. Coe, who supplied most of the definitions of the terms they contained, only a few having been contributed by Professor Wilder himself.

Besides the work of these collaborators, assistance in the revision was rendered for a few months by Dr. H. N. Vineberg.

In addition to the general planning of the work, as well as the editorial revision, the author took charge of the departments of embryology, obstetrics, and gynæcology.

Each collaborator is credited with his own contributions by means of a letter inclosed in brackets: [A] means the author; [B], Dr. Duane; [C], Dr. Ayres; [D], Dr. Currier; [E], Dr. Kelsey; [F], Dr. Bull; [G], Dr. Bronson; [H], Dr. Garrigues; [I], Dr. Wilder; [J], Mr. Gage;

[K], Dr. Coe ; [L], Dr. Nevins ; and [M], Dr. Vineberg. Where any one of these letters is followed by one or more numerals (also inclosed in the brackets), the combined expression refers to the work or works consulted in the preparation of the article. Lists of all such works will be given at the end of the dictionary.

A reference to any book means simply that it has been consulted, and not that the definition given is to be considered as resting on its authority. Indeed, in many instances the insertion of these reference numerals has been made more for the purpose of serving as a sort of index to medical literature than because it was felt that authority was required for the definitions given. In many cases the definitions here given are quite at variance with the statements of the authors referred to. In like manner, the insertion of any collaborator's letter in an article means only that that gentleman has taken part in preparing the data on which the article is founded, and not that he is in any way responsible for either the definition or anything else contained in the article. While I fully appreciate the character of the work done by the collaborators, it is proper to state that I have not hesitated in any instance to recast it in accordance with my own judgment ; I alone, therefore, am responsible for whatever is to be found in the book. In references to variorum works, wherever it was practicable, the name of the author of the article has been given, followed by a letter and numeral in parenthesis-marks indicating the work in which the article occurs. In references to periodicals, the abbreviated title of the periodical is given, followed by a letter in parenthesis-marks indicating which collaborator it was that made use of the article referred to ; where no such letter is inserted, the article may be understood to have been examined by myself. Where page numbers are given in references to periodicals, it is to be understood that, except as regards abstracts, the page on which the article begins (or, in the case of continued articles, that on which the portion in the particular number referred to begins) is the one meant, and not the page on which the word occurs. The great number of such references, and the recent date of most of the articles referred to, constitute, it is thought, a specially valuable feature of the work.

In the preparation of a few of the articles, material assistance has been given by a number of gentlemen not belonging to the corps of collaborators. Their contributions are designated by Greek letters followed by numerals in brackets, and a list of their names will be given at the close of the work.

The vocabulary is intended to include all strictly medical terms that have become current at any period in our medical literature, and a few have been given that can not be said to have gained currency—the latter being inserted, in most instances, on account of their having been used by well-known writers. A few terms that are to be found in some other medical dictionaries have been omitted purposely, either on account of their seeming to have nothing to do with medicine, or because of their meaning being so obscure as not to admit of definitions precise enough to be of discernible value ; and a few have been inserted that properly do not belong in a medical dictionary, for the reason that in other works of the sort they have been incorrectly defined. But it has not been thought best to omit any words merely on account of their being obsolete, partly because many such words throw more or less light on the origin and primitive meaning of terms still in common use, but mainly because it can hardly be said of any word now considered obsolete that it will not shortly come into vogue again. The following illustrations of this uncertainty may be mentioned : In Hooper's edition of Quincy's "Medical Dictionary," published in 1802, obsolete words were excluded from the major vocabulary, but were given in a separate list at the end of the volume. That list contains the word *acne*, a term with which the dermatological writers of the present day could hardly dispense. Another pointed instance of the revival of a term that had long ago fallen into disuse is that of *sal alembroth*, the compound anciently denoted by that name having been very recently brought into use as an antiseptic (and under that name) by Sir Joseph Lister.

Moreover, many words that but a short time since would have been pronounced obsolete by almost any person versed in modern English medical literature are coming to be current among us, largely in consequence of the increasing extent to which we read the writings of the Germans, who have either long used them or lately revived them. For example, the word *struma*, which but a few years since was commonly understood by us as meaning scrofula and nothing else, is now frequently employed by writers in our own language as a synonym of *goître*, in which sense it has long been in use among the Germans. It is evident, therefore, that the assumption that a word has been consigned to oblivion is a very unsafe ground on which to omit it from a work of this character.

In contemporary medical literature we constantly meet with words that belong to the technical language employed by writers on physics, chemistry, botany, and zoology; and, within reasonable limits, it seems desirable that they should be explained in a medical dictionary. These limits necessarily vary with the different sciences. As regards physics, the terms given in this work include for the most part only those that have a direct medical bearing or are used in accounts of processes of investigation subsidiary to medical science, particularly those of electro-physics, optics, acoustics, and the like.

Chemical terms have been included with fewer exceptions than those of the other sciences in question. An illustration of the wisdom of this course is to be found in the recent importance assumed by acetanilide ("antifebrine") in medical literature, although it was before of interest only to chemists. Books on chemistry do not always contain definitions of the technical terms to be found in them, and the same may be said of works on pharmacy and the *materia medica*. Consequently, and in view of the additions constantly being made to the *materia medica* from the list of substances before known to few but the chemists, it has been thought best to give, besides the descriptive terms, a great number of the names of such substances, but it has not been considered necessary to mention every known derivative of the various bases and acids. The commercial names of drugs are also given, as well as the native names of medicinal substances that are brought to market from various quarters of the world.

The chemical notation followed has been devised by Dr. Duane on a plan calculated to express structural peculiarities without an unwarrantable expenditure of space. It is explained by Dr. Duane as follows:

"In indicating the structural composition of the aromatic compounds, the following notation is used:

HC-CH  
Benzene,  $\begin{array}{c} \diagup \quad \diagdown \\ \text{HC} \quad \text{CH} \\ \diagdown \quad \diagup \\ \text{HC}=\text{CH} \end{array}$ , is denoted by  $\text{C}_6(\text{H}, \text{H}, \text{H}, \text{H}, \text{H}, \text{H})$ . Any substitution compound of benzene is denoted

by writing the replacing radicle in place of the hydrogen. Thus, phenol,  $\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ \text{HC} \quad \text{C}(\text{OH}) \\ \diagdown \quad \diagup \\ \text{HC}=\text{CH} \end{array}$ , pyrocatechin (orthodi-

oxybenzene),  $\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ \text{HC} \quad \text{C}(\text{OH}) \\ \diagdown \quad \diagup \\ \text{HC}=\text{C}(\text{OH}) \end{array}$ , resorcin (metadioxybenzene),  $\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ \text{HC} \quad \text{C}(\text{OH}) \\ \diagdown \quad \diagup \\ (\text{OH})\text{C}=\text{CH} \end{array}$ , and hydroquinone (paradioxybenzene),

$\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ (\text{OH})\text{C} \quad \text{C}(\text{OH}) \\ \diagdown \quad \diagup \\ \text{HC}=\text{CH} \end{array}$ , are written respectively  $\text{C}_6(\text{H}, \text{H}, \text{OH}, \text{H}, \text{H}, \text{H})$ ,  $\text{C}_6(\text{H}, \text{H}, \text{OH}, \text{OH}, \text{H}, \text{H})$ ,  $\text{C}_6(\text{H}, \text{H}, \text{OH}, \text{H}, \text{OH}, \text{H})$ ,

and  $\text{C}_6(\text{H}, \text{H}, \text{OH}, \text{H}, \text{H}, \text{OH})$ . If the replacing radicles are interconnected, as in quinone,  $\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ \text{HC} \quad \text{C}-\text{O} \\ \diagdown \quad \diagup \\ \text{HC}=\text{C}-\text{O} \end{array}$ , this is

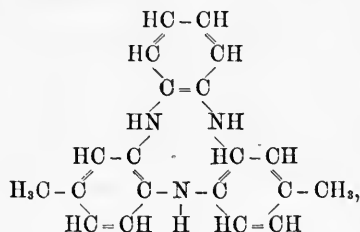

indicated by a brace connecting the symbols of the two radicles, thus:  $\text{C}_6(\text{H}, \text{H}, \text{O}, \text{O}, \text{H}, \text{H})$ . The ab-

sence of a radicle is denoted by a dash, as in phenyl,  $\begin{array}{c} \text{HC}-\text{CH} \\ \diagup \quad \diagdown \\ \text{HC} \quad \text{C}- \\ \diagdown \quad \diagup \\ \text{HC}=\text{CH} \end{array}$ , written  $\text{C}_6(\text{H}, \text{H}, -, \text{H}, \text{H}, \text{H})$ . Conjugated

benzene compounds are represented in like manner. Thus, diphenyl,  $\begin{array}{c} \text{HC}-\text{CH} \quad \text{HC}-\text{CH} \\ \diagup \quad \diagdown \quad \diagup \quad \diagdown \\ \text{HC} \quad \text{C}=\text{C} \quad \text{CH} \\ \diagdown \quad \diagup \quad \diagdown \quad \diagup \\ \text{HC}-\text{CH} \quad \text{HC}-\text{CH} \end{array}$ , is written

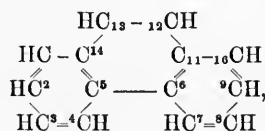

$\text{C}_6(\text{H}, \text{H}, \text{---}, \text{H}, \text{H}, \text{H}) \text{C}_6(\text{---}, \text{H}, \text{H}, \text{H}, \text{H}, \text{H})$ , the brace connecting the two dashes denoting the bond uniting the two carbon atoms with which no radicle is connected. It may also, although less properly, be written  $\text{C}_6(\text{H}, \text{H}, \text{C}_6[\text{---}, \text{H}, \text{H}, \text{H}, \text{H}, \text{H}], \text{H}, \text{H}, \text{H})$ , the second phenyl molecule being considered as a radicle replacing hydrogen in a benzene molecule. So also rosaniline,

may be written  $\text{C}_6(\text{H}, \text{H}, \text{H}, \text{H}, \text{NH}, \text{---}) \text{C}_6(\text{---}, \text{H}, \text{CH}_3, \text{H}, \text{H}, \text{H}) \text{NH} \text{C}_6(\text{---}, \text{---}, \text{H}, \text{H}, \text{CH}_3, \text{H}, \text{H})$ , or, better,

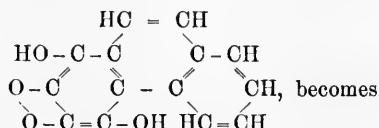

Compounds containing condensed benzene nuclei are written as if composed of a single closed carbon chain, the brace being used to indicate interconnected carbon atoms. Thus, anthracene,

is written  $\text{C}_{14}(\text{H}, \text{H}, \text{H}, \text{H}, \text{---}, \text{---}, \text{H}, \text{H}, \text{H}, \text{H}, \text{---}, \text{H}, \text{H}, \text{---})$ , the formula in this case being considered as a single closed chain, and the carbon atoms being enumerated in the order indicated by the numerals appended to them.

"The foregoing formulæ may be still further abbreviated by writing, instead of a number of adjacent H's separated by commas, a single H with a subscript numeral. Thus, benzene becomes  $\text{C}_6(\text{H}_6)$ ; pyrocatechin,  $\text{C}_6(\text{H}_2, \text{OH}, \text{OH}, \text{H}_2)$ ; resorcin,  $\text{C}_6(\text{H}_2, \text{OH}, \text{H}, \text{OH}, \text{H}_2)$ , or  $\text{C}_6(\text{H}_2, \text{OH}, \text{H}, \text{OH})$ ; hydroquinone,  $\text{C}_6(\text{H}_2, \text{OH}, \text{H}_2, \text{OH})$ ; rosaniline,  $\text{C}_6(\text{H}_4, \text{NH}, \text{---}) \text{C}_6(\text{---}, \text{H}, \text{CH}_3, \text{H}_2, \text{NH}) \text{C}_6(\text{---}, \text{NH}, \text{H}, \text{CH}_3, \text{H}_2)$ ; and alizarin,

$\text{C}_{14}(\text{OH}, \text{O}, \text{O}, \text{OH}, \text{---}, \text{---}, \text{H}_4, \text{---}, \text{H}_2, \text{---})$ . In these formulæ it matters not how the members within the parenthesis are shifted, so long as the order remains the same, since it makes no difference which carbon atom of the closed benzene chain is considered the first. Thus, resorcin may be written either  $\text{C}_6(\text{H}, \text{H}, \text{OH}, \text{H}, \text{OH}, \text{H}_2)$ , or  $\text{C}_6(\text{H}, \text{H}, \text{H}, \text{OH}, \text{H}, \text{OH})$ , or  $\text{C}_6(\text{OH}, \text{H}, \text{H}, \text{H}, \text{OH}, \text{H}_2)$ , or  $\text{C}_6(\text{H}, \text{OH}, \text{H}, \text{H}, \text{OH}, \text{H}_2)$ ."

The mineralogical terms found in medical literature are almost limited to the native forms of certain mineral drugs and to those used in descriptive crystallography; and, with few exceptions, these are all of them that it has been thought well to mention.

In botany the plan has been to include, along with descriptive terms, all classification names ranking above those of genera, but only those of genera and species that have, or have been supposed to have, medicinal, nutritive, or poisonous properties, or belong to the pathogenetic micro-organisms, although in some instances allied plants are mentioned briefly. The popular and the commercial names of plants and vegetable drugs, in English, French, and German, have also been included, as well as the native names of plants that are brought from countries where other languages are spoken.

In zoology the same plan has been followed as in botany. As the animal kingdom contributes but little to the *materia medica*, the list of names of genera and species given is naturally very brief. In regard to the animal parasites, with few exceptions, only those are mentioned that are parasitic in man or the domesticated animals. As to botanical and zoological classification-names, it has been thought desirable that the definitions should be given under those that are preferred by systematic writers, with cross-references from the synonymous names; but authors' preferences vary from time to time, and consequently it will be found in some instances that a name which, at the time the definition was made, seemed to be the one generally preferred has been more or less supplanted by another. The system of cross-references, however, will readily enable the reader to turn from the one to the other.

Not only pure Latin words, but also Latinized forms of Greek words, as well as words adopted unchanged from the Greek into the Latin, together with many words of modern formation but with Latin terminations and forms of inflection, have been given as Latin words. This has been done rather as a matter of convenience (as will be explained when the subject of pronunciation is referred to) than from forgetfulness of the fact that many of them might quite as properly be called English, French, German, Italian, or Spanish by adoption. Some Latin words are omitted from the major list, because they are given as equivalents under English or other headings that are almost identical. This has been done for the sake of saving space.

Regularly formed genitives of Latin nouns of the first and second declensions have not been given as a rule, but those of nouns of the other declensions, especially those involving augmentation, are generally given. In the case of Latinized Greek nouns (here treated as Latin), the Greek form of the genitive is first given, followed by the pure Latin form. For example, the genitive of *basis* is given: *baseos* (-*sis*). The first form is considered preferable in most instances, not from the notion that the Romans necessarily gave up their own forms of inflection in the case of words actually adopted by them from the Greek, but because the great majority of the words in question were not so adopted, but were looked upon by the old medical writers as still Greek, and by many of them written in Greek letters. The second form of the genitive is given because it is found in literature. Latin plurals are not given unless they are decidedly irregular, for they are readily formed from the genitives.

In giving the derivation of words, the endeavor has been made to take up as little space as was consistent with clearness. With this object in view, where a number of words of substantially the same origin follow each other in regular sequence, the derivation has often been given only under one of them, and frequent reference is made (by means of syllables printed in italics, followed by the sign \*) to a *Table of Initial and Terminal Parts of Words*, to be printed at the close of the book, which renders a great saving of space possible, and will, it is thought, give the student a clearer idea than could well be conveyed otherwise of the prevailing systems of scientific word-building. Liddell and Scott's and Donnegan's Greek lexicons, Sophocles's lexicon of Byzantine Greek, and Leverett's and Lewis and Short's edition of Andrews's Freund's Latin lexicon have for the most part been referred to for the orthography, derivation, and meaning of the Greek and Latin words that are given in indicating the etymology of the terms that constitute headings in this work.

The major list includes some words belonging to the Italian, Spanish, Portuguese, or other languages of Europe or to those of Asia, Africa, Central America, South America, or Australasia. They are such as are occasionally met with in medical writings in English, French, or German, being mainly the names of drugs, pharmaceutical preparations, medicinal plants, or mineral springs.

In the arrangement of the subheadings, this work differs somewhat from most dictionaries.

A majority of the compound expressions consist of an adjective and a noun, and most dictionaries arrange them under the adjective. In this one they are usually given under the noun, that being generally the fundamental word. An analogous principle is observed when the title consists of two or more nouns, the definition being given under that noun which is considered the fundamental one, the other nouns being regarded as modifying or adjective expressions; for example, *balm-of-Gilead fir* is defined under FIR. In the case of certain chemical expressions containing such words as ACID, ALCOHOL, ALDEHYDE, etc., this rule is reversed, the definition being placed under the adjective, as the contrary course would have led to articles of inconvenient length. When both of two words constituting a title are equally significant, the definition will generally be found under the first of them, and in doubtful cases the title is entered under both names, a cross-reference being given from one to the other. The names of salts are arranged under those of the bases. In compound anatomical expressions, the definition is placed under the first noun; for example, *neck of the femur* is defined under NECK, and not under FEMUR. Such expressions as *Addison's disease*, *Emmet's operation*, etc., will be found under DISEASE, OPERATION, etc., and, in general, proper names are not given as primary headings. The names of pharmaceutical preparations are to be looked for according to the following rule: A title that contains the name of one or more drugs will be found under the name of the drug, or, in case more than one such name figures in the title, under the one that occurs first; a title that does not contain the name of a drug will be found under the title common to similar preparations. For example, *liquor ammonii carbonatis* is defined under AMMONIUM, but *aqua anhaltina* is defined under AQUA. The same rule applies to products of plants and to parts of plants, regarded as drugs; hence, *radix aconiti* is defined under ACONITUM, and *oil of rosemary* under ROSEMARY. Names of drugs that are natural products (in the sense of not being made according to a formula) are to be looked for under their English titles; for example, *iron sulphate* will be found under IRON, with a cross-reference from FERRI sulphas. But formal preparations made from such natural products are defined under their Latin titles, if such there are; otherwise, under the official or the most customary titles in the language in which they occur; thus, *tincture of chloride of iron* is defined under *Tinctura FERRI chloridi*. But the preparations of the French Codex are usually given under the French titles, even if a Latin synonym exists, inasmuch as such Latin titles as occur in the Codex are always employed as synonyms, and are never regarded as the principal titles; hence, *asparagus juice* is defined under *Suc de pointe d'ASPERGE*, and not under *Succus ASPARAGI*. Those French preparations, however, which closely resemble preparations given under Latin titles in other pharmacopœias are defined under the titles of such analogous preparations; thus, the *Bain dit de Baréges* of the French Codex is defined under *BALNEUM baretginense* [Belg. Ph.]. In general, when any preparation is comparable with one that is official in the United States Pharmacopœia, it is defined under the Latin title there given; otherwise, under the corresponding title in the British Pharmacopœia, or, if that gives no analogous preparation, under the corresponding title of the German Pharmacopœia. In references to the different pharmacopœias, when no date is given, the latest edition is usually meant, but in a few instances such editions were not accessible at the time of printing. In all headings and subheadings, a strictly alphabetical order is followed, every word in the title being regarded as determining this order; the only exception is in the case of nouns in the plural, which are arranged in the subheadings in the same order as if they were in the singular. A cross-reference printed in italics always refers to a heading in the same article; one containing a word printed in small capitals refers to the article on that word (or the word of which it is the plural or an oblique case). The direction "See the major list" denotes that the subheading will be found defined in its proper place as a major heading.

What is said concerning the derivation and signification of English words rests largely on the authority of Dr. Noah Webster. In the spelling of such words, the predominant usage among American authors has been followed for the most part. For example :

For variable nouns in -our,	see the equivalent forms in -or.
“ “ verbs “ -ise,	“ “ “ “ -ize.
“ “ nouns “ -isation,	“ “ “ “ -ization.
“ “ “ “ -er,	“ “ “ “ -re.

The present tendency to omit the hyphen from compound words has been followed strictly in the case of names of chemical compounds, but in other cases some variation has been made ; in general, the hyphen has been retained where it came between two vowels (as in *intra-ocular*), but omitted from other words of like construction (as in *intraperitoneal*). The Latin diphthongs have generally been preserved in English nouns (English, that is, in form), but not so generally in the corresponding adjectives (*e. g.*, *perinæorrhaphy*, but *perineal*). In some such adjectives, however (such as *fœtal*, *fœcal*, etc.), the diphthong has been retained. *Fœtus* has been preferred to *fetus*, not as being required by the etymology, but as being established by long usage. In general, regard has been paid to etymology in giving the preference to one of two or more ways of spelling a word, but it has not been thought best to insist upon radical deviations from widely prevalent usage. For example, *aneurysm* has been preferred to *aneurism*, *thyreoid* to *thyroid*, and *lacrymation* to *lachrymation*. In the case of the latter word, there is good precedent for *lacrimation*, but there seems to be some doubt whether the Latin *lacrima* was a changed form of *δάκρυμα*, or was of common origin with the latter. In the case of such words as *silvestris* (here preferred to *sylvestris*) there is little room for doubt on that point, and the preference has been given accordingly. In like manner, *Sylvian* and *sylvius* would have been made to give way to *Silvian* and *silvius* but for the consideration that it was desirable to retain the primitive form of Latinization of proper names and their derivatives, however faulty it might be.

Latin words derived from Greek words beginning with  $\rho$  will be found spelled with *rh* instead of *r* (*e. g.*, *rhachitis*, not *rachitis*). So, too, in such compounds as *hydrorrhachis* (preferred to *hydrorhachis*) the plain and unequivocal rule of the Greek language has been followed, namely, that, where a prefix ending in a short syllable is united to a word beginning with  $\rho$ , the  $\rho$  must be preceded by  $\rho$ . The Latin rendering of the Greek  $\epsilon$  was various with the ancients, who sometimes employed *ei*, but more commonly *i*. The former seems preferable, both as indicating the origin and as conducing to the proper pronunciation, but this consideration has not been held to be of sufficient moment to warrant any decided departure from prevalent methods. Where, however, the forms in *ei* and in *i* have each seemed to be well supported, the preference has been given to the former, notably in the derivatives of  $\alpha\gamma\gamma\epsilon\lambda\omicron\nu$ . In the spelling of French words, the improved forms employed by a few recent writers, especially the late M. Robin, have been adopted. In German words spelled indifferently with *c* or *k*, the former has generally been preferred. The recent tendency to change *th* to *t* (*e. g.*, to write *Weichteile* instead of *Weichtheile*) it has not been thought best to follow. In Spanish words, the system of accentuation employed in the last edition of the Spanish Academy's "Diccionario de la Lengua Castellana" has been adhered to as far as it could be ascertained to apply.

To indicate the pronunciation, the scheme printed at the foot of the pages has been devised rather for its simplicity and ready intelligibility than for its capacity to show nice shades of pronunciation. Many of the latter can be manifested only with the voice, and an attempt to teach them by means of a printed key would necessarily fail. The chief purpose of the plan adopted

is to so guide those who have already acquired some knowledge of the language concerned as to enable them to take advantage of it, but it is thought that it will also enable others to pronounce in such a manner as to answer all ordinary requirements. Where a word is pronounced in more than one way, both the recognized pronunciations are given, usually, however, only the variable syllables being repeated. To repeat the pronunciation in full would have sacrificed considerable space, and added unwarrantably to the bulk of the book. For the same reason, the pronunciation of subheadings has not been given, but that of the technical words embodied in them will be found under those words as major headings. The pronunciation of Latin words is given according to both the English and the Roman method, the Continental method being ignored—not because it is considered less reasonable than the English, but because this dictionary is designed chiefly for the use of persons who commonly speak the English language, by whom many of the commoner Latin words have ceased to be considered as foreign, and, except when combined with other Latin words or inflected according to Latin forms, are treated as English by adoption. The Roman method, strange as it may seem to those who are unaccustomed to it, and who now see it for the first time in a medical dictionary, is the one now taught in the leading universities of this country, and it will doubtless be adopted everywhere within a very few years. In this work it is indicated in the syllables inclosed in parenthesis-marks. In some instances (like that of the word *hydrocele*) it has been necessary to give three pronunciations—the word being really Latin (or Latinized Greek), and so calling for the two forms of Latin pronunciation, but also so thoroughly adopted into English as in common use to have come to be pronounced as if it had a distinct English form. Latin words made from modern proper names (chiefly botanical and zoological classification-names) have been treated in such a way as to give to that part of the word representing the proper name the pronunciation that the name would have if standing alone, and to the terminal portion the pronunciation that an ordinary Latin word of like formation would have (*e. g.*, *Ammannia*, pronounced only *A<sup>3</sup>m-ma<sup>3</sup>n'ni<sup>2</sup>-a<sup>3</sup>*, and not, as in an ordinary word, by the English method also, *A<sup>1</sup>m-ma<sup>3</sup>n'ni<sup>2</sup>-a<sup>3</sup>*). It has not been thought best to attempt to indicate the pronunciation of other words than those belonging to the Latin, English, French, German, Italian, Spanish, or Portuguese language.

In the transliteration of Arabic words, the following scheme, devised by Dr. Duane, has been followed :

Unconnected.	Terminal.	Medial.	Initial.		Unconnected.	Terminal.	Medial.	Initial.		Unconnected.	Terminal.	Medial.	Initial.
ا	ا	ا	ا	a, e, i, o, u (Initial); ā (medial).	ز	ز	ز	ز	z	ق	ق	ق	ق q
ب	ب	ب	ب	b	س	س	س	س	s	ك	ك	ك	ك k
ت	ت	ت	ت	t	ش	ش	ش	ش	sh	ث	ث	ث	ng (Malay, Turkish).
ث	ث	ث	ث	th (in Persian, <sup>1</sup> / <sub>8</sub> ).	ص	ص	ص	ص	ṣ	ل	ل	ل	l
ج	ج	ج	ج	j	ض	ض	ض	ض	dz	م	م	م	m
ح	ح	ح	ح	c	ط	ط	ط	ط	t	ن	ن	ن	n
خ	خ	خ	خ	kh	ظ	ظ	ظ	ظ	dh	و	و	و	u, w (initial); ū, w (medial).
د	د	د	د	d	ع	ع	ع	ع	o	ه	ه	ه	h
ذ	ذ	ذ	ذ	th'	غ	غ	غ	غ	gh	ي	ي	ي	i, y
ر	ر	ر	ر	r	ف	ف	ف	ف	f				

In the selection of the pictorial illustrations, those have been chosen which were thought most suitable rather than those which were pretty to look upon. Wherever it was practicable, the permission of authors or publishers has been asked for to make use of cuts taken from their works. It is right that the liberality with which such permission has been granted should be recognized; in particular, the author is indebted to Messrs. J. U. and C. G. Lloyd, of Cincinnati, for liberty to make use of the excellent drawings given in their work entitled "Drugs and Medicines of North America."

It is proper that due acknowledgment should be made of the extent to which references to medical literature have been facilitated by the use of the "Index-Catalogue of the Library of the Surgeon-General's Office," and of the privileges which have been accorded to several of the collaborators at the Astor Library, the Library of the New York Hospital, and the Library of the New York Academy of Medicine.

The value of a dictionary seems to me to depend upon its accuracy, the convenience of its arrangement, and its comprehensiveness; and in the preparation of this work those qualities have been esteemed in the order in which they are here enumerated. It is hoped that the work will commend itself to the medical profession.

FRANK P. FOSTER.

# FOSTER'S MEDICAL DICTIONARY.

C. E. Reed M.D. 1894.

**A.** For the force of this letter as an abbreviation and in composition, see the "List of Abbreviations" and the "Table of Initial and Terminal Parts of Words."

**AABACH** (Ger.), n. Written also *Abach*. Pr. a<sup>2</sup>ba<sup>3</sup>ch<sup>2</sup>. A Bavarian spring containing calcium carbonate and sodium chloride and sulphate.

**AABAM** (Ar.), n. An alchemical name for lead. [A, 306.]

**AABEC**, n. The bark of an Australian bush, said to have diaphoretic properties. [N. K. Morton, "Med. and Surg. Reporter," May 29, 1875, p. 425.]

**AACHEN** (Ger.), n. Pr. a<sup>3</sup>ch<sup>2</sup>e<sup>2</sup>n. Fr. *Aix-la-Chapelle*. The Aquisgranum of the ancient Romans; a town in Rhenish Prussia containing a number of sulphurous springs of the temperature of 131° F. According to von Liebig, 10,000 parts of the water of the Kaiserquelle, the richest in sulphur, contain:

Sodium chloride.....	26.161
Sodium bromide.....	.036
Sodium iodide.....	.005
Sodium sulphide.....	.005
Sodium sulphate.....	2.830
Potassium sulphate.....	1.527
Sodium carbonate.....	6.149
Lithium carbonate.....	.049
Magnesium carbonate.....	.506
Calcium carbonate.....	1.579
Strontium carbonate.....	.002
Ferrous carbonate.....	.005
Silicic acid.....	.661
Organic matter.....	.769
Carbon dioxide, free or partly free.....	5.000

It contains also traces of fluorine, boron, arsenic, and probably allyl. The waters are drunk and used as baths, chiefly for chronic catarrhs, biliary congestion, hæmorrhoids, skin diseases, rheumatism, gout, and syphilis. [A, 308, 319, 327.]

**AAEZ**, n. Pr. a<sup>2</sup>e<sup>2</sup>s'. A hot sulphurous spring in Portugal. [A, 321.]

**AAL**, n. Pr. a<sup>3</sup>l. 1. A terebinthaceous tree, indigenous to the Moluccas. The bark is aromatic, and has been used as a condiment. [B, 38.] 2. A red dye obtained from the root of the *Morinda citrifolia*, a tree growing in Central India. [B, 37.]

**AALBAUM** (Ger.), n. Written also *Ahlbaum*. Pr. a<sup>3</sup>l'ba<sup>3</sup>-um. See *Loniceræ xylosteum*.

**AALBEERE** (Ger.), n. Written also *Ahlbeere*. Pr. a<sup>3</sup>l'ba<sup>3</sup>-re<sup>2</sup>. A common term for various species of the genus *Ribes*, also for the *Rhamnus frangula* and the *Prunus padus* (q. v.). [B.]

**AALBEERSTRAUCH** (Ger.), n. Pr. a<sup>3</sup>l'ba<sup>3</sup>-stra<sup>2</sup>-uch<sup>2</sup>. The black-currant bush. See *Ribes rubrum*. [A, 315.]

**AALBESING** (Ger.), n. Pr. a<sup>3</sup>l'ba<sup>3</sup>-zi<sup>2</sup>ng. See *AALBEERE*.

**AALCLIM**, n. Written also *aalklim*. An East Indian species of *Bauhinia*. [B.]

**AALKIRSCH** (Ger.), n. Pr. a<sup>3</sup>l'ki<sup>2</sup>rsh-e<sup>2</sup>. The black wild service-berry. [A, 315.] The term is applied also to various other plants. See *HECKENKIRSCH*, *VOGELBEERE*, and *ELSEBEERE*. [A, 305.]

**AALKLIM**, n. See *AALCLIM*.

**AALSHORN** (Ger.), n. Pr. a<sup>3</sup>ls'ho<sup>2</sup>rn. A term applied to various species of elder. See *SAMBUCUS*.—**A'baum**. The elder-tree.

**AANDE**, n. Pr. a<sup>3</sup>nd. Written also *aand*, *and*, *ande*, *aind*, *aynd*, and *end*. A.-S., *anda*. Old Norse, *andi*. A popular term for breath, generally obsolete, but said to be still in use in Scotland and the North of England. [J, 50.]

**AANS**, n. A Hindu term for the *Terminalia alata*. [A, 328.]

**AARBEERE** (Ger.), n. Pr. a<sup>3</sup>r'ba<sup>3</sup>-re<sup>2</sup>. The *Cratægus torminalis*. [B.]

**AARBLEICHERT** (Ger.), n. Pr. a<sup>3</sup>r'bli<sup>2</sup>-ch<sup>2</sup>e<sup>2</sup>rt. See *AHRBLEICHERT*.

**AARGHEES**, n. A corruption of *aargis*, an Arabic name for the barberry-bush. [A, 322.]

**AARKIRSCH** (Ger.), n. Pr. a<sup>3</sup>r'ki<sup>2</sup>rsh-e<sup>2</sup>. The alder.

**AARON**, **AARONSTAB**, **AARONSWURZEL** (Ger.), n's. Pr. a<sup>3</sup>r'o<sup>2</sup>n, -s-sta<sup>3</sup>b, -s-vurt<sup>2</sup>-ze<sup>2</sup>l. See *ARUM*.

**AARWEIN** (Ger.), n. Pr. a<sup>3</sup>r'vin. See *AHRWEIN*.

**AARZIHLEBAD** (Ger.), n. Pr. a<sup>3</sup>rt'ze<sup>2</sup>-le<sup>2</sup>-ba<sup>3</sup>d. A warm alkaline spring in the Canton of Berne, Switzerland, containing traces of free carbon dioxide and sulphur compounds. [A, 305.]

**AARZIHLE** (Ger.), n. Pr. a<sup>3</sup>rt'ze<sup>2</sup>-le<sup>2</sup>. See *AARZIHLEBAD*.

**AAS**, n. Pr. a<sup>3</sup>z. A commune in the Lower Pyrenees, containing the springs that furnish the *eaux-bonnes*. [A, 321.]

**AAS** (Ger.), n. Pr. a<sup>3</sup>s. A carcass.—**A'blatter**. Malignant pustule. [E.]—**A'blume**. The carrion-flower. See *STAPELLA hirsuta*.—**A'fliege**. The carrion-fly. See *MUSCA cadaverina*. [B.]—**A'geruch**, **A'gestank**. A cadaveric odor.—**A'haft**. Cadaveric.—**A'pflanze**. See *A'BLUME*.—**A'pocke**. 1. Malignant pustule. 2. The sheep-pox. [A, 315.]

**AASMUS** (Lat.), n. m. Pr. a<sup>3</sup>z'mu<sup>3</sup>s, a<sup>3</sup>s'mus. Gr., *ἀσμός*, the act of breathing. An old term for asthma. [E.]

**ABABANGAY**, n. A term applied in the Philippine Islands to the *Calosanthus indica*. [A, 321.]

**ABABIL**, n. According to Kraus, a Persian term for certain birds that were fabled to have carried the small-pox from the sea to Æthiopia; also for the disease itself. This use of the term probably arose from a mistaken interpretation of a passage in the Koran, the word *ababil* (meaning a separate flock, a bevy) having been taken to mean a special variety of bird. Many fabulous stories were told of the birds mentioned in that passage in the Koran. [A, 322; B, 44, 47.]

**ABABOUY**, n. A West Indian term for the *Ximenia americana*.

**ABACA**, n. Fr., *chanvre de Manille*. Manila or West Indian hemp. See *MUSA textilis*.

**ABACH** (Ger.), n. Pr. a<sup>3</sup>b'a<sup>3</sup>ch<sup>2</sup>. See *AABACH*.

**ABÄCHZEN** (Ger.), v. refl. Pr. a<sup>3</sup>b'e<sup>2</sup>ch<sup>2</sup>-tze<sup>2</sup>n. To pine away.

**ABACTINAL**, adj. Pr. a<sup>3</sup>b-a<sup>2</sup>k-ti<sup>2</sup>na<sup>3</sup>l. For deriv., see *Ab-\** and *ACTINIC*. Lat., *abactinalis*. Fr., *abactinal*. Gr., *ἀβακτινisch*. It., *abattinale*. Sp., *abactinal*. L. Agassiz's term for that part of a radiate which is opposite the pole from which the organs are supposed to radiate. [B, 30.]

**ABACTIO** (Lat.), n. f. Pr. a<sup>3</sup>b-a<sup>2</sup>k'shi<sup>2</sup>-o, a<sup>3</sup>b-a<sup>2</sup>k'ti<sup>2</sup>-o. From *ab* (see *Ab-\**) and *actio* (from *agere*), an act. Gr., *ἀπακσία*. A stealthy or forcible driving away.—**A. foetus**, **A. partus**. 1. Artificial premature labor. 2. Criminal abortion. [A, 322.]

**ABACTUS** (Lat.), adj. Pr. a<sup>3</sup>b-a<sup>2</sup>k'tu<sup>3</sup>s, a<sup>3</sup>b-a<sup>2</sup>k'tu<sup>4</sup>s. From *abigere*, to drive away, to force birth. Expelled.—**A. venter**. See under *VENTER*.

**ABACUS** (Lat.), n. m. Pr. a<sup>3</sup>b'a<sup>2</sup>k-u<sup>3</sup>s, a<sup>3</sup>b'a<sup>2</sup>-ku<sup>4</sup>s. Gr., *ἄβαξ*. Anciently, a table for drawing, playing games, etc. A table for holding preparations. [A, 336.]

**ABADES**, n. An old term for cantharides. [A, 334.]

**ABAGMENTUM** (Lat.), n. n. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-a<sup>2</sup>g(a<sup>2</sup>g)-me<sup>2</sup>n'tu<sup>3</sup>m-(tu<sup>4</sup>m). From *abigere* (see *ABACTUS*). An abortifacient. [A, 312.]

**ABAIRUCU**, n. Pr. a<sup>3</sup>b-a<sup>2</sup>e-ru<sup>4</sup>ku. An East Indian term for the fruit of the *Cynometra ramiflora*. [A, 321.]

**ABAISER**, **ABASIR**, n. Pr. a<sup>3</sup>b-a<sup>2</sup>su<sup>3</sup>r. Portuguese, *abaissir*. Ivory black, animal charcoal. [B, 38, 44.]

**ABASSE-LANGUE** (Fr.), n. Pr. a<sup>3</sup>-bas-la<sup>3</sup>ng. A tongue-depressor.

**ABAISSEMENT** (Fr.), n. Pr. a<sup>3</sup>-bas-ma<sup>3</sup>n<sup>2</sup>. 1. A falling, as of the temperature or of a part (e. g., prolapse of the uterus). 2. A lowering, as of the eyelids or the voice. [A, 300.] 3. The operation of couching for cataract. [F.] 4. Mental depression.

**ABAISSEUR** (Fr.), n. Pr. a<sup>3</sup>-ba-su<sup>3</sup>r. A depressor (either a muscle or an instrument).—**A. de l'aile du nez**. See *DEPRESSOR alæ nasi*.—**A. de la langue**. 1. The sterno-hyoid muscle. 2. An instrument for depressing the tongue.—**A. de la lèvre inférieure**. See *DEPRESSOR labii inferioris*.—**A. de la mâchoire inférieure**. The digastric muscle.—**A. de l'angle des lèvres**. See *DEPRESSOR anguli oris*.—**A. de l'angle du nez**. See *DEPRESSOR alæ nasi*.—**A. de la paupière**. An instrument for depressing the eyelid. [F.]—**A. de la paupière inférieure**. See *DEPRESSOR palpebræ inferioris*.—**A. de la pupille**. See *RECTUS inferior oculi*.—**A. de la vessie**. See *LEVATOR prostaticæ*.—**A. de l'épiglotte**. See *DEPRESSOR epiglottidis*.—**A. de l'hyoïde**. See *STERNO-HYOIDEUS*.—**A. de l'œil**. See *RECTUS inferior oculi*.—**A. du larynx**. See *STERNO-THYROIDÆUS*.—**A. externe de la tête**. That portion of the sterno-cleido-mastoid muscle which is inserted into the clavicle. [A, 301].—**A. interne de la tête**. That portion which is inserted into the sternum. [A, 301.]

**ABAJANUSS** (Ger.), n. Pr. a<sup>3</sup>-ba<sup>3</sup>-ya<sup>3</sup>-nus. The cashew-nut.

**ABAJOUÉ** (Fr.), n. Pr. a<sup>3</sup>-ba<sup>3</sup>-z-yu. A contraction of *à bas joue* (au bas de la joue). [A, 306.] See *CHEEK-POUCH*.

A, ape; A<sup>2</sup>, at; A<sup>3</sup>, ah; A<sup>4</sup>, all; Ch, chin; Ch<sup>2</sup>, loch (Scottish); E, he; E<sup>2</sup>, ell; G, go; I, die; I<sup>2</sup>, in; N, in; N<sup>2</sup>, tank; O, no; O<sup>2</sup>, not; O<sup>3</sup>, whole; Th, thin; Th<sup>2</sup>, the; U, like oo in too; U<sup>2</sup>, blue; U<sup>3</sup>, lull; U<sup>4</sup>, full; U<sup>5</sup>, urn; U<sup>6</sup>, like ü (German).

**ABAKTINISCH** (Ger.), adj. Pr. a<sup>2</sup>b-a<sup>2</sup>k-te'ni<sup>2</sup>sh. Abactinal.

**ABALIENATED**, adj. Pr. a<sup>2</sup>b-a<sup>2</sup>li<sup>2</sup>-e<sup>2</sup>n-a-te<sup>2</sup>d. Lat., *abalienatus*. 1. So injured or diseased as to require removal. (Said of a part.) 2. (Obs.) weakened. (Said of the intellectual faculties.) [B, 39.] 3. Corrupted. [Celsus; A, 336.] 4. Severed, separated. [A, 318.]

**ABALIENATIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a(a<sup>2</sup>)-li<sup>2</sup>-e<sup>2</sup>n-a'(a<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-o. From *abalienare*, to estrange. Gr., ἀπαλλοτριώσις. Abalienation.—**A. mentis**. Weakness of the mind.

**ABALIENATION**, n. Pr. a<sup>2</sup>b-a<sup>2</sup>li<sup>2</sup>-e<sup>2</sup>n-a'shu<sup>2</sup>n. Lat., *abalienatio*. Fr., *abaliénation*. Ger., *Abalienation*. It., *abalienazione*. Sp., *abalienación*. The state of being abalienated (q. v.).

**ABALIENATUS** (Lat.), adj. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a(a<sup>2</sup>)-li<sup>2</sup>-e<sup>2</sup>n-a'(a<sup>2</sup>)-tu<sup>2</sup>s(u<sup>2</sup>s). Abalienated. Gr., ἀπαλλοτριωμένος.—**Membra abalienata**. See under MEMBRUM.

**ABAMA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a(a<sup>2</sup>)-ma<sup>2</sup>. A name given by Adanson to the genus *Narthecium* [Möhr.]. [B, 41, 42.]

**ABAMÉES** (Fr.), n. pl. Pr. a<sup>2</sup>-ba<sup>2</sup>-ma. A group of plants of the natural order *Liliaceae* which have their type in the *Abama*. [B, 38.]

**ABÄNDERUNG** (Ger.), n. Pr. a<sup>2</sup>b'-e<sup>2</sup>n-de<sup>2</sup>-rung. A variation (as from the type of a species); a variety. [B.]

**ABANET** (Heb.), n. See ABNET.

**ABANGA**, n. Written also *abauga*. A negro name for the fruit of a West Indian species of palm. The seeds are used in medicine, and an intoxicating drink is made from the sap of the trunk of the tree. [B, 49.]

**ABÄNGSTIGUNG, ABÄNGSTUNG** (Ger.), n's. Pr. a<sup>2</sup>b'-e<sup>2</sup>ng-sti<sup>2</sup>-gung, -stung. Anxiety. [A, 315.]

**ABANO** (It.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>-no. A hot spring in the northern part of Italy. The water contains sodium, magnesium, and calcium chlorides, magnesium iodide and bromide, calcium and magnesium carbonates, silicic acid, iron silicate, carbon dioxide, nitrogen, naphtha vapor, and oxygen. [A, 328.]

**ABAPTISTON**, n. Pr. a<sup>2</sup>b-a<sup>2</sup>p-ti<sup>2</sup>s-to<sup>2</sup>n. Lat., *abaptista*, *abaptistum*. Gr., ἀβάπτιστον (ῥῥῑπανον understood), a trephine that will not sink suddenly. Fr., *abaptiste*. Ger., *Leiste*. It., *abattisto*. Sp., *abaptista*. An ancient term for a trephine that was so constructed as not to sink suddenly when the bone had been perforated by it, and thus injure the dura mater. According to some authors, this was due to its shape, that of the modern conical trephine; others state that it had a guard to prevent its sinking beyond a certain depth. [A, 311; E, 11.]

**ABAPUS** (Lat.), n. m. Pr. a<sup>2</sup>b'(a<sup>2</sup>b')-a<sup>2</sup>-pu<sup>2</sup>s(pu<sup>2</sup>s). Adanson's term for the genus *Gethyllis* (q. v.). [B, 41, 42.]

**ABAREITEN** (Ger.), v. intr. Pr. a<sup>2</sup>b'a<sup>2</sup>r-bi-te<sup>2</sup>n. To cease to ferment.

**ABAREMOTEMO** (Port.), n. Pr. a<sup>2</sup>b-a<sup>2</sup>-ra-mo-ta'mo. A Brazilian tree of the genus *Abaremotemon*. [B, 44.]

**ABAREMOTEMON** (Lat.), n. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a<sup>2</sup>-re(r)-mo-te'(ta')-mo<sup>2</sup>n. A Latinized form of *abaremotemo*; Benthain's term for a genus of leguminous plants of the sub-order *Mimosaceae*, embracing some species of the genus *Pithecolobium*. [B, 41.]

**ABARIGA**, n. A species of palm growing on the Island of St. Thomas, which furnishes the fruit called abanga. [B, 38.]

**ABARNAHAS, ABARNAS** (Ar.), n. The alchemists' term for magnesia.

**ABART** (Ger.), n. Pr. a<sup>2</sup>b'a<sup>2</sup>rt. See ABÄNDERUNG.

**ABARTAMEN** (Ar.), n. An old term for lead.

**ABARTHROSIS**, n. Pr. a<sup>2</sup>b-a<sup>2</sup>r-thro-si<sup>2</sup>s. For deriv., see *Ab\** and *ARTHROSIS*. Fr., *arthrose*. Ger., *Arthrose*. It., *abartrosi*. Sp., *arthrosis*. See DIARTHROSIS and APARTHROSIS.

**ABARTICULAIRE** (Fr.), adj. Pr. a<sup>2</sup>b-a<sup>2</sup>r-ti<sup>2</sup>-ku<sup>2</sup>-la<sup>2</sup>r. Not connected with a joint. See ARTHRITISME *abarticulaire*.

**ABARTICULATION**, n. Pr. a<sup>2</sup>b-a<sup>2</sup>r-ti<sup>2</sup>-ku<sup>2</sup>-la<sup>2</sup>-shu<sup>2</sup>n. Gr., ἀρθρῶσις. Lat., *abarticulatio* (see *Ab\** and *ARTICULATION*). Fr., *abarticulation*. Ger., *Abarticulation*, *Verrenkung* (2d def.). It., *abarticolazione*. Sp., *abarticulación*. 1. That variety of articulation known as diarthrosis. 2. A dislocation.

**ABARTIG** (Ger.), adj. Pr. a<sup>2</sup>b'a<sup>2</sup>r-ti<sup>2</sup>g. Degenerate. [A, 315.]

**ABARTUNG** (Ger.), n. Pr. a<sup>2</sup>b'a<sup>2</sup>r-tung. Degeneracy.

**ABAS** (Ar.), n. Tinea. [B, 44.]

**ABASALOA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a<sup>2</sup>s(a<sup>2</sup>s)-a<sup>2</sup>-lo<sup>2</sup>a<sup>2</sup>. Llave and Lexarza's term for a genus of the *Compositae*, of which only one species is known, growing in Mexico. [B, 42.]

**ABASICARPE** (Fr.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>-si<sup>2</sup>-ka<sup>2</sup>rp. A genus of plants of the natural order *Cruciferae*. [B, 38.]

**ABASIR**, n. See ABASIER.

**ABASOLOA**, n. See ABASALOA.

**ABAS-TUMAN**, n. The seat of a military bathing establishment in the Caucasus, where there are warm springs, feebly sulphurous. [A, 319.]

**ABATAGE** (Fr.), n. Written also *abattage*. Pr. a<sup>2</sup>-ba<sup>2</sup>-ta<sup>2</sup>zh. Ger., *Niederwerfen*, *Schlachten* (1st def.). It., *abbattimento* (1st def.). Sp., *matanza* (1st def.). 1. The slaughter of an animal to prevent the spread of disease. 2. (Vet.) the procedure of "casting" an animal upon which an operation is to be performed. [A, 300.]

**ABÂTARDISSEMENT** (Fr.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>-ta<sup>2</sup>r-des-ma<sup>2</sup>n<sup>2</sup>. Ger., *Ausartung*, *Abartung*. It., *degenerazione*. Sp., *degeneración*. Degeneracy (the degeneration of a race or a breed—not histological degeneration). [A, 300.]

**ABATIA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a(a<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. Ruiz and Pavón's term for a genus of the natural order *Lythraceae*. [B, 41.]

**ABATIEÆ** (Lat.), n. f. pl. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-a(a<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-e'(a')-e(a<sup>2</sup>a). A tribe of plants belonging to the natural order *Samydaceae*. It is named from the genus *Abatia*, by some included under this tribe, but usually referred to the order *Lythraceae*. [B, 19.]

**ABATIS** (Fr.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>-te. A collective term for those parts of a fowl that are cast aside as unfit to be cooked, and for the refuse of a slaughter-house. [A, 300.]

**ABATITIBABI**, n. A South American tree yielding a transparent resin. [A, 305.]

**ABATTAGE** (Fr.), n. See ABATAGE.

**ABATTEMENT** (Fr.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>t-ma<sup>2</sup>n<sup>2</sup>. Prostration; a sudden and decided diminution of the phenomena of nervous power. [J. Bouillaud, A, 332.]

**ABATTIREN** (Ger.), v. tr. Pr. a<sup>2</sup>-ba<sup>2</sup>-te're<sup>2</sup>n. To prostrate.

**ABATTOIR** (Fr.), n. Pr. a<sup>2</sup>-ba<sup>2</sup>-twa<sup>2</sup>r. Ger., *Schlachthaus*. It., *ammazzatoio*. Sp., *matadero*. A place set apart for the slaughter of animals.

**ABATTRE** (Fr.), v. Pr. a<sup>2</sup>-ba<sup>2</sup>tr. 1. (Tr.) to prostrate. 2. (Reflexive [s'a.]) to fall down prostrate, either wholly or on the knees (said of the lower animals). [A, 301.]

**ABÄTZEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'e<sup>2</sup>t-ze<sup>2</sup>n. To corrode away; to remove with caustic. [A, 315.]

**ABAUGA**, n. See ABANGA.

**ABAVO**, n. See ADANSONIA *digitata*.

**ABAX** (Lat.), n. f. Pr. a<sup>2</sup>-ba<sup>2</sup>x, a<sup>2</sup>-ba<sup>2</sup>x. Gen., *abaxis*. Gr., ἀβάξ. See ABACUS.

**ABAXILE**, adj. Pr. a<sup>2</sup>b-a<sup>2</sup>x'i<sup>2</sup>l. For deriv., see *Ab\** and *AXIS*. In botany, situated away from the axis. (Said of the embryo when not lying in the centre of the seed.) [B, 39.]

**ABBÄHEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'ba-he<sup>2</sup>n. To foment thoroughly. [A, 315.]

**ABBÄLGEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'be<sup>2</sup>-l-ge<sup>2</sup>n. To enucleate.

**ABBAYE DU VAL, ABBECOURT** (Fr.), n's. Pr. a<sup>2</sup>-ba<sup>2</sup>-du<sup>2</sup>-va<sup>2</sup>l, a<sup>2</sup>-ba<sup>2</sup>-kur. A spring near Versailles, in France, containing iron and calcium bicarbonates and magnesium sulphate and chloride. [A, 328.]

**ABBEIZEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'bi-tze<sup>2</sup>n. To bite away, to remove with corrosives.

**ABBEVILLE** (Fr.), n. Pr. a<sup>2</sup>b-vel. A town in the department of the Somme, in France, having a cold mineral spring containing iron and calcium sulphates, sodium hydrochlorate, and bitumen. [A, 331.]

**ABBIEGUNG** (Ger.), n. Pr. a<sup>2</sup>b'be-gung. Abduction.

**ABBINDEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'bi<sup>2</sup>n-de<sup>2</sup>n. 1. To ligate, especially to tie off or remove with an écraseur; hence to castrate (said of the lower animals). 2. To wean a young animal. [A, 315.]

**ABBINDEWERKZEUG** (Ger.), n. Pr. a<sup>2</sup>b'bi<sup>2</sup>n-de<sup>2</sup>-ve<sup>2</sup>rk'z-zeug. An old term for the implements used in tying off parts. [A, 305.]

**ABBISS** (Ger.), n. Pr. a<sup>2</sup>b'bi<sup>2</sup>s. A biting off; the part bitten off.—**Teufels A.** Devil's-bit. See *SCABIOSA succisa*.

**ABBLÄTERN** (Ger.), v. intr. Pr. a<sup>2</sup>b'bla<sup>2</sup>t-e<sup>2</sup>rn. To recover from the small-pox. [A, 315.]

**ABBLÄTTERN** (Ger.), v. intr. Pr. a<sup>2</sup>b'ble<sup>2</sup>t-e<sup>2</sup>rn. To exfoliate.—**A'd.** adj. Exfoliating, exfoliative; capable of causing exfoliation. [A, 315.]

**ABBLÄTTERUNG** (Ger.), n. Pr. a<sup>2</sup>b'ble<sup>2</sup>t-e<sup>2</sup>-rung. Exfoliation, desquamation.—**A'smittel**. An exfoliative.

**ABBRAND** (Ger.), n. Pr. a<sup>2</sup>b'bra<sup>2</sup>-nd. 1. The oxide formed when a metal is heated in the air. [B, 2.] 2. The loss of material in the process of testing by heat. [A, 315.]

**ABBRECHEN** (Ger.), n. Pr. a<sup>2</sup>b'bre<sup>2</sup>-ch<sup>2</sup>-e<sup>2</sup>n. See ABRUPTION.

**ABBRENNEN** (Ger.), v. tr. Pr. a<sup>2</sup>b'bre<sup>2</sup>n-e<sup>2</sup>n. 1. To burn away. 2. To deflagrate.

**ABBRENNER** (Ger.), n. Pr. a<sup>2</sup>b'bre<sup>2</sup>n-e<sup>2</sup>r. A deflagrator. [A, 315.]

**ABBRENNUNG** (Ger.), n. Pr. a<sup>2</sup>b'bre<sup>2</sup>n-ung. Deflagration.

**ABBRÜHUNG** (Ger.), n. Pr. a<sup>2</sup>b'bru<sup>2</sup>-hung. A scalding.

**A-B-C-DARIA** (Lat.), n. f. Pr. a(a<sup>2</sup>)-be(ba)-se(ka)-da'(da')-ri<sup>2</sup>-a<sup>2</sup>. See *ACMELLA mauritiana*.

**ABCEDE** (Fr.), adj. Pr. a<sup>2</sup>-ba-sa-da. Advanced to suppuration; having formed an abscess. [E.]

**ABCEDER** (Fr.), v. intr. Pr. a<sup>2</sup>-ba-sa-da. Lat., *abscedere*. Ger., *verreitem*. It., *suppurare*. Sp., *abceder*. 1. To end in the formation of an abscess (said of a phlegmon). 2. To break and discharge (said of an abscess). [A, 300.]

**ABCES** (Fr.), n. Pr. a<sup>2</sup>-ba-sé. An abscess. [E.]—**A. aigu**. An acute abscess. [E.]—**A. arthritique**. A wandering abscess which originates in a diseased joint. [Nicaise, "Rev. de chir.," June, 1885, p. 486.]—**A. canaliculaire du sein**. A mammary abscess communicating with the milk-ducts. [E.]—**A. chaud**. An acute abscess. [E.]—**A. consécutif**. A secondary or metastatic abscess. [E.]—**A. constitutionnel**. A constitutional abscess. See *DIATHETIC ABSCESS*.—**A. de la lymphée**. See *LYMPHATIC ABSCESS*.—**A. dermique**. See *DERMOID ABSCESS*.—**A. des gaines tendineuses**. See *THECAL ABSCESS*.—**A. de l'œil**. See *PANOPHTHALMITIS purulenta*.—**A. de voisinage**. See *ABSCESS of proximity*.—**A. en bouton de chemise**. A shirt-stud abscess; a mammary abscess which, being essentially submammary, communi-

cates with a large subcutaneous pus-cavity by a narrow channel running through the mammary gland—the entire suppurating tract having thus the shape of a shirt-stud. [A, 222.]—**A. es-sentiel.** See *Idiopathic abscess*.—**A. froid.** A cold abscess.—**A. froid extra-péritostique.** A variety of the "abscess of proximity" in which an abscess forms in the cellular tissue situated on the outer surface of the periosteum, and is generally held to be indicative of osteitis. [Nicaise, *loc. cit.*]—**A. ganglionnaire.** See *Lymphatic abscess*.—**A. ganglionnaire scrofuleux.** A scrofulous lymphatic abscess.—**A. hémattique.** See *Diathetic abscess*.—**A. laiteux.** See *Mammary abscess*.—**A. lamelleux de la membrane du tympan.** See *Interlamellar abscess of the membrana tympani*.—**A. médullaire.** According to Chassaignac, a medullary abscess should be distinguished from purulent osteo-myelitis by its being strictly confined by new bony walls formed within the medullary cavity. ["Arch. gén. de méd.," Feb., 1880, p. 240.]—**A. migrateur.** See *Wandering abscess*.—**A. odontopathique.** See *Dental abscess*.—**A. opistho-pharyngien.** See *Ketro-pharyngeal abscess*.—**A. par congestion.** See *Wandering abscess*.—**A. par dépôt.** An old term for a wandering abscess.—**A. par fluxion.** An acute abscess.—**A. par sympathie de continuité.** See *Sympathetic abscess*.—**A. péri-amygdalien.** An abscess in the tissue surrounding the tonsil.—**A. sanguin.** An abscess due to the breaking down of an effusion of blood.—**A. séreux.** Gosselin has used the term *a. séreux sous-péritostique* to denote a collection of reddish serosity beneath the periosteum during the early stage of traumatic osteitis; Nicaise applies the expression *a. séreux extra-péritostique* to like collections on the outer surface of the periosteum in cases of "external peritostitis" (see *PAROSTEITIS*). [Nicaise, "Rev. mens. de méd. et de chir.," Oct., 1879, p. 780.]—**A. soudain.** Under this term Delpech has described a variety of abscess, included by him among the cold abscesses. These abscesses, which are of extreme gravity, develop suddenly in the subcutaneous or the intermuscular cellular tissue, without having been preceded by any manifest local inflammation. They very rapidly acquire a large size, and are accompanied by high fever. When the abscess bursts, the pus appears of good character, but is remarkably fetid. Sometimes it becomes more serous and quite abundant in the course of a few days; in other cases the first abscess dries up suddenly, and others follow in great numbers. A fetid, serous diarrhoea sets in, and this and the discharge from the abscesses rapidly undermine the patient's strength. [S. Laugier, A, 329.]—**A. sous-épidermique.** Suppuration beneath the epidermis, as in paronychia. [A, 331.]—**A. stercoraire.** **A. stercoral.** See *Fecal abscess*.—**A. sudoripare.** See *ABSCESSES sudoriparus*.—**A. tubéreux.** An abscess of a tuberos or furuncular appearance. The term was applied by Velpeau to abscesses of the areola of the nipple. [A, 222.]

**ABCESSUS** (Lat.), n. m. Pr. a<sup>2</sup>b-se<sup>2</sup>s-u<sup>3</sup>s, a<sup>2</sup>b-ke<sup>2</sup>s-u<sup>3</sup>s. See *ABSCESsus*.

**A-B-C-KRAUT** (Ger.), n. Pr. a<sup>2</sup>-ba-tsa<sup>2</sup>-kra<sup>2</sup>-ut. See *ACMELLA mauritiana*.

**ABDACHUNG** (Ger.), n. Pr. a<sup>2</sup>b-da<sup>2</sup>ch<sup>2</sup>-ung. See *DÉCLIVE*.

**ABDAMPFEN** (Ger.), v. intr. Pr. a<sup>2</sup>b-da<sup>2</sup>mp-fe<sup>2</sup>n. To evaporate (in the passive sense).

**ABDÄMPFEN** (Ger.), v. tr. Pr. a<sup>2</sup>b-de<sup>2</sup>mp-fe<sup>2</sup>n. To evaporate (to cause to evaporate).

**ABDÄMPFUNG** (Ger.), n. Pr. a<sup>2</sup>b-de<sup>2</sup>mp-fung. See *ABDÄMPFEN*.—**A. Gefäss.** An evaporating vessel.—**A. skessel.** An evaporating kettle.—**A. smaschine.** See *EVAPORATOR*.—**A. spfanne.** An evaporating pan.—**A. sschale.** An evaporating capsule.

**ABDELAVI** (Ar.), n. See *CUCUMIS châte*.

**ABDOMEN** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-do-me<sup>2</sup>n. Gen., *abdominis*. Gr., *λᾱπάρις, γαστήρ, ὑπογάστριον, ἥπαρ, περὶτόναον*. Fr., *abdomen, ventre, bas-ventre*. Ger., *Unterleib, Hinterleib* (in the lower animals), *Bauch, Wanst*. It., *addome, addomine, ventre*. Sp., *abdomen, vientre, bajo vientre*. Syn.: *venter, venter infimus* (see *imus*), *abvus, uterus* [Celsus, A, 322]. Of doubtful etymology, generally said to be from *abdere*, to conceal, and *omen* (either in the sense of a presage, from the ancient augurs' having found their inspiration in its contents, or as a contraction of *omentum*)—so that the word would signify either that which conceals the omen or that which conceals the omentum. [A, 300.] Kraus considers it more likely to have come from the Hebrew *בֶּטֶן*, the father (or source) of ordure. [A, 322.] The word is said to have been first used in English writing by Copland, in 1541. [B, 39.] 1. The belly: being that one of the great visceral cavities of the body which is bounded by the diaphragm above and the floor of the pelvis (or, in a more restricted sense, the plane of the pelvic entrance) below. 2. (Obs.) the genitals. 3. (Fig.) glutony.—**Abdominis exploratio.** A physical examination of the abdomen.—**Pendulous a.** Lat., *venter propendulus*. Fr., *ventre avalé* (ou en besace), *prolapsus profund* (ou *pariétoviscéral*) de la paroi abdominale [Guéniot, "Arch. de tocol.," May, 1885, p. 425]. Ger., *Hängebauch*. It., *ventre avallato*. Sp., *vientre caído*. An abnormal protrusion of the anterior wall of the abdomen and its sinking downward in front of the pubic arch. The term should be restricted to that condition in which the weight of the abdominal contents fails to be supported properly, from lack of tone in the muscles, but it is sometimes applied to the prominence due to an accumulation of fat. When the state first referred to occurs during pregnancy it is often spoken of as a form of anteversion of the gravid uterus. See also *EVENTRATION* and *PROLAPSUS graisseus*.

**ABDOMINAL**, adj. Pr. a<sup>2</sup>b-do<sup>2</sup>m-i<sup>2</sup>n-a<sup>2</sup>l. Gr., *ὑπογάστριος*. Lat., *abdominalis*. Fr., *abdominal*. Ger., *abdominal*. It., *addominale*. Sp., *abdominal*. Syn.: *ventral*. 1. Pertaining to the abdomen. 2. (Rare) having a large belly. See *ABDOMINOUS*. 3. Having ventral fins (said of fishes). [B.]—**A-athmen** (Ger.). A.

respiration.—**A-eingewelde** (Ger.). The a. organs.—**A-krankheit** (Ger.). A disease of an a. organ.—**A-nervenfieber** (Ger.). Typhoid fever.—**A-schwangerschaft** (Ger.). Abdominal gestation.—**A-typhus** (Ger.). Typhoid fever.

**ABDOMINOSCOPY**, n. Pr. a<sup>2</sup>b-do<sup>2</sup>m-i<sup>2</sup>n-o<sup>2</sup>s-co-pi<sup>2</sup>. Lat., *abdominoscopia* (from *abdomen*, and Gr., *σκοπεῖν* [see *-scopy*]). Fr., *abdominoscopie*. Ger., *Abdominoscopie*. It., *addominoscopia*. Sp., *abdominoscopia*. See *LAPAROSCOPY*.

**ABDOMINO-THORACIC**, adj. Pr. a<sup>2</sup>b-do<sup>2</sup>m-i<sup>2</sup>n-o-tho-ra<sup>2</sup>s-i<sup>2</sup>k. Lat., *abdomino-thoracicus*. Fr., *abdomino-thoracique*. Ger., *abdominothoracisch*. It., *addomino-thoracico*. Sp., *abdomino-thoracico*. Pertaining to both the abdomen and the thorax.

**ABDOMINOUS**, adj. Pr. a<sup>2</sup>b-do<sup>2</sup>m-i<sup>2</sup>n-u<sup>3</sup>s. An unusual synonym of *abdominal*, especially in the sense of the 2d def. of that word.

**ABDOMINO-UTEROTOMY**, n. Pr. a<sup>2</sup>b-do<sup>2</sup>m-i<sup>2</sup>n-o-u<sup>3</sup>-te<sup>2</sup>-ro<sup>2</sup>t-o-mi<sup>2</sup>. From *abdomen, uterus*, and *τέμνειν* [see *-lomy*]). Fr., *abdomino-utérologie*. See *LAPARO-HYSTEROTOMY*.

**ABDOPPELN** (Ger.), v. tr. Pr. a<sup>2</sup>b-do<sup>2</sup>p-pe<sup>2</sup>ln. To double-stitch; to sew with a double thread. [A, 315.]

**ABDREHEN** (Ger.), v. tr. Pr. a<sup>2</sup>b-dra-he<sup>2</sup>n. To twist off; to remove by torsion.

**ABDUCE**, v. tr. Pr. a<sup>2</sup>b-du<sup>2</sup>s'. See *ABDUCT*.

**ABDUCENS** (Lat.), adj. and n. Pr. a<sup>2</sup>b-du<sup>2</sup>-se<sup>2</sup>nz, a<sup>2</sup>b-du<sup>2</sup>-ke<sup>2</sup>ns. From *ab* (see *Ab-\**), and *ducere*, to lead. See *ABDUCT* and *ABDUCTOR*.—**A. labiorum.** See *LEVATOR anguli oris*.—**A. nerve.** See under *NERVE*.—**A. oculi.** Fr., *abducteur de l'œil*. Ger., *Abziehmuskel des Auges*. It., *abductore dell'occhio*. Sp., *abductor del ojo*. 1. The external rectus muscle of the eye, the action of which is to roll the globe outward. It arises by two heads, one from the outer margin of the optic foramen, and the other from the lower margin of the sphenoidal fissure, and is inserted into the sclerotic near the outer margin of the cornea. [F.] 2. The a. nerve. See under *NERVE*.—**A. oris.** See *LEVATOR anguli oris*.—**A-wurzeln** (Ger.) The roots of the a. nerve. [I, 6.]

**ABDUCENS-FACIALIS** (Lat.), adj. Pr. a<sup>2</sup>b-du<sup>2</sup>-se<sup>2</sup>nz-fa<sup>2</sup>-si<sup>2</sup>-a-li<sup>2</sup>s, a<sup>2</sup>b-du<sup>2</sup>-ke<sup>2</sup>ns-fa<sup>2</sup>-ki<sup>2</sup>-a-li<sup>2</sup>s. Pertaining to the abducens and the facial nerves.—**A.-P-kern** (Ger.). **A.-f. nucleus.** The common nucleus of the abducens and facial nerves. [I, K.]

**ABDUCT**, adj. Pr. a<sup>2</sup>b-du<sup>2</sup>-se<sup>2</sup>nt. Lat., *abducens*. Fr., *abducteur*. Ger., *abziehend*. It., *abductore*. Sp., *abductor*. Abducting, acting as an abductor.

**ABDUCIREN** (Ger.), v. tr. Pr. a<sup>2</sup>b-dut-se<sup>2</sup>re<sup>2</sup>n. To abduct.

**ABDUCIREND** (Ger.), adj. Pr. a<sup>2</sup>b-dut-se<sup>2</sup>re<sup>2</sup>nd. Abductent.

**ABDUCT**, v. tr. Pr. a<sup>2</sup>b-du<sup>2</sup>-kt'. Gr., *ἀπάγειν*. Lat., *abducere*. Fr., *ecarter*. Ger., *abduciren, abziehen*. It., *menare via*. Sp., *abducir*. To draw a part away from the median line of the body or (as used by most writers) away from the median line of a limb.

**ABDUCTEUR** (Fr.), adj. and n. Pr. a<sup>2</sup>b-du<sup>2</sup>k-tu<sup>2</sup>r. Abducent; an abductor. In many instances the word is the equivalent of *adductor*, those who so use it not accepting the idea that abduction may properly mean the drawing of a part (such as a finger or toe) away from the median line of a limb.—**A. court du ponce.** See *ABDUCTOR brevis pollicis*.—**A. de la paille du nez.** See *LEVATOR labii superioris alaeque nasi*.—**A. de l'œil.** See *ABDUCTOR oculi*.—**A. de l'oreille.** See *ABDUCTOR auris*.—**A. du doigt indicateur.** See *ABDUCTOR indicis*.—**A. du gros orteil.** See *ABDUCTOR hallucis* and *TRANSVERSUS pedis*.—**A. du petit doigt.** See *ABDUCTOR minimi digiti manus*.—**A. du petit orteil.** See *ABDUCTOR minimi digiti pedis*.—**A. du trompe d'Eustache.** See *ABDUCTOR of the Eustachian tube*.—**A. s laryngés.** See *ABDUCTORS of the larynx*.—**A. long de la main.** See *EXTENSOR ossis metacarpi pollicis*.—**A. long du ponce.** See *ABDUCTOR longus pollicis*.—**A. oblique du gros orteil.** See *ABDUCTOR hallucis*.—**A. transverse du gros orteil.** See *TRANSVERSUS pedis*.—**Court a. du bras.** See *ABDUCTOR brevis brachii*.—**Long a. du bras.** See *ABDUCTOR longus brachii*.

**ABDUCTION**, n. Pr. a<sup>2</sup>b-du<sup>2</sup>k-shu<sup>2</sup>n. Gr., *ἀπαγωγή*. Lat., *abductio* (from *ab* and *ducere*). Fr., *abduction*. Ger., *Abziehung*. It., *abduzione*. Sp., *abducción*. 1. A movement which carries a part away from the median line of the body or (in the case of the fingers and toes) away from the middle line of a limb. [C, E.] See also remarks under *ABDUCTEUR*. As applied to the hand, the word means flexion toward the radial side of the forearm. 2. (Obs.) separation of the fragments of a broken bone. [A, 323.]

**ABDUCTOR**, adj. and n. Pr. a<sup>2</sup>b-du<sup>2</sup>k-to<sup>2</sup>r. Lat., *abductor*. Fr., *abducteur*. Ger., *Abzieher*. It., *abductore*. Sp., *abductor*. Abduct; a muscle or nerve the action of which is to abduct a part.—**A. auricularis.** **A. auris** (Lat.). Fr., *abducteur de l'oreille*. Ger., *Abziehmuskel des Ohres*. It., *abductore dell'orecchio*. Sp., *abductor de la oreja*. See *AURICULARIS posterior*.—**A. brevis alter.** See *A. brevis pollicis*.—**A. brevis auriculæ.** See *CERVICO-AURICULARIS profundus*.—**A. brevis brachii.** Fr., *court abducteur du bras, petit rond (ou scapulo-huméral)*. Ger., *kurzer Auswärtszieher* (oder *äusserer kurzer Beuger*) des Armbens, *mittlerer Schulterumdrehermuskel*. It., *abductore corto del braccio, piccolo rotondo* (o *scapolo-omale*). Sp., *a. corto del brazo*. A small elongated muscle, found in the solipeds, being the analogue of the *teres minor* in man. It arises from the posterior margin of the scapula, the infra-spinous fossa, and the small tubercle at the outer border of the glenoid cavity, and is inserted into the humerus between the crest of the tuberosity and the deltoid impression. It abducts and rotates the humerus. [A, 314.]—**A. brevis pollicis.** Fr., *abducteur court du ponce*. Ger., *kurzer Abziehmuskel des Daumens*. It., *abductore breve (o corto) del pollice della mano*. Sp., *a. corto del pulgar de la mano*. Syn.: *a. brevis alter, a. pollicis manus, scapho-carpo-superphalangeus pollicis*. The short a. of

the thumb. It arises from the annular ligament of the wrist and from the trapezium or the tubercle of the semilunar bone, and is inserted into the outer aspect of the base of the first phalanx of the thumb. [C.]—**A. digiti quinti**. See *A. minimi digiti*.—**A. hallucis**. Fr., *abducteur du gros orteil*. Ger., *Abzieher der grossen Zehe*. It., *abductore dell' alluce*. Sp., *a. del pulgar del pié*. Syn.: *a. obliquus hallucis*, *a. pollicis pedis*. The a. of the great toe; a muscle that arises from the greater tuberosity of the calcaneum, from the plantar fascia, and from the annular ligament of the ankle, and is inserted into the inner border of the base of the first phalanx of the great toe. [C.]—**A. indicis**. Fr., *abducteur du doigt indicateur*. Ger., *Abziehmuskel des Zeigefingers*. It., *abductore del dito indice*. Sp., *a. del indice*. Syn.: *semi-interosseus indicis*. The a. of the forefinger, being the first dorsal interosseous muscle of the hand. It arises by two heads from the first and second metacarpal bones, and is inserted into the radial side of the index-finger.—**A. indicis pedis**. Fr., *premier interosseux dorsal du pied*. Ger., *erster äussere Zwischenknochenmuskel des Fusses*. Sp., *a. del indice del pié*. Syn.: *prior (seu posterior) indicis pedis*. The first dorsal interosseous muscle of the foot. It arises from the first and second metatarsal bones, and is inserted into the tibial side of the second toe.—**A. longus auricularis**. See *CERVICO-AURICULARIS medius*.—**A. longus brachii**. Fr., *long abducteur du bras, portion scapulaire du deltoïde, grand scapulo-huméral*. Ger., *grosser Schulterumdrehermuskel, grosser Auswärtszieher (oder äusserer lange Beuger) des Armbeins*. It., *abductore humo del braccio, grande scapolo-omeroale*. Sp., *a. largo del brazo*. A muscle found in the solipeds, being to some extent an analogue of the deltoid in man. It arises by two heads: the anterior, through the medium of the scapular aponeurosis, from the tuberosity of the acromion; the posterior from the dorsal angle of the scapula, and is inserted into the humerus below the deltoid impression. It is an abductor, a rotator, and a flexor of the humerus. [A, 314.]—**A. longus pollicis**. Fr., *abducteur long du pouce*. Ger., *langer Abzieher des Daumens*. It., *abductore lungo (o grande) del pollice della mano*. Sp., *a. largo del pulgar de la mano*. Syn.: *a. pollicis longus*, *extensor primus (seu primi internodii) pollicis*. A name given by Albinus to the extensor ossis metacarpi pollicis (q. v.). [C.]—**A. metacarpi**. See *EXTENSOR obliquus metacarpi*.—**A. minimi digiti manus**. Fr., *abducteur du petit doigt*. Ger., *Abzieher des kleinen Fingers*. It., *abductore del dito mignolo*. Sp., *a. del dedo pequeño de la mano*. Syn.: *extensor tertii internodii (seu carpo-phalangeus) minimi digiti, hypotenar minor metacarpeus*. The a. of the little finger; arising from the pisiform bone, and being inserted into the ulnar border of the base of the first phalanx of the little finger, a small portion going also to the back of the finger. [C.]—**A. minimi digiti pedis**. Fr., *abducteur du petit orteil*. Ger., *Abzieher der kleinen Zehe*. It., *abductore del dito piccolo del piede*. Sp., *a. del dedo pequeño del pié*. Syn.: *calco-subphalangeus minimi digiti, paratenar major* [Winslow]. The a. of the little toe; a muscle which arises from the os calcis, the external intermuscular septum, and the deep surface of the plantar fascia, and is inserted into the outer side of the first phalanx of the little toe.—**A. nerve**. See *ABDUCTENS NERVE*.—**A. obliquus hallucis**. See *A. hallucis*.—**A. oculi**. See *RECTUS externus oculi*.—**A. of the ear**. See *A. auris*.—**A. of the Eustachian tube**. Lat., *a. tubæ*. Fr., *abducteur du trompe d'Eustache*. Ger., *Aozielmuskel der eustachischen Röhre*. It., *abductore del tubo*. Sp., *a. del tubo*. Syn.: *dilatator tubæ, spheno-salpingo-staphylinus, circumflexus palati, tensor palati mollis*. This muscle arises from the lower surface of the sphenoid bone, from the short hook-like part of the cartilaginous wall, and from the membranous part of the cartilaginous portion of the Eustachian tube, and is inserted into the hamulus pterygoideus. By its contraction the cartilaginous hook is slightly unfolded, the membranous portion of the tube is lifted a little from the cartilaginous portion, and the lumen of the tube is opened. [F.]—**A. of the eye**. See *RECTUS externus oculi*.—**A's of the larynx**. Lat., *abductores laryngis*. Fr., *abducteurs laryngés*. Ger., *Abziehmuskeln des Kehlkopfes*. It., *abductori della laringe*. Sp., *a's de la laringe*. Syn.: *dilatators of the larynx (or glottis)*. The crico-arytenoidei postici, which rotate the arytenoid cartilages outward and thus separate the posterior attachments of the vocal bands. [a, 1.]—**A's of the thigh**. Lat., *a's femoris*. Fr., *abducteurs de la cuisse*. Ger., *Abziehmuskeln des Oberschenkels*. It., *abductori de la coscia*. Sp., *a's del fémur*. The gluteus medius, the gluteus minimus, and the upper part of the gluteus maximus.—**A. ossis metatarsi minimi digiti**, *A. ossis metatarsi quinti*. See *A. minimi digiti pedis*.—**A. pollicis brevis**. See *A. brevis pollicis*.—**A. pollicis longus**. See *A. longus pollicis*.—**A. pollicis longus manus**. See *A. longus pollicis*.—**A. pollicis manus**. See *A. brevis pollicis*.—**A. pollicis pedis**. See *A. hallucis*.—**A. pollicis longus**. See *A. longus pollicis*.—**A. transversus hallucis**. See *TRANSVERSUS pedis*.—**A. tubæ**. See *A. of the Eustachian tube*.

**ABDUMEN** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-du<sup>2</sup>(du<sup>2</sup>)-me<sup>2</sup>n. See *ABDOMEN*.

**ABDÜNSTEN** (Ger.), v. tr. Pr. a<sup>3</sup>b/du<sup>n</sup>-ste<sup>2</sup>n. To evaporate. **ABDÜNSTUNG** (Ger.), n. Pr. a<sup>3</sup>b/du<sup>n</sup>-stung. Evaporation.—**A'sbad**. An evaporating bath.

**ABEBÆUS** (Lat.), adj. Pr. a-be-be-u<sup>3</sup>s, a<sup>3</sup>-ba-ba<sup>3</sup>-e<sup>2</sup>-u<sup>3</sup>s. Gr., ἀβέβαιος, unsteady, uncertain. Infirmit, debilitated. [A, 325.]

**ABECEDARIA** (Lat.), n. f. Written also a-b-c-daria. Pr. a-be-se-da<sup>2</sup>-ri<sup>2</sup>-a<sup>3</sup>, a<sup>3</sup>-ba-ka-da<sup>3</sup>-ri<sup>2</sup>-a<sup>3</sup>. Fr., *abécédaire*. Ger., *A-b-c-daria*. See *ACEMELLA mauritiana*. Rumpf is said to have given the plant this name on account of the root being used in Africa to make the children more readily acquire the difficult pronunciation of the Arabic tongue. [A, 322.]

**ABEILLE** (Fr.), n. Pr. a<sup>3</sup>-be<sup>2</sup>-y'. The honey-bee. See *APIS mellifica*.

**ABELANIE** (Fr.), n. Pr. a<sup>3</sup>-be<sup>2</sup>-la<sup>3</sup>-ni<sup>2</sup>-a. A Languedoc term for the hazel-nut tree. [A, 321.] See *CORYLUS avellana*.

**ABELASIS**, n. Pr. a<sup>3</sup>b-e<sup>2</sup>/a<sup>3</sup>-si<sup>2</sup>s. Fr., *abélasis, amande de terre*. An Egyptian term for the African ground-nut, said to have galactagogue properties. [A, 321.] See *CYPERUS esculentus*.

**ABELE**, n. Pr. a<sup>3</sup>b-e<sup>2</sup>/, a<sup>3</sup>-be<sup>2</sup>. From late Lat., *abelhus*, dim. of *albus*, white. Fr., *abèle*. Ger., *Abele*. The white poplar. See *POPULUS alba*. [B.]

**ABELIA** (Lat.), n. f. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>(a<sup>3</sup>)-li<sup>2</sup>-a<sup>3</sup>. Fr., *abélie*. R. Brown's name (in honor of Dr. C. Abel) for a genus of plants of the natural order *Caprifoliaceae* and the tribe *Lonicereae*. [B, 19, 38.]

**ABELKE** (Ger.), n. Pr. a<sup>3</sup>b-e<sup>2</sup>/ke<sup>2</sup>. See *ABELE*.

**ABEL-MELUCH**, n. Written also *abel-moluch*. A native name for a plant growing in Northern Africa, the seeds of which have strong purgative properties. [B, 38.]

**ABELMOSCH** (Ar.), n. See *ABELMOSCHUS*.—**Echter A.** (Ger.). See *ABELMOSCHUS moschatus*.—**Essbarer A.** (Ger.). See *ABELMOSCHUS esculentus*.—**Langblättriger A.** (Ger.). See *ABELMOSCHUS longifolius*.—**A'same** (Ger.). See *Semen ABELMOSCHI*.

**ABELMOSCHUS** (Lat.), n. m. Pr. a(a<sup>3</sup>)-be<sup>2</sup>-mo<sup>2</sup>s<sup>2</sup>(mo<sup>2</sup>)-ku<sup>2</sup>s<sup>2</sup>(ch<sup>2</sup>u<sup>2</sup>s). Fr., *abelmosch*. Ger., *Abelmosch*. It., Sp., *abelmosco*. From Ar., *habb-el-nisk*, a grain of musk. Abelmosch; musk-seed, on account of the odor of the *A. moschatus*. A genus of plants of the order *Malvaceae* [Medic.]; the same as the *Bamia* of R. Brown and the *Manihot* of de Candolle. [B.]—**A. esculentus** [Wight and Arnott]. Ger., *essbarer Abelmosch*. Sp., *Abelmosco suculento*. Syn.: *Hibiscus esculentus*. A species growing in the West Indies, but cultivated in India and Southern Europe. It furnishes the okra pods which are used in soups. The root is occasionally used internally as a medicine, and poultices are made from the leaves. [B, 5, 19.]—**A'körner**. See *Semen ABELMOSCHI*.—**A. moschatus** [Wight and Arnott]. Fr., *ambrette*. Ger., *echter Abelmosch*. It., *ambretta*. Sp., *almizcle vegetal*. Syn.: *Hibiscus abelmoschus*. A species indigenous to Bengal, but cultivated in Egypt and the West Indies. It is an evergreen shrub, distinguished by the agreeable odor of its seeds (*semina abelmoschi, musk-seeds*), which were formerly used in medicine. [B, 5, 19.]—**Semen abelmoschl**. Fr., *graines d'ambrette*. Ger., *Abelmoschuskörner, Bismuskörner*. It., *grani di muschio*. Sp., *granos deambar*. Musk-seed; the seeds of the *A. moschatus* (*Hibiscus abelmoschus*). They are small, dark-gray, kidney-shaped bodies, of a musk-like odor and an aromatic taste. [B, 5.]

**ABELMOSK, ABELMUSK**, n's. Pr. a<sup>3</sup>-be<sup>2</sup>/mo<sup>2</sup>(u<sup>2</sup>)sk. See *ABELMOSCHUS*.

**ABEL-TREE**, n. Pr. a<sup>3</sup>-be<sup>2</sup>/tre. See *ABELE*.

**ABENDBLUME** (Ger.), n. Pr. a<sup>3</sup>b/e<sup>2</sup>nd-blu<sup>2</sup>/me<sup>2</sup>. See *MIRABILIS longiflora*.

**ABENDVIOLE** (Ger.), n. Pr. a<sup>3</sup>b/e<sup>2</sup>nd-fe<sup>2</sup>/o<sup>2</sup>le<sup>2</sup>. Dame's violet, Julian flower, double rocket. [A, 315.] See *HESPERIS matronalis*.

**ABENSBERG** (Ger.), n. Pr. a<sup>3</sup>b/e<sup>2</sup>nz-be<sup>2</sup>-rg. A town in Lower Bavaria, supposed to be the ancient Abasinum, having a thermal spring the waters of which, containing calcium and sodium carbonates, are used as baths for gastro-intestinal, gouty, and rheumatic affections, also vesical catarrh. [A, 321, 327; a, 2.]

**ABEPITHYMIA** (Lat.), n. f. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>p-i<sup>2</sup>-thi<sup>2</sup>(thi<sup>2</sup>)/mi<sup>2</sup>-a<sup>3</sup>. For deriv., see *Ab-* and *EPITHYMIA*. Fr., *abepithymie*. Ger., *Abepithymie*. It., *abepitmia*. Sp., *abepitmia*. 1. Paralysis of the solar plexus. [A, 305.] 2. J. F. Lobstein's term for *anepithymia* (q. v.). [A, 322.]

**ABERRAUTE** (Ger.), n. Pr. a<sup>3</sup>b/e<sup>2</sup>-ra<sup>3</sup>-u<sup>2</sup>-te<sup>2</sup>. See *ABERRAUTE*.

**ABERBROTHOCK, ABERBROTHWICK**, n. See *ABROATH*.

**ABEREMOA** (Lat.), n. f. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>-re<sup>2</sup>-mo<sup>2</sup>-a<sup>3</sup>. Aublet's name for a genus of plants of the order *Anonaceae*; the same as the *Guatteria* of Ruiz and Pavón. [B, 41.]

**ABERESCHE** (Ger.), n. Pr. a<sup>3</sup>b/e<sup>2</sup>-e<sup>2</sup>-she<sup>2</sup>. See *EBERESCHE*.

**ABERIA** (Lat.), n. f. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>(a<sup>3</sup>)/ri<sup>2</sup>-a<sup>3</sup>. A genus of plants of the order *Bixineae*, indigenous to Africa and Ceylon. [B, 19, 41.]—**A. caffra**. A species growing at the Cape of Good Hope, furnishing a very acid edible fruit called the "kei apple of the Cape." [B, 19.]

**ABERKNOBLAUCH, ABERLAUCH** (Ger.), n's. Pr. a<sup>3</sup>b/e<sup>2</sup>-r-knob-la<sup>3</sup>-uch<sup>2</sup>, a<sup>3</sup>b/e<sup>2</sup>-r-la<sup>3</sup>-uch<sup>2</sup>. Terms applied to the *Allium ophioscorodon* and the *Allium controversum*.

**ABERRANS** (Lat.), adj. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>-r-a<sup>3</sup>nz(a<sup>3</sup>ns). From *aberrare*, to wander. See *ABERRANT*.—**Vas a**. See under *VAS*.

**ABERRANT**, adj. Pr. a<sup>3</sup>b-e<sup>2</sup>r-a<sup>3</sup>nt. Lat., *aberrans*. Fr., *aberrant*. Ger., *abweichend, abirrend*. It., Sp., *aberrante*. 1. In anatomy, varying from a direct course. 2. In botany, varying from the regular or usual structure. [B, 19.]—**A. vessels**. See *VASA aberrantia*.

**ABERRATIO** (Lat.), n. f. Pr. a<sup>3</sup>b(a<sup>3</sup>b)-e<sup>2</sup>-r-a<sup>3</sup>(a<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. For deriv., see *ABERRANS*. Aberration.—**A. chromatica**. See *CHROMATIC ABERRATION*.—**A. humorum**. Aberration (4th def.).—**A. lactis**. See *MILK METASTASIS*.—**A. loci**. Fr., *erreur de lieu*. See *ECTOPIA*.—**A. mensium**, *A. menstruorum*. See *VICARIOUS MENSTRUATION*.—**A. sphaerica**. See *SPHERICAL ABERRATION*.

**ABERRATION**, n. Pr. a<sup>3</sup>b-e<sup>2</sup>-r-a<sup>3</sup>shu<sup>2</sup>n. Lat., *aberratio*. Fr., *aberration*. Ger., *Aberration, Abweichung, Brechung*. It., *aberrazione, sviamento*. Sp., *aberración*. 1. Any deviation from the normal course. [B.] 2. In optics, the deviation of the rays of light from the principal focus of a curved lens or speculum. [F.] 3. See *Mental a*. 4. An abnormal determination of one of the fluids of the body, especially the blood, to a part, as in vicarious menstruation; a metastasis. [A, 301.]—**A. chromatique** (Fr.).

See *Chromatic a.*—**A. de la lumière** (Fr.). See *A. of light*.—**A. de la menstruation** (Fr.). See *Vicarious MENSTRUATION*.—**A. de réfrangibilité** (Fr.). See *Chromatic a.*—**A. der Gläser** (Ger.). Dioptrical *a.* See *Spherical a.*—**A. des fluides** (Fr.). See *A. (4th def.)*.—**A. de sphéricité** (Fr.). See *Spherical a.*—**A. des Lichtes** (Ger.). See *A. of light*.—**A. des sens** (Fr.). See *Mental a.*—**A. dioptrique** (Fr.). Dioptrical *a.* See *Spherical a.*—**A. du jugement** (Fr.). See *Mental a.*—**A. of light**. Fr., *a. de la lumière*, Ger., *A. des Lichtes*. It., *aberrazione della luce*. Sp., *aberración de la luz*. The apparent change in the direction of a visual ray produced by the combined influence of the movement of the earth in its orbit and the time consumed in the transmission of light. [B.]—**A. of sphericity**, **A. sphérique** (Fr.). See *Spherical a.*—**Angle of a.** Fr., *angle d'a.* Ger., *Abirungswinkel*. See *ANGLE of deviation*.—**Chromatic a.** Lat., *aberratio chromatica*. Fr., *a. chromatique*. Ger., *chromatische A.* It., *aberrazione cromatica* (o *di cromatismo*). Sp., *aberración cromática*. Syn.: *Newtonian a.* In the refraction of light by a lens, an inequality in the degree of refraction of the rays of the different colors, so that a series of tinted images is produced more or less removed from the focus. [B, C, F.]—**Dioptrical a.** Fr., *a. dioptrique*. Ger., *dioptrische A.*, *Abirung der Gläser*. It., *aberrazione diottrica*. Sp., *aberración dióptica*. See *Spherical a.*—**Mental a.** Fr., *a. des sens* (ou *du jugement*). Ger., *Geistestörung*. It., *aberrazione mentale*. Sp., *aberración mental*. Syn.: *a.*, *a. of the mind*, *a. of mentality*. A rather vague term for a condition in which the mind acts abnormally, but which does not necessarily amount to insanity.—**Newtonian a.** See *Chromatic a.*—**Spherical a.** Lat., *aberratio spherica*. Fr., *a. sphérique* (ou *de sphéricité*). Ger., *sphärische A.* It., *aberrazione sferica* (o *di sfericità*, o *di curvatura*). Sp., *aberración esférica*. Syn.: *a. of sphericity*. In the refraction of light by a lens, an inequality in the degree of convergence of the rays from different portions of the lens, producing a series of images at different focal distances, and hence multiple and indistinct images at every point of view; so called because the character of the aberration is due to the fact that the surface of the lens is a segment of a sphere. [B.]

**ABERRAUTE, ABERREUTE** (Ger.), n's. Written also *Abraute* and *Aberaute*. Pr. a<sup>3</sup>b'e<sup>2</sup>r-a<sup>2</sup>u(o)i-te<sup>2</sup>. Southernwood. See *ARTEMISIA abrotanum*.

**ABERTHON** (Ger.), n. Written also *Abthon*. Pr. a<sup>3</sup>b'e<sup>2</sup>r-ton. The maidenhair. See *ASPLENIUM trichomanes*.

**ABERYSTWITH**, n. Pr. a<sup>2</sup>b-e<sup>2</sup>r-i<sup>2</sup>st'wi<sup>2</sup>th. A Welsh sea-bathing resort. [A, 327.]

**ABESAMUM** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-e(a)'sa<sup>2</sup>-mu<sup>2</sup>m(mu'<sup>2</sup>m). An old term for the compound of iron contained in wheel-grease. [B, 44, 50.]

**ABESODÉ**, n. An Oriental term for the seeds of the *Nigella sativa*. [A, 321.] See *Semen NIGELLE*.

**ABESSI**, n. Pr. a<sup>3</sup>b-e<sup>2</sup>s'si<sup>2</sup>. An old term for: 1. Faecal matter. [A, 306.] 2. Native red sulphide of arsenic. [A, 336.]

**ABESTEN, ABESTON**, n's. Pr. a<sup>3</sup>b-e<sup>2</sup>s'te<sup>2</sup>(e<sup>2</sup>)n. Asbestos. [A, 322; B, 39.]

**ABESTUM, ABESTUS** (Lat.), n's, n. and m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-e<sup>2</sup>s'-tu<sup>2</sup>m(tu'<sup>2</sup>m), -tu<sup>2</sup>s'(tu'<sup>2</sup>s). See *ASBESTOS*.

**ABESUM**, n. An old term for quicklime. [A, 325.]

**ABET** (Fr.), n. Pr. a<sup>3</sup>b-a. The fir-tree. See *ABIES*. [B, 38.]

**ABEVACUATION**, n. Pr. a<sup>2</sup>b-e-va<sup>2</sup>k-u<sup>2</sup>-a'shu<sup>2</sup>n. Lat., *abevacuatio*, from *ab* (see *Ab-*), and *evacuare*, to empty. Fr., *abevacuacion*. Ger., *Abevacuacion*. It., *apocenosì*. Sp., *apocenosì*. Syn.: *apocenosì*. 1. An incomplete evacuation. [A, 306.] 2. A metastasis of a secretion. Compare *APOCENOSIS*.

**ABFALLEND** (Ger.), adj. Pr. a<sup>3</sup>b'fa<sup>2</sup>l-le<sup>2</sup>nd. Deciduous. [B.] **ABFEGEMITTEL** (Ger.), n. Pr. a<sup>3</sup>b'fa-ge<sup>2</sup>-mi<sup>2</sup>t-e<sup>2</sup>l. A detergent. [A, 317.]

**ABFEGEND** (Ger.), adj. Pr. a<sup>3</sup>b'fa-ge<sup>2</sup>nd. Detergent. [A, 315.]—**A'e Mittel**. A detergent.

**ABFEGUNG** (Ger.), n. Pr. a<sup>3</sup>b'fa-gung. Depuration.

**ABFILTRIERN** (Ger.), v. tr. Pr. a<sup>3</sup>b'fi<sup>2</sup>l-tri<sup>2</sup>-re<sup>2</sup>n. To separate by filtration. [A, 315.]

**ABFLUSS** (Ger.), n. Pr. a<sup>3</sup>b'flu<sup>2</sup>s. An evacuation, a flow, a discharge. [K.]—**A'riemen**, **A'schnur**. A seton. [E.]—**A'wunde**. The wound made by a seton-needle; the tract of a seton. [E.]

**ABFÜHREN** (Ger.), v. tr. Pr. a<sup>3</sup>b'fu<sup>2</sup>-re<sup>2</sup>n. 1. To abduct. 2. To evacuate. 3. To cleanse, to purge.

**ABFÜHREND** (Ger.), adj. Pr. a<sup>3</sup>b'fu<sup>2</sup>-re<sup>2</sup>nd. 1. Abducent. 2. Purgative. 3. Detergent. 4. Excretory.—**A'e Mittel**. A purgative; a detergent.—**A'e Muskeln**. Abductor muscles.

**ABFÜHRMITTEL** (Ger.), n. Pr. a<sup>3</sup>b'fu<sup>2</sup>-mi<sup>2</sup>t'e<sup>2</sup>l. 1. A detergent. 2. An evacuant, a purgative.

**ABFÜHRPILLEN** (Ger.), n. pl. Pr. a<sup>3</sup>b'fu<sup>2</sup>-pi<sup>2</sup>l'e<sup>2</sup>n. Cathartic pills.

**ABFÜHRSYSTEM** (Ger.), n. Pr. a<sup>3</sup>b'fu<sup>2</sup>-zi<sup>2</sup>s-te<sup>2</sup>m'/. 1. A sewerage system. 2. An excretory apparatus; the emunctories.

**ABFÜHRUNG** (Ger.), n. Pr. a<sup>3</sup>b'fu<sup>2</sup>-ung. 1. An evacuation. 2. Abduction. 3. A cleansing. [K.]—**A'sgang**. An excretory duct.—**A'smittel**. An evacuant.—**A'swirkung**. A cathartic or cleansing action.

**ABGANG** (Ger.), n. Pr. a<sup>3</sup>b'ga<sup>2</sup>ng. An evacuation; a loss, as of blood.—**A. der Frucht**. Abortion, miscarriage.—**A. der Wochenrinnen**. The lochial discharge.

**ABGÄNGLING** (Ger.), n. Pr. a<sup>3</sup>b'ge<sup>2</sup>ng-li<sup>2</sup>ng. An abortion (in the sense of an abortive foetus). [A, 315.]

**ABGÄSCHEN** (Ger.), v. intr. Pr. a<sup>3</sup>b'ge<sup>2</sup>-sh-e<sup>2</sup>n. To cease fermenting. [A, 315.]

**ABGEBLÜHT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-blu<sup>2</sup>t. See *DEFLORATE*.

**ABGEBOGEN** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-bo-ge<sup>2</sup>n. Declinate. [A, 320.]

**ABGEBROCHEN-GEFIEDERT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-bro<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>n-ge<sup>2</sup>-fe<sup>2</sup>'de<sup>2</sup>rt. Abruptly pinnated. [A, 315.]

**ABGEDÄMPFT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-de<sup>2</sup>mpft. Evaporated. [A, 315.]

**ABGEKOCHE** (Ger.), n. Pr. a<sup>3</sup>b'ge<sup>2</sup>-ko<sup>2</sup>ch'te<sup>2</sup>. A decoction.

**ABGELEBTHEIT** (Ger.), u. Pr. a<sup>3</sup>b'ge<sup>2</sup>-le<sup>2</sup>b-tit. Decreplitude. [A, 315.]

**ABGEMAGERT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-ma<sup>2</sup>-ge<sup>2</sup>rt. Emaciated.

**ABGERAHMT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-ra<sup>2</sup>-mt. Skimmed.—**A'e Milch**. Skim-milk.

**ABGESCHLAGENHEIT** (Ger.), n. Pr. a<sup>3</sup>b'ge<sup>2</sup>-shla<sup>2</sup>g'e<sup>2</sup>n-hit. Dejection, depression. [A, 317.]

**ABGESCHÖPFT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-shu<sup>2</sup>pft. Skimmed.—**A'e Milch**. Skim-milk.

**ABGESCHWEFELT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-shwe<sup>2</sup>f-e<sup>2</sup>lt. Desulphurated. [A, 315.]

**ABGESONDERT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-zo<sup>2</sup>n-de<sup>2</sup>rt. Secreted (in the sense of being separated by secretion).

**ABGESPANNT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-spa<sup>2</sup>nt'. Relaxed, enervated, debilitated. [K.]—**A'heit**. Relaxation, atony, debility. [A, 315.]

**ABGESTUMPFT, ABGESTUTZT** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-stumpft'/'stutzt'. Truncated. [B.]

**ABGEWASCHEN** (Ger.), adj. Pr. a<sup>3</sup>b'ge<sup>2</sup>-va<sup>2</sup>sh'e<sup>2</sup>n. Washed.

**ABGIESSEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'ge-se<sup>2</sup>n. To decant; as a n., decantation.

**ABGLIEDERUNG** (Ger.), n. Pr. a<sup>3</sup>b'gle-de<sup>2</sup>-rung. Disarticulation.

**ABGRENZUNG** (Ger.), n. Pr. a<sup>3</sup>b'gre<sup>2</sup>-nt-zung. A line of demarcation. [E; A, 315.]

**ABHAAREN** (Ger.), v. intr. Pr. a<sup>3</sup>b'ha<sup>2</sup>-re<sup>2</sup>n. To suffer loss of the hair. [A, 315.]

**ABHAGERN** (Ger.), v. intr. Pr. a<sup>3</sup>b'ha<sup>2</sup>-ge<sup>2</sup>rn. To become emaciated. [A, 315.]

**ABHAL** (Ar.), n. Written also *abhel*. The fruit of an East Indian species of cypress, or some related tree, used as an emmenagogue. [A, 310; B, 44.]

**ABHÄREN** (Ger.), v. intr. Pr. a<sup>3</sup>b'he<sup>2</sup>-re<sup>2</sup>n. To lose the hair (said of the lower animals). [A, 315.]

**ABHÄRTUNG** (Ger.), n. Pr. a<sup>3</sup>b'he<sup>2</sup>-r-tung. The process of hardening (in the sense of inuring).

**ABHÄUTEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'hoi-te<sup>2</sup>n. To excoriate. [A, 315.]

**ABHEILEN** (Ger.), v. tr. and intr. Pr. a<sup>3</sup>b'hi-le<sup>2</sup>n. To heal.

**ABHEILUNG** (Ger.), n. Pr. a<sup>3</sup>b'hi-lung. Healing, cure.—**A'speriode**. The period of healing or of convalescence.

**ABHIEL** (Ar.), n. See *ABHAL*.

**ABHELFEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'he<sup>2</sup>lf-e<sup>2</sup>n. To remedy. [A, 315.]

**ABHELLEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'he<sup>2</sup>l-le<sup>2</sup>n. To clarify.

**ABHÖLDER** (Ger.), n. Pr. a<sup>3</sup>b'ho<sup>2</sup>l-de<sup>2</sup>r. The mistletoe. See *Viscum album*. [A, 320.]

**ABHÜLSEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'hu<sup>2</sup>l-ze<sup>2</sup>n. To decorticate. [A, 315.]

**ABHUSTEN** (Ger.), v. tr. Pr. a<sup>3</sup>b'hus-te<sup>2</sup>n. To cough up.—**Sich a.** To exhaust one's self with coughing. [A, 315.]

**ABI**, n. A native name for Peruvian caimito. [B.] See *LUCUMA cainito*.

**ABICUM** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)'i<sup>2</sup>k-u<sup>2</sup>m(u'<sup>2</sup>m). An old term for the thyroid cartilage. [A, 325.]

**ABIES** (Lat.), n. f. Pr. a(a<sup>3</sup>)'bi(bi<sup>2</sup>)-ez(e<sup>2</sup>s). Gen., *abi'etis*. Gr., *ἐλάτη*. Fr., *abies*, *sapin*. Ger., *Tanne*, *Tannenbaum*. It., *abete*. Sp., *abeto*. Syn.: *Sapinus* [Endlicher], *Pinus* [Linn.], *Picea* [Don, Link.]. According to Linnaeus, a genus of evergreen trees belonging to the *Coniferae* and to the sub-order *Abietineae*, including the firs. The *Abies* of Linnaeus is the *Sapinus* of Endlicher; the *Abies* of Tourn. corresponds in part to the *Pinus* of Linn.; the *Abies* of Juss. and Link. is the *Picea* of Don; and the *Abies* of Don is the *Picea* of Link. [B.]—**A. alba** [Michaux]. Fr., *sapinette blanche*. Ger., *weisse Tanne*. Sp., *abeto blanco*. The white spruce.—**A. balsamea** [Marshall]. Fr., *baume du Canada*. Ger., *Balsamtanne*. It., *abete balsamifera*. Sp., *abeto balsámico*. Syn.: *A. balsamifera*, *Pinus balsamea*. The American silver fir or balsam-of-Gilead fir; a species indigenous to the Northern United States and Canada, which furnishes Canada balsam (Canada turpentine). [B, 5, 19.]—**A. balsamifera**. See *A. balsamea*.—**A. canadensis** [Michaux]. Fr., *sapin du Canada*, *sapinette de Québec*. Ger., *Hemlocktanne*, *Schierlingtanne*. The hemlock or hemlock spruce; a species indigenous to British America and the Northern United States, being a tree growing to a height of from 70 to 80 feet, and furnishing the so-called Canada pitch (the *pitch canadensis* of the U. S. Ph.). [B.]—**A. communis**. See *A. excelsa*.—**A. excelsa** [de Candolle]. Fr., *sapin de Norvège*. Ger., *europäische Edeltanne*. It., *abete comune*. Sp., *abeto común*. Syn.: *A. communis*, *Pinus*

**abies**, *Pinus picea*. The Norway spruce; a species indigenous to Europe and Northern Asia. It grows to a great height, and is distinguished by its abundant dark-green foliage. It furnishes Burgundy pitch (*pice burgundica*). [B. 5.]—**A. larix**. See *Larix europaea*.—**A. nigra** [Michaux]. Fr., *sapinette noire*. Ger., *Schwarzkiefer*. Sp., *abeto negro*. Syn.: *Pinus nigra*. The black spruce, or double spruce; a species growing abundantly in the Northern United States and Canada. Its young branches are used in making spruce beer, and its trunk furnishes a variety of pitch employed in the arts. [B. 5.]—**A. pectinata** [de Candolle]. See *A. picea*.—**A. picea** [Linn.]. Fr., *sapin*, *sapin commun* (ou blanc, ou argenté), *avet*. Ger., *Silbertanne*, *Weisstanne*, *gemeine Tanne*. Sp., *abeto argentado*. Syn.: *A. pectinata* [de Candolle], *A. taxifolia*, *Pinus picea*. The European silver fir, a species growing in the mountainous parts of Central Europe and in Siberia; a tree reaching the height of 100 feet or more, and furnishing a pitch called Strassburg turpentine. [B. 5, 19.]—**A. rubra** [Tournefort]. A genus indigenous to North America, identical with the *Pinus rubra* of some authors; a tree averaging about 50 feet in height. [B. 43.]—**A. taxifolia**. See *A. picea*.—**Essentia abietis** [Ph. August.]. The balsam of the fir-tree "joined with scurvy-grass." [A. 336.]

**ABIETATE**, n. Pr. a<sup>2</sup>b<sup>1</sup>e<sup>2</sup>t-at. Fr., *abietate*. Ger., *Abietat*, *abietinsäures Salz*. It., Sp., *abetato*. A salt of abietic acid.

**ABIETENE**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-e<sup>2</sup>t-en. Fr., *abietène*. Ger., *Abieten*. A liquid distilled from the resin of the *Pinus sabiniana*. When pure, according to Thorpe, it consists entirely of heptane. [B. 3.]

**ABIETIC**, adj. Pr. a<sup>2</sup>b<sup>1</sup>i-e<sup>2</sup>t<sup>12</sup>k. From Lat., *abies* (q. v.). Lat., *abieticus*. Fr., *abétique*. Ger., *abietisch*. It., *abietico*. Sp., *abético*. Derived from the fir-tree. [B.]—**A. acid**. Lat., *acidum abieticum*. Fr., *acide abétique*. Ger., *Abietinsäure*. It., *acido abietico*. Sp., *acido abético*. A bibasic acid formed by the action of dilute alcohol on pine-resin. Its formula is given as C<sub>14</sub>H<sub>10</sub>O<sub>4</sub> [B. 5, 10], and C<sub>10</sub>H<sub>8</sub>O<sub>4</sub> [B. 4].—**A. anhydride**. The anhydride of a acid; a substance obtained from pine or larch resin after the latter has been freed from its volatile oil and water. Its formula is C<sub>14</sub>H<sub>8</sub>O<sub>4</sub>, which is also the constitution of colophony. [B. 2, 5, 10.]

**ABIETIN**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-e<sup>2</sup>t<sup>12</sup>n. Fr., *abietine*. Ger., *Abietin*. It., *abietina*. Sp., *abietina*. 1. A tasteless, inodorous resin prepared from Strassburg or Canadian turpentine. [B. 2.] 2. A crystallizable substance found in the same varieties of turpentine.

**ABIÉTIN** (Fr.), adj. Pr. a<sup>2</sup>-be-a-ta<sup>2</sup>n<sup>2</sup>. Pertaining to the genus *Abies*. [A. 306.]

**ABIETINEÆ** (Lat.), n. f. pl. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-(e)-e<sup>2</sup>t<sup>12</sup>-i<sup>2</sup>n<sup>2</sup>e<sup>2</sup>-(e-a<sup>2</sup>-e<sup>2</sup>). Fr., *abietinées*. Ger., *Abietineen*. Sp., *abietíneas*. The fir family of the order *Conifera*, so called from *Abies*, the typical genus of the group; comprising those genera in which the scales representing the pistils are numerous, bractate, and provided with two inverted ovules at the base, and the seeds alate. [B. 34, 35.]

**ABIETINSÄURE** (Ger.), n. Pr. a<sup>2</sup>-be-a<sup>2</sup>-te<sup>2</sup>n-zoi<sup>2</sup>re<sup>2</sup>. See *Abietic acid*.

**ABIETITE**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-e<sup>2</sup>t-it. Fr., *abietite*. Ger., *Abietit*. A sugar, C<sub>12</sub>H<sub>8</sub>O<sub>5</sub>, contained in the needles of the *Abies pectinata*. [B. 2.]

**ABIGA** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-i<sup>2</sup>-ga<sup>2</sup>. From *abigere*, to drive away, to procure abortion. Fr., *χαραϊντρυς*. An ancient term for the ground-pine (*Teucrium lva*) from its supposed power of producing abortion, expelling the gout, etc. [A. 312, 322.]

**ABILDGAARDIA** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-i<sup>2</sup>ld-ga<sup>2</sup>r<sup>2</sup>di<sup>2</sup>a<sup>2</sup>. Fr., *abildgaardie*. According to Vahl, a genus of plants of the natural order *Cyperaceæ*, named in honor of the Danish physician and naturalist, Peter Abildgaard; according to others, a section of the genus *Fimbristylis*. [B. 38, 42, 44.]

**ABIOGENESIS**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-o-gē<sup>2</sup>n<sup>2</sup>e<sup>2</sup>-si<sup>2</sup>s. For deriv., see *A.\**, *Bio\**, and *genesis\**. Fr., *abiogénèse*. Ger., *Abiogenese*, *Urzeugung*. It., *abiogenesi*. Sp., *abiogénesis*. Syn.: *generatio æquivoca* (seu *spontanea*). Spontaneous generation; the doctrine of the origin of living organisms from inanimate matter.

**ABIOGENETIC**, **ABIOGENOUS**, adj. Pr. a<sup>2</sup>b<sup>1</sup>i-o-jē<sup>2</sup>n<sup>2</sup>-e<sup>2</sup>t<sup>12</sup>-i<sup>2</sup>k, u<sup>2</sup>s. Fr., *abiogénétique*. Ger., *abiogenetisch*. It., *abiogenetico*. Sp., *abiogénético*. Pertaining to or arising by abiogenesis.

**ABIOGENY**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-o<sup>2</sup>j<sup>2</sup>e<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>. See *ABIOGENESIS*.

**ABIOLOGICAL**, adj. Pr. a<sup>2</sup>b<sup>1</sup>i-o-lo<sup>2</sup>j<sup>2</sup>i<sup>2</sup>k-a<sup>2</sup>l. Fr., *abiologique*. Ger., *abiologisch*. It., *abiologico*. Sp., *abiológico*. Not pertaining to biology. [A. 12.]

**ABIONARCE** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-(e)-o-na<sup>2</sup>r<sup>2</sup>se<sup>2</sup>(ka). From a priv., *bios*, life, and *νάρκη*, torpor. Syn.: *torpor paralyticus*. An old term for torpor due to sinking of the powers of life. [A. 322.]

**ABIOSIS**, n. Pr. a<sup>2</sup>b<sup>1</sup>i-o<sup>2</sup>si<sup>2</sup>s. From a priv., and *βίωσις*, life. Lat., *defectus vite*. Ger., *Leblosigkeit*. Lifelessness. [A. 322.]

**ABIOTICUS** (Lat.), adj. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-(e)-o<sup>2</sup>t<sup>12</sup>i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Incapable of or incompatible with life. [A. 322.]

**ABIOTUS** (Lat.), adj. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-(e)-o<sup>2</sup>t<sup>12</sup>u<sup>2</sup>s(tu<sup>2</sup>s). Gr., *ἀβίωτος*, *ἀβίωτος*, not to be survived. Incapable of life; non-viable; high unto death. [A. 322.]

**ABIPSIA** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-i<sup>2</sup>p<sup>2</sup>si<sup>2</sup>a<sup>2</sup>. See *ADIPSIA*.

**ABIRRITANT**, adj. and n. Pr. a<sup>2</sup>b<sup>1</sup>i<sup>2</sup>r<sup>2</sup>i<sup>2</sup>t-a<sup>2</sup>nt. Fr., *abirritant*, *abirritatif*. 1. Having the property of lessening irritation. 2. Dependent on a state of abirritation [in Broussais's sense of the word [e. g., *maladies abirritatives*]]. [A. 301, 306.]

**ABIRRITATION**, n. Pr. a<sup>2</sup>b<sup>1</sup>i<sup>2</sup>r<sup>2</sup>i<sup>2</sup>t-a<sup>2</sup>shu<sup>2</sup>n. Lat., *abirritatio* (see *Ab\** and *IRRITATION*). Fr., *abirritation*. Ger., *Reizverminderung*. It., *abirritazione*. Sp., *abirritación*. 1. Freedom from or diminution of irritation. 2. As employed by Broussais, a pathological lack of irritability; asthenia; atony. [A. 306; K. 4.]

**ABIRRITÉ** (Fr.), adj. Pr. a<sup>2</sup>b<sup>1</sup>-er-i<sup>2</sup>t-a. In a state of abirritation.

**ABIRRITER** (Fr.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-er-i<sup>2</sup>t-a. To lessen sensibility or irritation. [A. 306.]

**ABIRRUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-i<sup>2</sup>r<sup>2</sup>ung. Aberration.—**A. der Gläser**. Dioptric aberration. See *Spherical aberration*.—**A. des Lichtes**. Aberration of light.—**Dioptrische A.** Dioptric aberration. See *Spherical aberration*.—**A'swinkel**. See *ANGLE of deviation*.

**ABISGA**, n. A Central African term for the *Capparis sodata*. [A. 321.]

**ABIT**, n. Written also *aboit*. Probably from Ar., *abiad*, white. [B. 52.] An old term for carbonate of lead. [A. 306.]

**ABKLÄREN** (Ger.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-kla-re<sup>2</sup>n. To clarify.

**ABKNALLEN** (Ger.), v. intr. Pr. a<sup>2</sup>b<sup>1</sup>-kna<sup>2</sup>l-le<sup>2</sup>n. To fulminate. [A. 315.]

**ABKNISTERN** (Ger.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-kni<sup>2</sup>s-te<sup>2</sup>rn. 1. To calche. 2. To deprecitate. [A. 315.]

**ABKOCHEN** (Ger.), v. tr. and intr. Pr. a<sup>2</sup>b<sup>1</sup>-ko<sup>2</sup>-ch<sup>2</sup>e<sup>2</sup>n. 1. To extract by boiling; to make a decoction. 2. To be separated by boiling. [A. 315.]

**ABKOCHUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-ko<sup>2</sup>-ch<sup>2</sup>ung. A decoction. [B.]

**ABKRÄNKELN** (Ger.), v. intr. Pr. a<sup>2</sup>b<sup>1</sup>-kre<sup>2</sup>n<sup>2</sup>k-e<sup>2</sup>ln. To be weakened from long illness. [A. 315.]

**ABKRATZUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-kra<sup>2</sup>t-zung. An abrasion.

**ABKRAUT** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-kra<sup>2</sup>-ut. The *Eupatorium cannabinum*.

**ABKÜHL-APPARAT** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-kü<sup>2</sup>l-a<sup>2</sup>p-pa<sup>2</sup>-ra<sup>2</sup>t<sup>12</sup>. A refrigerating apparatus.

**ABKÜHLEN** (Ger.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-kü<sup>2</sup>l-e<sup>2</sup>n. To refrigerate.

**ABKÜHLEND** (Ger.), adj. Pr. a<sup>2</sup>b<sup>1</sup>-kü<sup>2</sup>l-e<sup>2</sup>nd. Refrigerant.

**ABKÜHLUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-kü<sup>2</sup>l-ung. Refrigeration.—**A'smittel**. A refrigerant.

**ABKÜRZUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-kü<sup>2</sup>r<sup>2</sup>-zung. The partial removal of a part, as of the tonsil.

**ABLACTATE**, v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>-k<sup>2</sup>at. Lat., *ablactare*. Ger., *ablaktieren*. To wean. [A. 302.]

**ABLACTATION**, n. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>-k<sup>2</sup>-ta<sup>2</sup>shu<sup>2</sup>n. Gr., *ἀπογαλακτισμός*. [A. 314.] Lat., *ablactatio*. Fr., *ablactation*. Ger., *Ab lactation*. It., *ablattazione*. Sp., *ablactación*. Weaning; the cessation of lactation.—**A'sdiarrhœe** (Ger.). See *DIARRHŒA ablactatorium*.

**ABLACTATUS** (Lat.), adj. and n. m. Fr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-la<sup>2</sup>-k<sup>2</sup>(la<sup>2</sup>-k<sup>2</sup>)-ta<sup>2</sup>(ta<sup>2</sup>)/tu<sup>2</sup>s(tu<sup>2</sup>s). Weaned; a weaned child.

**ABLACTIREN** (Ger.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>-k<sup>2</sup>-te<sup>2</sup>re<sup>2</sup>n. To wean.

**ABLAGERUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>g-e<sup>2</sup>r-ung. 1. A deposit (either a sediment or an infiltration). 2. A metastasis.

**ABLANIA** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-la<sup>2</sup>(la<sup>2</sup>)/ni<sup>2</sup>a<sup>2</sup>. Fr., *ablanie*. A genus of plants of the natural order *Liliaceæ*, of which only a single species is known, a tree growing in Guiana. [B. 38.]

**ABLASTEMIC**, adj. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>s-te<sup>2</sup>m-i<sup>2</sup>k. From a priv., and *βλαστημός*, a growth. Having no relation with germination. ["Nature," xliii, 1881, p. 277; B. 39.]

**ABLASTES** (Lat.), adj. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-la<sup>2</sup>s(la<sup>2</sup>)/tez(te<sup>2</sup>s). Gr., *ἄβλαστης* (from a priv., and *βλάστη*, a bud). Sterile. [A. 322.]

**ABLASTOUS**, adj. Pr. a<sup>2</sup>-bla<sup>2</sup>s(tu<sup>2</sup>s). For deriv., see *ABLASTES*. Bearing no bud or germ. [B.]

**ABLATEUR** (Fr.), n. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>-u<sup>2</sup>r. See *ABLATOR*.—**A. vulcanique**. In veterinary medicine, a cautery-iron used in the operation of castration. [A. 306.]

**ABLATION**, n. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>shu<sup>2</sup>n. Gr., *ἀφαίρεσις*. Lat., *ablatio* (from *auferre*, to take away). Fr., *ablation*. Ger., *Abnahme*, *Wegnahme*. It., *ablazione*. Sp., *ablación*. 1. The removal of a part, especially by a cutting operation. [C.] 2. (Obs.) the disappearance or remission of the acute symptoms of a malady. [B. 38.]

**ABLATOR** (Lat.), n. m. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-la<sup>2</sup>(la<sup>2</sup>)/to<sup>2</sup>r. Fr., *ablateur*. Ger., *Schafmesser*. An instrument for removing a part; in veterinary medicine, one for removing sheep's tails. [A. 306.]

**ABLAUFEND** (Ger.), adj. Pr. a<sup>2</sup>b<sup>1</sup>-la<sup>2</sup>-u-fe<sup>2</sup>nd. Decurrent. [A. 320.]

**ABLÄUTERN** (Ger.), v. tr. Pr. a<sup>2</sup>b<sup>1</sup>-loi-te<sup>2</sup>rn. To clarify, filter, purify. [A. 315.]

**ABLEGMINA** (Lat.), n. n. pl. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-le<sup>2</sup>g<sup>2</sup>/mi<sup>2</sup>ni<sup>2</sup>a<sup>2</sup>. The *partes extorum*, being the large viscera from which the haruspices drew their inspirations. [A. 312.]

**ABLEITEN** (Ger.), v. tr. and n. Pr. a<sup>2</sup>b<sup>1</sup>-li-te<sup>2</sup>n. To derive; derivation, revulsion. [A. 315.]

**ABLEITEND** (Ger.), adj. Pr. a<sup>2</sup>b<sup>1</sup>-li-te<sup>2</sup>nd. 1. Derivative, revulsive. 2. Abducent (see *ABDUCTENS*). 3. Deferent.—**A'e Gefässe**. Deferent vessels. [A. 315.]

**ABLEITUNG** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-li-tung. Derivation, revulsion.—**A'smittel**. A derivative, a revulsive.

**ABLENKER** (Ger.), n. Pr. a<sup>2</sup>b<sup>1</sup>-le<sup>2</sup>n<sup>2</sup>k-e<sup>2</sup>r. An abductor.

**ABLEPHARIA** (Lat.), n. f. Pr. a<sup>2</sup>b<sup>1</sup>(a<sup>2</sup>b<sup>1</sup>)-le<sup>2</sup>f-a<sup>2</sup>(a<sup>2</sup>)/ri<sup>2</sup>a<sup>2</sup>. From a priv., and *βλέφαρον*, the eyelid. Fr., *ablepharon*. Ger., *Ablepharie*. It., *ablefaro*. Sp., *ablefarosis*. That state in which one or more of the eyelids are lacking or defective.—**Partial a.** Lat., *a. partialis*. Fr., *mange partiel des paupières*. Ger., *partieller Mangel der Augenlider*. It., *mancanza parziale delle palpebre*. Sp., *falta parcial de los párpados*. A congenital defect in or absence of one or more of the lids. [F.]—**Total a.** Lat., *a. totalis*.

Fr., *manque totale des paupières*. Ger., *gänzlicher Mangel der Augenlider*. It., *mancaza totale delle palpebre*. Sp., *falta total de los párpados*. Strictly speaking, the term means total absence of all four lids, but by some authors it has been used to describe that condition in which there is no interpalpebral fissure, and hence no division into upper and lower lids. [F.]

**ABLEPHARUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-le<sup>2</sup>f'a<sup>3</sup>r-u<sup>2</sup>s(u<sup>4</sup>s). Gr., ἀβλέφαρος. A subject of alblepharia (q. v.).

**ABLEPSIA, ABLEPSY**, n's. Pr. a<sup>2</sup>b-le<sup>2</sup>p'si<sup>2</sup>a<sup>2</sup>, a<sup>2</sup>b-le<sup>2</sup>p-si<sup>2</sup>. Gr., ἀβλεψία. Lat., *cecitas*. Fr., *ablepsie*. Ger., *Ablepsie*. It., *cecità*. Sp., *ceguera*. 1. Blindness. [F.] 2. An old synonym of apoplepsia and epilepsy. [A, 322.]

**ABLÖSEN** (Ger.), v. tr. Pr. a<sup>2</sup>b/lu<sup>2</sup>-ze<sup>2</sup>n. 1. To amputate. [E.] 2. To resolve, disperse. [A, 315.]

**ABLÖSEND** (Ger.), adj. Pr. a<sup>2</sup>b/lu<sup>2</sup>-ze<sup>2</sup>nd. Resolvent, expectorant.

**ABLÖSUNG** (Ger.), n. Pr. a<sup>2</sup>b/lu<sup>2</sup>-zung. 1. Amputation. 2. The process of freeing a part from its attachments, as in plastic operations. 3. A detachment (as of the retina); desquamation.

**ABLOTHRIDIUM, ABLOTHRIDIUM**, n's. See AMBLOTHRIDIUM.

**ABLUENT**, adj. and n. Pr. a<sup>2</sup>b/lu<sup>2</sup>-e<sup>2</sup>nt. Lat., *abluens* (from *abluer*, to wash away). Fr., *abluant*. Ger., *abluent*, *abluentierend*. Cleansing. See ABSTERGENT. [B.]

**ABLUENTIA** (Lat.), n. n., pl. of *abluens*. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-lu<sup>2</sup>(lu)-e<sup>2</sup>n'shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. Fr., *abluants*. Ger., *Abluentien*. Abluents. See ABSTERGENT.

**ABLUENTIREN** (Ger.), v. tr. Pr. a<sup>2</sup>b-lu-e<sup>2</sup>n-te're<sup>2</sup>n. To purge, purify. [A, 315.]

**ABLUTION**, n. Pr. a<sup>2</sup>b-lu<sup>2</sup>-shu<sup>2</sup>n. Gr., ἀπόλυσις. Lat., *ablutio* (from *abluer*, to wash away). Fr., *ablution*, *lavement*. Ger., *Abwaschung*. It., *abluzione*. Sp., *ablución*. 1. (Rare) a lotion. 2. (Obs.) in chemistry, purification by infusing and washing.

**ABLUTUS** (Lat.), adj., perf. part. of *abluer*. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-lu<sup>2</sup>(lu)/tu<sup>2</sup>s(tu<sup>4</sup>s). Washed.

**ABMAGERUNG** (Ger.), n. Pr. a<sup>2</sup>b/ma<sup>2</sup>-ge<sup>2</sup>-rung. Emaciation; atrophy.

**ABMATTUNG** (Ger.), n. Pr. a<sup>2</sup>b/ma<sup>2</sup>-t-tung. Debility; prostration. [A, 315.]

**ABMEISSELN** (Ger.), v. tr. Pr. a<sup>2</sup>b/mis-se<sup>2</sup>ln. To remove with a chisel.

**ABNABELN** (Ger.), v. tr. Pr. a<sup>2</sup>b/na<sup>2</sup>-be<sup>2</sup>ln. To separate a new-born child from the mother by dividing the umbilical cord.

**ABNABELUNG** (Ger.), n. Pr. a<sup>2</sup>b/na<sup>2</sup>-be<sup>2</sup>l-ung. Division of the umbilical cord.

**ABNAHME** (Ger.), n. Pr. a<sup>2</sup>b/na<sup>2</sup>-me<sup>2</sup>. 1. Ablation, amputation. 2. A decline of strength or of a disease. [A, 315.]

**ABNEHMEN** (Ger.), v. tr. and intr. Pr. a<sup>2</sup>b/na-me<sup>2</sup>n. 1. To remove, amputate. 2. To waste away, decline. 3. To wean (said of the lower animals). [A, 315.]

**ABNELECTEN**, n. From Ger., *abneigend*, having an antipathy. An old term for alum, from its resistance to fire. [B, 44.]

**ABNET** (Heb.), n. Written also *abanet*. Pr. a<sup>2</sup>b/ne<sup>2</sup>t. Lit., the girdle worn by a Jewish priest; a girdle-like bandage. (Obs.) [B, 39.]

**ABNORMAL**, adj. Pr. a<sup>2</sup>b-no<sup>2</sup>r/ma<sup>2</sup>. Gr., ἀνώμαλος. Lat., *abnormis* (from *ab* [see *Ab-*], and *norma*, a rule). Fr., *anormal*. Ger., *abnorm*, *regelwidrig*. It., *anormale*. Sp., *anormal*. Irregular, not according to rule; unnatural.

**ABNORMALITY**, n. Pr. a<sup>2</sup>b-no<sup>2</sup>r-ma<sup>2</sup>/i<sup>2</sup>-ti<sup>2</sup>. See ABNORMITY.

**ABNORMITY**, n. Pr. a<sup>2</sup>b-no<sup>2</sup>rm/i<sup>2</sup>-ti<sup>2</sup>. Gr., ἀνωμαλία. Lat., *abnormitas*. Fr., *abnormité*. Ger., *Abnormität*. It., *anormalità*. Sp., *anormalidad*. An abnormal state, especially a malformation.

**ABO**, n. Pr. a<sup>2</sup>b/o. A city in Finland, the seat of a mineral spring furnishing the aqua medicata kuppiensis.

**ABOBORA** (Port.), n. Pr. a<sup>2</sup>b-o<sup>2</sup>-ra<sup>2</sup>. 1. A common term for the pumpkin, the gourd, and the melon. 2. A genus of cucurbitaceous plants indigenous to South America. [B, 19, 44.]—**A. do mata** (a Latinized form of the Portuguese, *A. do mato*). The *Bryonia tayuya*, a Brazilian species, the fruit of which is occasionally used in the treatment of dropsy. [B, 44.]

**ABOBRA** (Port.), n. Pr. a<sup>2</sup>b-o<sup>2</sup>-bra<sup>2</sup>. A colloquial form of *abobora* (q. v.).

**ABOBRINHA** (Port.), n. Pr. a<sup>2</sup>-bo-bre'n-ya<sup>2</sup>. A colloquial form of *aboborinha* (dim. of *abobora*).—**A. do mato**. See *ABOBORA domata*.

**ABOI** (Fr.), n. Pr. a<sup>2</sup>b-wa<sup>2</sup>. See ABOIEMENT.

**ABOIEMENT** (Fr.), n. Written also *aboiment*. Pr. a<sup>2</sup>b-wa<sup>2</sup>-ma<sup>2</sup>n<sup>2</sup>. Gr., ὕλασις. Lat., *latratus*. Ger., *Bellen*, *Gebell*. It., *abbaimento*. Sp., *ladrido*. A sound like the barking of a dog, produced within the body either by the movements of flatus or by abnormal phonation, as in persons suffering with hydrophobia, hysteria, or chorea. [A, 306, 321.] See also *DÉLIRE des aboyeuses*.—**A. du ventre**. See BORBORYGMUS.

**ABOIT**, n. See ABIT.

**ABOLBODA**, n. An Indian name for a genus of xyridaceous plants found in Central America. [A, 306.]

**ABOLITIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-o-li<sup>2</sup>sh(i<sup>2</sup>t)/i<sup>2</sup>-o. Generally said to be from *aboler*, to cause not to grow, or *abolescere*, to be annihilated; according to Kraus, from ἀπολλύσθαι, to die away, to vanish. Gr., ἀφανισμός. Fr., *abolition*. Ger., *Tilgung*. It., *abo-*

*lizione*. Sp., *abolición*. Abolition; a cessation or suspension (as of consciousness or any of the physiological processes).—**A. pulsus**. Syn.: *pulsus privatio*. Syncope; asphyxia.—**A. sensuum**. Ger., *Schwund der Sinne* (oder *der Gefühle*). Loss of consciousness.

**ABOMASUM, ABOMASUS** (Lat.), n's, n., m. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-o-ma(na<sup>2</sup>/su<sup>2</sup>m(su<sup>2</sup>m, su<sup>2</sup>s, su<sup>4</sup>s). For deriv., see *Ab-* and *OMASUM*. Gr., ἄνυστρον. Fr., *caillette*. Ger., *Labmagen*, *Käsemagen*, *Röthe*. It., *abomaso*, *caglio*. Sp., *abomaso*. Syn.: *venter faliscus*, *ventriculus intestinalis*. The fourth or principal stomach of a ruminant animal. The mucous coat of the abomasum of the calf, or a preparation made from it (termed *rennet*), is used for curdling milk in the process of making cheese. [B.]

**ABOMINATIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-o<sup>2</sup>m-i<sup>2</sup>n-a(a<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-o. From *abominari*, to abhor. Gr., ἀποστρία. Fr., *abomination*. Ger., *Verabscheuung*. It., *abominazione*. Sp., *abominación*. Syn.: *fastidium ciborum*. Abomination; a morbid loathing of food.

**ABONDANCE** (Fr.), n. Pr. a<sup>2</sup>b-o<sup>2</sup>n-da<sup>2</sup>ns. Plethora. [K.]

**ABORAL**, adj. Pr. a<sup>2</sup>b-o<sup>2</sup>-ra<sup>2</sup>. From Lat., *ab*, away from, and *os*, the mouth. Agassiz's term for that part of an animal which is remote from the mouth. [B.]

**ABORINHAWURZEL** (Ger.), n. Pr. a<sup>2</sup>b-o-re/na<sup>2</sup>-vurt-ze<sup>2</sup>. The root of the *Abobora domata*.

**ABORSEMENT**, n. Pr. a<sup>2</sup>b-o<sup>2</sup>rs-me<sup>2</sup>nt. An obsolete synonym of abortion. [A, 302.] For the deriv. of this and the intervening words, see *ABORTION*.

**ABORSIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-o<sup>2</sup>r'shi<sup>2</sup>(si<sup>2</sup>)-o. Abortion.

**ABORSIVE**, adj. Pr. a<sup>2</sup>b-o<sup>2</sup>r/si<sup>2</sup>v. An obsolete form of *abortive*. [A, 302.]

**ABORSUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>2</sup>b)-o<sup>2</sup>r'su<sup>2</sup>s(su<sup>4</sup>s). Abortion.

**ABORT**, n. Pr. a<sup>2</sup>b-o<sup>2</sup>rt'. Ger., *Abort*. Abortion. (Obs.) [A, 302.]

**ABORT**, v. intr. Pr. a<sup>2</sup>b-o<sup>2</sup>rt'. Lat., *aboriri*. Gr., ἐκτρώσκειν. Fr., *avorter*. Ger., *abörtiren*. It., *abortire*. Sp., *abortar*. 1. To suffer an abortion. 2. To fall short of full development, to come to an untimely end (said of a disease). The word is used also (but improperly) in an active sense; e. g., a remedy is said to abort a disease, i. e., to cut it short.

**ABORTICIDE**, n. Pr. a<sup>2</sup>b-o<sup>2</sup>rt/i<sup>2</sup>-sid. Lat., *aborticidium*. Fr., *aborticide*. The destruction of a fetus by causing abortion.

**ABORTIENT**, adj. Pr. a<sup>2</sup>b-o<sup>2</sup>r'she<sup>2</sup>nt. Lat., *abortiens*. Abortive. [A, 302.]

**ABORTIF** (Fr.), adj. Pr. a<sup>2</sup>b-o<sup>2</sup>rt-ef. Abortive; abortifacient.

**ABORTIFACIENT**, adj. Pr. a<sup>2</sup>b-o<sup>2</sup>rt-i<sup>2</sup>-fa/she<sup>2</sup>nt. Gr., ἐκτρωτικός. Lat., *abortificiens* (from *abortus*, abortion, and *facere*, to produce). Fr., *abortif*. Ger., *abortiv*, *abtreibend*. It., *abortivo*. Sp., *abortivo*. Syn.: *abortive*. Productive of abortion.

**ABORTION**, n. Pr. a<sup>2</sup>b-o<sup>2</sup>r'shu<sup>2</sup>n. Gr., ἐκτρώμα. Lat., *abortus*, *aborsus*, *abortum*, *abortio* (from *aboriri*, to miscarry). Fr., *avortement*, *fausse couche*, *effluxion*, *blessure*. Ger., *Abort*, *Fehlgeburt*, *Abgang der Frucht*, *Verwerfen*, *Um Schlag*, *Missfall*, *Unrichtiggehen*. It., *aborto*, *sconciatura*. Sp., *aborto*. 1. The termination of pregnancy by the expulsion of the ovum before the fetus has become viable; in a stricter sense, the expulsion of the ovum before the completion of the third month of gestation (in the human subject), as distinguished from *miscarriage*. 2. A fetus which has been expelled prematurely. 3. In botany, an arrest of development. [B.]—**Chronic a.** See *Habitual a.*—**Criminal a.** Lat., *abortus procuratio*. Fr., *avortement criminel*. Ger., *verbrecherischer Abortus*. It., *aborto criminoso*. Sp., *aborto criminal*. Syn.: *feticide*. The act of inducing or attempting to induce a, for any other purpose than that of saving the mother's life.—**Embryonic a.** Fr., *avortement embryonnaire*. Guillemot's term for a. between the twelfth and the nineteenth days of gestation. [A, 120, 329.]—**Epidemic a.** Lat., *abortus epidemicus*. Fr., *avortement épidémique*. Ger., *epidemischer Abortus*. It., *aborto epidemico*. Sp., *aborto epidemial*. Various "epidemics" of a. have been described, notably one that was observed in France from 1813 to 1815 [Courhaut, A, 20]. Probably they were due either to the epidemic prevalence of some constitutional disease, to ergotism, or to emotional disturbances, privation, etc., arising from some public calamity, such as a siege.—**Fœtal a.** Fr., *avortement fœtal*. Guillemot's term for a. between the third and sixth months. [A, 120, 329.]—**Habitual a.** Lat., *abortus habitus*. Fr., *avortement périodique*. Ger., *habituelles Absterben der Frucht*. It., *aborto abituale*. Sp., *aborto habitual*. The repeated occurrence of a. in the same individual in successive pregnancies, formerly imputed to "habit".—**Incomplete a.** Ger., *unvollkommener* (oder *protrahierter*) *Abortus*. Protracted a.; one in which an unusual delay occurs, so that portions of the ovum are retained. See also *Cervical pregnancy*.—**Induced a.** Fr., *avortement artificiel* (ou *provoqué*). Ger., *eingeleiteter Abortus*. It., *aborto procurato*. Sp., *aborto provocado*. A. produced intentionally.—**Missed a.** It., *aborto mancato*. J. M. Duncan's term for that condition in which the ovum is retained in the uterus for a considerable time after its death, and the fetus is macerated or mummified, and finally expelled. ["Med. Times and Gaz.," Dec. 28, 1878, p. 729.]—**Ovular a.** Fr., *avortement ovulaire*. Guillemot's term for a. before the twentieth day. [A, 120, 329.]—**Partial a.** Fr., *avortement partiel*. A. resulting in the expulsion of one fetus (or fewer than the whole number) in cases of multiple gestation.—**Provoked a.** See *Induced a.*—**Spontaneous a.** Fr., *avortement spontané*. A. not due to interference or to any known accidental cause.

**ABORTIONIST**, n. Pr. a<sup>2</sup>b-o<sup>2</sup>r'shu<sup>2</sup>n-i<sup>2</sup>st. One who practises criminal abortion.

**ABORTIREN** (Ger.), v. tr. and intr. Pr. a<sup>2</sup>b-o<sup>2</sup>rt-e're<sup>2</sup>n. To cause or suffer abortion.

**ABORTIUM** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-o<sup>2</sup>r/shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>3</sup>m(u<sup>4</sup>m). Abortion.

**ABORTIVA** (Lat.), n. n., pl. of *abortivum* (q. v.).

**ABORTIVE**, adj. Pr. a<sup>2</sup>b-o<sup>2</sup>rt/i<sup>2</sup>v. Gr., ἐκτρωματικός. Lat., *abortivus*. Fr., *abortif.* Ger., *abortiv.* It., *Sp., abortivo*. 1. Born prematurely; undeveloped or imperfectly developed. In botany, an a. stamen is one that has no anther or only a rudimentary one; an a. flower is one that falls without leaving any trace of fecundation. [A, 300.] 2. Cutting short the course of a disease. See *Abortive Treatment*. 3. A disease or a lesion is said to be abortive when, after having begun in the usual way, it suddenly disappears or stops short in its progress. 4. Productive of abortion. See *ABORTIFACIENT*.

**ABORTIVUM** (Lat.), n. n. Neut. of adj. *abortivus*. Pr. a<sup>2</sup>b-(a<sup>3</sup>b)-o<sup>2</sup>rt-(e)/vu<sup>3</sup>m(wu<sup>4</sup>m). 1. An abortifacient. 2. An abortion.

**ABORTUS** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-o<sup>2</sup>rt/u<sup>3</sup>m(u<sup>4</sup>m). Abortion. — **A. crebro redeuns**, **A. habitualis**, **A. periodicus**. Habitual abortion. — **A. procuratio**. Criminal abortion. — **Eingeleiteter (künstlicher) A.** (Ger.). Induced abortion. — **Verbrecherischer A.** (Ger.). Criminal abortion.

**ABOUCHEMENT** (Fr.), n. Pr. a<sup>3</sup>b-ush-ma<sup>3</sup>n<sup>2</sup>. Ger., *Einmündung*. It., *abbocamento*. Sp., *abocamiento*. The termination of a canal in a larger one or in a hollow organ (e. g., of the thoracic duct in the subclavian vein or of the ureter in the bladder). [A, 300, 321.] It is to be distinguished from *anastomosis* (q. v.).

**ABOUKIR**, n. Pr. a<sup>3</sup>-bu-ker'. A village in the Algerian province of Oran, with a mineral spring containing sodium chloride and a small amount of iron. [A, 321.]

**ABOULAZA**, n. Written also *abulaza* and *abroulaza*. A tree of Madagascar, used by the natives in the treatment of heart diseases. [B, 44.]

**ABOULOMANIA**, n. Pr. a<sup>2</sup>b-u-lo-ma<sup>3</sup>/ni<sup>2</sup>-a<sup>3</sup>. For deriv., see *ABULIA* and *MANIA*. W. A. Hammond's term for a form of insanity characterized by an inertness, torpor, or paralysis of the will, the other mental faculties not being necessarily affected. [A, 10.]

**ABOUSSENNA**, n. An Abyssinian name for the *Albizzia anthelmintica*. [A, 328.]

**ABOUTIR** (Fr.), v. intr. Pr. a<sup>3</sup>b-u-ter. To end in suppuration (said of phlegmons); to break and discharge (said of abscesses). [E.]

**ABOUTISSEMENT** (Fr.), n. Pr. a<sup>3</sup>b-u-tes-ma<sup>3</sup>n<sup>2</sup>. 1. A termination, as of the spine of the scapula in the acromion. [A, 300.] 2. The pointing of an abscess. [A, 321.]

**ABOYEUR, ABOYEUSE** (Fr.), n's. Pr. a<sup>3</sup>b-wa<sup>3</sup>-yu<sup>3</sup>r(yu<sup>3</sup>z). Lit., a barker; one who, under the influence of disease, makes a barking sound with the voice. [A, 321.] See *Délire des aboyeurs*.

**ABPÄHLEN** (Ger.), v. intr. Pr. a<sup>3</sup>b/pa-le<sup>2</sup>n. To suffer loss of the hair. [A, 305.]

**ABPRÄPARIREN** (Ger.), v. tr. Pr. a<sup>3</sup>b/pa-pa<sup>3</sup>-re-re<sup>2</sup>n. To dissect away, to set free by dissection.

**ABRABAX**, n. See *ABRAXAS*.

**ABRACADABRA**, n. Written also (more correctly, says Littre) *abracadabra*. Pr. a<sup>3</sup>b-ra<sup>3</sup>-ka<sup>3</sup>-da<sup>3</sup>/bra<sup>3</sup>. A magical word used formerly in the East as a charm against certain diseases, especially malarial fevers. It was spoken, or worn on the person figured on an amulet in one of the following triangular forms:

ABRACADABRA	ABRACADABRA	ABRACADABRA
ABRACADABR	BRACADABR	BRACADABRA
ABRACADAB	RACADAB	RACADABRA
ABRACADA	ACADA	CADABRA
ABRACAD	CAD	CADABRA
ABRACA	A	ADABRA
ABRAC		DABRA
ABRA		ABRA
ABR		BRA
A		RA
		A

**ABRACALAM, ABRACALAN, ABRACALARS**, n's. Pr. a<sup>3</sup>b-ra<sup>3</sup>-ka<sup>3</sup>/a<sup>3</sup>m(a<sup>3</sup>n, a<sup>3</sup>r<sup>2</sup>z). Cabalistic words to which the Jews attributed virtues like those imputed to *abracadabra*. [A, 306.]

**ABRACAX**, n. See *ABRAXAS*.

**ABRACHIA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>. From a priv., and *βραχίον*, the arm. Fr., *abrachie*. Ger., *Abrachie*. Congenital absence of the arms.

**ABRACHIOCEPHALIA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)-ki<sup>2</sup>-(ch<sup>2</sup>i<sup>2</sup>)-o-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>2</sup>l(i<sup>2</sup>a<sup>3</sup>l)<sup>2</sup>-a<sup>3</sup>. From a priv., *βραχίον*, the arm, and *κεφαλή*, the head. Fr., *abrachiocephalie*. Congenital absence of the head and arms.

**ABRACHIUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-u<sup>3</sup>s-(u<sup>4</sup>s). A subject of *abrachia* (q. v.).

**ABRACO-PALO**, n. Pr. a<sup>3</sup>-bra<sup>3</sup>/ko-pa<sup>3</sup>/lo. A South American name for the *Epidendrum nodosum*. [A, 321.]

**ABRADE**, v. tr. Pr. a<sup>3</sup>b-rad'. From Lat., *abradere*, to rub off. Fr., *racler*. Ger., *wegkratzen*. It., *radere*. Sp., *abrasar*. To remove the surface, especially of the skin, by friction.

**ABRAHAM**, n. Pr. a<sup>3</sup>/bra<sup>3</sup>-ha<sup>3</sup>m. See CORNET.—**A's balm**. Ger., *Abrahamsbaum*. *Abrahamstrach*. The chaste-tree. See *VITEX agnus castus*. [B, 39.]—**Sham A.** To feign sickness or infirmity. [A, 302.]

**ABRAKH**, n. Pr. a<sup>3</sup>b-ra<sup>3</sup>k. According to Power and Sedgwick, a Hindu name for mica; used, calcined, in the treatment of fevers. [A, 316.]

**ABRANCHIATA** (Lat.), n. n. pl. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra<sup>2</sup>n<sup>2</sup>(ra<sup>3</sup>n<sup>2</sup>)-ki<sup>2</sup>.

(ch<sup>2</sup>i<sup>2</sup>)-a(a<sup>3</sup>)/ta<sup>3</sup>. From a priv., and *βράχια*, gills. Fr., *abanches*. Ger., *Abbranchien*. Sp., *abranquios*. Syn.: *abbrancha*, *abbranchia*, *abbranchians*, *abbranchiates*. A section of the *Annelida* characterized by the absence of gills, or branchiæ; including the orders *Hirudinea* (leeches) and *Oligochaeta* (earth-worms). [B, 28.]

**ABRANCHIATE**, adj. Pr. a<sup>2</sup>b-ra<sup>2</sup>n<sup>2</sup>/ki<sup>2</sup>-at. Gr., ἀβράγχιος. Lat., *abbranchus*. Fr., *abbranche*. Ger., *kiemenlos*. Sp., *abranquito*. Destitute of gills. [B.]

**ABRANDKRAUT** (Ger.), n. Pr. a<sup>3</sup>b/ra<sup>3</sup>-nd-kra<sup>3</sup>-ut. The genus *Artemisia*.

**ABRASADABRA**, n. Pr. a<sup>3</sup>b-ra<sup>3</sup>-sa<sup>3</sup>-da<sup>3</sup>/bra<sup>3</sup>. See *ABRACADABRA*.

**ABRASAX, ABRASAXAS**, n's. Pr. a<sup>3</sup>b/ra<sup>3</sup>-sa<sup>3</sup>x(sa<sup>3</sup>x'a<sup>3</sup>s). See *ABRAXAS*.

**ABRASIN**, n. Pr. a<sup>2</sup>b/ra<sup>3</sup>-si<sup>2</sup>n. A name given by Kæmpfer to a Japanese plant, the *Elæococca cordata*, from which an acrid fixed oil is obtained by expression. [B, 46.]

**ABRASIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/zhi<sup>2</sup>(si<sup>2</sup>)-o. From *abradere*, to scrape off. An abrasion. — **A. intestinalis**. An expression sometimes applied to a condition characterized by the discharge of membranous shreds from the bowels. [A, 328.] — **A. intestinum**. Fr., *ulcération des intestins*. A superficial ulceration of the intestinal mucosa. [A, 323.]

**ABRASION**, n. Pr. a<sup>2</sup>b-ra<sup>3</sup>/zhu<sup>3</sup>n. Gr., ἀβρᾶσιον, ἀποξύνσις, ἀπόξυσις. Lat., *abrasio* (q. v. for deriv.). Fr., *abrasion*. Ger., *Abschaben*, *Abreiben*. It., *abrasione*. Sp., *raspadura*. Syn.: *excoriation*. 1. The accidental or intentional rubbing or scraping away of a superficial portion of tissue or an incrustation (cf. *ERASION*), also the resulting lesion. [A, E, G.] 2. A similar loss of substance by ulceration. [F.]

**ABRASOR** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/zo<sup>2</sup>r(so<sup>2</sup>r). For deriv., see *ABRASIO*. Gr., ῥύστρον. Fr., *rugine*. Ger., *Beinfeile*. It., *abrasore*. Sp., *raspadura*. See *RASPIATORY*.

**ABRASUM** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/su<sup>3</sup>m(su<sup>4</sup>m). An abrasion. [A, 322.]

**ABRASUS** (Lat.), adj. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ra(ra<sup>3</sup>)/su<sup>3</sup>s(su<sup>4</sup>s). Abraded.

**ABRATHAN**, n. Pr. a<sup>3</sup>b-ra<sup>3</sup>-tha<sup>3</sup>n'. Said to be a corruption of *abrotanum*. [A, 316.] See *ARTEMISIA abrotanum*.

**ABRAUCHEN** (Ger.), v. tr. and intr. and n. Pr. a<sup>3</sup>b/ra<sup>3</sup>-u-ch<sup>2</sup>e<sup>2</sup>n. To evaporate, to cause to evaporate; volatilization. [B.]

**ABRAUCHSCHALE** (Ger.), n. Pr. a<sup>3</sup>b/ra<sup>3</sup>-uch<sup>2</sup>-sha<sup>3</sup>/le<sup>2</sup>. An evaporating vessel.

**ABRAUTE** (Ger.), n. Pr. a<sup>3</sup>b/ra<sup>3</sup>-u-te<sup>2</sup>. See *ARTEMISIA abrotanum*.

**ABRAXAS**, n. Written also *abrabax*, *abracax*, and *abrasax*. Pr. a<sup>3</sup>b-ra<sup>3</sup>x'a<sup>3</sup>s. A mystical word made up of the Greek letters α, β, γ, δ, ε, ζ, η, θ, ι, κ, λ, μ, ν, ξ, ο, π, ρ, σ, τ, expressing the number 365, being the number of the heavens, according to the Egyptian gnostic, Basilides; hence, the deity. Jewels engraved with the word were worn as amulets. [A, 300, 314, 327.]

**ABRE** (Fr.), n. Pr. a<sup>3</sup>br. The botanical genus *Abrus*.

**ABREIBUNG** (Ger.), n. Pr. a<sup>3</sup>b/ri-bung. An abrasion.

**ABREISSEN, ABREISSUNG** (Ger.), n's. Pr. a<sup>3</sup>b/ris-se<sup>2</sup>n, sung. Avulsion.

**ABRESCHBAUM, ABRESCHKE** (Ger.), n's. Pr. a<sup>3</sup>b/re<sup>3</sup>-sh-ba<sup>3</sup>-um(e<sup>2</sup>). See *EBERESCHE*.

**ABRESHAIN**, n. According to Power and Sedgwick, an East Indian aphrodisiac made of white silk cut up very fine.

**ABREST** (Fr.), n. Pr. a<sup>3</sup>b-re<sup>3</sup>st. An alkaline spring resembling those of Vichy, situated near the latter. [A, 316.]

**ABRETTE** (Fr.), n. Pr. a<sup>3</sup>b-re<sup>3</sup>t. See *Semen ABELMOSCHL*.

**ABRI** (Fr.), n. Pr. a<sup>3</sup>-bre. Sp., *abrigo*. Lit., a protection against the wind; a natural or artificial grove, or other collection of plants, considered as a sanitary agent. [Tollard, A, 330.]

**ABRIC** (Ar.), n. An old term for sulphur. [A, 325.]

**ABRIDEN** (Ger.), v. tr. Pr. a<sup>3</sup>b/ri<sup>2</sup>-nd-e<sup>2</sup>n. To decorticate, to excoriate.

**ABRODIÆTA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ro-di(de)-e'(a<sup>3</sup>e<sup>2</sup>)-ta<sup>3</sup>. From ἀβρός, delicate, and δίατα, mode of life. Sp., *abrodeita*. A dainty course of life. [A, 322.]

**ABRODIÆTUS** (Lat.), adj. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ro-di(de)-e'(a<sup>3</sup>e<sup>2</sup>)-tu<sup>3</sup>s(tu<sup>4</sup>s). Gr., ἀβροδιαιτος. Leading a delicate course of life. [A, 322.]

**ABROMA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ro<sup>3</sup>/ma<sup>3</sup>. From a priv., and *βρωμα*, a stink [A, 334], or a priv., and *βρωμα*, food = unfit for food [A, 336]. Fr., *abrome*. Ger., *Cacaomatre*. Sp., *abromas*. A genus of trees, found in India, Java, and New Holland, belonging to the tribe *Büttneria* of the order *Sterculiaceæ*. [B, 19, 41, 42.] — **A. augusta, augustum**. The *wollut comul*, or *wollut cumal*, of Bengal; a species from the bark of which a tough fiber is obtained, used for cordage, and which furnishes a milky juice that has been used as a remedy for dysmenorrhæa. [B, 5, 19.] — **A. fastuosa** [R. Brown]. An evergreen species indigenous to New South Wales, but naturalized in England. [B, 43.] — **A. mollis**. A species indigenous to the Mollucas and the Sunda Islands, furnishing, like the other species, fibers fit for making cordage, coarse fabrics, and paper. [B.]

**ABROMOTOUN**, n. Pr. a<sup>3</sup>b-ro<sup>3</sup>/mo-tun. According to Power and Sedgwick, the Ashantee name of a plant of which the bruised leaves are used as a discutient for boils. [A, 316.]

**ABRONG**, n. Pr. a<sup>3</sup>b/ro<sup>3</sup>-ng. According to Power and Sedgwick, a bitter, laxative, and vermifuge round grain, spotted with black and white, said to have been brought from China. [A, 316.]

**ABRONIA** [Jussieu] (Lat.), n. f. Pr.  $a^2b(a^3b)/ro^{n1}a^2$ . Fr., *abronie*. Syn.: *tricaratus* [L'Heritier]. A genus of nyctagineous plants indigenous to California. [A, 306; B, 19.]

**ABROS** (Lat.), n. m. Pr.  $a^2b(a^3b)/ro^2s$ . See **ABRUS**.

**ABROSIA** (Lat.), n. f. Pr.  $a^2b(a^3b)/ro^2zi^2(s)^2a^2$ . Gr., *ἀβρωσία*. Fasting. [A, 311.]

**ABROSUS** (Lat.), adj. Pr.  $a^2b(a^3b)/ro^2su^2s(su^4s)$ . Perf. part. of *abrodere*, to gnaw away. Corroded. [A, 318.]

**ABROTANELLE** (Fr.), n. Pr.  $a^3b-ro^3t-a^3n-e^2$ . A genus of plants, of the order *Compositæ*, found in the Falkland Islands. [A, 306; B.]

**ABROTANUM** (Lat.), n. n. Written also, more properly, *abrotanum*. Pr.  $a^2b(a^3b)/ro^2t/a^3n-u^3m(u^4m)$ . Gr., *ἀβρότανον*. Fr., *abrotone*, *aurone*, *citronelle*. Ger., *Eberautenkrout*, *Beifuss*. It., *abrotano*. Sp., *abrotano*. Southernwood. See *ARTEMISIA abrotanum*.

**ABROTONITES** (Lat.), n. m. Pr.  $a^2b(a^3b)/ro^2t-o-ni(ne)/tez-(te^2s)$ . Gen., *abrotonite*. Gr., *ἀβροτονίτης* (*olivos* understood). Sp., *abrotónita*, *abrotónito*. An ancient term for a wine prepared with southernwood. [A, 312.]

**ABROTANOÏDE** (Fr.), adj. Pr.  $a^3b-ro^2t-o^2ni-o-ed$ . Resembling southernwood. [A, 306.]

**ABROTANUM** (Lat.), n. n. Pr.  $a^2b(a^3b)/ro^2t/o^2n-u^3m(u^4m)$ . See **ABROTANUM**.

**ABROULAZA**, n. See **ABOULAZA**.

**ABRUM**, n. An old term for amber. [A, 336.]

**ABRUPTION**, n. Pr.  $a^2b-ro^3p^3shu^2n$ . Lat., *abruptio* (from *ab* [see *Ab-*] and *rumpere*, to break). Gr., *ἀπρόπτεις*. Fr., *abruption*. Ger., *Abbrechung*. It., *rottura*. Sp., *abrupción*. 1. A tearing apart; a rupture. 2. (Obs.) a transverse fracture of a bone. [E.]

**ABRUPTI-PINNATUS** (Lat.), adj. Pr.  $a^2b(a^3b)/ru^3p^3(ru^4p^4)/ti^2-pi^2n-a^3(tu^2s)(tu^4s)$ . Fr., *abrupti-pinné*. See *ABRUPTI-PINNATE*.

**ABRUS** (Lat.), n. m. Pr.  $a^2b(a^3b)/ru^3s(ru^4s)$ . Gr., *ἀβρός*, pretty, elegant. Fr., *abre*. A name given by Prosper Alpinus to a genus of plants of the order *Leguminosæ*, sub-order *Papilionaceæ*, and tribe *Phaseolæ*. [B.]—**A. precatorius**. From *precas*, a prayer, from the beans being used as beads. Fr., *hane à réglise*. Ger., *indisches Süssholz*. Syn.: *Glycine abrus* [Linn.], wild (or country, or Jamaica) licorice, licorice bush, red bean, love pea, jequirity. A species indigenous to Africa and tropical Asia, which has been transplanted to America. The beans (*Angola seeds*; Fr., *pois d'Amérique*, *pois rouges des Indes*, *graines de jéquiriti*; Ger., *Paternosterbensen*, *Gifibohnen*, *indianische rothe Erbsen*) are used in India as a standard of weight, and an infusion made from them has lately come into use among ophthalmologists as a means of exciting an artificial purulent ophthalmia for the cure of pannus. On the coast of Malabar a decoction of the leaves is used for cough and affections of the throat. [De Wecker, "Ann. d'oc.," July-Aug., 1882, p. 24; A, 316, 328; B, 19.]

**ABRUTISSEMENT** (Fr.), n. Pr.  $a^3b-ro^4t-es-ma^2n^2$ . A considerable enfeeblement of the intellectual faculties without paralysis. [A, 321.]

**ABSAC** (Fr.), n. Pr.  $a^3b-sa^3k$ . See **AVAILLES**.

**ABSÄGEN** (Ger.), n. Pr.  $a^3b/za-ga^2n$ . 1. Amputation. 2. Ainhum.

**ABSÄUGEN, ABSÄUGUNG** (Ger.), v. tr., n. Pr.  $a^3b/zoig-e^n$ , ung. 1. To give suck; lactation. 2. To wean; weaning.

**ABSCEDENTIA** (Lat.), n. pl. of *abscedens*. Pr.  $a^2b(a^3b)/se(ske^2)-de^2n'shi^2(ti^2)-a^3$ . Gr., *ἀφσcedεωτα*. A term which Hippocrates seems to have used to designate those parts, such as the bones, which were supposed to be prone to break down by ulceration as the result of impaired general health. [A, 325.]

**ABSCIDIREN** (Ger.), v. intr. Pr.  $a^3bs-tze^2d-e^2re^2n$ . To form an abscess, to suppurate.

**ABSCISS**, n. Pr.  $a^2b/se^2s$ . Gr., *ἀπόρριμμα*. Lat., *abscessus* (from *abscedere*, to depart). Fr., *abcès*. Ger., *Abscess*. It., *ascesso*. Sp., *abceso*. Syn.: *gathering*, *rising*. Properly, a collection of pus in a cavity formed as the result of suppurative (not an infiltration with pus or a collection in a natural cavity, although often applied to those conditions). Anciently the word was taken in its literal meaning, a departure, *abscessus* being the opposite of *accessus* (an onset), and the formation of an abscess being looked upon as the way in which a disease took its departure. [A, 334.]—**A. of proximity**. Fr., *abcès de voisinage*. An a. formed in the neighborhood of a diseased structure, and in consequence of the disease, but not communicating directly with the original lesion. The term is generally applied to a's due to disease of a bone or joint, but has been used in describing those connected with stricture of the rectum. [A, 294; Nicaise, "Rev. de chir.," June, 1885, p. 486.] See also *ABSCIS froids extra-péritostique*.—**Acute a.** Lat., *abscessus acutus*. Fr., *abcès aigu* (ou *chaud*). Ger., *acuter* (oder *heisser*, oder *calider*) a. One that results from an acute inflammation of the part in which the a. forms. [E.]—**Adenöser a.** (Ger.). See *Glandular a.*—**Alveolar a.** Lat., *abscessus alveolaris*. Fr., *abcès alvéolaire*. Ger., *Alveolarabscess*. An a. originating beneath the periosteum of the socket (alveolus) of a tooth. [A, 292.] Cf. **PARTULIS**.—**Antemammmary a.** See *Subcutaneous mammmary a.*—**Bartholinian a.** It., *ascesso bartoliniano*. An a. resulting from suppurative of the vulvo-vaginal (Bartholin's) gland or its duct. [A, 314.]—**Biliary a.** Fr., *abcès biliaire*. An a. connected with the gall-bladder or a bile-duct.—**Bursal a.** Suppuration of a bursa mucosa. [A, 316.] Cf. *Lymphatic a.*—**Calider a.** (Ger.). See *Acute a.*—**Caséous a.**, **cheesy a.** Fr., *abcès caséux*. 1. (Fr., *abcès caséux d'emblée*) a broken-down condition of a tubercular gumma, the cavity of which contains thick cheesy masses together with a serous or viscid

liquid. 2. (Fr., *abcès caséux consécutif*) a cold a. with its contents condensed to a cheesy consistence. [Nicaise, l. c.]—**Chronic a.** See *Cold a.*—**Circumscribed a.** One that is definitely limited by a wall of lymphic exudate.—**Cold a.** Lat., *abscessus frigidus*. Fr., *abcès froid*. Ger., *kalter a.* It., *ascesso freddo*. Sp., *abceso (o tumor) frío*. One that results from a chronic (particularly a scrofulous) inflammation. [E.] The tendency is to restrict the term to a's that result from the breaking down of tubercular deposits. Delpsch makes it include his *abcès soudain* (q. v.).—**Congestive a.** Lat., *abscessus congestivus* (seu *congestivus*, seu *per congestum*). Fr., *abcès par congestion*. Ger., *Constitutionsabscess*, *Senkungsabscess*. Sp., *abceso por congestión*. See *Wandering a.* Boyer restricted the term to a's due to caries of the vertebrae or of a large joint, like the hip. [S. Laugier, A, 329.]—**Consecutive a.** Fr., *abcès consécutif*. See *Critical a.*—**Constitutional a.** Fr., *abcès constitutionnel*. An a. due to a constitutional disease. [A, 306.]—**Critical a.** Fr., *abcès critique*. Ger., *kritischer a.* An a. which forms during the course of an acute disease, general or local, and, if it does not itself prove fatal, seems to exercise a salutary influence. [A, 329.]—**Dental a.** Fr., *abcès dentaire*. Ger., *Zahnabscess*. See *Alveolar a.*—**Dermoid a.** An expression used by W. H. Van Buren, apparently for the small cutaneous a's (*abcès dermiques*) of French writers, characteristic of the *scrofulide phlegmoneuse* of Hardy. [A, 294; a, 3.]—**Diathetic a.** Fr., *abcès diathésique*. An a. due to a diathesis.—**Diffuse a.** Fr., *abcès diffus*. See *Purulent infiltration*.—**Embolitic a.** Lat., *abscessus embolicus*. Ger., *embolischer a.* An a. due to arterial or capillary embolism. [Cohnheim, D, 3.]—**Emphysematous a.** See *Tympanitic a.*—**Encysted a.** Fr., *abcès enkysté*. 1. Suppuration of a cystic tumor. [A, 330.] 2. A circumscribed accumulation of pus in a serous sac.—**Epithelial a.** An a. "located in epithelia." [A, 293.]—**Fæcal a.** Lat., *abscessus stercoralis* (seu *stercorosus*). Fr., *abcès stercoral*. Ger., *Kothabscess*. It., *ascesso fecale*. Sp., *abceso fecal*. An a. communicating with the intestinal canal and containing fecal matter.—**Follicular a.** Lat., *abscessus follicularis*. An a. formed in an inflamed follicle.—**Glandular a.** Lat., *abscessus adenosus*. Fr., *abcès glandulaire*. Ger., *adenöser a.*, *Drüsenabscess*. An a. in or around a lymphatic gland.—**Gravitational a.** See *Wandering a.*—**Hæmatic a.** Fr., *abcès hémattique*. An a. due to a broken-down clot of extravasated blood.—**Heisser a.** (Ger.). An acute a.—**Hypostatic a.** See *Wandering a.*—**Idiopathic a.** Fr., *abcès idiopathique*. One formed independently of any other disease. [E.]—**Iliac a.** Lat., *abscessus in fossa iliaca*. Fr., *abcès iliaque* (ou *de la fosse iliaque*). It., *ascesso della fossa iliaca*. Sp., *abceso de la fossa iliaca*. A wandering a. which points in the iliac region.—**Infecting mitral a.** An embolic a. due to the detachment of lymph deposited on the valves in endocarditis. [A, 316.]—**Interlamellar a. of the membrana tympani**. Fr., *abcès lamellaire de la membrane du tympan*. Ger., *interlamellärer a. des Trommelfells*. It., *ascesso lamelloso della membrana del timpano*. Sp., *abceso lameloso de la membrana del timpano*. A collection of pus formed within or between the laminae of the substantia propria of the tympanic membrane, the result of myringitis or, sometimes, of otitis media. [F, 3.]—**Ischio-rectal a.** Fr., *abcès de la fosse ischio-rectale*. Sp., *abceso de la fosa izquo-rectal*. An a. of the ischio-rectal fossa. [E.]—**Kalter a.** (Ger.). See *Cold a.*—**Kritischer a.** (Ger.). See *Critical a.*—**Lacrimal a.** Fr., *abcès lacrymal*. An a. of the lacrimal sac.—**Lacunar a.** Suppuration of a urethral lacuna. [A, 316.]—**Lufthaltiger a.** (Ger.). See *Tympanitic a.*—**Lumbar a.** Lat., *abscessus lumbaris*. Fr., *abcès lombaire*. Ger., *A. der Weichen-gegend*. It., *ascesso lombare*. Sp., *abceso lumbar*. A wandering a. which points in the lumbar region.—**Lymphatic a.** Lat., *abscessus lymphaticus* (seu *bursalis*). Fr., *abcès lymphatique* (ou *de la lymphé*). Ger., *Lymphabscess*. It., *ascesso linfatico*. 1. Suppuration of a lymphatic gland. 2. (Obs.) an enlarged bursa mucosa. [A, 331.]—**Mammmary a.** Lat., *abscessus mammae*. Fr., *abcès mammaire* (ou *de la mamelle*). Ger., *Brustdrüsenabscess*. An a. of the mammary gland. Cf. *Milk a.*, *Submammary a.*, and *Supra-mammary a.*—**Marginal a.** A superficial a. situated near the orifice of the anus. [A, 294.]—**Mastoid a.** Suppuration in the cells of the mastoid portion of the temporal bone.—**Metastatic a.** Lat., *abscessus metastaticus*. Fr., *abcès métastatique*. Ger., *metastatischer a.* It., *ascesso metastatico*. Sp., *abceso metastático*. Syn.: *secondary a.* These a's occur in pyæmia; they are usually multiple, of embolic origin, and situated most commonly in the lungs and the liver.—**Microscopical a.** Ger., *mikroskopischer a.* Stricker's term for a minute collection of necrosed cells, as in the cornea. [Albert, A, 319.]—**Miliary a.** A minute a. of embolic origin.—**Milk a.** Lat., *abscessus lacteus*. Fr., *abcès lacteux*. Ger., *Milchabscess*. An a. of the mammary gland during lactation.—**Multiple a.** Fr., *abcès multiple*. Ger., *allgemeine A'bildung*. A condition characterized by the formation of numerous metastatic a's; one of the features of pyæmia. [E.]—**Mural a.** An a. of the wall of a splanchnic cavity. The term is commonly applied to the a's that sometimes form in the abdominal wall after laparotomy.—**Ossifient a.** Fr., *abcès ossifiant*. Sp., *abceso ossificante*. [E.]—**Otic cerebral a.**, **Ottic cerebral a.** Fr., *abcès cérébral otique*. Ger., *otitischer Gehirnsabscess*. It., *ascesso cerebrale otico*. Sp., *abceso cerebral otico*. An a. of the brain due to purulent disease of the ear. [F, 3.]—**Parametric a.**, **Parametric a.** Fr., *abcès paramétritique*. Ger., *parametritischer a.* An a. of the cellular tissue of the pelvis in the female, particularly between the folds of the broad ligament of the uterus and around the upper part of the vagina.—**Perimetritic a.**, **Perimetritic a.** A circumscribed collection of pus within the peritoneum, arising from inflammation of the peritoneal covering of the uterus. [A, 236.]—**Perinephritic a.**, **Perinephritic a.** An a. in the loose connective tissue surrounding the kidney. [E.]—**Peripleuritic a.** An a. formed in the connective tissue beneath the parietal pleura, usually as the result of pleurisy, disease of a rib, or injury. [A, 296.]—**Peritoneal a.** A term some-

times applied to encysted collections of softened exudate in cases of peritonitis.—**Phlegmonous a.** Fr., *abcès phlegmoneux*. Ger., *phlegmonöser A.* It., *ascesso flemmonoso*. Sp., *abceso flemmonoso*. An acute a. formed in connective tissue.—**Post-fascial a.** See **Subfascial a.**—**Post-mammary a.** See **Submammary a.**—**Post-pharyngeal a.** See **Retro-pharyngeal a.**—**Prelacrimal a.** Fr., *abcès prélacrymal*. Ger., *A. vor dem Thränensack*. It., *ascesso prelacrimale*. Sp., *abceso prelacrimal*. A swelling at the inner canthus, above the canthal ligament, in the hollow of the lacrymal bone, immediately beneath the upper margin of the orbit. It has a distinct cyst-wall communicating at the bottom with a hole leading into the ethmoid cells. It is due to caries of the lacrymal or ethmoid bone, and has no connection with the lacrymal sac. [E.]—**Pre-peritoneal a.** See **Subperitoneal a.**—**Progressive ulcerative a. of the cornea.** See **Reapers' KERATITIS**.—**Psoas a.** Lat., *abscessus psoadicus*. Fr., *abcès psoïque*. Ger., *Psoas-abscess*. *Lendenmuskelabscess*. A wandering a. which, originating from a carious vertebra, has followed the course of the psoas muscles and points in the groin or at the sacro-sciatic foramen. Occasionally the term is applied also to a. of the psoas muscle (more properly called *psittis*).—**Puerperal a.** According to Power and Sedgwick, a form occurring in infants, in which hard nodules form under the skin and rapidly soften, the skin over them having become reddened, thinned, and painful. [A, 316.]—**Pyæmic a.** See **Metastatic a.**—**Residual a.** 1. An a. formed in or about the cicatrix left by a preceding a. 2. A chronic a. of which the contents have for the most part been absorbed. [Sir J. Paget, "St. Barth. Hosp. R.p.," 1869, p. 73.]—**Retro-mammary a.** See **Submammary a.**—**Retro-oesophageal a.** An a. situated between the oesophagus and the vertebral column.—**Retro-peritoneal a.** See **Subperitoneal a.**—**Retro-pharyngeal a.** Lat., *abscessus retro-pharyngealis*. Fr., *abcès rétro-pharyngien*. Ger., *Retropharyngealabscess*. It., *ascesso retrofaringeo*. Sp., *abceso retrofaringeo*. 1. An a. formed between the vertebral column and the posterior wall of the pharynx. 2. An a. which, originating from disease of a cervical vertebra, has traveled to the space behind the pharynx.—**Scrofulous a.** Fr., *abcès scrofuléux*. Ger., *scrophulöser A.* Syn.: *strumous a.* 1. A glandular a. due to scrofula. 2. Any chronic a. in a scrofulous person.—**Secondary a.** Fr., *abcès consécutif*. Ger., *secundärer A.* See **Metastatic a.**—**Septicæmic a.** An a. due to septicæmia or to septic poisoning.—**Shirt-stud a.** See **ABCÈS EN BOUTON DE CHEMISE**.—**Spermatic a.** Fr., *abcès spermaticque*. An a. communicating with the seminiferous tubules. [A, 331.]—**Spinal a.** An a. connected with disease of a vertebra.—**Stercoraceous a.** **Stercoral a.** See **Fæcal a.**—**Strumous a.** See **Scrofulous a.**—**Subaponeurotic a.** An a. beneath an aponeurosis.—**Subareolar a.** Fr., *abcès sous-aaréolaire* [Duval], *phlegmon tubéreux du mamelon* [Velpeau]. A furuncular subcutaneous a. of the areola of the nipple.—**Subfascial a.** An a. beneath a fascia.—**Submammary a.** An a. between the mammary gland and the chest-wall.—**Subpectoral a.** An a. beneath the pectoral muscles.—**Subperitoneal a.** An a. formed between the parietal peritoneum and the abdominal wall.—**Sudoriparous a.** See **ABSCISSUS SUDORIPARUS**.—**Supra-mammary a.** An a. of the subcutaneous tissue over the breast.—**Sympathetic a.** Fr., *abcès sympathique*. An a., usually glandular, formed at a distance from the part at which the exciting cause has acted (e. g., a bubo). [A, 329.]—**Symptomatic a.** An a. due to a morbid state of the system. [E.]—**Thecal a.** Fr., *abcès des gaines tendineuses*. Ger., *Schlenenabscess*. It., *ascesso delle vagine dei tendini*. Syn.: *paronychia tendinosa*. Suppuration in the sheath of a tendon.—**Tropical a.** A. of the liver, the result of the acute hepatitis of the tropics. [D, 47.]—**Tubercular a.** Fr., *abcès tuberculeux*. An a. resulting from the breaking down of a tubercular lymphatic gland. [A, 331.]—**Tympanitic a.** Lat., *abscessus flatuosus*. Ger., *luft-haltiger A.* An a. which contains gas formed by putrefaction. [A, 316.]—**Urethral a.** 1. A lacunar a. 2. An a. of the tissue surrounding the urethra. [A, 295.] See also **Urinary a.**—**Urinary a.** Lat., *abscessus urinosus*. Fr., *abcès urinaire*. Ger., *Urinabscess*. It., *ascesso urinario*. Sp., *abceso urinario*. An a. due to extravasation of urine. [E.]—**Verminous a.** Lat., *abscessus verminosus*. Fr., *abcès vermineux*. Ger., *Wurmabscess*. An a. communicating with the intestine and containing intestinal worms.—**Wandering a.** Ger., *wandernder A.* Syn.: *congestive a.* An a. in which the pus travels away from the seat of its formation, along the connective-tissue spaces, and presents at some distant locality (e. g., a psoas a.).

**ABSCESSED**, adj. Pr. a<sup>2</sup>b/se<sup>2</sup>sd. Affected with abscess, or in a state due to an abscess ("abscessed teeth" ["Independ. Pract.," July, 1885, p. 394]).

**ABSCISSIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-se<sup>2</sup>(ske<sup>2</sup>)/shi<sup>2</sup>(si<sup>2</sup>)-o. See **ABSCISSURE**.—**A. cum effluxu.** Gr., *ἀρόσταις κατ' ἐκπορ* [Galen]. An ancient term for any discharge occurring as the result of an acute disease. [A, 325.]

**ABSCSSION**, n. Pr. a<sup>2</sup>b-se<sup>2</sup>/shu<sup>2</sup>n. Lat., *abscessio* (from *abscedere*, to depart). Gr., *ἀρόσταις*. An old term for the termination of a disease by a certain discharge, especially with the formation of an abscess; also for metastasis. [A, 325.]

**ABCESSUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-se<sup>2</sup>(ske<sup>2</sup>)/u<sup>2</sup>s(u<sup>2</sup>s). An abscess.—**A. arthriticus.** Musgrave applied this term to certain intestinal abscesses which he supposed to be due to "gouty dysentery." [A, 336.] **A. articul.** Suppurative arthritis.—**A. bursalis.** See **Bursal abscess**.—**A. capitis sanguineus neonatorum.** See **CERPHALHEMATOMA**.—**A. congestions.** **A. congestivus.** A congestive abscess. See **Wandering abscess**.—**A. embolicus.** See **Embolic abscess**.—**A. flatuosus.** See **Tympanitic abscess**.—**A. follicularis.** See **Follicular abscess**.—**A. frigidus.** See **Cold abscess**.—**A. frigidus scrofulosus.** See **Scrofulous abscess**.—**A. gangrenescens.** **A. gangrenosus.** See **ANTHRAX**.—**A. lacteus.** See **Milk abscess**.—**A. lumbalis.** **A. lumbalis.** **A. lumborum.** See **Lumbar abscess**.—**A. lymphaticus.** See **Lymphatic abscess**.—**A. metastaticus.** See **Metastatic abscess**.—**A. muco-carno-**

**sus botryoides labii vulvæ.** D. S. Grassius's term for a multilobular pendulous outgrowth from the labium pudendi majus. [A, 66.]—**A. nucleatus.** See **FURUNCLE**.—**A. oculi.** Fr., *abcès de l'œil*. Ger., *Augapfelabscess*. It., *ascesso dell'occhio*. Sp., *abceso del ojo*. An obsolete term for panophthalmitis purulenta. [F.]—**A. pectoris.** An old term for empyema. [A, 316.]—**A. per congestum.** **A. per decubitum.** See **Wandering abscess**.—**A. periductum.** An old term for an acute abscess. [A, 331.]—**A. psoadicus.** See **Psoas abscess**.—**A. spirituosus.** An old term for aneurysm.—**A. stercoralis.** **A. stercorosus.** See **Fæcal abscess**.—**A. sudoriparus.** Fr., *abcès sudoripare*. Ger., *Schweissdrüsenabscess*. A sudoriparous abscess; a small abscess, of slow formation, due to an inflammation of obstructed sweat-glands, most commonly in the axilla, on the areola of the nipple, or at the verge of the anus. [A, 319, 326.]—**A. thoracis.** See **A. pectoris**.—**A. urinalis.** **A. urinosus.** See **Urinary abscess**.—**A. verminosus.** See **Verminous abscess**.

**ABSCHABER** (Ger.), n. Pr. a<sup>3</sup>b/sha<sup>2</sup>-be<sup>2</sup>r. A raspatory.

**ABSCHABUNG** (Ger.). An abrasion. [E.]

**ABSCHÄLUNG** (Ger.), n. Pr. a<sup>3</sup>b/she<sup>2</sup>-ung. 1. An excoriation. 2. Decortication, blanching (of almonds).

**ABSCHÄUMUNG** (Ger.), n. Pr. a<sup>3</sup>b/shoim-ung. Despumation.

**ABSCHIEFERN, ABSCHIEFERUNG** (Ger.), n's. Pr. a<sup>3</sup>b/shef-e<sup>2</sup>rn, -e<sup>2</sup>r-ung. Exfoliation.

**ABSCHIEßEN** (Ger.), v. tr. Pr. a<sup>3</sup>b/shen-e<sup>2</sup>n. 1. To remove splints. 2. To apply splints. [A, 315.]

**ABSCHILFERN, ABSCHILFERUNG** (Ger.), n's. Pr. a<sup>3</sup>b/shi<sup>2</sup>-fe<sup>2</sup>rn, -fe<sup>2</sup>r-ung. 1. An abrasion. 2. Branny desquamation.

**ABSCHNEIDEN, ABSCHNEIDUNG** (Ger.), n's. Pr. a<sup>3</sup>b/shnid-e<sup>2</sup>n, -ung. Abscission; amputation.

**ABSCHNÜREN, ABSCHNÜRUNG** (Ger.), n's. Pr. a<sup>3</sup>b/shnür-e<sup>2</sup>n, -ung. A constricting, as by a tight bandage; a tying off; ligation.

**ABSCHRAPEMESSER** (Ger.), n. Pr. a<sup>3</sup>b/shra<sup>2</sup>p-e<sup>2</sup>-me<sup>2</sup>s-se<sup>2</sup>r. See **Sweating-IRON**.

**ABSCHRIFFEN, ABSCHRÖPFEN, ABSCHRÜPFEN, ABSCHRÜPPEN** (Ger.), n's. Pr. a<sup>3</sup>b/shri<sup>2</sup>p(shru<sup>2</sup>pf, shru<sup>2</sup>pf, shrup)-e<sup>2</sup>n. Depletion by cupping. [A, 315.]

**ABSCHUPPEN, ABSCHUPPUNG** (Ger.), n's. Pr. a<sup>3</sup>b/shup-pe<sup>2</sup>n, -pung. 1. Desquamation. 2. Chapping. [A, 315.]

**ABSCINDIREN** (Ger.), n. Pr. abs-tsi<sup>2</sup>nd-e<sup>2</sup>re<sup>2</sup>n. Abscission. [A, 304.]

**ABSCISIO** (Lat.), n. f. Pr. a<sup>2</sup>b-si<sup>2</sup>(ski<sup>2</sup>)/zhi<sup>2</sup>(si<sup>2</sup>)-o. See **ABSCISSIO**.

**ABSCISION**, n. Pr. a<sup>2</sup>b-si<sup>2</sup>/zhu<sup>2</sup>n. See **ABSCISSURE**.

**ABSCISSÆ** (Lat.), n. f. pl. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>s(ski<sup>2</sup>s)/e(a<sup>3</sup>-e<sup>2</sup>). From *abscindere*, to cut off, divide. The horizontal lines of a chart (e. g., of the vital signs), cutting the vertical ones at right angles. [A, 316.]

**ABSCISSO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>z(ski<sup>2</sup>s)/zhi<sup>2</sup>(si<sup>2</sup>)-o. Abscission.

**ABSCISSION**, n. Pr. a<sup>2</sup>b-si<sup>2</sup>/zhu<sup>2</sup>n. Lat., *abscessio*. Gr., *ἀρόσταις*. Fr., *abscession*. Ger., *Abschneiden*. It., *abscessione*. Sp., *abscisión*. 1. The cutting away of a part. 2. (Obs.) the fatal termination of a disease. 3. (Obs.) a form of fracture in which a portion of the bone is torn away from its proper connections. [A, 325.] 4. The suppression of a function, as of the voice. [A, 316.] See **Vox abscessa**.

**ABSCISSUS** (Lat.), adj. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>s(ski<sup>2</sup>s)/su<sup>2</sup>s(su<sup>2</sup>s). From *abscindere*, to cut off. Suppressed. See **Vox abscessa**.

**ABSCONSIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-sko<sup>2</sup>n/shi<sup>2</sup>(si<sup>2</sup>)-o. From *abscondere*, to hide away. 1. An old synonym of *sinus* (in the anatomical sense). [A, 325.] 2. A cavity of a bone which receives and conceals the head of another bone. [A, 336.]

**ABSEIHUNG** (Ger.), n. Pr. a<sup>3</sup>b/zi-hung. Filtration, straining, elutriation. [A, 315.]

**ABSEMIR**, n. Fr., *absémir*. An alchemical term for quintessence. [A, 340.]

**ABSENCE**, n. Pr. a<sup>2</sup>b/se<sup>2</sup>ns. Lat., *absentia*. Fr., *absence*. Ger., *Abwesenheit*. Absenz. It., *assenza*. Sp., *ausencia*. 1. Temporary mental aberration. 2. A form of epilepsy characterized by sudden loss of consciousness without convulsive action. [A, 303.]

**ABSETZCISTERNE** (Ger.), n. Pr. a<sup>3</sup>b/ze<sup>2</sup>tz-tsi<sup>2</sup>s-te<sup>2</sup>r-ne<sup>2</sup>. In chemistry, a settling cistern. [A, 315.]

**ABSETZEN** (Ger.), v. tr. and intr. Pr. a<sup>3</sup>b/ze<sup>2</sup>tz-e<sup>2</sup>n. 1. To give rise to a metastasis. 2. To remove a part, to amputate. 3. In chemistry, to precipitate, to deposit. 4. To wean gradually (said of the lower animals).

**ABSICHT** (Ger.), n. Pr. a<sup>3</sup>b/zi<sup>2</sup>ch<sup>2</sup>t. See **INDICATION**.

**ABSIE** (Fr.), n. Pr. a<sup>3</sup>b-se. A French village having a mineral spring. See **Fontaine de Tonneret**.

**ABSIEDUNG** (Ger.), n. Pr. a<sup>3</sup>b/ze-dung. A decoction. [A, 320.]

**ABSIN MENU** (Fr.), n. Pr. a<sup>3</sup>b-sa<sup>2</sup>n<sup>2</sup>-ma<sup>2</sup>n-u<sup>2</sup>. A popular name for wormwood. [A, 306.]

**ABSINTH** (Ger.), n. Pr. a<sup>3</sup>b/zi<sup>2</sup>nt. 1. Wormwood. 2. The liqueur *absinthe*.

**ABSINTHE** (Fr.), n. Pr. a<sup>3</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>nt. Lat., *absinthium*, *absynthium* (1st def.). Ger., *Wermuth*, *Wurnt* (1st def.), *Absinthliques* (2d def.), *Absinth*. It., *assenzio*. Sp., *ajenojo*. 1. Wormwood. See **ABSINTHIUM**. 2. A liqueur. See **A. suisse**.—**A. bātardé.** A West Indian name for several plants of the *Compositæ*,

especially the *Parthenium hysterophorus*. [A, 328.]—**A. commune**. See *ARTEMISIA absinthium*.—**A. de mer**. Sea wormwood. See *ARTEMISIA maritima*.—**A. de montagne**. See *A. batarde*.—**A. glaciale**. See *ARTEMISIA glacialis*.—**A. majeure**. See *ARTEMISIA absinthium*.—**A. maritime**. See *ARTEMISIA maritima*.—**A. mineure**. Roman wormwood. See *ARTEMISIA pontica*.—**A. officinale**. See *ARTEMISIA absinthium*.—**A. panachée**. A drink consisting of a mixture of *A. suisse* with other liquors. [B, 38.]—**A. pontique**. See *ARTEMISIA pontica*.—**A. suisse**. 1. The *Achillea moschata*. 2. The liqueur known as *absinthé* or *extrait d'a*. Authorities differ as to the constituents of this cordial, but the probability is that it is made of the *Artemisia absinthium*, *A. mutellina*, *A. glacialis*, *A. rupestris*, *A. spicata*, and perhaps certain other Alpine species of *Artemisia* (called collectively *Génépi* or *Genippi*), together with anise. The habitual use of this liqueur is said to occasion a particular form of disease. See ABSINTHISME. [A, 301, 303.]—**Alcoolat d'a**. A preparation made by distilling fresh wormwood tops with alcohol. It is said to have the property of masking the bitter taste of cinchona, and on that account it is used, together with sugar, in the preparation of an elixir of cinchona. [A, 328.]—**Alcoolé d'a. composé**. See *Teinture d'a. composée*.—**Bière d'a**. See *PUBL.*—**Bois d'a**. Syn.: *bois amer de Bourbon*. A hard, yellow wood, of a very bitter taste, from an apocynaceous tree growing in the Isle of Bourbon, occasionally used in medicine. [B, 38.]—**Eau distillée d'a**. [Fr. Cod.] A preparation made by distilling the leaves and tops of the *Artemisia absinthium* (wormwood) with water until the distillate equals in weight the amount of the plant employed. [B.]—**Essence d'a**. See *Oleum ABSINTHII*.—**Extrait d'a**. 1. According to the French Codex, a preparation made from the tops of wormwood by exhausting with boiling water and evaporating to the consistence of a soft extract. Compare the German *Extractum ABSINTHII*. [B.] 2. The liqueur. See *A. suisse*.—**Grande a**. Syn.: *aluyne*, *aluine*. Wormwood; *Artemisia absinthium* [Linn.]. As an official term in the French Codex, the leaves and tops of the plant. [B.]—**Huile d'a**. [Fr. Cod.] A preparation made by digesting 1 part of the leaves and tops of wormwood in 10 parts of olive-oil on a water bath and filtering the product. [B.]—**Huile volatile d'a**. [Fr. Cod.] See *Oleum ABSINTHII*.—**Enolé d'a**. See *Vin d'a*.—**Petite a**. Roman wormwood. See *ARTEMISIA pontica*.—**Quintessence d'a**. A bitter stomachic made by macerating 2 parts, each, of the tops of *Artemisia absinthium* and *Artemisia pontica*, and 1 part of bruised cloves, in 320 parts of 56-per-cent. alcohol for eight days, straining, expressing, filtering, and adding 1 part of sugar. [O. Reveil, A, 328.]—**Sel essentiel d'a**. See *Sal ABSINTHII*.—**Sirop d'a**. A preparation made by infusing 1 part of wormwood tops in 8 parts of boiling water, straining, filtering, and adding 190 parts of sugar to 100 parts of the infusion, over a water bath. [O. Reveil, A, 328.]—**Teinture (alcoolique) d'a**. [Fr. Cod.] A preparation made by macerating 1 part of wormwood tops in 5 parts of 60-per-cent. alcohol for ten days, and filtering. [B.]—**Teinture d'a. composée** [Fr. Cod.]. Lat., *tinctura absinthii composita*. Syn.: *elixir stomacique de Stoughton*. A preparation made by macerating 25 parts, each, of wormwood tops, germander (*Teucrium chamaedrys*) tops, gentian root, bitter-orange peel, and rhubarb, and 5 parts, each, of aloes and cascarrilla, in 1,000 parts of 60-per-cent. alcohol, for ten days, and filtering. [B.]—**Tisane d'a**. [Fr. Cod.] Wormwood tea; a preparation made by infusing 5 parts of the tops in 1,000 parts of boiling water, and filtering.—**Vin d'a**. [Fr. Cod.]. Lat., *vinum de absinthio*. Syn.: *enolé d'a*. 1. A preparation made by macerating 3 parts of dried wormwood leaves in 6 parts of 60-per-cent. alcohol, for a day, then adding 100 parts of white wine, macerating for ten days longer, and filtering. [B.] 2. The ancient *absinthites* (q. v.).—**Vin sec avec de l'a**. See *PURIROYAL*.

**ABSINTHÉ** (Fr.), adj. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-ta. 1. Mixed with absinthe. [B.] 2. In a condition caused by indulging in absinthe. [A, 306.]

**ABSINTHÉINE** (Fr.), n. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-ta-en. Absinthin. **ABSINTHEUR** (Fr.), n. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-tu<sup>r</sup>. An habitual drinker of absinthe. [B.]

**ABSINTHIAN**, adj. Pr. a<sup>2</sup>b-si<sup>2</sup>n'thi<sup>2</sup>a-n. See ABSINTHIC.

**ABSINTHIATE**, n. Pr. a<sup>2</sup>b-si<sup>2</sup>n'thi<sup>2</sup>-at. A salt of absinthic acid.

**ABSINTHIATED**, adj. Pr. a<sup>2</sup>b-si<sup>2</sup>n'thi<sup>2</sup>-at-e<sup>2</sup>d. Lat., *absinthiatus*. Containing wormwood.

**ABSINTHIATUM** (Lat.), n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>n'th-i<sup>2</sup>-a(a<sup>3</sup>y)-tu<sup>2</sup>m(tu<sup>4</sup>m). Really the neut. of *absinthiatus* (vinum understood); wormwood-wine. [A, 312.]

**ABSINTHIATUS** (Lat.), adj. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>n'th-i<sup>2</sup>-a(a<sup>3</sup>y)-tu<sup>2</sup>s-(tu<sup>4</sup>s). Absinthiated.

**ABSINTHIC**, adj. Pr. a<sup>2</sup>b-si<sup>2</sup>n'th'i<sup>2</sup>k. Lat., *absinthicus*. Fr., *absinthique*. Ger., *absinthisch*. It., *absintico*. Sp., *absintico*. 1. Pertaining to or derived from absinthium. [B.] 2. Due to the action of absinthe (e. g., *a. epilepsy*).—**A. acid**. Lat., *acidum absinthicum*. Fr., *acide absinthique*. Ger., *Wermuthsäure*. It., *acido absintico*. Sp., *ácido absintico*. An acid derived by Braconnot from wormwood, probably identical with succinic acid. [B, 5, 10.]

**ABSINTHIER** (Fr.), n. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-ti<sup>2</sup>-a. See ABSINTHIEUR.

**ABSINTHIN** (Ger.), n. Pr. a<sup>2</sup>b-zî<sup>2</sup>nt-i<sup>2</sup>-en'. ABSINTHIN. [B.]

**ABSINTHIN**, n. Written also *absynthin*. Pr. a<sup>2</sup>b-si<sup>2</sup>n'th'i<sup>2</sup>n. Fr., *absinthine*. Ger., *Absinthin*. *Wermuthbitter*. It., Sp., *absintina*. The bitter principle of wormwood; a white, imperfectly crystalline substance; according to Kromayer, an aldehyde, C<sub>10</sub>H<sub>16</sub>O<sub>8</sub> + H<sub>2</sub>O. [B, 5.]

**ABSINTHIQUE** (Fr.), adj. and n. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-tek. Absinthic; a person affected with absinthism.

**ABSINTHISME** (Fr.), n. Pr. a<sup>2</sup>b(a<sup>3</sup>p)-sa<sup>2</sup>n-tesm. Ger., Ab-

*sinthismus*. It., *absintismo*. A morbid condition due to the use of absinthe. In the acute form, besides the effects of alcohol, vertigo and nausea are prominent. The chronic form differs from chronic alcoholism by the occurrence of epileptoid seizures and the early supervention of general paralysis, also, according to Gautier, by the frequency of hyperaesthesia, especially in the iliac fossa. [A, 321; "Progr. méd.", July 8, 1882, p. 531.]

**ABSINTHITES** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>n'th-i(e)<sup>2</sup>tez(te<sup>2</sup>s). Gen., *absinthi'te*. Gr., ἀψινθίτης (*alvos* understood). A wine of wormwood, mentioned by Dioscorides, Pliny, and other ancient writers. [A, 311.]

**ABSINTHIUM** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>n'th'i<sup>2</sup>-u<sup>2</sup>m(u<sup>4</sup>m). Gr., ἀψινθιον (from a priv., and ψινθος, sweetness). Fr., *absinthe*. Ger., *Wermuth*. It., *assenzio*. Sp., *ajenjo*. 1. In botany, Tournefort's or Gärtner's name for a genus corresponding in part to the Linnaean genus *Artemisia* (q. v.). [B, 41, 42.] 2. In pharmacy, wormwood; the leaves and tops of the *Artemisia a.* (the *grande absinthe*, or *aluyne*, of the Fr. Cod.; the *herba absinthii* of the Ph. Ger.). [B.]—**A. alpinum**. Fr., *génépi*. Ger., *Genipkrant*. A group of Alpine species of *Artemisia* (*glacialis*, *mutellina*, and *spicata*), used in Switzerland for making absinthe. See ABSINTHE *suisse*.—**A. maritimum**. See *ARTEMISIA maritima*.—**A. minus**. See *ARTEMISIA pontica*.—**A. santonicum**. See *ARTEMISIA santonica*.—**A. scirpium**. [G. Baulhin]. See *ARTEMISIA maritima*.—**A. vulgare**. [J. Baulhin]. See *ARTEMISIA absinthium*.—**Conserva absinthii maritimi**. An old stomachic preparation, made by beating the tender tops of sea wormwood (*Artemisia maritima*) with three times their weight of lumpsugar. [A, 343.]—**Extractum absinthii** [Ph. Ger.]. Ger., *Wermutheextract*. A preparation made by extracting wormwood tops with alcohol (2 parts) and water (3 parts) and evaporating to the consistence of a thick extract. [B.] Cf. *Extrait d'ABSINTHE*.—**Oleum (essentiale) absinthii**. Fr., *huile volatile d'absinthe* [Fr. Cod.]. Oil of wormwood, a volatile oil distilled from the tops and leaves of *Artemisia a.*; formerly used as an antispasmodic and anodyne. [A, B.]—**Sal absinthii**. Fr., *sel essentiel d'absinthe*. Salt of wormwood; a carbonate of potassium formerly obtained from the ashes of wormwood. [A, 328.]—**Summitates absinthii**. Wormwood tops. [B.]—**Tinctura absinthii** [Ph. Ger.]. Ger., *Wermuthtinctur*. Tincture of wormwood; made by macerating 1 part of the tops in 5 parts of dilute alcohol for a week, straining, and filtering. [B.]—**Tinctura absinthii composita**. Compound tincture of wormwood. For the French preparation, see *Teinture d'ABSINTHE composée*. According to the Austrian Ph. (of 1869, with appendix of 1879), made by digesting 1 part of wormwood, 4 parts of orange peel, 2 parts of calamus, 2 parts of gentian root, and 1 part of cinnamon in 100 parts of alcohol, and filtering. [B.]—**Vinum de absinthio**. See *Vin d'ABSINTHE*.

ARTEMISIA ABSINTHIUM.

**ABSINTHIUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-si<sup>2</sup>n'th'i<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). See ABSINTHIN.

**ABSINTHLIKÖR, ABSINTHLIQUEUR** (Ger.), n's. Pr. a<sup>2</sup>b-zî<sup>2</sup>nt-le-ku<sup>r</sup>'. See ABSINTHE *suisse*.

**ABSINTHOL**, n. Pr. a<sup>2</sup>b-si<sup>2</sup>n'th'o<sup>2</sup>l. For deriv., see ABSINTHIUM and -ol\*. The essential constituent of oil of wormwood; a liquid, C<sub>10</sub>H<sub>16</sub>O, isomeric with ordinary camphor. [B, 2, 4.]

**ABSOLUTE**, adj. Pr. a<sup>2</sup>b-so-lu<sup>t</sup>e. Lat., *absolutus* (from *absolvere*, to complete). Fr., *absolu*. Ger., *absolut*. It., *assolut*. Sp., *absoluto*. 1. Actual, positive, as the a. weight of a body as distinguished from its specific weight. 2. Pure (e. g., a. alcohol).

**ABSONDERN** (Ger.), v. tr. Pr. a<sup>2</sup>b'zo<sup>2</sup>n-de<sup>2</sup>rn. 1. To secrete. 2. To abduce.—A'd. Secretory.

**ABSONDERUNG** (Ger.), n. Pr. a<sup>2</sup>b'zo<sup>2</sup>nd-e<sup>2</sup>r-ung. 1. A process of secretion or excretion. 2. A product of such process. 3. An exudation. [A, 315.]—**A'sdotter**. See under DORTER.—**A'sgefäss**. A secretory vessel.—**A'sorgan**. A secretory organ.—**A'svermögen**. The power of secretion.—**A'swerkzeug**. A secretory apparatus.

**ABSORBENT**, adj. and n. Pr. a<sup>2</sup>b-so<sup>2</sup>rb'e<sup>2</sup>nt. Lat., *absorbens* (pres. part. of *absorbere*, to suck in). Fr., *absorbant*. Ger., *absorbierend* (adj.). It., *assorbente*. Sp., *absorbente*. 1. (adj.) Capable of absorbing; pertaining to the function of absorption. 2. (n.) A lymphatic or lacteal vessel. 3. (n.) A medicine or a dressing which acts by absorbing gases or liquids. Cf. ANTACID. 4. (n.) An old synonym of styptic. [A, B, K.]

**ABSORBIREND** (Ger.), adj. Pr. a<sup>2</sup>b-zo<sup>2</sup>rb-e<sup>2</sup>re<sup>2</sup>nd. Absorbent, sorbificient.

**ABSORPTIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-so<sup>2</sup>rp/shi<sup>2</sup>(ti<sup>2</sup>)-o. Absorption.—**A. morbosa**. See *Pathological absorption*.—**A. pulmonalis**. See *Pulmonary absorption*.—**A. sana**. Physiological absorption.

**ABSORPTIOMETER**, n. Pr. a<sup>2</sup>b-so<sup>2</sup>rp-shi<sup>2</sup>-o<sup>2</sup>m'e-tu<sup>2</sup>r. From Lat., *absorptio*, and Gr., *μετρεω* (see *-meter*). S. Lea's term for an instrument devised by him for varying the thickness of a layer of liquid that is to be examined with a spectro-photometer; being a modified form of hematoscope. Two tubes, each closed at one end with a glass plate, move one within the other, the extent of the motion, and consequently the degree of separation of the plates (between which the liquid is situated), being regulated by a screw, each complete revolution of which approximates or separates the plates  $\frac{1}{4}$  of an inch. ["*Jour. of Physiol.*," v, p. 239.]

**ABSORPTION**, n. Pr. a<sup>2</sup>b-so<sup>2</sup>rp/shu<sup>2</sup>n. For deriv., see **ABSORBENT**. Gr., *ἀναρρόφσις*, *ἀναρροβήσις*. Lat., *absorptio*. Fr., *absorption*. Ger., *Aufsaugung*. It., *assorbimento*. Sp., *absorción*. In general, the act or process of absorbing; the imbibition of nutritive or other material by a living organism; the process of taking up waste or effete material into the general circulation. [A, B, C, K.]—**A. band**. See *A. SPECTRUM*.—**A. chyluse** (Fr.). Syn.: *pénétration du chyle*. See *Chylous a.*—**A. coefficient**. See *Co-efficient of a.*—**A. cutanée** (Fr.). See *Cutaneous a.*—**A. décomposante** (Fr.). See *Internal a.*—**A. de composition** (Fr.). See *External a.*—**A. de décomposition**, **A. de nutrition** (Fr.). See *Internal a.*—**A. externe** (Fr.). See *External a.*—**A. interne**, **A. interstitielle** (Fr.). See *Internal a.*—**A. lines**. See *A. SPECTRUM*.—**A. lymphatique** (Fr.). See *Lymphatic a.*—**A. of composition**. See *External a.*—**A. of decomposition**, **A. of dissimilation**. See *Internal a.*—**A. pathologique** (Fr.). See *Pathological a.*—**A. pulmonaire** (Fr.). See *Pulmonary a.*—**A. récrémentielle** (Fr.). See *Recrementital a.*—**A. respiratoire** (Fr.). See *Pulmonary a.*—**A. scœfficient** (Ger.). See *Co-efficient of a.*—**A. sfähig** (Ger.). Absorptive.—**A. spectrum**. See under *SPECTRUM*.—**A. streif** (Ger.). An a. band. See *A. SPECTRUM*.—**A. tube**. See under *TUBE*.—**A. ulcéralive** (Fr.). See *Ulcerative a.*—**A. veineuse** (Fr.). See *Venous a.*—**Chylous a.** Fr., *a. chyluse*, *pénétration du chyle*. The process by which the oil globules of the chyle pass into the central canals of the intestinal villi. [A, 301.]—**Co-efficient of a.** Fr., *coefficient d'a.* Ger., *A. scœfficient*. It., *coefficiente di assorbimento*. Sp., *coefficiente de absorción*. A number representing the volume of a gas absorbed by a unit volume of water at a temperature of 0°C., and under a barometric pressure of 760 mm. [B.]—**Cutaneous a.** Lat., *absorptio cutanea*. Fr., *a. cutanée*. Ger., *Hautinsaugen*. It., *assorbimento cutaneo*. Sp., *absorción cutanea*. A. by the skin, either entire or deprived of the horny layer of its epidermis.—**Disjunctive a.** The a. of living tissue around a necrosed mass, whereby the latter is separated. [K.]—**Excrementital a.** The supposed a. of a certain amount of the fluid excretions as they flow over mucous surfaces. [K, 3.]—**External a.** Syn.: *a. of composition*. 1. A. by those surfaces of the body which are exposed to the air, such as the skin and the mucosa of the air-passages. 2. A process of a. by which the nutritive material needed by an organ is obtained from without. [K, 3.]—**Internal a.** Syn.: *a. of decomposition*. The a. of waste material from an organ. [K.]—**Lymphatic a.** A. by the lymphatic vessels.—**Molecular a.**, **Nutritive a.**, **Organic a.** See *Internal a.*—**Pathological a.** Syn.: *resorption*. The a. of an excretion (like the bile) or a morbid product (like pus or the contents of a cyst) into the blood. [A, 301.]—**Progressive a.** The gradual a. or atrophy of a part from long-continued pressure, as from an aneurysm. [K.]—**Pulmonary a.** A. by the respiratory mucous membrane. [K.]—**Purulent a.** A term sometimes applied to pyæmia. [D.]—**Recrementital a.** The a. of surplus secretions, such as mucus, synovia, etc. [K, 3.]—**Respiratory a.** See *Pulmonary a.*—**Ulcerative a.** The a. by which an ulcer forms or increases in extent.—**Venous a.** A. by the veins.

**ABSORPTIVE**, adj. Pr. a<sup>2</sup>b-so<sup>2</sup>rp/ti<sup>2</sup>v. Fr., *absorptif*. Ger., *absorptionsfähig*. Having the power of absorbing. [D.]

**ABSORPTIVITY**, n. Pr. a<sup>2</sup>b-so<sup>2</sup>rp-ti<sup>2</sup>v/i<sup>2</sup>-ti<sup>2</sup>. Fr., *absorptivité*. Ger., *Einsaugungskraft*. The power of absorbing. [A, 324.]

**ABSPANNUNG** (Ger.), n. Pr. a<sup>2</sup>b/spa<sup>2</sup>n-nung. 1. Lassitude, debility. 2. Relaxation, as of a muscle. [K.]

**ABSPPLITTERUNG** (Ger.), n. Pr. a<sup>2</sup>b/spli<sup>2</sup>t-te<sup>2</sup>r-ung. Desquamation. [A, 320.]

**ABSTAMMUNGSLEHRE** (Ger.), n. Pr. a<sup>2</sup>b/sta<sup>2</sup>m-mungz-la<sup>2</sup>/re<sup>2</sup>. The doctrine of descent. See **DARWINISM**.

**ABSTEMIOUS**, adj. Pr. a<sup>2</sup>b-ste<sup>2</sup>/mi<sup>2</sup>-u<sup>2</sup>s. Lat., *abstemius* (from *abs* [see *Ab-*], and *temetum*, an intoxicating drink). Fr., *abstème*. Ger., *enthaltam*. Abstaining from intoxicating drinks or other indulgence of the appetites; temperate.

**ABSTENTIO** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-ste<sup>2</sup>n/shi<sup>2</sup>(ti<sup>2</sup>)-o. From *abstinere*, to hold back, abstain from. Retention.—**A. stercorum**. Retention of feces, constipation. [Cælius Aurelianus, A, 312.]

**ABSTERBEN** (Ger.), n. Pr. a<sup>2</sup>b/stē<sup>2</sup>r-be<sup>2</sup>n. 1. Numbness, insensibility. 2. Suspended or impaired animation of a part. See *Local ASPHYXIA*. 3. Gangrene. 4. Death. 5. Coagulation.—**Habituelles A. der Frucht**. See *Habitual ABORTION*.

**ABSTERBEORDNUNG** (Ger.), n. Pr. a<sup>2</sup>b/stē<sup>2</sup>rb-e<sup>2</sup>-o<sup>2</sup>rd<sup>2</sup>-nung. Mortality statistics. [A, 303.]

**ABSTERGE**, v. tr. Pr. a<sup>2</sup>b-stu<sup>2</sup>rj<sup>2</sup>. Lat., *abstergere*, to wipe away. Fr., *absterger*. Ger., *abstergien*. To cleanse.

**ABSTERGENT**, n. Pr. a<sup>2</sup>b-stu<sup>2</sup>rj<sup>2</sup>-ent. Lat., *abstergens*, *abstersivus*. Fr., *abstergent*. Ger., *abstergende Mittel*. It., *astergente*. Sp., *abstergente*. Syn.: *detergent*. A cleansing application.

**ABTERSE**, v. tr. Pr. a<sup>2</sup>b-tu<sup>2</sup>r<sup>2</sup>s. See **ABSTERGE**.

**ABTERSION**, n. Pr. a<sup>2</sup>b-stu<sup>2</sup>r<sup>2</sup>/shu<sup>2</sup>n. Lat., *abstersio*. Fr.,

*abstersion*. Ger., *Abstersion*. It., *astersione*. Sp., *abstersión*. A cleansing.

**ABTERSIIVE**, n. Pr. a<sup>2</sup>b-stu<sup>2</sup>r<sup>2</sup>/i<sup>2</sup>v. Lat., *abstersivum*. Fr., *abstersif*. Ger., *abstergende Mittel*. It., *astervivo*. Sp., *abstersivo*. See **ABTERGENT**.

**ABTERSIIVUS**, **ABTERSORIUS** (Lat.), adj<sup>s</sup>. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-stu<sup>2</sup>r<sup>2</sup>(ste<sup>2</sup>r)-si<sup>2</sup>(se)/vu<sup>2</sup>s(wu<sup>2</sup>s). *so<sup>2</sup>/ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s)*. Abstergent.

**ABSTINENCE**, n. Pr. a<sup>2</sup>b/sti<sup>2</sup>n-e<sup>2</sup>ns. Gr., *ἐγκράτεια*. Lat., *abstinentia* (from *abstinere*, to abstain). Fr., *abstinence*. Ger., *Enthaltsamkeit*. It., *astinenza*. Sp., *abstinencia*. An abstaining from indulgence, especially from food or drink. Cf. **DIET**.

**ABTOSSEN** (Ger.), n. Pr. a<sup>2</sup>b/sto<sup>2</sup>s-se<sup>2</sup>n. A separation, a casting off, as of a slough or a sequestrum; the shedding of the milk teeth.

**ABTOSSUNG** (Ger.), n. Pr. a<sup>2</sup>b/sto<sup>2</sup>s-sung. In magnetism, repulsion. [B.]

**ABSTRACT**, n. Pr. a<sup>2</sup>b/tra<sup>2</sup>kt. Lat., *abstractum* (from *abstrahere*, to withdraw). Ger., *Abstract*. A preparation, official in the U. S. Ph., consisting of a powder made by evaporating an alcoholic fluid extract to dryness with milk-sugar, in such a manner that 1 part of the a. represents 2 parts of the drug or of the fluid extract. [B.]

**ABSTRACTICIUS** (Lat.), adj. Pr. a<sup>2</sup>bs(a<sup>3</sup>bs)-tra<sup>2</sup>kt(tr<sup>2</sup>akt)-i<sup>2</sup>/shi<sup>2</sup>(ki<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). Capable of being abstracted without preliminary maceration, fermentation, or the like. [A, 322.]

**ABSTRACTION**, n. Pr. a<sup>2</sup>bs-tra<sup>2</sup>k/shu<sup>2</sup>n. Lat., *abstractio*. Fr., *abstraction*. Ger., *Entziehung*. It., *astrazione*. Sp., *abstracción*. In chemistry and pharmacy, the withdrawal of a constituent, such as water, from a compound.

**ABSTRACTITIUS** (Lat.), adj. Pr. a<sup>2</sup>bs(a<sup>3</sup>bs)-tra<sup>2</sup>kt(tr<sup>2</sup>akt)-i<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-u<sup>2</sup>s(u<sup>2</sup>s). See **ABSTRACTICIUS**.

**ABSTRACTIV** (Ger.), n. Pr. a<sup>2</sup>b-stra<sup>2</sup>k-tef<sup>2</sup>. 1. A spirituous extract. 2. An expressed juice.

**ABSTRACTIVE**, adj. Pr. a<sup>2</sup>bs-tra<sup>2</sup>kt/i<sup>2</sup>v. See **ABSTRACTICIUS**.

**ABSTRACTIVUS** (Lat.), adj. Pr. a<sup>2</sup>bs(a<sup>3</sup>bs)-tra<sup>2</sup>kt(tr<sup>2</sup>akt)-i<sup>2</sup>(e)/vu<sup>2</sup>s(wu<sup>2</sup>s). See **ABSTRACTICIUS**.

**ABSTRACTUM** (Lat.), n. n. Pr. a<sup>2</sup>bs(a<sup>3</sup>bs)-tra<sup>2</sup>kt(tr<sup>2</sup>akt)/u<sup>2</sup>m-(u<sup>2</sup>m). See **ABSTRACT**.

**ABSTÜCKELUNG** (Ger.), n. Pr. a<sup>2</sup>b/stu<sup>2</sup>k-e<sup>2</sup>l-ung. See **MORCELEMENT**.

**ABSTUMPFEN** (Ger.), v. tr. Pr. a<sup>2</sup>b/stumpf-e<sup>2</sup>n. In chemistry, to neutralize.—**A'd.** Demulcent. [A, 315.]

**ABUD** (Ger.), n. Pr. a<sup>2</sup>b/zud. A decoction; an extract.—**A'humussäure**. Apotheme (*q. v.*); the deposit obtained by prolonged boiling of a vegetable decoction in an open vessel; so called from its resemblance to humin, or humic acid. [B, 48.]

**ABSUS** (Lat.), n. m. Pr. a<sup>2</sup>b(a<sup>3</sup>b)/su<sup>2</sup>s(su<sup>2</sup>s). See **CASSIA a.**

**ABSÜSSEN** (Ger.), n. Pr. a<sup>2</sup>b/zu<sup>2</sup>s-se<sup>2</sup>n. Edulcoration.

**ABSYNTH**, **ABSYNTHIN**, **ABSYNTHIN**, **ABSYNTHITES**, **ABSYNTHIUM**. See **ABSINTH**, etc.

**ABTHON** (Ger.), n. Pr. a<sup>2</sup>b/ton. See **ABERTHON**.

**ABTÖDTEN**, **ABTÖDTUNG** (Ger.), n's. Pr. a<sup>2</sup>b/tu<sup>2</sup>t-e<sup>2</sup>n-ung. Mortification. [A, 315.]

**ABTRAGEN**, **ABTRAGUNG** (Ger.), n's. Pr. a<sup>2</sup>b/tra<sup>2</sup>g-e<sup>2</sup>n-ung. Abcision, excision. [E.]

**ABTREIBEMITTEL** (Ger.), n. Pr. a<sup>2</sup>b/tri-be<sup>2</sup>-mi<sup>2</sup>t<sup>2</sup>/te<sup>2</sup>l. An abortifacient.

**ABTREIBUNG DER LEIBESFRUCHT** (Ger.), n. Pr. a<sup>2</sup>b/tri-bung de<sup>2</sup>r lib<sup>2</sup>/e<sup>2</sup>z-frucht<sup>2</sup>. Criminal abortion.

**ABTRENNUNG** (Ger.), n. Pr. a<sup>2</sup>b/tre<sup>2</sup>n-nung. Avulsion, disjunction.

**ABUK** (Ar.), n. Mercury. [A, 344.]

**ABUKIR**, n. See **ABOUKIR**.

**ABULAZA**, n. See **ABOUAZA**.

**ABULIA** (Lat.), n. f. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-u<sup>2</sup>(u)/li<sup>2</sup>-a<sup>2</sup>. Gr., *ἀβουλία* (from *a priv.*, and *βούλεσθαι*, to will). Fr., *abulie*. Ger., *Abulie*, *Willenlosigkeit*. Syn.: *defectus voluntatis*. A form of insanity characterized by loss or great impairment of the will. Cf. **ABOULOMANIA**.

**ABULIC**, adj. Pr. a<sup>2</sup>b-u<sup>2</sup>l/i<sup>2</sup>k. Lat., *abulicus*. Pertaining to or affected with abulia.

**ABUTA** (Lat.), n. f. Written also *abutua* and *butua*. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-u<sup>2</sup>(u)/ta<sup>2</sup>. A Guiana word, adopted by Aublet as the name for a genus of *Menispermaceæ* growing in Cayenne. [B, 43.]—**A. amara** [Aublet]. A Brazilian species which furnishes one variety of false pareira brava. [B, 33.]—**A. rufescens** [Aublet]. A climbing evergreen species found in the northern part of South America, the root and stems of which constitute white pareira brava. [B, 5, 43, 46.]

**ABUTILON** (Lat.), n. n. Pr. a<sup>2</sup>b(a<sup>3</sup>b)-u<sup>2</sup>(u)/ti<sup>2</sup>-lo<sup>2</sup>n. Said to be from the Ar., *abūtīlūn*, yellow. Fr., *mauve jaune*. Ger., *Sammtpappel*. An ancient name for a plant resembling marsh mallow; a genus of *Malvaceæ* established by Dillenius, Mönch, or Tournefort; made the name of a species of *Sida* by Linnaeus. [B, 19, 39, 41, 43, 52.]—**A. asiaticum** [Don]. A species including individuals described under *Sida arguta* and *Sida asiatica*. [B, 43.]—**A. Avicennæ** [Gärtner]. Ger., *Bastardeibisch*. Syn.: *Sida a.* Indian mallow; a species growing to the height of 3 or 4 feet, indigenous to the East and West Indies and naturalized in the United States. [B, 20, 34.]—**A. cordatum**. See *A. Avicennæ*.—**A. esculentum**. A Brazilian plant, the flowers of which are used as an article of food.—**A. giganteum**. See *Sida gigantea* and *Sida fru-*

*tescens*.—**A. indicum** [Don]. An Indian shrub, the fibers of which are used for making ropes. [B, 19.]

**ABUTUA** (Lat.), n. f. Pr.  $a^2b(a^2b)-u^2(tu)-a^2$ . See **ABUTA**.

**ABVACUATIO** (Lat.), n. f. Pr.  $a^2b(a^2b)-va^2k(wa^2k)-u^2(u)-a^2(y)-shi^2(t)^2-o$ . See **ABVEACUATION**.

**ABWECHSELN** (Ger.), v. intr. Pr.  $a^2b've^2ch^2-ze^2ln$ . To intermit (said of fever).—**A'd**. Intermittent; in botany, alternate.—**A'd-gefedert**. Alternately pinnate. [B.]

**ABWEG** (Ger.), n. Pr.  $a^2b've^2g$ . A diverticulum. [A, 320.]

**ABWEHRUNGSMITTEL** (Ger.), n. Pr.  $a^2b'va-rungz-mi^2t'u'-te^2l$ . A preventive, a preservative. [A, 315.]

**ABWEICHEN** (Ger.), v. tr. and intr. Pr.  $a^2b'vi-ch^2e^2n$ . To macerate, to deviate; as a n., maceration, diarrhoea. [A, 315.]—**A'd**. Anomalous, irregular. [A, 315.]

**ABWEICHUNG** (Ger.), n. Pr.  $a^2b'vi-ch^2ung$ . See **ABWEICHEN**.—**A'skreis**. The circle in which lie the points of intersection of rays refracted by a prism. [B, 48.]

**ABWESENHEIT** (Ger.), n. Pr.  $a^2b'va-ze^2n-hit$ . See **ABSENCE**.

**ABWÜRGUNG** (Ger.), n. Pr.  $a^2b'vu'r-gung$ . Strangulation. [A, 315.]

**ABYREICA**, n. An Abyssinian name for senna. [A, 344.]

**ABYSSE**, n. A priest believed by the Kalnuks to have the power of driving away diseases. [A, 321.]

**ABYSSUS** (Lat.), n. m. Pr.  $a^2b(a^2b)-i^2s(u^2s)/su^2s(su^2s)$ . Gr., *ἄβυσσος*, boundless. A mystic term among the followers of Paracelsus, signifying "a receptacle for the seminal matter," i. e., the primitive material out of which substances in general were held to be formed. [A, 343.]

**ABZAC** (Fr.), n. Pr.  $a^2b-za^2k$ . A village in the Department of the Charente, in France, near which there is a bathing establishment, with a cold mineral spring. [A, 319.]

**ABZAHNEN** (Ger.), n. Pr.  $a^2b'tza^2n-e^2n$ . The shedding of the deciduous teeth (said especially of the lower animals). [A, 305.]

**ABZAPFEN** (Ger.), n. Pr.  $a^2b'tza^2p-fe^2n$ . 1. Paracentesis. 2. Bloodletting.—**Abzapfer**. A trocar.

**ABZÄUMUNG** (Ger.), n. Pr.  $a^2b'tzoim-ung$ . Division of the frænum lingue. [A, 320.]

**ABZEHRRUNG** (Ger.), n. Pr.  $a^2b'tzar-ung$ . Emaciation, consumption.

**ABZENDEGKANI** (Pers.), n. Lit., water of life; an Oriental spring the waters of which were said to confer immortality. [A, 305.]

**ABZIEHEN** (Ger.), v. tr. Pr.  $a^2b'tze-he^2n$ . 1. To distill. 2. To abduct.—**Abziehapparat**. A distilling apparatus. [A, 315.]—**Abziehblase**. An alembic.—**A'd**. Abducent.—**Abzieher**. An abductor muscle.—**Abziehflasche**. A cucurbit. [A, 315.]—**Abziehkolben**. An alembic. [A, 315.]—**Abziehmuskel**. An abductor muscle.—**Abziehung**. 1. An abrasion. [E.] 2. Abduction.—**Abziehungsmuskel**. An abductor muscle.

**ABZUG** (Ger.), n. Pr.  $a^2b'tzug$ . The cross which forms on the surface of molten lead. [B, 3, 38, 48.]—**A'sskanal**, **A'sröhre**. An outlet, a sewer. [H.]

**ACACALIS** (Lat.), n. f. Pr.  $a^2k(a^2k)-a^2k(a^2k)/a^2-l^2s$ . Gr., *ἀκάκalis*. Fr., *acacalis*. An Egyptian shrub mentioned by Dioscorides, the seeds of which were used by the ancients as a remedy for ophthalmia. It has been supposed to be the *Silvia silvestris*, the *Cassia absus*, or a variety of *Acacia arabica*. [A, 311, 328, 342; B, 46.]

**ACACANTHRAX** (Lat.), n. m. Pr.  $a^2k(a^2k)-a^2k(a^2k)-a^2n(a^2n)-thra^2x(thra^2x)$ . Gen., *acacanthracis*. From a priv., *cakos*, pernicious, and *ἀνθράξ*, a carbuncle. Non-malignant anthrax. [A, 322.]

**ACACIA** (Lat.), n. f. Pr.  $a^2k(a^2k)-a^2(y)shi^2(ki^2)-a^2$ . Gr., *ἀκασία* [Dioscorides] from *ἀκάειν*, to sharpen, from the spines possessed by some of the species). Fr., *acacia*, *gomme arabique* (2d def.). Ger., *Acacie*, *Akazie*, *Schotendorn*, *Schlehdorn*, *arabisches Gummi* (2d def.). It., *acacia*, *acazia*, *gomma arabica* (2d def.). Sp., *acacia*, *goma arabica* (2d def.). Syn.: *gummi arabicum* (2d def.). 1. A genus, mostly trees and shrubs, of which more than four hundred species are known, belonging to the natural order *Leguminosæ* and the sub-order *Mimoseæ*, and distinguished from the other genera by having polygamous flowers. The genus was established by Willdenow, the various species having formerly been included under the Linnean genus *Mimosa*. It is found more particularly in Africa and Australia. The products of many of the species are used in medicine and the arts. [B, 34.] 2. Gum arabic.—**A. Adansonii** [Guillemin and Perottet]. Fr., *gommier rouge gonaké* (ou *gonatié*) [Adanson]. Syn.: *Mimosa adstringens* (Thönnig and Schumacher). A species found in Senegambia, said to furnish Senegal gum arabic. [B, 5.]—**A. adstringens** [Martius]. See *STRYPHODENDRON polyphyllum*.—**A. ægyptiaca**. A variety of *A. arabica*. [A, 328.]—**A. alba**. See *A. leucophleæ*.—**A. albicans**. According to Power and Sedgwick, a Brazilian species furnishing Kulsache gum. [A, 316.]—**A. amara** [Willdenow]. Syn.: *Albizia amara* [Boivin]. An Indian species, the bark of which is used in astringent lotions and as a tonic. [A, 316, 328.]—**A. angico** [Martius]. See *STRYPHODENDRON polyphyllum*.—**A. anthelmintica** [H. Buillon]. See *ALBIZIA anthelmintica*.—**A. arabica** [Willdenow]. Syn.: *Mimosa arabica* [Linnaeus]. The *babul*, *babool*, or *babul* tree of India, now regarded as a variety of the *A. verec*; a tree reaching the height of 20 feet. Its bark contains a large amount of tannin, and is used as an astringent and tonic; the bruised leaves are applied to ulcers; and the pods, called *bablah*, are used in coughs. It furnishes an inferior sort of gum arabic called *babul* gum or *gond-babul*. [A, 247, 316; B, 5, 19, 43.]—**A. Bambohal** [Roxburgh]. Fr., *A. cendré*. An East Indian variety that furnishes *bablah*.—**A. blanchâtre** (Fr.). See *A. dealbata*.—

**A. capensis** [Burchell]. See *A. horrida*.—**A. catechu** [Willdenow]. Fr., *cachoutier*. Sp., *A. catecu*. Syn.: *A. suma* [Kurz.], *Mimosa catechu* [Linnaeus]. A species indigenous to India and Burmah; a tree, seldom more than 12 feet high, from which catechu is made by evaporating a decoction of the inner red or brownish wood of the trunk. [B, 5.]—**A. cendré** (Fr.). See *A. Bambohal*.—**A. cochiloearpa** [Don]. According to Power and Sedgwick, a Brazilian tree which furnishes *cortex braziliensis* (q. v.). [A, 316.]—**A. concinna** [De Candolle]. Syn.: *Mimosa saponaria* [Roxburgh]. An Indian species, growing to the height of 20 feet. It is said to contain saponin, and its pods are used in washing clothes and for cleansing the hair. It is also expectorant and emetic. [A, 316, 328; B, 5, 19, 43.]—**A. d'Allemagne** (Fr.). See *A. nostras*.—**A. dealbata** [Link]. Fr., *A. blanchâtre*. The silver wattle; an Australian evergreen shrub, about 4 feet high, which furnishes a variety of gum arabic. [B, 10, 43.]—**A. de Constantinople** (Fr.). See *A. Julibrissin*.—**A. decurrens** [Willdenow]. Syn.: *Mimosa decurrens* [Donn]. The wattle tree; a New South Wales shrub, about 6 feet high, furnishing a variety of gum arabic which is sometimes slightly purplish. The bark yields an extract similar to catechu. [A, 328; B, 5, 43.]—**A. de Farnèse** (Fr.). See *A. farnesiana*.—**A. du Nil** (Fr.). See *A. nilotica*.—**A. ehrenbergiana** [Hayne]. **A. Ehrenbergii** [Nees]. A shrub, 6 to 8 feet high, indigenous to the Nile region, furnishing a variety of gum arabic. [B, 5.]—**A. falcata** [Willdenow]. According to Power and Sedgwick, a New South Wales tree, the *vee-tellan* of the aborigines, the *lignum vite* of the colonists, the bark of which contains tannin and is used by the natives to poison fish. [A, 316.]—**A. farnesiana** [Willdenow]. Fr., *A. de Farnèse*, *cassie*, *casse du Levant*. A West Indian tree, 15 to 20 feet high. According to Power and Sedgwick, it furnishes a gum resembling gum arabic, the bark is astringent, the creoles use the leaves in bladder diseases, and a delicious perfume, said to be stimulant, is distilled from the flowers. [A, 316; B, 43, 49.]—**A. fasciculata** [Guillemin and Perottet]. See *A. tortilis*.—**A. ferrea**. In alchemy, an iron spoon. [B, 50.]—**A. ferruginea** [De Candolle]. Syn.: *Mimosa ferruginea* [Roxburgh]. An Indian shrub, from which a very poisonous liquor is distilled. The bark is highly astringent; a decoction of it is used as a tooth wash. According to Miquel, it is a species of *Albizia*. [A, 328, 344.]—**A. fistula**. A species growing in Northern Africa, furnishing a variety of gum arabic. [B, 5.]—**A. floribunda** [Willdenow]. Syn.: *Mimosa floribunda* [Ventenat]. A shrub, 6 feet high, growing in New South Wales, yielding a gum resembling gum arabic. The name has also been applied to the *A. longifolia*. [A, 344; B, 5, 43.]—**A. germanica**. See *A. nostras*.—**A. giraffe** [Sieber]. Camelpard's a., from its being a favorite food of the giraffe; an African species, yielding a superior kind of gum arabic, called by the natives *kameel-doorn* and eaten by them. [A, 248, 316.]—**A. graveolens**. According to Power and Sedgwick, a native of India and Bengal, used as a bitter and diaphoretic. [A, 316.]—**A. Greggii**. A species growing in the western part of the United States, said to furnish shellac and lac dye. [B, 5, 60, 66.]—**A. gummifera** [Willdenow]. Ger., *Talhahbaum*. A tree, 30 feet high, growing in Guinea, said to furnish Barbary gum and gum sassa. [A, 328; B, 43.]—**A. homalophylla** [A. Cunn.]. The myal, or myall, tree of Australia, furnishing a gum used as a remedy for diarrhoea. [A, 321; B, 5, 19.]—**A. horrida** [Willdenow]. A shrub, 6 feet high, growing at the Cape of Good Hope, furnishing the variety of gum arabic known as Cape gum. The bark is highly astringent. [A, 316; B, 5, 43.]—**A. indica** [Desvaux]. Syn.: *Mimosa indica*. A variety of the *A. arabica* of Willdenow. [A, 328.]—**A. Julibrissin** [Willdenow]. Fr., *a. de Constantinople*, *arbre à soie*. The silk tree growing in the Levant, distinguished by its smooth bark and its white blossoms. A diaphoretic tea is made from the latter. [B, 43.]—**A. Jurema**. See *STRYPHODENDRON jurema*.—**A. karroo** [Hayne]. A Cape of Good Hope species, furnishing gum arabic. [B, 5.]—**A. lebbek** [Willdenow]. Syn.: *Mimosa lebbek* [Linnaeus]. The *labach* of the Arabians, indigenous to Upper Egypt, and cultivated in the East and West Indies, yielding a kind of gum arabic. The wood is the *bois noir* of the Mauritius; the leaves are used, as fomentations and baths, for rheumatic pains; the boiled seeds are said to be poisonous. [A, 316, 344.]—**A. leucocephala** [Bertolini]. A Puerto Rico species. The bark is astringent. [A, 344.]—**A. leucophleæ** [Willdenow]. An Indian shrub, from which the natives distill a strong spirituous liquor. The bark is highly astringent. [A, 316, 328.]—**A. melanocheta**. Thought to be the same as *A. leucophleæ*. [A, 328.]—**A. melanoxylon** [R. Brown]. An Australian shrub, which furnishes Australian gum and an extract resembling catechu. [A, 328.]—**A. mollissima** [Willdenow]. A shrub indigenous to Van Dieman's Land, considered by Lindley as a variety of *A. decurrens*. The bark yields an astringent extract. [A, 316, 328.]—**A. myriophylla** [Graham]. A species indigenous to Silhet, where a kind of beer is made from the bark. [A, 316.]—**A. neboeb**, **A. neboed**. Probably from *nebeb*, a negro name for the *A. verec*, with which it is found associated. [A, 316, 328.] Cf. *A. Adansonii*.—**A. nellyrenza** [Graham]. See *A. amara*.—**A. nilotica** [Delille]. Fr., *a. du Nil*, *gommier rouge*. Syn.: *Mimosa nilotica* [Linnaeus]. A variety of the *A. arabica* of Willdenow, furnishing a sort of gum arabic and the Senegal and Egyptian *bablah*. [B, 5.]—**A. niopo**, **A. nlops**. A South American species, considered to be more properly a *Piptadenia*. The Orinoco Indians, according to Humboldt, smoke the powdered seeds instead of tobacco. According to Power and Sedgwick, the pods, mixed with the flour of cassava and with lime from the shell of a *Helix*, are used as an intoxicating snuff by the Indians. [A, 316, 328, 344.]—**A. nostras**. Fr., *Jawar*. A. Ger., *Schlehensoft*. Syn.: *a. germanica*. German, or false, acacia; an imitation of the old extract of *a. (acacia) verec* (succus), made by inspissating the juice of the unripe fruit of the wild sloe (*Prunus spinosa*). [B, 5, 55, 58.]—**A. odoratissima** [Willdenow]. An East Indian tree, 40 feet high, with white, fragrant flowers. A preparation of the juice of the bark, together with lime-jew and turmeric, boiled in cocoanut oil, is used externally in leprosy and chronic

ulcers. [A. 316; B. 43, 48].—**A. orfota** [Lindley]. Syn.: *Mimosa Orfota* [Forsk.]. An Arabian species. According to Forsk., the leaves prevent camel's milk from becoming sour for a considerable time, and the Arabs use fumigation with the resin in the treatment of epilepsy. [A. 344].—**A. pennata** [De Candolle]. See *A. concinna*.—**A. peregrina** [Willdenow]. Syn.: *Mimosa peregrina* [Linnaeus]. A New Granada species, the bark of which is supposed to contain tannin. [A. 344].—**A. polyacantha** [Willdenow]. See *A. catechu*.—**A. pycnantha** [Bentham]. An Australian species, furnishing a variety of Australian gum arabic. [B. 5].—**A. raddiana** [Savi]. An Egyptian species, upon which an insect termed *giokel* produces galls that are used to relieve odontalgia. [A. 328]. Considered by some as identical with *A. tortilis*.—**A. sassa**. Syn.: *Mimosa sassa* [Bruce]. A species growing in Abyssinia and Madagascar, furnishing a gum analogous to gum arabic. [Dupetit-Thouars, A. 344].—**A. scandens** [Willdenow]. Syn.: *Mimosa scandens* [Linnaeus]. The bayugo of the Philippine Islands, a large creeper. It furnishes the St. Thomas bean, and the bark, which contains a soapy principle, is used for washing linen. According to Horsfield, the plant is reputed an emetic in Java, where the seeds are eaten by the natives. The green pods contain a translucent, gummy material, from which, according to Rumpf, a lotion is made for cleansing the scalp and preventing the hair from falling out. The plant has also been classed as a species of *Entada*. [A. 323, 344; B. 43, 48].—**A. Senegal** [Willdenow]. Several species have been confounded under this name. One of them furnishes gum senegal. [A. 328].—**A. Seyal** [Delile]. A tree of Northern Africa, furnishing Suakin gum arabic. [B. 5]. The *A. Seyal* of De Candolle is the *A. tortilis*. [B. 63].—**A. sophorae** [R. Brown]. An Australian tree, the fruit of which, as well as the seeds (which the natives eat roasted), is nutritive and analeptic. It is doubtful if it furnishes gum arabic. [A. 328].—**A. speciosa** [Willdenow]. The sirissa tree of India, where the leaves, the bark, and an oil extracted from the seeds are used in ophthalmia, as an application to foul ulcers, in leprosy, and in beri-beri. [A. 316].—**A. stenocarpa**. A species found in Upper Egypt and adjacent countries, furnishing Suakin gum arabic. [B. 5].—**A. suma**, **A. sundra**. Species which resemble the *A. catechu* and yield a similar extract. [A. 316; B. 5].—**A. tenuifolia** [Willdenow]. A West Indian species. According to Pouppée-Desportes, the buds and root, commonly called *tendre à caillou*, are used for hemorrhages, diarrhoea, and vomiting. [A. 344].—**A. tortilis** [Hayne]. A tree of Northern Africa, sometimes 60 feet high, furnishing a variety of gum arabic. [B. 5].—**A. tortuosa** [Willdenow]. A West Indian species. The coats of the pod contain a bitter and astringent syrupy liquid. [A. 316].—**A. vera** [Willdenow]. **A. vera-vel**. Ger., *ägyptischer Schotendorn*. Syn.: *Mimosa nilotica* [Linnaeus]. A moderate-sized tree, indigenous to Egypt, but growing also in Nubia, Senegal, and probably other parts of Africa, also found in India. This and *A. vereke* are the most important sources of gum arabic. [B. 5, 43].—**A. vereke** [Guillemin and Perotet]. Fr., *gommier blanc*. A species growing in Eastern Africa, but chiefly in Western Africa, north of the Senegal River; usually less than 30 feet high; recognized in the U. S. Ph. as furnishing the official variety of gum arabic. Its specific name is the native term for the tree. [B. 5].—**A. wallichiana** [De Candolle]. See *A. catechu*.—**A. Wrightii** [Graham]. Probably identical with *A. anara*. [A. 323].—**A. zeylonica**. See *HEMATOXYLON campechianum*.—**Acaciaz gummi**. Gum arabic.—**Acacia vera succus**. Fr., *vrai a.* A reddish-brown solid extract formerly obtained from the immature pods of *A. arabica* and *A. vera*; mildly astringent, of a sweetish-acidulous taste, and soluble in water. [A. 305].—**Bastard a.**, **False a.**, **Faux a.** [Fr.], **German a.** See *A. nostras* and *ROBINIA pseudo-acacia*.—**Gummi acacia**. Gum arabic.—**Mucilage acaciae** [U. S. Ph., Br. Ph.]. Fr., *mucilage de gomme* [Fr. Cod.]. Ger., *Gummischleim*. It., *mucillagine di gomma arabica*. Sp., *mucilago de goma arabica*. Syn.: *mucilago gummi arabici* [Ger. Ph.], *mucilago cum gummi* [Fr. Cod.]. Mucilage of a. or of gum arabic; a viscid, tenacious liquid made by dissolving 34 parts of gum arabic in 66 parts of water [U. S. Ph.], or 4 avoirdupois ounces of the gum in 6 fluidounces of water [Br. Ph.]. The German preparation is of about the same strength as that of the U. S. Ph.; the French is made of equal parts of gum arabic and water. [B. 5].—**Syrupus acaciae** [U. S. Ph.]. Fr., *sirop de gomme* [Fr. Cod.]. Ger., *Gummi-syrup*. It., *siropo di gomma arabica*. Sp., *jarabe de goma arabica*. Syn.: *syrupus cum gummi* [Fr. Cod.], *syrupus gummosus* [Ger. Ph.]. Syrup of a., or of gum arabic, containing 25 parts of mucilage of a. and 75 parts of syrup. The preparation of the U. S. Ph. of 1870 was made by dissolving 2 troyounces of a. in 8 fluidounces of water, adding 14 troyounces of sugar, and straining. The French preparation contains only one twelfth its weight of gum arabic. The German (given in the 1st ed. of the Ger. Ph., but discarded in the 2d) was of the same strength as the present U. S. preparation. [B. 5].—**Vrai a.** (Fr.). See *Acacia vera succus*.

**ACACIÆ** (Lat.), n. f., pl. of *acacia*. See **ACACIÆ**.

**ACACIÆ** (Fr., Ger.), n. Pr.  $a^2k-a^2s$ ,  $a^2k-a^2tzi^2-e^2$ . A horticultural term for several species of the genus *Acacia*. [A. 306].—**Amerikanische A.** (Ger.). See *ROBINIA pseudo-acacia*.—**Unechte A.** (Ger.). See *ACACIA nostras*.

**ACACIÆ** (Lat.), n. f. pl.  $A^2k(a^2k)-a(a^2)-si(ke)^2-e^2(a^2-e^2)$ . A tribe of plants of the order *Mimosaceae*, including the genera *Acacia*, *Albizzia*, *Pithecolobium*, *Erythrophloeum*, etc. [B. 41.]

**ACACIN**, n.  $A^2k-a^2-si^2n$ . Fr., *acacine*. Arabin.

**ACACINE**, n.  $A^2k-a^2-si^2n$ . Gum arabic. [B. 39.]

**ACACOS**, **ACACUS** (Lat.), adj's.  $A^2k(a^2k)-a(a^2)/ko^2s$ ,  $-ku^2s$ . (kn's). Gr., *ἀκάκος* (from a priv., and *κακός*, evil). A term used by Pechlinus to signify benign, involving no danger to life. As a n., it has been used as a synonym of apthæa. [A. 325, 334.]

**ACACU** (Port.), n.  $A^3-sa^3-ku'$ . A Brazilian tree, with poisonous sap, said to be curative of morphea. [B. 44.]

**ACADINUS** (Lat.), n. m.  $A^2k(a^2k)-a^2-di(de)/nu^2s(nu^2s)$ . A Sicilian spring classed with that of Palice. [A. 305.]

**ACADZIR** (Ar.), n. See **ACAZIR**.

**ACENA** (Lat.), n. f.  $A^2s(a^2k)-e'(a^2/e^2)-na^2$ . From *ἀκείνα*, a spine. A genus of *Rosaceae* established by Vahl, embracing a number of herbaceous or shrubby plants provided with a spinous calyx. [B. 38, 41].—**A. sanguisorba**. A Tasmanian species, the leaves of which are used as a substitute for tea. [A. 316.]

**ACAHI** (Ar.), n. Written also *uchahi*. An old name for alum water. [A. 325.]

**ACAID** (Ar.), n. An old term for vinegar. [A. 325.]

**ACAJA** (Ger.), n.  $A^3k-a^3/ya^2$ . The fruit of the *Acacia vera*.

**ACAJOU** (Fr.), n.  $A^3k-a^3-zhu$ . 1. A genus of plants established by Tournefort, corresponding to the *Anacardium* of Rottböd. 2. The *Anacardium occidentale*. 3. The cashew nut. 4. A yellow gummy substance, consisting of ordinary gum and bassorin, obtained from the bark of the cashew-nut tree (*Anacardium occidentale*). [B. 2, 5, 41].—**A. a pommès** (Fr.), **A'baum** (Ger.). The cashew-nut tree.—**A'gummi**, **A'harz** (Ger.). See *Acajou* (4th def.).—**A'nuss** (Ger.). The cashew nut.—**Gomme d'a.** See *Acajou* (4th def.).—**Noix d'a.**, **Pomme d'a.** The cashew nut.—**Résine d'a.** See *Acajou* (4th def.).

**ACAJU**, **ACAJUBA** (Lat.), n's f.  $A^2k(a^2k)-a^2-ju(yu)$ ,  $ju(yu)/ba^2$ . Latinized forms of a Malay word meaning a wood readily worked [B. 51]; according to others, of the Brazilian word *acajibo*, or a corruption of *caju* or *cazon*, meaning any sort of wood used by cabinet-makers. [A. 306.] Under the name *Acajuba*, Gärtner established a genus corresponding to the *Anacardium* of Rottböd, who, according to Baillon, applied the term only to the fruit of *Anacardium occidentale*. [B. 41, 43, 46].—**Acajuba occidentalis**, **A. officialis**. See *ANACARDIUM occidentale*.

**ACALAI** (Ar.), n. An old name for common salt. [A. 325.]

**ACALCUM**, n. An old name for tin. [A. 325.]

**ACALICAL**, adj. See **ACALYCINE**.

**ACALICINE**, adj. See **ACALYCINE**.

**ACALICULATE**, adj.  $A^2k-a^2-i^2k-u^2-lat$ . See **ACALYCULATE**.

**ACALICULÉ** (Fr.), adj.  $A^2k-a^2-le-ku^2-la$ . Acalyculate.

**ACALVITIEN** (Fr.), adj.  $A^3k-a^3-vi^2-shi^2-a^3n^2$ . From a priv., and *calvities* (q. v.). Preventive of baldness. [A. 306.]

**ACALYCAL**, adj.  $A^2k-a^2/i^2k-a^2$ . From a priv., and *καλός* (see **CALYX**). Lat., *acalycalis*. Fr., *acalical*. Not adherent to the calyx (said of stamens). [B. 38, 39.]

**ACALYCINE**, **ACALYCINOUS**, adj's.  $A^2k-a^2/i^2-si^2n$ ,  $i^2s/-i^2n-u^2s$ . Fr., *acalicin*. Having no calyx. [B. 38, 39.]

**ACALYCLATE**, adj.  $A^2k-a^2-i^2k-u^2-lat$ . Fr., *acalculé*. Having no calyculus. [B. 39.]

**ACALYPHA** (Lat.), n. f.  $A^2k(a^2k)-a^2(a^2)/i^2f(u^2f)-a^2$ . From *ἀκαλύφω* or *ἀκαλύπτω* (forms of *ἀκαλύπτω*), unveiled; or from *ἀκαλύφω*, a nettle. Fr., *acalyphe*, *ricinelle*. Syn.: *Acalyphe* [Hasskarl]. A genus of euphorbiaceous plants established by Linnaeus [B. 34, 41, 46].—**A. amentacea**, **A. betulina**. See *A. fruticosa*.—**A. carpinifolia**. A Santo Domingo species. The leaves are used as an antispasmodic. [A. 316].—**A. ciliata** [Willdenow]. A species found in Asia and Tropical Africa. In Ashantee, where it is known as *crowera*, it is ground up with the lesser cardamum seeds, and applied to the chest to relieve pain. [Waring, A. 316].—**A. fruticosa**. Birch-leaved a.; an Indian shrub, the leaves of which are used by the native doctors in dyspepsia and cholera, and are also regarded as attenuant and alterative. [A. 316].—**A. hispida** [Willdenow]. An Indian species. The decoction is used in diarrhoea and dysentery, and as a tonic. [A. 316].—**A. indica** [Linnaeus]. An annual, 1 to 2 feet high, indigenous to India, said to have cathartic properties. [B. 19].—**A. virginica** [Linnaeus]. Three-seeded mercury; a weed 1 to 1½ foot high, indigenous to North America, said to be expectorant and diuretic. [A. 316; B. 34].—**Birch-leaved a.** See *A. fruticosa*.

**ACALYPHACEÆ** (Lat.), n. f. pl.  $A^2k(a^2k)-a^2(a^2)/i^2(u^2f)-fa(fa^2/se^2(ke^2)-e(a^2-e^2))$ . Fr., *acalyphees*. Ger., *acalypheaceen*. See **ACALYPHÆ**.

**ACALYPHÆ** (Fr.), adj.  $A^3-ka^3-li^2-fa$ . Resembling an acalyphe. [A. 306.]

**ACALYPHÆE** (Lat.), n. f. pl.  $A^2k(a^2k)-a^2(a^2)/i^2f(u^2f)e^2-e(a^2-e^2)$ . Fr., *acalyphees*. Ger., *Brennkräutgewächse*. Sp., *acalifas*. Syn.: *acalypheaceæ*. A sub-order of the natural order *Euphorbiaceæ*, including the genus *Acalypha*. [B. 35, 41.]

**ACALYPHES** (Lat.), n. m.  $A^2k(a^2k)-a^2(a^2)/i^2f(u^2f)-ez(e^2s)$ . Hasskarl's name for the genus *Acalypha*. [B. 41.]

**ACALYPTOSPORA** (Lat.), n. f.  $A^2k(a^2k)-a^2(a^2)/i^2p(u^2p)-to^2s(po-ra^2)$ . From *ἀκαλύπτω*, uncovered, and *σπορά*, a sowing. A genus of fungi established by Desmazières. [B. 41.]

**ACAMANTIA**, **ACAMASIA** (Lat.), n's f.  $A^2k(a^2k)-a^2-ma^2n'(ma^2n)/shi^2(ti^2)-a^2$ ,  $-a(a^2)/zhi^2(si^2)-a^2$ . Fr., *acamasiæ*. Ger., *Unermüdllichkeit*. The state of being *acamatus* (q. v.).

**ACAMATHOS**, **ACAMATOS**, **ACAMATUS** (Lat.), adj's.  $A^2k(a^2k)-a^2m(a^2m)/a^2-tho^2s$ ,  $-to^2s$ ,  $-tu^2s(tu^2s)$ . Gr., *ἀκάματος*, from a priv., and *καμννν*, to be weary. Fr., *infatigable*. Ger., *unermüddar*, *unerschöpflich*. Sp., *acamatos*. Untiring; hence, of long-enduring health. Galen is said to have used the term to indicate that state of a limb in which, being midway between flexion and extension, it could be kept longest without fatigue. [A. 322, 323.]

**ACAMECH**, n. An alchemical term for the impurities of silver, or, according to others, for refined silver. [A. 334, 337.]

**ACAMEIT**, **ACAMETL**, n. A Mexican name for the *Agave*

*americana*, a plant from which a wine is made that is drunk in Mexico. [A, 334, 344.]

**ACAMPSIA**, n.  $A^2k\text{-}a^2mp\text{-}si^2\text{-}a^3$ . Gr., *ἀκαμψία*, *ἀκαμπία* (from *a* priv., and *καμπτεω*, to bend). Fr., *acampsie*. Ger., *Akampsie*. Sp., *acampsia*. Inflexibility, rigidity of a limb.

**ACANACA**, n.  $A^2k\text{-}a^2n\text{-}a^2\text{-}ka^3$ . An East Indian plant used by the natives as a sudorific and anti-syphilitic. [A, 334.]

**ACANACEÆ** (Lat.), n. f. pl.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}a(a^3)/se^2(ke)^2\text{-}e(a^2\text{-}e^2)$ . Fr., *acanacées*. Ger., *Acanaceen*, *distelartige Pflanzen*. See CICHORACEÆ.

**ACANACEOUS**, adj.  $A^2k\text{-}a^2n\text{-}a\text{-}se^2\text{-}u^3s$ . Fr., *acanacé*. See ACANTHACEOUS.

**ACANOR** (Ar.). n. See *ATHANOR*.

**ACANOS** (Lat.), n. m.  $A^2k(a^2k)\text{-}a^2n\text{-}o^2s$ . Gen., *acani*. Gr., *ἀκανος*. 1. A thorny plant, mentioned by Pliny, the seeds and roots of which were used by the ancients against hæmorrhages. 2. A genus of *Compositæ* established by Adanson, corresponding to the *Onopordon* of Vaillant. [B, 41, 44.]—**A. spina** [Scopoli]. See *ONOPORDON acanthium*.

**ACANTHA** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)/tha^3$ . Gr., *ἀκανθα*. 1. A thorn. 2. A spine, as of a vertebra or of the tibia. 3. The vertebral column. [A, 336.] 4. Spina bifida. [A, 322.] 5. Anciently, any prickly plant, especially the *Acacia*. [A, 311.]

**ACANTHABOLUS** (Lat.), n. m. See *ACANTHOBOLUS*.

**ACANTHACEÆ** (Lat.), n. f. pl.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tha(th)^3\text{-}se^2(ke)^2\text{-}e(a^2\text{-}e^2)$ . Fr., *acanthées*. Ger., *Acanthaceen*, *Strauchdisteln*. Sp., *acantáceas*. Acanthads; an order of herbs and shrubs in De Candolle's natural system. They have opposite simple leaves, and flowers inclosed in large leafy bracts. The calyx and corolla are five-parted, the former being imbricate and the latter convolute in aestivation. The stamens are didynamous or diandrous. The fruit is a two-celled capsule containing from 4 to 12 seeds, destitute of albumen, and supported by hard hook-like or cup-shaped processes of the placenta. [B, 19, 34.]

**ACANTHACEOUS**, adj.  $A^2k\text{-}a^2n\text{-}tha\text{-}se^2\text{-}u^3s$ . Having spines, prickly (said of plants of the thistle kind).

**ACANTHADS**, n. pl.  $A^2k\text{-}a^2n\text{-}tha^2dz$ . See *ACANTHACEÆ*.

**ACANTHALRUCA**, **ACANTHALZUCA** [Quincy] (Lat.), n's f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tha^2(th)^3\text{-}ru(ru)^3$ ,  $zu^2(zu)/ka^3$ . The globe-thistle. [A, 336.] See *ECHINOPS sphaerocephalus*.

**ACANTHAVOLA** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tha^2(th)^3\text{-}vo(w)/la^3$ . See *ACANTHOBOLUS*.

**ACANTHE** (Fr.), n.  $A^2k\text{-}a^2nt$ . The genus *Acanthus*. [B.]—**A. d'Allemagne**. See *HERACLEUM sphondylium*.—**A. épineuse**. See *ACANTHUS spinosus*.—**A. molle**. See *ACANTHUS mollis*.—**A. sauvage**, **Fausse a.** The cotton-tistle. See *ONOPORDON acanthium*. [B, 19, 34.]

**ACANTHEÆ** (Lat.), n. f. pl.  $A^2k(a^2k)\text{-}a^2nth(a^2nth)/e(a)\text{-}e(a^2\text{-}e^2)$ . Fr., *acanthées*. Ger., *Acanthæ*. A tribe of the *Acanthaceæ* of which the *Acanthis* is the typical genus. [B, 38.]

**ACANTHI** (Lat.), n. m. pl.  $A^2k(a^2k)\text{-}a^2nth(a^2nth)/i(e)$ . Jus-sieu's term for the *Acanthaceæ*. [A, 322.]

**ACANTHIA** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2a^3$ . Fr., *acanthie*. Ger., *Wanze*. Syn.: *Cimex*. A genus of hemipterous insects.—**A. ciliata** [Eversmann]. A Russian species, smaller than *A. lectularia*, yellowish-red, and thickly covered with hair. Its bite is more painful and more lasting in its effects than that of *A. lectularia*. [B, 27.]—**A. lectularia** [Linnaeus]. Fr., *punaise des lits*. Ger., *Bettwanze*. Syn.: *Cimex lectularius*. The bedbug; a reddish-brown insect, 4.5 mm. long, with rudimentary wings and the abdomen divided into 8 segments. Its mouth is adapted for suction, and contains an alkaline secretion from the salivary glands, which causes the irritation that follows its bite. [B, 27.]

**ACANTHIADÆ** (Lat.), n. f. pl.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}thi(the)/a^2\text{-}de(da^2\text{-}e^2)$ . See *MEMBRANACEI*.

**ACANTHICÆ MASTICHE** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}thi^2(se)ka^3ma^2s(ma^2s)/ti^2k(ti^2ch)^2\text{-}e(a)$ . Gr., *ἀκανθική μαστίχη*. The juice of the *helxine*, a plant of unknown characters, mentioned by Pliny, supposed to be the *Carduus pinea* of the ancients or the *Atractylis gummifera* of Linnaeus. [B, 59.]

**ACANTHICHTHYOSIS**, n.  $A^2k\text{-}a^2n\text{-}thi^2k\text{-}thi^2\text{-}o\text{-}si^2s$ . Fr., *acanthichthyose*. Ger., *Dornfischschuppenkrankheit*. See *ICHTHYOSIS spinosa*.

**ACANTHIDÆ** (Lat.), n. f. pl.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2d\text{-}e(a^2e^2)$ . See *ACANTHÆÆ*.

**ACANTHILLIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}thi^2thi^2s$ . Gen., *acanthillidis*. Gr., *ἀκανθίλλης*. Wild asparagus. [A, 312.]

**ACANTHINUM** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2n\text{-}u^3m(u^4m)$ . Gum arabic. [Celsus; B, 45.]

**ACANTHINUS** (Lat.), adj.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2n\text{-}u^3s(u^4s)$ . Resembling the *Acanthus*. [A, 312.]

**ACANTHION** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2\text{-}o^2n$ . Gr., *ἀκανθιον*, dim. of *ἀκανθα*. See *ONOPORDON acanthium*.

**ACANTHIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2s$ . Gen., *acanthidis*. Gr., *ἀκανθίς*. The groundsel. See *SENECIO vulgaris*.

**ACANTHIUM** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)/thi^2\text{-}u^3m(u^4m)$ . A name for certain plants of the genus *Onopordon*. [B, 41, 43.]

**ACANTHIUROSUS**, adj.  $A^2k\text{-}a^2n\text{-}thi^2\text{-}u^3ru^3s$ . From *ἀκανθα*, a spine, and *οὐρά*, a tail. Fr., *acanthiure*. Ger., *dornschwanzig*. Having the tail supplied with spines. [A, 316.]

**ACANTHOBOLUS** (Lat.), n. m. Written also *acanthobolus*.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho^2b(o\text{-}lu^3s)/u^3s$ . From *ἀκανθα*, a thorn, and *βάλλειν*, to cast out. Fr., *acanthobole*. Ger., *Grätenzange*. It,

*acantobolo*, *acantabolo*. Sp., *acantabola*. 1. A name given by Paulus Ægineta to an ancient forceps for removing foreign bodies imbedded in the soft parts, resembling the volsella. [A, 314.] 2. The rose-bush. [Nicander, A, 322.] 3. A genus of *Algæ* established by Kützing. [B.]

**ACANTHOCARPOUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}ka^3r\text{-}pu^3s$ . From *ἀκανθα*, a spine, and *καρπός*, fruit. Fr., *acanthocarpe*. Ger., *dornfrüchtig*. Sp., *acantocarpo*. Having the fruit covered with spines. [B, 38.]

**ACANTHOCEPHALA** (Lat.), n. n. pl.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}se^2f(ke^2f)/a^2\text{-}ia^3$ . From *ἀκανθα*, a spine, and *κεφαλή*, the head. Fr., *acanthocéphales*. Ger., *Hakenwürmer*. It., *acantocefali*. Sp., *acanthocéfalos*. Thorny-headed worms; an order of scoloids characterized by a proboscis armed with hook-like processes. There is but one genus, *Echinorhynchus*, all the species of which are parasitic. [B, 27, 28.]

**ACANTHOCEPHALOUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}se^2f(a^2l\text{-}u^3s)$ . Thorny-headed, having the characters of the *Acanthocephala* (q. v.).

**ACANTHOCLOADUS**, adj.  $A^2k\text{-}a^2n\text{-}tho^2k\text{-}la^2d\text{-}u^3s$ . From *ἀκανθα*, a thorn, and *κλάδος*, a branch. Fr., *acanthoclade*. Ger., *dornästig*. Having thorny branches. [B, 36, 38.]

**ACANTHODES** (Lat.), adj.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}dez(das)$ . See *ACANTHOID*.

**ACANTHODION**, **ACANTHODIUM** (Lat.), n's n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}di^2\text{-}o^2n\text{-}u^3m(u^4m)$ . For deriv., see *ACANTHOID*. 1. A genus of *Acanthaceæ* established by Delille. 2. A name given by C. Koch to a genus of *Compositæ*. [B, 41.]

**ACANTHOGLOSSUM** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}glo^2s(su^2m)/u^3m$ . From *ἀκανθα*, a spine, and *γλῶσσα*, the tongue. Blume's name for a genus of orchids of the sub-order *Vandineæ*. [B, 19, 41.]

**ACANTHOID**, adj.  $A^2k\text{-}a^2n\text{-}thoid$ . Gr., *ἀκανθώδης*. Lat., *acanthoides*, *acanthoides*. Fr., *acanthoïde*. Ger., *acanthusartig* (1st def.), *dornähnlich* (2d def.). 1. Resembling the *Acanthus*. [A, 306.] 2. Spinous, prickly. [A, 322.]

**ACANTHOLIMON** [Boissier], **ACANTHOLINUM** [C. Koch] (Lat.), n's n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}li^2le)/mo^2n\text{-}u^3m(u^4m)$ . From *ἀκανθα*, a spine, and *λεμώνιον*, the sea-lavender or snakeweed [A, 311]. A genus of *Plumbaginaceæ* [B, 41] or *Plantaginaceæ* [B, 43] established by Boissier. They are small perennial plants.

**ACANTHOLOBUS** (Lat.), n. m.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}l'o\text{-}bu^3s(bu^3s)$ . See *ACANTHOBOLUS* (3d def.).

**ACANTHOLOMON** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}lo\text{-}mo^2n$ . See *ACANTHOLIMON*.

**ACANTHOLYSIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}li^2i^2(u^2\text{-}o^2)\text{-}si^2s$ . From *ἀκανθα*, a prickle, and *λύσις*, a loosening. Ger., *Akantholyse*. A form of acanthosis (q. v.) characterized by separation of the upper layers of the epidermis. In Auspitz's classification of skin diseases the acantholyses are a family of the acanthoses, embracing *pemphigus essentialis* and *gangræna cachectica infantum*. [G, 4.]—**A. bullosa acquisita** [G, 75]. See *PEMPHIGUS foliaceus*.

**ACANTHOMA** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}ma^2s$ . For deriv., see *ACANTHA* and *-oma*.<sup>2</sup> Ger., *Akanthom*. Hyperplasia of the prickle-cell layer of the epidermis. [G.]—**A. simplex**. See *HYPERACANTHOSIS*.—**Alveolar a.** Ger., *alveolares Akanthom*. A form in which the new growths have an alveolar structure. See *Alveolar PARACANTHOMA*.—**Warty a.** Ger., *warzenartige Akanthom*. A form in which there are warty elevations upon the surface of the skin. In Auspitz's classification of skin diseases the *warzenartige Akanthome* are a subdivision of the family of hyperacanthoses, including *verruca* and *condyloma acuminatum*. [G.]

**ACANTHO-MASTIC**, n.  $A^2k\text{-}a^2n\text{-}tho\text{-}ma^2s\text{-}ti^2k$ . See *Pseudo-MASTIC*.

**ACANTHOPELVIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}pe\text{-}li\text{-}vi^2s(wi^2s)$ . For deriv., see *ACANTHA* and *PELVIS*. Ger., *Stachelbecken*. A pelvis with its cavity encroached upon by an exostosis. [A, 319.]

**ACANTHOPHOROUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}f'o\text{-}ru^3s$ . From *ἀκανθα*, a spine, and *φορέω*, to bear. Fr., *acanthophore*. Ger., *dorntragend*. Bearing spines or prickles. [B, 36, 38.]

**ACANTHOPODOUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}po\text{-}di^2\text{-}u^3s$ . From *ἀκανθα*, a spine, and *πῶδιον* (dim. of *πούς*, a foot). Having prickly leaf-stalks.

**ACANTHOPODOUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}p'o\text{-}du^3s$ . From *ἀκανθα*, a spine, and *πούς*, a foot. Fr., *acanthopode*. Ger., *dornfüssig*. 1. Having spinous legs (said of insects). 2. Having spines in the place of fins (said of fishes). [A, 306, 316.]

**ACANTHOPOMATOUS**, **ACANTHOPOMOUS**, adj's.  $A^2k\text{-}a^2n\text{-}tho\text{-}po\text{-}ma^2t\text{-}u^3s\text{-}tho\text{-}p'o\text{-}mu^3s$ . From *ἀκανθα*, a spine, and *πῶμα*, a cover. Having the opercula spinous or serrated. [A, 306.]

**ACANTHOPOUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}pu^3s$ . From *ἀκανθα*, a spine, and *ὤψ*, the eye. Fr., *acanthope*. Ger., *dornäugig*. Having the eye furnished with spinous processes. [B, 38.]

**ACANTHOPTERYGIOSUS**, adj.  $A^2k\text{-}a^2n\text{-}tho\text{-}p\text{-}te\text{-}ri^2ri^2\text{-}u^3s$ . From *ἀκανθα*, a spine, and *πτερυγία*, a fin. Thorny-finned. [A, 327.]

**ACANTHOSIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}si^2s$ . Gen., *acanthosis* (-sis). For deriv., see *ACANTHA* and *-osis*.<sup>2</sup> Ger., *Akanthose*. Disease of the prickle-cell layer of the epidermis. The acanthoses are the 3d order of Auspitz's 7th class of skin diseases (the *epidermidoses*), comprising *hyperacanthoses*, *paracanthoses*, and *acantholyses*. [G, 4.]

**ACANTHOSPERMUM** (Lat.), n. n.  $A^2k(a^2k)\text{-}a^2n(a^2n)\text{-}tho\text{-}spu^2rm(spe^2rm)/u^3m(u^4m)$ . From *ἀκανθα*, a spine, and *σπέρμα*, a seed. Schrank's name for a genus of plants, of the natural order *Compositæ*, tribe *Senecionideæ*, corresponding in part to the genus

*Xanthioides* of De Candolle. [B, 41].—**A. brasiliun** [Schraub], **A. hirsutum**, **A. xanthioides**. These are thought to be only varieties of the same species. They are indigenous to Brazil. The *A. hirsutum* is aromatic, tonic, diuretic, and diaphoretic, and the infusion is given in diarrhoea. [A, 316.]

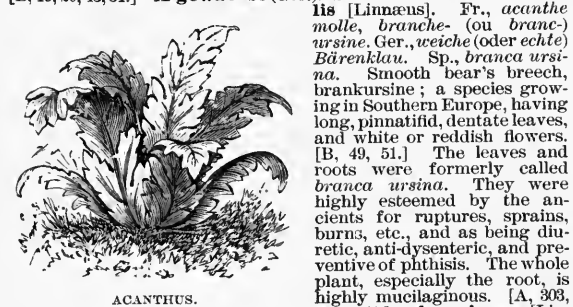

**ACANTHOTHECA** (Lat.), n. n. pl.  $A^2k(a^3k)-a^2n(a^3n)-tho-the-(tha)/ka^3$ . From *ἀκανθα*, a spine, and *θήκη*, a case or sheath. Fr., *acanthothèques*. A type of entozoa made by Davaine in 1860, including the single genus *Pentastoma*. [B.] See LINGUATULA.

**ACANTHOUS**, adj.  $A^2k-a^2n/thu^3s$ . From *ἀκανθα*, a spine. Fr., *acanthéur*. Ger., *dornig*. Spinous, prickly, thorny.

**ACANTHOTHAXIUM** (Lat.), n. n.  $A^2k(a^3k)-a^2n(a^3n)/tho^2x-a^2n(a^3n)/thi^2-u^3m(u^4m)$ . From *ἀκανθα*, a thorn, and *ῥαχίς*, yellow. De Candolle's name for a section of the genus *Xanthium*. [B, 41.]

**ACANTHULUS** (Lat.), n. m.  $A^2k(a^3k)-a^2n(a^3n)/thu^2(thu)-lu^3s-(lu^4s)$ . See ACANTHOBOLUS.

**ACANTHUS** (Lat.), n. m.  $A^2k(a^3k)-a^2n(a^3n)/thu^2s(thu^4s)$ . Gr., *ἀκανθος*. Fr., *acanthé*. Ger., *Bärenklau*. It., Sp., *acanto*. Bear's breech; a genus of acanthaceous plants established by Linnaeus. [B, 19, 20, 43, 51].—**A'gewächse** (Ger.). See ACANTHACEÆ.—**A. mollis** [Linnaeus]. Fr., *acanthé molle*, *branche- (ou) branc-urvine*. Ger., *weiche (oder) echte Bärenklau*. Sp., *branca ursina*. Smooth bear's breech, brankursine; a species growing in Southern Europe, having long, pinnatifid, dentate leaves, and white or reddish flowers. [B, 49, 51.] The leaves and roots were formerly called *branca ursina*. They were highly esteemed by the ancients for ruptures, sprains, burns, etc., and as being diuretic, anti-dysenteric, and preventive of phthisis. The whole plant, especially the root, is highly mucilaginous. [A, 303, 328, 341].—**A. spinosa** [Linnaeus]. Written also *A. spinosus*. Fr., *dornige Bärenklau*. A perennial herb of Southern Europe, about 3 feet high, bearing white flowers, and having leaves smaller than those of *A. mollis*, with spinous edges. Its properties are said to be similar to those of *A. mollis*. [A, 316; B, 19, 43, 49].—**A. verus**, **A. vulgaris**. See *A. mollis*.

ACANTHUS.

naus]. Written also *A. spinosus*. Fr., *dornige Bärenklau*. A perennial herb of Southern Europe, about 3 feet high, bearing white flowers, and having leaves smaller than those of *A. mollis*, with spinous edges. Its properties are said to be similar to those of *A. mollis*. [A, 316; B, 19, 43, 49].—**A. verus**, **A. vulgaris**. See *A. mollis*.

**ACANUS** (Lat.), n. m. See ACANUS.

**ACAPALTI**, n. Written also *acapathi*, *acapatli*, and *acapulti*. A New Granada plant, producing an inferior quality of pepper (cf. *Piper longum*). [B, 44.] Cf. ACAPALTI.

**ACAPATLI**, n. A Mexican name for the *Ica frutescens* ("Mexican cinchona"). [A, 344.]

**ACAPNON** (Lat.), n. n.  $A^2k(a^3k)-a^2p(a^3p)/no^2n$ . From *ἀκαννος* (a priv., and *καπνός*, smoke), without smoke. Honey taken from the hive without the use of smoke. [A, 336.]

**ACAPNOS** (Lat.), n. m.  $A^2k(a^3k)-a^2p(a^3p)/no^2s$ . For deriv., see ACAPNON. That part of a plant which does not smoke much when burned (obs.). [A, 322.]

**ACAPSULAR**, adj.  $A^2k-a^2p/su^2-la^3r$ . Lat., *acapsularis*, *acapsius*, *acapsus*. From a priv., and *capsula*, a capsule. Fr., *acapsulaire*. Without a capsule. [A, 322.]

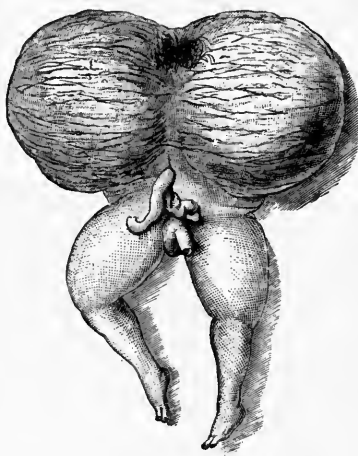

**ACAPULTI**, n. See ACAPALTI.

**ACARDE** (Fr.), adj.  $A^3-ka^3rd$ . Acardiac.

**ACARDIA** (Lat.), n. f.  $A^2k(a^3k)-a^2r-di^2-a^3$ . From a priv., and *καρδία*, the heart. Fr., *acardie*. Ger., *Acardie*, *Herzmangel*. It., Sp., *acardia*. Syn.: *defectus cordis*. Congenital absence of the heart; that form of monstrosity in which, together with a normal foetus, another exists, usually born afterward, having no heart and otherwise malformed in various ways. [A, 22.] See ACEPHALUS, AMORPHUS, and ACORMUS.

**ACARDIAC**, adj.  $A^2k-a^3rd/i^2-a^3k$ . Gr., *ἀκαρδίας*. Lat., *acardius*. Fr., *acarde*. The subject of acardia (q. v.)

**ACARDIACUS** (Lat.), n. m.  $A^2k(a^3k)-a^3r-di^2e/di^2-a^3-ku^2s(ku^4s)$ . Fr., *acardiague*. A monster without a heart. See ACARDIA.—**A. anceps**. Fr., *acardiague douteux*. One in which the body is more developed than in the other varieties; the head, the trunk, the pelvis, the limbs, and even the heart existing, but in a state of atrophy. [A, 15.]

ACARDIA. (AFTER LUSK.)

**ACARDINATE**, adj.  $A^2k-a^3r/di^2n-at$ . From a priv., and *cardo* (gen., *cardinus*), a hinge. Not hinged (said of shells). [A, 316.]

**ACARDIOHÆMIA** (Lat.), n. f.  $A^2k(a^3k)-a^3r-di^2-o-he^3(ha^3e^2)-mi^2-a^3$ . From a priv., *καρδία*, the heart, and *αἷμα*, blood. Fr., *acardiohémie*. Lack of blood in the heart. [K.]

**ACARDIONERVIA** (Lat.), n. f.  $A^2k(a^3k)-a^3r-di^2-o-nu^3r(ne^2r)/vi^2(wi^2)-a^3$ . From a priv., *καρδία*, the heart, and *nervus*, a nerve. Fr., *acardionervie*. Syn.: *cardianeuria*. Piorry's term for a failure of nervous action in the heart. [A, 322; K.]

**ACARDIOTROPHIA** (Lat.), n. f.  $A^2k(a^3k)-a^3r-di^2-o-tro^2fi^2-a^3$ . From a priv., *καρδία*, the heart, and *τροφή*, nutrition. Fr., *acardiopathie*. Syn.: *cardiopathie*. Piorry's term for atrophy of the heart. [A, 322.]

**ACARDIUS** (Lat.), adj.  $A^2k(a^3k)-a^3r/di^2-u^3s(u^4s)$ . Affected with acardia. [A, 322.]

**ACARE** (Fr.), n.  $A^3-ka^3r$ . See ACARUS.

**ACARI** (Lat.), n. m. pl. of *acarus* (q. v.). Fr., *acariens*. The family of *Acarina* (mites). [B.]

**ACARIASIS** (Lat.), n. f.  $A^2k(a^3k)-a^3r-(re)/a^3-si^2s$ . For deriv., see ACARUS. Fr., *acariase*. Ger., *Milbensucht*. It., *acariasi*. Sp., *acariosis*. See SCABIES.

**ACARICABA**, n. See ACARICIBA.

**ACARICIDE**, adj.  $A^2k(a^3k)-i^2-sid$ . Lat., *acaricidus* (from *acarus* [q. v.], and *cadere*, to kill). See ACAROTOXIC.

**ACARICIBA**, **ACARICORA**, n. A Brazilian name for the *Hydrocotyle umbellata* [Linnaeus]; used by the Indians as an aromatic, alexipharmic, and emetic. [A, 316; B, 44, 49.]

**ACARIDA**, **ACARIDÆ** (Lat.), n's n. and f. pl.  $A^2k(a^3k)-a^2-(a^3)/ri^2d-a^2-e(a^3-e^2)$ . The acarides; a family of insects of the order *Acarina* (mites), many of which are parasitic. [B.]

**ACARIDEA** (Lat.), n. n. pl.  $A^2k(a^3k)-a^2(a^3)-ri^2d'e(a^2)-a$ . See ACARINA.

**ACARIDES**, n. pl.  $A^2k/a^2-ri^2dz$ . See ACARIDA.

**ACARIDIÆ** (Lat.), n. f. pl.  $A^2k(a^3k)-a^2(a^3)-ri^2d'i^2-e(a^3-e^2)$ . See ACARINA.

**ACARIEN** (Fr.), adj. and n.  $A^3-ka^3-re-a^3n^2$ . Due to an acarus. In the pl., *acariens*, the *Acarina*.

**ACARINA** (Lat.), n. n. pl.  $A^2k(a^3k)-a^2(a^3)-ri^2(re)/na^3$ . Fr., *acarien*, *acarin*. Syn.: *Monomero-somata*. An order of animals of the class *Arachnida*, distinguished by the fusion of the abdomen and the cephalo-thorax into a single mass. It comprises the families *Linguatulina*, *Macrobiotidae*, and *Acarida*, which include several parasitic genera, such as *Argas*, *Chirithoptes*, *Cheyletus*, *Dermatophagus*, *Dermanyssus*, *Ixodes*, *Pentastoma*, *Sarcoptes*, and *Tyroglyphus*. [B, 27, 28.]

**ACAENA** (Lat.), n. f.  $A^2k(a^3k)-a^3r/na^3$ . Gr., *ἀκαίνα*, a kind of thistle [Theophrastus]. A name given by Willdenow to a section of the genus *Atractylis*, by Vaillant to the genus *Picnemon*, and by Hill to another genus of plants; all of which belong to the natural order *Compositæ* and the tribe *Cynareæ*. [B, 41, 43].—**A. gummi-fera** [Willdenow]. The gummy-rooted thistle. See *CARLINA gummi-fera*.

**ACARO-DERMATITIS** (Lat.), n. f.  $A^2k(a^3k)-a^2(a^3)-ro-du^3r-(de^2r)-ma^3-ti^2-te/ti^2s$ . For deriv., see ACARUS and DERMATITIS. Inflammation of the skin due to the presence of an acarus. [O.]—**A.-d. autumnalis**. A variety produced by the *Leptus autumnalis*. [G.]

**ACARODES** (Lat.), adj.  $A^2k(a^3k)-a^2(a^3)-ro^2dez(de^2s)$ . Acaroid.

**ACARODIUM** (Lat.), n. n.  $A^2k(a^3k)-a^2(a^3)-ro^2di^2-u^3m(u^4m)$ . Acaroid resin.

**ACAROID**, adj.  $A^2k/a^2-roid$ . Lat., *acarodes*. Fr., *acarode*. For deriv., see ACARUS, ACARUS, and *-oid*. 1. Resembling an acarus or tick. 2. Pertaining to or derived from the genus *Acarois*.—**A'harz** (Ger.), **A. resin**. See under RESIN.

**ACAROIDIUM** (Lat.), n. n.  $A^2k(a^3k)-a^2(a^3)-ro^2di^2-i^2-u^3m(u^4m)$ . See ACAROID RESIN.

**ACAROIS** (Lat.), n. f.  $A^2k(a^3k)-a^2(a^3)-ro^2is$ . A genus of plants, said to be identical with the *Xanthorrhæa*. [B, 78].—**A. resinifera**. See *XANTHORRHEA hastilis*.

**ACARON** (Lat.), n. n.  $A^2k(a^3k)-a^2(a^3)-ro^2n$ . Gr., *ἀκαρον* [Aristotle] (from a priv., and *καρπ*, a head). A variety of wild myrtle, perhaps the *Myrtus silvestris*, or its berry. [A, 322, 323; B, 38.]

**ACAROPSIS** (Lat.), n. f.  $A^2k(a^3k)-a^2(a^3)-ro^2p/si^2s$ . From *ἀκαρπ*, an acarus, and *opsis*, aspect. Fr., *acaropse*. A genus of *Arachnida*, established by Moquin-Tandon, including a part of the genus *Cheyletus* (q. v.). [A, 328.]

**ACAROTOXIC**, adj.  $A^2k-a^2-ro-to^2x/i^2k$ . For deriv., see ACARUS and TOXIC. Fr., *acarotossique*. It., *acarotossico*. Syn.: *acariicide*. Capable of killing acari (said of medicinal applications). [Aubé, A, 301.]

**ACARPE** (Lat.), n. f. pl.  $A^2k(a^3k)-a^3rp'e(a^3e^2)$ . From *ἀκαρπος*, without fruit, barren. Syn.: *crypto-impetigines* [Schönlein]. A genus of skin diseases in Fuchs's classification (eruptions not attended with plastic lesions ("fruits"), i. e., without papules, vesicles, or the like. [G, 5.] Really an adj., *maculae* being understood.

**ACARPE** (Fr.), adj.  $A^3-ka^3rp$ . Acarpous.

**ACARPELLOUS**, adj.  $A^2k-a^3r-pe^2l-u^3s$ . From a priv., and *carpellum* (see CARPEL). Lat., *acarpellus*. Fr., *acarpellé*. With out, or deprived of, carpels. [Lindley, A, 322; B, 38, 39.]

**ACARPIA** (Lat.), n. f.  $A^2k(a^3k)-a^3rp/i^2-a^3$ . Gr., *ἀκαρπία*. Unfruitfulness, barrenness. [A, 311.]

**ACARPOUS**, adj.  $A^2k-a^3r-pu^3s$ . Gr. *ἀκαρπος*. Lat. *acarpus*. Fr. *acarbe*. Ger. *unfruchtbar*. 1. (In botany) without, or deprived of, fruit. [B. 38.] 2. (In dermatology) without elevations, non-nodular. [A. 322.] Cf. **ACARPÆ**.

**ACARTUM**, n. An alchemical name for red lead. [Ruland, A. 316.] See **LEAD tetroxide**.

**ACARUM** (Lat.), n. n.  $A^2k(a^3k)/a^3-ru^3m(ru^4m)$ . See **ACARON**.

**ACARUS** (Lat.), n. m.  $A^2k(a^3k)/a^3-ru^3s(ru^4s)$ . From *ἀκαρι* (from *ἀκαρῆς*, minute, indivisible, a mite. Fr., *acare*. Ger., *Milbe*. It., Sp., *acaro*). A genus of *Arachnida* (embracing the mites and ticks) belonging to the order *Acarina*, established by Linnæus and by him made co-extensive with that order. The genus is now distributed among a number of other genera. [B. G.]—**A. americanus**. See **PULEX penetrans**.—**A. autumnalis**. See **LEPTUS autumnalis**.—**A. brachypus** [Olfers]. See **SARCOPTES scabiei**.—**A. casei**. Fr., *acare du fromage*. Ger., *Käsemitte*. Syn.: *A. domesticus*. The cheese-mite.—**A. cellaris**. **A. ciro**. See *A. casei*.—**A. comedonum**. See **DEMEXE folliculorum**.—**A. domesticus**. See *A. casei*.—**A. dysenteriae** [Linnæus]. A species found in the dejecta of dysenteric patients, at one time supposed to be the cause of the disease. [B. 70.]—**A. exulcerans** [Linnæus]. See **SARCOPTES scabiei**.—**A. farinae**. Fr., *acare de la farine*. Ger., *Mehl-milbe*. The flour-mite (*Tyroglyphus farinae*). [B.]—**A. folliculorum** [G. Simon]. See **DEMEXE folliculorum**.—**A. hordel**. The *Chirotopes monunguiculatus*; a larval mite that occurs as a parasite upon barley, and occasionally attacks persons engaged in handling barley (reaping, threshing, etc.). It enters the skin in the region of the follicles, giving rise to urticarial wheals, eczema, or painful dermatitis. [G.]—**A. humanus** [Geoffroy]. **A. humanus subcutaneus**, seu *psoriceus* [Pallas]. See **SARCOPTES scabiei**.—**A. marginatus** [Hermann]. A species the type of which was a mite found running about on the corpus callosum at the necropsy of a man who had died of fracture of the skull in Strassburg. It has been suggested that it was "introduced during the operation by a fly seeking to lay its eggs." [A. 249.]—**A. ricinus**. Ger., *gemeine Zecke*, *Holzbock*. Syn.: *Lodes ricinus* [Linnæus]. The wood-tick. According to Gerber, after inserting its seta in the skin it discharges itself with blood to the size of a ricinus seed. [G.]—**A. sacchari**. **A. saccharinus**. The sugar-mite; found in raw sugar by R. Niccol in 1808; now assigned to the genus *Tyroglyphus*. [B.]—**A. scabiei** [Degeer]. The itch-mite. See **SARCOPTES scabiei**.—**A. siro** [Linnæus]. Fr., *A. siro*. See *A. casei*.—**A. Stockholmii**. See *SCABIES norvegica*.—**A. syron**. See *A. casei*.

**ACATALEPSIA** (Lat.), n. f.  $A^2k(a^3k)-a^2t(a^3t)-a^2(a^3)-le^2p/si^2-a^3$ . Gr., *ἀκατάληψια* (from *a priv.*, and *κατάληψιν*, to comprehend), incomprehensibility. Fr., *acatalepsie*. Ger., *Akatalepsie*. It., *acatalessia*. *Acatalepsy*. 1. Uncertainty as to diagnosis or prognosis. 2. Impairment of the faculty of following a course of reasoning. 3. Epilepsy. 4. Dementia. [A. 306, 316, 322, 325.]

**ACATALEPSY**, n.  $A^2k-a^2t/a^2-e^2p-si^2$ . See **ACATALEPSIA**.

**ACATALEPTIC**, adj.  $A^2k(a^3k)-a^2t/a^2-e^2p/ti^2k$ . Fr., *acataleptique*. Sp., *acataleptico*. Pertaining to, or affected with, *acatalepsia*. [A. 306.]

**ACATALIS** (Lat.), n. f.  $A^2k(a^3k)-a^2t(a^3t)/a^2(a^3)-i^2s$ . From *a priv.*, and *χάρις*, to want. An old name for the juniper berry, from the abundance of its seed. [A. 323, 336; B. 44, 58.]

**ACATAPHASIA** (Lat.), n. f.  $A^2k(a^3k)-a^2t(a^3t)-a^3-fa(fa^3)/zi^2(si^2)-a^3$ . From *a priv.*, and *κατάφασις*, a well-ordered statement. Ger., *Akataphasie*. A syntactical disturbance of the faculty of speech, as distinguished from verbal aphasia (q. v.). [A. 319.]

**ACATAPOSIS**, n.  $A^2k-a^2t-a^2p/o-si^2s$ . From *a priv.*, and *κατάποσις*, deglutition. Fr., *acatapose*. Ger., *Akatapose*. It., *acataposi*. Sp., *acataposis*. See **DYSPHAGIA**.

**ACATAPOTOS** (Lat.), adj.  $A^2k(a^3k)-a^2t(a^3t)-a^2(a^3)/po-to^2s$ . Gr., *ἀκατάποτος*. Incapable of being swallowed. [A. 322.]

**ACATARTUS** (Lat.), adj.  $A^2k(a^3k)-a^2t(a^3t)-a^3r-tu^3s(tu^4s)$ . See **ACATHARTUS**.

**ACATASTASIA, ACATASTASIS** (Lat.), n's f.  $A^2k(a^3k)-a^2t(a^3t)-a^2s(a^3s)-ta(ta^3)/zi^2(si^2)-a^3$ ,  $-a^2st(a^3st)/a^2s(a^3s)-i^2s$ . Gr., *ἀκαταστασία* (from *a priv.*, and *καθίσταται*, to set in order). Fr., *acatastasia*. Ger., *Akatastasia*. It., *acatastasi*. Sp., *acatastasis*. Irregularity, as in the paroxysms of fever. [A. 322.]

**ACATASTATÆ** (Lat.), n. f. pl.  $A^2k(a^3k)-a^2t(a^3t)-a^2st(a^3st)/a^2t(a^3t)-e(a^3e^2)$ . *Acatastatic fevers*. [A. 343.]

**ACATASTATIC**, adj.  $A^2k-a^2t-a^3-sta^2t/i^2k$ . Gr., *ἀκατάστατος*. Lat., *acatastatus*, *acatastaticus*. Fr., *acatastatique*. Ger., *akatastatisch*. It., *acatastatico*. Sp., *acatastatico*. 1. Irregular, indeterminate, lacking a definite type (said of fevers). 2. Constantly changing (said of the appearance of the urine). [A. 306.]

**ACATERA** (Lat.), n. f.  $A^2k(a^3k)-a^2t(a^3t)-e(a^3)/ra^3$ . Fr., *acatéra*. The common juniper. See **JUNIPERUS communis**. [B. 44.]

**ACATERGASTOS, ACATERGASTUS** (Lat.), adj.  $A^2k(a^3k)-a^2t(a^3t)-u^3r(e^2r)-ga^2s(ga^3s)/tu^3s(tu^4s)$ . Gr., *ἀκατέργαστος*. Difficult of elaboration (said of the chyme). [Galen, A. 322.]

**ACATHARSIA** (Lat.), n. f.  $A^2k(a^3k)-a^2(a^3)-tha^3r/si^2-a^3$ . Gr., *ἀκαθάρσια* (from *a priv.*, and *καθαίρειν*, to cleanse). Fr., *acatharsie*. Ger., *Akatharsie*. It., Sp., *acatharsia*. 1. Uncleanliness; an old term for impurity of the humors, or a foul state of a wound. 2. Absence of menstruation. 3. A saburral condition of the intestines. [A. 337.]

**ACATHARTUS** (Lat.), adj.  $A^2k(a^3k)-a^2(a^3)-tha^3r/tu^3s(tu^4s)$ . Gr., *ἀκαθάρτος*. In a state of acatharsia (q. v.); not having menstruated. [A. 311, 322.]

**ACATSIA-VALLI, ACATSJAVALLI**, n. A Malabar name for the *Cassythra filiformis*. [A. 321.]

**ACAUDATE**, adj.  $A^2k-a^4dat$ . Gr., *ἀκαυλος*. Lat., *acaudatus*

(from *a priv.*, and *cauda*, a tail). Fr., *acaudé*. Ger., *ungeschwänzt*. It., *acaudato*. Lit., tailless; lacking the coccyx. [A. 314.]

**ACAULE** (Fr.), adj.  $A^3-kol$ . *Acaulose*, *acaulous*. [B.]

**ACAULESCENCE**, n.  $A^2k-a^4l-e^2s/ens$ . The state of being *acaulous* (q. v.).

**ACAULESCENT, ACAULINE**, adj's.  $A^2k-a^4l-e^2s/e^2nt$ ,  $-a^4l-i^2n$ . From *a priv.*, and *καυλός*, a stem. Lat., *acaulis*. Fr., *acaulé*. Ger., *stengellos*. In botany, apparently devoid of a stem, having a very short stem. [B.]

**ACAULIS** (Lat.), adj.  $A^2k(a^3k)-a^4l(a^3ul)-i^2s$ . *Acaulescent*. [B.]

**ACAULOSE**, adj.  $A^2k-a^4l/os$ . In botany, having no stem. [B.]

**ACAULOSIA** (Lat.), n. f.  $A^2k(a^3k)-a^4l(a^3ul)-o^2si^2-a^3$ . For deriv., see **ACAULESCENT**. 1. The condition of being apparently stemless, or naturally *acaulous*. 2. A diseased state of a plant in which the stem is abnormally deficient. [B. 19.]

**ACAULOUS**, adj.  $A^2k-a^4l/u^3s$ . See **ACAULOSE**.

**ACAWERIA**, n. Sp., *acaveria*, *raiz de serpientes*. A Ceylon plant, or its root (*racine de serpent*), used as a remedy for snake-bites; the *Ophioryctum serpentinum* [Linnæus]. [B. 44.]

**ACAYA**, n. Said to be an American (? Indian) name for the *Cleome sinapistrum*. ["Jour. de pharm.," xlii, 23; A. 344.]

**ACAYIBA**, n. According to Pison, a Brazilian name for the *Anacardium occidentale*. [A. 344.]

**ACAZDIR, ACAZIR**, n. Written also *acadzir*, *kazdir*, *kacir*, *fazdir*, and *sazdir*. Ar., *al-qazdir*, tin. An alchemical name for tin. [B. 44, 50, 52.]

**ACCABLEMENT** (Fr.), n.  $A^3-ka^3bl-ma^3n^2$ . Lat., *virium oppressio*. Ger., *Ueberhäufung*, *Niedergeschlagenheit*. It., *oppressione*, *aggravamento*. Sp., *abatimiento*. Prostration, particularly a sense of oppression. [J. Bouillaud, A. 332.]

**ACCATEM, ACCATUM**, n's. Alchemical names for brass. [A. 343.]

**ACCÉLÉRATEUR** (Fr.), n.  $A^3k-sa-la-ra^3-tu^6r$ . See **ACCELERATOR**.—**A. de l'urine**. See **BULBO-CAVERNOSUS**.

**ACCELERATOR**, n.  $A^2k-se^2l-e^2-ra-to^2r$ . Lat., *accelerator* (from *accelerare*, to hasten). Fr., *accélérateur*. Ger., *Beschleuniger*, *Treibmuskel* (2d def.). It., *acceleratore*. Sp., *acelerador*. 1. A term applied to certain nerves stimulation of which increases the rapidity of the heart's action. [K.] 2. A muscle which is supposed to hasten the flow of a physiological discharge.—**A. des Harns**, **A. des Samens** (Ger.). See **BULBO-CAVERNOSUS**.—**A. nerves of the heart**. See **UNDER NERVE**.—**A. partus** (Lat.). An embolic, an abortifacient.—**A. seminis**, **A. urine** (Lat.). See **BULBO-CAVERNOSUS**.

**ACCENSIO** (Lat.), n. f.  $A^2k(a^3k)-se^2n(ke^2n)/shi^2(si^2)-o$ . From *accendere*, to kindle. 1. Ignition. 2. The lighting up of an inflammation. 3. A sensation of heat or burning in a part. [A. 333.]

**ACCENTUATED**, adj.  $A^2k-se^2nt/u^2-a-te^2d$ . Fr., *accentué*. Ger., *accentuirt*. Exaggerated, abnormally distinct (said of the sounds of the heart).

**ACCENTUATION**, n.  $A^2k-se^2nt-u^2-a-shu^3n$ . Fr., *accentuation*. Ger., *Accentuation*, *Betonung*. It., *accentuazione*. The state of being accentuated (q. v.).

**ACCENTUÉ** (Fr.), **ACCENTUIRT** (Ger.), adj's.  $A^3k-sa^3n-tu^6-a$ ,  $a^3k-tse^2nt-u-er^2t$ . *Accentuated*.

**ACCEPTABULUM** (Lat.), n. n.  $A^2k(a^3k)-se^2p(ke^2p)-ta^2b(ta^3b)/u^2(u)-lu^3m(lu^4m)$ . See **ACETABULUM**.

**ACCESS**, n.  $A^2k/se^2s$ . Lat., *accessus* (from *accedere*, to approach). Fr., *accès*. Ger., *Anfall*, *Zutritt*. It., *accesso*. Sp., *accesión*. 1. An attack or paroxysm of disease. 2. Copulation.

**ACCESSION**, n.  $A^2k-se^2sh-u^3n$ . Lat., *accessio* (from *accedere*, to approach). Fr., *accession*. Ger., *Hinzutreten*. It., *accessione*. Sp., *accesión*. 1. The onset of a disease. 2. Its recurrence or a sudden increase in its severity.

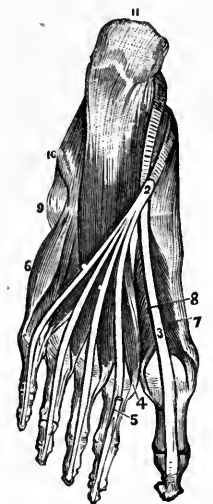

**ACCESSIVE**, adj.  $A^2k-se^2s/i^2v$ . Occurring in or characterized by accessions.

**ACCESSOIRE** (Fr.), adj. and n.  $A^3k-se^2-swa^3r$ . See **ACCESSORY**.—**A's de Cowper**. Cowper's glands. See **GLANDULE ante-prostatæ**.—**A. de la parotide**. See **ACCESSORY PAROTID**.—**A. de l'obturateur interne**. See **ACCESSORIUS obturator internus**.—**A's de l'œil**. The appendages of the eye (brow, lids, lachrymal apparatus, etc.). [A. 306.]—**A. de Willis**. See **SPINAL accessory NERVE**.—**A. de Wrisberg**, **A. du brachial cutané interne**. See **Small internal cutaneous NERVE**.—**A. du grand (ou long) fléchisseur commun des orteils**. See **ACCESSORIUS flexoris longi digitorum pedis**.—**A. du nerf crural**. A name given to the fourth and fifth pairs of lumbar nerves. [A. 320.]—**A. du pancréas**. See **ACCESSORY PANCREAS**.—**A. du pied d'hippocampe**. See **Pes accessorius**.—**A. du sacro-lombaire**. See **ACCESSORIUS sacro-lumbalis**.—**A. du saphène externe**. See **External saphenous NERVE**.—**A. grand du pied d'hippocampe**. See **Pes hippocampi**.

**ACCESSORIUM** (Lat.), n. n.  $A^2k(a^3k)-se^2s(ke^2s)-so^2ri^2-u^3m(u^4m)$ . For deriv., see **ACCESSORIUS**. An accessory, an appendage.

**ACCESSORIUS** (Lat.), adj. and n.  $A^2k(a^3k)-se^2s(ke^2s)-so^2ri^2-u^3m(u^4m)$ . From *accedere*, to be added to. *Accessory*.—**Accessory orbicularis oris**. Those muscles which co-operate with the orbicularis oris, either causing its coronal and basilar parts to meet and press, if necessary, against one another in the shutting of the mouth (levatores menti and depressores labii superioris alarumque nasi); or acting as its moderators so as to draw it from the points within its circumference, open the mouth, enlarge its diameter, and draw the integuments toward their origins (nasales labii superioris, levatores labii superioris et alarum nasi, levatores labii superioris, levatores angulorum oris, zygomatici majores, zygomatici

minores, buccinatores, depressores angulorum oris, and depressores labii inferioris). [A, 246.]—**A. ad illo-costalem**, **A. ad sacro-lumbalem**. See **A. sacro-lumbalis**.—**A. cutanei brachii interni**. See **Small internal cutaneous NERVE**.—**A. flexoris longi digitorum pedis**. Fr., *accessoire du long (ou grand) fléchisseur (commun) des orteils*. Ger., *viereckiger Sohlenursprung des langen Zehenbeugers*. It., *accessorio del lungo flessore comune delle dita del piede*. Sp., *accessorio del flexor largo comun de los dedos del pié*. Syn.: *quadratus plantæ pedis*, *caro quadrata Sylvi*, *massa carnea Jacobi Sylvi*, *plantaris verus*, *caput plantare flexoris digitorum pedis longi*, *flexor longus digitorum pedis profundus perforans accessorius*. A flattened, fleshy muscle of the sole of the foot. It arises from the lower surface of the calcaneum, and is inserted into the lower and outer aspect of the tendon of the flexor communis digitorum, the oblique action of which it brings into a direction parallel with the axis of the foot. [A, 314, 320, 325.]—**A. kern** (Ger.). The nucleus of the spinal accessory nerve.—**A. krampf** (Ger.). Spasm, tonic or clonic, of those muscles of the neck (the sterno-cleido-mastoid and the cucullaris) that are supplied by the spinal accessory nerve. [A, 319.]—**A. lähmung** (Ger.). Paralysis of the same muscles. [A, 319.]—**A. obturatoris interni**. Fr., *accessoire de l'obturbateur interne*. Syn.: *ischio-trochanterianus*. A term applied by Petit to the gemelli muscles of the thigh. [A, 320.]—**A. pedis**. See **A. flexoris longi digitorum pedis**.—**A. pedis hippocampi**. See **Pes accessorius**.—**A. sacro-lumbalis**. Fr., *accessoire du sacro-lombaire*. It., *accessorio del sacro-lombare*. An upward prolongation of the sacro-lumbalis muscle; arising from the upper margins of the lower six ribs, internally to the tendons of the sacro-lumbalis, and being inserted by a series of tendons into the angles of the upper ribs and into the transverse process of the seventh cervical vertebra. [A, 5.]—**A. tricipitis**. Syn.: *dorso-epitrochlearis*. A muscle common in the quadrumana, sometimes present in man as a slip connecting the triceps extensor cubiti and the latissimus dorsi. [C.]—**A. Willisii**. See **Spinal accessory NERVE**.

THE PLANTAR MUSCLES, MIDDLE LAYER. (AFTER SAPPEY.)

1, *accessorius flexoris longi digitorum pedis*; 2, tendon of the flexor longus digitorum communis; 3, tendon of the flexor longus pollicis; 4, the four lumbricales; 5, a tendon of the flexor brevis communis, perforated by the corresponding tendon of the flexor longus; 6, flexor brevis minimi digiti; 7, inner fasciculus of the flexor brevis pollicis; 8, outer fasciculus of the same; 9, tuberosity of the fifth metatarsal bone; 10, sheath of the peroneus longus; 11, os calcis.

quadruman, sometimes present in man as a slip connecting the triceps extensor cubiti and the latissimus dorsi. [C.]—**A. Willisii**. See **Spinal accessory NERVE**.

**ACCESSORY**, adj.  $A^2k\text{-}se^2s\text{-}so\text{-}ri^2$ . Lat., *accessorius* (q. v. for deriv.). Fr., *accessoire*. Ger., *accessorisch*. It., *accessorio*. Sp., *accessorio*. Contributory in a subordinate manner (said chiefly of nerves and muscles).

**ACCESSUS** (Lat.), n. m.  $A^2k(a^3k)\text{-}se^2s(k^2s)/su^2s(su^2s)$ . For deriv., see **ACCESSORIUS**. See **ACCESS** and **ADITS**, also remarks under **ABSCISS**.

**ACCIB**, n. Ar., *as-sekb*, lead. An alchemical name for lead. [B, 44, 50, 52.]

**ACCIDENS** (Lat.), adj.  $A^2k(a^3k)/si^2d(ki^2d)\text{-}e^2nz(e^2ns)$ . Pres. part. of *accidere*, to fall down upon. Adventitious. As a n., an accident.

**ACCIDENT**, n.  $A^2k/si^2d\text{-}e^2nt$ . Gr., *συμβασις*. Lat., *accidens* (q. v. for deriv.). Fr., *accident*. Ger., *Zufall*. It., Sp., *accidente*. An epiphenomenon; a morbid manifestation which is not a part of the usual course of a disease.

**ACCIDENTAL**, adj.  $A^2k\text{-}si^2d\text{-}e^2nt/a^2l$ . Gr., *συμβατικός*. Lat., *accidentalis*. Fr., *accidentel*. Ger., *accidentell*, *zufällig*. It., *accidentale*. Sp., *accidental*. 1. Adventitious. 2. Intercurrent; supervening without any necessary connection with the preceding condition (said of morbid phenomena).—**A. anus**. See **Artificial ANUS**.—**A. colors**. See **Complementary colors**.

**ACCIDENTALISM**, n.  $A^2k\text{-}si^2d\text{-}e^2nt/a^2l\text{-}i^2zm$ . Fr., *accidentalisme*. A doctrine which ignores etiology in the study and management of disease, and deals only with symptoms. [A, 301.]

**ACCIDENTALIST**, n.  $A^2k\text{-}si^2d\text{-}e^2nt/a^2l\text{-}i^2st$ . Fr., *accidentaliste*. One who treats symptoms without regard to their causes. [A, 321.]

**ACCIL**, n. See **ACCIB**.

**ACCIUCA**, n. A plant of unknown botanical characters, sometimes used instead of Paraguay tea. [B, 44.]

**ACCIPENSER** (Lat.), n. m.  $A^2k(a^3k)\text{-}si^2(ki^2)\text{-}pe^2n\text{-}su^2r(se^2r)$ . See **ACCIPITER**.

**ACCIPITER** (Lat.), n. m.  $A^2k(a^3k)\text{-}si^2p(ki^2p)/i^2t\text{-}u^2r(e^2r)$ . Gen., *accipitris*. Probably from *ἀκνίπτερος*, swift-winged. [A, 312.] Gr., *ἰέραξ*. Fr., *accipitre*, *épervier*. Ger., *Habichtsbinde*, *Sperber*. Sp., *accipitre*. Lit., a hawk; an ancient bandage used for the nose; so called from its resemblance to a falcon's hood or to a hawk's claw or from the tightness of its grasp. [A, 323, 336, 343.]—**A. quinqueceps**. Gr., *ἰέραξ πεντακέφαλος*. Ger., *fünfköpfige Habichtsbinde*. A variety made with a five-headed bandage. [A, 322.]—**A. triiceps**. Gr., *ἰέραξ τρικέφαλος*. Ger., *dreiköpfige Habichtsbinde*. One made with a three-headed bandage. [A, 322.]

**ACCIPITRINA** (Lat.), n. f.  $A^2k(a^3k)\text{-}si^2p(ki^2p)\text{-}i^2t\text{-}ri(re)/na^2$ . From *accipiter*, a hawk (because birds of prey feed on its juices). Fr., *accipitrine*, *épervière*. Ger., *Habichtskraut*. 1. An ancient name for hawkweed (*Hieracium murorum*). [Pliny, A, 344.] 2. Flixweed (*Sisymbrium Sophia*). [A, 336.] 3. A division of the Linnean genus *Sisymbrium*, also a section of the genus *Hieracium*. [B, 41.]

**ACCISA**, n. The leaves of the *Illex paraguayensis*. See **Paraguay TEA**.

**ACCLIMATE** (Fr.), n.  $A^3k\text{-}kle\text{-}ma^3\text{-}ta^3\text{-}sho^2n^2$ . See **ACCLIMATIZATION**.

**ACCLIMATE**, v. tr.  $A^2k\text{-}kli^2mat$ . From Lat., *ad*, to, and *clima*, climate. See **ACCLIMATIZE**.

**ACCLIMATEMENT** (Fr.), n.  $A^3k\text{-}kle\text{-}ma^3\text{-}ta^3n^2$ . See **ACCLIMATIZATION**.

**ACCLIMATER** (Fr.), v. tr.  $A^3k\text{-}kle\text{-}ma^3\text{-}ta$ . See **ACCLIMATIZE**.

**ACCLIMATION**, n.  $A^2k\text{-}kli\text{-}ma^3shu^2n$ . See **ACCLIMATIZATION**.

**ACCLIMATISATION**, n. See **ACCLIMATIZATION**.

**ACCLIMATESE**, v. tr. See **ACCLIMATIZE**.

**ACCLIMATISIREN** (Ger.), n.  $A^3k\text{-}kle\text{-}ma^3\text{-}te\text{-}ze^2re^2n$ . To acclimatize.

**ACCLIMATIZATION**, n.  $A^2k\text{-}kli\text{-}ma^3t\text{-}i^2\text{-}za^3shu^2n$ . Lat., *acclimatisatio*, *climati assuetudo*. Fr., *acclimatement*, *acclimation*. Ger., *Acclimatisation*, *Acclimatisierung*. It., *acclimazione*, *acclimamento*. Sp., *acclimatación*. Syn.: *acclimation*. The process by which an individual organism or a race becomes, or is rendered, so inured to a strange climate that it no longer suffers harm from that climate; or the state of being so inured. By some writers this sense is restricted to *acclimation*, and *acclimatization* is used to signify the process of causing animals or plants to become acclimatized. Cf. **INDIGÉNISATION**.

**ACCLIMATEZ**, v. tr.  $A^2k\text{-}kli^2ma^3t\text{-}iz$ . Fr., *acclimater*. Ger., *acclimatisiren*. It., *acclimare*. To accustom to a foreign climate.

**ACCLINÉ** (Fr.), adj.  $A^3k\text{-}kle\text{-}na$ . From Lat., *acclinis* (from *ad* and *clinare*), leaning against. Applied to a part or organ so as to cover in one side of it (said of the upper teeth when they overlap the lower ones at the side and not in front or behind). [B, 38.]

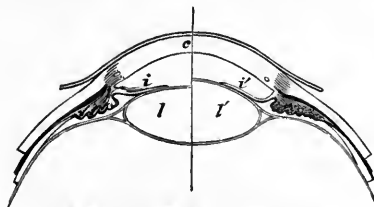

**ACCLIVIS** (Lat.), adj.  $A^2k(a^3k)\text{-}kli(kle)/vi^2s(wi^2s)$ . Ascending (said of the obliquus abdominis internus muscle).

**ACCOCAY**, n. A bark employed by the natives of Senegal as a febrifuge. [A, 337.]

**ACCOLÉ** (Fr.), adj.  $A^3k\text{-}ko\text{-}la$ . In botany, united, adherent. [B, 38.]

**ACCOMBANT** (Fr.), adj.  $A^3k\text{-}ko^2m\text{-}ba^3n^2$ . Accomment. [B.]

**ACCOMMODATION**, n.  $A^2k\text{-}ko^2m\text{-}mo\text{-}da^3shu^2n$ . Lat., *accommodatio* (from *accommodare*, to adapt, to adjust). Fr., *accommodation*. Ger., *Accommodation*. It., *accommodazione*. Sp., *acomodación*. 1. The process by which the refractive condition of the eye is changed in accordance with the distance at which an object is to be viewed, so as to secure invariable focusing of the image on the retina. [F.] 2. The processes by which a partly disabled organ is favored in the performance of its functions. See **COMPENSATION**. 3. The adjustment of the shape and attitude of the fetus to the parturient canal during labor.—**A'sbezirk**, **A'sbreite**, **A'sgrösse** (Ger.). See **Amplitude of a**.—**A'simpuls** (Ger.). That condition in which the eye feels the necessity of a, in order to see more distinctly. [F.]—**A'skrampf** (Ger.). See **SPASM of a**.—**A'slinie** (Ger.). See **Line of a**.—**A'smuskel** (Ger.). See **Ciliary MUSCLE**.—**A'sphosphogen** (Ger.). See **PHOSPHENES of a**.—**A'sspannung** (Ger.). See **Tension of a**.—**A'svermögen** (Ger.). The accommodative power of the eye.—**Amplitude of a**. Fr., *amplitude (ou étendue) d'a*. Ger., *A'sgrösse*, *A'sbreite*, *A'sbezirk*. It., *ampiezza d'accommodazione*. Sp., *amplitud (o extensión) de acomodación*. The amount of accommodative effort of which the eye is capable, from its far point up to its near point. [F.]—**A'sthenopia of a**. See **Accommodative ASTHENOPIA**.—**Binocular a**. Fr., *a. binoculaire*. Ger., *binoculäre a*. It., *accommodazione binocula*. Sp., *acomodación binocular*. The power of the two eyes, when used together, of focusing the images of objects on the retinae of both for all distances. [F.]—**Breadth of a**. See **Range of a**.

THE MECHANISM OF ACCOMMODATION.

c, cornea; i, iris; l, lens during repose; c', i', l', the same parts during an effort of accommodation.

**Étendue d'a** (Fr.). See **Amplitude of a**.—**Étendue latente d'a** (Fr.). See **Latent HYPERMETROPIA**.—**Kreis der a** (Ger.). See **Region of a**.—**Latent range of a**. Fr., *étendue latente d'a*. Ger., *latente A'sbreite*. It., *campo (o estensione) latente d'accommodazione*. Sp., *campo latente de acomodación*. See **Latent HYPERMETROPIA**.—**Line of a**. Fr., *ligne d'a*. Ger., *A'slinie*. It., *linea d'accommodazione*. Sp., *línea de acomodación*. Czermak's term for that portion of the visual line (q. v., under **LINE**) in which lie objects which are seen without any perceptible indistinctness, and

with a given state or degree of a. [F.]—**Mechanism of a.** Fr., *mécanisme d'a.* Ger., *A'smechismus.* It., *meccanismo d'accommodazione.* Sp., *mecanismo de acomodación.* A term used to signify not only the manner in which a. takes place, but also the structures by which it is accomplished (the ciliary muscle, the zonule of Zinn, and the crystalline lens).—**Negative a.** Fr., *negative.* Ger., *negativ.* It., *accommodazione negativa.* Sp., *acomodación negativa.* It is supposed by some that, when the emmetropic eye is in a state of rest, it is not quite adjusted for its farthest point of distinct vision, but can become so by a slight alteration in its a., which is called negative, produced, according to Henke, by the action of the radial fibers of the ciliary muscle. [F.]—**Negative range of a.** See *Range of a.*—**Paralysis of a.** See under PARALYSIS.—**Phosphenes of a.** See under PHOSPHENE.—**Positive a., Positive range of a., Positive relative range of a.** See *Range of a.*—**Range of a.** Fr., *amplitude (ou champ, ou étendue) d'a.* Ger., *A'sbreite.* It., *ampiezza (o campo) d'accommodazione.* Sp., *campo de acomodación.* The distance between the farthest point and the nearest point of distinct vision. It is expressed by the formula  $\frac{1}{P} - \frac{1}{R}$ , in which P represents the near point and R the far point; and may be taken as the difference in refractive power of lenses of which the foci are respectively P and R. The *binocular range of a.* is the a. from the farthest point ( $r_f$ ) to the nearest point ( $p_n$ ), for both eyes at once. The *relative range of a.* is the range over which we have control at a given convergence of the visual lines. It represents the degree in which a. is independent of convergence. The *positive relative range of a.* represents the amount of a. of which a person is capable nearer or closer than the point of convergence of the visual lines of the eyes. The *negative relative range of a.* is that amount of convergence which is required in order that a person may clearly see an object lying beyond the point of convergence of the visual lines. [F.]—**Region of a.** Fr., *région d'a.* Ger., *A'skreis.* It., *regione d'accommodazione.* Sp., *región de acomodación.* According to Donders, this is only the expression of the distance between r and p, and is therefore equal to R—P, while the range of a. (g. v.) is a dioptric value, proportional to the focal distance of the lens, which expresses the difference of a. for P and R. The region of a. is quite altered by spectacles, and there is no proportion whatever between it and the range of a. [F.]—**Relative range of a.** See *Range of a.*—**Spasm of a.** See under SPASM.—**Tension of a.** Ger., *A'spannung.* Syn.: *amount (or degree) of a.* The act of tension or contraction of the ciliary muscle; also that condition or degree of a. which goes along with a given degree of convergence of the ocular axes. [F.]

**ACCOMMODATIVE**, adj. A<sup>2</sup>k-ko<sup>2</sup>m'-mo-da-ti<sup>2</sup>v. Fr., *accommodatif.* Ger., *accommodativ.* Pertaining to the function of accommodation (q. v.). [F.]

**ACCOMPANIMENT OF THE CATARACT.** A<sup>2</sup>k-ku<sup>2</sup>m'-pa<sup>2</sup>n-i<sup>2</sup>-me<sup>2</sup>nt. Lat., *adjunctum cataractae.* Fr., *accompagnement de la cataracte.* Ger., *Begleitung des Staars.* An obsolete term for a whitish, viscid substance occupying the place of the crystalline lens after the extraction of a cataract; constituting what was formerly called a secondary cataract (the latter term being now applied to an opacity of the capsule coming on after extraction and making a secondary operation necessary). [F.]

**ACCOUCHEE** (Fr.), n. (fem. of adj., *accouchée*). A<sup>2</sup>k-ku-sha. Gr., *τοκάς, τοκίσσα.* Lat., *puerpera.* Ger., *Wöchnerin, Kindbeterin.* Syn.: *femme en couche.* A lying-in woman; one who has recently been delivered, confined, or "brought to bed."

**ACCOUCHEMENT** (Fr.), n. Formerly written *accouchemen*. A<sup>2</sup>k-kush-ma<sup>2</sup>n<sup>2</sup>. From *accoucher*, or *s'accoucher*, to go to bed. Syn.: *travail, enfantement* (the mere process of expulsion). 1. Confinement, labor, parturition (see LABOR); in the pl., *accouchements*, obstetrics. 2. The expulsion of a solid substance (such as a tumor) from the uterine cavity.—**A. artificiel.** Delivery by operative interference.—**A. contre nature.** Preternatural labor. Improperly applied also to labor terminated artificially. [A., 44, 96.]—**A. difficile.** Difficult labor.—**A. facile.** Easy, natural labor.—**A. forcé.** Ger., *gewaltsame Entbindung.* Labor brought on artificially and terminated forcibly. It includes the manual or instrumental dilatation of the cervix uteri and the rapid extraction of the fetus with the forceps or by version.—**A. gémellaire.** Twin labor.—**A. heurteux.** A natural, easy delivery, without complications.—**A. irrégulier.** See *Irregular labor.*—**A. laborieux.** See *DYSTOCIA.*—**A. légitime.** Labor at term. [A., 96.]—**A. mixte.** Labor which becomes easy after a complication has been remedied. [Gardien, A., 301.]—**A. multiple.** Labor with more than one fetus.—**A. naturel.** **A. physiologique.** Natural labor.—**A. précoce.** Premature labor, especially before the 30th day. [A., 321.]—**A. prématuré.** Premature labor between the 18th and the 27th days. [A., 321.]—**A. prématuré artificiel.** See *Induced labor.*—**A. prématuré forcé.** Labor brought on prematurely and terminated artificially.—**A. provoqué.** Induced labor. It differs from a *forcé* in that, although brought on artificially, it is not necessarily hastened in its progress by interference.—**A. retardé.** Labor delayed beyond the usual term of gestation. [A., 321.]—**A. simple.** Labor with only one fetus. [A., 321.]—**A. spontané.** Natural labor.—**A. tardif.** See *A. retardé.*—**A. tempestif.** Labor at term. [A., 96.]—**A. vicieux.** Labor requiring artificial aid. [Nägele, A., 301.]

**ACCOUCHEE** (Fr.), v. tr. and intr. A<sup>2</sup>k-ku-sha. 1. [Tr.] to give medical attendance to a woman in labor; to "confine" her, to "put her to bed." 2. [Intr.] to "be brought to bed"; to give birth to a child; to be in labor. 3. [Ref. [s'a.]] to be confined without assistance. [A., 306.]

**ACCOUCHEUR** (Fr.), n. A<sup>2</sup>k-ku-shu<sup>2</sup>r. Lat., *adjutor partus, obstetricans.* A male practitioner of obstetrics; a title first assumed by Jules Clément in the latter part of the seventeenth century. [A., 24.]

**ACCOUCHEUSE** (Fr.), n. A<sup>2</sup>k-kush-u<sup>2</sup>sz. Gr., *μαία, μαέστρια.* Lat., *obstetrix.* Ger., *Hebamme.* It., *levatrice.* Sp., *partera.* Syn.: *sage-femme.* A midwife, a female practitioner of obstetrics; a title assumed by the French midwives (before known as *sages-femmes*) when male obstetricians had become popular under the name of *accoucheurs*.

**ACCOUCHIRANSTALT** (Ger.), n. A<sup>2</sup>k-ku-she<sup>2</sup>r-a<sup>2</sup>n<sup>2</sup>'sta<sup>2</sup>lt. A lying-in institution.

**ACCOUCHIREN** (Ger.), v. tr. and intr. A<sup>2</sup>k-ku-she<sup>2</sup>r-e<sup>2</sup>n. 1. (Tr.) to give medical attendance to a woman in labor. 2. (Intr.) to practice midwifery.

**ACCOUCHIRHAUS** (Ger.), n. A<sup>2</sup>k-kuch<sup>2</sup>-er<sup>2</sup>'ha<sup>2</sup>-us. A lying-in institution.

**ACCOUCHIRINSTRUMENT** (Ger.), n. A<sup>2</sup>k-kuch<sup>2</sup>-er<sup>2</sup>'i<sup>2</sup>ns-tru-me<sup>2</sup>nt<sup>2</sup>. An obstetrical instrument.

**ACCOUCHIRSTUHL** (Ger.), n. A<sup>2</sup>k-kuch<sup>2</sup>-er<sup>2</sup>'stul. An obstetrical chair.

**ACCOULEMENT** (Fr.), n. A<sup>2</sup>k-kupl-ma<sup>2</sup>n<sup>2</sup>. Gr., *συνδυσμός.* Lat., *copulatio.* Ger., *Paarung.* It., *accoppiamento, copitura, monta.* Sp., *copula.* Syn.: *monte.* Copulation (said of the lower animals).

**ACCOUPLER** (Fr.), v. tr. A<sup>2</sup>k-ku-pla. 1. To cause to copulate. 2. [Ref. [s'a.]] to copulate (said of the lower animals).

**ACCOULIREN** (Ger.), v. intr. A<sup>2</sup>k-ku-ple<sup>2</sup>'re<sup>2</sup>n. See *ACCOUPLER* (2d def.).

**ACCOUS** (Fr.), n. A<sup>2</sup>k-ku. A village in the Lower Pyrenees, near which there is a mineral spring, called *Suberlaché*, the waters of which are warm, sulphurous, and ferruginous, and are used for rheumatism. [T. Bordeu, A., 344.]

**ACCOUTUMANCE** (Fr.), n. A<sup>2</sup>k-ku-tu<sup>2</sup>-ma<sup>2</sup>ns. That condition in which the system has become so accustomed to the action of a drug that the latter no longer exerts its usual effects. [A., 321.]

**ACCOUVER** (Fr.), v. intr. A<sup>2</sup>k-ku-va. To incubate.

**ACCREDITMENT**, adj. A<sup>2</sup>k-kre-me<sup>2</sup>n-ti<sup>2</sup>sh'a<sup>2</sup>l. Fr., *accreditement.* Pertaining to accreditation (q. v.).

**ACCREDITMENT**, n. A<sup>2</sup>k-kre-me<sup>2</sup>n-ti<sup>2</sup>sh'u<sup>2</sup>n. Gr., *ἐπαύξη, ἐπαύξιος, ἐπίδοσις.* Lat., *accrementum* (from *accrescere*, to grow larger). Fr., *accrementition.* Ger., *Zuwachs.* It., *accrementizione.* 1. Increase by growth; according to Robin, either by the division of pre-existing elements or by the formation of new ones. [A., 321.] 2. One of the modes of tissue formation. See *INTERPOSITION.* 3. Burdach's term for a form of reproduction in which a separated portion of an organism becomes developed into a perfect individual.

**ACCREDITMENT** (Lat.), n. n. A<sup>2</sup>k(a<sup>2</sup>k)-kre(kra)-me<sup>2</sup>nt'u<sup>2</sup>m-(u<sup>2</sup>m). See *ACCREDITMENT.*

**ACCRESCENT**, adj. A<sup>2</sup>k-kre<sup>2</sup>s'e<sup>2</sup>nt. Lat., *acrescens* (from *accrescere*, to grow larger). Fr., Ger., *acrescent.* Increasing in size after flowering (said of any part of a flower except the ovary). [B., 7, 19, 34.]

**ACCRESCEZ** (Ger.), n. A<sup>2</sup>k-kre<sup>2</sup>s-tse<sup>2</sup>ntz'. Accretion.

**ACCRETE**, adj. A<sup>2</sup>k-kret'. In botany, grown together. [B., 43.]

**ACCRETION**, n. A<sup>2</sup>k-kre<sup>2</sup>'shu<sup>2</sup>n. Gr., *αἰήσις* (1st def.), *πρόσφυσις* (2d def.). Lat., *accretio* (from *accrescere*, to grow, or to be joined to). Fr., *accretion.* Ger., *Accrescenz.* It., *accrecimento.* Sp., *acrecimiento.* 1. Growth, increment (to be distinguished from development). 2. An adhesion (growing together) of parts.

**ACCROCHANT** (Fr.), adj. A<sup>2</sup>k-kro-sha<sup>2</sup>n<sup>2</sup>. In botany, covered with small, crooked hairs. [B., 1.]

**ACCROISSEMENT** (Fr.), n. A<sup>2</sup>k-krwa<sup>2</sup>s-ma<sup>2</sup>n<sup>2</sup>. Growth. See *ACCRETION.*

**ACCUATION**, n. A<sup>2</sup>k-ku<sup>2</sup>-ba<sup>2</sup>'shu<sup>2</sup>n. Gr., *ἀνάκλισις* (1st def.). Lat., *accubatio* (= *accubatio*, from *accubare*, to lie near or by, to recline). 1. A reclining posture; the taking to one's bed. See *DECUBITUS.* 2. The lying of one person in bed with another. [A., 325.]

**ACCUBITUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-ku<sup>2</sup>(ku)'bi<sup>2</sup>t-u<sup>2</sup>s(u<sup>2</sup>s). 1. Accubation (q. v.). 2. A couch. [A., 312.]

**ACCUMBENT**, adj. A<sup>2</sup>k-ku<sup>2</sup>m-be<sup>2</sup>nt. Lat., *accumbens* (from *accumbere*, to lie against). Fr., *accumbant.* Ger., *seitenwärtig* (said of the cotyledons). Lying against another organ or part; a term applied in botany, in describing the parts of a dicotyledonous seed, to either the radicle or the cotyledons when the latter include the former between their opposed surfaces. [B., 19, 34, 35.]

**ACCUMULATION**, n. A<sup>2</sup>k-ku<sup>2</sup>-mu<sup>2</sup>la<sup>2</sup>'shu<sup>2</sup>n. Lat., *accumulatio* (from *accumulare*, to heap up). Fr., *accumulation.* Ger., *Anhäufung.* It., *accumulazione.* 1. A collecting together in a mass. 2. An old term for a mixture of different symptoms.—**Fæcal a.** Ger., *Kothanhäufung.* Syn.: *coprostasis.* An abnormal collection of feces in the large intestine. Cf. *Fæcal IMPACTION.*

**ACCUMULATOR**, n. A<sup>2</sup>k-ku<sup>2</sup>-mu<sup>2</sup>la<sup>2</sup>-to<sup>2</sup>r. Fr., *accumulateur.* Ger., *Accumulator.* It., *accumulatore.* Sp., *acumulador.* An apparatus for storing electricity, such as a Leyden jar. [B.] See also *Secondary BATTERY.*

**ACCUSATIO** (Lat.), n. f. A<sup>2</sup>k(a<sup>2</sup>k)-ku<sup>2</sup>(ku)-za(sa<sup>2</sup>)shi<sup>2</sup>(ti<sup>2</sup>)-o. From *accusare*, to complain of. Lit., a complaint; an old synonym of *indicatio*. [A., 325.] See *INDICATION.*

**ACCUSER** (Fr.), v. intr. A<sup>2</sup>k-ku<sup>2</sup>-za. To complain of (symptoms).

**ACCYSETUM** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-si<sup>2</sup>(ku<sup>2</sup>)-se(sa)'tu<sup>2</sup>m(tu<sup>2</sup>m). A word of unknown etymology and doubtful meaning; perhaps, as suggested by Kraus, anciently applied to a variety of *Alyssum* (madwort). [A., 322.]

**ACE** (Lat.), n. f. A(a<sup>2</sup>)se(ka). Gr., *ἀκή.* See *ACTIS.*

**ACEBELLOMÈTRE** (Fr.), n. A<sup>2</sup>sb-de2l-lo-me2tr. See *Artificial LEECH*.

**ACEBUCCO**, n. A vegetable drug from Batavia, used by the Chinese of Canton. [A, 337.]

**ACECHLORPLATINE** (Fr.), n. A<sup>3</sup>-sa-clor-pla<sup>3</sup>-ten. A yellow crystalline body obtained by evaporating a solution of platinum dichloride in acetone to the consistency of syrup. [A, 306.]

**ACECONITIC ACID**, n. A<sup>2</sup>s-e<sup>2</sup>k-o<sup>2</sup>n-i<sup>2</sup>t<sup>2</sup>i<sup>2</sup>k. For deriv., see **ACETIC** and **ACONITIC**. Fr., *acide acéconitique*. Ger., *Aceconitsäure*. A tribasic crystalline acid, C<sub>6</sub>H<sub>6</sub>O<sub>6</sub> = C<sub>6</sub>H<sub>3</sub>(O<sub>3</sub>)<sub>3</sub> = (C<sub>3</sub>H<sub>3</sub>O<sub>3</sub>)<sub>3</sub> (CO.OH)<sub>3</sub>, obtained in combination with citracetic acid, by heating ethyl bromacetate with sodium; probably isomeric with aconitic acid. [B, 2, 4.]

**ACEDIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-(e)a/di<sup>2</sup>-a<sup>3</sup>. Gr., ἀκρία. Fr., *acédie*. Ger., *Sorglosigkeit*. Apathy, despondency; an old term for a sort of melancholia occurring especially among young monks. [A, 311, 314, 322.]

**ACEDIAMINE**, n. A<sup>2</sup>s/e<sup>2</sup>-di-a<sup>3</sup>m/i<sup>2</sup>n. For deriv., see **ACETIC**, **DI-**, and **AMINE**. Fr., *acédiamine*. Ger., *Acetiamin*. Syn.: *acetyldiamine*. An artificial alkaloid, NH: C<sub>2</sub>H<sub>3</sub>.NH<sub>2</sub>, produced by heating acetamide in hydrochloric acid gas; occurring only in combination with an acid or an acid radicle. [B, 2, 4.]

**ACEITE** (Sp.), n. A<sup>3</sup>-tha'e-ta. Oil.—**A. abetinote**, **A. abietino**. Fir-balsam. [A, 334.]—**A. commun**. Olive-oil. [A, 344.]—**A. craso**. A fixed oil. [A, 254.]—**A. de almendras**. Almond-oil. [A, 254.]—**A. de cal**. Chlorinated lime. [A, 254.]—**A. de comer**. Refined olive-oil. [A, 334.]—**A. del Brasil**. Copaiba balsam. [A, 254.]—**A. de linaza**. Linseed-oil.—**A. de olivas**. Olive-oil.—**A. de piedra**. Petroleum. [A, 254.]—**A. de pies de buey**. Neat's-foot-oil. [A, 254.]—**A. de ricino**. Castor-oil.—**A. de sal**. A liquid, said to be used in South America in the treatment of goitre. A salt, obtained in the province of Antioquia by evaporation, is suspended in a bag, and the liquid which drips from it constitutes *a. de sal* (lit., oil of salt). Boussingault found it to contain a considerable quantity of iodine, also free hydrochloric acid. ["Gaz. de santé," Dec. 25, 1825 (A, 344).]—**A. de Vénus**. Nitrate of copper in a state of deliquescence. [A, 254.]—**A. de vitriolo**. Sulphuric acid.—**A. esencial**. An essential oil. [A, 339.]—**A. esencial de trementina**. Oil of turpentine. [A, 254.]—**A. fijo**. A fixed oil.—**A. glacial de vitriolo**. Nordhausen sulphuric acid. [A, 254.]—**A. medicinal**. Almond-oil. [A, 5.]—**A. mineral**. Petroleum. [A, 5.]—**A. narcótico**. See *Baume tranquille*.—**A. virgen**. Virgin oil (that which is first expressed from the olive without the aid of heat). [A, 5.]

**ACENAPHTHENE**, n. A<sup>2</sup>s-e<sup>2</sup>-na<sup>2</sup>f(na<sup>2</sup>p)/then. For deriv., see **ACETIC** and **NAPHTHALENE**. Fr., *acénaphtène*. Ger., *Acenaphthen*. Syn.: *acetylnaphthalene*. A substance forming colorless prismatic crystals, melting at 95° and boiling at about 268° C.; prepared by the decomposition of ethylnaphthalene and in other ways, and also occurring in that fraction of coal-tar oil which distills between 260° and 280° C. It has the composition C<sub>12</sub>H<sub>10</sub>, or probably C<sub>10</sub>H<sub>6</sub>—CH<sub>2</sub> = ethylenenaphthalene. [B, 4.]—**A. bromides**. Addition compounds of bromine and a. The hexabromide, C<sub>6</sub>H<sub>3</sub>Br<sub>6</sub>, is known. [B, 2.]—**A. hydride**. Formed by the action of hydriodic acid on a. Its probable formula is C<sub>12</sub>H<sub>12</sub>. [B, 2.]—**A. picrate**. Formula, C<sub>12</sub>H<sub>10</sub>.C<sub>6</sub>H<sub>3</sub>(NO<sub>2</sub>)<sub>3</sub>O. [B, 2.]

**ACENE**, **ACENIUM** (Lat.), n's n. A<sup>2</sup>k(a<sup>3</sup>k)-(e)a/ne(na), -ni<sup>2</sup>-u<sup>3</sup>m(u<sup>3</sup>m). See **ACHENIUM**.

**ACEGNOISIA** (Lat.), n. f. A(a<sup>3</sup>)-se(ke<sup>2</sup>)-o<sup>2</sup>g-no<sup>2</sup>si<sup>2</sup>-a<sup>3</sup>. From *akos* (gen., *akēos*), a remedy, and *gnōsis*, knowledge. A knowledge of remedies.

**ACEOLOGY**, n. A-se-o<sup>2</sup>l'o-i<sup>2</sup>. Lat., *aceologia* (from *akos*, a remedy, and *λόγος* [see -logy\*]). Ger., *Akologie*. Therapeutics in general, and especially as connected with operative measures and mechanical appliances. [A, 322.]

**ACEPHAL**, **ACEPHALAN**, n's. A<sup>2</sup>s/e<sup>2</sup>f-a<sup>3</sup>l, a<sup>2</sup>s-e<sup>2</sup>f/a<sup>3</sup>l-a<sup>3</sup>n. Lat., *acephalus* (from a priv., and κεφαλή, the head). Fr., *acéphalien*. Ger., *Ohnekopf*. It., Sp., *acefalo*. An animal with no marked distinction between the head and the rest of the body.

**ACEPHALHÆMIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>s)-e<sup>2</sup>f-a<sup>3</sup>l-he<sup>2</sup>(ha<sup>3</sup>e<sup>2</sup>)-mi<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and αἷμα, blood. Fr., *acéphalhémie*. A term applied by Piorry (who wrote the French form *acéphalémie*) to encephalic anemia. [A, 250.]

**ACEPHALIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a(a<sup>3</sup>)/li<sup>2</sup>-a<sup>3</sup>. Fr., *acéphalie*. Ger., *Accephalie*, *Kopfmangel*. It., Sp., *acefalia*. That form of monstrosity in which the head is wanting or is anencephalic. See **ANENCEPHALIA**.—**A. spuria**. See **HEMIAEPHALIA**.

**ACEPHALIEN** (Fr.), n. A<sup>3</sup>-sa-fa<sup>3</sup>l-i<sup>2</sup>-a<sup>3</sup>n<sup>2</sup>. See **ACEPHALAN** and **ACEPHALUS**.

**ACEPHALUS**, n. A<sup>2</sup>s-e<sup>2</sup>f/a<sup>3</sup>l-i<sup>2</sup>zm. See **ACEPHALIA**.

**ACEPHALOBRACHIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-brach(a<sup>3</sup>)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>. From a priv., κεφαλή, the head, and βραχίων, the arm. Fr., *acéphalobrachie*. Ger., *Accephalobrachie*. It., *acefalobrachia*. Sp., *acefalobraquia*. That form of monstrosity in which the head and arms are wanting.

**ACEPHALOBRACHIUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-brach(a<sup>3</sup>)/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *acéphalobrasche*. Sp., *acefalobraquio*. A monster without head or arms.

**ACEPHALOCARDIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-ka<sup>3</sup>r/di<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and καρδιά, the heart. Fr., *acéphalocardie*. Ger., *Accephalocardie*. It., *acefalocardia*. That form of monstrosity in which the head and the heart are wanting.

**ACEPHALOCARDIUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-ka<sup>3</sup>r/di<sup>2</sup>-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *acéphalocarde*. A monster without head or heart.

**ACEPHALOCHEIRIA**, **ACEPHALOCHEIRUS** (Lat.), n's f. and m. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-ki<sup>2</sup>(ke<sup>2</sup>i<sup>2</sup>)-ri<sup>2</sup>-a<sup>3</sup>, -ru<sup>2</sup>s(ru<sup>2</sup>s). See **ACEPHALOCHEIRIA** and **ACEPHALOCHEIRUS**.

**ACEPHALOCHIRIA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-ki<sup>2</sup>(ch<sup>2</sup>e<sup>2</sup>)-ri<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and χείρ, the hand. Fr., *acéphalochirie*. Ger., *Acephalochirie*. It., *acefalochiria*. Sp., *acefalochiria*. That form of monstrosity in which the head and the hands are wanting.

**ACEPHALOCHEIRUS** (Lat.), n. m. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-ki<sup>2</sup>(ch<sup>2</sup>e<sup>2</sup>)-ru<sup>2</sup>s(ru<sup>2</sup>s). Fr., *acéphalochire*. Sp., *acefalochiro*. A monster without head or hands.

**ACEPHALOCYST**, n. A<sup>2</sup>s-e<sup>2</sup>f/a<sup>3</sup>l-si<sup>2</sup>st. Lat., *acephalocystis* (from a priv., κεφαλή, the head, and κύστις, a bag). Fr., *acéphalocyste*. Ger., *Acephalocyste*. It., *acefalocisto*. Sp., *acefalocista*. A name given by Laennec to a class of hydatids consisting only of a membranous bag filled with fluid. [A, 328.] They were formerly regarded as constituted by an animal belonging to a genus of entozoa. [B.] For the varieties, see **ACEPHALOCYSTIS**.

**ACEPHALOCYSTIS** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>f-a<sup>3</sup>l-si<sup>2</sup>s(ki<sup>2</sup>s)/ti<sup>2</sup>s. An acephalocyst.—**A. endogena**. A name given by J. Hunter and Owen to a sterile echinococcus cyst which has increased by endogenous proliferation. [B.] See *Echinococcus endogenus*.—**A. eremita**. Fr., *acéphalocyste solitaire*. Syn.: *A. sterilis*. A solitary acephalocyst, i. e., one in which there is a single cyst enveloped by a semi-transparent, non-adherent areolar membrane. [Cruveilhier (B, 85).]—**A. exogena**. Syn.: *Echinococcus hominis*. [B, 84.] A term applied by Kuhl to an acephalocyst which has increased by exogenous proliferation. [B.] See *Echinococcus exogenus*.—**A. granulosa**. A name applied by Laennec and others to a variety of acephalocyst distinguished by minute granulations, about as large as a millet-seed, scattered through its substance. [B, 84.]—**A. macaci** [Cobbold]. See *Echinococcus hominis*.—**A. multifida**. One which sends out branch-like prolongations between the anatomical structures of a part, as between the convolutions of the brain. [B.]—**A. ovis tragelaphi** [Cobbold]. See *Echinococcus hominis*.—**A. ovoidea**. Fr., *acéphalocyste ovoïde*. A name applied by Laennec and others to a variety that is studded with whitish spheroidal bodies. [B, 84.]—**A. plana**. Syn.: *oculigera carpi*. A name given by Laennec in 1812 to small flattened concretions found in the sheaths of tendons and in muscles near their insertion. [B, 84, 85.]—**A. prolifera**. Fr., *acéphalocyste multiple*. Syn.: *A. socialis*. A multiple acephalocyst, i. e., one in which a number of cysts are contained within a common membrane. [Cruveilhier (B, 85).]—**A. racemosa**, **A. ramosa**. Clobinet's terms for any hydatigenous formation of the chorion resembling bunches of grapes or currants. [B, 84.] See *Vesicular mole*.—**A. socialis**. See *A. prolifera*.—**A. sterilis**. See *A. eremita*.—**A. surculigera**. Fr., *acéphalocyste surculigère*. A name applied by Laennec and others to a variety distinguished by the presence of minute, bud-like, flattened processes, of irregular shape, on the outer or inner surface of the investing membrane. [B, 84.]

**ACEPHALOGASTER** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-ga<sup>2</sup>s-(ga<sup>2</sup>s)-tu<sup>3</sup>r(te<sup>3</sup>r). Fr., *acéphalogastre*. Sp., *acefalogastro*. A monster of the kind defined under **ACEPHALOGASTRIA**.

**ACEPHALOGASTRIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-ga<sup>2</sup>s-(ga<sup>2</sup>s)/tri<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and γαστήρ, the belly. Fr., *acéphalogastrie*. Ger., *Acephalogastrie*. It., Sp., *acefalogastria*. That form of monstrosity in which the head and the upper part of the abdomen are wanting.

**ACEPHALOPHOUS**, adj. A<sup>2</sup>-se<sup>2</sup>f-a<sup>3</sup>l-o<sup>2</sup>f'o-ru<sup>2</sup>s. Fr., *acéphalophore*. Characterized by the absence of a distinctly differentiated head (said of certain mollusks). [B, 28.]

**ACEPHALOPODIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-po<sup>2</sup>-di<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and πῶδιον (dim. of πούς, the foot). Fr., *acéphalopodie*. Ger., *Acephalopodie*. It., Sp., *acefalopodia*. That form of monstrosity in which the head and the feet are wanting or are present in only a rudimentary state.

**ACEPHALOPODUS** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-p'o-du<sup>3</sup>s(du<sup>3</sup>s). Fr., *acéphalopode*. Sp., *acefalópodo*. A monster of the kind defined under **ACEPHALOPODIA**.

**ACEPHALORRHACHIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-r-rach(a<sup>3</sup>)/ra<sup>3</sup>/ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>. From a priv., κεφαλή, the head, and ράχis, the backbone. Fr., *acéphalorrhachie*. Ger., *Acephalorrhachie*. It., *acefalorrhachia*. Sp., *acefalorrahquia*. That form of monstrosity in which the head and the vertebral column are wanting.

**ACEPHALOS** (Lat.), n. m. See **ACEPHALUS**.

**ACEPHALOSTOMA** (Lat.), n. n. See **ACEPHALOSTOMUS**.

**ACEPHALOSTOMIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-sto<sup>2</sup>-mi<sup>2</sup>-a<sup>3</sup>. From a priv., κεφαλή, the head, and στόμα, the mouth. Fr., *acéphalostomie*. Ger., *Acephalostomie*. It., *acefalostomia*. Sp., *acefalostomia*. That variety of acephalia in which there is a mouth-like opening at the upper extremity of the body. [A, 306.]

**ACEPHALOSTOMUS** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-sto<sup>2</sup>-mu<sup>2</sup>s(mu<sup>2</sup>s). Fr., *acéphalostome*. Ger., *Acephalostom*. Sp., *acefalostomo*. A monster of the kind defined under **ACEPHALOSTOMIA**.

**ACEPHALOTHORACIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-tho-ra<sup>3</sup>/si<sup>2</sup>(ki<sup>2</sup>)-a<sup>3</sup>. From a priv., κεφαλή, the head, and θώραξ, the chest. Fr., *acéphalothoracie*, *acéphalothorie*. Ger., *Acephalothoracie*. It., Sp., *acefalothoracia*. That form of monstrosity in which the head and the thorax are wanting.

**ACEPHALOTHORAX**, **ACEPHALOTHORUS** (Lat.), n's m. A<sup>2</sup>(a<sup>3</sup>)-se<sup>2</sup>f(ke<sup>2</sup>f)-a<sup>3</sup>-lo-tho-ra<sup>3</sup>x(ra<sup>3</sup>x), -lo-th'o-ru<sup>2</sup>s(ru<sup>2</sup>s). Fr., *acéphalothore*. Sp., *acefalotórax*, *acefalótoro*. A monster of the kind defined under **ACEPHALOTHORACIA**.

**ACEPHALOUS**, adj. A<sup>2</sup>-se<sup>2</sup>f-a<sup>3</sup>l-u<sup>3</sup>s. Gr., ἀκέφαλος. Lat., *acephalus*. Fr., *acéphale*. Ger., *acephalisch*. It., *acefalo*. Sp., *acefalo*. 1. Destitute of a head (said of monsters). 2. Acephalopho-

rous (q. v.). 3. (In botany) not terminated by a style (said of the ovary). [B.]

**ACEPHALUM** (Lat.), n. n.  $A^2(a^3)\text{-se}^2f(ke^2f)/a^3\text{-lu}^3m(lu^4m)$ . Fr., *acéphale*. In botany, an ovary that is not terminated by a style. [B.]

**ACEPHALUS** (Lat.), n. m.  $A^2(a^3)\text{-se}^2f(ke^2f)/a^3\text{-lu}^3s(lu^4s)$ . Gr., ἀκεφαλος. Fr., *acéphale*, *monstre acéphalien*. Ger., *Ohnekopf*. It., *acefalo*. Sp., *acéfalo*. An acardiac monster (see *ACARDIACUS*) without a head, or with only a rudimentary head.—**A. dilbrachius**. An a. with both upper limbs present but more or less undeveloped.—**A. dipus**. One with both lower limbs present but more or less undeveloped.—**A. monobrachius**. One with only one upper limb.—**A. monopus**. One with only one lower limb.—**A. paracephalus**. See *PARACEPHALUS* and *HEMIACEPHALUS*.—**A. sympus**. One in which the trunk ends in a long conical extremity, having a foot or two feet at the end; due to fusion of the two lower limbs. [A, 326].

**ACEPHOSGENIC ACID**, n.  $A^2s\text{-e}^2\text{-fo}^2s\text{-je}^2n\text{'i}^2k$ . For deriv., see *ACETONE*, *PHOSPHORUS*, and *-genic*. Ger., *Acephosgensäure*. An acid said by Zeise to be developed, along with acephossic and phosphatic acids, when a solution of phosphorus in acetone is allowed to stand for some weeks. [B, 2.]

**ACEPHOSSIC ACID**, n.  $A^2s\text{-e}^2\text{-fo}^2s\text{'si}^2k$ . For deriv., see *ACETONE* and *PHOSPHORUS*. Ger., *Acephossäure*. An acid said by Zeise to be developed by the action of phosphorus on acetone. [B, 2.] Cf. *ACEPHOSGENIC ACID*.

**ACER** (Lat.), n. n.  $A^2(a^3)/su^3r(ke^2r)$ . Gen., *aceris*. From the adj. *acer*, sharp, and hence vigorous. Gr., ὀξύδαντος. Fr., *érable*. Ger., *Ahorn*. It., *acero*. Sp., *arce*. The genus-name of the maples, a genus of trees of the natural order *Aceraceae*.—**A. pennsylvanicum** [Linnaeus]. Fr., *érable jaspé*. Syn.: *A. striatum* [Lamark]. The striped maple, or whistle-wood; a low, shrubby tree, distinguished by its smooth, longitudinally striped bark, indigenous to the Atlantic coast of North America and cultivated in Europe. [B, 34].—**A. rubrum** [Linnaeus]. Fr., *érable rouge* (ou de Virginie). The red maple. It furnishes sugar, and its inner bark, a mild astringent, is used by the American Indians in diseases of the eye. [A, 316].—**A. saccharinum** [Linnaeus]. Fr., *érable à sucre*. Ger., *Zuckerahorn*. Sp., *arce del azúcar*. The sugar maple, or rock maple; a tree growing throughout the United States, but especially in New England, the sap of which furnishes maple sugar. [B, 34].—**A. striatum**. See *A. pennsylvanicum*.—**A. trifidum**. In summer the silk-weavers of Wuhu drink an infusion of the leaves, thinking that it prevents their perspiration from soiling the silk. [A, 261.]

**ACER** (Lat.), adj.  $A^2(a^3)/su^3r(ke^2r)$ . Acrid.

**ACERA** (Lat.), n. n. pl.  $A^2(a^3)(se^2(ke^2r)\text{-}ra^3)$ . Fr., *acères*. 1. A class (cohort) of plants including the natural orders *Aceraceae*, *Malpighiaceae*, *Erythroyaceae*, *Ixonanthaceae*, *Sapindaceae*, *Hippocastanaceae*, *Meliaceae*, and *Rhizophoraceae*. [B, 41.] 2. A group of apterous insects characterized by the absence of antennæ. [A, 251.]

**ACERACEÆ** (Lat.), n. f. pl.  $A^2(a^3)\text{-su}^3r(ke^2r)\text{-}a^3(a^3)/se^2(ke^2r)\text{-}e^3(a^3\text{-}e^3)$ . Fr., *acéracées*. Ger., *Aceraceen*. Sp., *acerráceas*. Syn.: *Acerinæ*. 1. The maples, an order of trees and shrubs. 2. In Bentley and Hooker's classification, a suborder of the *Sapindaceæ*. [B, 34, 75.]

**ACERACEOUS**, adj.  $A^2\text{-se}^2\text{-ra}^3\text{'shu}^3s$ . Having the characters of the *Aceraceæ* (q. v.).

**ACERAS** (Lat.), n. f.  $A^2(a^3)/su^3r(ke^2r)\text{-}a^3s(a^3s)$ . From a priv., and *κέρας*, a horn, from there being no spur on the labellum (1st def.). Fr., *acéras*. 1. A genus of plants of the natural order *Orchidaceæ*, established by R. Brown. 2. A salt of aceric acid.—**A. anthropophora**. Fr., *homme pendu*. The green man, or man orchis; a plant having globular bulbs which furnish part of the salep of commerce. The leaves are said to be sudorific. [A, 316, 328; B, 19.]

**ACERATES**, n.  $A^2s\text{'u}^3r\text{-at}$ . Lat., *aceras*, *sal acericum*. Ger., *ahornsäures Salz*. A salt of aceric acid.

**ACERATE**, adj.  $A^2s\text{'u}^3r\text{-at}$ . From Lat., *acer*, sharp-pointed. See *ACICULAR*.

**ACERATES** (Lat.), n. f.  $A^2(a^3)\text{-su}^3r(ke^2r)\text{-}a^3(a^3)/tez(te^2s)$ . From a priv., and *κέρας*, a horn, because the corona is destitute of horn-like processes. A genus of plants, of the natural order *Asclepiadaceæ*, indigenous to North America.—**A. decumbens**. A New Mexican species, said to be used as an antidote to snake-bites. [B, 5.]—**A. longifolia** [Elliot]. A species found throughout the Mississippi Valley; a plant from 2 to 3 feet high, with numerous green flowers; a diaphoretic. [A, 316; B, 34.]

**ACERATIA** (Lat.), n. f.  $A^2s\text{'u}^3r(ke^2r)\text{-}a^3(a^3)/shi^2(ti^2)\text{-}a^3$ . Fr., *acératie*. Ger., *Hornmantel*. A monstrosity characterized by lack of horns in a ruminant. [A, 301.]

**ACERATOS** (Lat.), adj.  $A^2(a^3)\text{-se}(ka^3)/ra^3\text{'to}^2s$ . See *ACERATUS*.

**ACERATOSIA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2(ke^2r)\text{-}ra^3\text{'to}^2si^2\text{-}a^3$ . See *ACERATIA*.

**ACERATOSIS** (Lat.), n. f.  $A^2(a^3)\text{-se}^2(ke^2r)\text{-}ra^3\text{'to}^2si^2s$ . Syn.: *defectus cornuum*. A lack of horns.

**ACERATOTHERION** (Lat.), n. n.  $A^2(a^3)\text{-se}^2(ke^2r)\text{-}ra^3\text{'to}^2\text{-}the(th)/ri^2\text{'o}^2n$ . From *ἀκέρως*, without horns, and *θηρίον*, a beast. Fr., *acératotherion*. An animal which is a monster from lacking horns. [A, 301.]

**ACERATUS** (Lat.), adj.  $A^2(a^3)\text{-se}(ka^3)/ra^3\text{'tu}^3s(tu^4s)$  (1st def.),  $a^2(a^3)\text{-se}^2(ke^2r)\text{-}ra^3\text{'tu}^3s(tu^4s)$  (2d def.). Gr., ἀκέρωτος. From a priv., and *κέρας*, to mix (1st def.), *ἀκέρως* (2d def.). 1. Uncorrupted (said of the humors). [Hippocrates, A, 325.] 2. Destitute of horns.

**ACERB**, adj.  $A^2su^3rb'$ . Gr., στροβύλος. Lat., *acerbus*. Fr., *acérbe*. Ger., *scharf*. It., Sp., *acerbo*. Possessed of acerbity (q. v.).

**ACERBITY**, n.  $A^2\text{-su}^3rb\text{'i}^2\text{'i}^2$ . Gr., στροβύλος. Lat., *acerbitas*. Fr., *acérbité*. Ger., *Herbe*. It., *acerbità*. Sp., *acerbidad*. Harshness, sourness, or astringency of taste, like that of certain unripe fruits. [A, 344.]

**ACERBOUS**, adj.  $A^2\text{-su}^3rb\text{'u}^3s$ . Lat., *acerbus*. See *ACERB*.

**ACERCUS** (Lat.), n. m.  $A^2(a^3)\text{-su}^3r(ke^2r)/ku^3s(ku^4s)$ . Gr., ἀκέρκος, without a tail. A monstrosity destitute of a tail, or of the coccygeal vertebrae.

**ACERDESE**, n.  $A^2\text{-su}^3r\text{'des'}$ . From ἀκέρδης, unprofitable. Fr., *acérde*. Sp., *acérdesa*, *acérdesia*. Beudant's name for manginite (native hydrated sesquioxide of manganese), from its comparative lack of value in the arts. [A, 328, 347.]

**ACERELLATOUS**, adj.  $A^2\text{-se}^2\text{-re}^2\text{'la}^2\text{-tu}^3s$ . Lat., *acerellatus*. Fr., *acérillé*. In botany, terminating in a somewhat blunted point. [B.]

**ACERIC ACID**, n.  $A^2\text{-se}^2\text{'ri}^2k$ . From Lat., *acer*, the maple tree. Lat., *acidum acericum*. Fr., *acide acérique*. Ger., *Ahornsäure*. An acid obtained from the sap of the maple tree, said to be identical with malic acid. [B, 7.]

**ACERIDE**, n.  $A^2s\text{'e}^2r\text{'i}^2d$ . From a priv., and *cera*, wax. Fr., *acéride*. Ger., *Acerid*. Sp., *acérice*. An old term for a plaster or ointment made without wax. [A, 322.]

**ACERINEÆ** (Lat.), n. f. pl.  $A^2(a^3)\text{-su}^3r(ke^2r)\text{-}i^2n\text{'e}^2\text{-}a^3(e^3\text{-}e^2)$ . Fr., *acérinées*. Ger., *Acerinæen*. In Eichler's classification, a family (= order) of trees identical with the natural order *Aceraceæ*; also the *Aceraceæ* regarded as a suborder of *Sapindaceæ*. [B, 35, 73.]

**ACERITOUS**, adj.  $A^2\text{-se}^2\text{'ri}^2\text{-}tu^3s$ . See *ACEROTUS*.

**ACERODE**, n.  $A^2s\text{'e}^2r\text{'o}^2d$ . See *ACERIDE*.

**ACEROSÆ** (Lat.), n. f. pl.  $A^2(a^3)\text{-su}^3r(ke^2r)\text{'o}^2\text{-}ze^3(a^3\text{-}e^2)$ . Ger., *Nadelhölzer*. The order of needle-bearing trees (*Coniferæ*). [B, 49.]

**ACEROSE**, adj.  $A^2s\text{'u}^3r\text{'os}$ . Gr., πῦρνος. Lat., *acerosus* (from *acer*, sharp). Fr., *acéréus*, *acéré*. Ger., *nadelartig* (2d def.). 1. Coarse, chaffy, branny, furfuraceous. 2. In botany, needle-shaped. [A, 325; B, 39.]

**ACEROTUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2(ke^2r)\text{'ro}^2\text{'tu}^3s(tu^4s)$ . From a priv., and *cera*, wax. Destitute of wax. [A, 322.]

**ACEROUS**, adj.  $A^2s\text{'u}^3r\text{'u}^3s$ . See *ACEROSE*.

**ACERRA** (It.), n.  $A^3\text{-che}^2r\text{'hra}^3$ . A town near Naples, with a spring containing calcium sulphide and carbonic acid. [A, 321.]

**ACERVULUS** (Lat.), n. m.  $A^2(a^3)\text{-su}^3r(ke^2r)/vu^2(wu)\text{-}lu^3s(lu^4s)$ . Dim. of *acervus*, a heap. Fr., *acervule*. Ger., *Hirnsand*. It., *acervolo*. Syn.: *a. cerebri* (seu *glandulæ pinealis*). Brain-sand; a collection of sabulous material found in the pineal gland, and sometimes also in the chorioid plexuses. It consists of carbonate of calcium and phosphates of calcium, magnesium, and ammonium, with a small amount of animal matter. [I, 6.]

**ACESCENCE**, **ACESCENCY**, n's.  $A^2s\text{'e}^2s\text{'e}^2ns\text{'e}^2ns\text{'i}^2$ . Lat., *acescentia* (from *acescere*, to turn sour). Fr., *acescence*. Ger., *Acescenz*, *Säuerungsfähigkeit*, *Neigung zur Säure*. It., *acescenza*. Sp., *acescencia*. The process of becoming, or the tendency to become, acid. Cf. *ACIDITY*.

**ACESCENT**, adj.  $A^2s\text{'e}^2s\text{'e}^2nt$ . Lat., *ocescent*. Fr., *acescent*. Ger., *acescent*, *säuerlich*. Sp., *acescente*. Possessed of acescence (q. v.). Cf. *ACESCENTIA*, pl.

**ACESCENTIA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(ke^2s)\text{'se}^2n(ke^2n)/shi^2\text{'i}^2\text{-}a^3$ . Acescence.

**ACESCENTIA** (Lat.), n. n. pl. of *acescens*. Gr., ὀξύνοτα, ὀξύνοτα (from ὀξύειν, to make, be, or become sour). Ger., *sauerwerdende Stoffe*. Articles of food and drink that have a special tendency to give rise to excessive acidity of the contents of the stomach.

**ACESIA** (Lat.), n. f.  $A^2(a^3)\text{-se}(ka^3)/zi^2(si^2)\text{-}a^3$ . Gr., ἄκεια. Ger., *Akesie*. 1. Recovery, cure. 2. The name of a salve or plaster. [A, 311.] 3. (Obs.) a drug prepared from the urine of children. [A, 322.]

**ACESINOSUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2(ke^2r)\text{'si}^2n\text{'o}^2\text{-}su^3s(su^4s)$ . Gr., ἀκείνωσος. Curative. [A, 322.]

**ACESIPONOS** (Lat.), adj.  $A^2(a^3)\text{-se}^2(ke^2r)\text{'si}^2p\text{'o}^2\text{-}no^2s$ . Gr., ἀκείπωνος (from *ἄκεις*, a remedy, and *πόνος*, pain). Anodyne. [A, 322.]

**ACESIS** (Lat.), n. f.  $A^2(a^3)\text{-se}^2(ke^2r)\text{'si}^2s$ . Gr., ἄκεις. 1. A cure. [A, 322.] 2. A sort of borax. [A, 312.] 3. Water-sage. [Pliny, A, 315.]

**ACESIUS** (Lat.), adj.  $A^2(a^3)\text{-se}(ka^3)/zi^2(si^2)\text{-}u^3s(u^4s)$ . Gr., ἀκείσιος. Curative, preservative. [A, 322.]

**ACESMA** (Lat.), n. n.  $A^2(a^3)\text{-se}^2s(ke^2s)/ma^4$ . Gen., *aces'matos* (-tis). Gr., ἀκείσμα. A remedy. [A, 322.]

**ACESMIUS**, **ACESMUS** (Lat.), adj's.  $A^2(a^3)\text{-se}^2z(ke^2s)/mi^2\text{'u}^3s(u^4s)$ . Gr., ἀκείμιος, ἀκείμιος. Curable. [A, 322.]

**ACESODYNE**, **ACESODYNOUS**, adj's.  $A^2\text{-se}^2s\text{'o}^2\text{-dim, -o}^2d\text{'i}^2\text{-}i^2n\text{'u}^3s$ . Gr., ἀκείσδυνος. Lat., *acesodynus*. Fr., *acéodyne*. Anodyne. [A, 311.]

**ACESPHORIA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(ke^2s)\text{'fo}^2ri^2\text{'a}^3$ . Gr., ἀκείφωρ (from *ἄκεις*, a remedy, and *φορέω*, to bear). Fr., *acesphorie*. A cure. [A, 322.]

**ACESPHOROUS**, adj.  $A^2\text{-se}^2s\text{'fo}^2ru^3s$ . Gr., ἀκείφωρος. Lat., *acesphorus*. Healing. [A, 322.]

**ACESTA**, **ACESTER** (Lat.), n's m.  $A^2(a^3)\text{-se}^2s(ke^2s)/ta^3\text{'-}tu^3r\text{'(te}^2r)$ . Gr., ἀκείστη. See *ACESTOR*.

**ACESTERIUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2s(ke^2s)\text{'te}(ta^3)/ri^2\text{'u}^3s(u^4s)$ . See *ACESTORIUS*.

**ACESTES** (Lat.), n. m.  $A^2(a^3)\text{-se}^2s(ke^2s)/tez(te^2s)$ . Gr., ἀκείστης. See *ACESTOR*.

**ACESTICA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{ti}^2\text{-ka}^3$ . A contraction of *ars a. Gr.*, (*ἄκιστη*) *ἀκιστική*. See **ACESTORIA**.

**ACESTICUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{ti}^2\text{-ku}^3s(\text{ku}^4s)$ . See **ACESTORIUS**.

**ACESTOR** (Lat.), n. m.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{to}^2r(\text{tor})$ . Gr., *ἄκιστωρ*. A physician. [A, 322.]

**ACESTORIA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{to}^2r\text{-i}^2\text{-a}^3$ . Gr., *ἄκιστορία*. The healing art. [A, 322.]

**ACESTORIS** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{to}^2r\text{-i}^2s$ . Gr., *ἄκιστορίς* (fem. of *ἄκιστωρ*). A female physician. [A, 311.]

**ACESTORIUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{to}^2r\text{-i}^2\text{-u}^3s(\text{u}^4s)$ . 1. Curative. 2. Curable. [A, 322.]

**ACESTOS** (Lat.), adj.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{to}^2s$ . Gr., *ἄκιστός*. Curable. [Hippocrates, A, 311.]

**ACESTRA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{tra}^3$ . Gr., *ἄκιστρα*. A needle. [A, 325.]

**ACESTRIA**, **ACESTRIS** (Lat.), n's f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{tri}^2\text{-a}^3$ ,  $\text{-tri}^2s$ . Gr., *ἄκιστρια* (fem. of *ἄκιστήρ*). A midwife. [A, 311, 322.]

**ACESTRON**, **ACESTRUM** (Lat.), n's n.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{-tron}^2n$ ,  $\text{-tru}^2m(\text{tru}^4m)$ . Gr., *ἄκιστρον*. A remedy. [A, 311.]

**ACESTYS** (Lat.), n. f.  $A^2(a^3)\text{-se}^2s(\text{ke}^2s)/\text{ti}^2s(\text{tu}^4s)$ . See **ACESIA**.

**ACETA** (Lat.), n. n. pl. of *acetum* (q. v.).  $A^2s(a^3k)\text{-e}^2a(\text{a}^3)/\text{ta}^3$ . The vinegars; a series of pharmaceutical preparations. For the individual *aceta*, see under **ACETUM** and under the drugs from which they take their names.

**ACETABULAR**, adj.  $A^2s\text{-e}^2t\text{-a}^2b/\text{u}^2\text{-la}^3r$ . Pertaining to the acetabulum.

**ACETABULARIA** (Lat.), n. f.  $A^2(a^3)\text{-se}^2(\text{ke}^2)\text{-ta}^2b(\text{ta}^3b)/\text{u}^2\text{-a}^3$ ,  $(\text{u})\text{-la}^3(\text{la}^3)/\text{ri}^2\text{-a}^3$ . A genus of umbrellar, green-spored, calcareous marine *Algae*. [B, 19.]—**A. mediterranea** [Lamouroux]. A species which furnishes part of the article known as Corsican moss. [A, 344.]

**ACETABULEUS** (Lat.), adj.  $A^2(a^3)\text{-se}^2t(\text{ke}^2t)\text{-a}^2(a^3)\text{-bu}^2(\text{bu})\text{-le}^2u^3s(\text{u}^4s)$ . Fr., *acetabulé*. See **ACETABULIFORM**.

**ACETABULIFEROUS**, adj.  $A^2\text{-se}^2t\text{-a}^2b\text{-u}^2/\text{li}^2\text{-fo}^2rm$ . Lat., *acetabuliformis*. Fr., *acetabuliforme*. Ger., *becherförmig*. Sp., *acetabuliforme*. In botany, shaped like a saucer or a shallow cup. [Lindley, Gray, B, 39.]

**ACETABULIFORM**, adj.  $A^2\text{-se}^2t\text{-a}^2b\text{-u}^2/\text{li}^2\text{-fo}^2rm$ . Lat., *acetabuliformis*. Fr., *acetabuliforme*. Ger., *becherförmig*. Sp., *acetabuliforme*. In botany, shaped like a saucer or a shallow cup. [Lindley, Gray, B, 39.]

**ACETABULOSE**, adj.  $A^2\text{-se}^2t\text{-a}^2b/\text{u}^2\text{-los}$ . See **ACETABULIFORM**.

**ACETABULUM** (Lat.), n. n.  $A^2(a^3)\text{-se}^2t(\text{ke}^2t)\text{-a}^2b(\text{a}^3b)/\text{u}^2(\text{u})\text{-lu}^2m(\text{lu}^4m)$ . From *acetum*, vinegar. Gr., *κοτύλη*, *κοτυληδών*. Fr., *acétabule*, *acétabule* (obs.), *cavité cotyloïde* (3d def.), *fosse cotyloïdienne* (3d def.), *nombril de Vénus* (6th def.). Gr., *ἰψάνη*, *ἰψάνη* (3d def.), *Nabelkraut* (6th def.), *Venusnabel* (6th def.). It., *acetabolo*. Sp., *acetábulo*, *cavidad cotiloidea* (3d def.), *ombiligo de Venus* (6th def.). Syn.: *cotyloid cavity* (3d def.). 1. Originally, a vessel for holding vinegar; hence, any cup-shaped vessel. [A, 312.] 2. A measured cup holding about 30 fluidrachms. [Celsus, B, 45.] 3. A cup-shaped articular cavity, especially that of the innominate bone serving as a socket for the head of the thigh bone. [C.] 4. In zoology, the sucker of a cephalopod; also, the socket with which the limb of an insect articulates. [B.] 5. In botany, the receptacle of certain lichens and fungi; also the calyx of a flower. 6. A name sometimes applied to the plants known as Venus's navelwort (*Cotyledon umbilicus*) and various species of *Omphalodes*. 7. A placental cotyledon, especially in ruminants. [A, 300, 325.]—**A. alterum**. The common orpine (*Sedum telephium*). [A, 316.]—**A. cotyle**. See **A.** (3d def.).—**A. humeri**. See **Humeri a.**—**A. marinum**. Navelwort.—**Acetabula uterina**. See **A.** (7th def.).—**Humeri a.** Gr., *ὠμοκοτύλη*. See **Glenoid CAVITY**.

**ACETACETATE**, n.  $A^2s\text{-e}^2t\text{-a}^2s/\text{e}^2t\text{-at}$ . See **ACETOACETATE**.

**ACETAL**, n.  $A^2s\text{-e}^2t\text{-a}^2l$ . From *acetic* and *aldehyde*. Lat., *acetalum*. Fr., *acétal*. Ger., *Acetal*. It., *acetal*, *acetalo*. Sp., *acetal*. Syn.: *ethylidene ethylate*, *ethylidene diethyl ether*. A colorless, mobile liquid,  $\text{CH}_3\text{CH}(\text{O}_2\text{C}_2\text{H}_5)_2 = \text{C}_6\text{H}_{14}\text{O}_2$ , produced by the oxidation of ethyl alcohol. It has a peculiar, agreeable odor and a refreshing taste, with an after-taste like that of hazel-nuts. It acts as a hypnotic. [B, 2, 4; v. Mering, "Berl. kl. Wchnschr.," 1882, No. 43.]

**ACETALDEHYDE**, n.  $A^2s\text{-e}^2t\text{-a}^2l/\text{de-hid}$ . Fr., *acétaldéhyde*. Ger., *Acetaldehyd*. See **ACETIC ALDEHYDE**.

**ACETALIUM** (Lat.), n. n.  $A^2(a^3)\text{-se}^2t(\text{ke}^2t)\text{-a}(\text{a}^3)/\text{li}^2\text{-u}^3m(\text{u}^4m)$ . Acetal.

**ACETAMEISENSÄURE** (Ger.), n.  $A^3\text{-tse}^2t\text{-a}^3\text{-mi}^2/\text{se}^2n\text{-zoi-re}^2$ . Acetoformic acid. [B.]

**ACETAMIDE**, n.  $A^2s\text{-e}^2t\text{-a}^2m\text{-i}^2d$ . Fr., *acétamide*. Ger., *Acetamid*. It., *acetammide*. Sp., *acetámide*. A substance formed by the action of ammonia on an acetic ether; occurring in colorless acicular crystals, having an odor resembling that of mouse-dung, and possessing the composition of ammonia in which one atom of hydrogen is replaced by a molecule of acetyl:  $\text{CH}_3\text{CO}\cdot\text{NH}_2 = \text{C}_2\text{H}_5\text{NO}$ . [B, 2, 4.]—**A. chloral**. See **CHLORALACETAMIDE**.—**A. nitrate**. Fr., *azotate d'acétamide*. Ger., *salpetersäures Acetamid*. A crystalline substance formed by the action of nitric acid on  $\text{a. C}_2\text{H}_5\text{NO}\cdot\text{HNO}_3 = \text{CH}_3\text{CO}\cdot\text{N}(\text{H}_2)\cdot\text{ONO}_2$ . [B, 4.]

**ACETAMIDOPHTHALIC ACID**, n.  $A^2s\text{-e}^2t\text{-a}^2m\text{-i}^2d\text{-o}^2p\text{-tha}^2l/\text{i}^2k$ . From *acetic*, *amide*, and *phthalic*. Fr., *acide acétamidophthalique*. Ger., *Acetamidophthalsäure*. An acid formed by the combination of acetamide with phthalic acid:  $\text{C}_6\text{H}_3(\text{CO}_2\text{H})_2\cdot\text{NH}\cdot\text{C}_2\text{H}_5\text{O}$ . [B, 2.]

**ACETANILIDE**, n.  $A^2s\text{-e}^2t\text{-a}^2n/\text{i}^2l\text{-i}^2d$ . Fr., *acétanilide*. Ger., *Acetanilid*. A substance having the constitution  $\text{C}_6\text{H}_5\cdot\text{N}(\text{C}_2\text{H}_5\text{O})\cdot\text{H} = \text{C}_8\text{H}_9\text{NO}$ . It forms shining laminar crystals, soluble in hot water, in alcohol, and in ether. [B, 4.] Cf. **ANTIFEBRINE**.

**ACETARIA** (Lat.), n. n. pl.  $A^2s(a^3k)\text{-e}^2t\text{-a}(\text{a}^3)/\text{ri}^2\text{-a}^3$ . Vegetables, etc., prepared with vinegar (pickles and salads). [A, 312, 336.]

**ACETARIOUS**, adj.  $A^2s\text{-e}^2t\text{-a}^2r\text{-i}^2u^3s$ . Lat., *acetarius*. Proper for making salads or pickles (said of plants). [B, 7.]

**ACETARIUM** (Lat.), n. n.  $A^2s(a^3k)\text{-e}^2t\text{-a}(\text{a}^3)/\text{ri}^2\text{-u}^3m(\text{u}^4m)$ . A pickle or salad.—**A. scorbuticum**. A kind of pickle, advised by Bates for scorbutic patients, made of the bruised leaves of the *Cochlearia anglica*, 3 oz.; white sugar, 6 oz.; "sal cochlear," 1 oz.; and orange juice, 6 oz. [A, 336.]

**ACETAS** (Lat.), n. m.  $A^2(a^3)\text{-se}(\text{ka})/\text{ta}^2s(\text{ta}^3s)$ . An acetate.—**A. aluminicus**. Neutral acetate of aluminium.—**A. ammoniacus**. Acetate of ammonium. [B.]—**A. ammoniacus aqua solutus** [Fr. Cod.]. A preparation corresponding to the liquor ammoniacus of the U. S. Ph. [B.]—**A. calcicus** [Fr. Cod.]. Acetate of calcium. [B.]—**A. cupricus**. Acetate of copper.—**A. kalicus**. Acetate of potassium.—**A. lixivæ**. See **KALIUM acetatum solutum**.—**A. morphiæ**. Acetate of morphine.—**A. natriæ**. Acetate of sodium.—**A. natriæ cum aqua**. See **NATRIUM acetatum**.—**A. plumbicus** [Fr. Cod.]. Fr., *acétate neutre de plomb*. Normal acetate of lead.—**A. potassicus** [Fr. Cod.]. Fr., *acétate de potasse sec*. Acetate of potassium. [B.]—**A. quiniæ**. Acetate of quinine.—**A. sodicus** [Fr. Cod.]. Fr., *acétate de soude cristallisé*. Acetate of sodium. [B.]—**A. zincicus** [Fr. Cod.]. Acetate of zinc.

**ACETATCITRAT** (Ger.), n.  $A^3\text{-tse}^2t\text{-a}^3/\text{tsi}^2t\text{-ra}^3t$ . See **ACETOCITRATE**.

**ACETATCITRONENSÄURE-AETHYLESTER** (Ger.), n.  $A^3\text{-tse}^2t\text{-a}^3/\text{tsi}^2t\text{-ro}^2n\text{-e}^2n\text{-zoi-re}^2\text{-a}^3/\text{tu}^1\text{-e}^2s\text{-te}^2r$ . Acetocitrate of ethyl.—**Acetatcitronensäure-Methylester**. Acetocitrate of methyl. [B.]

**ACETATE**, n.  $A^2s\text{-e}^2t\text{-at}$ . Lat., *acetas*. Fr., *acétate*. Ger., *Acetat*, *essigsäures Salz*. It., Sp., *acetato*. A salt of acetic acid. For the individual *a's*, see under the names of the bases.—**Acid a.** One in which the base replaces only a part of that portion of the hydrogen of the acid that is capable of displacement.—**Basic a.** One in which one or more of the acid-radicle molecules ( $\text{C}_2\text{H}_3\text{O}$ ) have been replaced by oxygen or hydroxyl (OH); or, a combination of a normal *a.* with the hydrate or the oxide of the base. Various prefixes are assigned to the different basic *a's* to designate the ratio between the number of molecules of the acid radicle and the number of molecules or atoms of the base; thus: *a. sesquibasic a.* is one in which the ratio is as 2 to 3, *a. dibasic a.* one in which it is as 1 to 2, *a. tribasic a.* one in which it is as 1 to 3, *a. tetrabasic a.* one in which it is as 1 to 4, and *a. sexbasic a.* one in which it is as 1 to 6. [B.]—**Dibasic a.** See **Basic a.**—**Neutral a.**, **Normal a.** One in which the base replaces all the hydrogen of the acid that is capable of displacement. [B.]—**Sesquibasic a.**, **Sexbasic a.**, **Tetrabasic a.**, **Tribasic a.** See **Basic a.**

**ACETATED**, adj.  $A^2s\text{-e}^2t\text{-a}\text{-te}^2d$ . Lat., *aceticatus*. Ger., *essigsauer*. It., *acetato*. Sp., *acetado*. 1. Having the constitution of an acetate. 2. Containing an acetate, or acetic acid, or vinegar.

**ACETATMILCHSÄUREÄTHYLESTER**, **ACETATMILCHSÄUREESTER** (Ger.), n's.  $A^3\text{-tse}^2t\text{-a}^3/\text{mi}^2l\text{ch}^2/\text{zoi-re}^2\text{-a}^3/\text{tu}^1\text{-e}^2s\text{-te}^2r$ ,  $\text{-zoi-re}^2\text{-e}^2s\text{-te}^2r$ . See **ETHYL acetolactate**.

**ACETATSALICYLSÄURE** (Ger.), n.  $A^3\text{-tse}^2t\text{-a}^3/\text{za}^1l\text{-i}^2\text{-tsu}^1/\text{zoi-re}^2$ . Acetosalicilic acid. [B.]

**ACETATUS** (Lat.), adj.  $A^2s(a^3k)\text{-e}^2t\text{-a}(\text{a}^3)/\text{tu}^3s(\text{tu}^4s)$ . Acetated.

**ACÈTE** (Fr.), n.  $A^3\text{-se}^2t$ . An old name for an acetate. [A, 344.]

**ACÉTÈ** (Fr.), n.  $A^3\text{-sa}\text{-ta}$ . Turned into vinegar. [A, 306.]

**ACETENE**, n.  $A^2s\text{-e}^2t\text{-en}$ . Fr., *acétène*. Ger., *Aceten*. Olefant gas. See **ETHYLENE**. [B.]

**ACETENYL**, n.  $A^2s\text{-e}^2t\text{-e}^2n\text{-i}^2l$ . Fr., *acétényle*. Ger., *Acetenyl*. A univalent radicle, supposed to be present in acetylene, having the composition  $\text{C}\equiv\text{CH}_2$ . [B.]—**A'benzene**. Fr., *acétényl-benzène*. Ger., *Acetenylbenzol*. Syn.: *phenylacetylene*. A colorless, highly refracting liquid, having a peculiar aromatic odor; chemically, a hydrocarbon of the acetylene series:  $\text{C}_8\text{H}_6 = (\text{C}_2\text{H}_2)_3 = \text{C}\equiv\text{CH}$ . [B, 2.] See **PHENYLACETYLENE**.—**A'benzol** (Ger.). See **A'benzene**.

**ACETESSIGESTER** (Ger.), n.  $A^3\text{-tse}^2t\text{-e}^2s/\text{si}^2g\text{-e}^2st/\text{e}^2r$ . Acetoacetic ether.

**ACETESSIGSÄURE** (Ger.), n.  $A^3\text{-tse}^2t\text{-e}^2s/\text{si}^2g\text{-zoi-re}^2$ . Acetoacetic acid. [B.]

**ACETEUGENOL**, n.  $A^2s\text{-e}^2t\text{-u}^2/\text{je}^2n\text{-o}^2l$ . From *acetic* and *eugenol*. A compound obtained by treating eugenol with chloroacetyl. On oxidation, it is converted into acetvanillic acid, and is hence used as a source of artificial vanillin. [B, 4, 5.]

**ACÉTEUSE** (Fr.), n.  $A^3\text{-sa}\text{-tu}^6z$ . An old name for sorrel. [A, 306.]

**ACÉTEUX** (Fr.), adj.  $A^3\text{-sa}\text{-tu}^6n$ . Acetous.

**ACETIC**, adj.  $A^2s\text{-e}^2t/\text{i}^2k$ . Lat., *aceticus*. Fr., *acétique*. Ger., *acetisch*, *essigsauer*. It., *aceticco*. Sp., *acético*. Containing or derived from vinegar or acetyl.

**ACETICA** (Lat.), n. n. pl.  $A^2s(a^3k)\text{-e}^2t/\text{i}^2k\text{-a}$ . See **ACETA medicata**, under **ACETUM**.

**ACETIC ACID**, n. Lat., *acidum aceticum*. Fr., *acide acétique*. Ger., *Essigsäure*. It., *acido aceticco*. Sp., *ácido acético*. Syn.: *methylcarbonic acid*, *acetyl hydrate*. The acid of vinegar; a hydrate, or hydrated oxide, of acetyl:  $\text{C}_2\text{H}_4\text{O}_2 = \text{C}_2\text{H}_3\text{O}^1/\text{H}$ , or  $\text{C}_2\text{H}_3\text{O}_2\cdot\text{H}$ , or  $\text{CH}_3\cdot\text{COOH}$ . It may be regarded as a molecule of water ( $\text{H}_2\text{O}$ ) in which half the hydrogen is replaced by acetyl ( $\text{C}_2\text{H}_3\text{O}$ ).

H<sub>2</sub>O). It is an organic monobasic acid found in the juices of many plants, and existing probably also in several of the animal secretions, but more commonly resulting from the decomposition and oxidation of organic bodies. It is prepared either by oxidizing alcohol or by the destructive distillation of wood. The a. a. of commerce and of medicine is an aqueous solution of the pure acid, containing 33 per cent. (Br. Ph.) or 36 per cent. (U. S. Ph.) of the latter. The a. a. of the Ger. Ph. is glacial a. a. The Fr. Cod. recognizes two grades: *acide acétique cristallisable, monohydraté*, or *pur*, corresponding to glacial a. a.; and *acide acétique du commerce (acide pyroligneux purifié)*, containing 50 per cent. of the pure acid and having a sp. gr. of 1.060. [B, 2.] Cf. ACIDUM ACETICUM.—**ANHYDROUS a. a.** See ACETIC ANHYDRIDE.—**AQUEOUS a. a.** Any mixture of a. a. and water.—**Camphorated a. a.** See ACIDUM ACETICUM camphoratum.—**Crystallizable a. a.** See Glacial a. a.—**Diluted a. a.** Fr., *acide acétique dilué*. Ger., *reiner Essig*. It., *acido acetico diluito*. Sp., *ácido acético diluido*. See ACIDUM ACETICUM dilutum.—**Glacial a. a.** Lat., *acidum aceticum glaciale*. Fr., *acide acétique cristallisable* [Fr. Cod.], *vinaigre glacial*. Ger., *Essig*. It., *acido acetico glaciale*. Sp., *ácido acético concentrado*. Syn.: *radical vinegar*. Nearly absolute a. a.; a colorless, volatile liquid, of pungent odor and caustic taste, which crystallizes below 15° C. [B, 5.]—**Hydrated a. a.** A definite compound of a. a. and water (79 parts of the crystallized acid to 21 of water). Its density is 1.073, all other mixtures of a. a. and water being less dense. [B, 2.]—**Monohydrated a. a.** See Glacial a. a.—**Syrup of a. a.** A preparation of the Belgian Ph. (1853), containing 347 parts of a 55-per-cent. a. a. and 533 parts of sugar. [B, 10.]

**ACETIC ALDEHYDE**, n. Written also *acetic aldehyde*. Fr., *aldéhyde acétique (ou vinique)*. Ger., *Acetaldehyd, Aethylaldehyd*. It., *aldeide acetica*. Syn.: *acetaldehyde, ethylic aldehyde, oxide of ethylidene*. Ordinary aldehyde, C<sub>2</sub>H<sub>4</sub>O; a body which may be regarded as ethyl alcohol deprived of 2 atoms of hydrogen, or as acetic acid deprived of 1 atom of oxygen, a hydrate, or hydrated oxide, of vinyl, or a hydride of acetyl; a transparent liquid having a pungent, suffocating odor, very volatile, and boiling at 21° C. Döbereiner, who first obtained it, in an impure state, called it "light oxygen ether." It is the substance usually meant when the word aldehyde is used without qualification. It is produced by the oxidation and destructive distillation of alcohol and some other organic compounds. In its reactions, it may be regarded as a monobasic acid, forming salts called aldehydates. It readily oxidizes into acetic acid. [B, 2.] For its substitution and addition compounds, see BROMALDEHYDE, CHLORALDEHYDE, etc.; for its polymeric modifications, see PARALDEHYDE, METALDEHYDE, ACRALDEHYDE, and ELALDEHYDE.

**ACETIC ANHYDRIDE**, n. Fr., *anhydride acétique*. Ger., *Essigsäureanhydrid*. It., *anidride acetica*. Anhydrous acetic acid, oxide of diacetyl, or acetate of acetyl: C<sub>4</sub>H<sub>6</sub>O<sub>3</sub> = (CH<sub>3</sub>CO)<sub>2</sub>O. A colorless, mobile liquid, boiling at 138° C., obtained by the action of acetic chloride or phosphorus oxychloride on sodium acetate. It dissolves in water with the production of acetic acid. [B, 4.]

**ACETIC ETHER**, n. Lat., *ether aceticus*. Fr., *ether acétique*. Ger., *Essigester, Essigäther*. It., *etere acetico*. Sp., *éter acético*. Any compound of acetic acid with a compound radical. The most common are ethyl acetate (to which the term is frequently limited), methyl acetate, allyl acetate, and the acetoacetic ethers. [B.]

**ACETICUS** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>k)-e<sup>2</sup>t<sup>2</sup>i<sup>2</sup>k-u<sup>3</sup>s(u<sup>4</sup>s). Acetic. Used with the name of a base, the acetate of that base.

**ACETIDIN**, n. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>i<sup>2</sup>d-i<sup>2</sup>n. Fr., *acétidine*. Ger., *Acetidin*. Acetic ether.

**ACETIFICATION**, n. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>f<sup>2</sup>-ka<sup>3</sup>shu<sup>2</sup>n. Lat., *acetificatio* (from *acetum*, vinegar, and *facere*, to make). Fr., *acétification*. Ger., *Säuermachen, Essigbildung*. It., *acetificazione*. Sp., *acetificación*. A transformation into vinegar.

**ACETIFY**, v. tr. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>f<sup>2</sup>. Fr., *acétifier*. Ger., *säuer machen*. It., *acetificare*. Sp., *acetificar*. To convert into vinegar.

**ACETIMETER, ACETIMETRIC, ACETIMETRY**, n's. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>m<sup>2</sup>-e<sup>2</sup>t<sup>2</sup>-u<sup>3</sup>r, -i<sup>2</sup>m<sup>2</sup>-e<sup>2</sup>t<sup>2</sup>-ri<sup>2</sup>k, -i<sup>2</sup>m<sup>2</sup>-e<sup>2</sup>t<sup>2</sup>-ri<sup>2</sup>. See ACETOMETER, ACETOMETRIC, and ACETOMETRY.

**ACETIN**, n. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>-i<sup>2</sup>n. Fr., *acétine*. Ger., *Acetin*. It., Sp., *acetina*. An acetic ether (or acetate) of glyceryl. Three are known: *monoacetin*, C<sub>3</sub>H<sub>5</sub>(OH)<sub>2</sub>(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>); *diacetin*, C<sub>3</sub>H<sub>5</sub>(OH)(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub>; and *triacetin*, C<sub>3</sub>H<sub>5</sub>(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>3</sub>. All of them are liquids. [B, 4.]

**ACETIS** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)-se(ka)<sup>3</sup>ti<sup>2</sup>s. See ACETITE.

**ACETISCH** (Ger.), adj. A<sup>3</sup>-tsat<sup>2</sup>i<sup>2</sup>sh. Acetic.

**ACETITE**, n. A<sup>2</sup>s-e<sup>2</sup>t<sup>2</sup>-it. Lat., *acetis*. Fr., *acétite*. Ger., *Acetit, Essigsäures Salz* (1st def.). It., Sp., *acetito*. 1. A salt of acetic acid (formerly so called, but now known to be the same as acetic acid); an acetate. 2. A compound of acetic acid and mannite (diacetate of mannitan). [B, 2, 4, 39.]

**ACETMALONSÄUREESTER** (Ger.), n. A<sup>3</sup>-tse<sup>2</sup>t-ma<sup>3</sup>-lon<sup>2</sup>-zoi<sup>2</sup>-re<sup>2</sup>-e<sup>2</sup>s-te<sup>2</sup>r. An ether consisting of the acetate and the malonate of the same compound radical, especially ethyl. [B.] See ERYL acetomalonalate.

**ACETMETAMIDOBENZOIC ACID**, n. A<sup>2</sup>s-e<sup>2</sup>t-me<sup>2</sup>t-a<sup>2</sup>m-i<sup>2</sup>d-o-be<sup>2</sup>n-zo<sup>2</sup>i<sup>2</sup>k. From *acetic* and *metamidobenzoic*. Fr., *acide métamido-benzéique*. Ger., *Acetmetamidobenzoësäure*. A crystalline acid formed by heating metamidobenzoic acid with glacial acetic acid: C<sub>6</sub>H<sub>4</sub>N(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)H.COOH = C(H)(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)H.H.COOH.H.H. [B, 4.]

**ACETNAPHTHALIDE**, n. A<sup>2</sup>s-e<sup>2</sup>t-na<sup>2</sup>p<sup>2</sup>(tha<sup>2</sup>)i<sup>2</sup>d. From *acetic* and *naphthalide*. Ger., *Acetnaphthalid*. A crystalline substance, C<sub>10</sub>H<sub>7</sub>N(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)H, formed by the action of glacial acetic acid on naphthalide. [B, 4.]

**ACETOACETATE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-a<sup>3</sup>s-e<sup>2</sup>t-at. Fr., *acéto-acétate*.

Ger., *Acetacetal, acetessigsäures Salz*. A salt of acetoacetic acid. The general formula is C<sub>2</sub>H<sub>3</sub>O.CH<sub>2</sub>.COO.(M'), in which M' is a univalent metal or radicle. Many substitution compounds are formed by replacing one or both of the atoms of hydrogen in the second molecule (CH<sub>2</sub>) of the acid radicle—thus, a *benzoylacetate* is C<sub>2</sub>H<sub>3</sub>O.CH(CO.C<sub>6</sub>H<sub>5</sub>).COO.M'. Many doubly substituted a's are known, of the general formula CH<sub>3</sub>.CO.CH(C<sub>6</sub>H<sub>5</sub>).COO.(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>, in which C<sub>6</sub>H<sub>5</sub> and C<sub>2</sub>H<sub>3</sub> are any two univalent hydrocarbon radicals. Triply substituted a's have the constitution CH<sub>3</sub>.CO.C(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>.(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>.COO.(C<sub>6</sub>H<sub>5</sub>)<sub>2</sub>. [B, 2, 4.]

**ACETOACETIC ACID**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-a<sup>3</sup>s-e<sup>2</sup>t-i<sup>2</sup>k. Fr., *acide acéto-acétique*. Ger., *Acetessigsäure*. A monobasic acid formed from acetic acid by replacing one of the hydrogen atoms of the acid radicle with the acetic-acid radicle, acetyl (C<sub>2</sub>H<sub>3</sub>O), giving the formula C<sub>2</sub>H<sub>3</sub>O.C<sub>2</sub>H<sub>3</sub>COOH. [B, 2.]

**ACETOACETIC ETHER**, n. Fr., *ether acéto-acétique*. Ger., *Acetessigester*. An acetoacetate in which a compound radicle replaces the extra-radical hydrogen of the acid. The most common are the ethylic derivative and its numerous substitution products. [B, 2.]

**ACETOARSENITE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-a<sup>3</sup>s-se<sup>2</sup>n-it. Fr., *acéto-arsénite*. Ger., *Acetarsenit*. A salt consisting of an acetate and an arsenite of the same base.

**ACÉTO-AZOTATE** (Fr.), n. A<sup>3</sup>-sa-to-a<sup>3</sup>-zo-ta<sup>3</sup>t. An acetonitrile.

**ACETOBENZIDINE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-be<sup>2</sup>n'zi<sup>2</sup>d-en. Ger., *Acetbenzidin*. See BENZIDINE.

**ACETOBENZOIC ANHYDRIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-be<sup>2</sup>n-zo<sup>2</sup>-i<sup>2</sup>k. Fr., *anhydride acéto-benzoïque*. Ger., *Benzoëssigsäureanhydrid*. Acetate of benzoyl, benzoate of acetyl: C<sub>6</sub>H<sub>5</sub>O<sub>2</sub> = C<sub>6</sub>H<sub>5</sub>O<sup>+</sup>.O<sup>-</sup>. [B, 2.]

**ACETOBROMANILIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-bro-ma<sup>2</sup>n'i<sup>2</sup>i<sup>2</sup>d. For deriv., see ACETUM, BROMINE, and ANILINE. See BROMOPHENYLACETAMIDE.

**ACETOBROMIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-bro'mi<sup>2</sup>d. Fr., *acétobromure*. Ger., *Acetobromür*. Syn.: *bromoacetate*. An acetate in which part of the hydrogen of the acid radicle has been replaced by bromine. [B.]

**ACETOBROMOPHENONE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-bro''mo-fe<sup>2</sup>n-on'. For deriv., see ACETUM, BROMINE, and PHENONE. See ACETOPHENONE.

**ACETOBUTYRATE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-bu<sup>2</sup>t'i<sup>2</sup>-rat. For deriv., see ACETUM and BUTYRATE. Fr., *acéto-butyrat*. Ger., *Acetobuttersäureester*. A salt containing molecules of both the acetic-acid radicle and the butyric-acid radicle, the general formula being R''(O.C<sub>2</sub>H<sub>3</sub>O)(OC<sub>4</sub>H<sub>7</sub>O), in which R'' is a bivalent radicle. [B, 4.]

**ACETOBUTYRIC ACID**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-bu<sup>2</sup>t'i<sup>2</sup>-ri<sup>2</sup>k. Fr., *acide acéto-butyrrique*. Ger., *Acetobuttersäure*. See PROPIONIC ACID.

**ACETOCHLORAL**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-klo'ra<sup>3</sup>l. See CHLORAL.

**ACETOCHLORANILIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-klor-a<sup>2</sup>n'i<sup>2</sup>i<sup>2</sup>d. For deriv., see ACETUM, CHLORINE, and ANILINE. Fr., *acéto-chloranilide*. Ger., *Acetochloranilid*. Syn.: *monochlorophenylacetamide*. See under CHLOROPHENYLACETAMIDE.

**ACETOCHLORHYDRIN**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-klor-hi'dri<sup>2</sup>n. For deriv., see ACETUM, CHLORINE, and HYDRIN. Fr., *acéto-chlorhydrine*. Ger., *Acetochlorhydrin*. A liquid produced by the action of acetic and hydrochloric acids on glycerin (glyceryl alcohol), whereby two molecules of hydroxyl are replaced by chlorine and the radicle of acetic acid: C<sub>3</sub>H<sub>5</sub>(OH).Cl(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>). [B, 4.]

**ACETOCHLORHYDROSE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-klor-hi'dros. For deriv., see ACETUM, CHLORINE, HYDROGEN, and -ose. Fr., *acéto-chlorhydrase*. Ger., *Acetochlorhydrase*. Acetochlorhydrin of glucose, C<sub>6</sub>H<sub>7</sub>(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub>ClO<sub>2</sub>; a semi-fluid or crystalline body resulting from the action of acetyl chloride on glucose. [B, 2.]

**ACETOCHLORIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-klo'ri<sup>2</sup>d. For deriv., see ACETATE and CHLORIDE. Fr., *acéto-chlorure*. Ger., *Acetochlorür*. A double salt consisting of an acetate and a chloride of the same base. [B, 2.]

**ACETOCINNAMENE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-si<sup>2</sup>n'a<sup>2</sup>m-en. For deriv., see ACETUM and CINNAMENE. Fr., *acéto-cinnamène*. Ger., *Acetocinnamen*. An oily liquid, C<sub>10</sub>H<sub>10</sub>O = CO<sup>+</sup>CH = CH - C<sub>6</sub>H<sub>5</sub>, formed by the dry distillation of the calcium salts of acetic and cinnamic acids. [B, 2.]

**ACETOCINNAMIC ANHYDRIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-si<sup>2</sup>n'a<sup>2</sup>m-i<sup>2</sup>k. For deriv., see ACETUM and CINNAMYL. Fr., *anhydride acéto-cinnamique*. Ger., *Zimmtsäureessigsäureanhydrid*. Acetate of cinnamyl; a heavy oil having the composition C<sub>2</sub>H<sub>3</sub>O.C<sub>6</sub>H<sub>7</sub>O.O. [B, 2.]

**ACETOCITRATE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-si<sup>2</sup>t<sup>2</sup>-rat. For deriv., see ACETIC and CITRATE. Fr., *acéto-citrate*. Ger., *Acetocitrat*. A compound of an acetate and a citrate. The general formula of the a's is C<sub>2</sub>H<sub>4</sub>.C(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>).(COO)R'', in which R'' is a trivalent radicle or its equivalent. [B.]

**ACETOCOMENATE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-ko'me<sup>2</sup>n-at. For deriv., see ACETIC and COMENATE. Fr., *acéto-coménate*. Ger., *Acetokomenat*. A compound of an acetate and a comenate. The a's have the general formula R(C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>)<sub>2</sub>(COO)<sub>2</sub>, in which R is a radicle of which the quantitative is n. [B, 3.]

**ACETOCUMINIC ANHYDRIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-ku<sup>2</sup>-mi<sup>2</sup>n'i<sup>2</sup>k. For deriv., see ACETUM and CUMYL. Fr., *anhydride acéto-cuminique*. Acetate of cumyl, C<sub>2</sub>H<sub>3</sub>O.C<sub>10</sub>H<sub>11</sub>O.O. [B, 2.]

**ACETOCYANIC OXIDE**, n. A<sup>2</sup>s'e<sup>2</sup>t-o-si-a<sup>2</sup>n'i<sup>2</sup>k. For deriv., see ACETUM and CYANOGEN. Fr., *oxyde acéto-cyanique*. Ger., *Es-*

*sigssäurecyanensäureanhydrid*. Acetate of cyanogen,  $C_3H_3NO_2 = CH_3.CO_2.CN = C_2H_3O \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} O$ ; a compound isomeric with cyanacetic acid. [B, 2.]

**ACETODIBROMANILIDE**, n.  $A_2S''e_2t-o-di-brom-a_2n''i_2l-i_2d$ . For deriv., see ACETUM, *di*\*, BROMINE, and ANILINE. Fr., *acétodibromanilide*. Ger., *Acetodibromanilid*. Syn.: *Dibromophenylacetamide*. See BROMOPHENYLACETAMIDE.

**ACETODIBROMOXYLIDE**, n.  $A_2S''e_2t-o-di-bro-mo-xi''l-i_2d$ . For deriv., see ACETUM, *di*\*, BROMINE, and XYLIL. Fr., *acétodibromoxylide*. Ger., *Acetodibromoxylid*. See XYLIDINE.

**ACETODICHLORACETATE**, n.  $A_2S''e_2t-o-di-klor-a_2s''e_2t-at$ . For deriv., see ACETUM, *di*\*, CHLORINE, and ACETATE. Fr., *acétodichloracétate*. Ger., *dichloracetessigsäures Salz*. A salt of acetoacetic acid in which 2 atoms of chlorine are substituted for 2 of hydrogen. [B.]

**ACETODICHLORANILIDE**, n.  $A_2S''e_2t-o-di-klor-a_2n''i_2l-i_2d$ . For deriv., see ACETUM, *di*\*, CHLORINE, and ANILINE. Fr., *acétodichloranilide*. Ger., *Acetodichloranilid*. See DICHLOROPHENYLACETAMIDE.

**ACETODICHLORHYDRIN**, n.  $A_2S''e_2t-o-di-klor-hi''dri_2n$ . For deriv., see ACETUM, *di*\*, CHLORINE, and HYDRIN. Fr., *acétodichlorhydrine*. Ger., *Acetodichlorhydrin*. A liquid,  $C_2H_5.Cl_2$  ( $C_2H_5O_2$ ), formed by the action of acetic and hydrochloric acids on glycerin (glyceryl alcohol), 1 molecule of the radicle of acetic acid and 2 atoms of chlorine being substituted for 3 molecules of hydroxyl. [B, 4.]

**ACETODIETHYLACETATE**, n.  $A_2S''e_2t-o-di-e_2th''i_2l-i_2s'$ . For deriv., see ACETUM, *di*\*, ETHYL, and ACETATE. Fr., *acétodiéthylacétate*. Ger., *diäthyllessigsäures Salz*. A salt of acetoacetic acid in which 2 molecules of ethyl ( $C_2H_5$ ) are substituted for 2 atoms of hydrogen. [B.]

**ACETOISOBUTYLACETATE**, n.  $A_2S''e_2t-o-di-i_2so-bu''ti_2l-i_2s'$ . For deriv., see ACETUM, *di*\*, *iso*\*, BUTYL, and ACETATE. Fr., *acétodiisobutylacétate*. Ger., *Acetadiisobutylacetat*. A salt of acetoacetic acid in which 2 molecules of isobutyl ( $C_4H_9$ ) replace 2 atoms of hydrogen. [B.]

**ACETOFORMIC ACID**, n.  $A_2S''e_2t-o-f_2o-rm''i_2k$ . From *acetic* and *formic*. Fr., *acide acéto-formique*. Ger., *Acetameisensäure*. It., *acido acetoformico*. Sp., *ácido acetoformico*. Syn.: *pyroracemic* (or *pyruvic*) acid. A monobasic acid obtained by the distillation of glyceric acid; a liquid of the constitution  $C_3H_4O_3 = CH_3.CO.COOH$ , i. e., formic acid in which a molecule of acetyl replaces an atom of hydrogen. [B.]

**ACETOFORMOBENZOIC ETHER**, n.  $A_2S''e_2t-o-f_2o-rm''o-be_2n''i_2k$ . From *acetic*, *formic*, and *benzoic*. Fr., *éther acétoformobenzoïque*. See FORMOBENZOIC ACID.

**ACETOGLYCERAL**, n.  $A_2S''e_2t-o-gli''s'e_2r-a_2l$ . From *acetic* and *glycerol*. Fr., *acéto-glycér*. Ger., *Acetoglyceral*. See GLYCERALS.

**ACETOGLYCOLCHLORHYDRIN**, n.  $A_2S''e_2t-o-gli''k''o_2l-klor-hi''dri_2n$ . From *acetic*, *glycol*, *chlorine*, and *hydrogen*. Fr., *acéto-glycolchlorhydrine*. Ger., *Acetoglycolchlorhydrin*. A body having the composition  $C_6H_7ClO_2 = C_2H_4 \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} OC_2H_5O$ . [B, 2.]

**ACETOGLYCOLLATE**, n.  $A_2S''e_2t-o-gli''k''o_2l-at$ . From *acetic* and *glycollic*. Fr., *acéto-glycolate*. Ger., *Acetoglycolat*. A salt of acetoxycollic acid. [B.]

**ACETOGLYCOLLIC ACID**, n.  $A_2S''e_2t-o-gli''k''o_2l-i_2k$ . Fr., *acide acéto-glycolique*. Ger., *Acetoglycolsäure*. A monobasic acid derived from glycollic acid by the substitution of acetyl ( $C_2H_5O$ ) for hydrogen:  $CH_2O(C_2H_5O) - CO.OH = C_4H_6O_4$ . [B, 4.]

**ACETO GUANAMINE**, n.  $A_2S''e_2t-o-gwa''n-a_2m-i_2n$ . From *acetic* and *guanamine*. Fr., *acéto-guanamine*. Ger., *Acetoguanamin*. See METHYL GUANAMINE.

**ACETOHYPOBROMOUS ANHYDRIDE, A. OXIDE**, n's.  $A_2S''e_2t-o-hi''po-bro''mu_2s$ . From *acetic* and *hypobromous*. Fr., *anhydride acétohypobromeux*. Ger., *Essigsäureunterbromigsäureanhydrid*. Acetate of bromine, a compound isomeric with monobromacetic acid:  $C_2H_3BrO_2 = C_2H_3O \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} O = CH_3.CO.Br$ . [B, 2.]

**ACETOHYPOCHLOROUS ANHYDRIDE, A. OXIDE**, n's.  $A_2S''e_2t-o-hi''po-klo''ru_2s$ . From *acetic* and *hypochlorous*. Fr., *anhydride acétohypochloreux*. Ger., *Essigsäureunterchlorigsäureanhydrid*. Acetate of chlorine, isomeric with monochloroacetic acid:  $C_2H_3ClO_2 = C_2H_3O \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} O = CH_3.CO.Cl$ . A colorless liquid, which explodes when heated to 100° C. [B, 2, 4.]

**ACETOHYPOIODOUS ANHYDRIDE, A. OXIDE**, n's.  $A_2S''e_2t-o-hi''po-i_2o''d-u_2s$ . From *acetic* and *hypoiodous*. Fr., *anhydride acéto-hypoiodoux*. Ger., *Essigsäureunterjodigsäureanhydrid*. Acetate of iodine. Two of them are known: *iodine monoacetate*,  $C_2H_3IO_2 = C_2H_3O \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} O$ ; and *iodine triacetate*,  $I(C_2H_3O_2)_3$ . [B, 2.]

**ACETOIODIDE**, n.  $A_2S''e_2t-o-i_2o''di_2d$ . From *acetic* and *iodide*. Fr., *acéto-iodure*. Ger., *Acetjodür*. A compound consisting of the acetate and the iodide of the same radicle. [B.]

**ACETOIODOUS ANHYDRIDE**, n.  $A_2S''e_2t-o-i_2o''d-u_2s$ . From *acetic* and *iodous*. Fr., *anhydride acéto-iodoux*. Ger., *Essigsäurejodigsäureanhydrid*. Syn.: *triacetate of iodine*. An explosive compound, occurring under the form of readily deliquescent, colorless, prismatic crystals, having the composition  $I(O.C_2H_3O_2)_2$ . [B, 4.]

**ACETOKOMENAT** (Ger.), n.  $A_3-tse_2t-o-k_2o-me_2n-a_2t$ . See ACETOKOMENATE.

**ACETOL**, n.  $A_2S''e_2t-o-l$ . For deriv., see ACETONE and *-ol*\*, Fr.,

*acétol*. Ger., *Acetol*. It., *acetolo*. Sp., *acetol*. The alcohol of acetone, a body of agreeable odor, discovered by Emmerling, having the composition  $C_5H_8O(OH) = CH_3.CO.CH_2.OH$ , probably present in the distillate of the product obtained by heating glucose with caustic potash. [Emmerling and Töges, "Bericht d. dtsh. chem. Gesellsch.," xvi, p. 837 (B).]

**ACÉTQL** (Fr.), n.  $A_3-sa-tol$ . 1. Acetol. 2. A medicated vinegar. [B.]

**ACETOLACTATE**, n.  $A_2S''e_2t-o-la_2k''tat$ . Fr., *acéto-lactate*. Ger., *Acetolactat*. A salt of acetoacetic acid. [B.]

**ACETOLACTIC ACID**, n.  $A_2S''e_2t-o-la_2k''ti_2k$ . From *acetic* and *lactic*. Fr., *acide acéto-lactique*. Ger., *Acetomilchsäure*. A syrupy monobasic acid:  $CH_3 - CH(O.C_2H_5O) - COOH = C_6H_8O_4$ . [B, 4.]

**ACÉTOLAT** (Fr.), n.  $A_3-sa-to-la_3$ . Lat., *acetolatum*. Ger., *Essigaufguss*. It., *acetolato*. Sp., *acetolado*. A preparation made by distilling vinegar with one or more aromatic vegetable substances. [Béral (A, 301, 348).]

**ACÉTOLATURE** (Fr.), n.  $A_3-sa-to-la_3-tu''r$ . Lat., *acetolaturum*. Ger., *Essigauszug*. It., Sp., *acetolatura*. A preparation made by infusing or macerating a vegetable drug in vinegar; an acetous tincture. [Béral (A, 301, 348).]

**ACÉTOLÉ** (Fr.), n.  $A_3-sa-to-la$ . Lat., *acetoleum*. Ger., *Essigauflösung*. It., *acetoleto*. Syn.: *vinaigre médicinal* [Fr. Cod.]. A simple solution of a drug in vinegar. [Béral (A, 301, 348).]—**A. antiseptique**, **A. aromatique**. See ACETUM antisepticum and aromaticum.

**ACÉTOLEUM** (Lat.), n. n.  $A_2S(a_3k)-e_2t-o''le(le_2)-u_3m(u_4m)$ . See ACÉTOLÉ.

**ACÉTOLICUM** (Lat.), n. n.  $A_2S(a_3k)-e_2t-o''l-i_2k-u_3m(u_4m)$ . See ACÉTOLIQUE.

**ACÉTOLIQUE** (Fr.), adj. and n.  $A_3-sa-to-lek$ . Lat., *acetolicum*. It., *acetolico*. Dissolved in vinegar; a general term for pharmaceutical preparations made with vinegar. [Béral (A, 301, 306).]

**ACÉTOLOTIF** (Fr.), n.  $A_3-sa-to-lo-tef$ . Lat., *acetolotivum*. Sp., *acetolotivo*. A medicated vinegar for external use. [Béral (A, 301, 306).]

**ACÉTOLOTIVUM** (Lat.), n. n.  $A_2S(a_3k)-e_2t-o-lo''ti(te)-vu_3m(vu_4m)$ . From *acetum*, vinegar, and *lavare* (perf. part., *lotus*), to bathe. See ACÉTOLOTIF.

**ACETO LUIDE**, n.  $A_2S-e_2t-o''l-i_2d$ . From *acetic* and *tolyl*. See TOLYLACETAMIDE.

**ACETOMALONATE**, n.  $A_2S''e_2t-o-ma_2l''o_2n-at$ . Fr., *acétomalonate*. Ger., *acetalmonsäures Salz*. A double salt of acetic and malonic acids. [B.]

**ACÉTOMEL** (Fr.), n.  $A_3-sa-to-me_2l$ . It., *acetomele*. Sp., *acetomiel*. An oxymel. [Béral (A, 301).]

**ACÉTOMELLÉ** (Fr.), n.  $A_3-sa-to-me_2l-a$ . Sp., *acetomelado*. A general name for oxymels. [Béral (A, 301, 306).]

**ACETOMETER**, n.  $A_2S-e_2t-o_2m''e_2t-u_3r$ . From *acetum*, vinegar, and *μέτρον*, a measure. Lat., *acetometrum*. Fr., *acétimètre*. Ger., *Essigmesser*. Sp., *acétímetro*. A hydrometer graduated for determining the strength of commercial acetic acid according to its density. [B, 2.]

**ACETOMETRIC**, adj.  $A_2S-e_2t-o-me_2t''ri_2k$ . Fr., *acétimétrique*. Pertaining to acetometry.

**ACETOMETRY**, n.  $A_2S-e_2t-o_2m''e_2t-ri_2$ . Fr., *acétimétrie*. The process of testing commercial acetic acid with the acetometer.

**ACETOMILCHSÄURE** (Ger.), n.  $A_3''tse_2t-o-mi_2lch''zoi-re_2$ . Acetoacetic acid. [B.]

**ACETOMONOBROMANILIDE**, n.  $A_2S''e_2t-o-mo_2n''o-brom-a_2n''i_2d$ . For deriv., see ACETUM, *Mono*\*, BROMINE, and ANILINE. Fr., *acéto-monobromanilide*. Ger., *Acetomonobromanilid*. Monobromophenylacetamide (q. v., under BROMOPHENYLACETAMIDES). [B.]

**ACETON** (Ger.), n.  $A_3-tse_2t-on'$ . Acetone.

**ACETONÆMIA** (Lat.), n. f.  $A_2S(a_3k)-e_2t-on-e''(a_3'e_2)-mi_2-a_3$ . From *acetum*, acetone, and *αἷμα*, blood. Fr., *acétonémie*. Ger., *Acetonämie*. It., Sp., *acetonemia*. A morbid condition imputed to the presence of acetone in the blood. It is marked by a peculiar odor of the breath and urine and by various derangements of the nervous system; and has been thought to be the cause of diabetic coma. According to Saundby, the acetone breaks up the blood-corpuscles. [D, 3, 35.]

**ACETONAMINES**, n. pl.  $A_2S-e_2t-o_2n''(o_2n)-a_2m(a_2m')-i_2nz$ . For deriv., see ACETUM and AMINE. Fr., *acétonamines*. Ger., *Acetonamine*. It., *acetonamine*. Sp., *acetonaminas*. A series of substances acting as bases, produced by the action of ammonia on acetone. The following are known: *Diacetoneamine*, or *diacetonehydramine*,  $C_8H_{13}NO = 2C_2H_5O + NH_3 - H_2O$ ; *triacetoneamine*, or *triacetonehydramine*,  $C_8H_{17}NO = 3C_2H_5O + NH_3 - 2H_2O$  (of which compound there is one uncrystallizable isomer, called *isotriacetoneamine*; *dehydrotriacetoneamine* (the acetoneine of Heintz, and the *triacetoneamine* of Sokoloff and Tatschinoff),  $C_8H_{15}N = C_2H_5NO - H_2O$ ; *dehydrophenylacetoneamine*,  $C_{15}H_{25}N = 5C_2H_5O + NH_3 - 5H_2O$ . [B, 2.]

**ACETONAPHTHYLAMIDE**, n.  $A_2S''e_2t-o-na_2p''thi_2l-a_2m-i_2d$ . From *acetic*, *naphthyl*, and *amide*. Fr., *acéto-naphtylamide*. Ger., *Acetonaphtylamid*. See NAPHTHYLAMIDE.

**ACETONATE**, n.  $A_2S-e_2t-o_2n-at$ . Fr., *acétonate*. Ger., *Acetonat*. It., Sp., *acetonato*. A salt of acetonic acid.

**ACETONE**, n.  $A_2S''e_2t-on$ . Lat., *acetonium*. Fr., *acétone*. Ger., *Aceton*. It., *acetone*. Sp., *acetona*. Syn.: *pyroacetic spirit*, *acetyl-methyl*, *dimethyl ketone*. A colorless, mobile liquid, of pleasant odor, produced by the destructive distillation of acetates (whence

the name *pyroacetic spirit*), and of sugar, cellulose, and various organic compounds:  $C_5H_8O = C_5H_7O \cdot CH_3 = CH_3 : CO : CH_3$ . [B, 4.] It has been found in small quantities in normal urine. [Von Jaksch, "Ztschr. f. phys. Chem.," vi, p. 541 (B).] A feeble anaesthetic action has been attributed to it. [N. Guéneau de Mussy, "Bull. gén. de thérap.," May 30, 1882, p. 404.] Circulating in the blood, it gives rise to acetonaemia. The word is also used in a generic sense as synonymous with *ketone* (q. v.). [B.]—**A. alcohol.** See ACETOL.—**A. series.** See KETONE.

**ACETONECYANHYDRINS**, n. pl.  $A^{2s'e}t-o-ni''a^{2n}h'i-dri^2nz$ . From *acetone*, *cyanogen*, and *hydrogen*. Compounds of acetone with hydrocyanic acid. The following are known: *Acetonecyanhydrin*,  $C_4H_7NO = C_3H_5O \cdot CNH$ ; *diacetonecyanhydrin*,  $C_8H_{13}NO_2 = 2(C_3H_5O) \cdot CNH$ ; *monochloracetonecyanhydrin*,  $C_3H_5ClON = C_3H_4ClO \cdot CNH$ ; *tetrachloracetonecyanhydrin*,  $C_3H_2Cl_4ON_2 = C_3H_2Cl_4O \cdot C_2H_2Cl_4O \cdot CNH$ . [B, 2.]

**ACÉTONÉMIE** (Fr.), n.  $A^3sa-to-na-me$ . Acetonaemia.

**ACETONESULPHONIC ACID**, n.  $A^{2s'e}t-o-nu^3l-fu^2r^2k$ . Fr., *acide acétone-sulfonique*. Ger., *Acetonsulfonsäure*. An acid,  $C_3H_5SO_4 = CO \cdot (CH_3)(SO_3H)$  formed by the action of alkaline sulphites on dichloroacetin. [B, 2.]

**ACETONIC ACID**, n.  $A^{2s'e}t-o-ni^2k$ . Fr., *acide acétonique*. Ger., *Acetonsäure*. Butyl lactic acid (q. v.), so called because it may be regarded as acetone in which hydroxyl and the acid characteristic CO.OH replace an atom of oxygen:  $(CH_3)_2C(OH) \cdot COOH$ . [B, 4.]

**ACETONINE**, n.  $A^{2s'e}t-o-ni^2n-i^2n$ . Fr., *acétone*. Ger., *Acetonin*. 1. Dehydrotriacetoneamine (q. v. under ACETONAMINES). 2. A substance produced by the action of ammonia on acetone, incorrectly supposed by Städeler to have the composition  $C_4H_{12}N_2$ . [B, 2.]

**ACETONITRATE**, n.  $A^{2s'e}t-o-ni^2trat$ . From *acetic* and *nitrate*. Fr., *acéto-nitrate*, *acéto-azotate*. Ger., *Acetonitrat*. A double salt of acetic and nitric acids. [B, 2.]

**ACETONITRILE**, n.  $A^{2s'e}t-o-ni^2tri^2l$ . From *acetic* and *nitrile*. Fr., *acéto-nitrile*. Ger., *Acetonitril*. It., *acetoneitrilo*. Sp., *acetoneitrilo*. Syn.: *cyanide of methyl*. A colorless, inflammable liquid,  $(C_2H_5)_2N$ , or  $(CH_3)_2CN$ ; a substitution compound of nitrile,  $NO_2$ , in which a molecule of ethenyl (formerly called acetyl),  $C_2H_3$ , replaces the double oxygen atom. It has an agreeable odor, and boils at  $82^\circ C$ . It is obtained by treating acetate of ammonium or acetamide with phosphoric anhydride. [B, 2.]

**ACETONITROSE**, n.  $A^{2s'e}t-o-ni^2tros$ . Fr., *acéto-nitrose*. Ger., *Acetonitrose*. A crystalline substance,  $C_6H_7(NO_2)(C_2H_5O)_4O_8$ , prepared by the action of concentrated nitric acid on acetochlorohydrate. [B, 3.]

**ACÉTONE** (Fr.), n.  $A^3sa-to-no-me$ . Acetonaemia.

**ACETONSÄURE** (Ger.), n.  $A^3tse^2t-on'zoi're^2$ . Acetic acid.

**ACETONSULFONSAÛRE** (Ger.), n.  $A^3tse^2t-on'sul-fon'zoi-re^2$ . Acetonesulphonic acid.

**ACETONUM** (Lat.), n.  $A^{2s}(a^3k)-e^2t-o-nu^3m(nu^4m)$ . Acetone.

**ACETONURAMIC ACID**, n.  $A^{2s'e}t-o-ni^2ra^2m^2i^2k$ . From *acetone*, *urea*, and *amine*. Fr., *acide acétone-uramique*. Ger., *Acetonuraminsäure*. A monobasic acid,  $C_5H_{11}N_2O_3 = (CH_3)_2C(NH \cdot CO \cdot NH_2) \cdot COOH$ . [B, 4.]

**ACETONURIA**, n.  $A^{2s'e}t-o-ni^2ri^2a^2$ . From *acetone*, and *urine*. Fr., *acétonurie*. Ger., *Acetonurie*. It., Sp., *acetonuria*. The occurrence of acetone in the urine in abnormal amount. [R. v. Jaksch (A, 319).]

**ACETONYL**, n.  $A^{2s'e}t-o-ni^2l$ . For deriv., see ACETONE and -yl\*. Fr., *acétonyle*. Ger., *Acetonyl*. The radicle of acetone; a univalent radicle derived from acetone by the removal of one atom of hydrogen:  $CH_2 - CO - CH_3$ . [B.]—**A'chinolin** (q. v.). See *A'quinoline*.—**A'harstoff** (Ger.). See *A'urea*.—**A'quinoline**. Fr., *acétonylquinoiline*. Ger., *A'chinolin*. A substitution product of quinoline occurring under the name of golden-yellow acicular crystals, of the constitution  $C_{16}H_9N(CH_3 \cdot CO \cdot CH_3) = C_6-(H, H, H, H) \cdot N(CH_2 \cdot CO \cdot CH_3, H, H, H, H)$ . [B, 79.]—**A'urea**. Fr., *acétonylurée*. Ger., *A'harstoff*. A crystalline body,  $C_6H_5N_2O_3 = CO \cdot N_2H_5 \cdot CO \cdot C(CH_3)_2$ , formed by the union of single molecules of acetone, hydrocyanic acid, and cyanic acid. It may be regarded as a urea in which 2 atoms of hydrogen are replaced by the acetic-acid residue  $CO \cdot C(CH_3)_2$ . [B, 2.]

**ACETONYLRAMIC ACID**, n.  $A^{2s'e}t'o-ni^2l-u^2ra^2m^2i^2k$ . From *acetonyl* and *uramic*. Fr., *acide acétonyl-uramique*. Ger., *Acetonyluraminsäure*. See ACETONURAMIC ACID.

**ACETOORTHOSILICIC ANHYDRIDE**, n.  $A^{2s'e}t-o-o^2r''u^2tho-si^2l-i^2s^2i^2k$ . For deriv., see ACETIC, Ortho\*, and SILICIC. Fr., *anhydride acéto-orthosilicique*. Ger., *Orthosiliciumessigsäureanhydrid*. Syn.: *tetracetate of silicon*. A body occurring in prismatic crystals:  $Si(O \cdot C_2H_5O)_4$ . [B, 4.]

**ACETOPHENONE**, n.  $A^{2s'e}t-o-fe^2n-on'$ . From *acetic* and *phenone*. Fr., *acéto-phénone*. Ger., *Acetophenon*. Syn.: *phenyl-methylketone*. A body having the composition  $C_6H_5CO \cdot CH_3$ . [B, 2.] See PHENYLMETHYL KETONE and HYPNONE.

**ACETOPHENONIC ALCOHOL**, n.  $A^{2s'e}t-o-fe^2n-o^2n-i^2k$ . Fr., *alcool acéto-phénique*. Ger., *Acetophenonalkohol*. Secondary phenylethyl alcohol,  $C_6H_5CH(OH)CH_3$ . [B, 2.]

**ACETOPHENONINE**, n.  $A^{2s'e}t-o-fe^2n-o^2n-i^2n$ . From *acetic* and *phenone*. Fr., *acéto-phénoline*. Ger., *Acetophenin*. A base produced by the action of dry ammonia on boiling acetophenone:  $C_{24}H_{19}N$ , or  $C_{18}H_{13}N_2$ . [B, 2.]

**ACETOPHOSPHORIC ACID**, n.  $A^{2s'e}t-o-fu^2s-fu^2r^2i^2k$ . From *acetic* and *phosphoric*. See ACETYLPHOSPHORIC ACID.

**ACETOPIPERIDINE**, n.  $A^{2s'e}t-o-pi-pe^2r'i^2d-i^2n$ . See PIPERIDINE.

**ACETOPROPIONATE**, n.  $A^{2s'e}t-o-pro-pi^2o^2n-at$ . From *acetic* and *propionic*. Fr., *acéto-propionate*. Ger., *Acetopropionat*. A salt of aceto-propionic acid. The a's have the general formula  $Rx(C_2H_3O_2)_n$ , in which Rx is a radicle of the quantivalence n. [B.]

**ACETOPROPIONIC ACID**, n.  $A^{2s'e}t-o-pro-pi^2o^2n-i^2k$ . From *acetic* and *propionic*. Fr., *acide acéto-propionique*. Ger., *Acetopropionsäure*. A monobasic acid,  $CH_3CO - CH_2 \cdot CH_2 \cdot COOH = C_5H_8O_3$ , being propionic acid with an atom of its hydrogen replaced by a molecule of acetyl. [B, 4.]

**ACETOPYROPHOSPHORIC ACID**, n.  $A^{2s'e}t-o-pi''ro-fu^2s-fu^2r^2i^2k$ . For deriv., see ACETIC, Pyro\*, and PHOSPHORIC. Fr., *acide acéto-pyrophosphorique*. Ger., *Acetopyrophosphorsäure*. See ACETYLPHOSPHORIC ACID.

**ACETOPYROPHOSPHOROUS ACID**, n.  $A^{2s'e}t-o-pi''ro-fu^2s-fu^2r^2u^2s$ . From *acetic* and *pyrophosphorous*. Fr., *acide acéto-pyrophosphoreux*. Ger., *acetopyrophosphorige Säure*. Pyrophosphorous acid in which the radicle of acetic acid has replaced a molecule of hydroxyl:  $(C_2H_3O_2)(OH)_2P_2O = C_2H_5P_2O_6$ . [B, 4.]

**ACETOSA** (Lat.), n. f.  $A^{2s}(a^3k)-e^2t-o'sa^2$ . From *acetosus*, sour. Fr., *ôçalis*, *ôçalapavon* (1st def.). Fr., *oseille* (1st def.). Ger., *Sauerampfer* (1st def.). It., Sp., *acetosa*. 1. A sub-genus of plants belonging to the genus *Rumex*, comprising those of which the flowers, often dioecious or polygamous, are distinguished by the absence of tubercles upon the perianth, and by the adherence of the styles, which bear multifid stigmas, to the angles of the ovary. [B, 19.] 2. A spring in Rome, containing carbonate of calcium. [A, 319.]—**A. alpina**. See *Rumex alpinus*.—**A. arvensis**. See *Rumex acetosa*.—**A. esurina**. An old synonym of *spiritus æruginis*. [A, 325.] See *ACETUM esurinum*.—**A. nostras**, **A. officinalis**, **A. oxalidis**, **A. pratensis**. See *Rumex acetosa*.—**A. romana**, **A. rotundifolia**, **A. rotundifolia hortensis**, **A. scutata**. See *Rumex scutatus*.—**A. vulgaris**. See *Rumex acetosa*.—**Ptisana de a. composita** [Fr. Cod.]. See *Tisane d'oseille composée*.

**ACETOSALICYLIC ACID**, n. Fr., *acide acéto-salicylique*. Ger., *Acetatsalicylsäure*. Acetate of salicylic acid, a monobasic crystalline acid,  $C_9(H, H, H, H, O, C_2H_3O, CO, OH)_2 = C_9H_8O_4$ . [B, 4.]

**ACETOSALICYLIC ANHYDRIDE**, n.  $A^{2s'e}t-o-sa^2l-i^2s^2i^2k$ . From *acetic* and *salicylic*. Fr., *anhydride acéto-salicylique*. Ger., *Salicylessigsäureanhydrid*. Acetate of salicyl,  $C_7H_5O \cdot C_2H_3O_2 \cdot O$ . [B, 2.]

**ACÉTOSAMINE** (Fr.), n.  $A^3sa-tos-a^3-men$ . Diethylenediamine. [B.]

**ACETOSE**, adj.  $A^{2s'e}t-os$ . See ACETOUS.

**ACETOSELLA** (Lat.), n. f.  $A^{2s}(a^3k)-e^2t-o-se^2l'a^2$ . The wood-sorrel. See OXALIS a. — *Sal acetosellæ*. See *Salt of sorrel*.

**ACÉTOSELLÉ** (Fr.), adj.  $A^3sa-to-se^2l-la$ . Having the taste of, or resembling, sorrel. [A, 306.]

**ACETOSITY**, n.  $A^{2s'e}t-o-s^2l-i^2t-i^2$ . Fr., *acétosité*. Sp., *acetosidad*. The state of being acetous. [A, 306.]

**ACETOSODACETATE**, n.  $A^{2s'e}t-o-sod-a^2s^2e^2t-at$ . From *acetic*, *sodium*, and *acetate*. Fr., *acéto-sodacétate*. Ger., *Natracesigsäure* Salz. An acetate in which an atom of sodium replaces an atom of hydrogen. [B.]

**ACETOSODETHYLACETATE**, n.  $A^{2s'e}t-o-sod-e^2th'i^2l-i^2a^2s^2e^2t-at$ . Fr., *acéto-sodéthylacétate*. Ger., *natracesigsäure* (preceded by the name of a base). An acetate in which an atom of sodium and a molecule of ethyl replace 2 atoms of hydrogen. [B.]

**ACETOSUCCINATE**, n.  $A^{2s'e}t-o-su^3k'si^2n-at$ . From *acetic* and *succinate*. Fr., *acéto-succinate*. Ger., *acetobernsteinsäure* Salz. A double salt of acetic and succinic acids, which differ in the number of molecules of the acetic- or succinic-acid radicle which they contain. [B, 3.]

**ACETOSULPHIDE**, n.  $A^{2s'e}t-o-su^3l'i^2d$ . From *acetic* and *sulphide*. Fr., *acéto-sulfure*. Ger., *Acetosulfür*. A double salt consisting of an acetate and a sulphide of the same base. [B.]

**ACETOSULPHURIC ACID**, n.  $A^{2s'e}t-o-su^3l-fu^2r^2i^2k$ . From *acetic* and *sulphuric*. See THIACETYLENIC ACID.

**ACETOSUS** (Lat.), adj.  $A^{2s}(a^3k)-e^2t-o-su^3s(su^4s)$ . Acetous.

**ACETOSYL**, n.  $A^{2s'e}t-o-si^2l$ . Gerhardt's name for acetyl (q. v.). [B, 2.]

**ACETOTARTARIC ACID**, n.  $A^{2s'e}t-o-ta^3r-ta^3r^2i^2k$ . From *acetic* and *tartaric*. Fr., *acide acéto-tartrique*. Ger., *Acetoweinsäure*. An acid having the composition of tartaric acid in which a molecule of acetyl replaces an atom of hydrogen in one or both of the hydroxyl molecules of the acid radicle. The formulae are: *Monacetotartaric acid*,  $C_7H_7(OH) \cdot COOH = C_6H_8O_6$ ; *diacetotartaric acid*,  $C_2H_5 \cdot (C_2H_3O_2) \cdot COOH = C_8H_{10}O_8$ . [B, 4.]

**ACETOTOLUIDE**, n.  $A^{2s'e}t-o-to^3l-i^2d$ . From *acetic* and *toluene*. See TOLYLACETAMIDE.

**ACETOTRIBROMANILIDE**, n.  $A^{2s'e}t-o-tri''brom-a^2n-i^2l-i^2d$ . For deriv., see ACETUM, Tri\*, BROMINE, and ANILINE. Syn.: *tribromophenylacetamide*. See BROMOPHENYLACETAMIDES.

**ACETOUS**, adj.  $A^{2s'e}t-u^2s$ . Lat., *acetosus*. Fr., *acétueux*. Ger., *essigt*, *essigsauer*. It., Sp., *acetoso*. Relating to vinegar or its formation. [B.]—**A. acid**. Lat., *acidum acetosum*. Fr., *acide acétueux*. Ger., *Essigsäure*. It., *acido acetoso*. Sp., *ácido acetoso*. Vinegar or dilute acetic acid; formerly so called because it was supposed to be a definite compound less highly oxygenated than acetic acid. Its salts were called *acetites*. [B, 39.]

**ACETOWEINSÄURE** (Ger.), n. A<sup>3</sup>/tse<sup>2</sup>t-o-vin'zoi-re<sup>2</sup>. Acetartaric acid.

**ACETOXACETIC ACID**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-o<sup>2</sup>x<sup>2</sup>/'a<sup>2</sup>s<sup>2</sup>e<sup>2</sup>t/i<sup>2</sup>k. For deriv., see *Oxy-*\* and *Acetic*. Acetoglycollic acid. [B.]

**ACETOXYBENZAMIC ACID**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-o<sup>2</sup>x<sup>2</sup>/'i<sup>2</sup>z-be<sup>2</sup>n-zam<sup>2</sup>i<sup>2</sup>k. From *acetic* and *oxybenzamic*. See *OXYBENZAMIC ACID*.

**ACETOXYCHINOLIN** (Ger.), n. A<sup>2</sup>-tse<sup>2</sup>t-o<sup>2</sup>x-u<sup>2</sup>-ch<sup>2</sup>i<sup>2</sup>n-o-len'. Acetoxyquinoline.

**ACETOXYL**, n. A<sup>2</sup>s<sup>2</sup>-e<sup>2</sup>t-o<sup>2</sup>x/i<sup>2</sup>l. For deriv., see *Acetic*, *Oxy-*GEN, and *-yl*\*. Fr., *acétoyle*. Ger., *Acetoxyl*. Kolbe's name for acetyl, from its being supposed to be an oxide of what was formerly regarded as acetyl. [B. 2.]—**A<sup>2</sup>-amid** (Ger.), n. Acetamide. [B.]—**A<sup>2</sup>-harnstoff** (Ger.), n. Acetylurea [B.]—**A<sup>2</sup>-hydrat** (Ger.), n. Hydrate of a. (acetic acid). [B.]—**A<sup>2</sup>-isocyanür** (Ger.), n. Isocyanide of acetyl. [B.]—**A<sup>2</sup>-thioharnstoff** (Ger.), n. Acetylthiourea. [B.]

**ACETOXYLIDE**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-o<sup>2</sup>-zi/i<sup>2</sup>d. From *acetic* and *xylyl*. Fr., *acétylvide*. Ger., *Acetoxylid*. See *XYLYLACETAMIDE*.

**ACETOXYQUINOLINE**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-o<sup>2</sup>x<sup>2</sup>/'i<sup>2</sup>qui<sup>2</sup>n'o-l'i<sup>2</sup>n. From *acetic*, *oxygen*, and *quinoline*. Fr., *acétoxyquinoline*. Ger., *Acetoxychinolin*. A substitution product of oxyquinoline in which a molecule of acetyl replaces an atom of hydrogen: C<sub>8</sub>H<sub>6</sub>O(CH<sub>3</sub>-CO)N. Two isomeric bodies of this formula are known: *ortho*-a, C<sub>8</sub>H<sub>6</sub>(-H<sub>2</sub>O.CH<sub>3</sub>CO-)(-N(H<sub>2</sub>H<sub>2</sub>H<sub>2</sub>C<sub>3</sub>), a yellowish oily liquid, boiling at 280° C.; and *para*-a, C<sub>8</sub>H<sub>6</sub>(-H<sub>2</sub>O.CH<sub>3</sub>CO.H<sub>2</sub>H<sub>2</sub>)(-N(H<sub>2</sub>H<sub>2</sub>H<sub>2</sub>C<sub>3</sub>), a substance forming colorless crystals melting at from 36 to 38° C. [B. 79.]

**ACETOYL**, n. A<sup>2</sup>s<sup>2</sup>-e<sup>2</sup>t'o-i<sup>2</sup>l. Acetyl.

**ACETULMILIC ACID**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-u<sup>2</sup>l'i<sup>2</sup>mi<sup>2</sup>k. From *acetum*, *vinegar*, and *ulmus*, elm. Fr., *acide acétumlique*. An acid of the constitution C<sub>7</sub>H<sub>12</sub>O<sub>9</sub>. [B. 2.]

**ACETUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>k)-e(a)/tu<sup>2</sup>m(tu<sup>2</sup>m). From *ocere*, to turn sour (*vinum acetum* = wine that has turned sour). Gr., *ἄζος*, *ἄζιόν*. Fr., *vinagre*. Ger., *Essig*. It., *aceto*. Sp., *vinagre*. 1. Vinegar. 2. A pharmaceutical preparation made with vinegar. [B.]—**A<sup>2</sup>-acerrium**, **A<sup>2</sup>-acetosum**. Old terms for distilled vinegar. [A. 344.]—**A<sup>2</sup>-alcalissium**. An old term for normal acetate of potassium.—**A<sup>2</sup>-antihysterium**. Ger., *Mutteressig*. 1. An old mixture containing spirit of *convallaria majalis*, 2 oz.; vinegar of rue, 1 oz.; tincture of castoreum, 1 dr.; oil of lavender, 2 dr. [Ludovicus (K. 48).] 2. An acetous preparation of rue, elderberries, sagapenum, galbanum, peucedanum, castoreum, assafetida, etc. [Mysicht (B. 57).]—**A<sup>2</sup>-antilyssium**. An old acetous infusion containing chiefly southernwood, betony, and sage. [Hannemann (B. 57).]—**A<sup>2</sup>-antipepticum maravillianum**. Ger., *Pestessig*. A preparation consisting of 1 oz. of garlic juice, and 2½ oz., each, of camphor and tincture of ammonium, dissolved in 50 lbs. of vinegar. [B. 48.]—**A<sup>2</sup>-antipepticum** [Fr. Cod.]. **A<sup>2</sup>-aromaticum** [Fr. Cod.]. **A<sup>2</sup>-bezoardicum**. Fr., *vinagre antipeptique (ou aromatique, ou des quatre couleurs, ou de Marseille)*. Ger., *aromatischer Essig* [Ger. Ph.]. *Giftessig*, *Pestessig*. *Vierdrückeressig*. It., *aceto antipeptiziale*, *o aromatica*, *o profilattico*, *o bezoardico*. Syn.: *a. quatuor furum* (see *latronum*). Thieves' vinegar, vinegar of the four thieves: so called from the story of its having been used as a preventive of the plague by four men who, under pretense of nursing and succoring the sick in the great Mar-seilles epidemic of 1720-1721, robbed the sick, the dying, and the dead, and themselves escaped unharmed. One of them, having been afterward captured, was pardoned on condition of his divulging the composition of the vinegar. The original formula directed that ¼ oz., each, of wormwood tops, rosemary, sage, mint, and rue, 2 oz. of dried lavender flowers, and 2 dr., each, of garlic, sweet flag, cinnamon, cloves, and nutmeg be macerated for 12 days in 8 lbs. of the best vinegar. To the liquid, expressed and filtered, was added ¼ oz. of camphor dissolved in alcohol. The *a. antipepticum* of the Fr. Cod. is prepared after the following formula: Wormwood tops (*Artemisia absinthium*), Roman-wormwood tops (*Artemisia pontica*), peppermint, rosemary, rue, sage, lavender flowers, each 15 parts; sweet-flag root, Ceylon cinnamon, cloves, nutmeg, garlic, each 2 parts; camphor, 4 parts; glacial acetic acid, 15 parts; white vinegar, 1,000 parts. Macerate the vegetable drugs in the vinegar, in a closed vessel, for ten days; express; add the camphor, dissolved in the acetic acid; and, after a few hours, filter. The *a. aromaticum* of the Fr. Cod. consists of a filtered mixture of 125 parts of *alcoature vulnéraire* (q. v.) and 875 parts of white vinegar. The *a. aromaticum* of the Ger. Ph. is made by dissolving 1 part, each, of the oils of lavender, peppermint, rosemary, juniper, and cinnamon, and 2 parts, each, of oil of lemon and oil of cloves, in 300 parts of alcohol, and adding 480 parts of acetic acid and 1,200 parts of water. The term *a. bezoardicum* (see *BEZOAR*) has been applied to various preparations consisting of aromatics infused in vinegar and employed as antidotes to the plague. [A. 253, 306; B.]—**A<sup>2</sup>-britannicum**. Fr., *vinagre anglais*. 1. Malt vinegar. 2. (Fr. Cod.) a preparation consisting of 1,000 parts of glacial acetic acid, 100 parts of camphor, 2 parts, each, of oil of cinnamon and oil of cloves, and 1 part of oil of lavender. [A. 253; B.]—**A<sup>2</sup>-camphoratum** [Fr. Cod.]. Fr., *vinagre camphré (ou camphoré)*, *acétolé de camphre*. Ger., *Kampheressig*. It., *aceto camforato*. Sp., *vinagre alcanforado*. Camphorated vinegar; made by powdering 25 parts of camphor, with the aid of the same quantity of glacial acetic acid, and gradually adding 950 parts of white vinegar, keeping the mixture in a tightly closed bottle until solution is complete, and then filtering. [A. 253].—**A<sup>2</sup>-cardiacum**. See *a. aromaticum*.—**A<sup>2</sup>-cerevisiatum**. Vinegar. [A. 316.]—**A<sup>2</sup>-chalybeatum**. Ger., *Stahlessig*. Chalybeate vinegar; a solution of iron in vinegar or in acetic acid. [B.] See *Tinctura ferri acetatis*.—**A<sup>2</sup>-chymicorum metallicum**. An old term for a hydromel containing antimony. [A. 325.]—**A<sup>2</sup>-commune**. Vinegar. [A. 316.]—**A<sup>2</sup>-concentratum**. Fr., *vinagre concentré*. Ger., *concentrierter Essig*. Concentrated vinegar, acetic acid. [B.]—**A<sup>2</sup>-contra pestem**. "Vinegar against the plague"; an old preparation containing

wormwood, sage, rue, and turpeth. [B. 89.] Cf. *a. antisepticum*.—**A<sup>2</sup>-crudum**. Crude, or commercial, vinegar.—**A<sup>2</sup>-destillatum**. Fr., *vinagre distillé*. Ger., *destillierter Essig*. It., *aceto distillato (o bianco)*. Sp., *vinagre destilado*. Distilled vinegar. [B.]—**A<sup>2</sup>-diaphoreticum Mysichti**. Mysicht's diaphoretic vinegar; an old preparation made by bruising together 1 oz., each, of sassa-parilla root and *Smilax china*, 6 dr. of sassafras wood, ¼ oz. of elderflowers, 2 dr. of cassia, and a sufficient quantity of distilled wine vinegar. [B. 57].—**A<sup>2</sup>-emetium**. Lémery's name for acetate of antimony. [A. 344.]—**A<sup>2</sup>-empyreumaticum**. Wood vinegar. See *PYROLIGNEOUS ACID*.—**A<sup>2</sup>-esurinum**. Syn.: *acetosa esurina*, *spiritus æuginis*. Lit., "hungry vinegar" (*esurire*, to be hungry), from its creating an appetite; an old preparation made by distilling vinegar and verdigris. [A. 325, 343, 344.]—**A<sup>2</sup>-gallium**. French, or wine, vinegar. [B.]—**A<sup>2</sup>-glaciale**. Glacial acetic acid. [A. 344.]—**A<sup>2</sup>-lenitivum Prævoiti**. Prevost's lenitive vinegar; an old preparation containing cream of tartar and cinnamon. [B. 89.]—**A<sup>2</sup>-lignorum**. Wood vinegar. See *PYROLIGNEOUS ACID*.—**A<sup>2</sup>-lithargyrites**. Vinegar of litharge; an old preparation, consisting of a solution of subacetate of lead, made by digesting 4 oz. of litharge in a pint of the strongest vinegar, over a sand-bath, for three days, with occasional agitation. Diluted, it was used as a lotion for burns, bruises, etc., and given internally as a hæmostatic, as a preventive of impending gangrene, and to cure cancers. [A. 336, 344.]—**A<sup>2</sup>-medicatum**. Fr., *vinagre médicinal*, *acétolé*. Ger., *medicinhcher Essig*, *Arzneiessig*, *Krütteressig*. It., *aceto medicinale*, *acétoléo*. Sp., *vinagre medicinal*. A medicated vinegar.—**A<sup>2</sup>-mithridaticum**. Mithridatic vinegar; an old preparation containing a great number of aromatics. [Mysicht (B. 57).] Cf. *a. antisepticum*.—**A<sup>2</sup>-mulsum**. From *mulcere*, to sweeten. A mixture of vinegar and honey. [A. 312.]—**A<sup>2</sup>-mulsum dulce**. See *OXYMULSUM*.—**A<sup>2</sup>-myrrhatum** [Mysicht]. Vinegar with myrrh; an old aromatic vinegar containing myrrh, used as a preventive of pestilential diseases. [B. 89.]—**A<sup>2</sup>-odoratum**. A perfumed vinegar, mentioned in an old Wurtemberg dispensatory. [B. 57.]—**A<sup>2</sup>-philosophicum**, **A<sup>2</sup>-philosophorum**. Gr., *φίλοσοφος*. Philosophers' vinegar; an alchemical preparation distilled from honey. [A. 333.] See also *Aqua mercurialis* and *Lac virginum*.—**A<sup>2</sup>-plumbicum**. See *Liquor PLUMBI subacetatis*.—**A<sup>2</sup>-prophylacticum**. See *a. antisepticum*.—**A<sup>2</sup>-purificatum**, **A<sup>2</sup>-purum**. Syn.: *a. destillatum*. Purified vinegar; the *acidum aceticum dilutum* of the U. S. Ph. [B.]—**A<sup>2</sup>-purum concentratum**. Acetic acid.—**A<sup>2</sup>-pyrolignosum**. Ger., *Holzessig*. Pyroligneous acid or wood vinegar.—**A<sup>2</sup>-pyrolignosum crudum** [Ger. Ph.]. Ger., *roher Holzessig*. Crude pyroligneous acid.—**A<sup>2</sup>-pyrolignosum rectificatum** [Ger. Ph.]. Ger., *rectificirter Holzessig*. Rectified pyroligneous acid.—**A<sup>2</sup>-quatuor furum**, **A<sup>2</sup>-quatuor latronum**. Four thieves' vinegar. See *a. antisepticum*.—**A<sup>2</sup>-radicale**, **A<sup>2</sup>-radicatum**. Fr., *vinagre radical*. Ger., *Radikaleessig*. It., *aceto radicale*. Sp., *vinagre radical*. See *RADICAL VINEGAR*.—**A<sup>2</sup>-rhizoticum** [Mysicht]. Mysicht's rhizotic vinegar, so called from its being made largely from roots; an old aromatic preparation used as a preventive and curative of pestilential diseases. [B. 89.]—**A<sup>2</sup>-rosatum**. Fr., *vinagre rosé*. Ger., *Rosenessig*. It., *aceto rosato*. An infusion of 1 part of red-rose petals in 12 parts of red vinegar; used in astringent injections. [A. 321.]—**A<sup>2</sup>-saturum**, **A<sup>2</sup>-saturinum**. Vinegar of lead. See *Liquor PLUMBI subacetatis*.—**A<sup>2</sup>-scilliticum** [Fr. Cod.]. **A<sup>2</sup>-squilliticum**. See *A<sup>2</sup>-SCILLE*.—**A<sup>2</sup>-stillatum**. Distilled vinegar. [B.]—**A<sup>2</sup>-theriacale**. A preparation containing vinegar and treacle. Mysicht's treacle vinegar (*a. theriacale Mysichti*) was made by digesting 1 oz. of Venice treacle; ¼ oz., each, of elks' horns "spagyrically calcined," juniper berries, and seeds of *Carduus benedictus*; 2 dr., each, of vervain, scordium, and rue; ¼ dr., each, of red myrrh and citron peels; 1 dr., each, of the roots of tormentil and angelica, zedoary, and "butter bur." ¼ dr., each, of camphor, aloes-wood, and mace, in a sufficient quantity of marigold vinegar. [B. 89.]—**A<sup>2</sup>-vini**. Wine vinegar.—**A<sup>2</sup>-vini concentratum**, **A<sup>2</sup>-vini radicale**. Acetic acid. [A. 344.]—**A<sup>2</sup>-vomitorium Mysichti**. Mysicht's emetic vinegar; made from the roots of *Thapsia* and *Asarum* and the seeds of *Carthamus* and cinnamon, distilled with white vinegar; formerly esteemed as "a sweet and gentle vomit." [B. 89.]—**A<sup>2</sup>-zedoarticum Mysichti**. Mysicht's zedoartic vinegar; an old preparation containing zedoary used against poisons and pestilential diseases. [B. 89.]—**Syrupum cum aceto** [Fr. Cod.]. See *Sirap de VINAIGRE*.—**Syrupum cum aceto rubi idæi** [Fr. Cod.]. See *Sirap de VINAIGRE framboise*. For other preparations made with vinegar, see under the drugs that figure in their titles.

**ACETUREID, ACETUREIDE**, n. A<sup>2</sup>s<sup>2</sup>-e<sup>2</sup>t-u<sup>2</sup>r'e-i<sup>2</sup>d. See *ACETYLUREA*.

**ACETURIC ACID**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-u<sup>2</sup>r'i<sup>2</sup>k. From *acetic* and *uric*. Fr., *acide acéturique*. Ger., *Acetursäure*. See *Acetyl GLYCOCINE*.

**ACETURIDE** (Fr.), n. A<sup>2</sup>-sa-tu<sup>2</sup>-red. Acetamide. [A. 324.]

**ACETURSÄURE** (Ger.), n. A<sup>2</sup>-tse<sup>2</sup>t-ur'zoi-re<sup>2</sup>. Aceturic acid. See *Acetyl GLYCOCINE*.

**ACETUS** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>k)-e(a)/tu<sup>2</sup>s(tu<sup>2</sup>s). See *ACETUS*.

**ACETVANILLIC ACID**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-va<sup>2</sup>n-i<sup>2</sup>l'i<sup>2</sup>k. From *acetic* and *vanillil*. Fr., *acide acéto-vanillique*. Ger., *Acetvanillin*. An acid produced artificially by the oxidation of acetogenol, and capable of conversion into vanillin by treatment with caustic potash. Used as a source of vanillin. [B. 81.]

**ACETYL, ACETYLE**, n. A<sup>2</sup>s<sup>2</sup>/e<sup>2</sup>t-i<sup>2</sup>l. For deriv., see *ACETUM* and *-yl*\*. Fr., *acétyle*. Ger., *Acetyl*. It., *acetilo*. Syn.: *acetoxy*, *acetosyl* [Gerhardt], *acetoxyl* [Kolbe], *othyl*. A radicle (old formula, C<sub>2</sub>H<sub>3</sub>O<sub>2</sub>; new formula, C<sub>2</sub>H<sub>3</sub>O), not yet isolated, but supposed to exist in acetic acid and its derivatives. Formerly the name was applied to a different radicle, C<sub>2</sub>H<sub>3</sub> or C<sub>2</sub>H<sub>5</sub> (old system). [B. 2.]—**A<sup>2</sup>-acetate**. Acetic anhydride.—**A<sup>2</sup>-chloride**. Acetic chloride.—**A<sup>2</sup>-hydrate**. Fr., *hydrate d'acétyle*. Ger., *Acetorhydrat*. Acetic acid. [B.]—**A<sup>2</sup>-hydride**. Acetic aldehyde.—**A<sup>2</sup>-isocyanide**.

Fr., isocyanide d'acétyle. Ger., *Acetoxylisocyanür*. Syn.: *acetic isocyanide*, *cyanacetyl*. A liquid,  $(C_2H_5O) - N \equiv C$ , boiling at 93° C. There is a polymeric form which is a crystalline solid. [B, 4.]—**A. nitrides**. See **ACETANIDE**, **DIACETAMIDE**, and **ETHYLACETAMIDE**.—**A. oxide**, *Acetic anhydride*.—**A. picrate**, *Acetic picrate*,  $C_6H_5O(NO_2)_3$ ; a yellowish-white crystalline powder. [B, 2.]—**A. sulphide**, *A. sulphhydrate*, *Acetic sulphide*, *thiacetic anhydride*,  $(C_2H_5O)_2S$ . [B, 2.]—**A. trihydrate**, *Fr., trihydrate d'acétyle*. Ger., *Acetyltrihydrat*. A liquid,  $CH_3C(OH)_3 = C_2H_5O_3$ , formed by adding water to acetic acid until the resulting liquid has a sp. gr. of 1.079.

**ACETYLALDEHYD** (Ger.), n.  $A^3tse^2t-u^1/a^3l-da-hed'$ . *Acetic aldehyde*.

**ACETYLAMINE**, n.  $A^2s'e^2t-i^2l/a^2m-i^2n$ . From *acetyl* and *amine*. Fr., *acetylamine*, *acétosamine*. Ger., *Acetylamin*. See **DIETHYLENEDIAMINE**.

**ACETYLAMMONIUM**, n.  $A^2s'e^2t-i^2l-a^2m-mo'ni^2-u^3m$ . From *acetyl* and *ammonium*. See **AMMONIUM ALDEHYDE** and **ALDEHYD-AMMONIA**.

**ACETYLAMYGDALANILIDE**, n.  $A^2s'e^2t-i^2l-a^2m-i^2g'da^2l-a^2n'i^2l-i^2d$ . For deriv., see **ACETYL**, **AMYGDALIN**, and **ANILIDE**. Fr., *acetylamygdalanilide*. Ger., *Acetylamygdalanilid*. A derivative formed from amygdalanilide by the substitution of one or more molecules of acetyl for hydroxyl. [B, 2.]

**ACETYLAMYL**, n.  $A^2s'e^2t-i^2l-a^2m-i^2l$ . From *acetyl* and *amyl*. Fr., *acetylmyl*. Ger., *Acetylmyl*. An addition product of acetyl and amyl,  $C_7H_{14}O = C_2H_5O.C_5H_{11}$ . [B, 2.]

**ACETYLANILINE**, n.  $A^2s'e^2t-i^2l-a^2n'i^2l-i^2n$ . From *acetyl* and *aniline*. Fr., *acétylaniline*. Ger., *Acetylanilin*. A substance of alkaline reaction, produced by the action of Dutch liquid (ethylene dichloride) on aniline at a temperature of 200° C. [B, 38.]

**ACETYLANTHRAFLAVIC ACID**, n.  $A^2s'e^2t-i^2l-a^2n''-thra^3-fla^1v'ik$ . From *acetyl* and *anthraflavic*. Fr., *acide acétyl-anthraflavique*. See **DIACETOANTHRAFLAVIC ACID**.

**ACETYLBARBALOIN**, n.  $A^2s'e^2t-i^2l-ba^3r'h''a^2l-o'i^2n$ . From *acetyl* and *barbaloin*. Fr., *acetyl-barbaloin*. Ger., *Acetylbarbaloin*. A substitution compound of acetyl and barbaloin; a curdy, yellowish-white mass, to which the following formulae have been assigned by different analysts:  $C_{14}H_{15}(C_2H_5O)_3O_7$ ;  $C_{17}H_{18}(C_2H_5O)_3O_7$ ; and  $C_{15}H_{13}(C_2H_5O)_3O_7$ .

**ACETYLBIOXYAMID** (Ger.), n.  $A^3tse^2t-u^1/be-o^2x-u^4d''-a^3m-ed'$ . *Acetamide*.

**ACETYLCARBERINS**, n. pl.  $A^2s'e^2t-i^2l-ka^3rb'u^5r-i^2nz$ . From *acetyl* and *carberin*. Fr., *acétyl-carberines*. Ger., *Acetylcerberine*. See **CARBERINS**.

**ACETYLCHLORALAMMONIAS**, n. pl.  $A^2s'e^2t-i^2l-klo''-ra^2l-a^2m-mo'ni^2-a^2z$ . From *acetyl*, *chloral*, and *ammonia*. Bodies formed by the substitution of 1 or 2 molecules of acetyl for hydrogen in chloralalmonia (trichlorethylene hydramine). The two following are known: *Monooacetylchloralalmonia*,  $C_2H_3(C_2H_5O)Cl_2ON$ ; *diacetylchloralalmonia*,  $C_2H_3(C_2H_5O)_2Cl_2ON$ . [B, 2.]

**ACETYLDIAMINE**, n.  $A^2s'e^2t-i^2l-di^2l-a^2m-i^2n$ . From *acetyl* and *diamine*. See **ACEDIAMINE**.

**ACETYLDIPHENYLAMINE**, n.  $A^2s'e^2t-i^2l-di''fe^2n-i^2l/a^2m-i^2n$ . For deriv., see **ACETYL**, **Di-**, and **PHENYLAMINE**. Fr., *acétyldiphénylamine*. Ger., *Acetyldiphénylamin*. Diphenylamine with 1 atom of its hydrogen replaced by a molecule of acetyl:  $C_{14}H_{13}ON = N(C_6H_5)_2(C_2H_5O)$ . It acts as a base. [B, 2.]

**ACETYLE**, n.  $A^2s'e^2t-i^2l$ . *Acetyl*.

**ACÉTYLE** (Fr.), n.  $A^2s-sa-tel$ . *Acetyl*.

**ACETYLEN** (Ger.), n.  $A^3tse^2t-i^2l-e^2n'$ . *Acetylene*.—**A'dibromür**, **A'dichlorür**, **A'diodür**, **A'dijodür**, **A'tetrabromür**, **A'tetrachlorür**. See **ACETYLENE DIBROMIDE**, **dichloride**, **diodide**, **tetrabromide**, and **tetrachloride**.

**ACETYLENE**, n.  $A^2s'e^2t-i^2l-en$ . For deriv., see **ACETYL** and **-ene**. Fr., *acétylène*. Ger., *Acetylen*, *Aethin*. It., *acetilene*. Sp., *acetileno*. Syn.: *ethine*. A gaseous hydrocarbon,  $C_2H_2 = CH \equiv CH$ , and so having the same relation to the acetyl of the older writers ( $C_2H_3$ ) that ethylene and methylene have to ethyl and methyl; a colorless, inflammable gas, of very disagreeable odor, which can be prepared by the direct synthesis of its elements in the electric arc. [B, 4.] It has various polymeric modifications, which are derived from it by the action of heat, such as: *diacetylene*,  $C_4H_4$ ; *triacetylene*, or benzene,  $C_6H_6$ ; *tetracetylene*, styrol, or cinnamene,  $C_8H_8$ ; *pentacetylene*, or naphthalene hydride,  $C_{10}H_{10}$ ; and *eneacetylene*, or retene,  $C_{18}H_{18}$ . [B, 2.]—**A. bromides**. These include the *dibromide*, the *tetrabromide*, and the *hydrobromide*,  $C_2H_2.HBr$  (all of which are addition products); and one substitution product, *bromoacetylene*,  $C_2HBr$ , with its dibromide,  $C_2HBr.Br_2$ . [B, 2.]—**A. bromiodide**. See **A. iodides**.—**A. chlorides**. These are the *dichloride*,  $C_2H_2.Cl_2$ ; the *chlorinated dichloride*,  $C_2HCl.Cl_2$ ; and the *tetrachloride*,  $C_2H_2.Cl_4$ . [B, 2.]—**A. dibromide**. Fr., *dibromure d'acétylène*. Ger., *Acetylendibromür*. A liquid having the constitution  $CHBr \equiv CHBr = C_2H_2Br_2$ . [B, 4.]—**A. dichloride**. Fr., *dichlorure d'acétylène*. Ger., *Acetylendichlorür*. A colorless liquid,  $CHCl \equiv CHCl = C_2H_2Cl_2$ , isomeric, and apparently identical, with dichlorethylene. [B, 4.]—**A. dihydriodide**. See **A. iodides**.—**A. diiodide**. Fr., *diodure d'acétylène*. Ger., *Acetylendiiodür*. A crystalline solid,  $CHI \equiv CHI = C_2H_2I_2$ . [B, 4.]—**A. iodides**. They include the *diodide*; the *monohydriodide*,  $C_2H_2.HI$ ; and the *dihydriodide*,  $C_2H_3.(HI)_2$  (addition products); and the following substitution products: *iodoacetylene*,  $C_2HI$ ; *diiodoacetylene*,  $C_2HI_2$ , the *tetraiodide*,  $C_2HI_4 = C_2H_2.C_2I_4$ , or  $(C_2HI_2)_2$ ; and the *bromiodide*,  $C_2Br_3I_3 = (C_2Br_3I_2).HBr$ , formed from the tetraiodide by substituting 2 atoms of bromine for 2 of hydrogen, and 1 of bromine for 1 of iodine. [B.]—**A.-haemoglobin**. See under **HAEMOGLOBIN**.—**A.**

**hydrobromide**. See **A. bromides**.—**A. monohydriodide**. See **A. iodides**.—**A. series**. See **ALKYLIDENE series**.—**A. tetrabromide**. Fr., *tétrabromure d'acétylène*. Ger., *Acetylentetrabromür*. A liquid having the constitution  $CHBr_2 \equiv CHBr_2 = C_2H_2Br_4$ . [B, 4.]—**A. tetrachloride**. Fr., *tétrachlorure d'acétylène*. Ger., *Acetylentetrachlorür*. A colorless liquid,  $CHCl_2 \equiv CHCl_2 = C_2H_2Cl_4$ , isomeric, and apparently identical, with dichlorethylene dichloride. [B, 4.]—**A. tetraiodide**. Fr., *tétraiodure d'acétylène*. Ger., *Acetylentetraiodür*. See **A. iodides**.—**Chlorinated A. dichloride**. See **A. chlorides**.

**ACETYLENETRIPHENYLTRIAMINE**, n.  $A^2s'e^2t/i^2l-en-tri-fe^2n''/i^2l-tri'a^2m-i^2n$ . For deriv., see **ACETYLENE**, **Tri-**, **PHENYL**, and **AMINE**. Fr., *acétylénétriphényltri-amin*. Ger., *Acetylenetriphenyltriamin*. A crystalline body,  $NC_6H_5 \langle CH - N(C_6H_5)H \rangle$  having the constitution of a triple molecule of ammonia in which 3 molecules of phenyl and 1 molecule of acetylene replace 7 atoms of hydrogen. [B.]

**ACETYLFLAVENOL**, n.  $A^2s'e^2t-i^2l-fla^1ve^2n-o^2l$ . From *acetyl* and *flavenol*. Fr., *acétylflavénol*. Ger., *Acetylflavenol*. A substitution compound of flavenol in which a molecule of acetyl ( $CH_3CO$ ) replaces an atom of hydrogen:  $C_{17}H_{15}NO_2 = C_6H_5.C_6H_4.O(CH_3CO).CH_3.N$ . It forms long acicular crystals, melting at 128° C. [B, 79.]

**ACETYLLIA** (Lat.), n. f.  $A^2s(a^3k)-e^2t-i^2l(u^1)/i^2-a^3$ . An old term for diethylenediamine (acetylamine). [B, 7.]

**ACETYLLIAC**, n.  $A^2s'e^2t-i^2l/i^2-a^2k$ . Fr., *acétyliaque*. A name given by Cloëz to a base which he obtained by the action of ammonia on ethylene dibromide, and to which he assigned the formula  $N(C_2H_5)_2H_2$ , i. e., that of ammonia with 1 atom of hydrogen replaced by acetyl ( $C_2H_3$ ); probably the same as diethylene diamine or its hydrate. [B, 3.]

**ACETYLLIDE**, n.  $A^2s'e^2t/i^2l-i^2d$ . From *acetylene*. Fr., *acétylure*. Ger., *Acetylid*. 1. A substitution compound of a metal with acetylene. Most of the a's are explosive when brought into contact with water. [B, 3.] 2. A name applied by Tommasi and Quesneville to a body having the constitution  $C_4H_5O_4 = C_2H_5O(C_2H_2)_2O = C_2H_5O.(C_2H_2)_2O$ . [B, 2.]

**ACETYLLITE**, n.  $A^2s'e^2t/i^2l-it$ . Fr., *acétylité*. Ger., *Acetylilit*, *aldehydsäures Salz*. A salt of acetylous acid. [B, 2.]

**ACETYLMETHYL**, n.  $A^2s'e^2t-i^2l-me^2th/i^2l$ . From *acetyl* and *methyl*. Fr., *acétylméthyle*. Ger., *Acetylmethyl*. See **ACETONE**.

**ACETYLNAPHTHALIN**, n.  $A^2s'e^2t-i^2l-na^2p(na^2f)/tha^2l-i^2n$ . From *acetyl* and *naphthalin*. Fr., *acétylnaphtaline*. Ger., *Acetylnaphtalin*. See **ACENAPHTHENE**.

**ACETYLNAPHTHALENE**, n.  $A^2s-et'/i^2l-o-na^2p(na^2f)/tha^2l-en$ . From *acetyl* and *naphthalene*. Fr., *acétylnaphtalène*. Ger., *Acetylnaphtalene*. See **ACENAPHTHENE**.

**ACETYLOUS ACID**, n.  $A^2s'e^2t/i^2l-u^3s$ . From *acetyl*. Fr., *acide acétyleux*. Ger., *Aldehydsäure*. Syn.: *aldehydic* or *etheric*, or *lamic* acid. An acid supposed to be produced by the slow combustion of ether or of alcohol, or under certain circumstances, by the oxidation of aldehyde. It has also been thought to be a mere mixture of aldehyde and acetic acid. [B, 2.]

**ACETYLOXAMETHANE**, n.  $A^2s'e^2t-i^2l-o^2x''a^3-me^2th-an'$ . From *acetyl* and *oxamethane*. Fr., *acétyl-oxaméthane*. Ger., *Acetyloxamethan*. See **OXAMETHANE**.

**ACETYLOXYD** (Ger.), n.  $A^3tse^2t-u^1-o^2x''u^4d$ . Anhydrous acetic acid.—**A'hydrat**. *Acetic acid*. [B.]

**ACETYLPHOSPHORIC ACID**, n.  $A^2s'e^2t-i^2l-fo^2s-fo^2r/i^2k$ . From *acetyl* and *phosphoric*. Fr., *acide acétyl-phosphorique*. Ger., *Acetylphosphorsäure*. Syn.: *aceto-phosphoric acid*. A monobasic acid,  $PO(O.C_2H_5O)_2.OH = C_4H_7PO_4$ ; being phosphoric acid in which 2 molecules of acetyl replace 2 atoms of hydrogen. [B, 38.]

**ACETYLPYPERIDINE**, n.  $A^2s'e^2t-i^2l-pi-pe^2r'i^2d-en$ . From *acetyl* and *pyperidine*. Fr., *acétyl-pipéridine*. Ger., *Acetylpyperidin*. An artificial alkaloid,  $C_8H_9N.H_2(CH_3CO) = C_7H_9NO$  is piperidine in which a molecule of acetyl ( $CH_3CO$ ) replaces an atom of hydrogen; a liquid boiling at 224° C. [B, 79.]

**ACETYLPYROPHOSPHORIC ACID**, n.  $A^2s'e^2t-i^2l-pi''-ro-fo^2s-fo^2r/i^2k$ . From *acetyl* and *pyrophosphoric*. Fr., *acide acétyl-pyrophosphorique*. Ger., *Acetylpyrophosphorsäure*. Syn.: *acetonpyrophosphoric acid*. A tribasic acid  $(C_2H_5O)_3P_2O_5 = C_6H_9P_2O_8$ , derived from pyrophosphoric acid by the replacement of hydroxyl by the radicle of acetic acid. [B, 4.]

**ACETYLPYRROL**, n.  $A^2s'e^2t-i^2l-pi^2r-ro^2l$ . From *acetyl* and *pyrrol*. Fr., *acétyl-pyrrol*. Ger., *Acetylpyrrol*. A liquid, of peculiar odor,  $C_4H_7NO = C_4H_4N(C_2H_5O)$ ; being pyrrol with 1 atom of its hydrogen (the one which is directly combined with the nitrogen) replaced by acetyl. [B, 3.] See also **PSEUDOACETYLPYRROL**.

**ACETYLSÄURE** (Ger.), n.  $A^3tse^2t-u^1-zoi-re^2$ . *Acetic acid*. [B.]

**ACETYLSCHWEFELHARNSTOFF** (Ger.), n.  $A^3tse^2t-u^1-shwa''fe^2l-ha^3rn'sto^2f$ . *Acetylthiourea*.

**ACETYSULPHUREA**, n.  $A^2s'e^2t-i^2l-su^3l-fu^2-re^2a^3$ . From *acetyl*, *sulphur*, and *urea*. Fr., *acétyl-sulfurée*. Ger., *Acetylschwefelharnstoff*. See **ACETYLTHIOUREA**.

**ACETYLTETRAHYDROQUINOLINE**, n.  $A^2s'e^2t-il-te^2t''-ra^3-hi''dro-kwi^2n'o-len$ . From *acetyl* and *tetrahydroquinoline*. Fr., *acétyltétrahydroquinoléine*. Ger., *Acetyltetrahydrochinolin*. A colorless liquid, boiling at 255° C, having the constitution of tetrahydroquinoline in which 1 of the added hydrogen atoms is replaced by a molecule of acetyl:  $C_9H_7N.H_3(CH_3CO) = C_{11}H_{13}NO$ . [B, 79.]

**ACETYLTHIOUREA**, n.  $A^2s'e^2t-i^2l-thi''o-u^3-re^2a^3$ . From *acetyl* and *thiourea*. Fr., *acétyl-thio-urée*. Ger., *Acetylthioharnstoff*. Syn.: *acetylsulphurea*. A body occurring in the form

of prismatic crystals, consisting of thiourea (sulphurea) in which a molecule of acetyl replaces an atom of hydrogen:  $\text{CSN}_2\text{H}_2(\text{C}_2\text{H}_5\text{O}) = \text{C}_2\text{H}_5\text{N}_2\text{SO}$ . [B.]

**ACETYLTRIETHYL ETHER**, n.  $\text{A}^2\text{s}''\text{e}^2\text{t}-\text{i}^2\text{l}-\text{tri}''\text{e}^2\text{th}^2\text{l}$ . From *acetyl* and *triethyl*. Fr., *éther acétyle-triéthylque*. Ger., *Acetyltriäthyläther*. See *ETHYL*, *orthoacetate*.

**ACÉTYLURE** (Fr.), n.  $\text{A}^2\text{s}-\text{sa}-\text{ti}^2\text{l}-\text{u}^2\text{r}$ . An acetylure. [B.]

**ACÉTYLUREA**, n.  $\text{A}^2\text{s}''\text{e}^2\text{t}-\text{i}^2\text{l}-\text{u}^2\text{r}-\text{e}^2\text{a}$ . From *acetyl* and *urea*. Fr., *acétylurée*. Ger., *Acetozyharinstoff*. A body occurring in the form of acicular crystals, consisting of urea in which an atom of hydrogen is replaced by a molecule of acetyl:  $\text{CON}_2\text{H}_2(\text{C}_2\text{H}_5\text{O}) = \text{C}_5\text{O}_2\text{N}_2\text{H}_6$ . [B., 4.]

**ACÉTYLURETHANE**, n.  $\text{A}^2\text{s}''\text{e}^2\text{t}-\text{i}^2\text{l}-\text{u}^2\text{r}-\text{e}^2\text{th}-\text{an}^2$ . From *acetyl* and *urethane*. Fr., *acétyl-uréthane*. Ger., *acetylurethane*. See *URETHANE*.

**ACÉTYLWASSERSTOFF** (Ger.), n.  $\text{A}^3''\text{tse}^2\text{t}-\text{i}^2\text{l}-\text{va}^2\text{s}^2\text{e}^2\text{r}-\text{sto}^2\text{f}$ . Aldehyde.

**ACÉTYLZANALAIN**, n.  $\text{A}^2\text{s}''\text{e}^2\text{t}-\text{i}^2\text{l}-\text{za}^2\text{n}''\text{a}^2\text{l}-\text{o}^2\text{i}^2\text{n}$ . From *acetyl* and *zanalain*. Fr., *acétyle-zanalaine*. Ger., *Acetylzanalain*. A substitution compound of acetyl and zanalain; a yellow, amorphous mass having the formula (according to one view of the constitution of zanalain)  $\text{C}_{16}\text{H}_{16}(\text{C}_2\text{H}_5\text{O})_3\text{O}_7$ . [B., 2.]

**ACEYTE** (Sp.), n.  $\text{A}^3\text{-tha}^2\text{-e}^2\text{-ta}$ . See *ACEITE*.

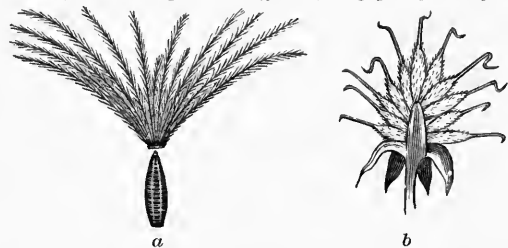

**ACHACANA** (Sp.), n.  $\text{A}^3\text{-cha}^2\text{-ka}^2\text{-na}^2$ . A local name for one or more species of cactus of the genus *Cereus* [De Candolle], the root (or, according to some authors, the fruit) of which is eaten in Peru. [A., 321, 348.]

**ACHAEMENTIS** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{e}^2)-\text{me}^2\text{n}-\text{i}^2\text{s}$ . Gr., *ἀχαμένις*. Gen., *achamenyidos* (-dis). A fabulous plant of the ancients, the same as the *ἰπποφοβίας* (meaning fear of horses); regarded by Fée as a variety of *Euphorbia*, or else as a solanaceous plant. [A., 311, 312; Waring (A., 316).]

**ACHÆNA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{e}^2)-\text{na}^2$ . See *ACHENIUM*.

**ACHÆNE**, n.  $\text{A}^3\text{-ken}^2$ . See *ACHENIUM*.

**ACHENIUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{e}^2)-\text{ni}^2-\text{u}^2\text{m}(\text{u}^4\text{m})$ . Written also *achenium* (on the theory of its being derived from *ἀχην*, poor). From a priv., and *χαίρειν*, to gape. [A., 347.] Fr.,

*achaine*, *achène*, *akène*. Ger., *Achene*. It., *acheno*. In botany, an achene; a fruit consisting of a dry, indehiscent pericarp separated from the single seed which it contains. [B.] In the cut, a shows an a. with one ovary, and b one with several ovaries. [A., 304.]

**ACHAHI**, n. See *ACHAI*.

**ACHAINA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2(\text{a}^3\text{i}^2\text{n})-\text{a}^2$ . See *ACHÆNIUM*.

**ACHAINE** (Fr.), n.  $\text{A}^3\text{-ke}^2\text{n}$ . An achenium. — **A. aigretté**. One surmounted by an aigrette (q. v.).

**ACHAINUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2(\text{a}^3\text{i}^2\text{n})-\text{u}^2\text{m}(\text{u}^4\text{m})$ . See *ACHENIUM*.

**ACHALYBÆMIA**, **ACHALYBHÆMIA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2(\text{a}^3\text{l})-\text{i}^2\text{l}(\text{u}^2\text{b})-\text{e}^2(\text{a}^3\text{e}^2)-\text{mi}^2-\text{a}^2$ . — *he* (ha<sup>2</sup>e<sup>2</sup>) — *mi* — *a*. From a priv., *χάλυψ*, steel, and *αἷμα*, blood. Fr., *achalybémie*. It., *acalbemia*. Fiorry's term for a deficiency of iron in the blood. [A., 250.]

**ACHÆNOCARP**, n.  $\text{A}^2\text{k}-\text{e}^2\text{n}^2\text{o}-\text{ka}^2\text{rp}$ . From a priv., *χαίρειν*, to gape, and *καρπός*, a fruit. An achenium. [Gray, B., 39.]

**ACHAMELLA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2-\text{me}^2\text{l}-\text{la}^2$ . See *ACMELLA*.

**ACHANACA**, n. An African name for a plant the leaves and fruit of which are used by the natives of the kingdom of Mély as a sudorific in the treatment of venereal diseases. [Lémery (A., 344).]

**ACHAOVAN**, n. Written also *achaoavan*. The Egyptian name of a plant, supposed to be a species of *Matricaria*, used in the treatment of jaundice. [A., 321.] — **A. Abat**. The name under which Prosper Alpinus speaks of a plant which grows about Cairo, used by the Egyptians in diseases of women; supposed to be the *Senecio cineraria* [De Candolle] (*Cineraria maritima* [Linnaeus]). [A., 321.]

**ACHAR**, n. Written also *atchar*, *attchar*, *atsiaar*, *aichar*, *achard*, and *atschi*. Ger., *indischer Pökel*. A Malay name applied in India to a condiment made of various plants with vinegar, capsicum, and other aromatics. [A., 323.] In Europe the term is applied to various sorts of pickles. [A., 344.]

**ACHARD**, n. See *ACHAR*.

**ACHARISTON**, **ACHARISTUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2-\text{ri}^2\text{s}-\text{to}^2\text{n}$ ,  $-\text{tu}^2\text{m}(\text{u}^4\text{m})$ . Neut. of adj. *acharistos* (*medicamentum* understood). Gr., (φάρμακον) ἀχάριστον (*acháristos*, thankless). In Galen's time, a certain antidote of very speedy action; in the middle ages, a medicine that cured so promptly as to be unprofitable to the physician — hence a thankless drug. [A., 322.]

**ACHASCOPHYTE**, n.  $\text{A}^2\text{k}-\text{a}^2\text{s}-\text{ko}-\text{fit}$ . From a priv., *χάσκειν*, to gape, and *φυτόν*, a plant. Fr., *achascophyte*. A plant of which the fruit is indehiscent. [Necker (A., 316).]

**ACHATES** (Lat.), n. m. and f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2(\text{a}^3\text{i}^2\text{z})-\text{tas}$ . Gr., *ἀχάτης*. The agate (so called from its having been first found in the Sicilian river of that name); anciently esteemed as an antidote to poisons, especially that of the viper. [A., 325, 348.]

**ACHATINUS** (Lat.), adj.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{a}^2(\text{a}^3\text{i}^2)-\text{e}^2(\text{e}^2\text{nu}^2\text{s}(\text{nu}^4\text{s}))$ . Agate-like. See *FAVUS* A. [G.]

**ACHATIUSQUELLE**, **ACHAZBAD**, **ACHAZQUELLE** (Ger.), n's.  $\text{A}^3\text{-ch}^2\text{a}^2\text{t}^2\text{i}^2\text{-us}-\text{kwe}^2\text{l}^2/\text{le}^2$ ,  $\text{a}^3\text{-ch}^2\text{a}^2\text{t}^2\text{z}/\text{ba}^2\text{d}$ ,  $-\text{kwe}^2\text{l}^2/\text{le}^2$ . St. Achatius's spring, in the town of Wasserburg, in Upper Bavaria; an earthy-alkaline spring. [A., 305.]

**ACHE**, v. intr. Ak. A.-S., *acan*. Gr., *ἀχεῖν*. Fr., *avoir mal souffrir*. Ger., *schmerzen*. It., *dolere*. Sp., *doler*. To be affected with pain, especially steady pain (generally said of a part rather than of the individual).

**ACHE**, n. Ak. A.-S., *ace*, *æce*, *ece*. [A., 302.] Gr., *ἄχος*. Lat., *dolor*. Fr., *mal*. Ger., *Schmerz*. It., *dolere*. Sp., *dolor*, *mal*. (All these equivalents apply only to the 1st def.) 1. Pain, especially steady pain. 2. An old name for parsley. See *PETROSELINUM*.

**ACHE** (Fr.), n. A'sh. The genus *Apium*, also several medicinal plants of that and other genera. — **A. céleri**. Celery (*Apium dulce*). [A. Richard (A., 331).] — **A. d'eau**. See *Sium angustifolium*. — **A. de montagne**. See *A. des montagnes*. — **A. des chiens**. See *Ethusa cyanapium*. — **A. des marais**. Wild celery. See *Apium graveolens*. — **A. des montagnes**. Lovage. See *Levisticum officinale*. — **A. odorante**. *A. des marais*. — **A. persil**. Parsley. See *PETROSELINUM*. — **A. vulgaire**. *A. des marais*.

**ACHEBONE**, n. Ach/bo'n. The hip-bone. [Wright (A., 258).] See *Os innominatum*.

**ACHEEN** (Hind.), n. See *ACHIE-PATCHIE-ELLEY*.

**ACHEILARY**, adj.  $\text{A}^2\text{k}-\text{i}^2\text{la}^2-\text{ri}^2$ . From a priv., and *χεῖλος*, a lip. Lacking the lip of the corolla (said of certain orchids). [B., 39.]

**ACHEILIA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2(\text{e}^2\text{i}^2)-\text{li}^2-\text{a}^2$ . Fr., *achélie*, *achille*. Ger., *Achillie*, *Lippenmangel*. Syn.: *labiorum defectus*. A deformity consisting in partial or complete absence of the lips.

**ACHEILOUS**, adj.  $\text{A}^2\text{k}-\text{i}^2\text{lu}^2\text{s}$ . Gr., *ἀχελος*. Lat., *acheilus*. Affected with achelia (q. v.).

**ACHEILUS** (Lat.), adj.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2(\text{e}^2\text{i}^2)-\text{lu}^2\text{s}(\text{lu}^4\text{s})$ . Acheilous; as a n., an achellous individual.

**ACHEIR** (Lat.), adj.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2(\text{e}^2\text{i}^2)-\text{r}^2$ . Gr., *ἄχερ* (from a priv., and *χεῖρ*, the hand). Fr., *achéire*. Syn.: *demanus*. 1. Achelous. 2. (In ichthyology) destitute of pectoral fins. [A., 322.]

**ACHEIRIA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2(\text{e}^2\text{i}^2)-\text{ri}^2-\text{a}^2$ . Gr., *ἄχερ'ia*. Fr., *achéirie*. Ger., *Handlosigkeit*. Congenital absence of the hands.

**ACHEIROUS**, adj.  $\text{A}^2\text{k}-\text{i}^2\text{ru}^2\text{s}$ . Gr., *ἄχερος*. Lat., *achirus*. Affected with achiria (q. v.).

**ACHEL** (Ger.), n.  $\text{A}^3\text{-ch}^2\text{e}^2\text{l}$ . A leech. [A., 315.]

**ACHELIA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{i}^2)-\text{a}^2$ . See *ACHEILIA*.

**ACHENA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{i}^2)-\text{a}^2$ . See *ACHENIUM*.

**ACHENE**, n.  $\text{A}^2\text{k}-\text{en}^2$ . Fr., *achène*. Ger., *Achene*. See *ACHÆNIUM*.

**ACHENIUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{i}^2)-\text{u}^2\text{m}(\text{u}^4\text{m})$ . See *ACHENIUM*.

**ACHENODIUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2\text{n}^2(\text{an})-\text{o}^2\text{di}^2-\text{u}^2\text{m}(\text{u}^4\text{m})$ . Fr., *achénodé*. Ger., *Schalenfruchtkranz*. A fruit (like the strawberry) bearing several achænia arranged on a single surface. [B.]

**ACHENUS** (Lat.), n. m.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2(\text{a}^3\text{i}^2)-\text{u}^2\text{s}(\text{nu}^4\text{s})$ . See *ACHÆNIUM*.

**ACHEROIS** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{e}^2-\text{ro}^2\text{i}^2\text{s}$ . Gen., *achero'idis*. Gr., *ἀχέρως* (from *Ἀχέρων*, "because from its pale color it was thought to have been brought from the shades by Hercules"). [A., 311.] An old name for the white poplar. [A., 348.]

**ACHÈVEMENT** (Fr.), n.  $\text{A}^3\text{-she}^2\text{v}-\text{ma}^2\text{n}^2$ . An elaboration (as of a secretion). [A., 101.]

**ACHIA**, **ACHIAR**, n's. See *ACHAR*.

**ACHICOLUM** (Lat.), n. n.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2\text{k}-\text{o}-\text{lu}^2\text{m}(\text{lu}^4\text{m})$ . The sweating-room of an ancient bath. [A., 343.]

**ACHIDO-PEIRASTICA** (Lat.), n. f. See *ACIDO-PEIRASTICA*.

**ACHIE-PATCHIE-ELLEY**, n. According to Ainslie, a Hindu term for the green leaves of the *Acheen* (the botanical name of which is not given), which have an agreeable, somewhat astringent taste, like black tea; used in infusion by the Indian physicians as a stomachic or laxative. [A., 344.]

**ACHILLAIS** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2\text{l}-\text{a}^2(\text{a}^3\text{i}^2)\text{s}$ . See *ACHILLEIS*.

**ACHILIA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2(\text{e}^2\text{i}^2)-\text{li}^2-\text{a}^2$ . See *ACHEILIA*.

**ACHILLÆA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2\text{l}-\text{le}^2(\text{la}^2\text{e}^2)-\text{a}^2$ . See *ACHILLEA*.

**ACHILLEA** (Lat.), n. f.  $\text{A}^2\text{k}(\text{a}^3\text{ch}^2)-\text{i}^2\text{l}-\text{le}^2(\text{la}^2\text{a}^2)$ . Gr., *ἀχίλλεια* (Achilles having been fabled to have first made use of the plant). Fr., *achillée*. Ger., *Achillenkraut*, *Schafgarbe*, *Grinsing*. A Linnaean genus of herbaceous plants, of the natural order *Compositæ*, suborder *Tubulifloræ*, tribe *Senecionideæ*. [B., 34.] Several of the species contain tannin and an aromatic essential oil. [A., 321.] — **A. ageratum** [Linnaeus]. Fr., *achillée visqueuse*, *eupatoire de Mésué*. [A., 328.] Ger., *Agerat*, *Leberbalsam*. It., *erba bacaja* (o *giulia*). [A., 316.] Sweet maudlin, maudlin tansy; formerly used for constipation, intestinal worms, and atonic dyspepsia. [A., 305.] — **A. ambigua** [Boissier]. See *A. millefolium*. — **A. atrata** [Linnaeus]. Fr., *achillée* (ou *millefeuille*) *noire*. Ger., *schwärtzliche Schafgarbe*. A species found on the Alps, where it is used in pneumonia and diarrhoea. [A., 321.] From this and *A. nana* an essence (*esprit*, ou *liqueur*, *d'iva*) is distilled in the Engadine, much esteemed for its aromatic, musk-like odor. [O. Revell (A., 328).] — **A.**

**Clavenæ.** A species mistaken by Nic. Clavena for a species of *Artemisia*; employed by him in the form of an electuary (much vaunted in his book, "Historia de absinthio umbellifero," published in 1609). [O. Reveil (A, 328).]—**A. falcata** [Linnaeus]. A sickle-leaved Levant species, the leaves of which are said to be much used in the East for hypochondriasis. [A, 248; O. Reveil (A, 328).]—**A. foliis pinnatis.** An old pharmaceutical name for the *Artemisia glacialis*. [A, 341.]—**A. herba-rota** [Allioni]. A small plant, growing on high mountains in Southern Europe; esteemed as a vulnerary, and used in making Falltrank. Its essential oil is employed as a sudorific and emmenagogue. [A, 344.]—**A. iva.** See *A. moschata*.—**A. lanata** [Lamarck]. See *A. nana*.—**A. lutea.** See *A. ageratum*.—**A. macrophylla** [Linnaeus]. A large-leaved Italian species, used in making Falltrank. [A, 248, 321.]—**A. magna.** A term applied both to *A. millefolium* and to some other species. [B, 63.]—**A. millefolium** [Linnaeus]. Fr., *millefeuille, herbe aux charpentiers* (ou à la coupeure). Ger., *gemeine Schafgarbe*. It., *millefoglio*. Sp., *milenrama, yerba de San Juan* [A, 316], *ciento en same*. Syn.: *A. ambigua, A. ossica, A. magna*. Milfoil, yarrow, nose-bleed, bastard pelitory, the achillea of the U. S. Ph. (1870); a species growing in Europe and northern America, attaining a height of about a foot, and surmounted by white or rose-colored flowers arranged in a corymb. It contains achillein and achilleic acid. [B, 5, 34, 63.] It is a mild aromatic bitter tonic, astringent, and antispasmodic; it is a constituent of the *eau vulnéraire*, and has been used for hæmorrhages and other discharges, also for flatulence, dysmenorrhœa, amenorrhœa, and malarial fevers. It is given in extract or infusion, and in the form of the oil; a distilled water and a tincture were formerly used. It is one of the constituents of Falltrank (*thés suisses*). [A, 316, 321; O. Reveil (A, 328).]—**A. moschata** [Jacquin]. Fr., *genipi blanc* (ou *iva*, ou *musqué*), *achille musquée*. Ger., *Moschusschafgarbe, wahres Genipkraut*. Syn.: *A. iva*. A species growing on the continent of Europe. It contains ivaol (the essential constituent of *esprit or liqueur d'iva*) and moschatin. [B, 5.] In Switzerland, where it is known as *forest lady's herb*, it is used as a stomachic tonic. [A, 316.]—**A. myriophyllum.** See *A. millefolium*.—**A. nana** [Linnaeus]. Fr., *genipi bûlard*. Ger., *falsches Genipkraut*. Syn.: *A. lanata, Ptarmica nana* [De Candolle]. An Italian species, used in making Falltrank. [A, 321.]—**A. nobilis** [Linnaeus]. Fr., *millefeuille noble*. A species found in France and Germany; used as a substitute for *A. millefolium*. [A, 305; O. Reveil (A, 328).]—**A. odorata** [Linnaeus]. A species indigenous to Spain; used in making Falltrank. [A, 248, 321.]—**A. ossica** [C. Koch]. See *A. millefolium*.—**A. ptarmica** [Linnaeus]. Fr., *plarmique, herbe à éternuer, bouton d'argent*. Ger., *Niesekraut, Nieswur, weisser Dorant, Bertram-Schafgarbe, deutscher Bertram, wildes Bertramkraut*. It., *erba da sternutare*. [A, 250.] Syn.: *Ptarmica vulgaris* [De Candolle]. Sneezewort; a plant about 15 inches high, surmounted by a corymb of white flowers, found in the northern part of the United States, in Canada, in northern and central Europe, and in northern Asia. The powdered leaves cause sneezing when inhaled, and have been used as a sialagogue. [A, 321; B, 19, 34, 63.]—**A. setacea.** A species indigenous to Hungary; mildly stimulant and tonic. [A, 248, 316.]—**A. viscosa.** See *A. ageratum*.

**ACHILLEÆ** (Lat.), n. f. pl.  $A^2k(a^3ch^2)-i^2l-le(la)'e(a^3-e^2)$ . Fr., *achillées*. A name given by Jussieu to a group of plants of his family *Corymbifere*. [A, 345.]

**ACHILLEAS** (Lat.), n. f.  $A^2k(a^3ch^2)-i^2l-le(la)'a^2s(a^3s)$ . See ACHILLEIS.

**ACHILLEATE**, n.  $A^2k-i^2l-le'at$ . Fr., *achilléate*. A salt of achilleic acid. [A, 306.]

**ACHILLÉE** (Fr.), n.  $A^3-kel-la$ . The genus *Achillea*.—**A. musquée.** *Achillea moschata*.—**A. noire.** *Achillea atrata*.—**A. visqueuse.** *Achillea ageratum*.

**ACHILLEIC ACID**, n.  $A^2k-i^2l-le'i^2k$ . From *achillea*. Fr., *acide achilléique*. Ger., *Achilleinsäure*. It., *acido achilleico*. An acid obtained from milfoil (*Achillea millefolium*), probably identical with acetic acid. [B, 5.]

**ACHILLEIN**, n.  $A^2k-i^2l-le'i^2n$ . Lat., *achilleinum*. Fr., *achilléine*. Ger., *Achillein*. It., *achilleina*. 1. A brownish-red, amorphous, bitter glucoside,  $C_{20}H_{38}N_2O_{15}$ , by some called an alkaloid, obtained from *Achillea millefolium* and *Achillea moschata*, soluble in water, but insoluble in ether; used by the Italians in intermittent fever. [A, 321; B, 5, 49.] 2. A name given by Zanon to a hydro-alcoholic extract, of complex composition (probably impure a.),

ACHILLEA MILLEFOLIUM.  
[A, 257.]

ACHILLEA PTARMICA.  
[A, 248.]

obtained by him from the same plant; a resinous mass, brownish-yellow, very bitter, hygroscopic, soluble in boiling alcohol and in water, but insoluble in ether (except with the aid of acetic acid). [O. Reveil (A, 328).]

**ACHILLEINE**, n. See ACHILLEIN.

**ACHILLEINSÄURE** (Ger.), n.  $A^3-ch^2i^2l-la-en'zoi're^2$ . Achilleic acid.

**ACHILLEINUM** (Lat.), n. n.  $A^2k(a^3ch^2)-i^2l-le(la^2)-i(e)'nu^3m-(nu^4m)$ . Achillein.

**ACHILLEION** (Lat.), n. n.  $A^2k(a^3ch^2)-i^2l-li'(le^2/i^2)-o^2n$ . See ACHILLEUM.

**ACHILLEIS** (Lat.), n. f.  $A^2k(a^3ch^2)-i^2l-le(la)'i^2s$ . Gen., *achilleidis*. Gr., ἀχίλλεις. A variety of barley, the decoction of which was used by the ancients in fevers and jaundice. [A, 344, 348.]

**ACHILLEIUS** (Lat.), n. m.  $A^2k(a^3ch^2)-i^2l-li'(le^2/i^2)-u^3s(u^4s)$ . The tendo Achillis. [Quincy (A, 316).]

**ACHILLENKRAUT** (Ger.), n.  $A^3-ch^2i^2l'le^2n-kra^3-ut$ . See ACHILLEA.

**ACHILLÉOÏDE** (Fr.), adj.  $A^3-ki^2l-la-o-ed$ . Resembling the *Achillea*. [A, 306.]

**ACHILLEOS** (Lat.), n. f.  $A^2k(a^3ch^2)-i^2l-le(la)'o^2s$ . Gen., *achillei*. Gr., ἀχίλλεος. See ACHILLEA.

**ACHILLESFLECHSE** (Ger.), n.  $A^3-ch^2i^2l'le^2s-fle^2ch^2'ze^2$ . The tendo Achillis. [A, 320.]

**ACHILLESQUELE** (Ger.), n.  $A^3-ch^2i^2l'le^2s-kwe^2'l'le^2$ . A mineral spring at Freienwald, in the valley of the Oder; poor in solid constituents, but rich in carbon dioxide. [A, 305.]

**ACHILLESSEHNE** (Ger.), n.  $A^3-ch^2i^2l'le^2s-za'ne^2$ . See TENDO Achillis.

**ACHILLES TENDON**, n. See TENDO Achillis.

**ACHILLETIN**, n.  $A^2k-i^2l'le^2-i^2n$ . From *achillea*. Fr., *achilletine*. Ger., *Achilletin*. An aromatic substance,  $C_{11}H_{17}NO_4$ , obtained by the action of sulphuric acid on achillein. [B, 81.]

**ACHILLEUM** (Lat.), n. n.  $A^2k(a^3ch^2)-i^2l-le(la)'u^3m(u^4m)$ . Gr., ἀχίλλειον. 1. An old term for a cancerous or any inveterate ulcer of the skin. [A, 322.] 2. A soft and compact sort of sponge, used for wiping wounds, etc. [Pliny (A, 318).]

**ACHILLEUS** (Lat.), n. m.  $A^2k(a^3ch^2)-i^2l-le(la)'u^3s(u^4s)$ . See ACHILLEA.

**ACHILOUS**, adj.  $A^2k-i'u^3s$ . See ACHEILOUS.

**ACHILUS** (Lat.), adj.  $A^2k(a^3ch^2)-i(e)'lu^3s(lu^4s)$ . Gr., ἀχίλος (from α priv. [1st def.], or intens. [2d def.], and χίλος, green fodder). ἀχίλος (3d def.). 1. Lacking in nourishment or in juice. 2. Abundantly nourished. 3. Destitute of lips (see ACHEILUS). [A, 322.]

**ACHIMADIUM**, n. See ACHMADIUM.

**ACHIMAN** (Ar.), n. See ACHMADIUM.

**ACHIMBASSI**, n. Written also *Hakim-Bachi*. The title of a magistrate in Grand Cairo, who gives licenses to practise medicine. [A, 348.]

**ACHIOTE**, n.  $A'chi^2-ot$ . From *achiote*, the Mexican name of the *Bixa orellana*. Annotto. [Hernandez (A, 344).]

**ACHIOTL**, n. See ACHIOTE.

**ACHIR** (Lat.), adj.  $A^2k(a^3ch^2)-u^3r(er)$ . See ACHEIR.

**ACHIRA** (Lat.), n. f.  $A^2k(a^3ch^2)-i(e)'ra^2$ . A Latinized form of *achiras* (q. v.). The *Canna achiras*.

**ACHIRAS** (Sp.), n.  $A^3-che'ra^2s$ . The Peruvian name of a species of *Canna* (probably the *Canna edulis*), the tubers of which contain an abundance of a very nutritious fæcula resembling arrowroot, termed by the French *tous-les-mois*. [A, 321, 328.]

**ACHIRIA** (Lat.), n. f.  $A^2k(a^3ch^2)-i(e)'ri^2-a^2$ . See ACHEIRIA.

**ACHIROUS**, adj.  $A^2k-i'u^3s$ . See ACHEIROUS.

**ACHIRUS** (Lat.), adj.  $A^2k(a^3ch^2)-i(e)'ru^3s(ru^4s)$ . See ACHEIR.

**ACHITOLUS**, **ACHITOLUS** (Lat.), n's.  $A^2k(a^3ch^2)-i^2t'o^2l-u^3m(u^4m)$ ,  $-u^3s(u^4s)$ . See ACHICOLUM.

**ACHLAMYDATE**, adj.  $A^2k-la^2m-i^2d-at$ . From α priv., and χλαμύς, a cloak. In zoology, destitute of a mantle (said of molluscs). [A, 349; B.] See MANTLE.

**ACHLAMYDEOUS**, adj.  $A^2k-la^2m-i^2d-e-u^3s$ . For deriv., see ACHLAMYDATE. Fr., *achlamyde*. Ger., *nackt, bloss, kelchlos*. In botany, uncovered, devoid of calyx and corolla. [A, 315; B.]

**ACHLAMYDOSPOREÆ** (Lat.), n. f. pl.  $A^2k(a^3ch^2)-la^2m-(la^2m)'i^2d(u^4d)-o(o^2)-spo(spo^2)re(re^2)-e(a^3-e^2)$ . From α priv., χλαμύς, a cloak, and σπορά, a seed. In Bentley and Hooker's classification of the *Dicotyledones*, the sixth series of the *Monochlamydeæ* (*Apetaleæ*), comprising the orders *Loranthaceæ*, *Santalaceæ*, and *Balanophoreæ*. [B, 42.] The plants belonging to these orders are mostly parasitic, and are distinguished by the ovules being usually devoid of integuments. This series corresponds to the cohort *Santales* of other systems of classification. [B, 75.]

**ACHLIE** (Fr.), n.  $A^3-kle$ . See ACHLYA.

**ACHLIS** (Lat.), n. f.  $A^2k(a^3ch^2)'li^2s$ . See ACNLYS.

**ACHLYA** (Lat.), n. f.  $A^2k(a^3ch^2)'li^2(lu^6)-a^3$ . Perhaps from ἀχλὺς, mist, gloom, darkness. Fr., *achlie*. A genus of *Fungi* (*Oosporæ*) established by Nees von Esenbeck, belonging to the order *Saprolegniaceæ*. [B, 54, 75.]—**A. Braunii** [Reinsch]. A species probably identical with *Aplanes Braunii*. [B, 54.]

**ACHLYS** (Lat.), n. f.  $A^2k(a^3ch^2)'li^2s(h^6s)$ . For deriv., see ACHLYA. Fr., *achlys, bruniard*. Ger., *Nebel*. It., *nebbia*. Sp., *niebla*. An old term for cloudiness or opacity of the cornea. [F.]

**ACHMADIUM**, n. A corruption of the Arabic *achman*, or *achiman*, a name for antimony. [A, 325.]

**ACHMAN** (Ar.), n. See ACHMADIUM.

**ACHMELLA** (Lat.), n. f.  $A^2k(a^2ch^2)me^2/la^2$ . See ACHMELLA.

**ACHNANTHEÆ** (Lat.), n. f. pl.  $A^2k(a^2ch^2)na^2n(na^2n)/the(he)^2e(a^2e)^2$ . A section of diatomaceous plants.

**ACHNE** (Lat.), n. f.  $A^2k(a^2ch^2)ne(na)$ . Gr.,  $\acute{\alpha}\chi\eta$ , anything shaved off or standing on the surface. [A, 311.] Fr., *charpie râpée* (1st def.). Ger., *weiche geschabte Scharpie* (1st def.). Syn.: *lintheamentum* (1st def.), *sordes oculi* (2d def.), *spuma* (3d def.). 1. Fine scraped lint. 2. Flocculent mucus on the eye. 3. Froth. 4. Frothy sputum. [A, 305, 320, 325; Hippocrates (A, 343).]

**ACHOAVA, ACHOAVAN**, n's. See ACHOVAN.

**ACHOLIA** (Lat.), n. f.  $A^2k(a^2ch^2)o(o)^2/li^2a^2$ . Gr.,  $\acute{\alpha}\chi\omicron\lambda\iota\alpha$  (from  $\alpha$  priv., and  $\chi\omicron\lambda\eta$ , bile). Fr., *acholie*. Ger., *Acholie*. 1. A decided deficiency or complete lack of the secretion of bile; also the effects produced thereby. See CHOLEMIA. 2. Any condition in which the escape of bile into the small intestine is obstructed. 3. Asiatic cholera; so called in Russia in 1832, on account of the absence of bile from the evacuations. 4. A gentle, non-choleric temperament. [A, 322.]—**Pigmentary a.** Fr., *acholie pigmentaire* [Hanot]. Ger., *pigmentäre Acholie*. Apparent a. due to a deficiency of pigment in the bile; the faeces are decolorized, but there is no jaundice. [V. Hanot, "Arch. gén. de méd.," Jan., 1885, p. 12.]

**ACHOLIC**, adj.  $A^2k-o^2/li^2k$ . Gr.,  $\acute{\alpha}\chi\omicron\lambda\omicron\varsigma$  (from  $\alpha$  priv., and  $\chi\omicron\lambda\eta$ , bile). Lat., *acholus*. 1. Lacking in bile; affected with acholia. [A, 311, 322.] 2. Due to acholia. [Ploucquet (A, 322).] 3. Curative of jaundice. [A, 322.]

**ACHOLOUS**, adj.  $A^2k'o-lu^2s$ . See ACHOLIC (1st def.).

**ACHOLUS** (Lat.), adj.  $A^2k(a^2ch^2)o(o)^2-lu^2s(lu^2s)$ . Acholic.

**ACHOR** (Lat.), n. m.  $A(a^2)/ko^2r(ch^2)or$ . Gr.,  $\acute{\alpha}\chi\omega\rho$ , scurf, dan-druff. Fr., *achores*, *teigne muqueuse* [Alibert]. Ger., *Achor*, *Kopfgrind*. It., *acore*. Syn.: *tinea*, *tinea muciflua* [Alibert], *sordes capitis*. 1. An old term for a small, yellowish, acuminate pustule, usually perforated by a hair and situated on the scalp or the face. 2. A pustular eruption of the same parts; crusta lactea. [G.] Cf. PSYDRACIUM and PHYLZACIUM.—**A. barbatum** [G, 10]. See SYCOSIS.—**A. capitis** [G, 11]. See SCABIES capitis.—**A. favosus** [G, 10]. See FAVUS.—**A. granulatus** [G, 10]. Syn.: *impetigo a. granulatus* [Fuchs], *tinea granulata*. One that dries into a crust having a granular appearance. [G.]—**A. in facie**. Fr., *achores*, *teigne muqueuse* [Alibert]. An old term for an incrustated eczema of the face. [G.]—**A. lactuminosus** [G, 7]. **A. larvatus** [Schönlein], **A. larvatus** [G, 10]. Syn.: *impetigo faciei lactea* [Fuchs]. See **A. in facie**.—**A. mucifluus** [G, 10]. Fr., *a. muqueux* (ou *mucueux* [Alibert]). Syn.: *a. favosus*. 1. Favus. 2. Eczema with a sticky, mucus-like discharge. [G.]—**A. mucosus** [Alibert]. Syn.: *impetigo a. mucosus* [Fuchs]. See **A. mucifluus**.—**A. mucucum** (ou *muqueux*) **de la face** [G, 7] (Fr.). Eczema madidans, or eczema crustosum, of the face. [G.]—**A. scutellatus** [G, 10]. See SEBORRHEA sicca.

**ACHORDAL**, adj.  $A^2k-o^2rd'a^2l$ . Gr.,  $\acute{\alpha}\chi\omega\rho\delta\omicron\varsigma$ , without strings (from  $\alpha$  priv., and  $\chi\omega\rho\delta\eta$ , a string). In embryology, situated away from, or formed apart from, the notochord. The a. part of the base of the cranium is the sphenoid-ethmoid part, in contradistinction to the chordal (occipito-sphenoid) part. Cf. CHORDAL.

**ACHORES** (Lat.), n. m., pl.  $A^2k(a^2ch^2)o-re^2z(re^2s)$ . See ACHOR.

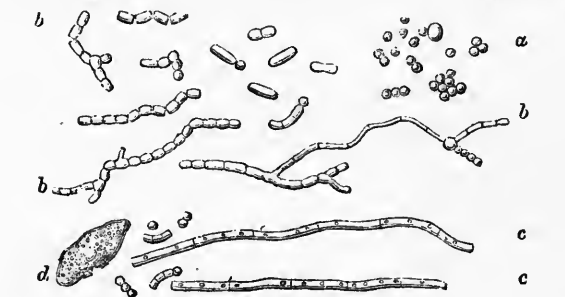

**ACHORESIS** (Lat.), n. f.  $A^2k(a^2ch^2)o-re^2(ra)/si^2s$ . Gen., *achoreseos* (-sis). From  $\alpha$  priv., and  $\chi\omega\rho\epsilon\iota\upsilon$ , to make room. Fr., *achorèse*. A badly formed word (*achorema* would be better) used by Grossi to signify the diminished capacity of a hollow organ, like the bladder. [A, 306.] Cf. STENOCHORIA.

**ACHORIA** (Lat.), n. f.  $A^2k(a^2ch^2)o-ri^2a^2$ . See ACHORESIS.

**ACHORIA** (Lat.), n. n., pl. of *achorion* (q. v.).  $A^2k(a^2ch^2)o-ri^2a^2$ . Those mammals (including the *Monotremata* and the *Marsupialia*) in which there is no direct connection between the foetus and the maternal organism, i. e., no chorion is formed. [A, 8.] Cf. IMPLACENTALIA.

**ACHORICUS** (Lat.), adj.  $A^2k(a^2ch^2)o-ri^2k-u^2s(u^2s)$ . Affected with or proceeding from *achor* (q. v.). [A, 322.]

**ACHORION** (Lat.), n. n.  $A^2k(a^2ch^2)o(o)^2/ri^2o^2n$ . From  $\alpha$  priv., and  $\chi\omega\rho\iota\omicron$ , the chorion (1st def.), or  $\acute{\alpha}\chi\omega\rho$ , *achor* (2d def.). 1. An animal of the orders mentioned under *Achoria* (q. v.). 2. A genus of

ACHORION SCHÖNLEINII.

a, conidia arranged in groups and chains; b, proper *Achorion*; c, mycelium; d, epidermal cell, with micrococci and bacteria. (After Neumann.)

Fungi of uncertain affinities, the individuals of which are probably developmental stages of a more highly organized fungus. [B, 54.]

—**A. de la teigne** (Fr.). See *A. Schönleinii*.—**A. Lebertii**. See *TRICHOPHYTON tonsurans*.—**A. Schönleinii**, **A. Schönleinii** [Remak]. Fr., *a. de la teigne*. Ger., *Favuspilz*. Syn.: *Puccinia favi*, *Oidium Schönleinii* [Lebert]. A species which, by its presence and growth in the skin, produces the disease called favus; named in honor of Schönlein, who discovered it in 1839. [G.] It forms a network of segmented mycelial threads, which, by transverse fission, produce rows and chains of spores. Its development by sexual reproduction has not been observed. It differs little in physical characters from the *Trichophyton tonsurans* (the fungus of ringworm), from the *Microsporon furfur* (the fungus of pityriasis versicolor), or from *Oidium lactis* (the fungus of thrush), and by Grawitz all these forms are held to be identical. [B, 54.]

**ACHORISTOS, ACHORISTUS** (Lat.), adj.  $A^2k(a^2ch^2)o-ri^2s(-tu^2s, -tu^2s(tu^2s))$ . Gr.,  $\acute{\alpha}\chi\omega\rho\iota\sigma\tau\omicron\varsigma$  (from  $\alpha$  priv., and  $\chi\omega\rho\epsilon\iota\upsilon$ , to separate). Fr., *achoriste*. Inseparable (said of any phenomenon that invariably accompanies a particular disease). [A, 306.]

**ACHOUROU**, n. The Carib name for a species of myrtle, the leaves of which are used in decoction for nervous affections and dropsy. [A, 313, 316.]

**ACHRAS** (Lat.), n. f.  $A^2k(a^2ch^2)ra^2s(ra^2s)$ . Gen., *ach'radis*. Gr.,  $\acute{\alpha}\chi\rho\alpha\varsigma$ , the wild pear. A genus of trees of the natural order Sapotaceæ. Many of the species are included by some writers under the genus *Sapota*. [B, 7, 19.]—**A. Australis**. See *A. sapota*.—**A. balata** [Aublet], **A. dissecta** [Linnaeus]. A species growing in China, Manila, etc. The bruised leaves, mingled with ginger, are used externally in paralysis. The fruit is of the size and shape of that of the nettle-tree, and is of a pleasant taste when ripe; it promotes the appetite and facilitates digestion. [A, 344.]—**A. mammosa**. Fr., *jaune d'œuf* (a term applied also to some other plants, marmelade. Syn.: *Lucuma mammosa* [Jussieu], *Sapota mammosa*, *American marmalade*, *mammee*, *Jamaica bully-tree*. A West Indian tree, the fruit of which is called natural marmalade, from its likeness to quince marmalade. It furnishes *Lucuma balata*. According to Descourtils, the milky juice of the tree is emetic and caustic, and is used in the West Indies for destroying warts. [A, 248, 316, 344.]—**A. Milleri**, **A. Müllerii**. A species indigenous to Guiana and Central America, yielding balata (a substance similar to gutta-percha), of which urethral bougies have been made. [A, 316.]—**A. nigra**. See *BUMELIA nigra*.—**A. salicifolia**. Fr., *dipholis à feuilles de saule*. Syn.: *Bumelia salicifolia*. A West Indian species, furnishing Galimata (or Galimeta) or white balata. [A, 316.]—**A. sapota** [Linnaeus]. From the Mexican name, *cochil-zapoll*. [A, 248.] Fr., *sapotillier*, *nèfle d'Amérique* (the Guatemalan name [A, 344]). Ger., *Breitelapfel*. [A, 316.] Syn.: *Sapota achras* [Miller]. The sapodilla plum-tree; a West Indian species, bearing an edible fruit, the seeds of which are laxative and diuretic. [B, 7.] According to Jacquin, the fruit is reputed curative of strangury. A sort of odoriferous resin which surrounds the seeds is regarded as laxative and diuretic. Made into an emulsion with sugar and water, the seeds are given for gravel and renal colic. A fatty substance, the consistence of butter, is obtained from them. [A, 344.] The bark (termed *cortex jamaicensis* [A, 316]) is bitter and astringent, and has been used as a substitute for cinchona. It furnishes the alkaloid *sapotine*. [A, 247.]—**A. sideroxylon**. A Jamaica species, furnishing Neesherry balata. [A, 316.]—**A. Tchicomame** [Perrottet]. A Manila species, the fruit of which is very large. [A, 344.]—**A. zapota**, **A. zapotu**. See *A. sapota*.

**ACHROA, ACHREA** (Lat.), n. f.  $A^2k(a^2ch^2)ro^2a^2, -re^2(-ro^2e^2)-a^2$ . Gr.,  $\acute{\alpha}\chi\rho\omicron\alpha$ . Ger., *Achröa*. An old term for pallor due to cachexia. [A, 305.]

**ACHROI** (Lat.), n. m., pl. of *achrous* (q. v.).

**ACHROMA** (Lat.), n. n.  $A^2k(a^2ch^2)ro^2ma^2$ . Gen., *achro'matos (-tis)*. From  $\alpha$  priv., and  $\chi\rho\omega\mu\alpha$ , color. Fr., *achrome*. Syn.: *achromasia*, *achromatia*, *achromatosis*. 1. Any defect in the color of the skin, general or local. 2. An old term for vitiligo. [A, 305.]—**A. congeniale**. [G, 7.] Fr., *achrome congenial*. Albinism. [G.]—**A. vitiligo**. [G, 7.] Fr., *achrome vitiligue* [Alibert]. See VITILIGO.

**ACHROMADERMA** (Lat.), n. n.  $A^2k(a^2ch^2)ro^2ma^2-du^2r(-de^2r)/ma^2$ . For deriv., see ACHROMA and DERMA. Fr., *achromadermie*. See LEUCODERMA.

**ACHROMASIA, ACHROMATIA** (Lat.), n's f.  $A^2k(a^2ch^2)ro^2ma^2/zi^2(si^2)-a^2, -shi^2(ti^2)-a^2$ . For deriv., see ACHROMA. Fr., *achromasie*. Ger., *Achromasie*. It., *achromasi*. Sp., *achromasias*. Syn.: *coloris defectus*. See ACHROMA, ACHROMATISM, and ACHROMATOSIS.

**ACHROMATIC**, adj.  $A^2k-ro^2ma^2/ti^2k$ . For deriv., see ACHROMA. Lat., *achromaticus*. Fr., *achromatique*. Ger., *achromatisch*. It., *achromatico*. Sp., *achromatico*. 1. Devoid or non-productive of color. An a. lens (one corrected for chromatic aberration) consists of a combination of lenses, of different material and shape (e. g., a double-convex lens of crown glass and a plano-concave lens of flint glass), whereby, instead of the unequal refraction of the rays of various colors which either alone would produce, all the rays (forming white light) are brought to a single focus, so that the image of an object viewed through the lens is free from adventitious colors. [A, 327; B, F.] See fig. under ACHROMATIZE. 2. Pertaining to the non-stainable substance (achromatin) of the nucleus of a cell. [Flemming, 1880 (J).] For other applications of the word, see under CONDENSER, FIBRIL, and FIGURE.

**ACHROMATICITY**, n.  $A^2k-ro^2ma^2-ti^2s(-ti^2)-i^2$ . See ACHROMATISM.

**ACHROMATIN**, n.  $A^2k-ro^2ma^2-ti^2n$ . For deriv., see ACHROMA. Fr., *achromatine*, *suc nucléaire*. Ger., *Achromatin*, *Kernsaft*. Flemming's term for the non-fibrillated portion of the nucleus of an animal or vegetable cell, which does not become deeply stained by microscopic reagents [Flemming, "Arch. f. path. Anat. u. Physiol. u. klin. Med.," lxxvii, 1879 (B, 77)]; that part which in cell-division (karyokinesis) does not become stained, but remains as a

clear substance filling the interstices between the fibrils and surrounding them. In the resting nucleus the a. is supposed to be present, and to hold part at least of the chromatin in solution; hence there is not the sharp distinction of the nuclear substance into a staining and a non-staining part that there is when the nucleus is dividing. [Flemming, "Arch. f. mikr. Anat.," 1890, p. 158 (J.).] — **A'faden** (Ger.). See **ACHROMATIC FIBRILS**.

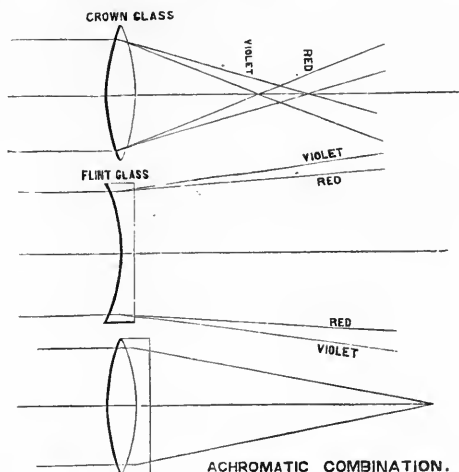

**ACHROMATISIREN** (Ger.), v. tr. A<sup>3</sup>-kro-ma<sup>2</sup>-te-ze're'n. To achromatize.

**ACHROMATISM**, n. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-i<sup>2</sup>zm. Lat., *achromatismus*. The state of being achromatic.

**ACHROMATISTOUS**, adj. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-i<sup>2</sup>s-tu<sup>3</sup>s. Gr., ἀχρωματιστός. Lat., *achromatistus*. Fr., *achromatiste*. Ger., *farblos*, missfarbig. Colorless, or having an unhealthy color (as in cachexia). [A. 316, 322.]

**ACHROMATIZATION**, n. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-i<sup>2</sup>z-a'shu<sup>3</sup>n. The act or process of rendering achromatic.

**ACHROMATIZE**, v. tr. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-iz. Ger., *achromatisieren*. To render achromatic.

**ACHROMATOPSIA, ACHROMATOPSIS** (Lat.), n's f. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-ro-ma<sup>2</sup>-t-i<sup>2</sup>o-p'si<sup>2</sup>-a<sup>3</sup>. -si<sup>3</sup>s. From a priv., χρώμα, color, and ὥψις, sight. Fr., *achromatopsie*. Ger., *Achromatopsie*. *Farbenblindheit*. It., Sp., *acromatopsia*. See **COLOR-BLINDNESS**.

**ACHROMATOPSY**, n. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-i<sup>2</sup>o-p-si<sup>2</sup>. Achromatopsia.

**ACHROMATOSIS** (Lat.), n. f. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-ro-ma<sup>2</sup>-t-i<sup>2</sup>o-si<sup>2</sup>s. Ger., *Achromatose*. A disease of the skin or hair characterized by defective pigmentation. In the pl., *achromatoses*, a family of the *chromatoses* in Auspitz's classification of skin diseases, comprising those characterized by deficiency of pigmentation. [G. 4.] — **A. acquisita**. Acquired a., including vitiligo and canities præmatura (q. v.). [G.] — **A. congenialis**. Congenital a., including albinismus and poliosis (q. v.). [G.]

**ACHROMATOUS**, adj. A<sup>2</sup>-k-ro-ma<sup>2</sup>-t-u<sup>3</sup>s. Gr., ἀχρώματος. Lat., *achromatus*. See **ACHROMATISTOUS**.

**ACHROME** (Fr.), n. A<sup>3</sup>-krom. Achroma. — **A. congénial**. Congenital achroma. [G.] See **ALBINISMUS**. — **A. vitiligue**. Vitiligo. [G.]

**ACHROMIA** (Lat.), n. f. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-ro-mi<sup>2</sup>-a<sup>3</sup>. Fr., *achromie*. Ger., *Achromie*. It., *achromia*. Sp., *decoloración*. Decoloration of the skin, whether congenital or acquired, such as vitiligo, etc. [A. 321.]

**ACHROMODERMA** (Lat.), n. n. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-ro-mo-du<sup>2</sup>-r(de<sup>2</sup>r)-ma<sup>3</sup>. For deriv., see **ACHROMA** and **DERMA**. Fr., *achromodermie*. Leucoderma. [G.]

**ACHROMOUS**, adj. A<sup>2</sup>-k-ro-mu<sup>3</sup>s. Gr., ἀχρώμος. Lat., *achromus*. See **ACHROMATISTOUS**.

**ACHRONIZOIC**, adj. A<sup>2</sup>-k-ro<sup>2</sup>n-i<sup>2</sup>z-o'i<sup>2</sup>ik. From a priv., and χρόνιζεν, to endure. Fr., *achronizoïque*. Incapable of being kept long unaltered (said of drugs). [A. 306.]

**ACHRONYCHOUS**, adj. See **ACRONYCHOUS**.

**ACHROODECTIN**, n. A<sup>2</sup>-k-ro<sup>2</sup>-o-de<sup>2</sup>kt'i<sup>2</sup>n. From ἀχρώος, colorless, and perhaps δέχεσθαι, to receive (because incapable of receiving color). Syn.: *achrooglycogen*. A carbohydrate obtained from the mucin derived from snails; characterized by giving no reaction with iodine. [Landwehr, "Ztschr. f. phys. Chem.," vi, p. 74 (B).]

**ACHROODEXTRIN**, n. A<sup>2</sup>-k-ro<sup>2</sup>-o-de<sup>2</sup>x'tri<sup>2</sup>n. From ἀχρώος, colorless, and dextrin. Fr., *achroodextrine*. Ger., *Achroödextrin*. A modification of dextrin which is not colored by iodine, and is with difficulty converted into glucose or maltose. [B. 12; K.]

**ACHROOGLYCOGEN**, n. A<sup>2</sup>-k-ro<sup>2</sup>-o-gl'i<sup>2</sup>k'o-je<sup>2</sup>n. From ἀχρώος, colorless, and glycogen. Ger., *Achroöglykogen*. See **ACHROODECTIN**.

**ACHROOMYCES** (Lat.), n. m. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-ro(ro<sup>2</sup>)-om'i<sup>2</sup>(u<sup>3</sup>)-sez(kas). Gen., *achroomycetis*. From ἀχρώος, colorless, and μύκης, a mushroom. A genus of *Fungi* of the division *Hyphomycetes*. [A. 316.]

**ACHROOUS**, adj. A<sup>2</sup>-k-ro-u<sup>3</sup>s. Gr., ἀχρώος. Lat., *achrous*. Colorless. See **ACHROMATISTOUS**.

**ACHRYSALLODIAPHANIA** (Fr.), n. A<sup>2</sup>-kri<sup>2</sup>s-a<sup>3</sup>l-lo-de-a<sup>3</sup>-fa<sup>3</sup>n-e. Improperly formed from a priv., κρύσταλλος, crystal, and διαφάνεια, transparency. Piorry's term for cataract. [A. 320.]

**ACHSBACH** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>s'ba<sup>3</sup>ch<sup>2</sup>. An Alsatian village, near which there is said to be a cold sulphurous spring, used for diseases of the skin. The existence of this spring has been denied. [A. 344.]

**ACHSE** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>ze<sup>2</sup>. Written also *Axe*. An axis. — **A'nband**, **A'ncylinder**, **A'nfaser**. See **AXIS-CYLINDER**. — **A'n-förmig**. Axiform, in the form of an axis. [A. 315.] — **A'nfdgung**. See **TROCHOID ARTICULATION**. — **A'nlos**. In botany, devoid of an axis (said of the thallophytes). [B. 35.] — **A'nplanze**. A plant possessed of an axis, or stem and root, as distinguished from an *a'nlose Pflanze*. [B.] — **A'nstrom**. The stream of red corpuscles observed moving along in the center of a capillary when seen under the microscope. [K. 13.] — **Aufsteigende A.** See **ASCENDING AXIS**. — **Dreha'**. See **AXIS OF ROTATION**. — **Gehirnrückenmarksa'**. See **CEREBRO-SPINAL AXIS**. — **Optische A.** See **OPTIC AND OPTICAL AXIS**. — **Secundäre A'n der Linsen**. See **SECONDARY AXES OF LENSES**. — **Seha'**. See **VISUAL AXIS**.

**ACHSEL** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>ze<sup>2</sup>l. See **AXILLA**. — **A'ader**. The axillary vein. — **A'aneurysma**. An axillary aneurysm. — **A'arterie**. The axillary artery. — **A'bein**. The scapula. — **A'benle**. An axillary abscess. — **A'blätter**. Axillary leaves. [A. 320.] — **A'blumen**. Axillary flowers. [A. 320.] — **A'blutadern**. Axillary veins. [A. 320.] — **A'dolden**. Axillary umbels. [A. 320.] — **A'drüsen**. The axillary glands. — **A'falte**. The fold of the axilla. [A. 317.] — **A'gabeln**. Axillary tendons. [A. 320.] — **A'geburt**. Delivery with a shoulder presentation. — **A'gestank**. The odor of the axilla. See **HIRCUS**. — **A'grube**. The hollow of the axilla, the armpit. — **A'grubengegend**. The axillary region. — **A'grubenhaare**. The hairs of the axilla. [A. 320.] — **A'höhle**. See **A'grube**. — **A'höhlenabscess**. An axillary abscess. [A. 320.] — **A'knochen**. The scapula. — **A'knospe**. An axillary bud. [B.] — **A'lage**. A shoulder presentation. — **A'nerven**. The axillary nerves. — **A'pulsader**. The axillary artery. [A. 320.] — **A'ranke**. An axillary tendril. [A. 315.] — **A'schlagader**. The axillary artery. — **A'spross**. See **A'knospe**. — **A'ständig**. In botany, axillary. — **A'vene**. The axillary vein. — **A'zug**. An old apparatus for the forcible reduction of dislocations by means of pulleys. [A. 305.]

**ACHSELMANNSTEIN** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>ze<sup>2</sup>l-ma<sup>3</sup>n'stin. See **REICHENHALL**.

**ACHTÄUGIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'oig-i<sup>2</sup>g. Octonocular. [A. 315.]

**ACHTBEINIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'bin-i<sup>2</sup>g. Eight-legged. [A. 315.]

**ACHTBLÄTTERIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'ble<sup>2</sup>t-te<sup>2</sup>r-i<sup>2</sup>g. Octopetalous. [A. 315.]

**ACHTERBINDE** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>t'e<sup>2</sup>r-bi<sup>2</sup>n-de<sup>2</sup>. A figure-of-eight bandage. [A. 305.]

**ACHTFÄCHERIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'fe<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>r-i<sup>2</sup>g. In botany, octolocular. [A. 315.]

**ACHTFÜSSIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'fu<sup>3</sup>s-si<sup>2</sup>g. Eight-footed. [A. 315.]

**ACHTGESPALTEN** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'ge<sup>2</sup>-spa<sup>3</sup>lt'e<sup>2</sup>n. In botany, octofid. [A. 315.]

**ACHTMÄNNERIG, ACHTMÄNNIG** (Ger.), adj's. A<sup>3</sup>-ch<sup>2</sup>t'me<sup>2</sup>n-ne<sup>2</sup>r-i<sup>2</sup>g, me<sup>2</sup>n-i<sup>2</sup>g. Octandrous. — **Achtmännige**, n. pl. See **OCTANDRIA**.

**ACHTSAMIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'za<sup>3</sup>m-i<sup>2</sup>g. In botany, octospermous. [A. 315.]

**ACHTSPALTIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'spa<sup>3</sup>lt-i<sup>2</sup>g. Octofid. [A. 315.]

**ACHTSTEMPELIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'ste<sup>2</sup>mp-e<sup>2</sup>l-i<sup>2</sup>g. Octogynous. [B.] — **A'e**, n. pl. See **OCTOGYNIA**.

**ACHTSTRAHLIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'stra<sup>3</sup>l-i<sup>2</sup>g. Octoradiated. [A. 315.]

**ACHTTÄGIG, ACHTTÄGLICH, ACHTTÄGLIG** (Ger.), adj's. A<sup>3</sup>-ch<sup>2</sup>t'te<sup>2</sup>g-i<sup>2</sup>g, li<sup>2</sup>ch<sup>2</sup>, li<sup>2</sup>g. Octan, i. e., occurring every eight days (said of fevers). [A. 315, 317.]

**ACHTWEIBERIG** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>t'vib-e<sup>2</sup>r-i<sup>2</sup>g. In botany, octogynous. [A. 315.]

**ACHTZÄHNIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'tse<sup>2</sup>n-i<sup>2</sup>g. Octodentate. [A. 315.]

**ACHTZEHNKÖPFIGE BINDE** (Ger.), n. A<sup>3</sup>-ch<sup>2</sup>t'tsan-ku<sup>3</sup>pf'i<sup>2</sup>g-e<sup>2</sup>. See **MANY-TAILED BANDAGE**.

**ACHTZELLIG** (Ger.), adj. A<sup>3</sup>-ch<sup>2</sup>t'tse<sup>2</sup>l-li<sup>2</sup>g. In botany, octolocular. [A. 315.]

**ACHUSA** (Lat.), n. f. A<sup>2</sup>-k(a<sup>3</sup>k)-u<sup>2</sup>(u<sup>3</sup>)-sa<sup>3</sup>. See **ANCHUSA**.

**ACHY** (Ar.), n. Gr., ἀχῡ, δαφνίνη. A species of *Cassia* growing in Arabia. [A. 343.]

**ACHYLA** (Lat.), n. f. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)/i<sup>2</sup>(u<sup>3</sup>)-la<sup>3</sup>. See **ACHLYA**.

**ACHYLIA, ACHYLOSIS** (Lat.), n's f. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-i(u<sup>3</sup>)/li<sup>2</sup>a<sup>3</sup>, -i<sup>2</sup>(u<sup>3</sup>)/li<sup>2</sup>-o<sup>3</sup>si<sup>2</sup>s. From a priv., and χυλός, juice, chyle, or a priv., and χυλσμός, a conversion into chyle. Fr., *achylie*, *achylosis*. Ger., *Saftmangel* (1st def.), *Chylusmangel* (2d def.). Syn.: *exsiccitas* (1st def.). 1. A lack of juice. 2. (The only meaning of *achylosis*) a defective formation of chyle. [A. 322.]

**ACHYLOTUS** (Lat.), adj. A<sup>2</sup>-k(a<sup>3</sup>ch<sup>2</sup>)-i<sup>2</sup>(u<sup>3</sup>)-lo<sup>2</sup>tu<sup>3</sup>s(tu<sup>3</sup>s). Gr., ἀχύλωτος. Not converted into chyle. [Galen (A. 311).]

**ACHYLOUS**, adj. A<sup>2</sup>-k'i<sup>2</sup>l-u<sup>3</sup>s. Gr., ἀχῡλος. Lat., *achylus*. Fr.,

*achyle*. Ger., *saftlos*. 1. Without juice or chyle. 2. Insipid. [A, 311, 322.]

**ACHYMOSIS** (Lat.), n. f.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot mo'si^2s$ . Gen., *achy-mo'seos* (-sis). From *a* priv., and *χῡμος*, a conversion into chyme. Fr., *achymose*. A defective formation of chyme. [A, 306.]

**ACHYMOTUS** (Lat.), adj.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot mo'tu's(tu's)$ . Gr., *ἀχμωτός*. Affected with achymosis. [A, 322.]

**ACHYMOUS**, adj.  $A^2k-i'mu's$ . Gr., *ἀχμωος*. Lat., *achymus*. Fr., *achyme*. 1. Achylous. 2. Lacking in chyme. [A, 322.]

**ACHYRANTHÆ** (Lat.), n. f. pl.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ra^2n(ran^2n) \cdot the^2 \cdot e(a^3e^2)$ . For deriv., see ACHYRANTHES. A tribe of amaranthaceous plants, distinguished by the leaves being alternate and the flowers having two-celled anthers and an ovary containing but one ovule. [B, 34.]

**ACHYRANTHES** (Lat.), n. f.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ra^2n(ran^2n) \cdot thez$ -(thas). From *ἀχρῶν*, chaff, and *ἄνθος*, a flower. Fr., *achyranthé*. Gr., *Spireulume*. Syn.: *cadeleri*. The representative genus of the *Achyranthaceæ*. [B, 19.]—**A. aspera** (Willdenow). A species growing in India, Egypt, the Cape of Good Hope, Jamaica, and Sardinia; used in the East, under the name of *cadeleri*, as a remedy for dropsy, as an antidote to the venom of the scorpion, as a depurative, and as an astringent. [A, 305, 321; Ainslie (A, 323); B, 19.]—**A. fruticosa** (Lamarck). An East Indian species, used for the same purposes as *A. aspera*. [B, 19.]—**A. globulifolia**. A Madagascar species, employed there as a remedy for syphilis. [B, 19.]—**A. lanata** (Linnaeus). A species referred by Forskål to the genus *Eruca*. It furnishes chaya root, used as a diuretic and depurative. [A, 321.]—**A. obtusifolia**. Used in India as a diuretic. [A, 328.]—**A. repens**. Forty-knot. The decoction has been used as a diuretic in dropsy, ischuria, etc. [A, 313.]—**A. viridis**. The bruised leaves have been used as an emollient. [A, 316.]

ACHYRANTHES ASPERA.  
[A, 248.]

**ACHYRANTHOID**, adj.  $A^2k \cdot i^2 \cdot ra^2n'thoid$ . Fr., *achyranthoïde*. Resembling the *Achyranthes*. [A, 306.]

**ACHYRODES** (Lat.), adj.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ro'dez(das)$ . For deriv., see ACHYRON and *-odes*. See ACEROSUS.

**ACHYRON** (Lat.), n. n.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ro^2n$ . Gr., *ἀχρῶν*, chaff, bran. Fr., *son*. Ger., *Spreu*. Chaff. See FURFUR.

**ACHYROPHORUS** (Lat.), n. m.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ro^2f(o^2) \cdot ru^2s$ -(ru's). From *ἀχρῶν*, chaff, and *φορέω*, to bear (from its feathery pappus). Fr., *achyrophore*. A genus of herbaceous plants, of the natural order *Compositæ*, suborder *Cichoraceæ*. [B, 19.]—**A. apargioides**, *A. scorzonera*. Two species, the roots of which are eaten in Chile, under the name of *escorzonera*, for their refreshing and purifying qualities. [A, 252.]—**A. sessiliflorus**. Sp., *chicoria de la tierra caliente*. A New Granada species, having long, white roots, a decoction of which is sometimes used in thoracic affections. [B, 19.]

**ACHYROPHYTE**, n.  $A^2k \cdot i^2 \cdot ro \cdot fit$ . From *ἀχρῶν*, chaff, and *φύτον*, a plant. Fr., *achyrophylite*. A plant of which the flower is accompanied by glumes. [Necker (A, 348).]

**ACHYRUM** (Lat.), n. n.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot ru^2m(ru^2m)$ . For deriv., see ACHYRON. In botany, a chaffy collection of paleæ. [A, 316.]

**ACHYTUS** (Lat.), adj.  $A^2k(a^3ch^2) \cdot i^2(u^6) \cdot tu's(tu's)$ . From *a* priv., and *χρῡς*, flowing. 1. Pent up (said of discharges). 2. Due to the retention of matter that should be cast off. [A, 322.]

**ACIA** (Lat.), n. f.  $A(a^3) \cdot si^2(ki^2) \cdot a^3$ . 1. A needle. 2. A threaded needle; also a ligature of thread. [Celsus (B, 45).] 3. See ACHAR.

**ACIAMIDES**, n. pl.  $A^2s \cdot i^2 \cdot a^2m \cdot i^2dz$ . From *acid* and *amide*. Bodies formed on the ammonia type, but yet possessing acid characters. [B, 2.]

**ACIAR**, n. See ACHAR.

**ACIB** (Ar.). n. Lead. [A, 338.]

**ACÍBAR** (Sp.). n.  $A^3 \cdot the^2 \cdot ba^3r$ . Aloes.

**ACIBROMIDE**, n.  $A^2s \cdot i^2 \cdot bro^2mi^2d(mid)$ . From *acid* and *bromide*. See OXYBROMIDE.

**ACICHLORIDE**, n.  $A^2s \cdot i^2 \cdot klo^2ri^2d(rid)$ . From *acid* and *chloride*. See OXYCHLORIDE.

**ACICULA** (Lat.), n. f.  $A^2s(a^3k) \cdot i^2k(u^2) \cdot la^3$ . Dim. of *acus*, a needle. Gr., *ᾰκῡλον*. Fr., *acicule*. Ger., *Borste*. Lit., a little needle; in botany, a bristle, the bristle-like abortive flower of a grass. [A, 252.]

**ACICULAR**, adj.  $A^2s \cdot i^2k(u^2) \cdot la^3r$ . Lat., *acicularis*, from *acícula* (q. v.). Gr., *ᾰκῡλῶδης*. Fr., *aciculaire*. Ger., *nadelförmig*, *nadelähnlich*. Sharp-pointed like a needle; needle-shaped. [B.]

**ACICULATE**, **ACICULATED**, adj's.  $A^2s \cdot i^2k(u^2) \cdot la \cdot te^2d$ . Lat., *aciculatus*. Fr., *aciculé*. 1. Marked with fine lines resembling those traced with a needle. [B, 19.] 2. Acicular.

**ACICULE**, n.  $A^2s \cdot i^2k(u^2)$ . See ACICULA.

**ACICULIFORM**, adj.  $A^2s \cdot i^2k(u^2) \cdot li^2fo^2rm$ . From *acícula*, a little needle, and *forma*, form. Fr., *aciculiforme*. Acicular. [Craig (B, 39).]

**ACICULUM** (Lat.), n. n.  $A^2s(a^3k) \cdot i^2k(u^2) \cdot lu^2m(lu^2m)$ . Dim. of *acus*, a needle. A spine (said of the sharp-pointed processes on the parapodia of the *Polychæta*). [A, 349.]

**ACICUS**, **ACICYS** (Lat.), adj's.  $A^2s(a^3k) \cdot i^2(e) \cdot ku^2s(ku^2s)$ , *-si^2s*-(ku's). Gr., *ἀκῡς* from *a* priv., and *ἰκῡς*, strength, vigor. Infirm, debilitated. [Hippocrates (A, 325).]

**ACID**, n.  $A^2s \cdot i^2d$ . Lat., *acidum* (neut. of adj. *acidus* [q. v.]). Gr., *ἄξύ*. Fr., *acide*. Ger., *Säure*. It., *acido*. Sp., *ácido*. A salt of hydrogen. The following properties are common to the most important acids: 1. Solubility in water. 2. A sour taste. (In those acids which have the most marked characters this property can be perceived only after dilution with a large quantity of water.) 3. The power of reddening most organic blue and violet coloring matters (e. g., litmus), and of restoring the original color of substances which have been altered by alkalies. 4. The power of decomposing most carbonates, causing effervescence. 5. The power of destroying the characteristic properties of alkalies more or less completely, at the same time losing their own distinguishing characters and forming alkaline salts. The last of these properties is the only one considered essential. The most common reaction of acids with other substances is by double decomposition, in which they exchange their hydrogen for metals or for radicles possessing, to a certain extent, metallic functions; with some substances, however, such as ammonia and its analogues and certain hydrocarbons, acids unite directly, forming compounds which are hence usually classed as addition compounds, but which may also be regarded as substitution compounds like the derivatives first mentioned. See under AMMONIA. [B, 2.]—**A. albumin**. See under ALBUMIN.—**A. characteristic**. That portion of the molecule of an a. which contains the replaceable hydrogen and the elements to which it is immediately attached. Thus, in organic a's the a. characteristic is the molecule CO.OH, which contains the a. hydrogen and the carbon atom to which it is attached. Many organic a's are formed by the substitution of this a. characteristic for an atom of hydrogen in an organic compound. [B.]—**A. of air**. Bergmann's term for carbonic a. [B, 3.] See CARBON DIOXIDE.—**A. of amber**. Succinic a. [B, 86.]—**A. of ants**. Formic a. [B, 86.]—**A. of apples**. Malic a. [B, 86.]—**A. of benzoïn**. Benzoic a. [B, 86.]—**A. of borax**. Orthoboric a. [B.] See under BORIC ACID.—**A. of chalk**. Fr., *acide crayeux*. An old term for carbonic a. See CARBON DIOXIDE.—**A. of citrons**. Citric a. [B, 86.]—**A. of corks**. Suberic acid. [B, 86.]—**A. of fat**. A name given by Crell to an a. formed by the distillation of fat; afterward shown to be identical with acetic a. [B, 86.]—**A. of flints**. Lat., *acidum silicium*. An old term for silicic a. or silicic anhydride. [B, 87.]—**A. of fluor**. An old name for hydrofluoric a. [B, 86.]—**A. of fossil salt**. An old name for hydrochloric a. [B.]—**A. of galls**. Gallic a. [B, 86.]—**A. of lemons**. Citric a. [B, 86.]—**A. of milk**. Lactic a. [B, 86.]—**A. of molybdæna**. Lat., *acidum molybdæne*. See under MOLYBDENA.—**A. of Prussian blue**. An old name for hydrocyanic a. [B, 86.]—**A. of sea salt**. Hydrochloric a. [B.]—**A. of pus**. See PYRIC ACID.—**A. of sugar**. An old name for oxalic a. [B, 86.]—**A. of sugar of milk**. Lat., *acidum sacchari lactis*. An old name for mucic a., because it was obtained by treating milk sugar with nitric a. [B, 3, 86.]—**A. of tartar**. Tartaric a. [B, 86.]—**A's of the acrylic a. series**, **A's of the lactic a. series**, etc. See ACRYLIC ACID, LACTIC ACID, etc.—**A. of tin**. An old term for an a. produced by the action of nitric a. upon tin; probably metastannic a. [B, 3, 86.]—**A. of tungsten**. Tungstic a. [B, 3, 86.]—**A. of urine**. 1. Phosphoric a. [B.] 2. Uric a. [A, 313.]—**A. of wolfram**. Tungstic a. [B, 3.]—**A. of wood**. Pyroligneous a. [B, 86.]—**A. oxide**. See under OXIDE.—**A. radicle**. An element or a combination of elements which, when united with hydrogen, forms an a. The term is usually limited to the oxygen a's. [B.]—**A. stiffening**. Ger., *Säure-Stärke*. A condition of rigor induced in a muscle by injecting an acid solution into its substance. [Landois (K).]—**Aerial a.** An old term for carbonic a. [B.] See CARBON DIOXIDE.—**Alcohol a.** Fr., *acide-alcool*. Ger., *Alkoholsäure*. A body having at once the constitution of an alcohol and an a. (e. g., glycolic a., CH<sub>2</sub>(OH) - CO.OH formed by the oxidation of ethyl alcohol, CH<sub>2</sub>(OH) - CH<sub>3</sub>, and of ethylene alcohol (glycol), CH<sub>2</sub>(OH) - CH<sub>2</sub>(OH)). [B, 4.]—**Aldehyde a.**, **aldehydic a.** Fr., *acide aldehydique*. Ger., *Aldehydsäure*. A substance possessing the properties both of an aldehyde and of an a., and derived from a dibasic organic a. by the replacement of one of the molecules of CO.OH in the a. characteristic by the molecule COH characteristic of the aldehydes. Such a's have in general the formula C<sub>n</sub>H<sub>m</sub> -  $\frac{CHO}{CO.OH}$ , where *m* usually equals 2*n*. [B, 4.]—**Alkali a.** An expression corresponding to the French *alkali-acide*. See AMIDO-**a.**—**Amic a's**. Fr., *acides amiques*. Ger., *Aminsäuren*. A class of nitrogenized a's derived from a polybasic a. by the substitution of amidogen (NH<sub>2</sub>) for one of the molecules of hydroxyl in the a. characteristic (e. g., succinamic a.,  $\frac{CH_2 - CO.NH_2}{CH_2 - CO.OH}$ , derived from succinic a.,  $\frac{CH_2 - CO.OH}{CH_2 - CO.OH}$ ). They differ from the ammonium salts of the same a's by the elements of one or more molecules of water. [B, 2, 3, 4.]—**Amido-a.** Fr., *acide amidé*, *alkali-acide*. Ger., *Amidosäure*. An a. derived from another a. by the substitution of amidogen (NH<sub>2</sub>) for hydrogen in the a. radicle (e. g., amidosuccinic a.,  $\frac{CH(NH_2) - CO.OH}{CH_2 - CO.OH}$ ). [B, 3, 4.]—**Anhydrous a.** Fr., *acide anhydre*. Ger., *wasserfreie Säure*. See ANHYDRIDE.—**Animal a.** Fr., *acide animal*. An a. found in an animal tissue or secretion. [B.]—**Aromatic a.** Fr., *acide aromatique*. Ger., *aromatische Säure*. It., *acido aromatico*. Sp., *ácido aromático*. An a. derived from hydrocarbons of the aromatic group of compounds. They are divided into the *aromatic a's proper*, derived from benzene or a homologue of benzene by the substitution of the a. characteristic CO.OH for one or more atoms of hydrogen; and the *aromatized fatty a's*, derived from the a's of the fatty series by the replacement of one or more atoms of hydrogen by phenyl or its homologues. [B, 4.]—**Aromatized fatty a.** See AROMATIC a.—**Arsinic a's**, **Arsonic a's**. Fr., *acides arséniques* (ou *arsoniques*). Ger., *Arsinsäuren*. A class of a's formed by the oxidation of the arsines or the arsonium compounds. The most important of them are dimethylarsinic and methylarsinic a's. [B, 4.] Cf. Phosphinic a's.—**Bibasic a.** Fr., *acide bibasique*. See Dibasic a.—**Biliary**

a's. Fr., *acides biliaires*. Ger., *Gallensäuren*. See TAUROCHOLIC ACID, GLYCOCHOLIC ACID (a's of ox-bile), HYOGLYCOCHOLIC ACID, HYOTAUROCHOLIC ACID (a's of pig's bile), and CHENOTAUROCHOLIC ACID (a. of goose's bile). [B.]—**Brom'a.** An a. in which one or more atoms of hydrogen in the a. radicle are replaced by bromine. [B.]—**Carbon a.** See *Organic a.*—**Chalky a.** An old name for carbonic a. [B. 91.] See CARBON DIOXIDE.—**Chamber a.** Ger., *Kammersäure*. The dilute impure sulphuric a. formed in the lead chambers in the manufacture of sulphuric a. from sulphur. [B.]—**Chlor-a.** An a. in which one or more of the hydrogen atoms of the a. radicle are replaced by chlorine (e. g., monochloroacetic a.). [B.]—**Conjugate a.** **Copulated a.** Fr., *acide conjugué* (ou *copulé*). Ger., *gepaarte Säure*. An a. considered as formed from two or more other a's united in definite proportions. [B.]—**Dephlogisticated marine a.** An old term for chlorine. [B. 86.]—**Diatomic a.** Fr., *acide diatomique* (ou *biatomique*). Ger., *zweiatomige Säure*. It., *acido diatomico*. An a. which contains 2 atoms of hydrogen replaceable by metallic or organic radicles. If both of these replaceable atoms are contained in the a. characteristic, CO.OH, the a. is also dibasic, but if one is contained in the a. radicle, and the other in the a. characteristic, the a. is monobasic. Salicylic a., for instance, the formula of which is  $C_6H_4(OH)CO.OH$ , forms two classes of salts, having respectively the formulae  $C_6H_4(OH).COO.R'$  and  $C_6H_4(OR').COO.R'$ . It is, therefore, monobasic and diatomic. [B.]—**Dibasic a.** Fr., *acide dibasique* (ou *bibasique*). Ger., *zweibasische Säure*. It., *acido dibasico*. An a. containing 2 replaceable atoms of hydrogen in the a. characteristic. [B.]—**Dihydrated a.** Fr., *acide bihydraté*. See *Hydrated a.*—**Dihydric a.** Fr., *acide dihydrique*. Ger., *dihydriche Säure*. A diatomic a. [B.]—**Dihydroxy-a's.** **Dioxy-a's.** A class of a's formed from other a's by the replacement of 2 hydrogen atoms in the a. radicle by 2 molecules of hydroxyl; called *dioxy-a's*, because they may be regarded as formed from the primitive a's by the addition of 2 atoms of oxygen. [B.]—**Disulphonic a.** Fr., *acide disulfonique*. Ger., *Disulfonsäure*. An a. which may be regarded as made up of a double molecule of sulphurous a. in which a bivalent radicle replaces 2 atoms of hydrogen; having, therefore, the general formula  $R'' < (SO_3.OH)_2$ . [B. 4.]—**Fatty a.** Fr., *acide gras*. Ger., *fettige Säure*, *Fettsäure*, It., *acido grasso*. Sp., *ácido graso* (o *craso*). 1. In general terms an a. of the fatty series of hydrocarbons, i. e., any organic a. not belonging to the aromatic series. 2. An a. found in the fixed oils and fats, e. g., stearic and oleic a's. 3. In a more restricted sense, those organic a's that are derived from the trivalent series of hydrocarbons (acidyls) by the addition of an atom of oxygen and a molecule of hydroxyl; or they may be regarded as derived from carbonic acid by the successive substitution of each of the univalent hydrocarbons (alcohol radicles) for an atom of hydrogen; their general formula is, accordingly,  $C_nH_{2n-1}.O(OH)$ , or  $C_nH_{2n+1}.CO.OH$ . Thus restricted, the term includes formic, acetic, propionic, butyric, valeric, caproic, oenanthylic, caprylic, pelargonic, capric, hendecatoic, lauric, tridecatoic, myristic, pentadecatoic, palmitic, margaric, stearic, nondecatoic, arachidic, medullic, behenic, lignoceric, hyanic, cerotic, melissic a's, an a. of the composition  $C_{44}H_{88}O_2$ , and theobromic a. [B. 3, 4.]—**Haloid a.** Fr., *acide halogène*. Ger., *Halogenwasserstoffsäure*. A hydrogen a. formed by the direct combination of an atom of hydrogen with an atom of one of the haloid elements (chlorine, bromine, iodine, and fluorine). Hence the term includes hydrochloric, hydrobromic, hydriodic, and hydrofluoric a's. [B.]—**Hexabasic a.** Fr., *acide hexabasique*. Ger., *sechsbasische Säure*. An a. containing 6 atoms of replaceable hydrogen in the a. characteristic. [B.]—**Hexatomic a.** Fr., *acide hexatomique*. Ger., *sechsatomische Säure*. An a. which contains 6 atoms of replaceable hydrogen, whether in the a. radicle, or in the a. characteristic, or in both. [B.]—**Hydra'a.** See *Hydrogen a.*—**Hydrated a.** Fr., *acide hydraté*. An a. combined with the elements of water; especially applied to the anhydrous a's or anhydrides in aqueous solution when they combine with the elements of the water of solution to form true a's. Such a's are called *monohydrated*, *dihydrated*, and *trihydrated* a's, according as they are combined with one, two, or three molecules of water.—**Hydrogen a.** Fr., *hydracide*. Ger., *Wasserstoffsäure*. Originally an a. containing hydrogen; hence (as distinguished from an oxygen a.) one containing no oxygen. [B. 7.] The following are the best known of this class: hydrochloric a. (HCl), hydrobromic a. (HBr), hydriodic a. (HI), hydrofluoric a. (HF), hydrocyanic a. (HCN), and hydrosulphuric a. (hydrogen sulphide,  $H_2S$ ). The hydrogen a's include also hydrocobaltic, hydroferrocyanic, hydroferrocyanic, hydroplatinocyanic, hydrocuprocyanic, hydroaurocyanic, hydromellonic, and hydronitroproussic a's. Under this head may be included the group of thio-a's, derived from oxy-a's by replacing the oxygen with sulphur; such are thiocyanic, isothiocyanic, perthiodic, dithiocyanic, thiocarbamic, thiocarbonic, thioarsenic, and thioantimonic a's. [B.]—**Hydroxy-a's.** Ger., *Hydroxysäuren*. A class of a's formed from other a's by the substitution of one or more molecules of hydroxyl for an equal number of atoms of hydrogen in the a. radicle; also called *oxy-a's*, because they may be regarded as derived from the primitive a's by the direct addition of one or more atoms of oxygen. [B.] Cf. *Dihydroxy-a's*, *Trihydroxy-a's*, and *Tetrahydroxy-a's*.—**Imperfect a.** In the old nomenclature, an oxy-a., which contained less oxygen than was required to saturate it (e. g., nitrous a.). [B. 69.]—**Inorganic a.** See *Mineral a.*—**Ketonic a.** A substance having at once the constitution of a ketone and of an a., and imagined to be derived from a ketone by the substitution of the a. characteristic CO.OH for hydrogen. Thus, acetoacetic a.,  $CH_3.CO.CH_2.CO.OH$ , may be regarded as dimethylketone, in which CO.OH replaces an atom of hydrogen. [B. 4.]—**Marine a.** An old name for hydrochloric a. [B.]—**Marine aerated a.** An old name for chlorine. [B. 86.]—**Metallic a.** Fr., *acide métallique*. A mineral a. in which the a. radicle is a metal or a metallic oxide. [B.]—**Mineral a.** Lat., *acidum minerale* (seu *metallicum*, seu *fossile*). Fr., *acide minéral*. Ger., *Mineralsäure*. It., *acido minerale*. Sp., *ácido mineral*. An inorganic a., one of which the radicle is not a carbon derivative. The chief min-

eral a's are sulphuric, sulphurous, nitric, nitrous, phosphoric, phosphorous, hydrochloric, and hydrobromic a's, and these have all the distinguishing characters of an a. above laid down; less important, and in some respects possessing less characteristic properties, are antimonie, arsenic, boric, chloric, hypochlorous, hyponitrous, hyposulphurous, chromic, hydrofluoric, iodic, hydriodic, manganic, molybdenic, osmic, sillicic, stannic, tungstic, and vanadic a's. [B.]—**Monatomic a.** Fr., *acide monoatomique*. Ger., *einatomige Säure*. It., *acido monoatomico*. An a. which contains one atom of replaceable hydrogen which must be in the a. characteristic. [B.]—**Monobasic a.** Fr., *acide monobasique*. Ger., *einbasische Säure*. It., *acido monobasico*. An a. which, whether containing 1, 2, or more atoms of replaceable hydrogen, contains only one of them in the a. characteristic. [B.]—**Monohydrated a.** Fr., *acide monohydraté*. See *Hydrated a.*—**Monohydric a.** Fr., *acide monohydrique*. Ger., *monohydriche Säure*. See *Monatomic a.*—**Nitro-a.** Fr., *nitro-acide*. Ger., *Nitrosäure*. An a. formed from another a. by the substitution of nitryl ( $NO_2$ ) for hydrogen. [B.]—**Nitrogenous a.** Fr., *acide azoté*. Ger., *stickstoffhaltige Säure*. An a. containing nitrogen. [B.]—**Oleic a.** Lat., *acidum oleicum*. Fr., *acide oléique*. Ger., *Ölensäure*. For the individual a. so called, see the major list; for the generic sense, see *Fatty a.* (2d def.).—**Organic a.** Fr., *acide organique*. Ger., *organische Säure*. It., *acido organico*. Sp., *ácido orgánico*. An a. the radicle of which is a carbon derivative. [B.]—**Oxy-a.** See *Oxy-a.*—**Oxaline a.** An old term for oxalic a. [B. 86.]—**Oxy-a.** Fr., *oxacide*. Ger., *Oxysäure*. 1. An oxygen a. 2. An a. formed from another by the addition of an atom of oxygen. [B.] See *Hydroxy-a's*.—**Oxygen a.** Fr., *oxy-acide*. Ger., *Sauerstoffsäure*. An a. containing oxygen; a term formerly especially applied, in contradistinction to the hydrogen a's, to the anhydrous a's or anhydrides, but now applied to the true a's containing oxygen. Nearly all the a's known as oxygen a's in the latter sense. [B.] See *Hydrogen a.*—**Pentabasic a.** Fr., *acide pentabasique*. Ger., *fünfbasische Säure*. An a. that contains 5 atoms of replaceable hydrogen all in the a. characteristic. [B.]—**Pentatomic a.** Fr., *acide pentatomique*. Ger., *fünfatomige Säure*. An a. containing 5 atoms of replaceable hydrogen. [B.]—**Perfect a.** In the old nomenclature, an oxygen a., which contained the full amount of oxygen required to saturate it. [B. 69.]—**Phosphinic a's.** **phosphonic a's.** Fr., *acides phosphiniques* (ou *phosphoniques*). Ger., *Phosphinsäuren*, *Phosphonsäuren*. A class of a's formed from phosphoric a. by the substitution of one or two molecules of a compound radicle for one or two molecules of hydroxyl. Such a's have the general formula,  $PO.R'_2$  ( $OH$ ), or  $PO.R'_2.OH$ , where  $R'$  is a univalent radicle. [B.] See METHYLPHOSPHINIC ACID, PHENYLPHOSPHONIC ACID.—**Polyatomic a.** Fr., *acide polyatomique*. Ger., *polyatomische Säure*. It., *acido poliatomico*. An a. containing more than one atom of replaceable hydrogen, whether in the a. radicle, in the a. characteristic, or in both. [B.]—**Polybasic a.** Fr., *acide polybasique*. Ger., *mehrbasische Säure*. It., *acido polibasico*. An a. containing more than one replaceable atom of hydrogen in the a. characteristic. A's of this class are divided into *dibasic*, *tribasic*, *tetrabasic*, etc., according to the number of such atoms. [B.]—**Polyhydric a.** Fr., *acide polyhydrique*. Ger., *polyhydriche Säure*. Polyatomic a.—**Pyro-a.** Fr., *pyro-acide*. Ger., *Pyrosäure*, *Brenzsäure*. An a. derived from another by the action of heat. [B.]—**Saccharine a.** An old term for oxalic a. [B. 86.]—**Saturated a.** Fr., *acide saturé*. Ger., *gesättigte Säure*. See *Perfect a.*—**Sulphazotized a's.** Fr., *acides sulfazotés*. A class of a's formed by the action of sulphurous a. upon potassium nitrite. [B. 2.] See SULPHAMIC ACIDS, SULPHAMMONIC ACIDS, and SULPHOXYAZIC ACIDS.—**Sulphinic a's.** Fr., *acides sulfiniques*. Ger., *Sulfinisäuren*. A class of a's of the general formula  $R'.SO.OH$  (where  $R'$  is a univalent radicle). Such a's may be regarded as derived from sulphurous a.,  $SO_2(OH)_2$ , by the substitution of a univalent radicle for a molecule of hydroxyl; or they may be considered as acid hyposulphites derived from hyposulphurous a.,  $H_2SO_3$ , by the replacement of one of the hydrogen atoms. [B.] See METHYLSULPHINIC ACID.—**Sulpho-a.** Fr., *sulfo-acide*. Ger., *Sulfosäure*. 1. A thio-a. 2. A sulphonic a., especially one derived from another a. [B.]—**Sulphonic a's.** Fr., *acides sulfoniques*. Ger., *Sulfonsäuren*. A class of a's of the general formula  $R_x(SO_3.OH)_n$  (where  $R_x$  is a radicle whose quantitative is  $n$ ). Such a's may be regarded as derived from sulphuric a. by the substitution of a radicle for hydroxyl; or they may be regarded as acid sulphites derived from sulphurous a.,  $H_2SO_3$ , by the replacement of half of its hydrogen by a basic radicle. [B.] See METHYLSULPHONIC ACID.—**Sulphur a.** See *Thio-a.*—**Tetrabasic a.** Fr., *acide tétrabasique*. Ger., *vierbasische Säure*. It., *acido tetrabasico*. A polybasic a. supposed to contain 4 replaceable atoms of hydrogen, all of which must be contained in the a. characteristic. [B.]—**Tetrahydric a.** Fr., *acide tétrahydrique*. Ger., *tetrahydriche Säure*. See *Tetrametric a.*—**Tetrahydroxy-a's.** A class of a's formed from other a's by the substitution of 4 molecules of hydroxyl for 4 atoms of hydrogen. [B.]—**Tetrametric a.** Fr., *acide tétramétrique*. Ger., *vieratomige Säure*. It., *acido tetrametrico*. An a. which contains 4 atoms of hydrogen replaceable by metallic or organic radicles, those atoms being found either entirely in the a. characteristic, CO.OH (the a. being then tetrabasic), or partly in the a. radicle as well (the a. being then tribasic, dibasic, or monobasic). Thus, tartaric a., the formula of which is  $C_4H_4(OH)_2(CO.OH)_2$ , forms two classes of salts, having respectively the constitution  $C_2H_4(OH)_2(CO.OR')_2$  and  $C_2H_4(OR')_2(CO.OR')_2$ ; it is, therefore, at once dibasic and tetrametric. [B.]—**Thio-a.** Syn.: *sulphur a.* An a. in which sulphur replaces oxygen (e. g., thiocarbamic a.). [B.]—**Triatomic a.** Fr., *acide triatomique*. Ger., *dreiatomige Säure*. It., *acido triatomico*. An a. which contains 3 atoms of hydrogen replaceable by metallic or organic radicles, whether these atoms are all contained in the a. characteristic, CO.OH (the a. being tribasic), or partly in the a. radicle as well (the a. being dibasic or monobasic). [B.] Cf. *Diatomic a.*—**Tribasic a.** Fr., *acide tribasique*. Ger., *dreibasische Säure*. It., *acido tribasico*. A polybasic a. containing 3 replaceable atoms of hydrogen, all in the a.

characteristic. [B.]—**Trihydrated a.** Fr., *acide trihydraté*. See *Hydrated a.*—**Trihydric a.** Fr., *acide trihydrique*. Ger., *trihydriche Säure*. See *Triatomic a.*—**Trihydroxy-a's.** *Trioxo-a's.* A class of a's derived from other a's by the substitution of 3 molecules of hydroxyl for 3 atoms of hydrogen.—**Unsaturated a.** Ger., *ungesättigte Säure*. See *Imperfect a.*—**Vegetable a.** Ger., *Pflanzensäure*. An a. occurring in or derived from vegetable tissues or juices. [B.]—The names of the individual a's will be found in their proper places in the major list.

**ACID**, adj. A<sup>2</sup>s<sup>1</sup>d. Gr., *ἄκτις*. Lat., *acidus* (from *ἀκίς* [gen., *ἀκίδος*], a point). Fr., *acide*. Ger., *sauer*. It., *acido*. Sp., *ácido*. 1. Sour. 2. Having the chemical properties or showing the reaction of an acid. For special uses of the word, see A. DYSPEPSIA, A. ELECTRICITY, A. FERMENTATION, and A. SALT.

**ACIDA** (Lat.), n. n., pl. of *acidum* (g. v.). A<sup>2</sup>s(a<sup>3</sup>k)<sup>1</sup>d-a<sup>3</sup>. Gr., *ἄξια*. Fr., *acides*. Ger., *Säuren*. Acids.

**ACIDATION**, n. A<sup>2</sup>s-i<sup>2</sup>d-a'slu<sup>2</sup>n. Ger., *Versäuerung*. See ACIDIFICATION.

**ACIDE** (Fr.), n. A<sup>3</sup>s-ed. An acid.—**A. abietique.** Abietic acid.—**A. abioleique.** Ceananthic acid. [B. 93.]—**A. absinthique.** Absinthic acid.—**A. acéconitique.** Aceconitic acid.—**A. acéphosgénique.** Acephosgenic acid. [B.]—**A. acéphossique.** Acephossic acid. [B.]—**A. acétamido-phthalique.** Acetamidophthalic acid.—**A. acétamique.** Amidoacetic acid; glycocin. [B.]—**A. acéteux.** Acetous acid. See ACETIC ACID.—**A. acétique.** Acetic acid.—**A. acétique anhydre.** Anhydrous acetic acid; acetic anhydride.—**A. acétique aromatisé.** See ACETUM *britannicum*.—**A. acétique camphré.** See ACIDUM ACETICUM *camphoratum*.—**A. acétique concentré.** **A. acétique cristallin.** [Fr. Cod.] Glacial acetic acid. [B.]—**A. acétique dilué.** Dilute acetic acid; acidum acetum dilutum. [B.]—**A. acétique du bois.** Pyroligneous acid. [B. 92.]—**A. acétique du commerce** [Fr. Cod.] Syn.: *a. pyroligneux purifié*. An aqueous solution of acetic acid, corresponding to the acidum acetum of the U. S. Ph., containing 50 per cent. of the glacial acid, and having a sp. gr. of 1.060. [B.]—**A. acétique dulcifié.** **A. acétique étendu d'eau.** **A. acétique faible.** Dilute acetic acid.—**A. acétique monohydraté.** **A. acétique pur.** Glacial acetic acid. [B.]—**A. acétique sulfuré.** Thiodiglycolic acid. [B. 93.]—**A. acéto-butyrique.** Acetoacetic acid.—**A. acéto-butyrrique.** Acetobutyric acid. [B.] See PROPIONIC ACID.—**A. acéto-formique.** Acetoformic acid.—**A. acéto-glycolique.** Acetoglycolic acid. [B.]—**A. acéto-lactique.** Acetolactic acid. [B.]—**A. acéto-méta-mido-benzoïque.** Acetometamidobenzoic acid.—**A. acéto-sulfonique.** Acetonesulphonic acid.—**A. acéto-uramique.** Acetonuramic acid. [B.]—**A. acétonique.** Acetonic acid.—**A. acétonyl-uramique.** Acetonuramic acid.—**A. acéto-phosphorique.** Acetylphosphoric acid. [B.]—**A. acéto-propionique.** Acetopropionic acid.—**A. acéto-pyrophosphorique.** Acetylpyrophosphoric acid. [B.]—**A. acéto-salicylique.** Acetosalicic acid.—**A. acéto-sulfurique.** Thiacylenic acid. [B.]—**A. acéto-tartrique.** Acetotartaric acid.—**A. acéto-vanillique.** Acetovanillic acid. [B.]—**A. acétoxyacétique.** **A. acétoxyacétique.** Acetoglycolic acid. [B.]—**A. acétoxy-benzamique.** Acetoxycinnamic acid. See OXYBENZAMIC ACID.—**A. acétulmique.** Acetulinic acid. [B.]—**A. acéturique.** Acetic acid. See ACETYL GLYCOCINE.—**A. acétyl-anthraflavique.** Acetylanthraflavic acid. [B.]—**A. acétyleux.** Acetylous acid. See ALDEHYDIC ACID.—**A. acétyl-pyrophosphorique.** Acetylpyrophosphoric acid.—**A. acétyl-vanillique.** Acetvanillic acid. [B.]—**A. achilléique.** Achilleic (aconitic) acid. [B.]—**A. aconitanilique.** Aconitanilic acid. [A.]—**A. aconique.** Aconic acid. [B.]—**A. aconitique.** Aconitic acid. [B.]—**A. acridique.** Acridic acid. [B.]—**A. acrolactique.** Acrolactic acid.—**A. acroléine-sulfureux.** Acroleinsulphurous acid. [B.]—**A. acroléique.** **A. acrylique.** Acrylic acid. [B.]—**A. adipique.** Adipic acid. [B.]—**A. adipomallique.** Adipomalic acid. [B.] See HYDROXYADIPIC ACID.—**A. adipotartrique.** Adipotartrac acid. [B.] See DIHYDROXYADIPIC ACID.—**A. aérén.** Carbonic acid. [A. 324.] See CARBON DIOXIDE.—**A. ascénique.** *Æscinic* acid.—**A. agaricique.** Agaric acid. [B.]—**A. allanthique.** Allanthic acid. [B.]—**A. alantique.** Alantic acid. [B.]—**A. alcali.** See AMIDO-ACID.—**A. alcool.** See ALCOHOL ACID.—**A. aldéhyde.** See ALDEHYDE ACID.—**A. aldéhyde-sulfureux.** Ethylidenehydroxysulphonic acid. [B.]—**A. aldéhydique.** 1. An aldehydic acid. See under ACID. 2. Aldehydic acid. See ALDEHYDIC ACID.—**A. aldéhyde-diméthyl-protocatéche.** Aldehyddimethylprotocatechuic (opianic) acid. [B.]—**A. aldéhyde-méthyl-protocatéche.** Aldehydymethylprotocatechuic (aldehydovanillic) acid. [B.]—**A. aldéhydo-paroxy-benzoïque.** Aldehydoparoxybenzoic acid. [B.]—**A. aldéhydo-orthoxy-benzoïque.** Aldehydoorthoxybenzoic acid.—**A. aldéhydo-salicylique.** Aldehydosalicic acid.—**A. aldéhydo-vanillique.** Aldehydovanillic acid.—**A. aldéhydoxybenzoïque.** Aldehydoxybenzoic acid. [B.]—**A. alizarine-sulfonique.** Alizarinsulphonic acid.—**A. alizarique.** Alizaric acid. See PHTHALIC ACID.—**A. allanique.** Allanic acid.—**A. allantoïque.** Allantonic acid. [B.]—**A. allantoxanique.** Allantoxanic acid. [B.]—**A. allanturique.** Allanturic acid.—**A. allitrique.** Allitric acid.—**A. allophanique.** Allophanic acid.—**A. alloxanique.** Alloxanic acid. [B.]—**A. allyl-acétique.** Allylacetic acid.—**A. allyl-dithio-carbamique.** Allyldithiocarbamic acid.—**A. allyl-malonique.** Allylmalonic acid.—**A. allyl-oxybutyrique.** Allyloxybutyric acid.—**A. allyl-sulfocarbamique.** Allylthiocarbamic acid.—**A. allyl-sulfocarbo-**

**nic acid.** [A. 259.]—**A. aloérétique.** Aloeretic acid. [A. 259.]—**A. aloésinique.** Aloesinic acid. [A. 259.]—**A. aloécinique.** Alorcinic (alorcinic) acid. [B. 93.]—**A. alpha amido-valérique.** **A. alpha orsellique.** etc. See ALPHA AMIDOVALERIC ACID, ALPHA ORSELLINIC ACID, etc.—**A. amalique.** Amalic acid. [B.]—**A. amarique.** Amaric acid. [B.]—**A. ambréique.** Ambreic acid. [B.]—**A. aményl-valérique.** Aménylvaleric acid. [B.]—**A. améthénique.** Amethenic acid. [B.]—**A. amidé.** See AMIDO-ACID under ACID.—**A. amidacétique.** Amidoacetic acid; glycocine.—**A. amid-iséthionique.** Amidisethionic acid; taurine. [B.]—**A. amid-acétique.** Amidoacetic acid; glycocine. [B.]—**A. amid-anisique.** Amidoanisic acid. [B.]—**A. amidobarbiturique.** Amidobarbituric acid. [B.]—**A. amido-benzén-sulfonique.** Amidobenzenesulphonic acid. [B.]—**A. amido-benzoïque.** Amidobenzoic acid. [B. 93.]—**A. amido-benzoylacétique.** Amidobenzoylacetic acid. [B.]—**A. amido-butyrique.** Amidobutyric acid. [B.]—**A. amido-camphorique.** Amido-camphoric acid. [B.]—**A. amido-caproïque.** Amidocaproic acid; leucine. [B.]—**A. amido-capyrique.** Amidocaprylic acid. [B.]—**A. amido-chrysophanique.** Amidochrysophanic acid. [B.]—**A. amido-cinnamique.** Amidocinnamic acid. [B.]—**A. amido-coménique.** Amidocomenic acid. [B.]—**A. amido-cuminique.** Amidocumic acid. [B. 93.]—**A. amido-dicyanique.** Dicyanamic acid. [B.]—**A. amido-diméthyl-propionique.** Amidodimethylpropionic acid. See BETA AMIDOVALERIC ACID.—**A. amido-dinitro-phénique.** Amidodinitrophenol. [B. 93.] See PICRAMIC ACID.—**A. amido-dracylique.** Paramidobenzoic acid. [B.] See AMIDOBENZOIC ACID.—**A. amido-glutarique.** Amidoglutaric (glutamic) acid. [B.]—**A. chlor-azoteux**. Nitrosyl chloride. [B.]—**A. chlor-azotique**. Nitrohydrochloric acid. 2. Chloronitric acid (nitroxyl chloride). [B.]—**A. chloreux**. Chlorous acid. [B.]—**A. chlorhydrine-sulfonique**. Chlorhydrinsulphonic acid. [B.]—**A. chlorhydrine-sulfurique**. Chlorhydrinsulphuric acid. [B.]—**A. chlorhydrique**. See the major list.—**A. chlor-hydroxyrotartrique**. Chlorhydroxyrotartaric acid. [B.]—**A. chlorhypoazotique**. Chlorhypoazotic acid; nitrosyl dichloride. [B.]—**A. chlorindaturique**. A. chlorindopténique. Two acids said to be formed by the action of chlorine on indigo. [B, 93.]—**A. chloriodique**. Chloriodic acid. [B, 93.]—**A. chlorique**. Chloric acid.—**A. chlor-isamique**. Chlorisamic acid. [B, 93.]—**A. chlor-isatinique**. Chlorisatinic acid. [B, 93.]—**A.**

**chlor-iséthionique**. Chlorisethionic acid. [B.]—**A. chlor-isocrotonique**. Chlorisocrotonic acid. [B.]—**A. chlor-itamallique**. Chloritamalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID.—**A. chloro-acétique**. A. chloro-acrylique. A. chloro-anilique. A. chloro-anisique. A. chloro-arsénieux. See A. chloracétique. A. chloracrylique. A. chloranilique. A. chloranislque. A. chlorarsénieux. A. chloro-aureique. Chlorauric acid. [B.]—**A. chloro-azoteux**. A. chloro-azotique. See A. chlorazoteux. A. chlorazotique.—**A. chloro-benzénésulfonique**. Chlorbenzenesulphonic acid. [B.]—**A. chloro-benzoïque**. Chlorbenzoic acid. [B.]—**A. chloro-borique**. Boron trichloride. [B, 93.]—**A. chloro-butyrique**. Chlorbutyric acid. [B.]—**A. chloro-carbonique**. Chlorcarbonic acid. [B.] See CARBON OXYCHLORIDE.—**A. chloro-chromique**. Chlorchromic acid. [B.]—**A. chloro-cinchoninique**. Chlorcinchoninic acid. [B.]—**A. chloro-cinnamique**. Chlorcinnamic acid. [B.]—**A. chloro-citramallique**. Chlorcitramalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID.—**A. chloro-citrique**. Chlorcitric acid. [B.]—**A. chloro-coménique**. Chlorcomenic acid. [B.]—**A. chloro-crotonique**. Chlorcrotonic acid.—**A. chloro-cyanique**. Chlorhydrocyanic acid. [B.]—**A. chloro-dracylique**. Chlordracyle (parachlorbenzoic) acid. [B.]—**A. chlorogénique**. Chlorogenic acid. [B.]—**A. chloro-hypoazotique**. Chlorhypoazotic acid (nitrosyl dichloride). [B.]—**A. chloro-iodique**. See A. chloriodique.—**A. chloro-iridique**. Chloriridic acid. [B.]—**A. chloro-isamique**. A. chloro-isatinique. A. chloro-iséthionique. A. chloro-isocrotonique. A. chloro-itamallique. See A. chlorisamique. A. chlorisatinique. A. chloriséthionique. A. chlorisocrotonique. A. chloritamallique.—**A. chloro-lactique**. Chlorlactic acid. [B.]—**A. chloro-maléique**. Chlormaleic acid. [B.]—**A. chloro-mésamallique**. Chlormesamalic acid. [B.] See CHLORHYDROPYROTARTARIC ACID.—**A. chloro-michmylique**. Chloromichmylic acid. [B, 93.]—**A. chloro-muconique**. Chlormuconic acid. [B.]—**A. chloro-naphtalique**. Chloronaphthalic acid. [B.]—**A. chloro-nitreux**. See A. chlorazoteux.—**A. chloro-nitrique**. See A. chlorazotique.—**A. chloro-nitrobenzoïque**. Chlornitrobenzoic acid. [B.]—**A. chloro-palladique**. Chloropalladic acid. [B.]—**A. chloro-phénolsulfonique**. Chlorphenolsulphonic acid. [B.]—**A. chloro-phénylique**. Chlorphenol. [B.]—**A. chlorophyllanique**. Chlorophyllanic acid. [B.]—**A. chloro-platineux**. Chloroplatinous acid. [B.]—**A. chloro-platinique**. Chloroplatinic acid. [B.]—**A. chloro-platino-diphosphoreux**. Chloroplatinodiphosphorous acid. [B.]—**A. chloro-platino-phosphoreux**. Chloroplatinophosphorous acid. [B.]—**A. chloro-propionique**. Chlorpropionic acid. [B.]—**A. chloro-quarténylique**. Chlorquartenylic acid. [B.]—**A. chloro-quinoléine-carbonique**. Chlorquinolinecarbonic acid. [B.]—**A. chloro-salicylique**. Chlorsalicylic acid. [B.]—**A. chloro-salique**. Chlorsalicylic acid. [B.] See CHLORBENZOIC ACID.—**A. chloro-spiroyleux**. Chlorsalicylic acid; chlorsalicyl hydride. [B, 93.]—**A. chloro-spiroyleux**. Chlorsalicylic acid. [B, 93.]—**A. chloro-subérancaroxylique**. Chlorsubérancaroxylic acid. [B.]—**A. chloro-subérique**. Chlorsuberic acid. [B.]—**A. chloro-sulfonique**. Chlorsulphonic acid. [B.]—**A. chloro-tétracrylique**. Chlortetracrylic (beta chlorotronic) acid. [B.] See CHLOROTRONIC ACID.—**A. chloro-toluenesulfonique**. Chlortoluenesulphonic acid. [B.]—**A. chlor-toxalique**. A. chlor-oxalovinique. Chloroxalic acid. [B, 93.]—**A. chlor-oxycarbonique**. Chlorcarbonic acid. [B, 93.] See CARBON OXYCHLORIDE.—**A. chlor-oxynaphtalique**. Chlorhydroxy-naphtaliquone. [B, 93.]—**A. chlor-rhodique**. Chlorrhodic acid. [B.]—**A. cholalique**. Chotalic (cholic) acid. [B.]—**A. choléinique**. A. choléique. Choleic (taurocholic) acid. [B.]—**A. choléo-camporique**. Choleocamporic (cholidonic) acid. [B.]—**A. cholestérinique**. A. cholestérique. Cholesteric acid. [B.]—**A. cholinique**. Cholinic acid. [B.]—**A. choliue**. Cholic acid. [B.]—**A. cholidinique**. Cholidinic acid. [B.]—**A. cholidanique**. Cholidonic acid. [B.]—**A. cholidolique**. Cholidic acid. [B, 93.]—**A. cholonique**. Cholonic acid. [B.]—**A. chondrotrique**. Chondrotritic acid. [B.]—**A. chromique**. See the major list.—**A. chrysalylique**. Dinitramidosalicylic acid. [B.]—**A. chrysamidique**. Chrysamidic acid. [B, 93.]—**A. chrysamminique**. A. chrysamminique. Chrysamminic acid. [B.]—**A. chrysanique**. Chrysanisic acid. [A, 324; B.] See DINITRAMIDOBENZOLIC ACID.—**A. chrysinique**. Chrysinic acid. [A, 324; B.]—**A. chrysoléique**. Picric acid. [A, 324; B.]—**A. chrysophanique**. Chrysophanic acid. [B.]—**A. chyzique**. Porret's term for hydrocyanic acid. [A, 344.] Derived from the letters C (carbon), H (hydrogen), Az (azote, or nitrogen), which make up the chemical formula of the body.—**A. chyzique ferruré**. Hydroferrocyanic acid. [A, 344.]—**A. chyzique sulfuré**. Thiocyanic acid. [A, 344.]—**A. cicérique**. Ciceric acid. [A, 344.]—**A. cimicique**. Cimicic acid. [B.]—**A. cinchomérone**. Cinchomeronic acid. [B.]—**A. cinchonine-disulfonique**. Cinchoninedisulphonic acid. [B.]—**A. cinchonine-sulfonique**. Cinchoninesulphonic acid. [B.]—**A. cinchonine-trisulfonique**. Cinchoninetrisulphonic acid. [B.]—**A. cinchoninique**. Cinchoninic acid. [B.]—**A. cincho-nique**. Cinchonic acid.—**A. cincho-tannique**. Cinchotannic (quinotannic) acid. [B.]—**A. cinnaményl-acrylique**. Cinnamenylacrylic acid. [B.]—**A. cinnaményl-angélique**. A. cinnaményl-angélique. Cinnamenylangelic acid. [B.]—**A. cinnaményl-crotonique**. Cinnamenylcrotonic acid. [B.]—**A. cinnaménique**. Cinnamic acid.—**A. cinnamo-mandélique**. Phenylloxycrotonic acid. [B.]—**A. cinnoylique**. Hydrocinnamic acid. [B.]—**A. cisso-tannique**. Cissotannic acid. [B.]—**A. citra-bromo-pyrotartrique**. Citrabromopyrotartaric acid. [B.] See BROMOPYROTARTARIC ACID.—**A. citracarrique**. A name (made up of the words citraconique and ars) given to mesaconic acid. [B.]—**A. citra-chloro-pyrotartrique**. Citrachloropyrotartaric acid. [B.] See CHLORPYROTARTARIC ACID.—**A. citraconique**. Citraconic acid. See PYROCITRIC ACID.—**A. citra-dibromo-pyrotartrique**. Citradibromopyrotartaric acid. [B.] See DIBROMOPYROTARTARIC

[B.]—**A. diamido-cuminique.** Dioxycuminamic acid. [B. 38.]  
—**A. diamido-diphénique.** Diamidodiphenic acid. [B.]—**A. diamyl-oxalique.** Diamyloxalic acid. [B. 93.]—**A. diatérebique.** Diaterbic acid. [B.]—**A. diatomique.** See *Diatomic acid*.  
—**A. diatropique.** Diatropic acid. [B.]—**A. diazo-amido-benzofonique.** Diazoamidobenzoic acid. [B.]—**A. diazo-amido-sulfonique.** Diazoambenzenesulphonic acid. [B.]—**A. diazo-benzofonique.** Diazobenzoic acid. [B.]—**A. diazo-phénolsulfonique.** Diazophenolsulphonic acid. [B.]—**A. diazo-phénylsulfurique.** Diazophenylsulphuric acid.—**A. diazoxyl-benzofonique.** Diazoxylbenzoic acid. [B.]—**A. dibasique.** See *Dibasic acid*.—**A. dibenzilique.** Dibenzilic acid. [B.]—**A. dibenzyl-hydroxamique.** Dibenzylhydroxamic acid. [B.]—**A. dibenzyl-carboxylique.** Dibenzylcarboxylic acid. [B.]—**A. dibenzyl-dicarbonique.** Dibenzyldicarbonic acid. [B.]—**A. dibenzyl-phosphorique.** Dibenzylphosphonic acid. [B.]—**A. dibenzyl-sulfonique.** Dibenzylsulphonic acid. [B.]—**A. dibenzyl-tétrasilfonique.** Dibenzyltetrasulphonic acid. [B.]—**A. dibrom-acétique.** Dibromacetic acid. [B.]—**A. dibrom-acrylique.** Dibromacrylic acid. [B.]—**A. dibrom-adipique.** Dibromadipic acid. [B.]—**A. dibrom-amidobenzofonique.** Dibromamidobenzoic acid. [B.]—**A. dibrom-dihydroéthyl-crotonique.** Dibromdiethylethylcrotonic acid. [B.]—**A. dibrom-isocaproïque.** Dibromisocaproic acid. [B.] See *DIBROMCAPROIC ACID*.—**A. dibromo-acétique.** A. **dibromo-acrylique.** A. **dibromo-adipique.** A. **dibromo-amidobenzofonique.** See *A. dibrom-acétique*. *A. dibrom-acrylique.* *A. dibrom-adipique.* *A. dibrom-amidobenzofonique.*—**A. dibromo-barbiturique.** Dibromobarbituric acid. [B.]—**A. dibromo-bénéhique.** A. **dibromo-bénique.** Dibromobenenic acid. [B.]—**A. dibromo-benzofonique.** Dibromobenzoic acid. [B.]—**A. dibromo-butyrique.** Dibromobutyric acid. [B.]—**A. dibromo-crotonique.** Dibromocrotonic acid. [B.]—**A. dibromo-gallique.** Dibromogallic acid. [B.]—**A. dibromo-isocaproïque.** Dibromisocaproic acid. [B.]—**A. dibromo-lactique.** Dibromolactic acid. [B.]—**A. dibromo-malonique.** Dibromomalonic acid. [B.]—**A. dibromo-nitro-benzofonique.** Dibromonitrobenzoic acid. [B.]—**A. dibromo-palmitique.** Dibromopalmitic acid. [B.]—**A. dibromo-propionique.** Dibromopropionic acid. [B.]—**A. dibromo-pyromucique.** Dibromopyromucic acid. [B.]—**A. dibromo-pyracémique.** Dibromopyracemic acid. [B.]—**A. dibromo-pyrotartrique.** Dibromopyrotartric acid. [B.]—**A. dibromo-pyruvique.** Dibromopyruvic acid. [B.]—**A. dibromo-salicylique.** Dibromosalicylic acid. [B.]—**A. dibromo-stéarique.** Dibromostearic acid. [B.]—**A. dibromo-subérique.** Dibromosuberlic acid. [B.]—**A. dibromo-succinique.** Dibromosuccinic acid. [B.]—**A. dibromo-undécylique.** Dibromoundecylic (dibromhendecateic) acid. [B.]—**A. dibromo-valérique.** Dibromvaleric acid. [B.]—**A. dicarbo-naphtalique.** Dicarbo-naphthalic acid. [B.]—**A. dichlor-acétique.** Dichloracetic acid. [B.]—**A. dichlor-acétonique.** Dichloracetonic acid. [B.]—**A. dichlor-acrylique.** Dichloracrylic acid. [B.]—**A. dichlor-isobutyrique.** Dichlorisobutyric acid. [B.]—**A. dichloro-acétique.** A. **dichloro-acétonique.** A. **dichloro-acrylique.** See *A. dichlor-acétique*. *A. dichlor-acétonique.* *A. dichlor-acrylique.*—**A. dichloro-benzofonique.** Dichlorobenzoic acid. [B.]—**A. dichloro-isobutyrique.** Dichlorisobutyric acid.—**A. dichloro-lactique.** Dichlorolactic acid. [B.]—**A. dichloro-phthalique.** Dichlorophthalic acid. [B.]—**A. dichloro-picolinique.** A. **dichloro-pyridinecarbonique.** Dichloropyridinecarbonic acid. [B.]—**A. dichloro-propionique.** Dichloropropionic acid. [B.]—**A. dichloro-salicylique.** Dichlorosalicylic acid. [B.]—**A. dichloroxy-picolinique.** Dichloroxy-picolinic acid. [B.]—**A. diconique.** Diconic acid. [B.]—**A. dicéuinamique.** Dioxycuminamic acid.—**A. dicyanamique.** Dicyanamic acid. [B.]—**A. dicyanique.** Dicyanic acid. [B.]—**A. dicyan-oxy-isobutyrique.** Dicyanoxisobutyric acid. [B.]—**A. diéth-acétique.** Diethacetic acid. [B.]—**A. diéth-oxalique.** Diethoxalic acid. [B.]—**A. diéthoxy-glyoxylique.** Diethoxyglyoxylic acid. [B.]—**A. diéthyl-acétique.** Diethacetic acid.—**A. diéthyl-amidobenzofonique.** Diethylamidobenzoic acid. [B.]—**A. diéthyl-anilinesulfonique.** Diethylanilinesulphonic acid. [B.]—**A. diéthyl-arsinique.** Diethylarsinic acid. [B.]—**A. diéthyl-citrique.** Diethyleitric acid. [B.]—**A. diéthyl-éthylénelactique.** Diethylethylenelactic acid. [B.]—**A. diéthyl-glyoxylique.** Diethylglyoxylic acid. [B.]—**A. diéthylidenelactamique.** Diethylidenelactamic acid. [B.]—**A. diéthyl-isocyanurique.** Diethylisocyanuric acid. [B.]—**A. diéthyl-malonique.** Diethylmalonic acid. [B.] See *PIELIC ACID*.—**A. diéthyl-métamido-benzofonique.** Diethylmetamidobenzoic acid. See *DIETHYLAMIDOBENZOIC ACID*.—**A. diéthyl-oxalique.** Diethoxalic acid. See *HYDROXYCAPROIC ACID*. [B.]—**A. diéthyl-oxamique.** Diethyloxamic acid. [B.]—**A. diéthyl-oxacétique.** Diethyloxacetic (diethylbutyric) acid. See *HYDROXYCAPROIC ACID*. [B.]—**A. diéthyl-oxylbutyrique.** Hydroxydiethylbutyric acid. [B.] See *HYDROXYCAPRYLIC ACID*. [B.]—**A. diéthyl-phosphinique.** Diethylphosphinic acid. [B.]—**A. diéthyl-phosphorique.** Diethylphosphoric acid. See *ETHYL phosphate*.—**A. diéthyl-protocatéchnique.** Diethylprotocatechuic acid. [B.]—**A. digallique.** Digallic acid. [B.]—**A. digitalinique.** A. **digitalique.** Digitalic acid. [B.]—**A. digitaloinique.** Digitaloic acid. [B.]—**A. digitoléique.** Digitoleic acid. [B.]—**A. diglycolamidique.** A. **diglycolamique.** Diglycolamic acid. [B.]—**A. diglycolique.** Diglycollic acid; glycollic anhydride. [B.]—**A. diheptyl-acétique.** Diheptylacetic acid. [B.]—**A. dihydracrylamique.** Dihydracrylamic acid. [B.]—**A. dihydracrylique.** Dihydracrylic acid. [B.]—**A. dihydrique.** Dihydric acid. See *DIatomic ACID*.—**A. dihydro-carbonylique.** Rhodizonic acid. [B.]—**A. dihydro-carboxylique.** Dihydrocarboxylic acid. [B.]—**A. dihydro-phthalique.** Dihydrophthalic acid. [B.]—**A. dihydro-téréphthalique.** A. **dihydro-téréphthalique.** Dihydroterephthalic acid. [B.]—**A. dihydroxy-adipique.** Dihydroxyadipic acid. [B.]—**A. dihydroxy-benzofonique.** Dihydroxybenzoic acid. [B.]—**A. dihydroxy-cinnamique.** Dihydroxycinnamic (caffeic) acid.

**O**, no; **O**<sup>2</sup>, not; **O**<sup>3</sup>, whole; **Th**, thin; **Th**<sup>2</sup>, the; **U**, like oo in too; **U**<sup>2</sup>, blue; **U**<sup>3</sup>, lull; **U**<sup>4</sup>, full; **U**<sup>5</sup>, urn; **U**<sup>6</sup>, like ū (German).

[B.]—**A. dihydroxy-propionique.** Dihydroxypropionique (glyc-  
ric) acid. [B.]—**A. dihydroxy-succinique.** Dihydroxysuccinic  
(tartaric) acid. [B.]—**A. difuod-acétique, A. difuod-acétique.**  
Difluoacetic acid. [B.]—**A. difuod-salicylique.** Difluosalicylic  
acid. [B.]—**A. difuod-vanillique.** Difluovanillic acid. [B.]—  
**A. diséthionique.** Disethionie acid. [B.]—**A. disoamyl-  
hydroxyacétique.** Disoamylhydroxyacetic acid. [B.]—**A. disoamyl-  
oxalique.** Disoamylloxalic acid. [B.]—**A. diisopro-  
pyl-oxalique.** Diisopropylloxalic acid. [B.] See HYDROXYCAPRY-  
LIC ACID.—**A. dilactamidique, A. dilactarique.** Dilactamic  
acid. [B.]—**A. dilactique.** Dilactic acid. Lactic anhydride. [B.]  
—**A. diluturique.** Dilituric acid. [B.]—**A. diméth-acétique.**  
Dimethacetic (isobutyric) acid. [B.] See BUTYRIC ACID.—**A. di-  
méth-éth-acétique.** Dimethethacetic acid. [B.] See CAPROIC  
ACID.—**A. diméth-oxalique.** Dimethoxalic (acetic) acid. [B.]  
—**A. diméthyl-acétique.** Dimethacetic acid. [B.]—**A. diméth-  
éthyl-acrylique.** Dimethacrylic acid. [B.]—**A. diméthyl-arsé-  
nique, A. diméthyl-arsinique.** Dimethylarsinic acid. [B.]—  
**A. diméthyl-barbiturique.** Dimethylbarbituric acid. [B.]—  
**A. diméthyl-benzoïque.** Dimethylbenzoic acid. [B.]—**A. diméthyl-  
éthyl-citrique.** Dimethylethylcitric acid. [B.]—**A. diméthyl-éthyl-  
succinique.** Dimethyldihydroxysuccinic (dimethyltartaric) acid. [B.]  
—**A. diméthyl-éthyl-acétique.** Dimethethacetic acid. [B.]  
**A. diméthyl-malonique.** Dimethylmalonic acid. [B.]—**A. di-  
méthyl-oxalique.** Dimethoxalic (acetic) acid. [B.]—**A. di-  
méthyl-parabanique.** Dimethylparabanic acid. [B.]—**A. di-  
méthyl-phosphinique.** Dimethylphosphinic acid. [B.]—**A. di-  
méthyl-phosphorique.** Dimethylphosphoric acid. See METHYL  
phosphate. —**A. diméthyl-protocatélique.** Dimethylproto-  
catechic (veratric) acid. [B.]—**A. diméthyl-succinique.** Di-  
methylsuccinic acid. [B.]—**A. diméthyl-tartrique.** Dimethyl-  
tartaric acid. [B.]—**A. diméthyl-thioparabanique.** Dimethyl-  
thioparabanic acid. [B.]—**A. diméthyl-urique.** Dimethyluric  
acid. [B.]—**A. dinitranisique.** Dinitranisic acid. [B.]—**A. di-  
nitro-amidobenzoïque.** Dinitramidobenzoic acid. [B.]—**A. di-  
nitro-amidosalicylique, A. dinitro-anthranilique.** Dinitra-  
midosalicylic acid. [B.] See DINITRAMIDOBENZOIC ACID.—**A. di-  
nitro-benzoïque.** Dinitrobenzoic acid. [B.]—**A. dinitro-crésy-  
lique.** Dinitroresol. [B.]—**A. dinitro-diphénamique.** Diamido-  
dinitrophenol. [B. 38.]—**A. dinitro-éthylénique.** Dinitroethy-  
lic acid. [B.]—**A. dinitro-naphtylsulfureux.** Dinitronaphta-  
lenesulphuric acid. [B.]—**A. dinitro-ortho-amido-benzoïque.**  
Dinitroorthoamidobenzoic acid. See DINITROAMIDOBENZOIC ACID.—  
**A. dinitro-paramido-benzoïque.** Dinitroparamidobenzoic  
(chrysanisic) acid. [B.] See DINITROAMIDOBENZOIC ACID.—**A. di-  
nitro-phénamique.** Amidodinitrophenol. [B. 38.]—**A. dinitro-  
phénique.** Dinitrophenol. [B.]—**A. dinitro-phénolsulfon-  
ique.** Dinitrophenolsulphonic acid. [B.]—**A. dinitro-salicy-  
lique.** Dinitrosalicylic acid. [B.]—**A. dinitroso-sulfonique.**  
Dinitrosulphonic acid. [B.]—**A. dinitro-tartrique.** Dinitro-  
tartaric acid. [B.]—**A. dinitro-toluenesulfonique.** Dinitro-  
toluenesulphonic acid. [B.]—**A. dinitro-uramido-benzoïque.**  
Dinitrooramidobenzoic acid. [B.]—**A. dinitroxy-tartrique.** Di-  
nitrotartaric acid. [B.]—**A. dioctyl-acétique.** Dioctylacetic  
(isostearic) acid. [B.] See STEARIC ACID.—**A. dioctyl-malo-  
nique.** Dioctylmalonic acid. [B.]—**A. diorsellique.** Lecanoric  
acid. [B. 93.]—**A. dioxy-adipique.** Dioxyadipic acid. See DI-  
HYDROXYADIPIC ACID.—**A. dioxy-benzoïque.** Dioxybenzoic  
(dihydroxybenzoic) acid. [B.]—**A. dioxy-chlorique.** Chlorous acid.  
[B.]—**A. dioxy-cinnamique.** Dihydroxycinnamic (caffeic) acid.  
[B.]—**A. dioxy-crésylsulfureux.** Cresolisulphonic acid. [B.]—  
**A. dioxy-cuminamique.** Dioxyeuminamic acid. [B.]—**A. dioxy-  
éthényl-tricarboxylique.** Dioxyethenyltricarboxylic (desoxalic)  
acid. [B.]—**A. dioxy-naphtalique.** Dioxynaphthalic  
acid. [B.]—**A. dioxy-picolinique.** Dioxypicolinic (comenamic)  
acid. [B.]—**A. dioxy-propionique.** Dihydroxypropionic (glyc-  
eric) acid. [B.]—**A. dioxy-succinique.** Dihydroxysuccinic (tartaric)  
acid. [B.]—**A. dipalmitique.** Dipalmitic acid. [B.]—**A. di-  
phénique.** Diphenic acid. [B.]—**A. diphéno-benzoïque.** Di-  
hydroxybenzoic acid. [B.]—**A. diphényl-acétique.** Diphenyl-  
acetic acid. [B.]—**A. diphényl-arsonique.** Diphenylarsonic acid.  
[B.]—**A. diphényl-bromacétique.** Diphenylbromacetic acid.  
[B.]—**A. diphényl-carbonique.** Diphenylcarbonic acid. [B.]  
See PHENYLPHENYLENEDICARBONIC ACID.—**A. diphényl-glycolique.**  
Diphenylglycolic (benzilic) acid. [B.]—**A. diphényl-propio-  
nique.** Diphenylpropionic acid. [B.]—**A. diphényl-succinique.**  
Diphenylsuccinic acid. [B.]—**A. diphényl-sulfonique.** Diphenyl-  
sulphonic acid. [B.]—**A. diphospho-platinique.** Chlorplatio-  
diphosphorous acid. [B.]—**A. diphosphorique.** Pyrophosphoric  
acid. [B.]—**A. diphtalique.** Diphtalic acid. [B.]—**A. dipropyl-  
éthylénelactique.** Dipropylethylenelactic acid. [B.]—**A. dipropyl-  
oxalique.** Dipropylloxalic acid. [B.]—**A. dipseudo-  
butyl-méthyl-acétique.** Dipseudoethylmethylacetic acid. See  
HENDECARBOIC ACID.—**A. dipyridine-tétracarbonique.** Dipyri-  
dinetetracarbonic acid. [B.]—**A. dipyridyl-dicarbonique.** Dipyri-  
dylldicarbonic acid. [B.]—**A. dipyridyl-monocarbonique.** Dipyri-  
dylldimonomocarbonic acid. [B.]—**A. disalicylique.** Disali-  
cyclic acid; salicylic anhydride. [B. 93.]—**A. distéaryl-glycérol-  
phosphorique.** Distearylglycerolphosphoric acid. [B.]—**A. di-  
sul-anilique.** Amidobenzenedisulphonic acid.—**A. disulf-an-  
thraquinonique.** Anthraquinenedisulphonic acid. [B.]—**A. di-  
sulf-étholique.** Ethylenedisulphonic acid. [B. 38.]—**A. disulf-  
éthylidénique.** Ethylenedisulphonic acid. [B.]—**A. disulfo-  
benzoïque.** Disulphobenzoic acid. [B.]—**A. disulfo-benzo-  
lique.** Benzenedisulphonic acid. [B. 38.]—**A. disulfo-coumaril-  
ique.** Disulphocoumarilic acid. [B.]—**A. disulfo-cyanique.** Di-  
thiocyanic acid. [B.]—**A. disulfo-métholique.** Methenedi-  
sulphonic acid. [B. 38. 93.]—**A. disulfo-naphtolique.** Naph-  
thalenedisulphonic acid. [B.]—**A. disulfonique.** A disulphonic  
acid. See under ACID.—**A. disulfo-propolique.** Propylenedi-  
sulphonic acid. [B. 38.]—**A. disulfurique.** Nordhausen sulphur-  
ic acid. See PYROSULPHURIC ACID.—**A. ditarrique.** Tartaric  
acid. [B.]—**A. ditro-carbonique.** Dithiocarbonic acid. [B.]

**dithio-cyanique.** Dithiocyanic acid. [B.]—**A.** **Adithio-cyclolique.** Dithioglucolic acid. [B.]—**A.** **dithionique.** Dithionioic acid. [B.]—**A.** **dogielique.** Dogelic acid. [B.]—**A.** **draacique.** Draacylic acid. [B.]—**A.** **du borax.** Boric acid. [B.]—**A.** **du citron.** Citric acid. [B.]—**A.** **d'urine.** See **Acid of urine.**—**A.** **durylique.** Durylic acid. [B.]—**A.** **du sucre.** Oxalic acid. [B.]—**A.** **du tartre.** Tartaric acid. [B.]—**A.** **échiécrique.** Echiberic acid. [B.]—**A.** **élaïdique.** Elaidic acid. [B.]—**A.** **élaïdoïque.** Elaidioic (ricinoleic) acid. [A. 324.] **A.** **élaïque.** Oleic acid. Hydrotic acid (more correctly *A. hydrotique*). —A. hydro-xanthique. Perthiocyanic acid. [B. 93.]—A. hydroxy-acétique. Glycolic acid. [B.]—A. hydroxy-adipique. Hydroxyadipic acid. [B.]—A. hydroxy-anthraquinonesulfonique. Hydroxyanthraquinonesulphonic acid. —A. hydroxybenzoïque. Hydroxybenzoic acid. —A. hydroxy-butyrique. Hydroxybutyric acid. [B.]—A. hydroxy-caproïque. Hydroxycaproic acid. [B.]—A. hydroxy-caprylique. Hydroxycaprylic acid. [B.]—A. hydroxy-cinnamique. Hydroxycinnamic acid. [B.]—A. hydroxy-citraconique. Hydroxycitraconic acid. [B.] See HYDROXYPYROCITRIC ACID. —A. hydroxy-citrique. Hydroxycitric acid. [B.]—A. hydroxy-diéth-acétique. A. hydroxy-diéthyl-acétique. Hydroxydiethacetic acid. See HYDROXYCAPRYLIC ACID. —A. hydroxy-diéthyl-butyrique. Hydroxydiethylbutyric acid. See HYDROXYCAPRYLIC ACID. —A. hydroxy-éthyl-butyrique. Hydroxyethylbutyric acid. See HYDROXYCAPRYLIC ACID. —A. hydroxy-éthylène-disulfonique. Hydroxyethylenedisulphonic (ethylenedihydroxydisulphonic) acid. [B.]—A. hydroxy-éthylène-sulfonique. Isethionic acid. [B.]—A. hydroxy-glutarique. Hydroxyglutaric (glutanic) acid. [B.]—A. hydroxy-heptalique. Hydroxyheptanoic acid. [B.]—A. hydroxy-isobutyrique. Hydroxyisobutyric acid. See HYDROXYBUTYRIC ACID. —A. hydroxy-isocaproïque. Hydroxyisocaproic (leucic) acid. See HYDROXYCAPRIC ACID. —A. hydroxy-isocaprylique. Hydroxyisocaprylic. See HYDROXYCAPRYLIC ACID. —A. hydroxy-isovalérique. Hydroxyisovaleric acid. See HYDROXYVALERIC ACID. —A. hydroxy-isuvitique. See *A. hydroxy-isovitique*. —A. hydroxy-itaconique. Hydroxyitaconic acid. [B.] See HYDROXYPYROCITRIC ACID. —A. hydroxylamine-disulfonique. Hydroxylaminedisulphonic acid. [B.]—A. hydroxylamine-monosulfonique. A. hydroxylamine-sulfonique. Hydroxylaminemonosulphonic acid. [B.]—A. hydroxy-maléique. Hydroxymaleic acid. [B.]—A. hydroxy-malonique. Hydroxymalonic (tartaric) acid. [B.]—A. hydroxy-margarique. Hydroxymargaric acid. [B.]—A. hydroxy-mésitylénique. Hydroxymesitylenic acid. See HYDROCOUMARIC ACID. —A. hydroxy-méthyl-butyrique. Hydroxymethylbutyric acid. See HYDROXYVALERIC ACID. —A. hydroxy-méthyl-éthyl-butyrique. Hydroxymethyl-ethylbutyric acid. [B.] See HYDROXYXANTHOIC ACID. —A. hydroxy-méthyl-phényl-formique. Hydroxymethylphenylformic acid. [B.]—See under HYDROXYTOLUTIC ACID. —A. hydroxy-myristique. Hydroxymyristic acid. [B.]—A. hydroxy-naphtoïque. Hydroxynaphthoic acid. [B.]—A. hydroxy-naphtoquinone-sulfonique. Hydroxynaphthoquinonesulphonic acid. [B.]—A. hydroxy-octoïque. Hydroxyoctoic (hydroxycaprylic) acid. [B.]—A. hydroxy-cénoanthoïque. Hydroxycenoanthoic acid. [B.]—A. hydroxy-oléïque. Hydroxyoleic (ricinoleic) acid. [B.]—A. hydroxy-paracoumarique. Hydroxyparacoumaric acid. [B.] See under HYDROXYPYROCITRIC ACID. —A. hydroxy-pentoïque. Hydroxyvaleric acid. [B.]—A. hydroxy-phényl-amidopropionique. Tyrosine. [B.]—A. hydroxy-phényl-propionique. Hydrocoumaric acid. —A. hydroxy-pierique. Trinitroresorcin. [B.]—A. hydroxy-propionique. Lactic acid. [B.]—A. hydroxy-pyrocitrique. Hydroxypyrocitric acid. [B.]—A. hydroxy-pyrotartrique. Hydroxypyrotartaric acid. [B.]—A. hydroxy-salicylique. Hydroxysalicylic acid. [B.]—A. hydroxy-succinique. Hydroxysuccinic (malic) acid. [B.]—A. hydroxy-toluïque. A. hydroxy-toluïque. Hydroxytoluic acid. [B.]—A. hydroxy-uvitique. Hydroxyuvitic acid. [B.]—A. hydroxy-valérannique. Hydroxyvalerianic (hydroxyisovaleric) acid. See HYDROXYVALERIC ACID. —A. hydroxy-valérique. Hydroxyvaleric acid. [B.]—A. hydrurilique. Hydurilic acid. [B. 93.]—A. hydrurique. Hydruric acid. [B.]—A. hydrurilique. Hydurilic acid. [B. 38.]—A. hyénique. Hyenic acid. [B.]—A. hyo-cholalique. A. hyo-cholique. Hyocholic acid. [B.]—A. hyo-glycocholique. Hyoglycocholic acid. [B. 93.]—A. hyocincholique. Hyocincholic acid. [B.] See TROPIC ACID. —A. hyo-taurocholique. Hyotaurocholic acid. [B. 93.]—A. hyperchlorique. Perchloric acid. [A. 324.]—A. hypermanganique. Permanganic acid. [A. 324.]—A. hypo-azoteux. Hyponitrous acid. [B.]—A. hypo-azotique. Hyponitric acid; nitrogen tetroxide. [B.]—A. hypo-bromeux. Hypobro-

mous acid. [B.]—A. hypo-chloreux. Hypochlorous acid. [B.]—A. hypo-chlorique. Hypochloric acid; peroxide of chlorine. [A. 324; B. 38.]—A. hypo-gallique. Hypogallic acid. [B.]—A. hypo-géique. Hypogaeic acid. [B.]—A. hypo-iodique. Hypoiodic acid. [B. 38.]—A. hypo-nitreux. Hyponitrous acid. [B.]—A. hypo-nitrique. Hyponitric acid; nitrogen tetroxide. [A. 324; B.]—A. hypo-phosphoreux. Hypophosphorous acid. [B.]—A. hypo-phosphorique. Hypophosphoric acid (a mixture of phosphorous and phosphoric acids). [A. 324; B. 38.]—A. hypo-picrotoxique. Hypopicrotoxic acid. [B.]—A. hypo-sulfocérulique. A. hypo-sulfoindigotique. Hyposulphindigotic acid. [B.]—A. hypo-sulfo-naphtalique. Naphthalenedisulphonic acid. [B. 38.]—A. hypo-sulfureux. Hyposulphurous acid. [B.]—A. hypo-sulfurique. Dithionic acid. [A. 324; B. 93.]—A. hypo-sulfurique bisulfuré. Tetrathionic acid. [B. 93.]—A. hypo-sulfurique de naphthalène. Naphthalenedisulphonic acid. [A. 324; B. 93.]—A. hypo-sulfurique monosulfuré. Trithionic acid. [B. 93.]—A. hypo-sulfurique trisulfuré. Pentathionic acid. [B. 93.]—A. igasurique. Igasuric acid. [B.]—A. illicique. Illicic acid. [B. 93.]—A. ilixanthique. Ilixanthin. [B.]—A. imasatique. Imasatic (isamic) acid. [A. 324; B. 93.]—A. imido-caprylique. Imidocaprylic acid. [B.]—A. imido-diméthyl-acétique-diméthyl-propionique. Imidodimethylacetic-dimethylpropionic acid. [B.]—A. imido-propionique. Imidopropionic (dilaetic) acid. [B.]—A. imido-succinique. Imidosuccinic acid. [B.]—A. indigotine-disulfonique. Sulphindigotic acid. [B.]—A. indigotine-monosulfonique. Phenicinsulphonic acid. [B.]—A. indigotique. Indigotic (anilic) acid. [A. 324; B.]—A. indinsulfurique. Indinsulphuric acid. [B. 93.]—A. indoxyl-glycérone. Indoxylglycuronic acid. —A. indoxyl-sulfurique. Indoxylsulphuric acid. —A. inosinique. A. inosique. Inosinic acid. [B.]—A. insolinique. Terephthalic acid. [B.] See PHTHALIC ACID. —A. iod-acétique. Iodacetic acid. [B.]—A. iodeux. Iodous acid. [A. 324.]—A. iodhydrique. Hydriodic acid. [B.]—A. iodique. Iodic acid. [B.]—A. iodo-acétique. Iodacetic acid. [B.]—A. iodo-benzoïque. Iodobenzoic acid. [B.]—A. iodo-lactique. Iodolactic acid. [B.]—A. iodonitrique. Iodonitric acid. [A. 324; B. 38.]—A. iodo-nitro-phénol-sulfonique. Iodonitrophenolsulphonic acid. [B.]—A. iodo-propionique. Iodopropionic acid. [B.]—A. iodo-pyroméconique. Iodopyromeconic acid. [B.]—A. iodo-salicylique. Iodosalicylic acid. [B.]—A. iodo-stéarique. Iodostearic acid. [B.]—A. iodo-sulfurique. Iodosulphuric acid. [B.]—A. iodo-vanillique. Iodovanillic acid. [B.]—A. ipécacuanhique. Ipecacuanhic acid. [B.]—A. ipoméique. A. ipomique. Ipomic acid. [B. 38, 92.]—A. iridi-cyanique. Iridicyanic acid. [B.]—A. isalloxanique. Isoalloxanic acid. [B.]—A. isamique. Isamic acid. [B.]—A. isatine-sulfonique. Isatinesulphonic acid. [B.]—A. isatique. Isatic acid. [A. 324; B. 93.]—A. is-atropique. Isatropic acid. [B.]—A. iséthionique. Isethionic acid. [B.]—A. iséthionurique. Isethionuric (taurocarbanic) acid. [B.]—A's iso-acryliques. Isoacrylic acids. See ACRYLIC ACIDS. —A. iso-alloxanique. Isoalloxanic acid. —A. iso-allylène-tétracarboxylique. Isoallylenetetracarboxylic acid. [B.]—A. iso-amyl-carbonique. Isocaproic acid. See CAPRIC ACID. —A. iso-amyl-sulfurique. Isoamylsulphuric acid. See AMYL sulphide. —A. isanthraflavique. Isoanthraflavic acid. [B.]—A. iso-atropique. Isatropic acid. [B.]—A. iso-bromomaleïque. Isobromomaleic acid. See BROMFUMARIC ACID. —A. isobutyl-carbonique. A. isobutyl-formique. Isovaleric acid. See VALERIC ACID. —A. isobutyl-malonique. Isobutylmalonic acid. [B.] See PIMELIC ACID. —A. isobutyl-oxymalonique. Isobutyltartronic acid. [B.]—A. isobutyl-sulfonique. Isobutylsulphonic acid. [B.]—A. isobutyl-tartronique. Isobutyltartronic acid. [B.]—A. isobutyrique. Isobutyric acid. See BUTYRIC ACID. —A. iso-caprique. Isocapric acid. See CAPRIC ACID. —A. iso-caproïque. Isocaproic acid. [B.] See CAPRIC ACID. —A. iso-caprylique. Isocaprylic acid. See CAPRYLIC ACID. —A. iso-cétique. Isoctic acid. See CETIC ACID. —A. iso-chloro-citramalique. Isochlorcitramalic acid. See CHLORCITRAMALIC ACID. —A. iso-cholanique. Isocholanolic acid. —A. iso-cinchoméronique. Isocinchomeronic acid. See CINCHOMERONIC ACID. —A. iso-crotonique. Isocrotonic acid. [B.] See CROTONIC ACID. —A. iso-octoïque. A. iso-octylique. Isocaprylic acid. See CAPRYLIC ACID. —A. iso-cyanopropionique. Isocyanpropionic acid. [B.] See CYANPROPIONIC ACID. —A. iso-cyanurique. Fulminuric acid. [B. 93.]—A. iso-dibrom-adipique. A. iso-dibromo-adipique. Isodibromadipic acid. See DIBROMADIPIC ACID. —A. iso-dibromo-succinique. Isodibromosuccinic acid. See DIBROMSUCINIC ACID. —A. iso-diglycol-éthylénique. Lactonic acid. [B.]—A. iso-dulcétique. Isodulcetic acid. [B.]—A. iso-cénoanthylénique. A. iso-heptolique. A. isoheptylique. Isoenanthylic acid. See CENANTHYLIC ACID. —A. iso-hexoïque. Isocaproic acid. See CAPRIC ACID. —A. iso-hydromellitique. A. iso-hydromellitique. Isohydromellitic acid. [B.] See HYDROMELLITIC ACID. —A. iso-hydro-pyromellitique. A. iso-hydro-pyromellitique. Isohydroypyromellitic acid. [B.] See HYDROPYROMELLITIC ACID. —A. iso-lactique. Isolactic acid. [B.] See LACTIC ACID. —A. iso-malique. Isomalic acid. See MALIC ACID. —A. iso-naphtalique. Isonaphthalic acid. See NAPHTHALIC ACID. —A. iso-naphtolique. Isonaphtholic acid. [B.] See NAPHTHOLIC ACID. —A. iso-nicotinique. Isonicotinic (gamma pyridinecarboxylic) acid. See PYRIDINECARBOXYLIC ACID. —A. iso-nonylique. A. iso-nonylique. Isononylic (methylhexylacetic) acid. [B.]—See PELARGONIC ACID. —A. iso-octoïque. A. iso-octylique. Isocaprylic acid. [B.] See CAPRYLIC ACID. —A. iso-palmitique. Diheptalacetic acid. [B.] See PALMITIC ACID. —A. iso-phényl-crotonique. Isophenylcrotonic acid. See PHENYLCHLORONIC ACID. —A. isophthalique. Isophthalic acid. See PHTHALIC ACID. —A. iso-pimélique. Isopimelic acid. See PIMELIC ACID. —A. iso-opilacétique. Isopilacetic acid. [B.] See OPINIC ACID. —A. isopropyl-acétique. Isopropylacetic acid. [B.] See VALERIC ACID. —A. isopropyl-acrylique. Isopropylacrylic (pyroterebic) acid. [B.]—A. isopropyl-carbonique. Isobutyric acid. [B.] See BUTY-

RIC ACID.—A. isopropyl-malonique. Isopropylmalonic acid. [B.]—A. isopropyl-phényl-acrylique. Cuménylacrylic acid. [B.]—A. isopropyl-phosphinique. Isopropylphosphinic acid. [B.]—A. isopropyl-succinique. Isopropylsuccinic acid. See DIMELIC ACID.—A. isopurpurique. Isopurpuric acid. See PURPURIC ACID.—A. iso-pyrromucique. Isopyromucic acid. See PYROMUCIC ACID.—A. iso-pyrotartrique. Isopyrotartronic acid. See PYROTARTRIC ACID.—A. iso-stéarique. Isostearic acid. See STEARIC ACID.—A. iso-succérique. Isosucceric acid. See SUBERIC ACID.—A. iso-succinique. Isosuccinic acid. [B.] See SUCCINIC ACID.—A. iso-tartridique. Tartrelic acid. [B. 93.]—A. iso-tartrique. Tartralic acid. [B. 93.]—A. iso-tolnylique. Metatoluic acid. [B. 93.] See TOLUIC ACID.—A. iso-urique. Isouric acid. See URIC ACID.—A. iso-uvitique. A. iso-uviténique. Isuvitic acid. See UVITIC ACID.—A. iso-valérique. Isovaleric acid. [B.] See VALERIC ACID.—A. iso-vanillique. Isovanillic acid. See VANILLIC ACID.—A. iso-xyllidique. Isoxyllidic acid. See UVITIC ACID.—A. iso-uvitique. Isuvitic acid. [B.] See UVITIC ACID.—A. ita-bromo-pyrotartrique. Itabromopyrotartaric acid. [B.] See BROMOPYROTARTARIC ACID.—A. ita-chloro-pyrotartrique. Itachloropyrotartaric acid. [B.] See CHLOROPYROTARTARIC ACID.—A. itaconique. Itonic acid. See PYROCITRIC ACID.—A. ita-dibromo-pyrotartrique. Itadibromopyrotartaric acid. [B.] See DIBROMOPYROTARTARIC ACID.—A. itamallique. Itamalic acid. [B.] See HYDROXYPYROTARTARIC ACID.—A. ita-pyruvique. Itapyruvic acid. [B. 93.]—A. ita-tartrique. Itatartaric acid. [B.]—A. jalapinique. Jalapinic acid. [B.]—A. jalapique. Jalapic acid. [B.]—A. japonique. Japonic (catechuic) acid. [B. 93.]—A. jatrophiue. Jatrophiic acid. [B. 88.]—A. jervique. Jervic acid. [B.]—A. juglandique. Juglandic acid. [B.]—A. kaïroliné-carbonique. Kaïrolinécarbonic (methyltetrahydroquinolécabonique) acid. [B.]—A. kali-saccharique. Glucic acid. [B. 93.]—A. karabique. Succinic acid. [B. 92.]—A. kinique. Quinic acid. [B. 93.]—A. kinoïque. Kinoisic acid. [B.]—A. kino-tannique. Kinotannic acid. [B. 93.]—A. kinovique. Quinovic acid. [A. 313.]—A. kraméria-tannique. Krameriatannic acid. [B.] See RATANHATANNIC ACID.—A. kramérique. Krameriac acid. [B.]—A. kynurénique. Cynurenic acid. [B.]—A. laburnique. Laburnic acid. [B.]—A. laccique. Laccic acid. [B. 93.]—A. lactique [Fr. Cod.]. Lat., acidum lacticum. Lactic acid. [B.]—A. lactique de fermentation. Fermentation lactic acid; ordinary lactic acid. [B. 93.]—A. lactique normal. Hydracrylic acid. [B. 93.] See LACTIC ACID.—A. lactique ordinaire. Fermentation lactic acid. [B. 93.] See LACTIC ACID.—A. lacto-lactique. Lactic anhydride. [B.]—A. lactonique. Lactonic acid. [B.]—A. lactucique. Lactucic acid. [B. 93.]—A. lacturamique. Lacturamic acid. [B. 93.]—A. lampique. Aldehydic acid. [B. 93.]—A. lantanurique. Lantanuric acid. [A. 324.]—A. lanuginique. Lanuginic acid. [B. 93.]—A. larixinique. Larixinic acid. [B.]—A. lassylique. Salicylic acid. [B. 93.]—A. laurélique. Laurelic acid. [B. 93.]—A. laurinique. A. laurique. Lauric acid. [A. 324.]—A. laurinique. Larixinic acid. [B. 93.]—A. lauronolique. Lauronolic acid. [B.]—A. lauro-stéarique. Lauric acid. [B.]—A. lauroxylique. Lauroxylic acid. [B. 93.]—A. lécanorique. Lecanoric acid. [B. 93.]—A. léditannique. Leditannic acid. [B. 93.]—A. lédumique. Ledumic acid. [B.]—A. légumique. Legumic acid.—A. lépargylique. Anchoic acid. [B. 93.]—A. lépidine-carbonique. Lepidinecarbonic acid. [B.]—A. leucaumique. Leucine. [B. 93.]—A. leucindin-sulfurique. Leucindinsulphuric acid.—A. leucique. Leucic (hydroxyisocaproic) acid. See HYDROXYCAPROIC ACID.—A. leuconique. Leuconic (oxycroconic) acid. [B. 93.]—A. leuco-rosolique. Leucauric acid. [B. 93.]—A. leucoturique. Leucoturic acid; oxalantine. [A. 324.]—A. lévo-camphorique. Lévo-camphoric acid. See CAMPHORIC ACID.—A. lévo-tartrique. Lévo-tartaric acid. See TARTARIC ACID.—A. lévulinique. Lévuilnic acid. [B.]—A. lichénique. Lichenic (fumaric) acid. [B. 93.]—A. lichen-stéarique. Lichenstearic acid. [A. 324.]—A. ligueux. A. ligué. Pyroligneous acid. [A. 324.]—A. ligo-sulfurique. Lignosulphuric acid. [B.]—A. limettique. Limetic acid. [B. 93.]—A. linoléique. Linoleic acid. [B. 93.]—A. lino-tannique. Linotannic acid. [B. 93.]—A. lipinique. A. lipique. Lipic acid. [B. 93.]—A. lithénique. A. lithiasique. A. lithique. Uric acid. [A. 313.]—A. litho-fellique. Lithofellie acid. [B.]—A. lthmique. Lithmic acid. [B. 93.]—A. lizarique. Lizaric acid. [B. 93.]—A. lobarique. Lobaric acid. [B.]—A. lobélique. Lobelic acid. [B.]—A. lupamarique. Lupamaric acid. [B.]—A. lupulinique. Lupulinic acid. [B.]—A. lutéique. Luteic acid. [B.]—A. luteo-gallique. Luteogallie acid. [B. 93.]—A. luteolique. Luteolic acid; luteolin.—A. lutidine-tricarbone. Lutidinetricarbonic acid. [B.]—A. lutidinique. Lutidinic acid. [B.]—A. lycéotanique. Lycotonic acid. [B.]—A. mafurique. Maleic acid. [B.]—A. mafalique. Mafalic acid. [B.]—A. mafzénique. Maizenic acid. [B.]—A. malamique. Malamic acid. [B.]—A. maléique. Maleic acid. See FUMARIC ACID.—A. malique. Malic acid. [B.]—A. malique artificiel. A. malique du sucre. Dibasic saccharic acid. [B. 93.]—A. malo-burique. A. malodurique. Maloduric acid. [B. 93.]—A. malonique. Malonic acid. [B.]—A. malusien. Malic acid. [B. 93.]—A. maly-urédique. Malyurédic acid. [B.]—A. mandélique. Mandelic (phenylglycollic) acid. [B. 93.] See under HYDROXYTOLUIC ACID.—A. manganésique. A. manganique. Manganic acid. [A. 324.]—A. mangan-sulfurique. Sulphomannitic acid. An acid sulfate of mannite. [B. 93.]—A. manni-tartrique. Mannitetrartronic acid. [B. 93.]—A. mannite-hexasulfurique. Mannitehexasulphuric acid; hexone hexasulphate. [B.]—A. mannite-sulfurique. Mannitesulphuric acid; hexone trisulphate. [B.]—A. mannitique. Mannitic acid. [B.]—A. margarénique. Margaric acid. [A. 324.]—A. margareux. Stearic acid. [B.]—A. margarique. Margaric acid. [B.]—A. margaritique. Margaritic (ricinostearic) acid. [B.]—A. marin. Hydrochloric acid. [B.]—A. marin déphlogistiqué. Chlorine. [A. 324.]—A. ma-

rin fumant. Concentrated hydrochloric acid. [B. 88.]—A. masticiue. Masticic acid. [B.]—A. maté-tannique. Matetannic acid. [B.]—A. méconamique. Meconamic acid. [B.]—A. méconique. Meconic acid. [B.]—A. méconique anhydre. Conenic acid. [B.]—A. médullique. Medullic acid. [B.]—A. mélangallique. Metagallie acid. [A. 324.]—A. mélanique. Melanic acid. [B.]—A. mélanogallique. Metagallie acid. [B.]—A. mélanurénique. A. mélanurique. Melanurénic acid; ammelide. [B.]—A. mélassique. Melassic acid. [B. 93.]—A. méllotique. Mellitic acid. See HYDROCOMARIC ACID.—A. méllissique. Melissic acid.—A. méllithique. A. méllithique. A. méllithique. Mellitic acid. [B. 93.]—A. méllonhydrique. A. méllonique. Mellone (hydromellone); hydromellonic acid. [B.]—A. méllaphanique. Mellophanic acid. [B.]—A. ménispermique. Menispermic acid; the variety of malic acid found in *Cocculus indicus*. [B.]—A. méphétique. A. méphitique. Carbonic anhydride. [A. 324.] See CARBON DIOXIDE.—A. mercapto-acétique. Thioglycollic acid. [B.]—A. mercapturique. Mercapturic acid. [B.]—A. mésoaconique. Mesoconic acid. See PYROCITRIC ACID.—A. méso-dibromo-pyrotartrique. Mesadibromopyrotartaric acid. [B.] See DIBROMOPYROTARTARIC ACID.—A. méso-mallique. Mesamalic acid. [B.] See HYDROXYPYROTARTARIC ACID.—A. méso-monochloro-pyrotartrique. Mesamono-chloropyrotartaric acid. [B.] See CHLOROPYROTARTARIC ACID.—A. méso-tylène-sulfonique. Mesitylenesulphonic acid. [B.]—A. méso-tylénique. Mesitylenic acid. [B.] See under XYLIC ACID.—A. méso-tylène-sulfureux. Mesitylenesulphuric acid. [B. 93.]—A. méso-camphorique. Meso-camphoric acid. [B.] See CAMPHORIC ACID.—A. méso-tartrique. Mesotartaric acid. [B.] See TARTARIC ACID.—A. mésoxallique. Mesoxalic acid. [B.]—A. métabénzène-disulfonique. Metabenzedisulphonic acid. [B.] See BENZENEDISULPHONIC ACID.—A. métabismuthique. Metabismuthic acid. [B.]—A. métaborique. Metaboric acid. [B.]—A. métabromo-benzésulfonique. Metabromobenzesulphonic acid. [B.] See BROMBENZESULPHONIC ACID.—A. métabromo-benzoïque. Metabromobenzoic acid. [B.] See BROMBENZOIC ACID.—A. méta-cétique. A. méta-céto-nique. Propionic acid. [B. 93.]—A. méta-chloro-benzésulfonique. Metachlorobenzesulphonic acid. [B.] See CHLORBENZESULPHONIC ACID.—A. méta-chloro-benzoïque. Metachlorobenzoic acid. [B.] See CHLORBENZOIC ACID.—A. méta-crochaphuque. Metacacaphic acid. [B.]—A. méta-crésolsulfonique. A. méta-crésolsulfurique. Metacresolsulphonic acid. [B.] See CRESOLSULPHONIC ACID.—A. méta-crésyl-sulfonique. Metacresylsulphonic acid. [B.] See TOLUENESULPHONIC ACID.—A. méta-crésyl-sulfurique. Metacresylsulphuric acid. See CRESOLSULPHONIC ACID.—A. méta-diazo-benzésulfonique. Metadiazobenzesulphonic acid. [B.] See DIAZOBENZESULPHONIC ACID.—A. métagallique. Metagallie acid. [B.]—A. métagammique. Metagaric acid; metarabin. [B.]—A. méta-hydroxy-benzoïque. Methoxybenzoic acid. See HYDROXYBENZOIC ACID.—A. méthalique. See *Metallic* acid.—A. métamargique. Metamargic acid. [B.] See MARGARIC ACID.—A. méta-méconique. Conenic acid. [B. 93.]—A. méta-mido-benzésulfonique. Metamidobenzesulphonic acid. [B.] See AMIDOBENZESULPHONIC ACID.—A. méta-mido-benzoïque. Metamidobenzoic acid. See AMIDOBENZOIC ACID.—A. méta-mido-benzoylacétique. Metamidobenzoylacetic acid. [B.] See AMIDOBENZYLACETIC ACID.—A. méta-nitro-benzésulfonique. Metanitrobzenesulphonic acid. See NITROBENZESULPHONIC ACID.—A. méta-nitro-benzoïque. Metanitrobenzoic acid. See NITROBENZOIC ACID.—A. méta-nitro-benzoylacétique. Metanitrobenzoylacetic acid. [B.] See NITROBENZYLACETIC ACID.—A. méta-antimonieux. Metantimonious acid. [B.]—A. méta-antimonique. Metantimonic acid. [B.]—A. méta-oxycarboïque. Methoxybenzoic acid. [B.] See HYDROXYBENZOIC ACID.—A. méta-pectique. Metapectic acid. [B.]—A. méta-phénylène-dicarbone. Metaphenylenedicarbonic (isophthalic) acid. [B.] See PHTHALIC ACID.—A. méta-phosphorique. Metaphosphoric acid. [B.]—A. méta-phthalique. Iso-phthalic acid. See PHTHALIC ACID. [B.]—A. méta-purpurique. Metapurpuric acid. [B. 93.]—A. méta-quinaldine-carbonique. Metaquinaldinecarbonic acid. [B.] — **A. pseudo-valérique**. Pseudovaleric (trimethacetic) acid. [B.] See VALERIC ACID. — **A. pseudo-oxybutyrique**. Pseudoxybutyric acid. [B.] See HYDROXYBUTYRIC ACID. — **A. ptéri-tannique**. Pteritanic acid. [B. 93.] — **A. pulvinique**. Pulvinic acid. [B.] — **A. punico-tannique**. Punicotannic acid. [B.] — **A. purpuramique**. Purpuranic acid; purpuramide. [B. 93.] — **A. purpurique**. Purpuric acid. [B.] — **A. purpurique blanc**. Vauquelin's term for a compound now regarded as an impure alloxanic acid. [A. 2.] — **A. purrétique**. A. purrétique. Euxanthic acid. [B. 93.] — **A. pyrique**. Pyric acid. [B.] — **A. pyr-acétique**. Pyroigneous acid. [B.] — **A. pyr-acétique**. Itaconic acid. See PYROCITRIC ACID. — **A. pyr-éthérique**. Pyrethric acid. [B.] — **A. pyridine-carbonique**. Pyridinecarbonic acid. [B.] — **A. pyridine-disulfonique**. Pyridinedisulphonic acid. [B.] — **A. pyridine-monosulfonique**. Pyridinesulphonic acid. [B.] — **A. pyridine-pentacarboxique**. Pyridinepentacarboxylic acid. [B.] — **A. pyridine-sulfonique**. Pyridinesulphonic acid. [B.] — **A. pyridine-tricarboxique**. Pyridinetricarboxylic acid. [B.] — **A. pyro-acétique**. Pyroigneous acid. [B.] — **A. pyro-acétique**. Itaconic acid. [A. 324; B.] See PYROCITRIC ACID. — **A. pyro-alizarique**. Pyroalzaric acid; phthalic anhydride. [A. 324; B. 93.] — **A. pyro-antimonique**. Pyroantimonie acid. [B.] — **A. pyro-arsénique**. Pyroarsenic acid. [B.] — **A. pyro-bismuthique**. Pyrobismuthic acid. [B.] — **A. pyro-borique**. Pyroboric acid. [B.] — **A. pyro-catéchine**. Pyrocatechuic acid; pyrocatechin. [B.] — **A. pyro-cinchonéromonique**. Pyrocinchonéromonic (gamma pyridinecarbonic) acid. [B.] See PYRIDINECARBONIC ACID. [B.] — **A. pyro-cinchoninique**. Pyrocinchoninic acid. [B.] — **A. pyro-citrrique**. Pyrocitric acid. [B.] — **A. pyro-coménanique**. Pyrocemenanic acid. [B.] — **A. pyro-coménique**. Pyrocemenic acid. [B.] — **A. pyro-déorique**. A. pyro-dorique. Pyrodeoric acid; pyrocatechin. [B.] — **A. pyro-gallique**. Pyrogallic acid; pyrogallol. [B.] — **A. pyro-gentisique**. Pyrogentisic acid. — **A. pyro-glycique**. Pyroxydin. [B. 93.] — **A. pyro-isomaltique**. Pyroisomaltic acid. [B.] — **A. pyro-oléique**. Sebaccic acid. [B.] — **A. pyro-lactique**. Lactide. [B. 93.] — **A. pyro-ligneux**. Pyroigneous acid. [B.] — **A. pyro-ligneux purifié**. Purified pyroigneous acid; commercial acetic acid. [B.] — **A. pyro-lignique**. Pyroigneous acid. [A. 313.] — **A. pyro-lithique**. Cyanuric acid. [B. 93.] — **A. pyro-lithofellique**. Pyrolithofellie acid. [B.] — **A. pyro-oliville**. Pyrolivillie acid. [A. 324; B. 93.] — **A. pyro-malique**. Maleic acid. [B. 93.] — **A. pyro-marique**. Sylvic (abietic) acid. — **A. pyro-mécasonique**. Pyromecazonic acid. [B.] — **A. pyro-méconique**. Pyromeconic acid. [B.] — **A. pyro-mellique**. A. pyromellitique. Pyromellitic acid. [B.] — **A. pyro-morintannique**. Pyromorintannic acid; pyrocatechin. [B.] — **A. pyro-mucique**. A. pyro-muqueux. Pyromucic acid. [A. 324; B.] — **A. pyro-pectique**. Pyropectic acid. [B.] — **A. pyro-phosphamique**. Pyrophosphamic acid. [B.] — **A. pyro-phospho-diamique**. Pyrophosphodiamic acid. [B.] — **A. pyrophosphorique**. Pyrophosphoric acid. [B.] — **A. pyrophosphotriamique**. Pyrophosphotriamic acid. [B.] — **A. pyro-racémique**. Pyracemic (acetoformic) acid. [B.] — **A. pyro-saccho-lactique**. Pyrosaccholaric (pyromucic) acid. [A. 324.] — **A. pyro-sorbique**. Maleic acid. [B. 93.] — **A. pyro-sulfurique**. Pyrosulphuric acid. [B.] — **A. pyro-tartareux**. Pyrotartaric (acetoformic) acid. [B. 3.] — **A. pyro-tartrique**. Pyrotartaric acid. [B.] — **A. pyro-térébique**. A name given by Babourdin to a substance afterward shown to be impure pyrotartronic acid. [B. 3.] — **A. pyro-térébique**. Pyrotartronic acid. [B. 38.] — **A. pyro-urique**. Pyouric (cyanuric) acid. [B. 93.] — **A. pyro-uvique**. Pyruvic (acetoformic) acid. [B.] — **A. pyro-vanadique**. Pyrovanadic acid. [B.] — **A. pyro-vinique**. Pyrotartaric acid. [B.] — **A. pyro-xylique**. Pyroxylic acid. [B.] — **A. pyrrique**. A. pyrrique.

Purrheic (euxanthic) acid. [B.] — **A. pyr-uvique**. Pyruvic (acetoformic) acid. [B.] — **A. quarténilyque**. Quartenylic (isocrotonic) acid. [B.] See CROTONIC ACID. — **A. quassique**. Quassic acid. [B.] — **A. quercétique**. Quercetic acid. [B. 93.] — **A. quercimérique**. Quercimeric acid. [B.] — **A. quercitannique**. Quercitannic acid. [B.] — **A. quercit-tartrique**. Quercitartaric acid. [B.] — **A. quercitrrique**. Quercitriric acid; quercitrin. [B. 92, 93.] — **A. quercitri-tannique**. Quercitritannic acid. [B.] — **A. quinaldine-carbonique**. Quinaldinecarbonic acid. [B.] — **A. quinaldinique**. Quinaldinic acid. [B.] — **A. quinine-sulfurique**. Quininesulphuric acid. — **A. quininique**. Quininic acid. [B.] — **A. quinine**. Quinic acid. [B.] — **A. quino-léine-benzo-carbonique**. Quinolenebenzocarbonic acid. [B.] — **A. quino-léine-disulfonique**. Quinolenedisulphonic acid. [B.] — **A. quino-léine-métasulfonique**. Quinolene-metasulphonic acid. [B.] See QUINOLINESULPHONIC ACID. — **A. quino-léine-ortho-sulfonique**. Quinoleneorthosulphonic acid. [B.] See QUINOLINESULPHONIC ACID. — **A. quino-léine-parasulfonique**. Paraquinolinesulphonic acid. [B.] See QUINOLINESULPHONIC ACID. — **A. quino-léine-sulfonique**. Quinolinesulphonic acid. [B.] — **A. quino-léine-sulfurique**. Quinolinesulphuric acid. [B.] — **A. quino-léine-tricarboxique**. Quinolinetricarboxylic acid. [B.] — **A. quino-léique**. Quinolonic acid. [B.] — **A. quino-léique**. A. quino-léique. Quinolonic acid. [B.] — **A. quino-pierrique**. Quinopieric acid. [B.] — **A. quino-tannique**. Quinotannic (cinchotannic) acid. [B.] — **A. quino-tannique**. Quinotartannic acid. [B. 93.] — **A. quino-vatique**. Quinovatic acid; quinovin (quinoova bitter). [B.] — **A. quino-vique**. Quinovic acid. [B.] — **A. quino-ylrique**. Dioxiquinone. [B.] — **A. racémique**. Racemic acid. [B.] See TARTARIC ACID. — **A. racémique-camphorique**. Paracamphoric acid. [B. 93.] See CAMPHORIC ACID. — **A. racémo-carbonique**. Desoxallic acid. [B.] — **A. racémo-vinique**. Ethylracemic acid. [B.] See ETHYL TARTRATE. — **A. ratanhia-tannique**. Ratanhiatannic acid. [B. 93.] — **A. réel**. An acid free from admixture; a chemically pure acid. [A. 324.] — **A. résinapittique**. Resinapittic acid. [B.] — **A. résino-galacique**. Guaiaretic acid. [B.] — **A. ré-téno-disulfonique**. Retenedisulphonic acid. [B.] — **A. ré-tinique**. Retinic acid. [B.] — **A. rhabbarbarique**. Chrysophanic acid. [B.] — **A. rhamno-tannique**. Rhamnotannic acid. [B.] — **A. rhamno-xanthique**. Rhamnoxanthic acid; frangulin. [B.] — **A. rhéadinique**. A. rhéadique. Rheadadic acid. [B.] — **A. rhé-rique**. Chrysophanic acid. [B. 93.] — **A. rhéo-tannique**. Rheotannic acid. [B.] — **A. rétinique**. Retinic acid. [B.] — **A. rhénique**. 1. An obsolete term for oxalic acid. [B. 93.] 2. Rheumatic acid. — **A. rhod-acétique**. Thioacetic acid. [B.] — **A. rhod-anhytrique**. A. rhodanique. Thiocyanic acid. [B.] — **A. rhodéorétnique**. Convolvulic acid. [B.] — **A. rhodéorétnolique**. Convolvulinic acid. [B.] — **A. rhodéorétique**. Convolvulic acid. [B.] — **A. rhodique**. Rhodium trioxide. [B. 93.] — **A. rhodizique**. A. rhodizonique. Rhodizonic acid. — **A. rhodo-tannique**. Rhodotannic acid. [B.] — **A. rhubarbarique**. Chrysophanic acid. [B.] — **A. ricinellatique**. Ricinelladic acid. [B. 93.] — **A. ricinoléique**. A. ricinolique. Ricinoleic acid. [B.] — **A. ricino-stérique**. Ricinostearic acid. [B.] — **A. riolozinique**. A. riolozinique. Piptazotic acid. [B. 93.] — **A. robinique**. Robinic acid. [B.] — **A. rocellique**. Roccellic acid. [B. 92.] — **A. rosacé**. A. rosacique. See UROERYTHRIN. — **A. rosique**. Rosic acid. [B. 92.] — **A. rosolique**. Rosolic acid. [B.] — **A. rothique**. Rothic acid. [B. 93.] — **A. rottérique**. Rottleric acid; rottlerine. [B.] — **A. rubérythrique**. A. rubérythrique. Ruberythric acid. [B.] — **A. rubianique**. Rubianic acid. [B.] — **A. rubichlorique**. Rubichloric acid. [B.] — **A. rubinique**. Rubinic acid. [B. 93.] — **A. rubino-nitrique**. Rubinonitric acid. [B. 93.] See PICRAMIC ACID. — **A. rubi-tannique**. Rubitanic acid. [B. 93.] — **A. rufi-cinchonique**. Ruficinchonic acid; cinchona red. [B.] — **A. rufigallique**. Rufigallic acid. [B.] — **A. rufimorique**. Rufimoric acid. [B.] — **A. rufinovique**. Rufinovic acid. [A. 324.] — **A. rufino-sulfurique**. Rufinosulphuric (sulphuric) acid. [B. 93.] — **A. rufi-quinotannique**. Ruficinchonic acid; cinchona red. [B. 92.] — **A. rufi-quinovique**. Rufiquinovic acid; quinoova red. [B.] — **A. rufi-sulfurique**. Sulphuric acid. [B.] — **A. rufi-tannique**. Tannoxalic acid. [B. 93.] — **A. rufo-catéchique**. Rufo-catechuic (rubinic) acid. [B.] — **A. rufo-hydro-ellagique**. Rufo-hydroellagic acid. [B.] — **A. ruthénio-cyanique**. Rutheniocyanic acid. [B.] — **A. ruthénique**. Ruthenic acid; ruthenium trioxide. [B.] — **A. rutillant**. Nitrous acid. [B. 88.] — **A. rutilino-sulfurique**. Sulphuric acid. [B. 93.] — **A. rutinique**. Rutin. [B. 93.] — **A. rutique**. 1. Rutin. [B. 92.] 2. Rutic (capric) acid. [B. 93.] — **A. sabadillique**. Sabadillic acid. [B.] — **A. saccharin**. An old term for oxalic acid. [B.] — **A. saccharinique**. Saccharinic acid. [B.] — **A. saccharique**. Saccharic acid. — **A. saccharique bibasique**. A. saccharique dibasique. Dibasic saccharic acid. [B.] — **A. saccharique monobasique**. Monobasic saccharic acid. [B.] — **A. saccharo-vanillique**. Saccharovanillic acid. [B.] — **A. saccharumique**. Saccharumic acid. [B.] — **A. sacchactique**. A. saccho-lactique. Sacchactolic (mucic) acid. [B. 93.] — **A. sacchulmique**. Sacchulmic acid. [A. 324.] — **A. salicyl-acétique**. Acetosalic acid. [B.] — **A. salicyl-amine**. Salicylamic acid; salicylamide. [B.] — **A. salicyleux**. A. salicylligique. Salicylous acid; salicylic aldehyde. [B.] — **A. salicylique** (Fr. Cod.). Salicylic acid. [B.] — **A. salicyllique anhydre**. Salicylic anhydride. [B. 93.] — **A. salicyllique bibromé**. Dibromosalicylic acid. [B.] — **A. salicyllique bichloré**. Dichlorosalicylic acid. [B.] — **A. salicyllique biiodé**. Diiodosalicylic acid. [B.] — **A. salicyllique binitré**. A. salicyllique dinitré. Dinitrosalicylic acid. [B.] — **A. salicyllique monobromé**. Bromosalicylic acid. [B.] — **A. salicyllique monochloré**. Chlorosalicylic acid. [B.] — **A. salicyllique monoiodé**. Iodosalicylic acid. [B.] — **A. salicyllique mononitré**. Nitrosalicylic acid. [B.] — **A. salicyllique tribromé**. Tribromosalicylic acid. [B.] — **A. salicyllique triiodé**. Triiodosalicylic acid. [B.] — **A. salicylo-salicyllique**. Salicylosalicylic acid. [B. 93.] See SALICYLIC ANHYDRIDE. — **A.**

**English sulphuric acid.**—**A. sulfurique aromatique.** See **ACIDUM sulphuricum aromaticum.**—**A. sulfurique cristallisé.** Anhydrous sulphuric acid; sulphur trioxide. [A, 324.]—**A. sulfurique d'Allemagne.** See **Nordhausen sulphuric acid** and **Pyrosulphuric acid.**—**A. sulfurique dilué.** Dilute sulphuric acid. [A, 313.]—**A. sulfurique de Nordhausen.** A. sulfurique de Saxe. See **Nordhausen sulphuric acid.**—**A. sulfurique dilué** [Fr. Cod.]. Lat., *acidum sulphuricum dilutum*. See **Dilute sulphuric acid.**—**A. sulfurique distillé.** Sulphuric acid obtained by distillation; Nordhausen sulphuric acid. [A, 324.]—**A. sulfurique du commerce** [Fr. Cod.]. Commercial sulphuric acid. [B.]—**A. sulfurique dufilé.** The same as *A. sulfurique alcoolisé*. [B, 92.]—**A. sulfurique fumant.** A. sulfurique glacé. See **Nordhausen sulphuric acid** and **Pyrosulphuric acid.**—**A. sulfurique hydraté.** Hydrated sulphuric acid; sulphuric anhydride combined with water. [A, 324; B.]—**A. sulfurique monohydraté.** Chemically pure sulphuric acid; so called because it may be regarded as sulphuric anhydride combined with a single molecule of water. [B.]—**A. sulfurique officinal** [Fr. Cod.]. Official sulphuric acid; the acid freed from water and other impurities. [B.]—**A. sulfurique phlogistique.** Sulphurous acid. [B, 88.]—**A. sulfurique pur.** See *A. sulfurique officinal.*—**A. sumbulacique.** Sumbulic acid. [B.]—**A. sumbulique.** A. sumbulolique. Sumbulic acid. [B.]—**A. sur-chlorique.** Perchloric acid. [B.]—**A. sur-chromique.** Perchromic acid. [B.]—**A. syccocérylique.** Syccoceric acid. [B.]—**A. sylvinologique.** Sylvinolic acid. [B.]—**A. sylvique.** Sylvic (abietic) acid. [A, 324; B, 93.]—**A. sylvique amorphe.** Oxyisylvic acid. [B, 93.]—**A. tabacique.** Tabacic acid. [B, 93.]—**A. tampionique.** Tampionic acid. [B, 93.]—**A. tampionolique.** Tampionic acid. **ACIDE ARSÉNIEUX** [Fr. Cod.], (Fr.), n.  $A^3r-sa-ni^2-u^5$ . Arsenious acid; arsenic trioxide. [B.]—**A. a. porcellanique**. Opaque porcelain-like arsenious acid. [A. 324; B.] See **ARSENIC trioxide**.—**A. vitreux**. Arsenic glass; vitreous oxide of zinc. [B.] See **ARSENIC trioxide**.—**Granules d'a. a.** [Fr. Cod.], Lat., *granula cum acido arsenioso*. Syn.: *granules de Dioscoride*. A preparation consisting of granules each of which contains 1 milligramme ( $\frac{1}{1000}$  grain) of arsenic trioxide, with 4 centigrammes ( $\frac{4}{100}$  grain) of milk sugar and 1 centigramme ( $\frac{1}{100}$  grain) of gum arabic, with enough of the *mellite simple* of the Fr. Codex to secure the proper consistence. [B.]—**Soluté d'a. a.** [Fr. Cod.], Lat., *acidum arseniosum aqua solutum*. Syn.: *liqueur de Boudin*. A preparation consisting of 1 part of arsenic trioxide dissolved in 1,000 parts of distilled water. [B.]

**ACIDE BROMHYDRIQUE** (Fr.), n. Bro-me-drek. Hydrobromic acid.—**A. bromhydrique dissous** [Fr. Cod.], An aqueous solution of hydrobromic acid. See **HYDROBROMIC ACID**.—**A. b. gazeux** [Fr. Cod.], Gaseous hydrobromic acid.—**A. b. officinal**, **Solution aqueuse d'a. b.** See **A. b. dissous**.

**ACIDE CHLORHYDRIQUE** (Fr.), n. Klor-e-drek. Hydrochloric acid or its aqueous solution. [B.]—**A. c. alcoolisé**. Syn.: *alcoolé chlorhydrique*, *alcool muriatique*, *esprit de sel dulcifié*. A mixture of 1 part of 22 per cent. hydrochloric acid and 3 parts of 36 per cent. alcohol. [A. 321.]—**A. c. du commerce** [Fr. Cod.], Commercial hydrochloric acid.—**A. c. dissous** [Fr. Cod.], An aqueous solution of hydrochloric acid gas. See **HYDROCHLORIC ACID**.—**A. c. officinal**. The official hydrochloric acid of the Fr. Codex. See

**HYDROCHLORIC ACID**.—**A. c. ordinaire**. See **A. c. du commerce**.—**A. c. pur**. See **A. c. officinal**.—**Solution aqueuse d'a. c.** See **A. c. dissous**.

**ACIDE CHROMIQUE** (Fr.), n. Kro-mek. Chromic acid. [B.]—**A. c. cristallisé** [Fr. Cod.], Crystallized or solid chromic acid; chromium trioxide. [B.]—**Soluté d'a. c.** [Fr. Cod.], Lat., *acidum chromicum aqua solutum*. A preparation consisting of a mixture of equal parts by weight of chromium trioxide and distilled water. [B.]

**ACIDE CITRIQUE** [Fr. Cod.], (Fr.), n. Se-trek. Citric acid.—**Poudre d'a. c.** [Fr. Cod.], Lat., *pulvis acidi citrici*. Citric acid reduced to a powder and sifted. [B.]—**Sirop d'a. c.** [Fr. Cod.], See **Syrupus ACIDI CITRICI**.

**ACIDE GALLIQUE** [Fr. Cod.], (Fr.), n. Ga<sup>2</sup>lek. Gallic acid.—**Glycérolé d'a. g.** See **Glycerinum** and **Glyceritum ACIDI GALLICI**.

**ACIDE PHÉNIQUE** (Fr.), n. Fa-nek. Carboic acid.—**Acétoilé d'a. p.** See **VINAIGRE phéniqué**.—**A. p. alcoolisé**. A mixture of 9 parts of crystallized carboic acid and 1 part of alcohol. [B. 92.]—**A. p. amidé**. Amidophenol. [B.]—**A. p. bibromé**. Dibromophenol. [B.]—**A. p. bichloré**. Dichlorophenol. [B.]—**A. p. biiodé**. Diiodophenol. [B.]—**A. p. binitré**. Dinitrophenol. [B.]—**A. p. bromé**. Bromophenol. [B.]—**A. p. chloré**. Chlorophenol. [B.]—**A. p. iodé**. Iodophenol. [B.]—**A. p. liquide**. See **A. p. alcoolisé**.—**A. p. monobromé**. Monobromophenol. See **BROMOPHENOL**.—**A. p. monochloré**. Monochlorophenol. See **CHLOROPHENOL**.—**A. p. monodé**. Monodiphenol. See **IODOPHENOL**.—**A. p. mononitré**. Mononitrophenol. See **NITROPHENOL**.—**A. p. nitré**. Nitrophenol. [B.]—**A. p. triamidé**. Triamidophenol. [B.]—**A. p. tribromé**. Tribromophenol. [B.]—**A. p. trichloré**. Trichlorophenol. [B.]—**A. p. triiodé**. Triiodophenol. [B.]—**A. p. trinitré**. Trinitrophenol; picric acid. [B.]—**Glycérolé d'a. p.** See **Glycerinum** and **Glyceritum ACIDI CARBOLICI**.—**Soluté d'a. p.** [Fr. Cod.], Lat., *acidum phenicum aqua solutum*. Syn.: *Eau phéniquée*. A solution of 1 part of crystallized carboic acid in 1,000 parts of distilled water. [B.]

**ACIDE PHOSPHORIQUE** (Fr.), n. Fo<sup>2</sup>s-fo-rek. Phosphoric acid.—**A. p. anhydre**. Anhydrous phosphoric acid; phosphoric anhydride. [A. 324.]—**A. p. bibasique**. Pyrophosphoric acid. [B.]—**A. p. glaciale**. Glacial phosphoric acid. [B.]—**A. p. hydraté**. Hydrated phosphoric acid. [A. 324.]—**A. p. monobasique**, **A. p. monohydraté**. Metaphosphoric acid. [B.]—**A. p. normal** [Fr. Cod.], Orthophosphoric acid. See **PHOSPHORIC ACID**.—**A. p. officinal** [Fr. Cod.], An aqueous solution of phosphoric acid containing 50 per cent. of the chemically pure acid. [B.]—**A. p. tribasique**, **A. p. trihydraté**. Orthophosphoric acid. [B.]—**Solution officinale d'a. p.** See **A. p. officinal**.

**ACIDE SULFHYDRIQUE** [Fr. Cod.], (Fr.), n. Su<sup>2</sup>lf-e-drek. Lat., *acidum sulphhydricum*. Syn.: *hydrogène sulfuré*. Hydrogen sulphide.—**A. s. dissous** [Fr. Cod.], **Solution aqueuse d'a. s.** A saturated aqueous solution of hydrogen sulphide. At a temperature of 20° C. it contains nearly 3 parts by volume (about  $\frac{24}{100}$  per cent. by weight) of the gas. [B.]

**ACIDE SULFUREUX** (Fr.), n. Su<sup>2</sup>lf-u<sup>2</sup>-ru<sup>5</sup>. Sulphurous acid.—**A. s. éthéré**. Sweet oil of wine. [B.] See **Ethereal oil**.—**Fumigation à l'a. s.** [Fr. Cod.], Lat., *suffumigatio sulfurea*. A preparation for generating sulphurous acid, consisting of sulphur broken into fragments, to be moistened with alcohol and ignited at the time of using. [B.]

**ACIDE TARTRIQUE** [Fr. Cod.], (Fr.), n. Ta<sup>2</sup>r-trek. Tartaric acid.—**A. t. anhydre**. Tartaric anhydride. [B. 92.]—**A. t. droit**. Dextrotartaric acid. See **TARTARIC ACID**.—**A. t. gâchée**. Levotartaric acid. See **TARTARIC ACID**.—**A. t. inactif**. Optically inactive tartaric acid. [B.]—**A. t. neutre**. Racemic acid. [B. 93.] See **TARTARIC ACID**.—**Poudre d'a. t.** [Fr. Cod.], Tartaric acid pulverized and passed through a sieve.—**Sirop d'a. t.** [Fr. Cod.], Lat., *syrupus cum acido tartarico*. A preparation made by dissolving 1 part of tartaric acid in 1 part of water and mixing with 98 parts of syrup. [B.]

**ACIDIFEROUS**, adj.  $A^2s-i^2d-i^2f-e^2-ru^5s$ . Lat., *acidifer* (from *acidum*, an acid, and *ferre*, to bear). Fr., *acidifère*. Ger., *Säure enthaltend* (1st def.), *säuernd* (2d def.). Sp., *acidifero*. 1. Containing acid. 2. Acid-forming; acidifiant. [A. 306.]

**ACIDIFIABLE**, adj.  $A^2s-i^2d-i^2f-i^2-a^2bl$ . Lat., *acidifiabilis* (from *acidum*, an acid, and *feri*, to become). Fr., *acidifiable*. Ger., *Säuerungsfähig*. Sp., *acidificable*. Capable of conversion into an acid. [B.]

**ACIDIFIANT**, adj.  $A^2s-i^2d-i^2f-i^2-a^2nt$ . (Fr.) For deriv., see **ACIDIFIABLE**. Lat., *acidificus*. Fr., *acidifiant*. Ger., *säuernd*. Sp., *acidificante*. Acidiferous (q. v., 2d def.). For its meaning as a n., see **ACIDIFIER**.

**ACIDIFICATION**, n.  $A^2s-i^2d-i^2f-i^2-ka^2shu^2n$ . Lat., *acidificatio*. Fr., *acidification*. Ger., *Säurebildung*. It., *acidificazione*. Sp., *acidificación*. 1. Conversion into an acid. 2. (Obs.) oxygenation. [A. 322.]

**ACIDIFICUS** (Lat.), adj.  $A^2s(a^2k)-i^2d-i^2f-i^2k-u^2s(u^4s)$ . Acidifiant. [A. 320.]

**ACIDIFIER**, n.  $A^2s-i^2d-i^2f-i^2-u^2r$ . Fr., *principe acidifiant*. Ger., *säuernd Grundstoff*. Sp., *acidificante*. The "acidifying principle"; a term formerly applied to oxygen, on the theory (now abandoned) that that element was essential to the formation of acids. [A. 301.]

**ACIDIFY**, v. tr.  $A^2s-i^2d-i^2f-i$ . Lat., *acidificare*. Ger., *acidiren*, *säuern*. It., *acidificare*. Sp., *acidificar*. To convert into an acid. [A. 300.]—**A'ing principle**. See **ACIDIFIER**.

**ACIDIMETER**, n.  $A^2s-i^2d-i^2m-e^2t-u^2r$ . From Lat., *acidum*, an acid, and Gr., *μέτρον*, a measure. Fr., *acidimètre*. Ger., *Säuren-*

messer. It., *acidimetro*. Sp., *acidómetro*. An instrument for determining the strength of an acid; either a hydrometer (the standard being one of density) or a simple graduated tube. When the latter is used, a definite quantity of the acid is poured into the tube, and the amount of an alkaline solution of known strength required to neutralize the acid is registered. [A, 347.]

**ACIDIMETRIC**, adj. A<sup>2</sup>s<sup>2</sup>i<sup>2</sup>d<sup>2</sup>i<sup>2</sup>-me<sup>2</sup>t<sup>2</sup>/ri<sup>2</sup>k. Fr., *acidimétrique*. Ger., *acidimetrisch*. Pertaining to acidimetry.

**ACIDIMETRY**, n. A<sup>2</sup>s<sup>2</sup>i<sup>2</sup>d<sup>2</sup>i<sup>2</sup>-m<sup>2</sup>e<sup>2</sup>t<sup>2</sup>-ri<sup>2</sup>. Fr., *acidimétrie*. Ger., *Acidimetrie*. It., *acidimetria*. 1. The determination of the quantity of real acid in a sample of hydrated acid. [B, 2.] 2. The determination of the strength (saturating power) of an acid. [B.]

**ACIDIREN** (Ger.), v. tr. A<sup>3</sup>-tse-de<sup>2</sup>re<sup>2</sup>n. To acidify.

**ACIDITATIO** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>d<sup>2</sup>i<sup>2</sup>-ta(ta<sup>3</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-o. Fr., *aciditation*. Acidity of the primæ viæ. [Grünberg (A, 322).]

**ACIDITIES** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>-di<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-ez(e<sup>2</sup>s). Acidity of the stomach. [A, 313.]

**ACIDITY**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>i<sup>2</sup>-ti<sup>2</sup>. Gr., *ἀκρίτης*. Lat., *aciditas*. Fr., *acidité*, *aigneur* (2d def.). Ger., *Acidität*, *Säureverhalten*. It., *acidità*, *agrezza* (2d def.). Sp., *acidez*, *ácidos del estómago* (2d def.). Syn.: *sourness*. 1. In chemistry the word is used in different senses, denoting: a. The quality of possessing the characteristics of an acid, and so, in acids or acid salts, equivalent to *basicity*. b. The capacity for saturating an acid evinced by a base. (In the former case the a. is measured by the number of hydrogen atoms in one molecule of the acid or salt replaceable by combination with a base; in the latter case it is measured by the number of hydrogen atoms which a molecule of the base can replace by combining with an acid. The degree of a. is designated by the terms *monacid*, *diacid*, and *triacid*, accordingly as the replacement affects 1, 2, or 3 atoms of hydrogen.) c. The intensity of acid reaction shown by a substance. It is measured by the amount of a standard solution of an alkali required to render the substance neutral. [B.] 2. Sourness of the stomach; the over-production of acid in the stomach, characterized by a sensation of burning and distension and acid eructations or regurgitations. The term *a. of the humors* was used by the older writers to express an acid state of the blood or some other fluid of the body as a cause of disease, but the doctrine is now abandoned.

**ACIDNESS**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-ne<sup>2</sup>s. Acidity.

**ACIDONOS** (Lat.), adj. A<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>d<sup>2</sup>/no<sup>2</sup>s. Gr., *ἀκιδνός*, weak, feeble, faint. [Hippocrates (A, 311, 325).]

**ACIDO-BASIC**, **ACIDO-BASIGENOUS**, adj. A<sup>2</sup>s<sup>2</sup>i<sup>2</sup>d<sup>2</sup>-o-ba<sup>3</sup>/si<sup>2</sup>/k, -ba<sup>3</sup>-si<sup>2</sup>/je<sup>2</sup>n<sup>2</sup>-u<sup>2</sup>s. For deriv., see ACID, BASIC, and BASIGENOUS. Fr., *acido-basique*. Capable of forming either an acid or a base. [A, 348.]

**ACIDOLOGY**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>/o<sup>2</sup>-ji<sup>2</sup>. Lat., *acidologia* (from *ἀκίς*, a point, also a bandage [Galen (A, 311)], and *λόγος* [see *logy*]). The science of surgical instruments and appliances. [A, 322.]

**ACIDOMETER**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>m<sup>2</sup>-e<sup>2</sup>-tu<sup>2</sup>r. See ACIDIMETER.

**ACIDOMETRIC**, adj. A<sup>2</sup>s<sup>2</sup>i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>-me<sup>2</sup>t<sup>2</sup>/ri<sup>2</sup>k. See ACIDIMETRIC.

**ACIDOMETRY**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>m<sup>2</sup>-e<sup>2</sup>t<sup>2</sup>-ri<sup>2</sup>. See ACIDIMETRY.

**ACIDONITRILE**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>-ni<sup>2</sup>/tri<sup>2</sup>l. See ACIDYLNITRILE.

**ACIDO-PEIRASTICA** (Lat.), n. f. A<sup>2</sup>s(a<sup>3</sup>k)/i<sup>2</sup>d<sup>2</sup>-o-pi<sup>2</sup>(pa)-ra<sup>2</sup>s-(ra<sup>3</sup>s)(ti<sup>2</sup>-ka<sup>3</sup>). From *ἀκίς*, a point, and *πειραστικός* (from *πειράσσειν*, to test), tentative. Exploratory puncture. [A, 303.]

**ACIDOSTEOPHYTE**, n. A<sup>2</sup>s<sup>2</sup>i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>s<sup>2</sup>/te<sup>2</sup>-o<sup>2</sup>-fit. Lat., *acidosteophyton* (from *ἀκίς*, a point, *ὀστέον*, a bone, and *φύρον*, a growth). Fr., *acidostéophyte*. Ger., *Akidosteophyt*. It., *acidostefito*. Lobsenstein's term for a needle-shaped exostosis or osteophyte (the fungous exostosis of Sir A. Cooper). [A, 322.]

**ACIDOTOUS**, adj. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>/tu<sup>2</sup>s. Gr., *ἀκιδωτός*, pointed. Fr., *acidote*. In botany, terminating in a point. [A, 316.]

**ACIDOXYL**, n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-o<sup>2</sup>x<sup>2</sup>/i<sup>2</sup>l. For deriv., see ACID, OXYGEN, and -yl. A compound of an acidyl or acid radicle (of theivalent series of hydrocarbons) with oxygen. The a's have in general the formula (C<sub>n</sub>H<sub>2n-1</sub>)<sub>2</sub>O. By combining with hydroxyl (OH) they form the fatty acids, C<sub>n</sub>H<sub>2n-1</sub>O.OH. [B, 4.]

**ACIDULE** (Lat.), n. f., pl. of adj. *acidulus* (*aquæ* understood). A<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>d<sup>2</sup>u<sup>2</sup>(u)-le(la<sup>2</sup>-e<sup>2</sup>). Fr., *eaux acidules*. Ger., *Säuerlinge*, *Säuerbrunnen*. Waters containing carbon dioxide in solution. [B, 55.]—**A. artificiales**. Fr., *eaux minérales artificielles*. Ger., *künstliche Säuerlinge*. Artificially aerated waters. [A, 323.]—**A. naturales**. The natural aerated waters. [A, 325.]

**ACIDULANT** (Fr.), adj. A<sup>3</sup>-se-du<sup>2</sup>-la<sup>2</sup>n<sup>2</sup>. Having a moderate acidulating power. [A, 306.]

**ACIDULATE**, v. tr. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>u<sup>2</sup>-lat. Lat., *acidulare*. Fr., *aciduler*. Ger., *ansäuern*. It., *acidulare*. Sp., *acidular*. To render slightly acid. [B.]

**ACIDULE** (n.), n. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>-u<sup>2</sup>l. Lat., *acidulum* (dim. of *acidum*). Fr., *acidule*. Ger., *Acidul*. 1. An acid salt. [A, 315.] 2. A dilute acid, an acidulous preparation, or a pleasantly acid fruit. [A, 328, 329.]—**A. oxalique** (Fr.). Acid oxalate of potassium. [Nysten (A, 330).]—**A. tartareux**, **A. tartarique** (Fr.). Acid tartrate of potassium. [Nysten (A, 330).]

**ACIDULE** (Fr.), adj. and n. A<sup>3</sup>-se-du<sup>2</sup>l. 1. Acidulous. 2. Acid (said of salts). For its use as a n., see the preceding article.

**ACIDULOUS**, adj. A<sup>2</sup>s-i<sup>2</sup>d<sup>2</sup>u<sup>2</sup>-lu<sup>2</sup>s. Lat., *acidulus*. Fr., *aciduleux*, *acidule*. Ger., *säuerlich*. It., *acidulo*. Sp., *acidulo*. Slightly acid. [B.]—**A. elements**. See under ELEMENT.

**ACIDULUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>k)-i<sup>2</sup>d<sup>2</sup>u<sup>2</sup>(u)-lu<sup>2</sup>m(lu<sup>4</sup>m). An acid salt. See ACIDULE, n.—**Oxalic a.** An old term for acid oxalate of potassium. [A, 335.]—**Tartareous a.** An old term for acid tartrate of potassium. [A, 335.]

**ACIDUM** (Lat.), n. n. A<sup>2</sup>s(a<sup>3</sup>k)/i<sup>2</sup>d<sup>2</sup>-u<sup>2</sup>m(u<sup>4</sup>m). An acid.—**Aceticum a.** Acetic acid.—**A. absinthicum**. Absinthic acid.—**A. acerium**. Acetic (malic) acid. [B, 48.]—**A. acetii**. Acid of vinegar; acetic acid. [A, 344.]—**A. aceticum**. See the major list.—**A. acetosæ**, **A. acetosellæ**. Old terms for oxalic acid. [A, 344; B.]—**A. acetosum**. See the major list.—**A. aceticum**. Acetic acid. [A.]—**A. adipis**. See *Acid of fat*.—**A. areum**. An old term for carbonic acid. [A, 344.] See *Carbon dioxide*.—**A. aeriforme**. A gaseous acid. [B, 99.]—**A. æthereum**. An old term for sulphuric acid. [B, 87.]—**A. alcoholicum**. Acetic acid. [B, 101.]—**A. allantoicum**. Allantoic acid.—**A. aluminosum**. An old name for sulphuric acid (because contained in alum under the form of a sulphate). [B, 87.]—**A. amnicum**, **A. amnioticum**. Amniotic acid. [A, 313.]—**A. animale**. An animal acid. [B, 87.] See under *Acid*.—**A. antimonicum**, **A. antimonii**. Antimonic acid. [B, 48, 91.]—**A. antimoniosum**. Antimonious acid. [A.]—**A. argenticum**. Argentic acid. [B, 91.]—**A. arsenicum**. A name given by Kerr (1739) to arsenic acid. [B, 91.]—**A. arsenicale**. See *ARSENIOUS ACID* and *ARSENIC TRIOXIDE*.—**A. arsenicellæ**. Arsenic acid. [B, 49.]—**A. arsenicosum**. See *ARSENIOUS ACID* and *ARSENIC TRIOXIDE*.—**A. arsenicum**. See the major list.—**A. arsenosum**. See the major list.—**A. atmospherium**. An old name for carbonic acid (carbon dioxide). [B, 87.]—**A. auricum**. Auric acid. [B.]—**A. azoticum**. Nitric acid. [B, 10.]—**A. benzoës**. Benzoic acid. [A, 344.]—**A. benzoicum**. See the major list.—**A. benzoïn**, **A. benzoïnium**, **A. benzoïnium**. Benzoic acid. [A, 313; B.]—**A. berberium**. Acid of barberries; malic acid. [B, 87.]—**A. bezoardicum**. Uric acid. [B, 87.]—**A. bismuthicum**. Bismuthic acid. [B.]—**A. bombyicum**. Bombic acid. [B, 91.]—**A. boracicum** [Greek Ph.], **A. boracis**. Boric acid.—**A. boricum**. See the major list.—**A. borosalicicum**. Borosalicic acid. [A, 247.]—**A. borussicum**. Prussic (hydrocyanic) acid. [B.]—**A. borussicum alcoholisatum**. See *A. HYDROCYANICUM alcoholisatum*.—**A. botulinicum**. See *BOTULINIC ACID*.—**A. bromhydricum** [Fr. Cod.], *Hydrobromic acid*.—**A. bromhydricum dilutum**. See *Dilute HYDROBROMIC ACID*.—**A. bromhydricum**. Hydrobromic acid. [A, 247.]—**A. butyricum**. Butyric acid. [B, 49.]—**A. cærulei berolinensis**, **A. cæruleum**. Acid of Prussian blue; hydrocyanic acid. [B, 99.]—**A. camphoricum**. Camphoric acid. [B, 91.]—**A. carbazoticum**. Carbazotic (picric) acid.—**A. carbolicum**. See the major list.—**A. carbonicum**. See the major list.—**A. catharticum**. Cathartic acid. [A, 247.]—**A. catholicon**, **A. catholicum**. The universal acid; an old name for sulphuric acid from the theory that all other acids proceeded from it. [A, 323; B, 87.]—**A. chinicum**. Quinic acid. [B, 48.]—**A. chlorhydricum**. See the major list.—**A. chlorium**. Chloric acid. [B, 49.]—**A. chloroæticum**. Dichloroacetic acid. [A, 247.]—**A. chlorohydricum**. Chlorohydrocyanic acid. [B.]—**A. chlorohydrocyanicum**. Corrosive sublimate. [B, 98.]—**A. chlorohydrocyanicum**. Chlorohydrocyanic acid. [B.]—**A. chlorohydrogenatum**. Hydrochloric acid. [B.]—**A. chloro-nitricum**, **A. chloro-nitrosium** [Ger. Ph., 1st ed.], *Nitrohydrochloric acid*. [B.]—**A. chromicum**. See the major list.—**A. chrysophanicum**. Chrysarobin. [A, 247.]—**A. chrysælicum**. Nitrohydrochloric acid. [B, 101.]—**A. cinnamomicum**. Cinnamic acid. [B, 96.]—**A. citri**. Citric acid. [B.]—**A. citricum**. See the major list.—**A. cobalticum**. Cobaltic acid. [B, 91.]—**A. compositum Reitzii**. A mixture of nitric acid, 144 parts, hydrochloric acid and ether, of each 9 parts, and borax, 8 parts. [B, 96, 102.]—**A. concretum**. A concrete or solid acid. [B, 87.]—**A. copalibicum**. Copalvic acid; resin of copaliba. [A, 247.]—**A. cresylicum**. Cresylic acid; cresol. [A, 247.]—**A. cretaceum**. An old term for carbonic acid (carbon dioxide). [A, 344.]—**A. cubebicum**. Cubebic acid. [B, 102.]—**A. cupricum**. Cupric acid. [B, 91.]—**A. cyanhydricum** [Fr. Cod., Belg. Ph.], *Hydrocyanic acid*. The Belgian preparation of this name contains 25 per cent. of the anhydrous acid. [B, 95.]—**A. cyanicum**. Hydrocyanic acid. [B, 101.]—**A. dephlogisticatum liquidum**. An aqueous solution of chlorine. [A, 316.]—**A. dulcificatum**. A mixture of a strong acid with rectified spirit. Such mixtures usually contain ethyl compounds produced by the action of the acid upon the alcohol. [B, 99.] Cf. *A. nitrî dulcificatum* and *A. salis dulcificatum*.—**A. elainicum**. Oleic acid. [A, 247.]—**A. ferriacum**. Ferric acid. [B.]—**A. filiceum**. Filicic acid. [B, 98.]—**A. fixum**. A fixed (non-volatile) acid. [B, 99.]—**A. fluidum**. A liquid acid. [B, 99.]—**A. fluorhydricum**, **A. fluorium**. Hydrofluoric acid. [A, 247; B, 91.]—**A. fluorium dilutum**. A preparation of the London Throat Hospital containing 1 per cent. of the anhydrous acid. [B, 94.]—**A. fluoris**. Hydrofluoric acid. [B, 87.]—**A. formiceæ**, **A. formicarum**, **A. formicicum** [Ger. Ph.], **A. formicum**. Formic acid. [A, 247, 308; B.]—**A. fortius**. A stronger acid; a term used in the Belgian Ph., in the pl., *acida fortiora*, to denote the stronger acids which produce corrosive poisoning. [B, 95.]—**A. fossile**. A mineral acid. [B.]—**A. galacticum**. A name given by Scheele (1780) to lactic acid. [B, 3.]—**A. galacto-saccharinum**. See *A. sacchari lactis*.—**A. gallaceum**, **A. gallæ**, **A. gallarum**. Gallic acid. [B.]—**A. gallicum**. See the major list.—**A. gallo-tannicum** [Dan. Ph., Fenn. Ph., Norweg. Ph., Swed. Ph.], *Tannic acid*. [B, 99.]—**A. glycocholicum**. Glycocholic acid. [B.]—**A. gynocardicum**. Gynocardic acid. [B, 94.]—**A. hippuricum**. Hippuric acid. [A.]—**A. hydriodicum**. See the major list.—**A. hydrobromatum**, **A. hydrobromicum**. Hydrobromic acid.—**A. hydrobromicum concentratum**. An aqueous solution of hydrobromic acid containing 34 per cent. of the pure acid. [A, 247.]—**A. hydrobromicum dilutum** [U. S. Ph., Br. Ph.], *Dilute hydrobromic acid*. See *HYDROBROMIC ACID*.—**A. hydrobromicum gasiforme**. Gaseous hydrobromic acid, the *acide bromhydrique gazeux* of the French Codex. [B, 95.]—**A. hydrocarbolicum**. Oxalic acid. [A, 344.]—**A. hydrochloratum** [Dan. Ph., Norweg. Ph., Swed. Ph.], *Hydrochloric acid*. [B, 95.]—**A. hydrochloratum erudum** [Dan. Ph., Swed. Ph.], *Commercial hydrochloric acid*. [B, 95.]—**A. hydrochloratum dilutum** [Dan. Ph., Norweg. Ph., Swed. Ph.],

See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloratum purum** [Russ. Ph.]. Hydrochloric acid. [B. 95.]—**A. hydrochloratum purum dilutum** [Russ. Ph.]. See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloricum** [U. S. Ph., Br. Ph., Ger. Ph.], **A. hydrochloricum concentratum purum** [Aust. Ph., Hung. Ph.]. See HYDROCHLORIC ACID.—**A. hydrochloricum crudum** [Ger. Ph.]. See *Commercial* HYDROCHLORIC ACID.—**A. hydrochloricum dilutum** [U. S. Ph., Br. Ph., Ger. Ph.], **A. hydrochloricum dilutum purum** [Aust. Ph., Fenn. Ph., Hung. Ph.]. See *Dilute* HYDROCHLORIC ACID.—**A. hydrochloricum purum** [Fenn. Ph.]. See HYDROCHLORIC ACID.—**A. hydrochloricum venale** [Fenn. Ph.]. See *Commercial* HYDROCHLORIC ACID.—**A. hydrochloricum volumetricum** [Ger. Ph.]. Ger., *Normalsalzsaure*. A test-solution containing 36.5 grammes of hydrochloric acid gas in a litre of water; 18.8 c. c. of this solution neutralizes one gramme of carbonate of sodium. [B.]—**A. hydrochloro-nitricum**. Nitrohydrochloric acid. [B. 97.]—**A. hydrocyanatum** [Pruss. Ph. of 1846, Norweg. Ph.], **A. hydrocyanatum medicinale** [Russ. Ph.]. See *Dilute* HYDROCYANIC ACID.—**A. hydrocyanicum**. See the major list.—**A. hydrofluoricum**. Hydrofluoric acid. [A.]—**A. hydrofluoro-silicicum**. Silicofluoric acid. [B. 49.]—**A. hydriodatum**. A. hydriodicum. Hydriodic acid. [B.]—**A. hydrosilicico-fluoricum**. Silicofluoric acid. [B. 102.]—**A. hydrosulphuratum**. A. hydrosulphuricum. A. hydrosulphuratum. A. hydrosulphuratum. Hydrogen sulphide. [B.]—**A. hydrosulphuricum solum**. Aqueous solution of hydrogen sulphide. [A. 316.]—**A. hydrothionium**. Hydrogen sulphide. [B.]—**A. hydrothionium liquidum**. Aqueous solution of hydrogen sulphide. [B. 97.]—**A. hyperosmicum**. Perosmic (osmic) acid. [B.]—**A. hypochlorosum**. Hypochlorous acid. [B. 49.]—**A. hyposulpharseniosum**. Hyposulpharsenious acid; arsenic disulphide. [A.]—**A. imperfectum**. See *Imperfect* acid.—**A. iodatum**. A. iodhydricum. Hydriodic acid. [B.]—**A. iodicum**. Iodic acid. [A.]—**A. jatrophyicum**. Jatrophyic (crotonic) acid. [A.]—**A. jodo-aceticum**. See *JODOACETIC* acid (2d def.).—**A. kinovium**. Quinovic acid. [A.]—**A. lacticum** [U. S. Ph., Br. Ph., Ger. Ph., Fr. Cod., Belg. Ph., Russ. Ph.]. Lactic acid. [B.]—**A. lacticum dilutum** [Br. Ph.]. An aqueous solution of lactic acid of a sp. gr. of 1.040, and containing 3 oz. of the acid to 1 pint of the preparation. [B.]—**A. lactis**. Acid of milk; a name given by Scheele (1780) to lactic acid. [B. 3.]—**A. ligneum**. A. ligni empyreumaticum. A. ligni pyro-oleosum. A. lignum empyreumaticum. Pyroigneous acid. [A. 316, 344; B.]—**A. limonarium**. A. limonicum. A. limonis. A. limonorum. A. limosum. A. limonicum. Citric acid. [A. 316; B. 88, 101.]—**A. lithicum**. Uric acid. [B. 87.]—**A. malicum**. Malic acid. [A. 316; B.]—**A. manganicum**. A. manganicum. Manganic acid. [B.]—**A. marinum**. A. marinum. Hydrochloric acid. [B. 101.]—**A. marinum aeratum**. An old name for chlorine. [B.]—**A. marinum concentratum**. Concentrated hydrochloric acid. [A.]—**A. marinum deplogisticatum**. See *A. marinum aeratum*.—**A. meconicum** [Br. Ph.]. Meconic acid. [A.]—**A. menispermicum**. Menispermic acid. [B. 99.]—**A. mephiticum**. An old name for carbon dioxide. [B. 87.]—**A. mercuricum**. Mercuric acid. [B. 91.]—**A. metallicum**. A mineral acid. [B.]—**A. metatartaricum**. Metatartaric acid. [B. 96.]—**A. minerale**. See *Mineral* acid.—**A. molybdænae**. A. molybdænicum. A. molybdænae. A. molybdicum. Molybdic acid. [B.]—**A. morbosum**. Acidity (in the pathological sense). [A. 313.]—**A. muriaticum**. See the major list.—**A. nativum**. An acid occurring free in nature. [B. 87.]—**A. nickolicum**. Nickolic acid. [B. 91.]—**A. nitril**. Nitric acid. [A. 344.]—**A. nitrico-hydrochloratum**. Nitrohydrochloric acid. [B. 96.]—**A. nitril concentratum**. Fuming nitric acid. [A. 344.]—**A. nitrico-nitrosus** [Dan. Ph., Norweg. Ph., Swed. Ph.]. Nitrosnitric (fuming nitric) acid. [B. 95.]—**A. nitricum**. See the major list.—**A. nitril dulcificatum**. Sweet spirit of nitre. [B. 99.]—**A. spiritalis**. *Ætheris nitrosi*.—**A. nitril fumans**. Fuming nitric acid. [A. 344.]—**A. nitril imperfectum**. Nitrous acid. [B. 99.]—**A. nitril perfectum**. Nitric acid. [B. 99.]—**A. nitril vinosum**. Sweet spirit of nitre. See *Spiritus* *Ætheris nitrosi*.—**A. nitrochlorhydricum** [Belg. Ph.], **A. nitrohydrochloricum** [U. S. Ph.], Nitrohydrochloric acid. [B.]—**A. nitrohydrochloricum dilutum**. [U. S. Ph., Br. Ph.]. See *Dilute* NITROHYDROCHLORIC ACID.—**A. nitromuriaticum** [U. S. Ph., 1870]. Nitrohydrochloric acid.—**A. nitromuriaticum dilutum** [U. S. Ph., 1870]. See NITROHYDROCHLORIC ACID.—**A. nitroso-nitricum**. Nitrosnitric (fuming nitric) acid. [B.]—**A. nitroso-oxygenatum**. Nitrohydrochloric acid. [B. 88.]—**A. nitrosium**. See the major list.—**A. nitro-xanthicum**. Picric acid. [B. 102.]—**A. oenothionium**. Ethylsulphuric acid. [A. 344.]—**A. oleicum**. See *ETHYL sulphate*.—**A. oleicum** [U. S. Ph., Br. Ph.], **A. oleinicum**. Oleic acid. [A.]—**A. opianicum**. Opianic acid. [B.]—**A. orthoxyphenylsulphuricum**. Orthoxyphenylsulphurous acid; aseptol. [B. 94.]—**A. osmicum**. See the major list.—**A. ossium**. Phosphoric acid. [A. 316.]—**A. oxalicum** [Belg. Ph., Swiss Ph.], **A. oxallium depuratum** [Russ. Ph.], **A. oxalinum**. A. oxalyicum. Oxalic acid. [B.]—**A. oxygenatum**. An acid, as perchloric acid, containing oxygen in excess of the amount required for saturation. [B. 99.]—**A. oxy-muriaticum**. An old name for chlorine. [B.]—**A. oxyphosphoricum**. Phosphoric acid. [B. 101.]—**A. perfectum**. See *Perfect* acid.—**A. perlatum**. Acid of pearls; a name applied to the acid phosphate of sodium. [B. 87, 88.]—**A. perosmicum**. Perosmic (osmic) acid. [A. 247.]—**A. phenicum** [Greek Ph.], **A. phanicum** [Fr. Cod.], **A. phenicum aqua solum** [Fr. Cod.]. See *Soluté d'acide phénique*.—**A. phenylicum**. See the major list.—**A. phenylosum**. Carboic acid. [B. 101.]—**A. phosphoril**. Phosphoric acid. [A. 344.]—**A. phosphoricum**. See the major list.—**A. phosphorosum**. 1. Phosphatic acid (a mixture of phosphorous and phosphoric acids). 2. Phosphorous acid. [B.]—**A. phthalicum**. Phthalic acid. [B. 49.]—**A. piericum** [Fr. Cod.], **A. piericum** [Greek Ph.], **A. pieronitricum**. Picric acid. [B.]—**A. plingue**.

1. Acid of fat. See under *ACID*. 2. A name given by Mayer to an acid which he imagined to exist in the caustic alkalies, imparting to the latter their greasy feel. [B. 2, 87.]—**A. pinguedinis animalis**. See *ACID of fat*.—**A. pipitzaholicum** [Mex. Ph.]. See *PIPITZAHIC* acid.—**A. platinicum**. Platinic acid. [B. 91.]—**A. plumbicum**. Plumbic acid. [B.]—**A. pneumaticum**. Pneumatic acid. [A.]—**A. pomi**. Malic acid. [B.]—**A. pomi citrel**. Citric acid. [B.]—**A. pomorum**. Malic acid. [B. 99.]—**A. primarium viarum**. See *A. ventriculi*.—**A. pruligneum**. A hypothetical principle which Becher ("Physica Subterranea," 1669) supposed to be present in all acids, and to which he imagined they owed their common properties, while the distinguishing characters of each were due to the particular substance it contained mixed with this primitive acid, the latter being formed by the union of "primitive earth" and water. [A.] This universal primitive acid was supposed to be sulphuric acid. [B.] Cf. *A. catholicon* and *A. universale*.—**A. prussicum**. Prussic (hydrocyanic) acid.—**A. prussicum Scheelei**. Scheele's hydrocyanic acid (contains 6 per cent. of the anhydrous acid). [A. 316.]—**A. pyroaceticum**. Pyroigneous acid. [A. 316.]—**A. pyrogallicum** [Fr. Cod., Ger. Ph., Greek Ph., Swiss Ph.]. Pyrogallic acid; pyrogallol. [B. 99.]—**A. pyroligneum**. A. pyroligneosum. Pyroigneous acid.—**A. pyroligneosum crudum** [Dan. Ph., Greek Ph.]. See *ACETUM pyroligneosum crudum*.—**A. pyroligneosum rectificatum** [Greek Ph.]. See *ACETUM pyroligneosum rectificatum*.—**A. pyromucosum**. An empyreumatic acid obtained by the dry distillation of sugar. [B.]—**A. pyrotartaricum**. A. pyrotartarosum. Impure pyrotartaric acid obtained by the distillation of cream of tartar; official in several formularies of the last and the early part of the present century. [B. 97.]—**A. pyroxylum**. Pyroigneous acid.—**A. pyroxylum crudum**. A. pyroxylum rectificatum. See *ACETUM pyroligneosum crudum* and *ACETUM pyroligneosum rectificatum*.—**A. quercitanicum**. Quercitanic acid. [B. 98.]—**A. quinicum**. Quinic acid.—**A. quinoivicum**. Quinoivic acid.—**A. regalinum**. Nitrohydrochloric acid. [B.]—**A. rhodanicum**. Thiocyanic acid. [A.]—**A. sacchari**. Acid of sugar; an old term for oxalic acid. [A. 344.]—**A. sacchari lactis**. Syn.: *A. galacto-saccharinum*. Acid of sugar of milk. Names given by Scheele in 1780 to mucic acid which he obtained by the action of nitric acid upon milk sugar. [B. 3, 86.]—**A. saccharinum**. See *A. sacchari*.—**A. salicylicum**. See the major list.—**A. salis**. A. salis culinaris. Old names for hydrochloric acid. [A. 344.]—**A. salis dulcificatum**. Syn.: *spiritus muriatico-æthereus*, *spiritus salis dulcis*, *spiritus vinosus muraticus*. A mixture of hydrochloric acid and rectified spirit containing chloride of ethyl. A preparation of this sort formerly official in one of the Continental pharmacopœias was made by distilling hydrochloric acid, 16 parts, black oxide of manganese, 6 parts, sulphuric acid, 12 parts, acid alcohol, 48 parts. [B. 99.]—**A. salis fumans**. Syn.: *spiritus salis fumans Glauberi*. Fuming hydrochloric acid. [B. 99.]—**A. salis Libavii**. See *SPIRITUS fumans Libavii*.—**A. salis marini**. Hydrochloric acid. [A.]—**A. salis rectificatum**. Rectified hydrochloric acid. [B. 99.]—**A. santonicum**. Santonic acid. [A. 316.]—**A. sclerotium**. A. sclerotidicum. Sclerotic acid. [B.]—**A. scytodiplicum**. A. scytodipsicum. [From Gr., *σχυροδύψος*, currying *σχυρός*, a hide, and *δύψος*, to soften.] Tannic acid. [A. 316; B. 49.]—**A. sebaceum**. A. sebi. The sebatic acid of the older writers; acetic acid obtained by the distillation of fat. [B. 3, 91, 99.]—**A. septicum**. Nitric acid. [A. 316; B. 87.]—**A. siderum**. The acid of the loadstone. [B. 87.]—**A. silicio-hydrofluoricum**. Silicofluoric acid. [B. 102.]—**A. silicicum**. A. silicium. Silicic acid. [B. 49, 87.]—**A. silicio-hydrofluoratium**. Silicofluoric acid. [B. 49.]—**A. solidum**. A solid acid. [B. 99.]—**A. solis**. Syn.: *cyssus antimonii*. Sulphurous acid. [B.]—**A. sorbicum**. Sorbic acid. [B. 49.]—**A. spatiosum**. Acid of spar; hydrofluoric acid. [B. 87.]—**A. spontaneum**. See *A. ventriculi*.—**A. stannicum**. Stannic acid. [B.]—**A. stearnicum**. A. stearicum venale [Netherl. Ph.]. Stearic acid. [B. 95.]—**A. stibicum**. Antimonious acid. [B. 49.]—**A. stibicum cum aqua**. Hydrated peroxide of antimony; antimonious acid. [B. 92.]—**A. stibiosum**. Antimonious acid. [B. 49.]—**A. subsulphuratum**. Hyposulphurous acid. [B. 49.]—**A. succinicum**. A. succinicum [Ger. Ph., 1st ed., Dan. Ph., Russ. Ph., Swiss Ph., Netherl. Ph.]. Succinic acid. [A. 344; B. 95.]—**A. succinicum crudum** [Fenn. Ph., Greek Ph.]. Crude succinic acid. [B. 95.]—**A. succinicum depuratum** [Fenn. Ph., Greek Ph., Swed. Ph.]. Purified succinic acid. [B. 95.]—**A. succinicum impurum**. Crude succinic acid.—**A. succinicum medicinale** [Belg. Ph.], **A. succinicum subflavum** [Norweg. Ph.]. Purified succinic acid. [B. 95.]—**A. succinicum pyrogenæum**. Impure succinic acid obtained by the distillation of amber. [B. 92.]—**A. succinum**. An old name for succinic acid. [B. 91.]—**A. succineum**. A. succinum. The Swedish acid of Scheele; hydrofluoric acid. [A. 323; B.]—**A. sulphydricum** [Fr. Cod.], **A. sulfohydrogenatum**. Hydrogen sulphide. [B.]—**A. sulfuricum**. See the major list.—**A. sulfurosum**. Sulphurous acid. [B.]—**A. sulfurosum aquosum**. A. sulfurosum solum [Swiss Ph.]. An aqueous solution of sulphur dioxide containing 9 per cent. of the latter. [B. 95.]—**A. sulpho-arseniosum**. Thioarsenious acid. [A. 316.]—**A. sulpho-hydricum**. Hydrogen sulphide. [B.]—**A. sulpho-hydricum liquidum** [Belg. Ph.]. An aqueous solution of hydrogen sulphide. [B. 98.]—**A. sulpho-hydrocyanicum**. Thiocyanic acid.—**A. sulpho-stibicum**. Thioantimonious acid. [A. 316.]—**A. sulpho-stibiosum**. Thioantimonious acid. [A. 316.]—**A. sulphureum**. A. sulphuricosum. Volatile acid of sulphur; sulphurous acid. [A. 316; B. 87, 97.]—**A. sulphuricum**. See the major list.—**A. sulphuris**. Sulphuric acid. [B.]—**A. sulphuris perfectum**. Sulphuric acid. [B. 99.]—**A. sulphuris volatile**. Volatile acid of sulphur; sulphurous acid. [A. 344; B. 99.]—**A. sulphurosium**. Sulphurous acid. [A. 316.]—**A. sulphurosium** [U. S. Ph., Br. Ph.]. Sulphurous acid; an aqueous solution of sulphur dioxide containing 3.5 per cent. [U. S. Ph.] or 5 per cent. [Br. Ph.] of the gas. [B.]—

**A. sulphuricum.** Hydrogen sulphide. [A.]—**A. supphosphorosum.** Hypophosphorous acid.—**A. tannicum** [Greek Ph.]. Tannic acid. [B. 95.]—**A. tannicum.** See the major list.—**A. tartari.** Tartaric acid. [A. 344.]—**A. tartari crystallisatum.** Crystallized tartaric acid. [B.]—**A. tartaricum.** See the major list.—**A. tartari destillatum.** The same as *A. pyrotartaricum*. [B. 99.]—**A. tartari essentiale.** *A. tartarosum*. Old names for tartaric acid. [B. 91, 97, 99.]—**A. tartaricum.** See the major list.—**A. terre ponderosae.** Acid of barytes, or heavy spar; sulphuric acid. [B. 87.]—**A. thionhydricum.** Aqueous solution of hydrogen sulphide. [A. 316.]—**A. thionium.** Sulphuric acid. [A. 316.]—**A. thymicum** [Fr. Cod.], **A. thymolium.** Thymol. [B.]—**A. tingens.** Hydrocyanic acid. [B. 101.]—**A. trichloracetum** [Swiss Ph.]. Trichloroacetic acid. [B. 95.]—**A. trichlorophenicum.** Trichlorophenol. [B. 94.]—**A. trinitrocarbolium.** **A. trinitrophenicum.** Trinitrophenol; picric acid. [B. 94, 102.]—**A. tungsticum.** Tungstic acid. [B.]—**A. universale.** See *A. catholicon*.—**A. uricum.** Uric acid. [B. 97.]—**A. urinae.** Acid of urine; phosphoric acid. [B. 101.]—**A. uranicum.** **A. urolithicum.** Uric acid. [A. 316; B. 102.]—**A. uricum.** Racemic acid. [B. 49.]—**A. vagum.** Sulphuric acid. [B.]—**A. valerianicum** [Ger. Ph., 1st ed., Belg. Ph., Greek Ph., Russ. Ph., Netherl. Ph.], **A. valerium** [Fr. Cod.], **A. valerianic acid.** [B.]—**A. vanadinicum.** Vanadic acid. [B. 49.]—**A. vegetabile.** A vegetable acid. [B. 99.]—**A. vegetabile essentiale.** A concentrated vegetable acid. [B. 87.]—**A. ventriculi.** Acidity of the primæ viæ.—**A. vini phlogisticatum.** Tartaric acid. [B. 101.]—**A. vitrioli.** An old name for sulphuric acid. [A. 344.]—**A. vitrioli aromatum.** See *A. sulphuricum aromatum*.—**A. vitriolicum.** Sulphuric acid.—**A. vitriolicum acutum.** Hydrofluoric acid. [B. 87.]—**A. vitriolicum cum alcoholo aromatico.** See *A. sulphuricum aromatum*.—**A. vitriolicum dilutum.** See *Dilute sulphuric acid*. [B. 87.]—**A. vitriolicum phlogisticatum.** Sulphuric acid. [B. 87.]—**A. vitriolicum tenue.** See *Dilute sulphuric acid*.—**A. vitriolicum vinosum.** See *Mixtura sulphurica acidula*.—**A. vitrioli defecatum.** **A. vitrioli defecatum.** **A. vitrioli deplogisticatum.** **A. vitrioli depuratum.** Old terms for purified sulphuric acid. [A. 344.]—**A. vitrioli dilutum.** See *Dilute sulphuric acid*.—**A. vitrioli forte.** Concentrated sulphuric acid. [B.]—**A. vitrioli phlogisticatum.** Sulphuric acid. [B.]—**A. vitrioli purissimum.** **A. vitrioli rectificatum.** Old names for purified sulphuric acid. [A. 344.]—**A. vitrioli vinosum.** Ether. [A. 316.]—**A. volatile.** A volatile acid. [B. 99.]—**A. wolframium.** Tungstic acid. [B. 49.]—**A. zincicum.** Zincic acid. [B. 91.]—**A. zooticum.** **A. zootinicum.** Hydrocyanic acid. [A. 344.]

**ACIDUM ACETICUM** (Lat.), n. n. [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Dan. Ph., Finn. Ph., Russ. Ph., Netherl. Ph., Norweg. Ph., Swed. Ph.]  $A^2s(a^3k)-e^2t-i^2k-u^3m(u^4m)$ . Fr., *acide acétique*. Ger., *Essigsäure*. It., *acido acetico*. Sp., *ácido acético*. Syn.: *acetic concentration*. Acetic acid. In the Ger. Ph., glacial acetic acid; in the other pharmacopœias, an aqueous solution of acetic acid containing 29.4 per cent. [Dan. Ph., Norweg. Ph., Russ. Ph., Swed. Ph.], 31.5 per cent. [Finn. Ph.], 33 per cent. [Br. Ph.], 36 per cent. [U. S. Ph.] of the pure acid. [B. 95.]—**A. a. aromatum** [Ger. Ph. (1st ed.), Belg. Ph., Greek Ph., Russ. Ph.], Fr., *acide acétique aromatisé*. Ger., *Gewürzessigsäure*. It., *acido acetico aromatico*. Sp., *ácido acético aromático*. Syn.: *aceticum aromaticum spirituosum* [Swiss Ph.]. A preparation variously made up from different volatile oils dissolved in acetic acid, with or without the addition of alcohol and acetic ether. That formerly official in the Ger. Ph. contained 9 parts of oil of cloves, 6 parts each of oil of lavender and oil of citrons, 3 parts of oil of thyme, 1 part of oil of cinnamon, and 25 parts of glacial acetic acid. Other preparations contained a higher percentage of the acid. [B. 95.]—**A. aromatum camphoratum** [Greek Ph.]. A preparation similar to the *vinaique anglais* of the French Codex. [B. 95.] See *Acetum britannicum*.—**A. a. camphoratum.** Fr., *acide acétique camphré*. Ger., *campherhaltige Essigsäure*. It., *acido acetico canforato*. Sp., *ácido acético alcanforado*. Camphorated acetic acid. A preparation of the Edinburgh and Dublin Pharmacopœias, consisting of an avoirdupois ounce of camphor pulverized with the aid of a drachm of rectified spirit and dissolved in 10 fluidounces of strong acetic acid. The preparation of the Greek Ph. is made up of 1 part of camphor and 50 parts of concentrated acetic acid (containing 43.5 per cent. of the anhydrous acid). [B. 5, 95.]—**A. a. concentratissimum.** Glacial acetic acid. [A. 316.]—**A. a. concentratum.** Fr., *acide acétique concentré*. Ger., *concentrirte Essigsäure*. It., *acido acetico concentrato*. Sp., *ácido acético concentrado*. In the Aust. Ph., Hung. Ph., Russ. Ph., Belg. Ph., and Swed. Ph., glacial acetic acid; in the Greek Ph., an aqueous solution containing 43.5 per cent. of anhydrous acetic acid. [B. 95.]—**A. a. crystallisatum** [Swiss Ph.], Fr., *acide acétique cristallisable* [Fr. Cod.], Ger., *krysalinische Essigsäure*. Glacial acetic acid. [B. 95.]—**A. a. dilutum.** Fr., *acide acétique dilué*. Ger., *verdünnte Essigsäure* [Ger. Ph.], It., *acido acetico diluto*. Sp., *ácido acético diluido*. Dilute acetic acid. An aqueous solution of acetic acid containing 6 per cent. [U. S. Ph., Br. Ph.], 5.3 per cent. [Belg. Ph., Netherl. Ph.], 5.1 per cent. [Fenn. Ph.], and 4.9 per cent. [Russ. Ph.], of the anhydrous acid. The *A. a. dilutum* of the other pharmacopœias corresponds to the *A. a.* of the U. S. Ph. and Br. Ph., and contains 30 per cent. [Ger. Ph.], or 20.4 per cent. [Aust. Ph., Hung. Ph., Swiss Ph.], of the anhydrous acid. [B. 95.]—**A. a. eliguo venale.** **A. a. empyrennaticum.** Pyroigneous acid. [A. 313, 316.]—**A. a. forte.** Strong acetic acid. [A. 316.]—**A. a. fortius.** The strongest acetic acid. [A. 316.] That of the old London Ph. was required to be of such strength that 100 grains would neutralize 87 grains of sodium carbonate. [B.]—**A. a. glaciale** [U. S. Ph., Br. Ph., Greek Ph.], Fr., *esprit de vinaigre*, *vinaique glacial*, *acide acétique cristallisable* [Fr. Cod.], Ger., *Essigsäure* [Ger. Ph.], *Eisessig*. It., *acido acetico glaciale*. Sp., *ácido acético glacial*. Syn.: *acidum aceticum* [Ger. Ph.], *a. a. concentratum*, *a. a. crystallisatum*. Glacial acetic acid. Aqueous acetic acid containing at least 96 per cent. [Ger. Ph., Aust.

Ph., Swiss Ph., Hung. Ph., Rouman. Ph.], 97.5 per cent. [Russ. Ph.], 99 per cent. [U. S. Ph., Br. Ph., Swed. Ph.], or 100 per cent. [Fr. Cod.], of the anhydrous acid. The corresponding Belgiau preparation contains only 85 per cent. of the acid. [B. 95.]—**A. a. ligni.** Purified pyroigneous acid.—**A. a. purum.** Glacial acetic acid. [B.]—**A. a. pyroigneosum.** Pyroigneous acid. [A. 347.]—**A. a. scilliticum.** See *Acetum scillæ*.—**A. a. tenue** [Edinb. Ph. (1826)]. Distilled wine vinegar; dilute acetic acid of a sp. gr. of 1.006. [B. 97.]—**Species pro vaporibus acidi aceti** [Swed. Ph. (1817)]. A preparation consisting of 3 parts of crystallized lead acetate and 1 part of sulphuric acid, to be mixed together at the moment of using. [B. 97.]—**Syrupus acidi aceti** [Edinb. Ph. (1826), U. S. Ph. (1820)]. Fr., *sirop d'acide acétique*, *sirop de vinaigre*. Ger., *Essigsyrup*. It., *stoppo di acido acetico*. Sp., *jarabe de ácido acético*. Syn.: *syrupus aceti*, *oxysaccharum*. A preparation made by boiling together 5 parts of vinegar and 7 parts of refined sugar to the consistence of a syrup. Similar preparations were official in various formularies of an earlier date, the amount of vinegar in them varying from 25 to 50 per cent. [B. 97], and the present Belg. Ph. contains one made up of 347 parts of dilute acetic acid (containing 5.1 per cent. of the anhydrous acid) and 653 parts of sugar. [B. 10.]

**ACIDUM ACETOSUM** (Lat.), n. n.  $A^2s(a^3k)-e^2t-o^3su^3m(su^4m)$ . Acetosus (acetic) acid.—**A. a. camphoratum.** See *ACIDUM ACETICUM camphoratum*.—**A. a. debilius.** **A. a. destillatum.** Distilled vinegar; dilute acetic acid. [A. 316.]—**A. a. forte.** Strong acetous acid; acetic acid.—**A. a. tenue.** Dilute acetic acid; distilled vinegar. [A. 316.]—**Syrupus acidi acetosi.** See *Syrupus ACIDE ACETICI*.

**ACIDUM ARSENICUM** [Fr. Cod.] (Lat.), n. n.  $A^3p-se^2n-i^2k-u^3m(u^4m)$ . Fr., *acide arsénique* [Fr. Cod.], Ger., *Arsensäure*. It., *acido arsenico*. Sp., *ácido arsenico*. Arsenic acid.—**Pilulæ cum acido arsenico** [Fr. Cod.]. See *PILULE ARSENICALES*.

**ACIDUM ARSENOSUM** [U. S. Ph., Br. Ph., Fr. Cod., Belg. Ph., Swiss Ph.] (Lat.), n. n.  $A^3p-se^2n-i^2o^3su^3m(su^4m)$ . Fr., *acide arsénieux* [Fr. Cod.], Ger., *arsenige Säure* [Ger. Ph.], It., *acido arsenoso*. Sp., *ácido arsenoso*. Arsenious acid; trioxide of arsenic.—**A. a. aqua solum** [Fr. Cod.]. See *Solutio d'acide arsenieux*.—**Granula cum acido arsenioso** [Fr. Cod.]. See *Granulæ d'acide arsenieux*.—**Liquor acidi arseniosi** [U. S. Ph.], Fr., *liquor arsenicalis hydrochlorique*. Ger., *Chlorarseniklösung*. It., *soluzione di acido arsenioso*, *soluzione idroclorica d'arsenico*. Sp., *licor de acido arsenioso*. Syn.: *liquor arsenici hydrochloricus* [Br. Ph.], *liquor arsenici chloridi* [U. S. Ph. (1870)], *hydrochloric solution of arsenic*. Solution of arsenious acid; a one-per-cent. aqueous solution of arsenic trioxide prepared by boiling the latter with hydrochloric acid and adding water. The present preparation of the U. S. Ph. and Br. Ph. is stronger than that official in the preceding editions of these formularies in the proportion of 8 to 9.

**ACIDUM BENZOICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Dan. Ph., Finn. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph., Swed. Ph.] (Lat.), n. n.  $Be^2n-zo^3-i^2k-u^3m(u^4m)$ . Fr., *acide benzoïque* [Fr. Cod.], Ger., *Benzoesäure* [Ger. Ph.], It., *acido benzoico*. Sp., *ácido benzoico* [Sp. Ph.]. Benzoic acid, obtained, according to all the formularies except the French Codex, by the sublimation of benzoïn.—**A. b. crystallisatum** [Pruss. Ph. (1862)]. See *A. b. via humida paratum*.—**A. b. medicinale** [Belg. Ph.], **A. b. sublimatione paratum** [Greek Ph.], **A. b. sublimatum** [Russ. Ph.], Fr., *acide benzoïque par sublimation* [Fr. Cod.], Ger., *Benzoeblumen*. It., *fiore di benzoe*. Sp., *flores de benjui*. Syn.: *Flowers of benzoïn*. Benzoic acid obtained by the sublimation of benzoïn. [B. 95.]—**A. b. via humida paratum** [Greek Ph.], Fr., *acide benzoïque par voie humide* [Fr. Cod.]. Benzoic acid obtained by boiling benzoïn with lime water or potassium carbonate, extracting the product with water, and precipitating the extract with hydrochloric acid. [B. 95.]—**Trochisci acidi benzoici** [Br. Ph.], Fr., *tablettes d'acide benzoïque*. Ger., *Benzoesäurepastillen*. It., *tablette di acido benzoico*. Sp., *tabletas de ácido benzoico*. Troches of benzoic acid; a preparation consisting of troches each of which contains  $\frac{1}{2}$  grain of benzoic acid mixed with sugar.

**ACIDUM BORICUM** [U. S. Ph., Br. Ph., Ger. Ph., Dan. Ph., Russ. Ph., Swed. Ph., Netherl. Ph., Swiss Ph.] (Lat.), n. n.  $Bo^2r-i^2k-u^3m(u^4m)$ . Fr., *acide borique*. Ger., *Borsäure* [Ger. Ph.], It., *acido borico*. Sp., *ácido bórico* [Sp. Ph.]. Syn.: *acidum boracicum* [Greek Ph.]. Boric acid. [B. 95.]—**A. b. medicinale** [Belg. Ph.], **A. b. purissimum** [Fr. Cod.], Fr., *acide borique cristallisé* [Fr. Cod.], Ger., *gereinigte Borsäure*. It., *acido borico purissimo*. Purified boric acid.—**Gossypium acidi borici**. Borated cotton. A preparation of the London Throat Hospital containing 50 per cent. of boric acid. [B. 94.]—**Lintum acidi borici**. Borated lint; lint impregnated with about half its weight of boric acid. [B. 94.]—**Unguentum acidi borici** [Br. Ph.], Fr., *pommade d'acide borique*. Ger., *Borsäuresalbe*. It., *ponada o unguento di acido borico*. Sp., *pomada de ácido bórico*. Ointment of boric acid. A preparation made by melting together soft paraffin, 4 parts, hard paraffin, 2 parts, and adding 1 part of finely powdered boric acid. Lister's boric-acid ointment is made by melting together 2 parts of paraffin, 1 part of white wax, and 2 parts of almond oil, and adding 1 part of boric acid. [B. 94.]

**ACIDUM CARBOLICUM** [U. S. Ph., Br. Ph., Ger. Ph., Aust. Ph., Hung. Ph.] (Lat.), n. n.  $Ka^3r-bo^2l-i^2k-u^3m(u^4m)$ . Fr., *acide phénique*, *phénol* [Fr. Cod.], Ger., *Carbolsäure* [Ger. Ph.], It., *acido carbolico*, *acido fenico*. Sp., *ácido fénico*, *ácido carbólico*. Syn.: *acidum phanicum* [Greek Ph.], *acidum phenylicum* [Dan. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph.], *acidum phenylicum depuratum* [Swed. Ph.], *acidum phenicum* [Fr. Cod.]. Carbolie acid (phenol) purified for medicinal use. [B. 95.]—**Acetum cum acido carbolico** [Fr. Cod.]. See *VINAIGRE PHÉNIQUE*.—**A. c. crudum** [U. S. Ph., Ger. Ph., Russ. Ph.], Fr., *acide phénique cru*. Ger., *rohe Carbolsäure* [Ger. Ph.], It., *acido fenico crudo*. Sp., *ácido fénico comercial*. Syn.: *acidum phenylicum crudum* [Swiss Ph.],

Swed. Ph.]. Crude carbolic acid. Commercial carbolic acid containing various impurities which should not exceed more than 10 per cent. by volume [U. S. Ph., Ger. Ph.], or 50 per cent. by weight [Russ. Ph., Swiss Ph., Swed. Ph.]. It is usually more or less colored and contains cresol. [B, 5, 95.]—**A. c. crystallisatum** [Russ. Ph.]. See **A. c.**—**A. c. impurum**. See **A. c. crudum**.—**A. c. liquefactum** [Br. Ph., Ger. Ph.]. Fr., *acide phénique liquide*. Ger., *verflüssigte Carbonsäure* [Ger. Ph.]. It., *acido fenico liquido*. Sp., *ácido fénico líquido*. Carbolic acid mixed with one tenth its weight of water, forming an oily liquid. [B.]—**A. c. solutum** [Russ. Ph.]. **Aqua acidi carbolicæ** [U. S. Ph., 1870]. See **Aqua carbolisata**.—**Carbasus acidi carbolicæ**. Carbolyzed gauze. [B, 94.]—**Glycerinum acidi carbolicæ** [Br. Ph.]. **Glyceritum acidi carbolicæ** [U. S. Ph., 1870]. Fr., *glycère d'acide phénique*. Ger., *Phenolglycerit*. It., *glicerato o glicerite di acido fenico*. Sp., *glicerolado de ácido fénico*. Glycerin or glycerite of carbolic acid; a solution of 1 part of the crystallized acid in 4 parts by volume of glycerin. [B, 5, 94.]—**Solutio acidi carbolicæ** [Norweg. Ph.]. See **Aqua carbolisata**.—**Suppositoria acidi carbolicæ** [U. S. Ph., 1870]. Fr., *suppositoires d'acide phénique*. Ger., *Carbonsäurestuhlpfäpfchen*. It., *suppositori di acido carbolico*. Sp., *supositorios de ácido fénico*. Suppositories of carbolic acid, each suppository containing 1 grain of carbolic acid and 29 grains of cacao butter. [B, 81.]—**Suppositoria acidi carbolicæ cum sapone** [Br. Ph.]. Fr., *suppositoires d'acide phénique avec savon*. Ger., *geseifte Carbonsäurestuhlpfäpfchen*. It., *suppositori di acido carbolico con sapone*. Suppositories of carbolic acid with soap; each suppository contains 1 grain of crystallized carbolic acid, 15 grains of soap, and enough starch to make a paste of suitable consistence.—**Unguentum acidi carbolicæ** [U. S. Ph., Br. Ph.]. Fr., *pommade d'acide phénique*. Ger., *Phensalbe*. It., *pomata o unguento di acido fenico*. Sp., *pomada de ácido fénico*. Ointment of carbolic acid; an ointment made of 1 part of carbolic acid mixed with 9 parts of simple ointment [U. S. Ph.], or with 12 parts of soft paraffin and 6 parts of hard paraffin [Br. Ph.].

**ACIDUM CARBONICUM** (Lat.), n. n.  $Ka^2r\text{-}bo^2n^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Fr., *acide carbonique*. Ger., *Kohlensäure*. It., *acido carbonico*. Sp., *ácido carbónico*. 1. Carbon dioxide (the carbonic acid gas of the older chemists). 2. True carbonic acid. [B.]—**Aqua acidi carbonici** [Finn. Ph., U. S. Ph., 1870]. **Aqua acidulata cum acido carbonico**. **Solutio acidi carbonici** [Swed. Ph.]. Fr., *eau gazeuse simple* [Fr. Cod.]. Ger., *kohlensaures Wasser*. It., *acqua gazzosa semplice*. Sp., *agua carbónica* [Sp. Ph.]. Syn.: *acua carbonica*, *acua acidula simplicior* [Fr. Cod.]. Carbonic acid water; soda water. An aqueous solution of carbon dioxide prepared under a pressure of several atmospheres (7 according to the French Codex). It is a colorless, odorless, and tasteless effervescent liquid, containing true carbonic acid. [B.]

**ACIDUM CHLORHYDRICUM** [Fr. Cod., Belg. Ph.] (Lat.), n. n.  $Klo^2r(hi^2d\text{-}hu^2d)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). See **HYDROCHLORIC ACID**.—**A. c. dilutum** [Belg. Ph.]. See **Dilute HYDROCHLORIC ACID**.—**A. c. venale** [Belg. Ph.]. See **Commercial HYDROCHLORIC ACID**.—**Balneum acidi chlorhydrici** [Belg. Ph.]. Fr., *bain d'acide chlorhydrique*. Ger., *Chlorsäurestoffbade*. It., *bagno d'acido cloridrico*. Sp., *baño de ácido clorhídrico*. Syn.: *balneum acidum*. Bath of hydrochloric acid; a sufficient quantity, i. e., 1 kilogramme (2½ lbs.) of concentrated hydrochloric acid of sp. gr. 1.18 to properly acidulate a bath of 300 litres (80 gallons). [B, 95.]

**ACIDUM CHROMICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Greek Ph., Russ. Ph., Hung. Ph., Netherl. Ph., Swiss Ph.] (Lat.), n. n.  $Kro^2mi^2k\text{-}u^2m$  (u<sup>2</sup>m). Fr., *acide chromique cristallisé* [Fr. Cod.]. Ger., *Chromsäure* [Ger. Ph.]. It., *acido cromatico*. Sp., *ácido crómico*. Chromic acid; chromium trioxide. [B, 95.]—**A. c. aqua solutum** [Fr. Cod.]. **Liquor acidi chromici** [Br. Ph.]. Fr., *soluté d'acide chromique* [Fr. Cod.]. Ger., *Chromsäurelösung*. It., *soluzione di acido cromatico*. Sp., *solución de ácido crómico*. An aqueous solution of chromium trioxide containing 50 per cent. [Fr. Cod.], or 25 per cent. [Br. Ph.], of the latter. [B.]

**ACIDUM CITRICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., and all the Pharmacopœias] (Lat.), n. n.  $Si^2t(ki^2t)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Citric acid.—**A. c. crystallis concretum**. Crystallized citric acid. [B.]—**Pulvis acidi citrici** [Fr. Cod.]. See **Poudre d'acide citrique**.—**Syrupus acidi citrici** [U. S. Ph.]. **Syrupus cum acido citrico** [Fr. Cod.]. Fr., *sirop d'acide citrique* [Fr. Cod.]. Ger., *Citronensäuresyrup*. It., *siropo di acido citrico*. Sp., *jirabe de ácido cítrico*. Syrup of citric acid. A preparation made up of citric acid, 8 parts; spirit of lemon, 4 parts; water, 8 parts, and syrup, 980 parts [U. S. Ph.], or of citric acid, 10 parts, and syrup, 980 parts [Fr. Cod.], or of citric acid, 20 parts, water, 40 parts, simple syrup, 969 parts, and oil of citron, 1 part [Belg. Ph., B, 10].

**ACIDUM GALLICUM** [U. S. Ph., Br. Ph., Fr. Cod., Swiss Ph., Netherl. Ph.] (Lat.), n. n.  $Ga^2l(ga^2l)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Gallic acid.—**Glycerinum acidi gallici** [Br. Ph.]. **Glyceritum acidi gallici** [U. S. Ph., 1870]. Fr., *glycère d'acide galique*. Ger., *Gallussäureglycerit*. It., *glicerato o glicerite di acido gallico*. Sp., *glicerolado de ácido galico*. Glycerin or glycerite of gallic acid; a solution of 1 part of gallic acid in 4 parts by volume of glycerin. [B, 5, 94.]—**Unguentum acidi gallici** [U. S. Ph.]. Fr., *pommade d'acide galique*. Ger., *Gallussäuresalbe*. It., *pomata di ácido gallico*. Sp., *pomada de ácido galico*. Ointment of gallic acid; a mixture of 1 part of gallic acid with 9 parts of benzoated lard. [B.]

**ACIDUM HYDRIODICUM** (Lat.), n. n.  $Hid(hu^2d)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Hydriodic acid.—**A. h. dilutum**. See **Dilute HYDRIODIC ACID**.—**Syrupus acidi hydriodici** [U. S. Ph.]. Fr., *sirop d'acide iodhydrique*. Ger., *Iodwasserstoffsyrup*. It., *siropo di acido iodidrico*. Sp., *jirabe de ácido yodhídrico*. Syrup of hydriodic acid; a preparation made by adding to a mixture of 150 parts of syrup and 150 of water a solution of 10 parts of iodine in 80 of alcohol, passing a current of hydrogen sulphide through the mixture till the latter acquires a permanently yellow color, filtering

and adding 5 parts of spirit of orange, 500 of sugar, and water up to 1,000 parts. It contains one per cent. of hydriodic acid. [B.]

**ACIDUM HYDROCYANICUM** [Greek Ph., Swiss Ph.] (Lat.), n. n.  $Hid(hu^2d)\text{-}ro\text{-}sik(u^2)\text{-}a^2n(a^2n)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Hydrocyanic acid. In the Greek Ph. and Swiss Ph. dilute hydrocyanic acid.—**A. h. alcoholisatum**, **A. h. dilutum** [U. S. Ph., Br. Ph.]. See **Dilute HYDROCYANIC ACID**.—**Vapor acidi hydrocyanici** [Br. Ph., 1867]. Fr., *inhalation d'acide cyanhydrique*. It., *vapore o inalazione di acido cianidrico*. Inhalation of hydrocyanic acid; a preparation consisting of 10 to 15 minims of dilute hydrocyanic acid mixed with a fluidrachm of cold water and slowly evaporated at the time of using. [B, 5.]

**ACIDUM MURIATICUM** [U. S. Ph., 1870] (Lat.), n. n.  $Mu^2\text{-}(mu)^2r^2i^2a^2t(a^2t)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Hydrochloric acid.—**A. m. concentratum**. See **HYDROCHLORIC ACID**.—**A. m. crudum**. See **Commercial HYDROCHLORIC ACID**.—**A. m. deplogisticatum**. Fr., *acide muriatique deplogistiqué*. An old name for chlorine. [A, 344.]—**A. m. dilutum**. See **Dilute HYDROCHLORIC ACID**.—**A. m. hyperoxygenatum**. Fr., *acide muriatique suroxygéné*. Ger., *überoxydierte Salzsäure*. Chloric acid. [B, 48, 49.]—**A. m. nitroso-oxygenatum**. Nitrohydrochloric acid. [A, 344.]—**A. m. oxygenatum** [Greek Ph.]. Fr., *acide muriatique oxygéné*. Ger., *oxydierte Salzsäure*. It., *acido muriatico ossigenato*. Sp., *ácido muriático oxigenado*. An old name for chlorine in saturated aqueous solution; still official under this title in the Greek Ph. [B, 91, 95.]—**A. m. oxygenatum ad contagia**. An old name for chlorine gas (used as a means of disinfection). [B, 97.]—**A. m. purum**. Purified hydrochloric acid.—**Liquor acidi muriatici oxygenati**. See **A. m. oxygenatum**.—**Species pro vaporibus acidi muriatici** [Swed. Ph., 1817]. Syn.: *solutio alexiteria*. A preparation, designed for the extemporaneous production of chlorine, made up of 2 parts of common salt and 1 part of sulphuric acid, to be mixed at the time of using. [B, 97.]

**ACIDUM NITRICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., and the other Pharmacopœias] (Lat.), n. n.  $Ni^2ne(tri^2p\text{-}u^2m)$  (u<sup>2</sup>m). Fr., *acide azotique*, *acide azotique officinal* [Fr. Cod.]. Ger., *Salpetersäure* [Ger. Ph.]. It., *acido nitrico*, *acido azotico*. Sp., *ácido nítrico* [Sp. Ph.]. Syn.: *acidum azoticum*. Nitric acid.—**A. n. alcoholisatum**, **A. n. alcoholisatum** [Fr. Cod.]. Fr., *acide azotique alcoolisé* [Fr. Cod.]. It., *acido nítrico alcoolizzato*. A mixture of nitric acid and alcohol. See **Acide azotique alcoolisé**.—**A. n. concentratum** [Fenn. Ph., Greek Ph.]. Fr., *acide azotique concentré*. Ger., *concentrierte Salpetersäure*. It., *ácido nítrico concentrado*. Sp., *ácido nítrico concentrado*. 1. Strong nitric acid [Fenn. Ph.]. See **NITRIC ACID**. 2. Fuming nitric acid [Greek Ph.]. [B, 95.]—**A. n. concentratum purum**. See **NITRIC ACID**.—**A. n. crudum**. See **Commercial NITRIC ACID**.—**A. n. dilutum**. **A. n. dilutum crudum**, **A. n. dilutum purum**. See **Dilute NITRIC ACID**.—**A. n. fumans**. See **Fuming NITRIC ACID**.—**A. n. hydrochloratum**. See **NITROHYDROCHLORIC ACID**.—**A. n. oxygenatum**. Nitric acid. [B.]—**A. n. purum**. See **NITRIC ACID**.—**A. n. purum dilutum**. See **Dilute NITRIC ACID**.—**A. n. solidificatum**, **A. n. solidum**. A gelatinous solid mass formed by subjecting nitric acid of a sp. gr. of 1.36 in contact with charcoal to a moderate heat. It is used as a caustic application to cancers. [B, 96.]—**A. n. venale**. See **Commercial NITRIC ACID**.—**Species pro vaporibus acidi nitrici**. Fr., *fumigation de Smith*. Sp., *fumigación de ácido nítrico o de Smith* [Sp. Ph.]. Syn.: *fumigatio smithiana*. A preparation designed for disengaging fumes of gaseous nitric acid and composed of equal parts of nitre and sulphuric acid, with or without the addition of water, mixed at the time of using [Sp. Ph., Swed. Ph., 1817, Batav. Ph., 1811]. In other formularies nitrate of calcium and potassium sulphate are directed to be heated together. [B, 92, 97, 108.]—**Unguentum acidi nitrici**. Fr., *pommade d'acide azotique*. Ger., *Salpetersäuresalbe*. It., *pomata di ácido nítrico*. Sp., *pomada de ácido nítrico*. Syn.: *Arxungia nitrica seu oxygenata*, *unguentum nitricum seu oxynomon*. Nitric-acid ointment, nitrous ointment. A preparation made up of 1 part of nitric acid mixed with 16 parts of lard [U. S. Ph., 1820, Batav. Ph., 1811], or of 6 drachms of impure nitric acid and 1 ounce of lard [Ed. Ph., 1826], or of 1 ounce of nitric acid, 4 ounces of lard, and 1 pound of olive-oil [Dubl. Ph., 1830]. Similar preparations of somewhat different strength were official at one time in many formularies. [B, 97.]

**ACIDUM NITROSUM** (Lat.), n. n.  $Ni^2ne\text{-}tro^2su^2m$  (u<sup>2</sup>m). Fr., *acide azoteux ou nitreux*. Ger., *salpêtrige Säure*. It., *ácido nítrico*. Sp., *ácido nítrico*. 1. Nitrous acid. 2. Impure nitric acid obtained by the action of sulphuric acid upon potassium nitrate. [Ed. Ph., 1836.]—**A. n. album**. Fr., *acide azoteux blanc*. Nitric acid.—**A. n. alcoholisatum**. The same as **A. nitricum alcoholisatum**.—**A. n. degazatum**, **A. n. deplogisticatum**. Fr., *acide azoteux deplogistiqué*. Deplogisticated (oxygenated) nitrous acid; nitric acid. [B.]—**A. n. dilutum**. See **Dilute NITRIC ACID**.—**A. n. fumans**, **A. n. phlogisticatum**. See **Fuming NITRIC ACID**.—**A. n. tenue**. See **Dilute NITRIC ACID**.—**Unguentum acidi nitrosi** [Ed. Ph., 1826]. See **Unguentum acidi nitrici**.

**ACIDUM OSMICUM** (Lat.), n. n.  $O^2z(o^2s)^2m^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Osmic acid; osmium tetroxide. [B.]—**Liquor acidi osmici**. Fr., *soluté d'acide osmique*. Ger., *Osmiumsäurelösung*. It., *soluzione di acido osmico*. Sp., *solución de ácido ósmico*. A one-per cent. aqueous solution of osmium tetroxide employed as a reagent in microscopy, and also occasionally employed in medicine. [B, 94.]

**ACIDUM PHENYLICUM** [Dan. Ph., Swiss Ph., Netherl. Ph., Norweg. Ph.] (Lat.), n. n.  $Fe^2n(i^2u^2l)^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Carbolic acid. [B, 95.]—**A. p. crudum**. See **A. CARBOLICUM crudum**.—**A. p. depuratum** [Swed. Ph.]. Purified carbolic acid. [B, 95.]—**Solutio acidi phenylicæ**. See **Aqua carbolisata**.

**ACIDUM PHOSPHORICUM** (Lat.), n. n.  $Fe^2s\text{-}fo^2r^2i^2k\text{-}u^2m$  (u<sup>2</sup>m). Phosphoric acid.—**A. p. concentratum** [Br. Ph.]. Concentrated phosphoric acid. See **PHOSPHORIC ACID**.—**A. p. dilu-**

tum. See *Dilute PHOSPHORIC ACID*.—**A. p. ex ossibus**. Phosphoric acid obtained from bones. [B. 99].—**A. p. fusum**. **A. p. glaciale** [Swiss Ph.]. See *Glacial PHOSPHORIC ACID*.—**A. p. liquidum**. **A. p. officinale**. The acid phosphoric officinal of the French Codex. [B. 92]. See *PHOSPHORIC ACID*.—**A. p. siccum**. 1. Phosphorus pentoxide obtained by heating phosphorus in oxygen. [A. 316]. 2. Glacial phosphoric acid. [Ger. Ph., 1st ed. (B. 95, 102)].—**Solutio acidi phosphorici**. Dilute phosphoric acid. [B. 101].

**ACIDUM SALICYLICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Aust. Ph., Dan. Ph., Swiss Ph., Norweg. Ph., Russ. Ph., Swed. Ph.] (Lat.), n. n.  $\text{Sa}^2\text{l}(\text{sa}^2\text{l})\text{-i}^2\text{-si}^2(\text{ku}^2\text{l})\text{-i}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . Salicylic acid. [B. 95].—**Unguentum acidi salicylici** [Br. Ph.]. Fr., *pommade d'acide salicylique*. Ger., *Salicylsäuresalbe*. It., *pomata di acido salicilico*. Sp., *pomada de ácido salicilico*. Ointment of salicylic acid; made by melting together 18 parts of soft paraffin and 9 parts of hard paraffin and adding 1 part of salicylic acid. [B.]

**ACIDUM SULFURICUM** [Fr. Cod., Ger. Ph., Swiss Ph.] (Lat.), n. n.  $\text{Su}^2\text{l}(\text{su}^2\text{l})\text{-fu}^2(\text{fu}^2)\text{-ri}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . Sulphuric acid.—**A. s. alcoholisatum** [Fr. Cod.]. See *MIXTURA SULFURICA ACIDA*.—**A. s. anglicanum**. English sulphuric acid. In the Aust. Ph. and Hung. Ph. commercial sulphuric acid. [B. 95].—**A. s. anglicum**. See *English SULFURIC ACID*.—**A. s. concentratum**. Concentrated sulphuric acid. [B. 49].—**A. s. concentratum purum**. See *SULFURIC ACID*.—**A. s. crudum**. See *Commercial SULFURIC ACID*.—**A. s. dilutum**. **A. s. dilutum purum**. See *Dilute SULFURIC ACID*.—**A. s. fumanis**. See *Fuming SULFURIC ACID* and *Nordhausen SULFURIC ACID*.—**A. s. nordhausenianum**. Nordhausen sulphuric acid. [B. 96].—**A. s. purum**. Pure sulphuric acid. See *SULFURIC ACID*.—**A. s. purum dilutum**. See *Dilute SULFURIC ACID*.—**A. s. rectificatum**. Pure sulphuric acid. [B.] See *SULFURIC ACID*.—**A. s. spirituosum**. See *MIXTURA SULFURICA ACIDA*.—**Potus cum acido sulfurico** [Fr. Cod.]. See *LIMONADE sulfurique*.

**ACIDUM SULFURICUM** [U. S. Ph., Br. Ph., Netherl. Ph., Dan. Ph.] (Lat.), n. n.  $\text{Su}^2\text{l}(\text{su}^2\text{l})\text{-fu}^2(\text{fu}^2)\text{-ri}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . Sulphuric acid.—**A. s. alcoholisatum**. **A. s. alcoholisatum**. See *MIXTURA SULFURICA ACIDA*.—**A. s. aquosum**. Fr., *acide sulfurique aqueux*. Ger., *wässrige Schwefelsäure*. It., *acido solforico acquoso*. Sp., *ácido sulfúrico acuoso*. Dilute sulphuric acid. [B. 97].—**A. s. aromaticum** [U. S. Ph., Br. Ph.]. Fr., *teinture aromatique sulfurique* [Fr. Cod., 1857], *acide sulfurique aromatisé*. Ger., *aromatische Schwefelsäure*, *säure aromatische Tinctur*. It., *acido solforico aromatico*. *Acido sulfurico aromatico*. Syn.: *tinctura aromatica acida*, *elixir vitrioli Mynsichti*, *Mynsichti's elixir of vitriol*. Aromatic sulphuric acid. A preparation made up of 200 parts of sulphuric acid, 45 parts of tincture of ginger, 1 part of oil of cinnamon, and enough water to make 1,000 parts [U. S. Ph.]; or of 3 parts by volume (140 parts by weight) of sulphuric acid, 38 parts by volume (770 parts by weight) of rectified spirit, and 2 parts each by volume (45 parts by weight) of spirit of cinnamon and essence of ginger [Br. Ph.]. [B.]—**A. s. concentratum** [Norweg. Ph., Swed. Ph.]. Fr., *acide sulfurique concentré*. Ger., *concentrirte Schwefelsäure*. It., *acido solforico concentrato*. Sp., *ácido sulfúrico concentrado*. Concentrated sulphuric acid. See *SULFURIC ACID*.—**A. s. concentratum crudum** [Swed. Ph.]. Fr., *acide sulfurique concentré cru*. Ger., *concentrirte rohe Schwefelsäure*. It., *acido solforico concentrato crudo*. Sp., *ácido sulfúrico concentrado comercial*. Commercial sulphuric acid containing 92 to 93 per cent. of the pure acid. [B. 95].—**A. s. condensatum**. See *A. s. concentratum*.—**A. s. crudum**. See *Commercial SULFURIC ACID*.—**A. s. destillatum** [Belg. Ph.]. Fr., *acide sulfurique distillé*. Ger., *destillirte Schwefelsäure*. It., *acido solforico distillato*. Sp., *ácido sulfúrico destilado*. Sulphuric acid purified by distillation. [B. 95].—**A. s. dilutum**. See *Dilute SULFURIC ACID*.—**A. s. fumanis**. See *Fuming SULFURIC ACID* and *Nordhausen SULFURIC ACID*.—**A. s. germanicum**. German (Nordhausen) sulphuric acid. [B.]—**A. s. purum** [Fenn. Ph.]. **A. s. rectificatum** [Greek Ph.]. Fr., *acide sulfurique pur ou rectifié*. Ger., *gereinigte Schwefelsäure*. It., *acido solforico puro o rectificato*. Sp., *ácido sulfúrico rectificado*. Concentrated and purified sulphuric acid. [B.] See *SULFURIC ACID*.—**A. s. tenue**. See *Dilute SULFURIC ACID*.—**A. s. venale**. See *Commercial SULFURIC ACID*.—**Syrupus acidi sulfurici**. Fr., *sirop d'acide sulfurique*. Ger., *Schwefelsäuresyrup*. It., *siropo di acido solforico*. Sp., *jarabe de ácido sulfúrico*. Syn.: *potus acidus*, *tinctus acidus*, *syrupus vitriolatus*, seu *mineralis*. A preparation made by mixing sulphuric acid with simple syrup or a medicated syrup. The proportion of the constituents varies greatly in the different formulæ; that now official in the Belg. Ph. contains 9 per cent. of the dilute acid, corresponding to about 1.5 per cent. of the strong acid. [B. 10, 97].—**Tinctura acidi sulfurici**. Fr., *teinture au alcool d'acide sulfurique*. Ger., *Schwefelsäuretinctur*. It., *tintura di acido solforico*. Sp., *tintura de ácido sulfúrico*. See *A. s. aromaticum*.

**ACIDUM TANNICUM** [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Russ. Ph., Aust. Ph., Hung. Ph., Belg. Ph., Netherl. Ph.] (Lat.), n. n.  $\text{Ta}^2\text{n}(\text{ta}^2\text{n})\text{-ni}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . 1. Tannic acid. 2. In the Ger. Ph. also a 5-per-cent. aqueous solution of tannic acid used as a test. [B.]—**Cereoli cum acido tannico** [Belg. Ph.]. Fr., *bougies au tannin*. It., *candeleto di acido tannico*. Sp., *candilillas de ácido tánico*. Bougies, 10 centimetres in length, each containing 5 centigrammes (2 grain) of tannic acid, 31 centigrammes of syrup, and 75 centigrammes of gum arabic. [B. 95].—**Glycerinum acidi tannici** [Br. Ph.]. **Glyceritum acidi tannici** [U. S. Ph., 1870]. Fr., *glycéré de tannin* [Fr. Cod.]. Ger., *Tanninglycerol*. It., *glicerite o glicerina di acido tannico*. Sp., *glicerolado de ácido tánico*. Syn.: *glyceritum cum tannino* [Fr. Cod.]. Glycerin or glycerite of tannic acid. A preparation made up of 1 part by weight of tannic acid dissolved in 4 parts by volume of glycerin [Br. Ph., U. S. Ph., 1870], or in 5 parts by weight of glycerite of starch (*glycéré d'amidon*) [Fr. Cod.]. [B.]—**Suppositoria acidi tannici** [Br. Ph., U. S. Ph., 1870]. Fr., *suppositoires de tannin*. Ger., *Tanninstuhlzäpfchen*. It., *supposi-*

*tori di acido tannico o di tannino*. Sp., *supositorios de ácido tánico*. Suppositories of tannic acid. Suppositories containing each 5 grains of tannic acid and 25 grains of cacao butter [U. S. Ph., 1870], or 3 grains of tannic acid with  $\frac{3}{4}$  grains of benzoated lard,  $\frac{1}{4}$  grain of white wax, and  $\frac{1}{4}$  grains of cacao butter [Br. Ph. (B)].—**Suppositoria acidi tannici cum sapone** [Br. Ph.]. Fr., *suppositoires de tannin avec sapon*. Ger., *geseifte Tanninstuhlzäpfchen*. It., *suppositori di acido tannico con sapone*. Suppositories of tannic acid with soap. Suppositories containing each 3 grains of tannic acid,  $\frac{1}{4}$  grains of glycerin of starch [Br. Ph.],  $\frac{1}{4}$  grains of soap, and enough starch to make a paste of suitable consistence. [B.]—**Trochisci acidi tannici** [U. S. Ph., Br. Ph.]. Fr., *tablettes de tannin*. It., *tavolette di acido tannico*. Sp., *tabletas de ácido tánico*. Troches of tannic acid; troches containing each 1 grain of tannic acid, 10 grains of sugar, and  $\frac{1}{4}$  grain of tragacanth made into a mass with orange-flower water [U. S. Ph.], or containing  $\frac{1}{4}$  grain of tannic acid and 15 grains of sugar, made into a mass with gum arabic, mucilage of gum arabic, tincture of tolu and water [Br. Ph.]. [B.]—**Unguentum acidi tannici** [U. S. Ph.]. Fr., *pommade de tannin*. Ger., *Gerbssäuresalbe*. It., *pomato o unguento di acido tannico*. Sp., *pomada de ácido tánico*. Ointment of tannic acid; a mixture of 1 part of tannic acid and 9 parts of benzoated lard. [B.]

**ACIDUM TARTARICUM** (Lat.), n. n.  $\text{Ta}^2\text{r}\text{-ta}^2\text{r}(\text{ta}^2\text{r})\text{-i}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . 1. The Latin equivalent for ordinary tartaric (dextrotartaric) acid in all the Pharmacopœias except the French Codex. 2. In the Ger. Ph. also a 20 per cent. aqueous solution of tartaric acid used as a test solution. [B.]—**A. t. venale** [Belg. Ph.]. Fr., *acide tartrique du commerce*. Ger., *königliche Weinsäure*. It., *acido tartarico del commercio*. Sp., *ácido tartárico del comercio*. Commercial tartaric acid containing various impurities, which, however, should include no free sulphuric acid and but a minimum amount of calcium tartrate. [B. 95].—**Pulvis ex acido tartarico**. Fr., *poudre d'acide tartrique avec sucre*. It., *polvere di acido tartarico con zucchero*. A preparation formerly official in several Pharmacopœias, consisting of powdered tartaric acid mixed with sugar in varying proportions. [B. 97]. A preparation now official in the Belg. Ph. contains 6 parts of tartaric acid, 3 parts of sugar, and 1 part of oil of citron. [B. 10].—**Syrupus acidi tartarici**. **Syrupus de acido tartarico** [Fr. Cod., 1818]. Fr., *sirop d'acide tartrique* [Fr. Cod.]. Ger., *Weinsäuresyrup*. It., *siropo di acido tartarico*. Sp., *jarabe de ácido tartárico o tartrico*. Syrup of tartaric acid; a syrup made up with 10 parts each of tartaric acid and distilled water and 980 parts of syrup [Fr. Cod.], or 20 parts of tartaric acid, 40 parts of water, 960 parts of syrup, and 1 part of oil of citron [Belg. Ph. (B)].

**ACIDUM TARTRICUM** [Fr. Cod.] (Lat.), n. n.  $\text{Ta}^2\text{r}\text{-tri}^2\text{-ku}^2\text{m}(\text{ku}^2\text{m})$ . Tartaric acid.—**Potus cum acido tartarico** [Fr. Cod.]. See *LIMONADE tartrique*.—**Syrupus cum acido tartarico** [Fr. Cod.]. See *Syrupus ACIDI TARTRICI*.

**ACIDURGIA** (Lat.), n. f.  $\text{A}^2\text{s}(\text{a}^2\text{k})\text{-i}^2\text{-d-u}^2\text{r}(\text{ur})/\text{j}^2(\text{gi}^2)\text{-a}^2$ . From *akis*, a point, and *εργον*, work. Fr., *acidurgie*. Ger., *Akidurgie*. It., *achidurgia*. An old term for operative surgery. [A. 322.]

**ACIDUS** (Lat.), adj.  $\text{A}^2\text{s}(\text{a}^2\text{k})/\text{i}^2\text{-d-u}^2\text{r}(\text{ur})/\text{j}^2(\text{gi}^2)\text{-a}^2$ . Acid.

**ACIDYL**, n.  $\text{A}^2\text{s}(\text{a}^2\text{k})/\text{i}^2\text{-d-u}^2\text{r}(\text{ur})/\text{j}^2(\text{gi}^2)\text{-a}^2$ . For deriv., see *ACID* and *-yl*.\* Fr., *acidyle*. Ger., *Acidyl*. The radicle of an organic acid (applied more particularly to the series of trivalent hydrocarbons having the general formula  $\text{C}_n\text{H}_{2n-1}$ ). [B.]

**ACIDYLNITRILE**, n.  $\text{A}^2\text{s}(\text{a}^2\text{k})/\text{i}^2\text{-d-u}^2\text{r}(\text{ur})/\text{j}^2(\text{gi}^2)\text{-a}^2$ . Fr., *acidylnitrile*. Ger., *Acidynitril*. A compound of the trivalent residue of an organic acid united with nitrogen. The term is usually applied to derivatives of this sort formed from the acids of the fatty series, such as formic acid, acetic acid, etc. They have the constitution  $\text{C}_n\text{H}_{2n-1} + \text{C} \equiv \text{N}$ , and are called also *alkyl cyanides*, because they may be regarded as compounds of cyanogen with the members of the univalent series of hydrocarbons (alkyls). [B. 4.]

**ACIER** (Fr.), n.  $\text{A}^2\text{s}\text{-e-a}$ . 1. Steel. 2. A crest, etc. See *ACIES*.—**Baume d'a**. Syn.: *baume d'aiguilles*. A liniment made by dissolving 8 parts of steel filings in 32 of nitric acid, with the aid of heat, and adding 32 parts, each, of alcohol and olive oil; occasionally used for pains in the joints. [A. 321].—**Limaille d'a**. Steel filings. [A. 301.]

**ACIES** (Lat.), n. f.  $\text{A}^2(\text{a}^2)/\text{si}^2(\text{ki}^2)\text{-e}(\text{e}^2)\text{s}$ . Gen., *aciei*. Fr., *acier*, *crête*, *angle saillant*; *arête* (5th def.). Ger., *Grat*, *Grath*; *Gräthe* (5th def.). 1. A ridge or edge formed by the intersection of two planes (said in botany of the edges of certain stems, and in anatomy of prominent edges of bones). [B.] 2. A little eminence formed by the tænia semicircularis at the side of the foramen of Monro, about a line distant from it. [A. 314]. 3. Keenness of vision. [A. 312]. 4. The pupil of the eye. [A. 312]. 5. A collective term for the phalanges of the fingers, from their arrangement like that of a line of spears. [A. 316]. 6. The arrest, or rat-tail, often formed on the inner side of the limbs in horses; being a horny, wart-like, or scaly excrescence. [A. 300].—**A. digitorum manus**. See *A.* (5th def.).—**A. diurna**. See *HEMERALOPIA*.—**A. vespertina**. See *NYCTALOPIA*.

**ACIESIS** (Lat.), n. f.  $\text{A}^2(\text{a}^2)\text{-si}(\text{ke})\text{-e}(\text{a})/\text{si}^2\text{s}$ . See *ACYESIS*.

**ACIFORM**, adj.  $\text{A}^2\text{s}/\text{i}^2\text{-fo}^2\text{rm}$ . From *acus*, a needle, and *forma*, form. Fr., *aciforme*. Ger., *nadelförmig*. In botany, needle-shaped. [A. 306.]

**ACIN**, n.  $\text{A}^2\text{s}/\text{i}^2\text{n}$ . For deriv., see *ACINUS*, for which this word is an obsolete English equivalent in the botanical sense. [B. 39.]

**ACINACEOUS**, adj.  $\text{A}^2\text{s}/\text{i}^2\text{n-a}^2\text{she-u}^2\text{s}$ . From *acinus* (q. v.). Ger., *kernig*. Full of kernels. [A. 258.]

**ACINACIFOLIOLUS**, adj.  $\text{A}^2\text{s}/\text{i}^2\text{n-a}^2\text{s}/\text{i}^2\text{-fo}^2\text{li}^2\text{-u}^2\text{s}$ . For deriv., see *ACINACIFORM*. Fr., *acinacifolié*. Ger., *schwertblättrig*. Sp., *acinacifoliado*. Having scimitar-shaped leaves. [A. 306.]

**ACINACIFORM**, adj.  $\text{A}^2\text{s}/\text{i}^2\text{n-a}^2\text{s}/\text{i}^2\text{-fo}^2\text{rm}$ . Lat., *acinaci-*

forms from *acinaces* [Gr., *ἀκινῆκης*], a scimitar, and *forma*, form). Fr., *acinaciforme*. Ger., *süßelförmig*. Sp., *acinaciforme*. Scimitar-shaped (said of a compressed, fleshy leaf having one edge convex and the other straighter and thicker, also of the fruit of certain leguminous plants). [A, 323, 345; B.]

**ACINAIRE** (Fr.), adj. A<sup>2</sup>-si<sup>2</sup>n-a<sup>2</sup>r. 1. Acinous. 2. Acinarious. **ACINAL**, adj. A<sup>2</sup>s-i<sup>2</sup>n-a<sup>2</sup>l. Lat., *acinalis*. Fr., *acinal*. Ger., *beerenartig*. Acinous. Cf. *TUNICA acinalis*.

**ACINÄR** (Ger.), adj. A<sup>2</sup>-tsen-a<sup>2</sup>r. 1. Acinous. [J.] 2. Acinarious.

**ACINARIOUS**, adj. A<sup>2</sup>s-i<sup>2</sup>n-a<sup>2</sup>ri<sup>2</sup>-u<sup>2</sup>s. Lat., *acinarius* (a botanical species-name; see *Ficus acinarius*). Fr., *acinaire*. Ger., *acindr*. Sp., *acinario*. Having grape-like ampullae on the shoots or branches. [Varron (A, 334).]

**ACINE** (Fr.), n. A<sup>2</sup>-sen (as an English word, a<sup>2</sup>s-i<sup>2</sup>n). An acinus; in English (obs.), an acinus in the botanical sense. [B, 39.]

**ACINESES** (Lat.), n. f. pl. of *acinesia* = *acinesia* (q. v.). A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/sez(se<sup>2</sup>s). Neuroses characterized by acinesia. [A, 316.]

**ACINESIA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/zhi<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>. Gr., *ἀκίνησια* (from a priv., and *κίνησις*, to move). Fr., *acinesie*. Ger., *Akinese*. It., Sp., *acinesia*. Syn.: *acinesis*, *motus privatio*. 1. Absence of motion; rest. [K, 4.] 2. Loss of the power of motion in a part or in the whole body, whether from paralysis, paresis, syncope, or other cause. [A, 323.] 3. The parasystole; the stage of rest intervening between the systole and the diastole of the heart. [Galen (A, 322).]

**ACINESIATROPHIA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/zhi<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>(a<sup>2</sup>)-tro<sup>2</sup>/fi<sup>2</sup>-a<sup>2</sup>. Fr., *acinesiatrophie*. See *ACINETATROPHIA*.

**ACINESIC**, adj. A<sup>2</sup>s-i<sup>2</sup>n-e<sup>2</sup>/zi<sup>2</sup>k. See *ACINETIC*.

**ACINESIS** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/si<sup>2</sup>s. Gen., *acinesios*. Gr., *ἀκίνησις*. Acinesia. See also *ACINESES*.

**ACINETA** (Lat.), n. n. pl. of adj. *acinetus* (Gr., *ἀκίνητος*), motionless. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/ta<sup>2</sup>. 1. Epiphytal *Orchids*. [A, 252.] 2. A Central American genus of subterranean bulbs established by Lindley. [A, 248.]

**ACINETÆ** (Lat.), n. f. pl. of adj. *acinetus*. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e(a)/te<sup>2</sup>(ta<sup>2</sup>-e<sup>2</sup>). Fr., *acinetes*. An old term for a section of the *Suctorio*. [B.]

**ACINETARIA** (Lat.), n. n. pl. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e<sup>2</sup>t-a(a<sup>2</sup>)/ri<sup>2</sup>-a<sup>2</sup>. For deriv., see *ACINETA*. Syn.: *Tentaculifera*. A class of corticate *Protozoa*, distinguished by the absence of vibratile processes in the adult animal and by the presence of adhesive or suctional tentacles. They are non-locomotive in the adult state. The class comprises the orders *Suctorio* and *Non-suctorio*. [E. R. Lankester (B, 77).]

**ACINETARIAN**, n. A<sup>2</sup>s-i<sup>2</sup>n-e<sup>2</sup>t-a<sup>2</sup>/ri<sup>2</sup>-a<sup>2</sup>n. An individual of the class *Acinetaria*. [E. R. Lankester (B, 77).]

**ACINETATROPHIA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e<sup>2</sup>t/a<sup>2</sup>(a<sup>2</sup>)-tro<sup>2</sup>/fi<sup>2</sup>-a<sup>2</sup>. From *ἀκίνητος*, motionless, and *τρόφος*, atrophy. Fr., *acinetatrophie*. Syn.: *acinesiatrophia* [Hutrin], *marcor e motu deficiente*. Atrophy of a part from disuse (lack of motion). [Hutrin (A, 314).]

**ACINETIC**, adj. A<sup>2</sup>s-i<sup>2</sup>n-e<sup>2</sup>t/i<sup>2</sup>k. Lat., *acineticus*. Fr., *acinetique*. 1. Affected with acinesia. [A, 322.] 2. Having the property of abolishing or lessening the power of muscular movement (said of drugs and poisons). [A, 321.]

**ACINETIDÆ** (Lat.), n. f. pl. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e<sup>2</sup>t/i<sup>2</sup>d-e(a<sup>2</sup>-e<sup>2</sup>). See *ACINETE*.

**ACINETIFORM**, adj. A<sup>2</sup>s-i<sup>2</sup>n-e<sup>2</sup>t/i<sup>2</sup>-fo<sup>2</sup>rm. In zoology, non-locomotive (said of the embryo *Infusoria*, from their resembling the *Acinetaria*). [A, 349.]

**ACINETINA** (Lat.), n. n. pl. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-e<sup>2</sup>t-i(e)/na<sup>2</sup>. See *ACINETARIA*.

**ACINIER** (Fr.), n. A<sup>2</sup>s-i<sup>2</sup>n-i<sup>2</sup>-a. The hawthorn. [A, 321.] See *CRATÆGUS oxyacantha*.

**ACINIFORM**, adj. A<sup>2</sup>s-i<sup>2</sup>n-i<sup>2</sup>-fo<sup>2</sup>rm. Gr., *ᾰκινῆδης*. Lat., *aciniformis*. Fr., *aciniforme*. Ger., *traubenförmig*, *beerenförmig*. Sp., *aciniforme*. 1. Clustered like grapes. [A, 258.] 2. Resembling a grape (applied by Ingrassia to the choroid coat of the eye, and by others to the layer of pigment on the posterior surface of the iris). [A, 255.]

**ACINODENDRON** (Lat.), n. n. A<sup>2</sup>s-(a<sup>2</sup>k)/i<sup>2</sup>n-o-de<sup>2</sup>n/dro<sup>2</sup>-n. From *ᾰκῖνος* (see *ACINUS*), and *δένδρον*, a tree. An old genus-name for (as supposed by De Candolle) the *Sagrea guadalupensis*. [A, 252.]

**ACINODENDROUS**, adj. A<sup>2</sup>s-i<sup>2</sup>n-o-de<sup>2</sup>n/dro<sup>2</sup>-us. Lat., *acinodendrus*. Fr., *acinodendre*. Sp., *acinodendro*. Having the fruit arranged like grapes. [A, 306.]

**ACINOS** (Lat.), n. m. A<sup>2</sup>s-(a<sup>2</sup>k)/i<sup>2</sup>n-o<sup>2</sup>s. Gr., *ᾰκῖνος*. 1. A plant, supposed to be a species of thyme, used by the ancients for menorrhagia and diarrhoea, also, applied locally, for ulcers and erysipelas. [Dioscorides (A, 344).] 2. A genus of latiate plants. [A, 334.] 3. An acinus (q. v.).

**ACINÖS** (Ger.), adj. A<sup>2</sup>-tsen-u<sup>2</sup>s. Acinous.

**ACINOSE**, adj. A<sup>2</sup>s-i<sup>2</sup>n-os. See *ACINOUS*.

**ACINOSUS** (Lat.), adj. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-o<sup>2</sup>/su<sup>2</sup>s(su<sup>2</sup>s). Like grapes; acinous.—*Acinosa tunica*. See *TUNICA acinosa*.

**ACINO-TUBULAR**, adj. A<sup>2</sup>s-i<sup>2</sup>n-o-tu<sup>2</sup>/bu<sup>2</sup>-la<sup>2</sup>-r. From *acinus* (q. v.), and *tubulus*, a tube. A term used to designate glands in which the secreting cavity is intermediate in form between a sac and a tube. [J, 30.]

**ACINOUS**, adj. A<sup>2</sup>s-i<sup>2</sup>n-u<sup>2</sup>s. Fr., *acineux*. Ger., *acindr*. It., Sp., *acinoso*. Syn.: *acinal*, *acinose*, *aciniform*. 1. Pertaining to

an acinus. [J.] 2. Having acini. See *A. GLAND*. 3. Rounded and transparent like grapes. [A, 334.] 4. In pathology, resembling a racemose gland. [A, 316.] See *A. ADENOMA*.

**ACINULA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>n-u<sup>2</sup>(u)-la<sup>2</sup>. 1. A genus of globular, sessile *Fungi* indigenous to Russia. [A, 345.] 2. The sclerotium stage of an ascomycetous fungus, very similar to *Sclerotium* or *Peridola*, but distinguished by the diffident coat. [A, 248; B.]—*A. clavus*. Ergot. [A, 248.]

ACINULA CLAVUS. [A, 248.]

**ACINUS** (Lat.), n. n. A<sup>2</sup>s-(a<sup>2</sup>k)/i<sup>2</sup>n-u<sup>2</sup>m(u<sup>2</sup>m). See *ACINUS*.

**ACINUS** (Lat.), n. m. A<sup>2</sup>s-(a<sup>2</sup>k)/i<sup>2</sup>n-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *ᾰκῖνος*. Fr., *acine*. Ger., *Beerchen*, *Lippchen*. It., *acino*. Sp., *acino*. Syn.: *alveolus*, *insula*, *follicle*, *gland-granule*, *gland-vesicle*. 1. Literally, a berry, especially the grape; also the stone of the grape. [A, 312.] 2. Formerly, a berry consisting of an aggregation of fleshy fruits; now restricted to the separate fruits of which such a berry is composed. [B, 19, 39.] 3. The seed of a baccate fruit. [Gray (B, 39).] 4. See *ACINOS*. 5. The smallest lobule of an acinous, or racemose, gland [J, 30] or of the liver [J, 42]. 6. One of the smallest lobules, or lobulets, of the lung. [Waters, 1860 (J, 42, 43).] 7. The cavity, or sacculus recess, in the finest lobule of a racemose gland. [J, 30.] 8. That part of the excretory duct of a racemose gland into which the cavities of several alveoli open. [J, 33.] 9. One of the closed vesicles of a gland having no excretory duct, such as the thyroid. [J, 33.] 10. A cell of the liver containing glycogen. [J, 33.] Cf. *ALVEOLUS*.—*Acini biliosi*. The granular elements of the liver. [A, 341].—*Acini glandulosi*. The acini of a gland.—*Acini interiores renales*. The Malpighian corpuscles of the kidney. [J.]—*Acini lienis*. See *Splenic CORPUSCLES*.—*Acini malpighiani*, *acini of Malpighi*, *acini renales*. See *Malpighian CORPUSCLES*.—*Drüsen-a*. (Ger.) A glandular a. [B.]

**ACIOA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>-o-a<sup>2</sup>. A genus of chrysobalanaceous nut-bearing trees, indigenous to Guiana, established by Aublet. [A, 305].—*A. amara*. A species of which the nut has a bitter kernel. [A, 305].—*A. dulcis*. A species that bears a sweet, edible nut like the almond. [A, 305.]

**ACIPENSER** (Lat.), n. m. A(a<sup>2</sup>)-si<sup>2</sup>(ki<sup>2</sup>)-pe<sup>2</sup>n/su<sup>2</sup>r(se<sup>2</sup>r). Gr., *ᾰκῖνῆριος*, the sturgeon. Sp., *acipenser*. A genus of fishes, including the sturgeons. [B.]—*A. beluga*. A synonym of *A. huso*, from the Russian name *beluga* given to the fish. [B, 5].—*A. Güldenstädtii* [Brand and Räteburg]. The osseter; a species having the same habitat as *A. huso*, and, like it, furnishing isinglass. Its roes are made into caviare. [B, 33].—*A. huso* [Linnaeus]. Fr., *grand esturgeon*. Ger., *Häusen*. The *beluga*, or Russian sturgeon, a large fish found in the inland waters of Russia. Its swimming-bladder constitutes isinglass, the *ichthyocolle* of the J. S. Ph. [B.]—*A. ruthenus* [Linnaeus]. Fr., *sterlet*. The sterlet, another Russian species, also furnishing isinglass. [B, 5, 33].—*A. stellatus* [Pallas]. The sewruga, or starred sturgeon, another Russian species furnishing isinglass. [B, 5, 33].—*A. sturio*. Fr., *esturgeon commun*. Ger., *Stör*. The common sturgeon of Russia, also furnishing isinglass. [B, 5.]

**ACIPHORÉ** (Fr.), adj. A<sup>2</sup>-se-fo-ra. Having the body ending in a needle (said of insects). [A, 306.]

**ACIPHYLLOUS**, adj. A<sup>2</sup>s-i<sup>2</sup>-fi<sup>2</sup>/lu<sup>2</sup>s. Lat., *aciphyllus* (from *ᾰκῖς*, a point, and *φύλλον*, a leaf). Fr., *aciphylle*. Fr., *nadelblättrig*. Sp., *actiflo*. Pointed-leaved (said of plants having linear, acuminate leaves). [A, 306.]

**ACI REALE** (It.), n. A<sup>2</sup>-che-ra-a<sup>2</sup>/la. A health resort in the Sicilian province of Catania, noted for its equable temperature and the dryness of its soil. There are also mineral waters, of a temperature of 69° Fahr., which are used internally, in the form of baths, and by inhalation, in cases of chronic rheumatism, gout, the remains of old exudates, scrofula, obesity, inveterate nervous affections, chronic metallic poisoning, and syphilis; 1,000 parts of the water contain:

Free gases	Hydrogen sulphide.....	0.015
	Carbonic anhydride.....	0.184
	Methane.....	0.007
	Nitrogen.....	0.036
	Sodium chloride.....	2.684
	Magnesium chloride.....	0.000
	Lithium chloride.....	0.009
	Sodium iodide.....	0.014
	Calcium carbonate.....	0.169
	Magnesium carbonate.....	0.008
	Sodium carbonate.....	0.006

[A, 319.]

**ACIS** (Lat.), n. f. A(a<sup>2</sup>)/si<sup>2</sup>s(ki<sup>2</sup>s). Gr., *ᾰκῖς*. 1. A point; a splinter. [Hippocrates (A, 311).] 2. A shooting pain. [Aretaeus (A, 311).] 3. A bandage. [Galen (A, 311).] 4. A genus of bulbous plants, of the order *Amaryllidaceae*, growing in southern Europe and northern Africa. [A, 252.]

**ACIURGIA** (Lat.), n. f. A<sup>2</sup>s-(a<sup>2</sup>k)-i<sup>2</sup>-u<sup>2</sup>r(ur)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>2</sup>. Fr., *aciurgie*. Ger., *Akiurgie*. See *ACIDURGIA*.

**ACIURGY**, n. A<sup>2</sup>s-i<sup>2</sup>-u<sup>2</sup>r-j<sup>2</sup>i<sup>2</sup>. See *ACIDURGIA*.

**ACKAME**, n. The New Zealand name of a genus of cunoniaceae plants. [A, 348.]

**ACKAWAI NUTMEG**, n. The fruit of *Acroclididium camara*; esteemed in Guiana as a remedy for colic, diarrhoea, and dysentery. [A, 316, 252.]

**ACKELEI, ACKELEY** (Ger.), n's. A<sup>2</sup>k'e<sup>2</sup>-l-i. See *ARELEI*.

**ACKERAMPFER** (Ger.), n. A<sup>2</sup>k'e<sup>2</sup>-r-a<sup>2</sup>mp-fe<sup>2</sup>r. Sheep's sorrel. [A, 248.] See *RUMEX acetosella*.

**ACKERANDORN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-a<sup>3</sup>n-do<sup>2</sup>rn. Horehound. [A, 315.] See *MARRUBIUM vulgare*.

**ACKERBACILLE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ba<sup>3</sup>-tsel-le<sup>2</sup>. See *SICHELKRAUT*.

**ACKERBALDIAN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ba<sup>3</sup>-dri<sup>2</sup>-a<sup>3</sup>n. The great wild valerian. [A, 315.] See *VALERIANA officinalis*.

**ACKERBAUM** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ba<sup>3</sup>-um. The sessile-fruited oak. [A, 248.] See *QUERCUS robur*.

**ACKERBEERE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-bar-e<sup>2</sup>. The dewberry. [A, 315.] See *RUBUS cæsius*.

**ACKERBOHNE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-bon-e<sup>2</sup>. The field-bean (*Vicia faba*). [B.]

**ACKERBRAME, ACKERBREME** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-bra<sup>3</sup>m(brem)-e<sup>2</sup>. The dewberry. [A, 315.] See *RUBUS cæsius*.

**ACKERBRAND** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-bra<sup>3</sup>nd. The purple cow-wheat (*Melampyrum arvense*). [A, 315.]

**ACKERBROMBEERE, ACKERBROME** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-brom-bar-e<sup>2</sup>, -brom-e<sup>2</sup>. The dewberry. [A, 315.] See *RUBUS cæsius*.

**ACKERCHAMILLE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ch<sup>2</sup>a<sup>3</sup>m-i<sup>2</sup>-le<sup>2</sup>. The field-chamomile. [A, 315.] See *ANTHEMIS arvensis*.

**ACKERDISTEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-di<sup>2</sup>st-e<sup>2</sup>l. The common thistle (*Serratula arvensis*). [A, 315.]

**ACKERDOPPEN** (Ger.), n. pl. A<sup>3</sup>k'e<sup>2</sup>r-do<sup>3</sup>p-pe<sup>2</sup>n. The acorns of the oriental gall-oak (*Quercus exilipos*). [A, 315.]

**ACKEREHRENPRES** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-a-re<sup>2</sup>n-pris. The field-speedwell (*Veronica agrestis*). [A, 248, 315.]

**ACKERELCH** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ich<sup>2</sup>-e<sup>2</sup>l. The American ground-nut. [A, 305.] See *ARACHIS hypogæa*.

**ACKERERBSE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-e<sup>2</sup>rb-ze<sup>2</sup>. The wild pea (*Pisum arvense*). [A, 315.]

**ACKERERDE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-er<sup>2</sup>d-e<sup>2</sup>. See *HUMUS*.

**ACKERFADENKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-fa<sup>3</sup>-de<sup>2</sup>n-kra<sup>3</sup>-ut. The common cotton-rose, or cudweed (*Filago germanica*). [A, 248, 315.]

**ACKERFLEISCHBLUME** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-flish-blum-e<sup>2</sup>. The purple cow-wheat (*Melampyrum arvense*). [A, 315.]

**ACKERFRAUENMANTEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-fra<sup>3</sup>-u-e<sup>2</sup>n-ma<sup>3</sup>n-te<sup>2</sup>l. The common lady's-mantle (*Alchemilla vulgaris*). [A, 315.]

**ACKERFUCHSSCHWANZ** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-fuch<sup>2</sup>s-shwa<sup>3</sup>nts. Field fox-tail grass (*Alopecurus agrestis*). [A, 315.]

**ACKERÄNSEDISTEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ge<sup>2</sup>n-ze<sup>2</sup>-di<sup>2</sup>s-te<sup>2</sup>l. The corn sow-thistle (*Sonchus arvensis*). [A, 315.]

**ACKERGAUCHHEIL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ga<sup>3</sup>-uch<sup>2</sup>-hil. The common pimpernel (*Anagallis arvensis*). [A, 248, 315.]

**ACKERGRAS** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-gra<sup>3</sup>s. Mouse-ear chickweed (*Cerastium arvense*). [A, 248, 315.]

**ACKERGRINDKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-gri<sup>2</sup>nd-kra<sup>3</sup>-ut. The field scabious (*Scabiosa arvensis*). [A, 248, 315.]

**ACKERGÜNSEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-gu<sup>3</sup>n-se<sup>2</sup>l. The ground pine (*Ajuga chamæpitys*). [A, 248, 315.]

**ACKERGYPSEKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-gu<sup>3</sup>ps-kra<sup>3</sup>-ut. A German species of soapwort (*Saponaria vaccaria*). [A, 248, 315.]

**ACKERHAHNENFUSS** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ha<sup>3</sup>n-e<sup>2</sup>n-fus. The corn crow-foot (*Ranunculus arvensis*). [A, 315.]

**ACKERHAUHECHEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ha<sup>3</sup>-u-he<sup>2</sup>ch<sup>2</sup>-e<sup>2</sup>l. The common rest-harrow (*Ononis spinosa*). [A, 248, 315.]

**ACKERHEDERICH** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-he<sup>2</sup>d-e<sup>2</sup>r-i<sup>2</sup>ch<sup>2</sup>. The hedge-mustard (*Sisymbrium officinale*). [A, 248, 305.]

**ACKERHIRTENTASCHE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-her-te<sup>2</sup>n-ta<sup>3</sup>sh-e<sup>2</sup>. The penny-cress (*Thlaspi arvense*). [A, 248, 315.]

**ACKERHOLDER, ACKERHOLLUNDER** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ho<sup>3</sup>ld-e<sup>2</sup>r, -ho<sup>3</sup>ld-e<sup>2</sup>r. The dwarf-elder (*Sambucus ebulus*). [A, 315.]

**ACKERHORNKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ho<sup>3</sup>rn-kra<sup>3</sup>-ut. Mouse-ear chickweed (*Cerastium arvense*). [A, 248, 315.]

**ACKERHYACINTHE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-hu<sup>3</sup>-a<sup>3</sup>-tsi<sup>2</sup>nt-e<sup>2</sup>. The purple grape-hyacinth (*Muscari comosum*). [A, 248.]

**ACKERKAMILLE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ka<sup>3</sup>m-i<sup>2</sup>-le<sup>2</sup>. The field-chamomile (*Anthemis arvensis*). [B.]

**ACKERKANDELWISCH, ACKERKANNENKRAUT** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ka<sup>3</sup>n-de<sup>2</sup>l-vi<sup>2</sup>sh, -ka<sup>3</sup>n-ne<sup>2</sup>n-kra<sup>3</sup>-ut. The corn horse-tail (*Equisetum arvense*). [A, 248, 315.]

**ACKERKLAPPER** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-klap<sup>3</sup>p-pe<sup>2</sup>r. The common cock's-comb (*Celosia cristata*). [A, 248, 315.]

**ACKERKLEE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-klä. 1. Sheep's sorrel (*Rumex acetosella*). [B.] 2. Hare's-foot trefoil (*Trifolium arvense*). [A, 315.]

**ACKERKLETTE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-klät-te<sup>2</sup>. The burdock (*Lappa officinalis*). [A, 247, 315.]

**ACKERKLETTENKERBEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-klät-te<sup>2</sup>-n-ke<sup>2</sup>rb-e<sup>2</sup>l. Small corn-parsley (*Caucalis arvensis*). [A, 315.]

**ACKERKNOBLAUCH** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-kno<sup>2</sup>b-la<sup>3</sup>-uch<sup>2</sup>. Wild (or crow-) garlic (*Allium vineale*). [A, 315.]

**ACKERKNÖTERICH** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-knu<sup>4</sup>t-e<sup>2</sup>r-i<sup>2</sup>ch<sup>2</sup>. Corn-spurrey, yarr (*Spergula arvensis*). [A, 315.]

**ACKERKOHLE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-kol. 1. The wild radish (*Raphanus raphanistrum*). 2. The common nipplewort (*Lapsana communis*). 3. The wild mustard (*Sinapis arvensis*). [A, 315.]

**ACKERKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-kra<sup>3</sup>-ut. 1. Common fumitory (*Fumaria officinalis*). [A, 305.] 2. Common rest-harrow (*Ononis spinosa*). [A, 305.] 3. Brook-lime (*Veronica Beccabunga*). [A, 315.]

**ACKERKRONE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-kron-e<sup>2</sup>. The genus *Agrostemma*. [B.]

**ACKERKUHWELZEN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ku-vits-e<sup>2</sup>n. The purple cow-wheat (*Melampyrum arvense*). [A, 305, 315.]

**ACKERKÜMMEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ku<sup>3</sup>m-me<sup>2</sup>l. The genus *Agrostemma*.—**Schwarzer A.** The corn-cockle (*Agrostemma githago*). [A, 248, 305.]

**ACKERLATTICH, ACKERLATTIG** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-la<sup>3</sup>t-ti<sup>2</sup>ch<sup>2</sup>, -ti<sup>2</sup>g. 1. The common corn-salad or lamb's lettuce (*Valerianella olitoria* [Wildenow], *Valeriana locusta* [Linnaeus]). [A, 248, 315.] 2. The common colt's-foot (*Tussilago Farfara*). [A, 315.] 3. Prickly lettuce (*Lactuca scariola*). [A, 315.]

**ACKERLEINKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-lin-kra<sup>3</sup>-ut. Yellow toad-flax (*Linaria vulgaris*). [A, 248, 305.]

**ACKERLEY** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-li. Common columbine (*Aquilegia vulgaris*). [A, 248, 305.]

**ACKERLICHTRÖSCHEN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-li<sup>2</sup>ch<sup>2</sup>-t<sup>2</sup>-ru<sup>3</sup>s-ch<sup>2</sup>-e<sup>2</sup>n. The white-flowered lychnis (*Lychnis vespertina*). [A, 248, 315.]

**ACKERMAGENWURZEL, ACKERMANN** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ma<sup>3</sup>g-e<sup>2</sup>n-vurts-e<sup>2</sup>l, -ma<sup>3</sup>n. The sweet flag (*Acorus calamus*). [A, 248, 315.]

**ACKERMANNKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ma<sup>3</sup>n-kra<sup>3</sup>-ut. The common bugloss (*Anchusa officinalis*). [A, 248, 315.]

**ACKERMAUSEOHR** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ma<sup>3</sup>-uz-e<sup>2</sup>-or. Marsh scorpion-grass, mouse-ear (*Myosotis scorpioides*). [A, 248, 315.]

**ACKERMELISSE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-me<sup>2</sup>l-i<sup>2</sup>s-se<sup>2</sup>. Common balm (*Melissa officinalis*). [A, 248, 315.]

**ACKERMENNIG** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-me<sup>2</sup>n-ni<sup>2</sup>g. Common agrimony (*Agrimonia eupatorium*). [A, 248, 315.]

**ACKERMINZE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-mi<sup>2</sup>nts-e<sup>2</sup>. 1. Corn-mint (*Mentha arvensis*). 2. Common balm (*Melissa officinalis*). [A, 248, 305.]

**ACKERMOHN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-mon. Corn-poppy, the common red poppy (*Papaver rhæas*). [A, 315.]

**ACKERMÜNZE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-mu<sup>3</sup>nts-e<sup>2</sup>. Corn-mint, mountain calamint (*Mentha arvensis*). [A, 315.]

**ACKERNÄGELEIN, ACKERNELKENGRAS** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ne<sup>3</sup>g-e<sup>2</sup>l-in, -ne<sup>3</sup>l-ke<sup>2</sup>n-gra<sup>3</sup>s. Umbelliferous mouse-ear, jagged chickweed (*Holosteum umbellatum*). [A, 315.]

**ACKERNESSEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ne<sup>3</sup>s-se<sup>2</sup>l. 1. The red hemp-nettle (*Galeopsis ladanum*). 2. The white or the purple archangel (*Lamium purpureum*, *L. album*). [A, 248, 315.]

**ACKERNELLE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ne<sup>3</sup>-ge<sup>2</sup>l-le<sup>2</sup>. The field fennel-flower (*Nigella arvensis*). [A, 248, 315.]

**ACKERNUSS** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-nus. A Dutch variety of ground-nut, the tuberous *Lathyrus (Lathyrus tuberosus)*. [A, 248, 315; B.]

**ACKEROHMKRAUT** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-om-kra<sup>3</sup>-ut. Common lady's mantle (*Alchemilla vulgaris*). [A, 248, 315.]

**ACKERPFERDESCHWANZ** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-pfe<sup>2</sup>rd-e<sup>2</sup>-shwa<sup>3</sup>nts. The corn horse-tail (*Equisetum arvense*). [A, 248, 315.]

**ACKERPFIEMEN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-pfre-me<sup>2</sup>n. Dyer's-weed (*Reseda luteola*). [A, 248, 315.]

**ACKERPLATTERBSE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-plät-e<sup>2</sup>-rb-ze<sup>2</sup>. The yellow vetchling (*Lathyrus aphaca*). [A, 315.]

**ACKERRADE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ra<sup>3</sup>d-e<sup>2</sup>. The corn-cockle (*Agrostemma githago*). [A, 248, 315.]

**ACKERRANUNKEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ra<sup>3</sup>n-un<sup>2</sup>-ke<sup>2</sup>l. The corn crow-foot (*Ranunculus arvensis*). [A, 248, 305.]

**ACKERRAUCH, ACKERRAUTE** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ra<sup>3</sup>-uch<sup>2</sup>, -ra<sup>3</sup>-u-te<sup>2</sup>. Common fumitory (*Fumaria officinalis*). [A, 248, 315.]

**ACKERRETTICH, ACKERRETTIG** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-re<sup>2</sup>t-ti<sup>2</sup>ch<sup>2</sup>, -ti<sup>2</sup>g. The wild radish (*Raphanus raphanistrum*). [A, 315.]

**ACKERRIEDGRAS** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-red-gra<sup>3</sup>s. The turfey hair-grass (*Aira cæspitosa*). [A, 248, 305.]

**ACKERRINGELBLUME** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ri<sup>2</sup>ng-e<sup>2</sup>l-blum-e<sup>2</sup>. The common marigold (*Calendula officinalis*). [A, 305, 315.]

**ACKERRITTERSPORN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ri<sup>2</sup>t-te<sup>2</sup>-sporn. The common larkspur (*Delphinium consolida*). [A, 305.]

**ACKERRODEL** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ro-de<sup>2</sup>l. The cock's-comb yellow-rattle (*Rhinanthus crista galli*). [A, 315.]

**ACKERRÖSCHEN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ru<sup>3</sup>s-ch<sup>2</sup>e<sup>2</sup>n. Pheasant's-eye (*Adonis autumnalis*). [A, 315.]

**ACKERROSE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ro-ze<sup>2</sup>. The field rose, white-dog (*Rosa arvensis*). [A, 248, 315.]

**ACKERRÖSLEIN** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ru<sup>3</sup>s-lin. See *ACKERRÖSCHEN*.

**ACKERROSSPOLEIN, ACKERROSTPOLLEI** (Ger.), n's. A<sup>3</sup>k'e<sup>2</sup>r-ro<sup>3</sup>s-po-lin, -ro<sup>3</sup>st-po-lin. 1. The annual hedge-nettle (*Stachys annua*). 2. The corn hedge-nettle (*Stachys arvensis*). [A, 248, 305, 315.]

**ACKERROSSCHWANZ** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ro<sup>3</sup>s-shwa<sup>3</sup>nts. The corn horse-tail (*Equisetum arvense*). [A, 315.]

**ACKERRÖTHE** (Ger.), n. A<sup>3</sup>k'e<sup>2</sup>r-ru<sup>3</sup>-t<sup>2</sup>e<sup>2</sup>. The little field-madder (*Sherardia arvensis*). [A, 248, 315.]

**ACKERSALAT** (Ger.), n.  $A^3k'e^2r\text{-}za^3l\text{-}a^3t'$ . Prickly lettuce (*Lactuca scariola*). [A, 248, 305.]

**ACKERSAUDISTEL** (Ger.), n.  $A^3k'e^2r\text{-}za^3\text{-}u\text{-}di^2st\text{-}e^2l$ . The corn sow-thistle (*Sonchus arvensis*). [A, 315.]

**ACKERSAUERAMPFER** (Ger.), n.  $A^3k'e^2r\text{-}za^3\text{-}u\text{-}e^2r\text{-}a^3mpf\text{-}e^2r$ . Sheep's-sorrel (*Rumex acetosella*). [A, 248, 305.]

**ACKERSCABIOSE** (Ger.), n.  $A^3k'e^2r\text{-}ska^3b\text{-}i^2\text{-}o\text{-}ze^2$ . The field scabious (*Scabiosa arvensis*). [A, 248, 305.]

**ACKERSCHACHTELHALM**, **ACKERSCHACHTELHELM**, **ACKERSCHACHTHALM** (Ger.), n's.  $A^3k'e^2r\text{-}sha^3ch^2t\text{-}e^2l\text{-}ha^3lm$ ,  $\text{-}sha^3ch^2t\text{-}e^2l\text{-}he^2lm$ ,  $\text{-}sha^3ch^2t\text{-}ha^3lm$ . The corn horsetail (*Equisetum arvense*). [A, 248, 315.]

**ACKERSCHMELE** (Ger.), n.  $A^3k'e^2r\text{-}shma\text{-}le^2$ . The turfey hair-grass (*Aira caespitosa*). [A, 248, 305.]

**ACKERSCHMIELE** (Ger.), n.  $A^3k'e^2r\text{-}shmel\text{-}e^2$ . Silky bentgrass (*Agrostis spica venti*). [A, 248, 315.]

**ACKERSCHNABELKRAUT** (Ger.), n.  $A^3k'e^2r\text{-}shna^3b\text{-}e^2l\text{-}kra^3ut$ . The hemlock-leaved heron's-bill (*Erodium cicutarium*). [A, 248, 305.]

**ACKERSCHNALLE** (Ger.), n.  $A^3k'e^2r\text{-}shna^3l\text{-}le^2$ . The red poppy (*Papaver rhoeas*).

**ACKERSCHWARZKÜMMEL** (Ger.), n.  $A^3k'e^2r\text{-}shwa^3rts\text{-}ku^3m\text{-}me^2l$ . The field fennel-flower (*Nigella arvensis*). [A, 248, 305.]

**ACKERSCHWERDIEGWURZ** (Ger.), n.  $A^3k'e^2r\text{-}shward\text{-}zeg\text{-}vurts$ . Common corn-flag (*Glaadiolus communis*). [A, 248, 305.]

**ACKERSENF** (Ger.), n.  $A^3k'e^2r\text{-}ze^2nf$ . Wild mustard (*Sinapis arvensis*). [A, 305, 315.]

**ACKERSINAU** (Ger.), n.  $A^3k'e^2r\text{-}zi^2n\text{-}a^3\text{-}u$ . Parsley-piert (*Alchemilla aphanes*). [A, 248, 315.]

**ACKERISON** (Ger.), n.  $A^3k'e^2r\text{-}ze\text{-}zon''$ . The corn honewort (*Sison segetum*). [A, 248, 315.]

**ACKERSKABIOSE** (Ger.), n. See ACKERSCABIOSE.

**ACKERSPARGEL**, **ACKERSPÖRTEL** (Ger.), n's.  $A^3k'e^2r\text{-}spa^3rg\text{-}e^2l$ ,  $\text{-}spe^3rg\text{-}e^2l$ . See ACKERKÖRTERICH.

**ACKERSPYRE**, n.  $A^2k'u^6r\text{-}spir$ . See ACROSPYRE.

**ACKERSTEINAMEN** (Ger.), n.  $A^3k'e^2r\text{-}stin\text{-}za^3m\text{-}e^2n$ . The corn gromwell (*Lithospermum arvense*). [A, 248, 305.]

**ACKERSTERNKRAUT** (Ger.), n.  $A^3k'e^2r\text{-}ste^2rn\text{-}kra^3ut$ . See ACKERMELISSE.

**ACKERSTORCHSCHNABELKRAUT** (Ger.), n.  $A^3k'e^2r\text{-}sto^3rch^2\text{-}shna^3b\text{-}e^2l\text{-}kra^3ut$ . See ACKERSCHNABELKRAUT.

**ACKERSTRAUSSGRAS** (Ger.), n.  $A^3k'e^2r\text{-}stra^3s\text{-}us\text{-}gra^3s$ . See ACKERSCHMELE.

**ACKERTÄSCHELKRAUT** (Ger.), n.  $A^3k'e^2r\text{-}te^2sh\text{-}e^2l\text{-}kra^3ut$ . See ACKERHIRTENTASCHE.

**ACKERTHYMIAN** (Ger.), n.  $A^3k'e^2r\text{-}tu^6m\text{-}i^2\text{-}a^3n$ . See ACKERMELISSE.

**ACKERTRESPE** (Ger.), n.  $A^3k'e^2r\text{-}tre^2sp\text{-}e^2$ . The smooth-rye broom-grass (*Bromus secalinus*) [A, 305]; the field broom-grass (*Bromus arvensis*) [A, 315].

**ACKERVIOLE** (Ger.), n.  $A^3k'e^2r\text{-}fe\text{-}o\text{-}le^2$ . 1. Venus's looking-glass (*Campanula speculum*). 2. The corn violet (*Viola arvensis*). [A, 248, 305, 315.]

**ACKERVOGELMILCH** (Ger.), n.  $A^3k'e^2r\text{-}fo\text{-}ge^2l\text{-}mi^2lch^2$ . A species of *Ornithogalum* (star of Bethlehem). [A, 248, 305.]

**ACKERWEIDRICH** (Ger.), n.  $A^3k'e^2r\text{-}vid\text{-}rich^2$ . Common Lythrum (*Lythrum salicaria*). [A, 305.]

**ACKERWICKE** (Ger.), n.  $A^3k'e^2r\text{-}vi^2k\text{-}e^2$ . The common vetch (*Vicia sativa*). [A, 248, 305.]

**ACKERWINDE** (Ger.), n.  $A^3k'e^2r\text{-}vi^2nd\text{-}e^2$ . The small bindweed (*Convolvulus arvensis*). [A, 248, 305.]

**ACKERWINDHALM** (Ger.), n.  $A^3k'e^2r\text{-}vi^2nd\text{-}ha^3lm$ . See ACKERSCHMELE.

**ACKERWUIZ** (Ger.), n.  $A^3k'e^2r\text{-}vurts$ . 1. Yellow-water (*Iris pseudacorus*). 2. The genus *Tormentilla*. 3. The sweet-flag (*Acorus calamus*). [A, 248, 305, 315.]

**ACKERZWIEBEL** (Ger.), n.  $A^3k'e^2r\text{-}tsweb\text{-}e^2l$ . See ACKERVOGELMILCH.

**ACKLYS** (Lat.), n. f. See ACHLYS.

**ACKONK**, n. A native name for an East Indian plant, of unknown botany, the juice of which is a hydragogue cathartic. [Waring (A, 316).]

**ACKRASBEERE** (Ger.), n.  $A^3k'ra^3s\text{-}ba\text{-}re^2$ . The rough gooseberry (*Ribes grossularia*). [A, 248.]

**ACLASTIC**, adj.  $A^2k\text{-}la^2s\text{'ti}^2k$ . From  $\alpha$  priv., and  $\kappa\lambda\alpha\nu$ , to break. Fr. *aclaste*. Sp. *aclasto*. Transmitting rays of light without refracting them. [Leibnitz (A, 337).]

**ACLEIDIAN**, adj.  $A^2k\text{-}li^2d\text{'a}^2n$ . From  $\alpha$  priv., and  $\kappa\lambda\epsilon\iota\varsigma$ , the collar-bone. Fr. *acleïdien*. Sp., *acleido*. In zoology, destitute of clavicles. [A, 306.]

**ACLEITROCARDIE** (Fr.), n.  $A^3\text{-}klat\text{-}ro\text{-}ka^3r\text{-}de$ . From  $\alpha$  priv.,  $\kappa\lambda\epsilon\iota\theta\rho\alpha$ , a partition, and  $\kappa\alpha\rho\delta\iota\alpha$ , the heart. Piorry's term for patency of the foramen ovale. [A, 250.]

**ACLIDIEN** (Fr.), adj.  $A^3\text{-}kle\text{-}de\text{-}a^3n^2$ . Acleidian.

**ACLOWA**, n. A leguminous plant of Guinea, used by the natives to cure the itch, the fresh plant being rubbed on the affected parts. [Waring (A, 316).]

**ACLYTHOPHYTE**, **ACLYTROPHYTE** (Fr.), n.  $A^3\text{-}kle\text{-}t\text{'o}^2t$ . From  $\alpha$  priv.,  $\kappa\lambda\epsilon\iota\theta\rho\alpha$ , a bolt or bar, and  $\phi\upsilon\tau\acute{o}\nu$ , a plant.

Sp., *aclytrófito*. A plant of which the seeds have no apparent envelope. [A, 306.]

**ACME** (Lat.), n. f. pl.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)$ . Gr.,  $\acute{\alpha}\mu\alpha\iota$ , the prime of life. Acne.

**ACMEAMORPHA** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)\text{-}a^2(a^3)\text{-}mo^2r\text{'fa}^3$ . For deriv., see ACMEOS and AMORPHA. An old term for interigo in adults (amorphia adulatorum). [A, 322.]

**ACMECHLOROSIS** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)\text{-}o\text{-}klo\text{'ro}^2si^2s$ . See ACMEOS and CHLOROSIS adulatorum.

**ACMEOPIMELORRHEA** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)\text{-}o\text{-}pi^2m\text{-}e^2l\text{-}o\text{'re}(\text{ro}^2e^2)\text{-}a^3$ . For deriv., see ACMEOS and PIMELORRHEA. Ger., *Fettauslaufen bei Erwachsenen*. An old term for seborrhoea oleosa in adults (pimelorrhoea adulatorum). [A, 322.]

**ACMEOPOLYSARCIA** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)\text{-}o\text{-}po^2l\text{'i}^2(u^6)\text{-}sa^3r\text{'si}^2(ki^2)\text{-}a^3$ . For deriv., see ACMEOS and POLYSARCIA. Ger., *übermässige Befleischung bei Erwachsenen*. An old term for obesity in adults (polysarcia adulatorum). [A, 322.]

**ACMEOS** (Lat.), adj.  $A^2k(a^3k)\text{'me}(\text{ma}^3e^2)\text{-}o^3s$ . Gr.,  $\acute{\alpha}\mu\alpha\iota\omicron\varsigma$ , vigorous, in full bloom, mature. Ger., *reif, vollwüchsig, ausgewachsen*. Syn.: *vigens, florentis ætatis*. Full-grown, adult. [A, 322.]

**ACMASTICUS** (Lat.), adj.  $A^2k(a^3k)\text{'ma}^3s(\text{ma}^3s)\text{'ti}^2\text{-}ku^3s(\text{ku}^4s)$ . Gr.,  $\acute{\alpha}\kappa\mu\alpha\sigma\tau\acute{\iota}\kappa\omicron\varsigma$  (from  $\acute{\alpha}\kappa\mu\alpha\varsigma$ , to be in full bloom). Fr., *acmastique*. Ger., *acmasticus*. It., *acmastico*. Sp., *acnástico*. Continuous, following a steady course without an acme (said of fevers). [A, 306.] Cf. EPACMASTICUS and PARACMASTICUS.

**ACME** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma})$ . Gr.,  $\acute{\alpha}\mu\alpha\eta$ . Fr., *acmé*. Ger., *Spitze, Höhepunkt, Gipfel*. It., *acma*. Sp., *acme, cima*. Syn.: *crisis, fastigium*. 1. The culminating point of a fever. [D, 18.] 2. An acne pimple; according to some authors, a wart. [A, 322.]

**ACMELLA** (Lat.), n. f.  $A^2k(a^3k)\text{'me}(\text{ma})\text{'li}^2\text{-}a^3$ . See ACMELLA.

**ACMELLA** (Lat.), n. f.  $A^2k(a^3k)\text{'me}^2l\text{'la}^3$ . From  $\acute{\alpha}\kappa\omega\eta$ , a point (from the pricking taste of the leaves). [A, 248.] Fr., *acmelle*. Ger., *Acnelle*. Sp., *acmelia, acmella*. A genus of dicotyledonous plants established by Richard, now considered as a section of the genus *Spilanthes*. [A, 321.] In general the medicinal properties are like those of *Pyrethrum*. [A, 306.]—**A. Linnæi**. An acrid, sialagogue plant of India and S. America, used for scurvy. [A, 316.]—**A. mauritiana** [Richard]. Fr., *abécédairé*. Ger., *Abcdaria, A-b-c-Kraut*. Syn.: *Spilanthes a.* [Linnæus] (see *Linnæi* [Cassini]). The Indian cockweed, abecedaria (or a-b-c-daria); an annual herb employed in India for calculous nephritis; bitter, warm, and highly stimulating in taste. [A, 320.]—**A. repens** [Persoon]. Syn.: *Spilanthes Nuttallii* [Torrey and Gray]. A species found in wet places in the United States from S. Carolina to Florida, having the same medicinal properties as *A. Linnæi*. [B, 34, 46.]

ACMELLA MAURITIANA.  
[A, 248.]

**ACMO**, n. An old term for red coral, formerly used in medicine. [A, 337.]

**ACMON** (Lat.), n. m.  $A^2k(a^3k)\text{'mo}^3n$ . Gen., *ac'monis*. Gr.,  $\acute{\alpha}\kappa\mu\omega\nu$ , an anvil. See INCUS.

**ACNA** (Lat.), n. f.  $A^2k(a^3k)\text{'na}^3$ . See ACNE.

**ACNE** (Lat.), n. f.  $A^2k(a^3k)\text{'ne}(\text{na})$ . Gr.,  $\acute{\alpha}\kappa\eta$ , probably a corruption of  $\acute{\alpha}\kappa\mu\eta$ , the acme, bloom, or prime of life; adolescence (the time of life when a is most likely to occur); or from  $\acute{\alpha}\kappa\eta$ , a point (because of the acuminate form of the pustules); or from  $\alpha$  priv., and  $\kappa\eta\nu$ , to scratch (indicating the absence of pruritus):  $\iota\omicron\nu\theta\omicron\varsigma$ . Fr., *acné*. Ger., *Acne, Finnen*. Syn.: *varus, ianthus; stonepock, whelek*. 1. An inflammation of the sebaceous follicles, or of the tissue around them, characterized by disseminated conical or rounded pustules, papules, or tubercles, occurring most frequently on the face, back, or breast, and usually associated with the formation of comedones (see COMEDO). 2. A generic term used by Schönlein [G, 10] for a group of skin diseases, including strôphulus, eczema, and acne. According to S., all the members of this group are characterized by the presence of "a separate pericarpium" (areola), in which an imperfectly developed fruit (*Frucht*), or efflorescence, is formed, such as a partially formed papule, vesicle, or pustule. Cf. MONOCARPÆ. [G.]—**A. albida**. See MILIUM.—**A. artificialis**. A. produced artificially, usually by the external or internal use of medicaments, such as tar, bromine, and iodine. [G.]—**A. artificialis e bromio**. **A. artificialis e pice**. **A. artificialis ex iodo**. See *Bromine a.*, *Tar a.*, and *Iodine a.*—**A. atrophica**. Fr., *acné atrophique*. 1. A. followed by atrophic scars. 2. As employed by Cazenave and Bazin, a form of lupus erythematosus occurring usually on the nose or cheeks, and especially marked by the formation of little crusts from which prolongations descend into dilated and atrophic sebaceous follicles. [G, 20, 26.]—**A. bromata**. See *Bromine a.*—**A. cachecticorum**. An eruption occurring in broken-down, cachectic, or scrofulous persons, usually on the trunk or the lower limbs, characterized by flat, dusky-red papules and pustules varying in size from that of a pin-head to that of a lentil. [G, 3.]—**A. ciliaris**. Fr., *acné ciliaire*. Ger., *A. der Augenlidränder*. It., *a. ciliare*. Sp., *a. ciliar*. Inflammation of the sebaceous glands of the hair follicles situated close to the edge of the eyelid, causing the appearance of one or more small nodules along the ciliary margin of the lid. [F.]—**A. coagminata**. A. with the efflorescences occurring in clusters. The name has been especially applied to a form of a. due to the internal use of bromine; groups of a. pustules closely aggregated together form red, thickened patches often covered with scabs consist-

ing of dried pus mixed with sebaceous matter, beneath which the surface is dusky-red, often moist, and studded with pustular elevations. [G. 27.]—**A. contagiosa**. Ger., *englische Pocken*. An inoculable pustular disease, probably not really an a., said to be often met with in Germany in horses brought from England, and to differ from horse-pox. [W. Dieckerhoff and P. Grawitz. "Arch. f. path. Anat. u. Physiol. u. f. klin. Med." cii, 1, 1885, p. 148.]—**A. cornea**. Fr., *acné cornée* (ou *sébacée cornée* [Hardy]). Syn.: *ichtyositis follicularis*. A form characterized by hard conical, grouped or solitary, grayish or blackish, warty outgrowths, consisting of plugs of hardened sebum projecting from the follicles. [Cazenave (A, 328).]—**A. disseminata**. Fr., *dartre pustuleuse*. Sp., *a. diseminata*. A., *a. vulgaris* (in contradistinction to *a. rosacea* and *a. mentagra*). [G. 3.]—**A. ex usu picis**. See *Tar a.*—**A. frontalis**. See *A. varioliformis* (1st def.).—**A. granulosa**. See *A. cachecticorum*.—**A. hordeolans**, **A. hordeolaris**. Pustular a. with the pustules arranged in linear groups, like grains of barley. [G.]—**A. hypertrophica**. Fr., *acné hypertrophique*. See *ROSACEA hypertrophica*.—**A. indurata**. Fr., *acné indurée*. A. characterized by large rounded papules or tubercles, and attended usually with the formation of small, deep-seated cutaneous abscesses. [G.]—**A. iodata**, **A. jodata**. See *Iodine a.*—**A. medicamentosa**. A. due to the internal use of certain drugs; *a. tozica*, *a. artificialis*. [G.]—**A. mentagra**. An obsolete synonym of scycosis. [G.]—**A. miliaris**. 1. Milium (*q. v.*). 2. A pustular form of rosacea. [G. 50.]—**A. molluscoidea**, **A. molluscum**, **A. molluscum contagiosum** [G. 20]. See *MOLLUSCUM contagiosum*.—**A. picealis**. See *Tar a.*—**A. punctata**. Fr., *acné ponctuée*, tannes. Ger., *Comedonen*, *Mitesser*. It., *comedoni*, *tanni*. Syn.: *comedones*, *puncta mucosa*; *grubs*, *black heads*, *maggot pimples*. A disease of the skin characterized chiefly by the production of comedones, sometimes attended with slight papulation, but without marked evidences of inflammation. [G. 12.] Cf. *COMEDO*.—**A. punctata albidula**. See *MILIMUM*.—**A. pustulosa**. A. attended with the formation of pustules. [G.]—**A. rosacea**. Fr., *acné rosacée*, *couperose*. Ger., *Kupferfinne*. It., *a. rosacea*. Syn.: *a. rosacea pustulosa*, *a. miliaris*, *gutta rosea* [Sauvages]. 1. *ROSACEA* (*q. v.*). [G. 12.] 2. *ROSACEA* attended with the development of pustules or acne efflorescences; *rosacea pustulosa*. [G.]—**A. rosacea congestiva**. See *ROSACEA erythematosa*.—**A. rosacea hypertrophica**. See *ROSACEA hypertrophica*.—**A. rosacea pustulosa**. See *ROSACEA pustulosa*.—**A. scrophulosorum**. See *A. cachecticorum*.—**A. sebacea**. Fr., *acné sébacée*. See *SEBORRHEA*.—**A. sebacea cerea** [G. 37]. See *SEBORRHEA sicca*.—**A. sebacea cornea**. See *A. cornea*.—**A. sebacea excisata**. The xeroderma of E. Wilson and others. [G. 37.]—**A. sebacea molluscum** [G. 20]. See *ATHEROMA*.—**A. simplex**. Fr., *acné simple*, *dartre pustuleuse miliaire*. A. characterized by inflammatory lesions of a simple character. [G. 12.]—**A. solaris**. A form of a. described as occurring on the back of the nose, the lower eyelids, and the cheeks, due to exposure to the sun, and characterized by red papules that rarely suppurate. [G.]—**A. strophulosa**. See *MILIMUM*.—**A. syphilitica**. See *ACNEFORM SYPHILODERM*.—**A. tuberculata**, **A. tuberculoidea**. See *A. indurata*.—**A. umbilicata**. See *A. varioliformis* (3d def.).—**A. varioliformis**. Fr., *acné varioliforme*. Syn.: *a. frontalis* (1st def.). 1. A peculiar form of a., occurring usually in the form of groups upon the forehead, near the line of the hair, or upon the nape of the neck, consisting of small pustules which dry up and form flat scabs that are followed by small, depressed cicatrices. [G. 3.] 2. *MOLLUSCUM contagiosum* (*q. v.*). [G. 26.]—**A. varus**. An old synonym of a. [G.]—**A. vulgaris**. Fr., *varus disséminé* [Alibert]. Ger., *gewöhnliche Finne*, *Schönheitsblättchen*. A. term used by E. Wilson to include the a. simplex, a. punctata, and a. indurata of Willan. [G. 62.]—**A. vulgaris indurata**. See *A. indurata*.—**A. vulgaris simplex**. See *A. simplex*.—**A. vulgaris tuberculata**. See *A. indurata*.—**Bromine a.** Lat., *a. bromata*. Ger., *Bromacne*. A. due to the internal use of bromine or its compounds [G.]. Cf. *A. coagminata*.—**Iodine a.** Lat., *a. iodata*. Ger., *Jodacne*. A toxic form of a. due to the internal use of iodine or its compounds. [G.]—**Joda** (Ger.). See *Iodine a.*—**Psudracia a.** Sauvages's term for pustular a. [A. 322.]—**Syphilitic a.** See *ACNEFORM SYPHILODERM*.—**Tar a.** Lat., *a. picealis*. Ger., *Theeracne*. A form of a. produced by the long-continued application of tar or certain of its products to the skin, and characterized by red inflammatory papules, in the centres of which appear little black points (comedones) due to the presence of tar in the orifices of the sebaceous follicles. [G.]

**ACNÉ** (Fr.), n. A<sup>3</sup>k-na. Acne.—**A. arthritique**. A form of acne supposed to be connected with the arthritic diathesis; most common in adults, and especially in women at the menopause. [Bazin (A, 328).]—**A. atrophica**. See *ACNE atrophica*.—**A. boutonneuse**. A. Acne. [G. 26.] Cf. *A. sécrétante*.—**A. concrète**. *Seborrhœa sicca*.—**A. congestiva** [G. 20]. See *GUTTA rosacea*.—**A. cornée**. See *ACNE cornea*.—**A. éphélastique** [G. 26]. See *RHINOPHYMA*.—**A. éruptive**. See *A. boutonneuse*.—**A. érythémateuse**. See *GUTTA rosacea*.—**A. fluente**. See *SEBORRHEA oleosa*.—**A. hypertrophique**. See *ROSACEA hypertrophica*.—**A. indurée**. See *ACNE indurata*.—**A. miliaire**. Alibert's term for milium. [Bazin (A, 328).]—**A. miliaire arthritique**. A term corresponding nearly to acne cachecticorum (*q. v.*). [G. 26.]—**A. miliaire scrofuléuse**. A scrofulous form of acne, occurring usually upon the forehead, characterized by small pustules, either discrete or confluent, often arranged in geometrical figures, which, after their rupture, are succeeded by red, slightly elevated patches covered with thin, white scales. [G. 26.] Cf. *ACNE varioliformis* (1st def.).—**A. molluscoïde**. See *MOLLUSCUM contagiosum*.—**A. pénicilliforme**. *Seborrhœa* in which the sebaceous concretions on the skin have a penicillate appearance, sometimes compared to that of asbestos. [G. 26.] Cf. *TINEA asbestina* and *SEBORRHEA amiantacea*.—**A. pileuse**. Acne with each lesion pierced by a hair.—**A. pileuse miliaire**. A variety of a. *pileuse* in which the pustule is traversed by a hair not fully developed. [Bazin (A, 328).]—**A. pileuse ombilicquée**. A form in which the pustules are umbilicated and each is pierced by a hair. [Bazin (A, 328).]—**A. ponctuée**.

See *ACNE punctata*.—**A. pustuleuse disséminée**. Bazin's term for acne simplex. [A, 328].—**A. rosacée**. See *ACNE rosacea*.—**A. scrofuléuse**. See *ACNE cachecticorum*.—**A. sébacée**. *Seborrhœa*. [G. 20.]—**A. sébacée concrète**. See *SEBORRHEA sicca*.—**A. sébacée cornée** [G. 20]. See *ACNE cornea*.—**A. sébacée érofféuse**. *Seborrhœa sicca* with marked crusting. [G. 26.]—**A. sébacée fluente** [G. 20]. See *SEBORRHEA oleosa*.—**A. sébacée sèche**. *Seborrhœa sicca*. [G. 20.]—**A. sécrétante**. A generic term used by Bazin for anomalies of sebaceous secretion, including acne punctata and acne sebacea (*seborrhœa*), in contradistinction to a. boutonneuse (acne). [G. 26.]—**A. simple**. See *ACNE simplex*.—**A. squameuse**. One of Astruc's varieties, perhaps *seborrhœa sicca*. [Bielt (A, 331).]—**A. syphilitique**. See *ACNEFORM SYPHILODERM*.—**A. tuberculeuse ombilicquée**, **A. tuberculoïde**, **A. varioliforme**. See *MOLLUSCUM contagiosum*.—**A. variqueuse**. One of Astruc's varieties, characterized by dilated superficial capillaries. [Bielt (A, 331).]

**ACNEFORM**, adj. A<sup>2</sup>k'ne-fōr'm. Lat., *acneformis* (from *acne* and *forma*, form). Resembling acne. See *A. SYPHILODERM*.

**ACNEMIA** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-ne(na)/mi<sup>2</sup>-a<sup>3</sup>. From *a* priv., and *κνήμη*, the leg. Defective development of the calves of the legs. [A, 311, 316.]

**ACNEMOS** (Lat.), adj. A<sup>2</sup>k(a<sup>3</sup>k)-ne(na)/mo<sup>2</sup>s. Gr., *ἀκνημος*. Affected with acnesia (*q. v.*). [A, 311.]

**ACNESMOS** (Lat.), adj. A<sup>2</sup>k(a<sup>3</sup>k)-ne<sup>2</sup>s'(ne<sup>2</sup>s)/mo<sup>2</sup>s. Gr., *ἀκνησμος* (from *a* priv., and *κνησμός*, itching). Without itching or irritation. [Hippocrates (A, 311).]

**ACNESTIS** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-ne<sup>2</sup>s'ti<sup>2</sup>s. Gr., *ἀκνηστis* (either from *ἀκνός* = *ἀκνός*, the spine, also anything prickly [A, 311], or from *a* priv., and *κνήμη*, to scratch, because the locality can not be reached to be scratched). Ger., *Alkestis*, *Wideriss*. 1. An old term for the upper part of the spinal region, because quadrupeds can not reach it with the tongue; less strictly, any portion of the spinal region, especially that between the shoulder-blades and the loins, or the whole of it. [A, 311, 313, 315, 322, 325.] 2. A name given by Nicander to a plant that seems to have been the nettle. [A, 334.]

**ACNIDA** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-ni<sup>2</sup>-da<sup>3</sup>. From *a* priv., and *κνήμη*, a nettle. A genus of chenopodiaceous plants. [A, 258.]—**A. canabina**. The common Virginian hemp. [A, 258.]

**ACNISOS** (Lat.), adj. A<sup>2</sup>k(a<sup>3</sup>k)-ni<sup>2</sup>ne/so<sup>2</sup>s. Gr., *ἀκνισός* (from *a* priv., and *κνισα*, fat). Lean, spare. [Theophrastus (A, 311).]

**ACNISTE** (Fr.), n. A<sup>3</sup>k-nest. A genus of solanaceous shrubs of tropical America. [A, 348.]

**ACOATHED**, adj. A<sup>2</sup>k-oath'd. Affected with a disease of the liver (said of sheep in Dorsetshire, England). [A, 315.]

**ACOCANTHERA** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-o-ka<sup>2</sup>nth(e-a)/ra<sup>3</sup>. From *ἀκωνή*, a point, and *ἀνθηρός*, flowering. A genus of solanaceous plants. [A, 258.]—**A. venenata**. A bush growing at the Cape of Good Hope. A decoction of the bark is used by the Hottentots for poisoning their arrows. [A, 258.]

**ACOCYGEUS** (Lat.), adj. A<sup>2</sup>k(a<sup>3</sup>k)-o<sup>2</sup>k-si<sup>2</sup>(ku<sup>2</sup>)/je(ga)-u<sup>3</sup>s(u<sup>4</sup>s). From *a* priv., and *κόκυξ*, the coccyx. Lacking the coccyx. Cf. *ACAUDATE*.

**ACOE** (Lat.), n. f. A(a<sup>3</sup>)/ko-e(e<sup>2</sup>). Gr., *ἀκοή*. The sense of hearing. [F.] See *ADDITION*.

**ACELIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se'(ko-e<sup>2</sup>)-li<sup>2</sup>-a<sup>3</sup>. From *a* priv., and *κοιλία*, a cavity. Ger., *Höhlenmangel*. Syn.: *defectus cavi*. Absence of a natural cavity. [A, 322.]

**ACELIUS**, adj. A<sup>2</sup>-se/li<sup>2</sup>-u<sup>3</sup>s. Gr., *ἀκοίλιος* (from *a* priv., and *κοιλία*, the belly). Lat., *acelios*, *acelius*. So emaciated as to seem to have no belly. [Galen (A, 325).]

**ACELOMATE**, **ACELOMIC**, adj's. A<sup>2</sup>-se-lom'at, -lo<sup>2</sup>m'i<sup>2</sup>k. From *a* priv., and *κοίλωμα*, a cavity. In zoology, not celomate, having no celoma, or distinct circumaxial body-cavity. [E. R. Lankester (B, 77).]

**ACELOSIS** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se(ko-e<sup>2</sup>)-lo<sup>2</sup>si<sup>2</sup>s. See *ACELIA*.

**ACOMETER**, n. A<sup>2</sup>k-o-e<sup>2</sup>m'e-tu<sup>2</sup>r. Lat., *acōmetrum*. See *ACOMETER*.

**ACENA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-se'(ko-e<sup>2</sup>)-na<sup>3</sup>. A genus of rosaceous plants of the sub-order *Sanguisorbeae*. [A, 316.]—**A. argentea**. The *proquin* of Chili and Peru; a creeping plant found in bogs and cornfields; used as a vulnerary in the form of a poultice. [Waring (A, 316).]

**ACOENOSIS** (Lat.), n. f., pl. of *acoenosus*. A<sup>2</sup>k(a<sup>3</sup>k)-o-e<sup>2</sup>n-o-si<sup>2</sup>(si<sup>2</sup>). From *ἀκοή*, hearing, and *νόσος*, disease. Diseases of audition and of the ear. [F.]

**ACOESIS** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-o-e(a)/si<sup>2</sup>s. From *ἀκοή*, hearing. [F.] See *ADDITION*.

**ACETON** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)-se'(ko-e<sup>2</sup>)-to<sup>2</sup>n. See *Acetum* MEL.

**ACETOS**, **ACETUS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>)-se'(ko-e<sup>2</sup>)-to<sup>2</sup>s, -tu<sup>2</sup>s(tu<sup>4</sup>s). See *Acetum* MEL.

**ACOGNOSIA** (Lat.), n. f. A<sup>2</sup>k(a<sup>3</sup>k)-o<sup>2</sup>g-no<sup>2</sup>zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. See *ACOGNOSIA*.

**ACOGNOSTICUS**, **ACOGNOSTUS** (Lat.), n's m. A<sup>2</sup>k(a<sup>3</sup>k)-o<sup>2</sup>g-no<sup>2</sup>st'i<sup>2</sup>k-u<sup>3</sup>s(u<sup>4</sup>s), -no<sup>2</sup>st'u<sup>3</sup>s(u<sup>4</sup>s). For deriv., see *ACOGNOSIA*. One who makes a study of materia medica and therapeutics. [A, 322.]

**ACOGRAPHIC**, adj. A<sup>2</sup>k-o-gra<sup>2</sup>f'i<sup>2</sup>k. Fr., *acographique*. Sp., *acográfico*. Pertaining to acography. [A, 306.]

**ACOGRAPHY**, n. A<sup>2</sup>k-o<sup>2</sup>g-ra<sup>2</sup>f-i<sup>2</sup>. From *ἀκος*, a remedy, and *γράφειν*, to describe. Fr., *acographie*. Sp., *acografía*. A description of remedies. [A, 306.]

**ACOIUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>3</sup>k)-o<sup>2</sup>i<sup>2</sup>-tu<sup>2</sup>s(tu<sup>4</sup>s). See *Acetum* MEL.

**ACOLABIS** (Lat.), n. f.  $A^2k(a^3k)-o^2l/a^3-bi^2s$ . Gen., *acolab'idis*. From *ἀκίς*, a point, and *λαβίς*, a forceps. An artery-forceps, armed with two teeth, devised by Puppi. [A, 322.]

**ACOLASIA** (Lat.), n. f.  $A^2k(a^3k)-o-la(la^3)/zi^2(si^2)-a^3$ . Gr., *ἀκολασία*. Fr., *acolasie*. Ger., *Akolasie*. Intemperance, licentiousness. [A, 311.]

**ACOLASTIC**, adj.  $A^2k-o-la^2s/ti^2k$ . Lat., *acolasticus*, *acolastus*. Fr., *acolastique*. Due to acolasia. [A, 316.] See *ATROPHIA acolastica*.

**ACOLOGICUS, ACOLOGUS** (Lat.), n's m.  $A^2k(a^3k)-ol-o-j^2-(o^2g)/i^2k-u^3s(u^4s)$ ,  $-o^2l/o-gu^3s(gu^4s)$ . Ger., *Akolog*. One who makes a study of acology. [A, 322.]

**ACOLOGY**, n.  $A^2k-o^2l/o-j^2$ . Lat., *acologia*. Fr., *acologie*. Ger., *Akologie*. It., *acologia*. Sp., *acalogia*. See *ACEOLOGY*.

**ACOLUTHIA** (Lat.), n. f.  $A^2k(a^3k)-o-lu^2(lu)/thi^2-a^3$ . Gr., *ἀκούθια*, a following. See *SEQUELA*.

**ACOLYCTINE**, n.  $A^2k-o-lj^2k/ten$ . For deriv., see *ACONITUM* and *LYCOCTONUS*. It., *acolyctina*. An alkaloid discovered by Hübschmann, in 1865, in the root of *Aconitum lycoctonum*; according to A. Wright, an impure acoline. ["Annal. di chim. med.-farm. e di farm.," Jan., 1885, p. 84 (B).]

**ACOMAS, ACOMAT**, n's. Names applied in Guiana to a number of trees, one of which is the *Racouba guianensis* [Aublet] (the *Homalium spicatum* [Lamarck]), and another, according to Tussac, a species of *Achras*, the root of which is used in infusion in the West Indies for gonorrhoea. [A, 321, 344.]

**ACOMIA** (Lat.), n. f.  $A^2k(a^3k)-o-mi^2-a^3$ . Gr., *ἀκομία*, from *a* priv., and *κόμη*, hair. Fr., *acomie*. Ger., *Akomie*. It., *acomia*. 1. Baldness. [G.] 2. Acomsia (q. v.). [A, 322.]

**ACOMIS** (Sp.), n.  $A^3k-o-mi^2s$ . See *ACONA*.

**ACOMUS** (Lat.), adj.  $A^2k(a^3k)-o-mu^3s(mu^4s)$ . Gr., *ἄκομος*. 1. Destitute of hair. 2. Acomsus (q. v.). [A, 322.]

**ACONA** (Sp.), n.  $A^3k-o-na^3$ . A West Indian name for the *Eugenia Greggii* [Swartz], a myrtaceous shrub, the fruit of which is aromatic and stimulant. [A, 321.]

**ACONDYLOUS**, adj.  $A^2k-o^2n/di^2l-u^3s$ . Lat., *acondylus*. Gr., *ἀκόνδυλος*, from *a* priv., and *κόνδυλος*, a knuckle. Fr., *acondyle*. Not jointed (said of the stalks of plants). [A, 343.]

**ACONE** (Lat.), n. f.  $A^2k(a^3k)-o-ne(na)$ . Gr., *ἄκωνη*. 1. A whetstone, a stone on which to levigate. [A, 311, 343.] 2. A mortar. [A, 335.]

**ACONÉINE** (Fr.), n.  $A^3k-o-na-en$ . Aconine.

**ACONELLA, ACONELLINE**, n's.  $A^2k-o^2n-e^2l/la^3$ . Jen. From a supposed dim. of *aconitum*, aconite. Fr., *aconelline*. Ger., *Aconellin*. It., *aconellina*. A non-poisonous alkaloid extracted, according to T. and H. Smith, from the root of *Aconitum napellus*. [B, 2.] It is isomeric, and by some said to be identical, with narcotine. Its existence is disputed. [B.]

**ACONIC ACID**, n.  $A^2k-o^2n/i^2k$ . Fr., *acide aconique*. Ger., *Aconsäure*. A monobasic crystalline acid,  $C_6H_4O_4$ , related to both aconitic and itaconic acids. [B, 4.]

**ACONINE**, n.  $A^2k-o^2n-en$ . For deriv., see *ACONITE*. Fr., *aconéine*. Ger., *Aconin*. A base,  $C_{26}H_{39}NO_{11}$ , formed by the saponification of true aconitine. [B, 5.]

**ACONION** (Lat.), n. n.  $A^2k(a^3k)-o-ni^2-o^2n$ . Gr., *ἄκωνιον*, probably from *ἄκωνη*, from its having been levigated on an acone (q. v.). An ancient remedy, consisting of a very fine powder, applied to the eyes. [A, 322; Dioscorides (A, 311).]

**ACONIT** (Fr., Ger.), n.  $A^3k-o-ne$ ,  $-net'$ . Aconite.—**A. à grands fleurs** (Fr.). See *ACONITUM cyanuratum*.—**A. anthore** (Fr.). See *ACONITUM anthora*.—**A. des Pyrénées** (Fr.). See *ACONITUM Pyrenaicum*.—**A'-extract** (Ger.). See *ACONITUM ACONITI*.—**A. féroce** (Fr. Cod.). See *ACONITUM ferox*.—**A'-kraut** (Ger.). Aconite leaves and tops.—**A. lycoctone** (Fr.). See *ACONITUM lycoctonum*.—**A. napel** [Fr. Cod.]. Ordinary aconite, *Aconitum napellus*. The Codex directs the employment of both the root and the leaves. [B.]—**A. néomontain** (Fr.). See *ACONITUM neomontanum*.—**A. paniculé** (Fr.). See *ACONITUM paniculatum*.—**A'-pflaster** (Ger.). See *Emplastum ACONITI*.—**A. salutare** (Fr.). See *ACONITUM anthora*.—**A'-säure** (Ger.). See the major list.—**A'-tinctur** (Ger.). See *Tinctura ACONITI*.—**A. tue-chien** (Fr.). Lit., kill-dog aconite. See *ACONITUM napellus*.—**A. tue-loup** (Fr.). Lit., kill-wolf aconite; wolfsbane. See *ACONITUM lycoctonum*.—**Alcoolature de feuille d'a.** [Fr. Cod.]. A preparation corresponding nearly to a fluid extract, made by macerating 1,000 parts of aconite leaves, collected at the beginning of inflorescence, in 1,000 parts of 90-per-cent. alcohol, and filtering. [B.]—**Alcoolature de racine d'a.** [Fr. Cod.]. A similar preparation made with the root, collected after flowering. [B.]—**Emplâtre d'a.** (Fr.). See *Emplastum ACONITI*.—**Extrait alcoolique d'a.** (Fr.). An alcoholic extract, made by exhausting powdered aconite leaves with 56-per-cent. alcohol and evaporating to the consistence of an extract. [O. Reveil (A, 328).]—**Extrait de feuille d'a.** [Fr. Cod.]. A preparation made from aconite leaves by extracting with boiling water and evaporating to the consistence of a soft extract. [B.]—**Extrait de la racine d'a.**, **Extrait de racine d'a. alcoolique** [Fr. Cod.]. See *Extractum ACONITI*.—**Feuilles d'a. napel** [Fr. Cod.]. Aconite leaves. [B.]—**Racine d'a. napel** [Fr. Cod.]. Aconite root. [B.]—**Sirap d'a.** [Fr. Cod.]. **Sirap d'alcoolature d'a.** Lat., *syrupus de aconito* [Fr. Cod.]. A preparation made by mixing 25 parts of *alcoolature de racine d'a.* in 975 parts of syrup. [B.]—**Teinture de feuille d'a.** [Fr. Cod.]. **Teinture de racine d'a.** [Fr. Cod.]. Preparations made by macerating for ten days 1 part of aconite leaves or root in 5 parts of 60-per-cent. alcohol, and filtering. [B.]—**Teinture étherée d'a.** (Fr.). An ethereal tincture of aconite, made by displacement from 1 part of the powdered leaves and 6 parts of sulphuric ether. [O. Reveil (A, 328).]

**ACONITANILIC ACID**, n.  $A^2k-o^2n/i^2t-a^2n-i^2l/i^2k$ . From *aconityl* and *aniline*. Fr., *acide aconitanilique*. Ger., *Aconitanilsäure*. An amic acid,  $C_{12}H_9NO_4 = O \begin{matrix} N \\ | \\ (C_6H_3O_3)''' \end{matrix} \cdot C_6H_5$ , formed

on the type  $O \begin{matrix} NH_4 \\ | \\ H \end{matrix}$ , 3 of the hydrogen atoms in the ammonium being replaced by aconyl, and the fourth by phenyl. [B, 2.]

**ACONITANILIDE**, n.  $A^2k-o^2n/i^2t-a^2n-i^2l-i^2d$ . From *aconitic* and *aniline*. Fr., *aconitanilide*. Ger., *Aconitanilid*. A compound,  $C_{24}H_{21}N_3O_7 = N_3(C_6H_3O_3)'''(C_6H_5)_2 \cdot H_2$ , which appears to be formed, together with aconitodanil, by the action of aconitic acid or oxychloroacetic acid on aniline. [B, 2.]

**ACONITANILSÄURE** (Ger.), n.  $A^3k-o^2n-et''-a^2n-el-zoi-re^2$ . Aconitanilic acid. [B.]

**ACONITATE**, n.  $A^2k-o^2n/i^2t-at$ . Fr., *aconitate*. Ger., *aconit-saures Salz*. It., Sp., *aconitato*. A salt of aconitic acid. The a's are of three classes, expressed by the general formulæ  $C_6H_3M_2O_4$ ,  $C_6H_3(M_2H)_2O_4$ , and  $C_6H_3(MH_2)_2O_4$ , the first and third formulæ being doubled for salts of diatomic metals. [B, 2.]

**ACONITE**, n.  $A^2k-o^2n-it$ . Gr., *ἄκωνιτον*, *ἄκωνειτον*, from Aconis, a Bithynian city, where it grew in great abundance, according to Theophrastus; according to others, from *ἄκωνη*, a rock, because it grew in rocky places. [A, 300.] One species was called *παρδαλαγγίς* (leopard's bane). [Aristotle (A, 311).] Lat., *aconitum*. Fr., *aconit*. Ger., *Aconit*, *Eisenhut*, *Sturmhut*. It., *aconito*. Sp., *aconito*. Syn.: *monkshood*, *wolfsbane*. The genus *Aconitum*; in pharmacy, the leaves or the tuberous root of the *Aconitum napellus* (in the U. S. Ph., the root only). [B, 5.]—**Abstract of a.** See *Abstractum ACONITI*.—**A. leaves**. Lat., *aconiti folia* [Br. Ph.]. Fr., *feuilles d'aconit napel* [Fr. Cod.]. Ger., *Eisenhutblätter*, *Sturmhutblätter*. It., *foglie d'aconito*. Sp., *hojas de aconito*. In pharmacy, the leaves of *Aconitum napellus*. They are deeply palmate, with secondary indentations on the primary divisions; dark-green on the upper and light-green on the lower surface, and glossy on both; have a faint odor, particularly when rubbed; and, when chewed, impart first a bitter taste, then a sense of tingling and numbness to the tongue and mouth. [B.]—**A. liniment**. See *Linimentum ACONITI*.—**A. plaster**. See *Emplastum ACONITI*.—**A. root**. Lat., *aconitum* [U. S. Ph.], *aconiti radix* [Br. Ph.], *tubera aconiti* [Ger. Ph.]. Fr., *racine d'aconit napel* [Fr. Cod.]. Ger., *Eisenhuthknoellen*. It., *radice (o tuberi) d'aconito*. Sp., *raiz de aconito*. In pharmacy, the tuber, or root-stock of *Aconitum napellus*. It is a dark-brown, conical or oblong tuber, from 2 to 3 or 4 in. long, and from  $\frac{3}{8}$  to  $\frac{1}{2}$  in. thick at its thickest part. It is covered with a thick bark marked with the scars of the rootlets. It is devoid of odor, and, when chewed, imparts a sweetish, acrid taste, followed by numbness and tingling in the mouth and tongue. It contains more of the active principle than the leaves. [B, 5.]—**American a.** See *ACONITUM Fischeri* and *ACONITUM uncinatum*.—**Ethereal tincture of a.** See *Tinctura ACONITI aetherea*.—**Extract of a.**, **Extract of a. root**. See *Extractum ACONITI*.—**Fleming's tincture of a.** A tincture made by macerating for four days 16 troyounces of dried and powdered a. root in 16 fluidounces of alcohol, and then percolating alcohol being added until the percolate equals 24 fluidounces. [B.]—**Fluid extract of a.** See *Extractum ACONITI fluidum*.—**Indian a.** See *ACONITUM ferox*.—**Japanese a.** A term applied to several varieties found in Japan. [B, 5.]—**Liniment of a.** See *Linimentum ACONITI*.—**Mountain a.** See *ACONITUM neomontanum*.—**Nepal a.** The tubers of *Aconitum ferox*, and perhaps those of other species, growing in Nepal; distinguished by their large size and their elongated shape. [B, 5.]—**Tincture of a.** See *Tinctura ACONITI* and *Fleming's tincture of a.*—**Tincture of a. root**. See *Tinctura ACONITI*.—**Winter a.** See *ERANTHIS hiemalis*.

**ACONITIA** (Lat.), n. f.  $A^2k(a^3k)-o-ni^2sb(ni^2t)-a^3$ . The official name for aconitine formerly employed in the Br. Ph.; now superseded by *aconitina*. [B.]—**Ointment of a.**, **Unguentum aconitiae** [Br. Ph., 1867]. See *Unguentum ACONITINÆ*.

**ACONITIC ACID**, n.  $A^2k-o^2n-i^2t/i^2k$ . Fr., *acide aconitique*. Ger., *Aconitsäure*. It., *acido aconitico*. Sp., *ácido aconítico*. Syn.: *achilleic* (or *euaisetic*) acid. A tribasic crystalline acid,  $C_6H_6O_6 = C_3H_3(CO.OH)_3$ , occurring in various plants of the genera *Aconitum* and *Equisetum*, also in *Delphinium consolida*, *Adonis vernalis*, *Achillea millefolium*, and beets, sugar-cane, and sorghum. It is formed also from citric acid by the action of heat or acids. [B, 3, 4, 5.]

**ACONITICUM** (Lat.), n. n.  $A^2k(a^3k)-o-ni^2t/i^2k-u^3m(u^4m)$ . Neut. of adj., *aconiticus* (*principium* understood). The aconitic principle; a name proposed by C. G. Kühn for aconitine. [A, 322.]

**ACONITIFOLIA** (Lat.), n. f.  $A^2k(a^3k)-o^2n-i^2t-i^2f-o/i^2a^3$ . The *Podophyllum peltatum*. [A, 316.]

**ACONITIN** (Ger.), n.  $A^3k-o^2n-e-ten'$ . Aconitine.—**A'salbe**. See *Unguentum ACONITINÆ*.—**Salpetersaures A.** Aconitine nitrate. [B.]

**ACONITINA** (Lat.), n. f.  $A^2k(a^3k)-o^2n-i^2t-i(e'v)na^3$ . Syn.: *aconitia* [Br. Ph., 1867], *aconitinum* [Ger. Ph.]. Aconitine.—**Azotas aconitine** [Fr. Cod.]. Fr., *azotate d'aconitine*. Ger., *salpetersaures Aconitin*. Aconitine nitrate. [B.]—**Oleatum aconitine**. A solution of 2 grains of aconitine in 100 minims of oleic acid; used as a topical application for neuralgia. [B, 94.]—**Unguentum aconitine** [Br. Ph.]. Ger., *Aconitinsalbe*. Syn.: *unguentum aconitiae* [Br. Ph., 1867]. Ointment of aconitine; made by dissolving 8 grains of aconitine in  $\frac{3}{4}$  fluidrachm of rectified spirit, and adding 1 oz. (avoirdupois) of lard. It contains 16 parts of aconitine in 1,000. [B.]

**ACONITINE**, n.  $A^2k-o^2n/i^2t-en$ . Lat., *aconitina* [Br. Ph., Fr. Cod., Belg. Ph.], *aconitinum* [Ger. Ph., 1st ed.], *aconitia* [Br. Ph., 1867]. Fr., *aconitine*. Ger., *Aconitin*. It., Sp., *aconitina*. An alkaloid,  $C_{25}H_{43}NO_{12}$  (probably benzoylaconine,  $C_{26}H_{38}[C_6H_5O]_{11}$  [B]), derived from the *Aconitum napellus*, and from other species of *Aconitum*. Except some of the hydrogen compounds of arsenic,

this substance is the most deadly poison known. [B.] As produced by different makers it varies in its sensible properties, thus: 1. *Petit's*. Hard, white crystals. 2. *Morson's*. A dirty-white powder (? pseudo-aconitine) of a burning but not bitter taste. 3. *Hottot's*. A white powder. 4. *Hopkins & Williams's*. A concrete, transparent, gummy mass, of a greenish-brown color (? pseudo-aconitine). 5. *Merck's*. A yellowish or clear-brown powder. 6. *Friedländer's*. A concrete, grayish-white mass. [Plügg, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," lxxvii, 3, p. 410.]—**A. nitrate**. Lat., *azotas aconitine* [Fr. Cod.], *aconitinum nitricum* (as written by the Germans). Fr., *azotate d'a.* [Fr. Cod.], Ger., *salpetersaures Aconitin*. It., *nitrato di aconitina*. Sp., *nitrato de aconitina*. Colorless prismatic crystals,  $C_{35}H_{42}NO_{12}$ ,  $HNO_3$ , soluble in 10 parts of boiling water, less soluble in cold water. [B.]—**Amorphous a.** The official preparation of the Br. Ph.; an amorphous base, combined usually with several molecules of water of crystallization. As prepared by the process of the Br. Ph., it usually contains a variable amount of pseudo-aconitine. It is soluble in 150 parts of water, and readily soluble in alcohol, in ether, and in chloroform. [B. 5.]—**Apo-a.** See the major list.—**Crystallized a.** See *True a.*—**Duquesnel's a.** A form of crystallized a. having the constitution  $C_{37}H_{40}NO_{10}$ , resembling true a. in most of its physical properties, but said to differ from it in physiological action. [B. 5.] It has lately been suggested that it is not the simple alkaloid, but a nitrate. ["Ephem. of Mat. Med.," etc., Nov., 1882, p. 167 (B).]—**English a.** See *Morson's a.*, under *A.*—**French a.** See *True a.*—**German a.** See *Merck's a.*, under *A.*—**Pseudo-a.** See the major list.—**True a.** Colorless tabular or prismatic crystals, having a very bitter taste, and imparting to the lips and tongue a numb, tingling sensation. It is almost insoluble in water, but soluble in alcohol and in ether, and very soluble in chloroform. This is the a. of the Fr. Cod. [B. 5.]

**ACONITINUM** (Lat.), n. n.  $A^2k(a^3k)-o^2n-i^2t-i(e)nu^2m(nu^4m)$ . The German official name for aconitine.—**A. anglicum**. English aconitine. See *Pseudo-ACONITINE*.—**A. nitricum**. See *ACONITINE nitrate*.

**ACONITUM** (Lat.), n. n.  $A^2k(a^3k)-o-ni^2shi^2(t)^2-u^3m(u^4m)$ . Aconitine.

**ACONITO-BIANILE** (Fr.), n.  $A^2k-o-ne-to-be-a^3n-el$ . See *ACONITODIANIL*.

**ACONITODIANIL**, n.  $A^2k-o^2n-i^2t-o-di^2a^2n-i^2l$ . For deriv., see *ACONITE*, *Di-*, and *ANILINE*. Fr., *aconito-bianile*. Ger., *Aconitodianil*. It., *aconitidianilo*. A substance,  $C_{18}H_{11}N_2O_3 = N_2(C_6H_5O_2)''(C_6H_5)_2H$ , produced, together with aconitanilide (*q. v.*), by the action of acetic acid on aniline. [B. 2.]

**ACONITSÄURE** (Ger.), n.  $A^2k-o-net'zoi're^2$ . Aconitic acid. [B.]—**A. Aethylester**. Ethyl aconitate. [B.]—**Brenzliche A.** Pyroaconitic acid. [A, 324.]

**ACONITUM** (Lat.), n. n.  $A^2k(a^3k)-o^2n-i(e)tu^3m(tu^4m)$ . For deriv., see *ACONITE*. 1. A genus of herbaceous plants of the natural order *Ranunculaceæ* and the tribe *Helleboreæ*, distinguished by the presence of five sepals, the upper one of which is hooded and covers in the upper petals. [B. 34.] There is a great liability to variation in the species, and the nomenclature is consequently confusing. [J. U. and C. G. Lloyd, "Drugs and Med. of N. Am.," Sept., 1885.] 2. The drug aconite (in the U. S. Ph.), the tuberous root of *A. napellus*. [B.]—**Abstractum aconiti** [U. S. Ph.]. Abstract of aconite: made by extracting 200 parts of powdered aconite root with alcohol containing 2 parts of tartaric acid, and evaporating the extract with sugar of milk, which is added in sufficient quantity to make the whole weigh 100 parts. [B. 5.]—**Aconiti folia** [Br. Ph.]. The leaves of *A. napellus*. [B.]—**Aconiti heterophylli radix** [Ind. Ph.]. The root of *A. heterophyllum*, or *atis*. [B.]—**Aconiti radix** [U. S. Ph., 1870; Br. Ph.]. The root of *A. napellus*. [B.]—**Aconiti tuber**. The tuber of *A. napellus*.—**A. altigaleatum**. See *A. cammarum*.—**A. anthora** [Linnaeus]. Fr., *aconit anthore (ou salulaire)*. Ger., *feinblättriger Sturmhut*, *Giftheil*, *Heilgift*, *Herzwurz*. Sp., *aconito salubradle*. A European species, the rhizome of which is long and fusiform, with a thin pith, having both short and long radiating prolongations. [B. 33.] Its specific name, *anthora* (= antithora), came from its having formerly been regarded as an antidote to "thora," the *A. napellus* (or from its being "good against disorders of the thorax"). [Wallace, "Lancet," March 18, 1882.] The root (*radix anthoræ*), which has been used in medicine, is made up of rounded or angular fleshy masses, brown externally and white internally, having an agreeable odor, and a taste at first very acid, afterward sweetish. [B. 97.]—**A. anthoroidum**. See *A. anthora*.—**A. barbatum**. A Siberian species. The root is used in China as a stimulant, diuretic, and alterative, also for fever and hemorrhoids. [A, 248, 261.]—**A. bernhardianum**. See *A. cammarum* [Jacquin]. Fr., *aconit à grands fleurs*. Ger., *langhelmtiger Sturmhut*. A European species, having the rhizome globular-ovate and the rays of the pith about five in number. The leaves have rhomboid segments. [B. 33.]—**A. Candollei**. See *A. anthora*.—**A. casiosotum**. A variety mentioned by Power and Sedgwick as "believed to be poisonous." [A, 316.]—**A. chinense** [Sieber]. Chinese aconite, indigenous to Japan. The rhizome is elongated, and a cross-section of the pith is circular, elliptical, or stellate. [B. 33.] It is used in China as a vulnerary and to poison arrows, and the powder of that brought from Szechwan is employed to produce local anesthesia. [A, 261.]—**A. columbianum**. **A. elophum**. See *A. anthora*.—**A. ferox** [Wallich]. Fr., *aconit féroce* [Fr. Cod.]. Indian aconite; a genus found in the Himalayas, being the source of the terrible *bish*, or *bishk*, poison of India, used as an arrow-poison. It was also used by the natives to poison the wells in places captured by the British. It has been thought to be the source of the so-called aconitine (pseudoaconitine) made in England. By some it has been regarded as only a variety of *A. napellus*. The rhizome, which is used in medicine, is conical in shape, from 2 to 4 in. long, about 1 in. thick, and intensely acid. [A, 42; B, 19, 33.]—**A. Fischeri** [Reich]. A species growing abundantly in the mountainous regions of the western section of the United States.

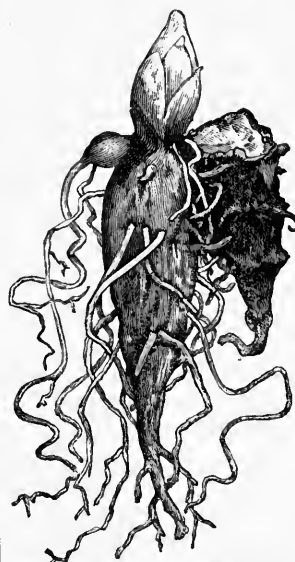

In its physiological action it differs from *A. napellus* in not affecting tactile sensibility, or the irritability of the sensory nerves. It does not affect the contractility of muscles or the irritability of the

ACONITUM FISCHERI.

[From J. U. and C. G. Lloyd's "Drugs and Medicines of North America."]

motor nerves, but paralyzes the motor centers of the spinal cord, together with the pneumogastric nerve, and stimulates the vaso-motor center. It causes death by paralysis of respiration. [R. Bartholow, "Drugs and Med. of N. Am.," Sept., 1885, p. 229; "N. Y. Med. Jour.," Nov. 21, 1885, p. 592.]—**A. heterophyllum** [Wallich]. A species found in India. The rhizome is conical or fusiform, and devoid of acidity. [B. 33.] The plant is eaten in India as a vegetable. The root is pleasantly bitter, and is by some considered mildly antiperiodic and tonic, by others inert. [G. Watt, quoted by J. U. and C. G. Lloyd, *op. cit.*]—**A. intermedium**. See *A. neomontanum*.—**A. Jacquinii**. See *A. anthora*.—**A. japonicum**. Japanese aconite (*asaonuroo*). The rhizome, which is the part found in commerce, agrees in general characters with that of *A. chinense*, and is said to be used in China for the same purposes. Probably derived from several species. [A, 316; B.]—**A. Kusnezovii**. See *A. cammarum*.—**A. luridum** [Hooker and Thomsen]. An East Indian species, gathered along with *A. ferox*. [B. 33.]—**A. luteum**. Ger., *gelber Eisenhut*. Yellow aconite. See *A. lycoctonum*.—**A. lycoctonum** [Linnaeus]. Gr., *ἀκόνιτον λυκοκτόνον*. [Dioscorides (A, 328).] Fr., *aconit tuelon (ou tycoctone)*. Ger., *Wolfstodsturmhut*, *Fuchstodsturmhut*. Syn.: *Lycoctonum vulgare flore luteo*, *Delphinium lycoctonum*, *A. vulparia*. The great yellow wolfsbane; a European species, having an oblique rhizome with several heads and conical rootlets, palmate hairy leaves, and dull-yellowish flowers, the hooded sepal of which has the shape of an extinguisher. It is less virulent than many other species, and only the root seems to be poisonous. [A, 319;

THE RHIZOME OF ACONITUM FISCHERI.

[J. U. and C. G. Lloyd, *op. cit.*]

B. 5, 19, 33.]—*A. macranthum*. See *A. cammarum*.—*A. multifidum*. A species of which the roots are said to be edible. [Hooker (A. 316).]—*A. napellus* [Linnaeus]. Fr., *aconit napel* [Fr. Cod.], *char-de-Vénus*, *casque-de-Jupiter*. Ger., *Napell* (oder *wahrer*) *Sturmhut*. It., *aconito napello*. Sp., *aconito napelo*.

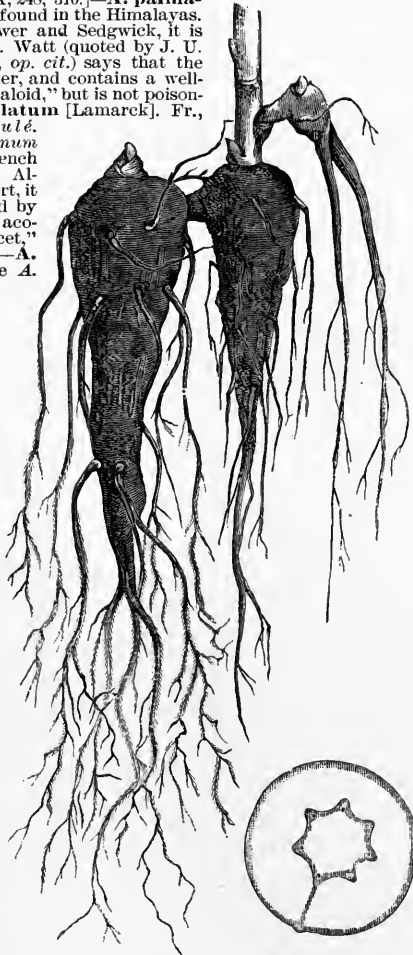

ACONITUM NAPELLUS. [A. 327.]

species supposed not to be poisonous. [A. 316.]—*A. ochroleucum* [Willdenow]. A species indigenous to the Caucasus, thought not to be poisonous. [A. 248, 316.]—*A. palmatum*. A species found in the Himalayas.

According to Power and Sedgwick, it is poisonous, but G. Watt (quoted by J. U. and C. G. Lloyd, *op. cit.*) says that the root "is very bitter, and contains a well-defined bitter alkaloid," but is not poisonous.—*A. paniculatum* [Lamarck]. Fr., *aconit paniculé*.

Syn.: *Lycocotum autumnale*. A French species. [A. 248.] Although almost inert, it is said to be used by some makers of aconitine. ["Lancet," March 25, 1882.]—*A. ponticum*. See *A. lycocotum*.—*A. pyrenaicum* [Lamarck]. Fr., *aconit des Pyrénées*. A species indigenous to the Pyrenees, considered by some as a variety of *A. lycocotum*, thought not to be poisonous. [A. 248, 257, 316.]—*A. racemosum*.

See *ACTEA spicata*.—*A. reclinatum* [Gray]. A rare species found on a few mountain-peaks of North Carolina and Virginia, distinguished by white or cream-colored flowers and a trailing stem; thought to be of no importance in medicine. [A. Gray, "Am. Jour. of Sci.," April, 1842, p. 34; "Drugs and Med. of N. America," Sept., 1885, p. 220; B. 34.]—*A. rostratum* [Bernhardi]. A variety of *A. cammarum*. [A. 248, O. Revell (A. 328).]—*A. rotundifolium*. A species of which the roots are said to be edible. [Hooker (A. 316).]—*A. salutariferum*. See *A. anthora*.—*A. scandens*. See *A. uncinatum*.—*A. septentrionale*. A variety of *A. lycoc-*

THE ROOT OF ACONITUM NAPELLUS. [A. 260.]

The small figure at the right shows a cross section of the rhizome.

*tonum* found in northern Europe, the leaves of which are eaten as a pot-herb, while the root is poisonous. [A. 248, 316.]—*A. sherkanium*. A variety of *A. cammarum*. [O. Revell (A. 328).]—*A. sinense* [Paxton]. Chinese aconite; a variety of *A. chinense*. [A. 248; B. 5.]—*A. spicatum*. A variety of *A. napellus*. [O. Revell (A. 328).]—*A. stoerckeanum*, *A. stoerckianum*, *A. stöckianum*, *A. störkianum* [Reichenbach]. Ger., *Störck's* (oder *grosser blauer*) *Sturmhut*. Störck's aconite, an Austrian species with leaves divided into broadly wedge-shaped segments, and a thin, conical rhizome, with the pith pentagonal in cross-section. [A. 248; B. 33.] This is supposed to be the species employed by Baron Störck, who introduced aconite into medicine in the eighteenth century; but others think that he used *A. neomontanum*.—*A. strictum*. A variety of *A. napellus*. [P. Rayer (A. 332).]—*A. tauricum*. An intensely acrid species found in Tauria [A. 248, Christison (A. 316).]—*A. uncinatum* [Linnaeus]. Syn.: *A. scandens* [Muhlenberg]. American aconite; a species found sparingly in the Alleghany Mountains and elsewhere in the Middle States,

ACONITUM UNCINATUM.  
[J. U. and C. G. Lloyd, *op. cit.*]

having large, showy blue flowers. Although it has been said to be identical with an extremely poisonous Asiatic species, it contains but a minute quantity of an acrid, bitter, amorphous alkaloid, and may be regarded as practically inert. [V. Coblentz and R. Bartholow, "Drugs and Med. of N. Am.," Sept., 1885, p. 224 (with remarks by the editors of that publication).]—*A. variale* [Hayne]. See *A. napellus*.—*A. variegatum* [Linnaeus]. See *A. cammarum*.—*A. virosum* [Don]. See *A. ferox*.—*A. vulparia*. See *A. lycocotum*.—*Emplastrum aconiti* [U. S. Ph., 1870]. Aconite plaster; made by extracting 16 oz. of aconite root with alcohol, evaporating to the consistence of a soft extract, and adding enough resin plaster to make the whole weigh 16 oz. According to the Belg. Ph., a plaster made of 1 part, each, of powdered extract of aconite and belladonna oil and 7 parts of Burgundy-pitch plaster. [B. 95.]—*Essentia aconiti*. See *Tinctura aconiti*.—*Extractum aconiti* [U. S. Br., and Ger. Ph's.]. Fr., *extrait de racine d'aconit alcoolique* [Fr. Cod.]. Ger., *Aconitextract* [Ger. Ph.], *Eisenhutetrakt*, *Sturmhutetrakt*. It., *estratto di radice d'aconito*. Sp., *extracto de aconito*. Extract of aconite. The U. S. preparation is made by exhausting 100 parts of powdered aconite root with alcohol in which 1 part of tartaric acid has been dissolved, evaporating to a pilular consistence, and adding 5 per cent. of glycerin. The French process is the same, with the omission of the tartaric acid and glycerin. The German Pharmacopœia directs that the root be macerated for six days in a mixture of alcohol and water, then three days longer in fresh alcohol and water, and the two infusions mixed and evaporated to the consistence of a thick extract. The British preparation is made by inspissating the juice of the fresh leaves and tops of aconite. [B.]—*Extractum aconiti aquosum* [Netherl. Ph.]. A thick aqueous extract of aconite leaves. [B. 95.]—*Extractum aconiti fluidum* [U. S. Ph.]. Fluid extract of aconite; made by exhausting 100 grammes of powdered aconite root with alcohol in which 1 gramme of tartaric acid has been dissolved, evaporating to the consistence of a soft extract, and adding enough alcohol to make the whole measure 100 c. c. [B.]—*Extractum aconiti herbae* [Russ. Ph.].

An extract of the leaves and tops of aconite. [B, 95].—**Extractum aconiti herbæ cum dextrino** [Russ. Ph.]. An extract of the leaves and tops of aconite mixed with dextrin. [B, 95].—**Extractum aconiti pulveratum** [Fenn. Ph.]. A mixture of extract of aconite leaves with milk sugar and licorice, containing  $\frac{1}{2}$  of its weight of the extract. [B, 95].—**Extractum aconiti radicis alcoholicum**. Alcoholic extract of aconite root [Fleming].—**Extractum aconiti siccum** [Swiss Ph.]. Extract of aconite leaves mixed with milk sugar. [B, 95].—**Extractum aconiti spirituosum** [Netherl. Ph.]. A thick alcoholic extract of aconite leaves. [B, 95].—**Extractum aconiti tuborum** [Russ. Ph., Swed. Ph.]. Extract of aconite root. [B, 95]. See *Extractum aconiti*.—**Extractum aconiti tuborum siccum** [Swed. Ph.]. A dried extract of aconite root mixed with dextrin and licorice; 2 parts represent 1 part of the simple extract. [B, 95].—**Folia aconiti**. The leaves of *A. napellus*.—**Herba aconiti**. Ger., *Aconitkraut*. The leaves and tops of *A. napellus*.—**Linimentum aconiti** [Br. Ph., U. S. Ph., 1870]. Aconite liniment; made by extracting 20 parts by weight of aconite root and 1 part of camphor with alcohol until 20 parts by volume of extract are obtained. [Br. Ph.]. The preparation of the U. S. Ph. of 1870 was made by extracting 8 parts by weight of aconite root with alcohol until 7 parts of extract were obtained, and adding 1 part of glycerin. [B, 95].—**Radix aconiti racemosi**. The root of *Actæa spicata*. [B, 95].—**Succus inspissatus aconiti**, **Succus spissatus aconiti napelli**. The inspissated juice of the fresh leaves of *A. napellus*. [B, 97].—**Syrupus de aconito** [Fr. Cod.]. See *Sirap d'aconit*.—**Tinctura aconiti** [U. S. Br., and Ger. Phs.]. Fr., *teinture de racine d'aconit* [Fr. Cod.]. Ger., *Aconittinctur* [Ger. Ph.]. It., *tintura d'aconito*. Sp., *tintura d'aconito*. Tincture of aconite; made by macerating powdered aconite root with alcohol, or dilute alcohol and filtering. The U. S. Ph. directs the addition of 1 part of tartaric acid to every 100 parts of the root, previous to the extraction; the maceration is continued for only twenty-four hours, and the process is completed by percolation. In the Br. Ph. the maceration is directed to be kept up for forty-eight hours, and then percolation employed, while in the Ger. Ph. and the Fr. Cod. maceration alone is ordered, and is directed to be kept up for a week [Ger. Ph.] or ten days [Fr. Cod.]. In the U. S. preparation 100 parts contain 40 of the drug, in the French 20, in the British 15, and in the German 10. [B, 97].—**Tinctura aconiti ætherea**. An ethereal tincture of the leaves of *A. napellus*, made with from 2 to 4 parts of ether; or an alcoholic tincture of the leaves, made with 2 parts of the latter and three parts of alcohol, to which 1 part of acetic ether is added; used as an antispasmodic and diaphoretic, especially in rheumatism. [B, 97].—**Tinctura aconiti radicis** [U. S. Ph., 1870]. Tincture of aconite root. [B, 97].—**Tubera aconiti indica**. Indian aconite root; the tubers of various species used in India in making bish poison. [A, 303].

**ACONITYL**, n.  $A^2k\text{-}o^2n^1i^2t^2i^2l$ . Fr., *aconityle*. Ger., *Aconityl*. It., *aconitillo*. The trivalent radicle of aconitic acid and its derivatives,  $C_8H_5O_3$ . [B, 2.]

**ACONIUM** (Lat.), n. n.  $A^2k(a^3k)\text{-}o^2ni^2\text{-}u^3m(u^4m)$ . See *ACONION*.

**ACONSÄURE** (Ger.), n.  $A^3\text{-}kon^2\text{-}zoi\text{-}re^2$ . Aconic acid. [B.]

**ACONTISMUS** (Lat.), n. m.  $A^2k(a^3k)\text{-}o^2n\text{-}ti^2z(t^2s)/mu^2s(mu^4s)$ . Gr., *ἀκοντισμός*. A darting out (of liquids). [Galen (A, 311).]

**ACONUSI, ACOONOSI, ACOONUSI** (Lat.), n's f. pl.  $A^2k\text{-}o^2n(o\text{-}o^2n)\text{-}u^2(u, o)/si^2s$ . See *ACENOSI*.

**ACOPA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o\text{-}pa^3$ . See *ACOPUS*.

**ACOPE, ACOPEUX** (Fr.), adj's.  $A^3\text{-}kop$ ,  $\text{-}ko\text{-}pu^4$ . Acopic.

**ACOPHER**, n. A Scriptural term supposed to have referred to the henna-plant. [A, 344.] See *LAWSONIA inermis*.

**ACOPIA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o\text{-}pi^2\text{-}a^3$ . Gr., *ἀκονία*. Freedom from fatigue. [A, 311.]

**ACOPIASTOS** (Lat.), adj.  $A^2k(a^3k)\text{-}o\text{-}pi^2\text{-}a^3s(a^3s)/to^2s$ . Gr., *ἀκονιαστος*. Not fatiguing. [Aristotle (A, 311).]

**ACOPIC**, adj.  $A^2k\text{-}o^2p^2i^2k$ . Gr., *ἀκωπος*. Lat., *acopos, acopus, acopius*. Fr., *acope*. It., *acopo*. Sp., *acópico, acoposo*. Not wearied, not wearying; refreshing, restorative. [Hippocrates, Galen (A, 311).]

**ACOPIS** (Lat.), n. m.  $A^2k(a^3k)\text{-}o\text{-}pi^2s$ . See *ACOPUS*.

**ACOPOMYRON** (Lat.), n. n.  $A^2k(a^3k)\text{-}o\text{-}po\text{-}mi(mu^6)/ro^2n$ . See *MYRACOPUM*.

**ACOPON** (Lat.), n. n.  $A^2k(a^3k)\text{-}o\text{-}po^2n$ . Gr., *(φάρμακον) ἀκωπον* (from a priv., and *κωπος*, weariness). Fr., *acope*. Ger., *schmerzstillendes Mittel*. It., *acopo*. In ancient pharmacy, a medicament, especially an ointment, that relieved fatigue. [A, 306.] A restorative. [Galen (A, 311).]

**ACOPUS** (Lat.), n. m.  $A^2k(a^3k)\text{-}o\text{-}po^2s$ . Gr., *ἀκωπος*. 1. A precious stone of a spongy texture, interspersed with gold-colored spots, boiled in oil by the ancients as a remedy for fatigue. [A, 306.] 2. A plant supposed to have the same property, thought to have been the *Menyanthes trifoliata*. [Dioscorides (A, 344).] 3. An old name for lupine. [Pliny (A, 318).]

**ACOPRIA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o^2p^2ri^2\text{-}a^3$ . See *ACOPROSIS*.

**ACOPRODES** (Lat.), adj.  $A^2k(a^3k)\text{-}o^2p\text{-}ro^2dez(de^2s)$ . Gr., *ἀκωπρόδης* (from a priv., and *κωπος*, excrement). Producing but little excrement (said of articles of food). [Hippocrates (A, 311).]

**ACOPROSIS** (Lat.), n. f.  $A^2k(a^3k)\text{-}o^2p\text{-}ro^2si^2s$ . Fr., *acoprose*. A deficient formation of excrement. [A, 322.]

**ACOPROUS**, adj.  $A^2k\text{-}o^2p^2ru^2s$ . Gr., *ἀκωπρος*. Having but little excrement in the bowels. [Hippocrates (A, 311).]

**ACOPUM** (Lat.), n. n.  $A^2k(a^3k)\text{-}o\text{-}pu^2m(pu^4m)$ . See *ACOPON*.

**ACOPUS** (Lat.), adj.  $A^2k(a^3k)\text{-}o\text{-}pu^2s(pu^4s)$ . See *ACOPIC*.

**ACOR** (Lat.), n. m.  $A^2(a^3k)\text{-}o\text{-}ra(r^3)/se(ke^2)\text{-}e(a^3\text{-}e^2)$ . Gr., *ἀκώρυς*. A sour taste; sourness; an acid. [A, 312].—**A. aceticus**. Glacial acetic acid. [A, 316].—**A. aceticus crystallinus**. Glacial acetic acid. [B, 101].—**A. benzoïnus**. Benzoic acid. [B, 97].—**A. boracicus**. Boric acid. [B, 97].—**A. hydrochlorïnus**. Hydrochloric acid. [B, 101].—**A. phosphoricus**. Phosphoric acid. [B, 101].—**A. prussicus**. Hydrocyanic acid. [B, 101].—**A. succineus, A. succineus**. Succinic acid. [B, 92, 97].—**A. sulphuris**. Sulphuric acid. [B, 92, 97].—**A. sulphuris condensatus, A. sulphuris merus**. Purified and concentrated sulphuric acid. [B, 97].—**A. tartaricus**. Tartaric acid. [B, 97].—**A. ventriculi**. Acidity of the stomach. [A, 322.]

**ACORACEÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\text{-}o\text{-}ra(r^3)/se(ke^2)\text{-}e(a^3\text{-}e^2)$ . Fr., *acoracées*. See *AROIDEÆ*.

**ACORDINA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o^2rd^2i^2n\text{-}a^3$ . Indian tutty, an argillaceous zinc ore found in Persia. [A, 343.]

**ACORE** (Fr.), n.  $A^3\text{-}kor$ . A flag, or reed. See *ACORUS*.—**A. bâtarde, A. faux**. See *Iris pseudacorus*.—**A. odorant, A. roseau, A. vrai** [Fr. Cod.]. The sweet-flag. [B.] See *ACORUS calamus*.—**Alcoolat d'a., Esprit d'a.** A preparation made by macerating 1 part of sweet-flag in 8 parts of 80-per-cent. alcohol for four days, and distilling. [B, 97].—**Rhizome d'a. vrai** [Fr. Cod.]. The rhizome of the sweet-flag. [B.] See *CALAMUS*.

**ACOREA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o\text{-}re(r^3)/a^3$ . From a priv., and *κωρη*, the pupil. Fr., *acorie*. Absence of the pupil of the eye. [A, 314.]

**ACOREÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\text{-}o\text{-}re(r^3)\text{-}e(a^3\text{-}e^2)$ . A tribe of plants of the order *Araceæ* the representative genus of which is *Acorus*. [B.]

**ACORES** (Lat.), n. m., pl. of *acor* (q. v.).  $A^2k(a^3k)\text{-}o\text{-}rez(re^2s)$ . See *ACOR*.

**ACORIA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o\text{-}ri^2\text{-}a^3$ . Gr., *ἀκωρία* (from a priv. [1st def.] or intens. [2d def.], and *κωρος*, satiety). Fr., *acorie*. Ger., *Akorie*. Sp., *acoria*. 1. Moderation in eating. [Hippocrates (A, 311).] 2. An insatiable desire to drink. [Aretæus (A, 311).] Insatiable hunger. [A, 348.]

**ACORIN**, n.  $A^2k\text{-}o\text{-}ri^2n$ . Fr., *acorine*. Ger., *Acorin*. It., *acorina*. A bitter principle found in the sweet-flag (*Acorus calamus*); a brownish-yellow mass soluble in alcohol and in ether. [B, 10.]

**ACORINÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\text{-}o\text{-}ri(re)/ne(na^3\text{-}e^2)$ . Fr., *acorinées*. See *AROIDEÆ*.

**ACORINÉ** (Fr.), adj.  $A^3\text{-}ko\text{-}re\text{-}na$ . Resembling the *Acorus*. [A, 306.]

**ACORINÉES, ACORINES** (Fr.), n's pl.  $A^3\text{-}ko\text{-}re\text{-}na$ ,  $\text{-}ren$ . The *Acorinæ*. See *AROIDEÆ*.

**ACORITES** (Lat.), n. m.  $A^2k(a^3k)\text{-}o\text{-}ri(re)/tez(te^2s)$ . Gr., *ἀκωρίτης*. Ger., *Calmuswein*. Wine flavored with sweet-flag (*Acorus calamus*). [Dioscorides (A, 311).] An old preparation made by infusing for six months 8 oz., each, of sweet-flag and licorice roots in 6 gallons of wine. [A, 336.]

**ACORMOSUS** (Lat.), adj.  $A^2k(a^3k)\text{-}o^2rm\text{-}o\text{-}su^2s(su^4s)$ . Acormous. [A, 322.]

**ACORMOUS**, adj.  $A^2k\text{-}o^2rm\text{-}u^2s$ . Lat., *acormus, acormosus* (from a priv., and *κωμος*, the trunk of a tree). Fr., *acorme, acormose*. Ger., *stammlos, stiellos*. Sp., *acórmoso*. In botany, having no stem.

**ACORMUS** (Lat.), adj. and n. m.  $A^2k(a^3k)\text{-}o^2rm\text{-}u^2s(u^4s)$ . 1. (Adj.) acormous. 2. (N.) an acardiac monster (see *ACARDIACUS*) consisting of an imperfectly developed head and a rudimentary trunk, the umbilical cord being inserted in the cervical region.

**ACORN**, n.  $A^2ko^2rn$ . A-S., *æcern, æceren*. Goth., *akarn*. [A, 302]. Gr., *ἀκόν*. Lat., *glans*. Fr., *gland*. Ger., *Eichel*. It., *ghlanda*. Sp., *bellota*. The nut of the oak-tree; conoid in shape, covered with a brown, smooth, coriaceous envelope, and imbedded below in a scaly cupule. It has but one cell and one seed. It contains the bitter principle of the bark (quercin), tannic acid, and a peculiar sugar called quercetin. A's have been used as food and as medicine. [B, 5].—**A. coffæ**. Fr., *café de gland*. An infusion of a's, with lemon and orange peel; used in the diarrhœa of children. [A, 316].—**Jupiter's a.** The fruit of *Fagus castanea*. [A, 316].—**Only a.** The fruit of *Guilandina moringa*. [A, 316].—**Sardinian a.** The chestnut. [A, 316].—**Sweet a.** The fruit of *Quercus bal-lota*. [A, 252.]

**ACORNA** (Lat.), n. f.  $A^2k(a^3k)\text{-}o^2rn\text{-}a^3$ . See *ACARNA*.

**ACOROID**, adj.  $A^2k\text{-}o\text{-}roid$ . In botany, resembling the *Acorus*.

**ACOROIDEÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\text{-}o\text{-}ro\text{-}i^2d(e^2)\text{-}e(a^3\text{-}e^2)$ . Fr., *acoroïdées*. Sp., *acoroideas*. See *AROIDEÆ*.

**ACORON, ACOROS** (Lat.), n's n. and f.  $A^2k(a^3k)\text{-}o\text{-}ro^2n\text{-}, \text{-}ro^2s$ . See *ACORUM* and *ACORUS*.

**ACORUM** (Lat.), n. n.  $A^2k(a^3k)\text{-}o\text{-}ru^2m(ru^4m)$ . Gr., *ἀκωρον*. The root of the sweet-flag. [Dioscorides (A, 311).] See *ACORUS*.

**ACORUS** (Lat.), n. f.  $A^2k(a^3k)\text{-}o\text{-}ru^2s(ru^4s)$ . Gr., *ἀκωρος* (said to be from a priv., and *κωρη*, the pupil of the eye, because it was anciently supposed to be useful in eye diseases). Fr., *acore*. Ger., *Calmus*. Sp., *ácoro*. A genus of perennial herbs of the natural order *Aroideæ*, distinguished by the presence of a naked cylindrical spadix originating laterally from a leaf-like scape. [B, 31.] Although the word is fem., it is treated by botanists as masc., as will be seen by the species-names.—**A. adulterinus**. See *Iris pseudacorus*.—**A. aromaticus**. See *A. adularius*.—**A. asiaticus**. See *A. indicus*.—**A. brasiliensis**. See *A. calamus*.—**A. calamus** [Linnæus]. Fr., *acore vrai* (ou odorant, ou roseau), *roseau* (ou canne) *aromatique, jonc odorant, iris jaune, lis de marais, poivre des abeilles*. Ger., *Calmus* [Ger. Ph.], *Kalmus, Ackermann, Ackermurz*. It., *calamo aromatico*. Sp., *ácoro verdadero, cilamo aro-*

médico, caña aromática, pimienta de las abejas. Syn.: *Calamus aromaticus*. The sweet-flag; a species growing throughout the United States and in Europe, the thick, running rhizome of which is employed in medicine as an aromatic and carminative. [B. 5.] See CALAMUS. In Turkey the root is candied and used as a preservative against infectious diseases. [Coxe (A, 344).]—*A. falsus*. Fr., *acore bâtard* (ou faux). See *Iris pseudacorus*.—*A. gramineus*, *A. indicus*. Syn.: *A. asiaticus*, *radix sanley* (see *sanley*). Species (perhaps identical) indigenous to India, China, and Japan, the root-stock of which is much thinner than that of *A. calamus*, but more aromatic. [A. 322, H. Baillon (A, 328).]—*A. odoratus*. See *A. calamus*.—*A. palustris*. See *Iris pseudacorus*.—*A. terrestris*. A species used by the Chinese as a tonic, stimulant, anti-spasmodic, etc. [A. 321.]—*A. verus*. Fr., *a-vérus*, *grand galanga*. Ger., *grosse Galangal-Wurzel*. See *A. calamus*.—*A. vulgaris*. See *Iris pseudacorus*.—*Radix acori*. The rhizome of *A. calamus*; sweet-flag. [B.]

ACORUS CALAMUS. [A, 260.]

The small figure shows the portion of inflorescence.

**ACOS** (Lat.), n. m. A(a³)/ko's. Gen., *aceos*. Gr., *ἄκος*. A remedy. [A, 311.]

**ACOSMIA** (Lat.), n. f. A²k(a³k)-o-z(o²s)/mi²-a³. Gr., *ἀκοσμία* (from *a* priv., and *κόσμος*, order, ornament). Fr., *acosmie*. Ger., *Akosmie*. Sp., *acosmia*. 1. Disorder or irregularity, especially of the critical days of a disease. [A, 306.] 2. Ataxia. [A, 322.] 3. Any deformity affecting the regularity of the features. [F. W. Heydenreich (A, 322).] 4. An old term for baldness (bald persons being called *ἀκοσμοί*, because deprived of their chief ornament). [G, 16.]

**ACOSMUS** (Lat.), adj. A²k(a³k)-o-z(o²s)/mu³s(mu⁴s). Gr., *ἀκοσμος*. Fr., *acosme*. Affected with acosmia (q. v.).

**ACOSMY**, n. A²k-o-z/mi². See ACOSMIA.

**ACOSTE** (Lat.), n. f. A²k(a³k)-o-s/te(ta). Gr., *ἀκοστή*. An ancient name for barley. [Nicander (A, 311).]

**ACOTYLÉ** (Fr.), adj. A³-ko²t-i²l-a. Acotyledonous. [A, 301.]

**ACOTYLEDON**, n. A²k-o²t-i²l-e-d'o²n. Lat., *acotyledo* (from *a* priv., and *κωτυλῶν*, a cup-like depression). Fr., *acotylédone*. Ger., *Acotyledon*. An acotyledonous plant; a cryptogam. [B.] See ACOTYLEDONEÆ.

**ACOTYLÉDONE** (Fr.), adj. A³-ko²t-i²l-a-don. Acotyledonous.

**ACOTYLEDONEÆ** (Lat.), n. f. pl. A²k(a³k)-o-ti²l(tu²l)-e²d-o-n'e-ne²)-e(a²-e²). Fr., *acotylédones*. Ger., *Acotyledonen*. The acotyledonous plants (acotyledons); A. L. Jussieu's name for one of the three great divisions of the vegetable kingdom, consisting of the single class *Acotylédonie*, i. e., the cryptogams. [B, 38.]

**ACOTYLEDONIA** (Lat.), n. f. A²k(a³k)-o-ti²l(tu²l)-e²d-o-ni²-a³. Fr., *acotylédonie*. [B, 1.] A. L. Jussieu's term for the state of being destitute of cotyledons (said of plants). [A, 306, 321.]

**ACOTYLEDONIE** (Fr.), n. A³-ko²t-i²l-a-do-ne. 1. Acotyledonia (q. v.). 2. In Jussieu's classification of plants, a class forming the whole of the grand division *Acotyledoneæ*, or cryptogams. [B, 38.]

**ACOTYLEDONOUS**, adj. A²k-o²t-i²l-e²d/o²n-u³s. Lat., *acotyledonous*. Fr., *acotylédone*, *acotylédoné*. Ger., *nacktheimend*, *samenlappenlos*. Destitute of cotyledons; a term often applied to the cryptogams. [B.]

**ACOTYLEDONS**, n. pl. A²k-o-ti²l-e²d'o²nz. See ACOTYLEDONEÆ.

**ACOTYLOPHOROUS**, adj. A²k-o²t-i²l-o²f/o-ru³s. Fr., *acotyléphore*. Sp., *acotilóforo*. Destitute of suckers (said of a family of worms). [A, 306.]

**ACOTYLOUS**, adj. A²k-o²t/i²l-u³s. Fr., *acotyle*. Sp., *acotilo*. In zoology, destitute of vertebrae, and having neither a central mouth nor lateral cavities. [A, 306.]

**ACOUCHI BALSAM**, n. Ger., *Acuchibalsam*. A balsam or resin consisting of the inspissated juice of *Icica heterophylla*. [A, 252.]

**ACOUCROBA**, n. A Guinea plant which, boiled in wine, is esteemed by the natives as a remedy for small-pox. [A, 344.]

**ACOUEÐIN** (Fr.), adj. A³-ku-a-da²n². Curative of deafness. [A, 306.] See *Eau acouéine*.

**ACOUSTICUS** (Lat.), adj. A²k(a³k)-u-i²st/i²k-u³s(u⁴s). A false spelling of *acousticus*. [A, 322.] See *Acoustic*.

**ACOULIARANNE**, n. The Arabic name for the *Euphorbia capitata*. [A, 344.]

**ACOMETER**, n. A²k-u-me²t-u⁵r. Lat., *acoumetrum* (from *ἀκούειν*, to hear, and *μέτρον*, a measure). Fr., *acoumètre*. Ger., *Akometer*, *Akoumeter*, *Gehörmesser*. It., *acumetro*, *misuratore dell' udito*. Sp., *acometro*. An instrument originally devised by Wolke and Itard for measuring the acuteness of hearing. Politzer's a., the most recent, consists of a horizontal steel cylinder, 28 mm. long and 4.5 mm. thick, connected by means of a tightly fitting screw with a vertical vulcanite column. Above the place of attachment of the cylinder, a percussion hammer, which can be turned round its axis, is fastened in an oval orifice of the vulcanite column, and produces the tone by falling on the steel cylinder. As the intensity of the sound depends on the height from which the hammer falls, in order to produce in all instruments an equal height, a small piece of vulcanite, furnished with a soft-rubber plate, is fixed at the posterior periphery of the column as a check, on which the posterior (short) arm of the hammer is pressed. At either end of the column there is a flat semicircle, for grasping the instrument with two fingers. Below the upper semicircle, parallel with the axis of the percussion hammer, there is a ring on the vulcanite column, into which a pin, to which a round metal plate is attached, can be inserted. This is for testing the conduction of the cranial bones, by bringing the metal plate into contact with the temple or with the mastoid process, while the meatuses are closed. [F.]

POLITZER'S ACOMETER.

**ACOMETRY**, n. A²k-u-me²t-ri². Measurement of the acuteness of hearing.

**ACOMETER**, n. A²k-u-o²m-e²t-u⁵r. See ACOMETER.

**ACOUPHONIA** (Lat.), n. f. A²k(a³k)-u-o-fon/i²-a³. From *ἀκούειν*, to hear, and *φωνή*, sound. See *Auscultatory PERCUSSION*.

**ACOUXYLON** (Lat.), n. n. A²k(a³k)-u-o²x/i²l(u⁶l)-o²n. From *ἀκούειν*, to hear, and *ξύλον*, wood. Ger., *Hörholz*. It., *acouzion*. A stethoscope devised by P. Niemeyer, being a simple solid cylinder of well-seasoned pine. [A, 314.]

**ACOUPHONIA** (Lat.), n. f. See ACOUPHONIA.

**ACOUROA**, n. Fr., *dartrier*. A Guiana tree, the seeds of which, beaten up with lard, are used as a remedy for skin diseases, especially the darts. [A, 306.]

**ACOUSIA** (Lat.), n. f. A²k(a³k)-u-zi²(si²)-a³. Gr., *ἀκουσία*. Involuntary action. [Sophocles (A, 311).]

**ACOUSMA** (Lat.), n. n. A²k(a³k)-uz(us)/ma³. Gr., *ἄκουσμα*, anything heard. Fr., *acousmate*. A depraved condition of the hearing in which imaginary sounds are heard. [F.]

**ACOUSMETRIC**, **ACOUSMOMETRIC**, adj's. Fr., *acousmétrique*, *acousmométrique*. Relating to the sense of hearing or to the power of perceiving the relative distance of sounds. [Récamier (A, 306, 316).]

**ACOUSTIC**, adj. A²k-ust/i²k. Gr., *ἀκουστικός*. Lat., *acousticus*. Fr., *acoustique*. Ger., *akustisch*. It., *acustico*. Sp., *acústico*. Syn.: *auditory*. 1. Relating to sound or to hearing. 2. Having the effect of improving the hearing (said of mechanical appliances and formerly of drugs). [A, 306.] See *A. CENTRE*, *A. DUCT*, *A. FOCUS*, *A. NERVE*, and *A. PICTURE*.

**ACUSTICA** (Lat.), n. n. pl. A²k(a³k)-ust/i²k-a³. Remedies for deafness. [A, 316.]

**ACOUTICIAN**, n. A²k-ust/i²sh/a²n. An investigator of acoustics. [A, 258.]

**ACUSTICO-MALLEUS** (Lat.), n. m. A²k(a³k)-ust/i²k-o-ma²(ma³l)-le-(la³e²)-u³s(u⁴s). Fr., *acoustico-malleus*. Ger., *grosser Erschlaffer des Paukenfelles*. Chaussier's name for a small, indistinct muscle extending from the bony groove which receives the membrana tympani to the handle of the malleus. [A, 320.]

**ACUSTICS**, n. A²k-ust/i²ks. Fr., *acoustique*. Ger., *Akustik*, *Schalllehre*, *Gehörkunde*. It., *acustica*. Sp., *acústica*. The science of sound, or of hearing, including diacoustics and catacoustics (q. v.). [B, F.]

**ACQUA** (It.), n. A³k/kwa³. Water; in pharmacy, a distilled water. [B.]—*A. acetosa*. The name of three springs in Italy: 1. An alkaline chalybeate spring near Rome, containing sodium chloride and sulphate, calcium sulphate and carbonate, iron oxide, and a large amount of carbonic acid; used as an aperient tonic and in mucous diarrhoea. 2. An alkaline chalybeate spring near Baccano, not far from the Lago Bracciano, containing free carbonic acid; used in anæmia. 3. A carbonated alkaline saline spring near Capronica. [A, 316.]—*A. acidola*. An alkaline chalybeate spring in Italy, near the baths of Montolceto, of the temperature of 22° C.

(71° F.), containing calcium, magnesium, and iron carbonates, carbonic acid, and traces of hydrogen sulphide. [A. 316.]—**A. acidula**. 1. Carbonic-acid water. [A. 314.] 2. A cold ferruginous spring in Italy, near Viterbo; used for anaemia and debility. [A. 321.]—**A. acustica** di Ludwig. See *Aqua acustica Ludovici*.—**A. aereata**. Carbonic-acid water. [A. 314.]—**A. aereata ossigenata**. Water charged with nitrogen monoxide (laughing gas). [A. 352.]—**A. africana**. See *A. d'Egitto*.—**A. Albule**. A cold spring in Italy, near Tivoli, containing calcium bicarbonate and sulphate and an abundance of carbonic acid; the water is drunk and used as baths for urinary and cutaneous affections and inveterate syphilis. [A. 321.]—**A. albuminosa**. See *Eau albumineuse*.—**A. alcalina gazosa**. See *Aqua alcalina effervescens*.—**A. alle gambe**. Grease (a disease of horses). [A. 314.] See *Eaux aux jambes*.—**A. alle gambe vaccinee**. Horse-pox. [A. 314.]—**A. aluminosa**. A solution of 1 part of alum in 100 parts of water. [A. 314.]—**A. aluminosa composta**. A solution of 30 parts, each, of alum and sulphate of iron in 1,500 of water. [A. 314.]—**A. alluminosa** di Fallopio. See *Aluminous solution of Fallopius*.—**A. amara**. 1. Bitter water. [A. 314.] See *FRIEDRICHSHALL*. 2. A mixture made by adding 5 parts, each, of solution of ammonium carbonate and dilute sulphuric acid to a solution of 120 of magnesium sulphate in 480 of water. [A. 352.]—**A. angelica**. A mild purgative consisting of 8 parts of potassium bitartrate, 60 of manna, 250 of water, and 15 of lemon-juice, clarified with white of egg, and with the addition of a little orange-peel. [A. 314.]—**A. anhaltina**. See *Aqua anhaltina*.—**A. anodina** di Praga. 1. Aqua pragensis. 2. A liniment of 180 parts of alcoholic ammonia, 30 of essence of saffron, and 2 of oil of lavender; used for rheumatic pains. [A. 314.]—**A. antihemorragica**. A clear liquid, of an unpleasant smell and a spirituous, styptic taste, made by distilling a mixture of mint, dittany, *Iris florentina*, rue, and lettuce, each, 7 parts, turpentine 100, and white wine 650, until three quarters of the amount are obtained; used internally and locally in the late stages of hemorrhæa. [A. 314.]—**A. antiepileptica** di Langio. See *Aqua epileptica Langii*.—**A. antierpetica** di Luynes. See *A. del Cardinale di Luynes*.—**A. antiottalmica** di Loche. A lotion for chronic ophthalmia, epiphora, etc.; a mixture of 96 parts, each, of melilotus-water and distilled water, 4 of alcohol, 1, each, of alum and sulphate of zinc, and 0.60 of tincture of aloes. [A. 314, 352.]—**A. antipediculare** di Cadet. A mixture of 70 parts of rose-water and 10 of *a. mercuriale* (q. v.); used for killing lice. [A. 314.]—**A. antipetstilenziale della scala**. A limpid, reddish liquid, of a pleasant smell and an acrid and bitter taste, used for weakness of digestion and as a preservative against infectious diseases; containing 3 handfuls, each, of rosemary, spikenard, rue, mint, absinthium, and horseradish, 60 grammes of angelica root, 120 of zedoary, 3,200 of alcohol, and (added after distillation) 160 of red sandal wood, 40 of camphor, and 32 of hard Peruvian balsam. [A. 314.]—**A. antipsorica** di Ranque. A lotion consisting of extract of poppy dissolved in decoction of stavesacre. [A. 314.]—**A. antiputrida** di Beaufort. A mineral lemonade made with sulphuric acid. [A. 314.]—**A. antisterica**. A mixture of 2 parts of essence of mint, 1 part of essence of tansy, and 288 parts of dilute alcohol, with the addition, after distillation, of a few drops of essence of cedar, tincture of vanilla, and essence of peppermint. [A. 352.]—**A. antisterica con castoreo**. A mixture made by distilling 16 parts of castoreum, 4 of lavender flowers, 3 of cinnamon, 2, each, of sage and rosemary, and 1, each, of mace and cloves in 250 of alcohol. [A. 352.] Cf. *Aqua anti-hysterica cum castoreo*.—**A. antisterica di Poterie**. A milky, aromatic, bitter liquid made from 107 grammes of valerian root, 3 handfuls, each, of absinthium, mint, and marjoram, 6,500 grammes of white wine, 27, each, of galanga, ginger, long pepper, opium, and camphor, and 2,000 of alcohol; used in hysteria, hypochondriasis, etc. [A. 314.]—**A. antisterica di S. Maria Novella**. See *Aqua melissæ composita*.—**A. antisterica fetida**. See *Aqua fetida pragensis*.—**A. ardente**. Brandy.—**A. argenta**. Mercury. [A. 314.]—**A. argentina**. A solution of silver in nitric acid, and one of potassium cyanide in water; used, mixed with powdered chalk, for rapid silver-plating. [A. 314.]—**A. aromatica**. A. *aromatica spiritosa*. See *Aqua melissæ composita*.—**A. arsenicale antipediculare**. A mixture of 100 grammes of arsenious acid, 2 kilogrammes of green soap, and 15 litres of water; applied to sheep to kill lice. [Clater. A. 314.]—**A. arzenite**. Alcohol. [A. 352.]—**A. benedetta della carità**. A solution of 0.30 gramme of tartar emetic in 276 grammes of water; taken in two doses for the relief of lead colic. [A. 314.]—**A. benedetta di Ruland**. Wine of antimony. [A. 314.]—**A. bianca**. See *Liquor plumbi subacetatis dilutus*.—**A. Bolle**. A cold carbonated alkaline chalybeate spring on the Lanzo, in Tuscany; used in urinary concretions. [A. 316.]—**A. Buja**. A disused spring near Pietramala, in Italy, which dries up in summer. The water is agitated by a continual disengagement of hydrogen. [A. 344.]—**A. cefalica**. See *Aqua melissæ composita*.—**A. celeste**. See *Aqua celestis*.—**A. chinense**. See *A. d'Egitto*.—**A. cotta**. 1. A hot spring near Ascoli, in Italy, containing sulphur and sodium chloride; used in diseases of the skin and scrofula. 2. A colder spring, near Voltri, containing sodium sulphide; used in the same diseases. [A. 321.]—**A. d'Alibour**. See *COLLIERIO di Saint-Jermernon*.—**A. d'Anhalt**. See *Aqua anhaltina*.—**A. d'Armagnac**. See *A. di Bonferme*.—**A. d'Egitto**. A solution of silver nitrate, used for dyeing the hair. [A. 314.]—**A. degli Inglesi**. See *Aqua natro-effervescens*.—**A. del Carmelitani**. See *Aqua melissæ composita*.—**A. del metalli**. Mercury. [A. 314.]—**A. del Cardinale di Luynes**. A mixture of 250 grammes of rose-water, 6 of corrosive sublimate, 15 of carbonate of lead, and 12 of alum, with the white of an egg; used as an application for herpes. [A. 314.]—**A. del Landini**. See *ALCOOLATURE vulnéraire*.—**A. della regina d'Ungheria**. A preparation made by distilling 1 part of fresh rosemary and 2 parts of 32-per-cent. alcohol. [A. 314.]—**A. delle archibugiate**. See *ALCOOLATURE vulnéraire*.—**A. del Pagliari**. See *A. di Pagliari*.—**A. del Quercetano**. So called from the Latinized name of Duchesne. [a. 6.] A liquid obtained

by distilling over a sand-bath a mixture of the juices of garlic, radishes, onions, parietaria, and cedar; formerly esteemed in the treatment of lithiasis. [A. 314.]—**A. dentifricia**. A tonic dentifrice containing 50 parts of tincture of cinchona, 10 of tincture of catechu, 30 of spirit of cochlearia, 10 of sodium hypochlorite, and 2 of essence of cloves. [A. 314.]—**A. di archibugiate**. See *ALCOOLATURE vulnéraire*.—**A. di Beloste**. An old solvent preparation made of equal parts of hydrochloric acid, brandy, and saffron, with or without the addition of water. [A. 314.]—**A. di Binelli**. A hæmostatic, supposed to be a solution of creasote. [A. 314.]—**A. di bolo**. A liquid obtained by shaking a bolus of tartrate of iron and potassium in water; used as a wash for wounds and contusions. [A. 314.]—**A. di Bonferme**. Syn.: *tintura aromatica, essenza cefalica*. A preparation made by digesting 16 parts, each, of nutmeg and cloves, and 12, each, of cinnamon and broom flowers in 276 of alcohol for eight days at 85° C. (185° F.), expressing, and filtering. [A. 314.]—**A. di Botot**. See *Eau dentifrice de Botot*.—**A. di Clauder**. See *A. di FULIGINE composta*.—**A. di Colonia**. Cologne water. [A. 352.] See *SPIRITUS odoratus*.—**A. di Condillac**. See *CONDILLAC*.—**A. di Dardel**. An imitation of the *a. di melissa*. [A. 314.] See *Aqua melissæ composita*.—**A. d'idratazione**. See *WATER of hydration*.—**A. di Falconieri**. A solution of potassium carbonate; reputed to be an antilithic. [A. 314.]—**A. di Fra Ilarione**. See *ALCOOLATURE vulnéraire*.—**A. di Giambattista la Porta**. A tonic mouth-wash containing a great number of ingredients; a red liquid, of an aromatic odor and bitterish taste. [A. 314.]—**A. di giovinezza**. Water of youth; a liquid credited with the power of renewing youth. [A. 314.]—**A. di Goudran**. A mixture of 4 grammes of petroleum and 120 of hydrochloric acid; to be added to the water of a partial bath in the treatment of rheumatism. [A. 314.]—**A. di Goulard**. See *Liquor PLUMBI SUBACETATIS dilutus*.—**A. di Guerlain**. A lotion containing corrosive sublimate, cherry-laurel water, lead water, tincture of benzoin, and alcohol. [A. 314.]—**A. di Hepp**. A slight modification of the *a. di Pagliari* (q. v.). [A. 314.]—**A. di Husson**. See *Eau médicinale d'Husson*.—**A. di Javelle**. See *Javelle water*.—**A. di Labarraque**. See *Liquor sodæ chloratæ*.—**A. di lavanda**. 1. A cosmetic mixture of essence of lavender, 60 parts; tincture of amber, 30; cologne water, 500; and alcohol, 1,000. [A. 314.] 2. A distilled water of lavender-tops. [B. 10.]—**A. di Léchelle**. See *Eau de Léchelle*.—**A. di magnanimità**. See *Aqua magnanimitatis simplex*.—**A. di mare**. Sea-water. [A. 314.]—**A. di Marte**. See *A. di bolo*.—**A. di Mettemberg**. A solution of 180 grammes of corrosive sublimate in 320 grammes of distilled water, with the addition of 60 of *alcoolature vulnéraire* (q. v.) and 180 of nitric ether; used against the itch. [A. 314.]—**A. di Monsel**. See *Monsel's solution*.—**A. di Monterossi**. See *A. stagnatica di Monterossi*.—**A. di Napoli**. See *A. tofana*.—**A. di Neljubin**. See *Eau hémotatique de Neljubin*.—**A. di Pagliari**. A styptic made by boiling 8 parts of benzoin and 16 of alum in 160 of water for six hours. [A. 314.]—**A. di Perugia**. See *A. tofana*.—**A. di Praga**. See *Aqua fetida pragensis*.—**A. di Prassvini**. A watery solution of tartrate of potassium and mercury. [A. 314.]—**A. di Proserpina**. See *A. d'Egitto*.—**A. di Rabel**. Rabel water. [B.] See *MIXTURE sulfurica acida*.—**A. di Renaison**. See *RENAISON*.—**A. di Royer**. A hæmostatic containing 30 parts of oil of tar, 1,000 of peppermint-water, and 4,000 of distilled water. [A. 314.]—**A. di Ruland benedetta**. See *Aqua benedicta Rulandi*.—**A. di San Giovanni**. An aqueous solution of copper and zinc sulphates, with the addition of camphorated spirit and tincture of saffron. [A. 314.]—**A. di San Nicola alla Dogana**. An anthelmintic consisting of mint-water with enough nitric acid to give it a pleasant sour taste. [A. 314.]—**A. di Schultz**. A hæmostatic containing 8 grammes of empyreumatic oil of tobacco, 12 drops of Dippel's animal oil, and 250 grammes of distilled water. [A. 314.]—**A. di Sedlitz artificiale**. See *Eau saline purgative*.—**A. di Seltz artificiale**. See *Eau de Seltz artificielle*.—**A. di Smith**. See *A. di lavanda*.—**A. dissolvante**. An old term for nitric acid. [A. 314.]—**A. distillata**. Distilled water; in pharmacy, a distilled water. [B.]—**A. di Theden**. See *Aqua traumatica vegeto-mineralis Thedeni*.—**A. di Tisserand**. See *Eau hémotatique de Tisserand*.—**A. di Trevez**. See *A. fondente di Trevez*.—**A. di Villate**. A turbid astringent and escharotic mixture of 51 parts, each, of copper and zinc sulphates, 798 of vinegar, and 100 of liquor plumbi subacetatis. [A. 352.]—**A. divina**. See *COLLYRE de sels fondus*.—**A. di violette**. An alcoholic preparation distilled from the *Iris florentina*; so called from its odor of violets. [A. 314.]—**A. di vipere**. An old remedy for scurvy; made by distilling a mixture of becabunga, nasturtium, skinned vipers, and water. [A. 314.]—**A. dolce**. Soft water. [B.]—**A. dura**. Hard water. [B.]—**A. epatica**. Brugnatelli's variety of the *aqua hepatica* (q. v., under *AQUA*). [A. 314.]—**A. essenziale**. An essential water; a preparation made by distilling a succulent plant without the addition of water. [B. 10.]—**A. eterica**. A mixture of 1 part of sulphuric ether and 10 parts of distilled water; used as an antispasmodic. [A. 314.]—**A. eterica canforata**. A mixture of 1 part of camphor in 3 parts of sulphuric ether, with the addition of 56 of water. [A. 314.]—**A. etiolopica**. See *A. d'Egitto*.—**A. fagedenica**. A. *fagedenica gialla*. A. *fagedenica nera*. See *Lotio HYDRARGYRI flava* and *Lotio HYDRARGYRI nigra*.—**A. ferruginosa gazosa**. See *Eau ferrée gazeuse*.—**A. fondente di Trevez**. A solution of 30 grammes of crystallized sodium sulphate, 120 of potassium acetate, 0.90 of potassium nitrate, and 0.08 of tartarized antimony in a kilogramme of water. [A. 314.]—**A. forte**. Nitric acid. [A. 352.]—**A. gazosa semplice**. See *Aqua acidula simplicior*.—**A. gengivale**. See *Aqua ad gingivas*.—**A. greca**. See *A. d'Egitto*.—**A. idrosolforata**. Hydrosulphureted water; water charged with hydrogen sulphide. [B.]—**A. igienica**. Hygienic water; a solution of 15 grammes of alum, 1 gramme of sulphate of iron, and 1 of sulphate of copper in a litre of water, with the addition of some aromatic; used as an injection for leucorrhœa and metrorrhagia. [A. 314.]—**A. igienica di Memphis**. See *Eau de Léchelle*.—**A. imperiale**. A mixture of 10 parts of tartrate of potassium and

boron (soluble cream tartar), 375 of water, 15 of syrup, and 5 of essence of lemon. [A, 314].—**A. iodo-ferrata**. A mixture of 15 grammes of tincture of iodine and 0.05 gramme of tannin, to which are added 250 of distilled water and 4 of ammonio-ferric or potassio-ferric tartrate; used as a substitute for iodide of iron. [A, 314].—**A. lanfa**. Orange-flower water. [A, 352].—**A. lassativa di Vienna**. See *INFUSUM laxativum viennense*.—**A. madre**. See *Mother liquor*.—**A. magnesiac**.—**A. magnesiac aerata**. See *Eau magnésienne*.—**A. marina**. Sea-water. [B].—**A. mercuriale**. Mercury-water; water that has been boiled for two hours with half its weight of mercury. [B, 10].—**A. mercuriale calcare**. See *Aqua phagedanica*.—**A. miele**. See *AGUMIEL*.—**A. mulsa**. See *HYDROMEL*.—**A. nanfa**. Orange-flower water. [B].—**A. nanna**. See *A. tofana*.—**A. odontalgica O'Meara**. A tincture made with 4 grammes of *Trilicium repens*, 15 of pyrethrum, 30 of cloves, 0.60, each, of iris, coriander, anchusa, and essence of mint, 0.30, each, of essence of bergamot and essence of cedar, 160 of creasote, and 60 of 90-per-cent. alcohol. [A, 314].—**A. oftalmica di Yvel**. A collyrium made by digesting 8 parts of zinc sulphate, 3 of copper sulphate, and 9, each, of saffron and camphor in 1,000 of water. [A, 314].—**A. ossigenata**. 1. Hydrogen peroxide. 2. A name formerly applied to a preparation of nitric acid used in the treatment of syphilis. [A, 314].—**A. ozonizzante**. See *Eau ozonisante*.—**A. panata**. See *Toast-water*.—**A. per la bocca**. Compound spirit of pyrethrum. [A].—**A. picea**. Tar-water.—**A. plumbica**. See *Liquor PLUMBI SUBACETATIS dilutus*.—**A. prima**. A name given by Albertus Magnus to nitric acid. [A, 314].—**A. purgativa salina**. See *Eau saline purgative*.—**A. putrillica**. See *A. saturnina*.—**A. puzzolente**. A saline, sulphurous spring in Italy, near Livorno; used in scabies, herpes, psoriasis, and rheumatism. [A, 316].—**A. ragia**. Oil of turpentine. [A, 352].—**A. Raineriana**. A warm sulphurous spring in Venetia, Italy, near the Lake of Arqua; used in skin diseases, scrofula, and digestive torpor. [A, 316].—**A. regia**. Nitrohydrochloric acid. [A, 314].—**A. romana**. See *ALCOOLATURE vulnéraire*.—**A. rossa dell' Ospedale di S. Luigi**. See *Eau rouge d'Aliberti*.—**A. salina acidula**. See *Eau acidule saline*.—**A. sans pareille**. See *Eau sans pareille*.—**A. Sauta**. 1. A mineral spring near Ascoli, Italy, containing sodium sulphide; used internally and in the form of baths for scrofulous diseases of the glands and joints. [A, 316]. 2. A hot spring, containing sulphur and lime, near Voltri, in Piedmont; used in the form of baths for herpetic eruptions and scrofula. [A, 316].—**A. Santa di Buhyuto**. A spring of cold carbonated bitter water, springing from limestone, near Palermo, Sicily; purgative. [A, 316].—**A. 1-to-49 solution of subacetate of lead in distilled water**. [A, 352].—**A. scolopetaria**. See *Aqua vulneraria*.—**A. scolopetaria spiritosa**. See *SPIRITUS vulnerarius*.—**A. sedativa**.—**A. sedativa di Raspall**.—**A. sedativa fortissima**.—**A. sedativa media**. See *Eau sédative de Raspall*.—**A. senza pari**. See *Eau sans pareille*.—**A. solica**. See *Aqua alcalina effervescente*.—**A. solforata**. See *Eau sulfurée*.—**A. spiritosa**. See *ALCOOLAT*.—**A. stagnonica di Montecossi**. A hæmostatic water distilled from various aromatic and astringent plants, with the addition of pitch and white agaric. [A, 314].—**A. stitica clementina**. 150 parts, each, of sodium chloride and potassium subcarbonate and 100 of cream tartar are dissolved in a mixture of the fresh juices of 150, each, of betonica, *Achillea millefolium*, origanum, pimpinella, *Sanicula europæa*, *Sedum telephium*, and verberna, and 75 of *Teucrium marum*; a mixture of 37 of socotrine aloes and 300 of dilute acetic acid is added, and the whole is macerated for three days in a sealed retort, and then distilled; the residue is dried, powdered, and macerated for three days in the liquid obtained by distillation; this process is then repeated twice more, and the liquid obtained by the third distillation is preserved in a well-stoppered bottle. [A, 352].—**A. stitica di Loff**. A watery solution of perchloride of iron. [A, 314].—**A. teriacale**. See *SPIRITUS ANGELICÆ compositus*.—**A. Tofana**. Syn.: *a. (o acquetta) di Napoli, a. di Perugia (o della Tofa), manna di S. Nicola di Bari*. A poison invented by a woman named Tofana, and extensively used in the sixteenth century; a clear liquid sold in little bottles labeled "Manna di S. Nicola di Bari," and bearing the image of the saint. The fatal dose was from 4 to 6 drops. Its real composition is unknown, but it is supposed to have been an arsenical preparation. According to Garelli, physician to Charles VI, of Austria, it was a solution of arsenious acid in distilled cymbalaria-water, with the addition of an alcoholic preparation of cantharis. [A, 314; Chapuis, "Lyon méd.," May 28, 1882, p. 109 (H)].—**A. traumatica**. See *Aqua vulneraria*.—**A. turca**. A mixture of 10 parts of sulphuric ether and 100 of distilled water; used as an antispasmodic. [A, 314].—**A. vegeto-minerale**.—**A. vegeto-minerale spiritosa**. See *Liquor PLUMBI subacetatis dilutus*.—**A. verde di Desault**. A detergent solution of 0.10 gramme of corrosive sublimate and 0.30 of copper sulphate in 300 grammes of plantain-water. [A, 314].—**A. verde di Hartmann**. A wash for scorbutic ulcers; made by boiling a handful, each, of the leaves of *Hypericum perforatum*, rosemary, rue, and sage, 3 grammes, each, of savine tops and elder flowers, 50 of honey of roses, and 25 of flowers of sulphur in 600 of white wine and water, and adding 25, each, of alum and verdigris. [A, 314].—**A. verginale**. Syn.: *infezione per le donne*. A vaginal injection containing 5 parts, each, of lead acetate and zinc sulphate, 60 of cologne, and 125 of distilled water. [A, 314].—**A. vulneraria**. See *ALCOOLATURE vulnéraire*.—**A. vulneraria creuseuse**. A mixture of 4 parts of dilute sulphuric acid, and 24, each, of alcohol and acetic acid. [A, 352].—**A. vulneraria di Theden**. See *Aqua traumatica vegeto-mineralis Thedeni*.—**A. vulneraria rossa**. See *ALCOOLATURE vulnéraire*.—**A. vulneraria spiritosa**. See *ALCOOLAT vulnéraire*.—**A. zeffirina**. An astringent and resolvent collyrium containing 300 grammes of lime-water, 1 gramme of ammonium chloride, and 0.30 of verdigris. [A, 314].

**ACQUAVITA, ACQUAVITE** (It.), n's.  $A^3k\text{-kwa}^3\text{-ve}^3\text{-ta}^3$ , -ta. Brandy.—**A. tedesca**. See *Teinture de JALAP composée*.

**ACQUETTA** (It.), n.  $A^3k\text{-kwe}^3\text{-ta}^3$ . Dim. of *acqua*. See *AC-*

*qua Tofana*.—**A. della Tofa, A. di Napoli, A. di Perugia**. *Acqua Tofana*.

**ACQUI** (It.), n.  $A^3k\text{-kwe}$ . Lat., *Acque Stalielle*. A village in the Italian province of Alessandria, containing sulphurous springs of a temperature of from  $46^\circ$  to  $75^\circ$  C. ( $115^\circ$  to  $167^\circ$  F.), the mineral constituents of which are chiefly calcium sulphide, sodium chloride, calcium chloride, and silica; used for chronic skin diseases, paralysis, gout, and rheumatism. [A, 304.]

**ACQUISITUS** (Lat.), adj.  $A^3k(a^3k)\text{-kwi}^2\text{-zi}(\text{se})^3\text{-tu}^3\text{s}(\text{tu}^3\text{s})$ . Perf. part. of *acquirere*, to acquire. Fr., *acquis*. Ger., *erworben*. It., *acquisito*. Sp., *adquirido*. Acquired, as opposed to inherited and congenital (said of diseases).

**ACRACHOLIA** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}^3\text{-ko}(\text{ch}^2\text{o}^2)\text{-li}^2\text{-a}^3$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\chi\omicron\lambda\iota\alpha$ . Passionateness; a burst of passion. [Hippocrates (A, 311).]

**ACRACONITINE**, n.  $A^3k\text{-ra}^3\text{-k-o}^2\text{-n}^2\text{-i}^2\text{-en}$ . From  $\acute{\alpha}\kappa\rho\omicron\varsigma$ , extreme (on account of its virulence), and *aconite* (q. v.). Fr., *acraconitine*. Ger., *Acracotin*. Nepaline, napelline, or pseud-aconitine. [B, 49.]

**ACRACY**, n.  $A^3k\text{-ra}^3\text{-s-i}^2$ . See *ACRASIA*.

**ACRÆA** (Lat.), n. f.  $A^3k(a^3k)\text{-re}^3(\text{ra}^3\text{e}^2)\text{-a}^3$ . A genus of Central American terrestrial orchids. [A, 252.]

**ACRÆPALA** (Lat.), n. n. pl.  $A^3k(a^3k)\text{-re}^2\text{p}^3(\text{ra}^3\text{e}^2\text{p})\text{-a}^3\text{-la}^3$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\pi\alpha\lambda\alpha$  (from  $\alpha$  priv., and  $\kappa\rho\alpha\pi\acute{\alpha}\lambda\eta$ , the effects of a debauch). Fr., *acræpales*. Sp., *acræpalos*. 1. Wines that do not cause nausea. 2. Remedies that relieve nausea from a debauch. [Dioscorides (A, 311).]

**ACRAI** (Ar.), n. Morbid sexual excitement; a sort of satyriasis. [Avicenna (A, 325).]

**ACRAIPALA** (Lat.), n. n. pl.  $A^3k(a^3k)\text{-ra}^3\text{-i}^2\text{p}^3\text{-a}^3\text{-la}^3$ . See *ACRÆPALA*.

**ACRALDEHYDE**, n.  $A^3k\text{-ra}^3\text{-l}^2\text{-de-hid}$ . From  $\acute{\alpha}\kappa\rho\omicron\varsigma$ , extreme, and *aldehyde*. Fr., *acraldehyde*. Ger., *Acraldehyd*. An old name for aldol, on the supposition that it was a true polymer of aldehyde. [B, 2.]

**ACRALEA** (Lat.), n. n. pl.  $A^3k(a^3k)\text{-ra}(\text{ra}^3)\text{-le}^2(\text{le}^2)\text{-a}^3$ . Sp., *acrælea*. See *ACROCOLIA*.

**ACRAMPHIBRYON** (Lat.), n. n.  $A^3k(a^3k)\text{-ra}^3\text{-m}(\text{ra}^3\text{m})\text{-fi}^2\text{-h}^2\text{-ri}^2(\text{ru}^6)\text{-o}^2\text{-n}$ . From  $\acute{\alpha}\kappa\rho\omicron\varsigma$ , topmost,  $\acute{\alpha}\mu\phi\iota$ , on both sides, and  $\beta\rho\upsilon\epsilon\iota$ , to swell or burst forth. Fr., *acramphibryé*, *acramphigène*. Ger., *Endumsprosser*. A plant that grows both at the apex and at the periphery of the axis. In Endlicher's classification, the *Acramphibrya* form a grand subdivision, including all dicotyledonous plants, comprising the cohorts *Monochlamydeæ* (with the gymnosperms), *Gamopetalæ*, and *Dialypetalæ*. [B, 48, 104.]

**ACRAMPHIGÈNE** (Fr.), n.  $A^3\text{-kra}^3\text{-m-fi}^2\text{-zhe}^2\text{-n}$ . See *ACRAMPHIBRYON*.

**ACRANIA** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}(\text{ra}^3)\text{-ni}^2\text{-a}^3$ . From  $\alpha$  priv., and  $\kappa\rho\alpha\nu\iota\omicron\varsigma$ , the cranium. Fr., *acrânie*. Ger., *Akranie*, *Schädelmangel*. It., Sp., *acrania*. Syn.: *defectus cranii*, *microcephalia*, *hemicephalia*. A monstrosity characterized by entire or partial absence of the cranium. [A, 306.]

**ACRANIA** (Lat.), n. n. pl. Pronunc. and deriv. the same. Fr., *acrâniens*. Haeckel's name for acranial vertebrates, represented by *Amphioxus*. [A, 258.]

**ACRANIAL**, adj.  $A^3k\text{-ra}^3\text{-ni}^2\text{-a}^2$ . Lat., *acranius*, *acranicus*. Fr., *acrâne*. Ger., *schädellos*. Sp., *acrâneo*. Destitute of the skull. [A, 320.]

**ACRANICUS** (Lat.), adj.  $A^3k(a^3k)\text{-ra}^3\text{-n}(\text{ra}^3\text{n})\text{-i}^2\text{k-u}^3\text{s}(\text{u}^3\text{s})$ . Acranial.

**ACRÂNIENS** (Fr.), n. pl.  $A^3\text{-kra}^3\text{-n-i}^2\text{-a}^3\text{-n}$ . See *ACRANIA*, pl.

**ACRASIA** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}(\text{ra}^3)\text{-zi}^2(\text{si}^2)\text{-a}^3$ . From  $\alpha$  priv., and  $\kappa\rho\alpha\sigma\iota\varsigma$ , moderation, or a mixing (1st and 2d def's);  $\acute{\alpha}\kappa\rho\alpha\sigma\iota\alpha$  (=  $\acute{\alpha}\kappa\rho\alpha\tau\epsilon\iota\alpha$ ), debility (3d def.). Fr., *acrasie*. Ger., *Akrasie*. Sp., *acrasia*, *acracia*. 1. Intemperance. [A, 306.] 2. Any dyscrasia. [A, 305.] 3. Debility, especially impotence. [A, 311.] In this sense it is synonymous with *acratia*.

**ACRASIEÆ** (Lat.), n. f. pl.  $A^3k(a^3k)\text{-ra}(\text{ra}^3)\text{-zi}^2(\text{se}^2\text{e}^2)\text{-e}(\text{a}^3\text{e}^2)$ . Fr., *acrasiees*. Ger., *Acrasieen*. Van Tieghem's name for a division of *Fungi* related to the *Myzomycetes*, but distinguished from the latter by their swarm-spores not fusing to form a plasmodium, but remaining distinct. They are found in animal excrement and in decaying vegetable tissue. [B, 54.]

**ACRASIS** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}(\text{ra}^3)\text{-si}^2\text{s}$ . A genus of *Fungi* belonging to the *Acrasieæ*. [B, 54.]

**ACRASY**, n.  $A^3k\text{-ra}^3\text{-zi}^2$ . See *ACRASIA*.

**ACRATEIA** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-i}(\text{a}^3\text{a}^3)$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\tau\epsilon\iota\alpha$ . See *ACRATIA*.

**ACRATES** (Lat.), adj.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-ez}(\text{e}^2\text{s})$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\tau\eta\varsigma$ . Weak, debilitated. [A, 322.]

**ACRATIA** (Lat.), n. f.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-i}(\text{e}^2\text{e}^2)$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\tau\epsilon\iota\alpha$ ,  $\acute{\alpha}\kappa\rho\alpha\tau\iota\alpha$  (from  $\alpha$  priv., and  $\kappa\rho\alpha\tau\omicron\varsigma$ , force). Fr., *acratie*. Ger., *Akratie*. 1. Loss of strength, impotence. [A, 320.] 2. Incontinence. [A, 322.] 3. Intemperance. [A, 322.]

**ACRATISMA** (Lat.), n. n.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-i}^2\text{z}(\text{i}^2\text{s})\text{-ma}^3$ . Gen., *acratismatos* (-tis). Gr.,  $\acute{\alpha}\kappa\rho\alpha\tau\iota\sigma\mu\alpha$  (from  $\acute{\alpha}\kappa\rho\alpha\tau\iota\varsigma$  and  $\sigma\mu\alpha$ , to drink pure wine). Fr., *acratisme*. Sp., *acratismo*. An old name for breakfast (because this meal consisted of bread dipped in wine). [A, 343.]

**ACRATISMUS** (Lat.), n. m.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-i}^2\text{z}(\text{i}^2\text{s})\text{-mu}^3\text{s}$  (-mus). See *ACRATISMA*.

**ACRATOCHOLUS** (Lat.), adj.  $A^3k(a^3k)\text{-ra}^3\text{-t}(\text{ra}^3\text{t})\text{-o}^2\text{k}(\text{o}^2\text{ch}^2)\text{-o}^2(\text{o}^2)\text{-lu}^3\text{s}(\text{h}^4\text{s})$ . Gr.,  $\acute{\alpha}\kappa\rho\alpha\tau\omicron\chi\omicron\lambda\omicron\varsigma$  (from  $\acute{\alpha}\kappa\rho\alpha\tau\omicron\varsigma$ , unmixed, and  $\chi\omicron\lambda\omicron\varsigma$ , bile). "Caused by sheer bile." [Hippocrates (A, 311).]

**ACRITUS** (Lat.), adj.  $A^2k(a^3k)ri^2t-u^3s(u^4s)$ . Gr., *ἀκριτος*. 1. Confused, indistinguishable. [B.] 2. Acrical. [A, 313.]

**ACRITY**, n.  $A^2k^2ri^2t-i^2$ . See ACRIDITY.

**ACRIVIOLA** (Lat.), n. f.  $A^2k(a^3k)ri^2-vi(we)^o-la^3$ . From *acer*, sharp, and *viola*, the violet. An old name for the Indian cress. [A, 323.] See *TROPÆOLUM*.

**ACRO** (Lat.), n. m. Gen., *acro'nis*. See ACRON.

**ACROÆSTHESIA** (Lat.), n. f.  $A^2k(a^3k)-ro-e^2s(a^3-e^2s)-the(tha)-zi^2(s)^2-a^3$ . Ger., *Äkroästhesie*. Syn.: *oxyæsthesia*. Exaggerated sensibility (one of the phenomena of hysteria). [R. Arndt (A, 319).]

**ACROASIS** (Lat.), n. f.  $A^2k(a^3k)-ro-a(a^3)^2s^2s$ . Gen., *acroa'seos*. Gr., *ἀκρόασις* (from *ἀκροᾶσθαι*, to listen). The use of the sense of hearing in the diagnosis of diseases. [Hippocrates (A, 337).] See ACSCULTATION.

**ACROBAPTUS** (Lat.), adj.  $A^2k(a^3k)-ro-ba^2p(ba^2p)^2tu^3s(tu^4s)$ . From *ἀκρον*, a point, and *βαπτρς*, dipped, dyed. Fr., *acrobathe*, *acrobatite*. Sp., *acrobapto*. Having a spot at the end of the wing (said of a genus of insects). [A, 306.]

**ACROBLAST**, n.  $A^2k-ro-bla^2st$ . From *ἀκρος*, extreme, and *βλαστρς*, a germ. Fr., *acroblaste*. Ger., *Akroblast*, *Spitzkeim*. The a's are cells lying between the ectoblast and the endoblast, but independent of the mesoblast, which take up food in an amoeboid manner. They also give rise to bodies called poreutes (*q. v.*). [Kollmann, "Recueil zool. suisse," 1884, p. 259 (J).]

**ACROBLASTIC**, adj.  $A^2k-ro-bla^2st^2ik$ . Gr., *ἀκρόβλαστος*, budding at the end. [Theophrastus (A, 311).] Fr., *acroblastique*. Ger., *akroblastisch*, *spitzkeimend*. Monocotyledonous. [A, 315.]

**ACROBRYON** (Lat.), n. n.  $A^2k(a^3k)-ro-bri(bru^6)-o^2n$ . From *ἀκρον*, an extremity, and *βρϋον*, to swell or burst forth. Fr., *acrobrye*. Ger., *Gipfelsprosser*. Sp., *acrobrio*. A plant growing at its apex only. In Endlicher's classification, the *Acrobrya* form a grand subdivision of the *Cornophyta*, or vascular plants, including all those in which the growth of the vascular bundles takes place at the apex. [B, 48.]—**Acrobrya anophyta**. Fr., *acrobryes anophytes*. A division including the classes of mosses (*Musci*) and liverworts (*Hepaticæ*). [B, 48, 104.]—**Acrobrya hysterophyta**. Fr., *acrobryes hysterophytes*. A division including the class *Rhizanthæe*. [B, 48, 104.]—**Acrobrya protophyta**. Fr., *acrobryes protophytes*. A division including the classes *Calamariæ* (*Equisetaceæ*), *Filices* (ferns), *Hydropterides*, *Selagines*, and *Zamie* (*Cycadaceæ*). [B, 48, 104.]

**ACROBUSTITIS** (Lat.), n. f.  $A^2k(a^3k)-ro-bu^3st(bust)^2i(e)^2ti^2s$ . See ACROBUSTITIS.

**ACROBYSTIA** (Lat.), n. f.  $A^2k(a^3k)-ro-bi^2st(bu^6st)^2i^2-a^3$ . Gr., *ἀκροβυστία* (from *ἀκρον*, a point, and *βύειν*, to cover). Ger., *Akrobyste*. Sp., *acrobistia*. 1. The prepuce. [A, 337.] 2. Circumcision. [A, 322.]

**ACROBYSTICUS** (Lat.), adj.  $A^2k(a^3k)-ro-bi^2st(bu^6st)^2i^2k-u^3s(u^4s)$ . Preputial. [A, 322.]

**ACROBYSTIOLITH**, n.  $A^2k-ro-bi^2st^2i^2-o-li^2th$ . From *ἀκροβυστία*, the prepuce, and *λίθος*, a stone. Fr., *acrobystiolithe*. A preputial calculus. [E.]

**ACROBYSTITIS** (Lat.), n. f.  $A^2k(a^3k)-ro-bi^2st(bu^6st)^2i(e)^2ti^2s$ . Gen., *acrobystiti'dis*. For deriv., see ACROBYSTIA and *-itis*. Fr., *acrobystite*. Ger., *Vorhautentzündung*. It., *acrobustite*. 1. Inflammation of the sheath of the penis in the domestic animals, especially the horse. 2. Posthitis (*q. v.*). [A, 306.]

**ACROCARPÆ**, **ACROCARPI** (Lat.), n's f. and m. pl.  $A^2k(a^3k)-ro-ka^3rp(a^3-e^2)$ , *-i(e)*. From *ἀκρον*, an extremity, and *καρπός*, fruit. Fr., *acrocarpes*. Ger., *Gipfelsfrüchtige*. Sp., *acrocarpias*. A division of mosses (*Bryaceæ*), comprising those in which the reproductive organs are situated at the extremity of the main stem, and not laterally. [B, 19, 35, 75.]

**ACROCARPIDIUM** (Lat.), n. n.  $A^2k(a^3k)-ro-ka^3r-pi^2d^2i^2-u^3m(u^4m)$ . A genus of piperaceous plants indigenous to tropical America and the West Indies. [B, 19.]—**A. hispidulum**. A species growing in the West Indies, employed there as a bitter tonic. [B, 19.]

**ACROCARPOUS**, adj.  $A^2k-ro-ka^3rp-u^3s$ . Gr., *ἀκρόκαρπος*, fruiting at the top. [A, 311.] Lat., *acrocarpus*. Fr., *acrocarpe*. Ger., *akrokarpisch*. Sp., *acrocarpo*. In botany, bearing the fruit at the summit of the axis. [Berkeley (B, 39).]

**ACROCARPUS** (Lat.), adj. and n. m.  $A^2k(a^3k)-ro-ka^3rp-u^3s(u^4s)$ . 1. *Acrocarpus* (*q. v.* for deriv.). 2. A member of the *Acrocarpi* (*q. v.*). 3. A genus of *Algae*, including *A. crinalis* (*q. v.*).—**A. crinalis**. One of the species that produce Corsican moss. [A, 316.]

**ACROCEPHALIA** (Lat.), n. f.  $A^2k(a^3k)-ro-se^2f(ke^2f)-a(a^3)^2li^2-a^3$ . From *ἀκρον*, the summit, and *κεφαλή*, the head. Fr., *acrocephalie*. Ger., *Akrocephalie*. It., Sp., *acrocefalia*. A deformity of the head in which it is increased in its vertical diameter and more or less pointed or conical at the top. [Broca (D, 43).]

**ACROCEPHALIC**, **ACROCEPHALOUS**, adj's.  $A^2k-ro-se^2f-a^2li^2k$ , *-se^2f-a^2li^2-u^3s*. Lat., *acrocephalus*. Fr., *acrocephale*. Ger., *akrocephalisch*. Sp., *acrocefalo*. Affected with acrocephalia (*q. v.*).

**ACROCEPHALUS** (Lat.), adj. and n. m.  $A^2k(a^3k)-ro-se^2f(ke^2f)-a^2li^2(u^3)^2-u^3s(u^4s)$ . 1. *Acrocephalus*. 2. A genus of herbaceous labiate plants of the tribe *Ocimoideæ*, indigenous to India and Madagascar. [Bentham (A, 305), A, 306.]

**ACROCEPHALY**, n.  $A^2k-ro-se^2f-a^2li^2$ . See ACROCEPHALIA.

**ACROCERIDIAN**, adj.  $A^2k-ro-se^2-ri^2d^2i^2-a^2n$ . From *ἀκρον*, a summit, and *κέρας*, a horn. Fr., *acroceride*. Resembling the *Acrocera* (a genus of vesicular *Diptera*). [A, 306.]

**ACROCHEIR** (Lat.), n. f.  $A^2k(a^3k)-ro-kir(ch^2e^2-i^2r)$ . Gen., *acrocheiris*. Gr., *ἀκρόχειρ* (from *ἀκρον*, an extremity, and *χείρ*, the hand). Fr., *acrochire*. Ger., *Akrochir*. Sp., *acroquir*, *acroqueirits*.

1. The extremity of the hand; the tips of the fingers. [A, 320.] 2. The forearm. [Hippocrates (A, 320).]

**ACROCHEIRON** (Lat.), n. n.  $A^2k(a^3k)-ro-ki^2(ch^2e^2-i^2)-ro^2n$ . See ACROCHEIR.

**ACROCHIR** (Lat.), n. f.  $A^2k(a^3k)-ro-ku^2r(ch^2er)$ . See ACROCHEIR.

**ACROCHOLIA** (Lat.), n. f.  $A^2k(a^3k)-ro-ko(ch^2o^2)/li^2-a^3$ . Gr., *ἀκροχολία* (from *ἀκρος*, extreme, and *χολή*, bile). An excitable, choleric temperament. [Hippocrates (A, 325).]

**ACROCHORDON** (Lat.), n. f.  $A^2k(a^3k)-ro-ko^2rd(ch^2o^2rd)^2o^2n$  (on). Gen., *acrochord'onis*. Gr., *ἀκρόχορδων* (from *ἀκρον*, an extremity, and *χορδή*, a string [of a lyre], because, according to Aetius, its tip resembled the cut end of a piece of catgut). Fr., *acrochordon*, *verruë avec pédicule*, *molluscum granuleux*. Ger., *Akrochordon*, *Saitenwarze*. It., *acrochordon*, *bitorzo*. Sp., *acrochordon*. 1. According to Celsus, a little hard tumor under the skin, several being arranged in clusters, commonly affecting children. [G, 13.] Cf. *MOLLUSCUM contagiosum*. 2. As used by Sir E. Wilson and Hans Hebra, a little soft tumor, often pendulous, of areolar (Wilson) or glandular (Hebra) structure, occurring on the eyelids, the neck, etc., of elderly persons; the *verruca penitilis* (seu *filiformis*). [G, 2, 75.]

**ACROCHORDUS** (Lat.), n. m.  $A^2k(a^3k)-ro-ko^2r(ch^2o^2r)^2du^3s$  (du's). See ACROCHORDON.

**ACROCHORISMUS** (Lat.), n. m.  $A^2k(a^3k)-ro-ko(ch^2o^2)-ri^2z$  (ri^2s)^2mu^3s(mu^4s). Gr., *ἀκροχορισμός* (from *ἀκρος*, extreme, and *χορεύειν*, to dance). Sp., *acrociorismo*. An ancient method of exercise by dancing. [A, 325, 337.]

**ACROCINESIS** (Lat.), n. f.  $A^2k(a^3k)-ro-si^2n(ki^2n)^2e(a)^2si^2s$ . Gen., *acrocine'seos*. From *ἀκρος*, extreme, and *κίνησις*, movement. Ger., *Akrokinesie*. Syn.: *oxycinesis*. An increase of the ease, freedom, and completeness of the normal muscular movements (one of the phenomena of hysteria, to be distinguished from *hypercinesis*). [R. Arndt (A, 319).]

**ACROCLIDIUM** (Lat.), n. n.  $A^2k(a^3k)-ro-klid^2i^2-u^3m(u^4m)$ . See ACROCLIDIUM.

**ACROCOLIA** (Lat.), n. n. pl.  $A^2k(a^3k)-ro-ko^2li^2-a^3$ . Gr., *ἀκροκόλια*. Ger., *Akrokolia*. Sp., *acrocólías*. 1. The extremities of the body, especially in the lower animals, including the snout, ears, trotters, etc. [A, 311.] 2. In ancient pharmacy, the extremities of certain animals, used in making gelatin. [A, 337.]

**ACROCOLIUM** (Lat.), n. n.  $A^2k(a^3k)-ro-ko^2li^2-u^3m(u^4m)$ . See pl., ACROCOLIA.

**ACROCOMIA** (Lat.), n. f.  $A^2k(a^3k)-ro-ko^2mi^2-a^3$ . From *ἀκρον*, a summit, and *κόμη*, hair. Fr., *acrocomie*. Ger., *Schopffadn*. Sp., *acrocómo*. A genus of palms, established by Martius, having thorny stems and a luxuriant mass of leaves at the top. [A, 304, 306.]—**A. lasiopatha** [Martius]. A Brazilian tree, the fruit of which is edible. [A, 304.]—**A. sclerocarya** [Martius]. Fr., *palmier mocaya*. Ger., *Mocaya*, *grosser Mocaybaum*. Syn.: *Cocos aculeata* [Jacquin] (seu *fusiformis* [Willdenow]). A tree indigenous to the West Indies and the northern part of South America. The nut (Ger., *Palmkohl*) furnishes palm oil, and is used in an emulsion for catarrh in Brazil; the young leaves are eaten. [A, 303, 304, 321.]

**ACROCORIUM** (Lat.), n. n.  $A^2k(a^3k)-ro-ko^2ri^2-u^3m(u^4m)$ . Sp., *acrocórion*. A plant mentioned by Pliny; supposed by some to have been a kind of onion, and by others the violet. [A, 312, 337.]

**ACRODACTYLUM** (Lat.), n. n.  $A^2k(a^3k)-ro-da^2k(da^3k)^2ti^2l$  (tu^4l)^2u^3m(u^4m). From *ἀκρος*, topmost, and *δάκτυλος*, a finger. Fr., *acroductyle*. Ger., *Zehehrücken*. In zoölogy, the upper surface of a digit. [A, 347.]

**ACRODICLIDIUM** (Lat.), n. n.  $A^2k(a^3k)-ro-di^2(de)-klid^2i^2-u^3m(u^4m)$ . From *ἀκρον*, the top, and *δικλῆς* (gen., *δικλῆδος*), double-folding. Sp., *acrodiclídea*. A genus of lauraceous plants established by Nees von Esenbeck. [A, 258, 321.]—**A. camara**. The typical species, indigenous to Brazil. The wood is bitter and aromatic, and the fruit (the Ackawai nutmeg) is used by the Indians in dysentery. [A, 260, 321.]

**ACRODONT**, adj.  $A^2k-ro-do^2nt$ . From *ἀκρον*, a summit, and *δούς* (gen., *δδόντος*), a tooth. Fr., *acrodont*. In zoölogy, having the teeth attached by their bases to the summit of the parapat of the jaw. [L, 12.]

**ACRODRYON** (Lat.), n. n.  $A^2k(a^3k)-ro^2d^2ri^2(ru^6)^2o^2n$ . Gr., *ἀκρόδρυον*. Sp., *acrodrio*. Syn.: *Nauclearia* [De Candolle]. A genus of rubiaceous plants. [A, 305.] In the pl., *acrodrya*, fruit-trees or fruits, especially nuts. [A, 311.]

**ACRODYNIA** (Lat.), n. f.  $A^2k(a^3k)-ro-di^2n(du^4n)^2i^2-a^3$ . From *ἀκρον*, an extremity, and *δύσιν*, pain. Fr., *acrodynie*, *mal des pieds et des mains*, *maladie de Paris*. Ger., *Akrodynie*. It., Sp., *acrodinia*. Syn.: *erythema epidemicum* [Alibert] (seu *acrodynia*), *chiro-podalgia* [Bally]. Lit., pain in the extremities. 1. A name given by Chardon to an acute general disease, usually occurring as an epidemic, especially in Eastern countries, but also elsewhere (having prevailed extensively in France from 1828 to 1830); attended with disorders of the nervous system, the mucous membranes, and the skin, but specially characterized by pains in the extremities, together with a rash beginning on the hands and feet as erythematous spots, which coalesce and extend over the upper and lower limbs and sometimes portions of the trunk. The affected portions of the skin undergo desquamation, thickening, and pigmentation, while the remaining portions also become darker in color. These phenomena are mentioned as among the symptoms of ergotism. [A, 314; D, 1; G.] Cf. DENGUE. 2. A rheumatic affection of the nerves. [J. C. A. Clarus (A, 322).]

**ACRODYNY**, n.  $A^2k-ro-di^2n-i^2$ . See ACRODYNIA.

**ACROE** (Sp.), n.  $A^2k-ro^2a$ . A plant indigenous to Guinea. Boiled in wine, it is used as a tonic. [A, 337.]

**ACROPETAL, ACROPETALOUS**, adj's.  $\Delta^k$ -ro-p'e<sup>2</sup>t-a<sup>2</sup>l-, -ro-pe<sup>2</sup>t'a<sup>2</sup>l-u's. From *ἀκρον*, a summit, and *petere*, to seek. Fr., *acrapète*. Ger., *akropetal*. In botany, developing from the base toward the summit. [B. 39. 54.]

**ACROPHALLI** (Lat.), n. m. pl.  $A^2k(a^3k)\text{-ro-fa}^2l(fa^1l/li^1e)$ . From *ἀκρον*, an extremity, and *φάλλος*, the penis. A division of the nematode worms having the male genital organ at the extremity of the tail. [Deesing (L, 15).]

**ACROPHOBIA** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-fo}^2bi^2\text{-a}^3$ . Ger., *Äkrophobie*. Hydrophobia. [A, 305.]

**ACROPHORUS** (Lat.), n. m.  $A^2k(a^3k)\text{-ro-fo}^2ru^2s(ru^4s)$ . Fr., *acrophore*. Sp., *acroforo*. A genus of polypodiaceous ferns established from a plant of Java. [A, 306.]

**ACROPHYLOUS**, adj.  $A^2k\text{-ro-fil}^2lu^2s$ . Gr., *ἀκρόφυλλος*. Sp., *acrophillo*. Having leaves at the top. [Theophrastus (A, 311).]

**ACROPHYTON, ACROPHYTUM** (Lat.), n's n.  $A^2k(a^3k)\text{-ro-fil}^2lu^2s(u^4t)\text{-o}^2n\text{-u}^3m(u^4m)$ . From *ἀκρον*, an extremity, and *φυτόν*, a plant. The *Tussilago farfara*. [Dioscorides (A, 344).]

**ACROPINACONE**, n.  $A^2k\text{-ro-pi}^2n^2a^2k\text{-on}$ . From *acrolein* and *pinacone*. Syn.: *acrylic pinacone*. A substance produced by the action of nascent hydrogen on acrolein, having the composition  $C_6H_{10}O_2$ . [B, 2.]

**ACROPIS** (Lat.), adj.  $A^2k(a^3k)\text{-ro-pi}^2s$ . Gr., *ἀκροπισ*. Sp., *acropis*. Disabled (said usually of the tongue). [Hippocrates (A, 311).]

**ACROPLETHYSMOGRAPH**, n.  $A^2k^2\text{-ro-ple}^2th\text{-i}^2z\text{-mo-gra}^2f$ . From *ἀκρος*, extreme, *πληθύνειν*, to fill, and *γράφειν*, to write. A pletismograph (*q. v.*). [B.]

**ACROPODIUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-po}^2di^2\text{-u}^3m(u^4m)$ . From *ἀκρον*, a summit, and *πόδιον* (dim. of *πούς*), the foot. Ger., *Fussrücken*. Sp., *acropodo*. In zoölogy, the upper surface of the foot.

**ACROPOSAPES** (Lat.), adj.  $A^2k(a^3k)\text{-ro-po}^2s^2a^2p(a^2p)\text{-ez}(e^2s)$ . A word said to have been used by Hippocrates to indicate rapidity of digestion in infants. [A, 337.] Perhaps a corruption of *acrosapes* (*q. v.*).

**ACROPOSTHIA** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-po}^2s^2thi^2\text{-a}^3$ . Gr., *ἀκροποσθία* (from *ἀκρος*, extreme, and *πόσθη*, the prepuce). Ger., *Akroposthia*. Sp., *acropostia*. The prepuce, especially the extreme portion that is removed in circumcision. [A, 311, 323.]

**ACROPOSTHIOLITH**, n.  $A^2k\text{-ro-po}^2s^2thi^2\text{-o-li}^2th$ . Lat., *acroposthiolithus* (from *ἀκροποσθία*, the prepuce, and *λίθος*, a stone). A preputial calculus. [A, 322.]

**ACROPOSTHION** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-po}^2s^2thi^2\text{-o}^2n$ . Gr., *ἀκροποσθιον*. See *ACROPOSTHIA*.

**ACROPOSTHITIS** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-po}^2s^2thi^2\text{(the)}\text{-ti}^2s$ . Gen., *acroposthitidis*. For deriv., see *ACROPOSTHIA* and *-itis*.\* Fr., *acroposthite*. Inflammation of the prepuce. [E.]

**ACROPSILON** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-p}^2si^2l\text{-o}^2n$ . For deriv., see *ACROPSILOS*. It., *acropsilo*. That portion of the glans penis which is not covered by the prepuce. [A, 314.]

**ACROPSILOS** (Lat.), adj.  $A^2k(a^3k)\text{-ro-p}^2si^2l\text{-o}^2s$ . Gr., *ἀκρόψιλος* (from *ἀκρον*, an extremity, and *ψιλος*, naked). Having the glans penis uncovered. [A, 322.]

**ACROPSILOS** (Lat.), adj.  $A^2k(a^3k)\text{-ro-p}^2so\text{-los}$ . Gr., *ἀκρόψιλος* (from *ἀκρον*, an extremity, and *ψιλος*, naked). The penis with the prepuce retracted. Having the penis erect and the glans uncovered. [A, 311, 322.]

**ACROR** (Lat.), n. m.  $A^2k(a^3k)\text{-ro-r}$ . Gen., *acro-ris*. Acridity. [A, 312.]

**ACRORIA** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-ri}(re)^2a^3$ . Gr., *ἀκρόρητα*, a mountain ridge. The vertex. [A, 311, 322.]

**ACRORRHEUMA** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-ru}^2(ru^4ma)^3$ . Gen., *acrorrhœumatos (-tis)*. From *ἀκρον*, an extremity, and *ῥεῦμα*, a flux (see *RHEUMATISM*). Rheumatism of the extremities. [A, 313, 316.]

**ACORRHIZES** (Fr.), n. pl.  $A^3\text{-kro-rez}$ . The acrogens (*q. v.*). [B.]

**ACROS** (Lat.), n. m.  $A^2k(a^3k)\text{-ro}^2s$ . Gr., *ἄκρος*. Any prominent point, like those of the nose, the fingers, etc. [A, 323.]

**ACRO-SALINE**, adj.  $A^2k^2\text{-ro-sa}^2lin$ . Acid and saline. [B, 39.]

**ACROSAPES** (Lat.), adj.  $A^2k(a^3k)\text{-ro-sa}^2p(a^2p)\text{-ez}(e^2s)$ . Gr., *ἀκροσάπης* (from *ἀκρον*, an extremity, and *σάπσθαι*, to rot). Lit., rotten at the end; readily perishable, easily prepared, easily digestible (said of articles of food, the old idea being that digestion was a sort of putrefaction). [Hippocrates (A, 311, 325, 343).]

**ACROSARCA** (Lat.), n. n. pl.  $A^2k(a^3k)\text{-ro-sa}^2r^2ka^3$ . From *ἀκρον*, an extremity, and *σάρξ* (gen., *σάρκος*), flesh. Fr., *acrosarques*. Plants having round, fleshy, berry-like fruits with the calyx adherent. [Desvauz (A, 345).]

**ACROSARCOUS**, adj.  $A^2k\text{-ro-sa}^2r^2ku^2s$ . Lat., *acrosarcus*. Fr., *acrosarque*. Sp., *acrosarco*. Having a fleshy end or fruit. [A, 322.]

**ACROSELOS, ACROSELTON** (Lat.), n's m. and n.  $A^2k(a^3k)\text{-ro-sel}^2o^2s\text{-pe}^2l\text{-to}^2n$ . Old Greek names for certain oat-grasses, supposed to have been the *Bromus sterilis* and the *Avena sativa*. [A, 343, 344.]

**ACROSPERMUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-spu}^2rm(spe^2rm)\text{-u}^3m(u^4m)$ . From *ἀκρον*, a summit, and *σπέρμα*, a seed, because the apex swells and emits the sporules. Fr., *acrosperme*. Sp., *acrospermo*. A genus of minute *Fungi*, established by Tode, parasitic on decaying vegetables. [A, 248.]

**ACROSPIRE**, n.  $A^2k\text{-ro-spir}$ . From *ἀκρος*, topmost, and *σπείρα*, a coil, or *σπείρειν*, to sow. Fr., *acrospire*. Sp., *acrospiro*. The first shoot to make its appearance in the sprouting of corn, being the elongated plumule of the seed. First used by Grew, in 1674. [B, 19, 39.]

**ACROSPIRE**, v. intr.  $A^2k\text{-ro-spir}$ . Ger., *keimen*. To sprout (said of corn). First used in 1616. [B, 39.]

**ACROSPORÆ** (Lat.), n. f. pl.  $A^2k(a^3k)\text{-ro-s}^2po\text{-re}(ra^3\text{-e}^2)$ . Fr., *acrosportes*. Ger., *Akrosporten*. Acroporous *Fungi*; those in which the spores are developed at the extremities of their filaments, and not in asci. [B, 54.]

**ACROSPORE**, n.  $A^2k\text{-ro-s}^2por$ . From *ἀκρος*, topmost, and *σπόρά*, a seed. Fr., *acrosports*. A spore generated at the extremity, or summit, of the hypha of a *Fungus*; a basidiospore. [B, 39.]

**ACROSPORIUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-s}^2po\text{-ri}^2\text{-u}^3m(u^4m)$ . See *ORIUM*.—*A. cerasi*. A pyrenomycetous *Fungus* not essentially different from *Cladosporium*; a parasite of the mazard, the fruit of which it causes to become stunted and dry. [A, 303.]

**ACROSPOROUS**, adj.  $A^2k\text{-ro-s}^2po\text{-ru}^2s$ . Fr., *acrosporé*. Sp., *acrosporo*. Pertaining to an acrosports, furnished with acrosports. [B, 39.]

**ACROSTETHION** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-ste}^2th\text{-i}^2\text{-o}^2n$ . Gr., *ἀκροστήθιον*. The chest. [Aristotle (A, 311).]

**ACROSTICHACEÆ, ACROSTICHEÆ** (Lat.), n's f. pl.  $A^2k(a^3k)\text{-ros-ti}^2k(ti^2ch^2)\text{-a}(a^3)\text{-se}(ke^2)\text{-e}(a^3\text{-e}^2)$ ,  $-ti^2k(ti^2ch^2)\text{-e}^2\text{-e}(a^3\text{-e}^2)$ . Fr., *acrostichacées*. Sp., *acrosticées*. A section of polypodiaceous ferns having the sori occupying nearly or quite the whole fructiferous surface. [A, 252, 337.]

**ACROSTICHUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-s}^2ti^2k(ti^2ch^2)\text{-u}^3m(u^4m)$ . Supposed to be from *ἀκρον*, a point or end, and *στίχος*, a line of poetry, because the reverse of the leaves shows traces of lines like the beginning of lines of verse. [A, 248.] Fr., *acrostic*, *acrostique*. Ger., *Zeifarn*. Sp., *acrostico*. A genus of polypodiaceous ferns established by Linnaeus. [A, 304, 305, 335.]—*A. aleccone* [Willdenow]. See *A. furcatum*.—*A. aureum* [Linnaeus]. Syn.: *Loucheit palustris*. The typical species, found in tropical marshes. A decoction of the root is used in Jamaica for dysentery and disease of the spleen, and a salt prepared from the leaves is applied to ulcers. [A, 316, 352.]—*A. dichotomum* [Forskål]. Syn.: *Asplenium radiatum* [Swartz]. An Arabian species, termed *medjabe* or *mejahoe*. The bruised leaves are applied to burns. [A, 316, 344.]—*A. flavens* [Humboldt, Bonpland, and Kunth]. A New Granada species, used as a laxative. [Humboldt (A, 338).]—*A. furcatum* [Forster]. Fr., *acrostic corne d'élan*. Syn.: *A. aleccone* [Willdenow]. *Lingua cervina*. Elk's horn; a New Holland and New Zealand tree. The tuberous roots are eaten. [O. Reveil (A, 328).] According to others, a species that grows as a parasite on tropical trees. [A, 304.]—*A. huacaro* [Ruiz and Pavón]. A Peruvian species, said to be solvent, deobstruent, sudorific, and antelmintic. [A, 258, 316.]—*A. polypodioides*. The *Polypodium incavum* (*q. v.*). [A, 313.]—*A. punctulatum* [Swartz]. A species used medicinally by the Chinese. [Fothergill (A, 344).]—*A. sorbifolium* [Willdenow]. A Jamaica species, the juice of which, mixed with oil, ginger, and pepper, is used topically for sick headache. [A, 248; Waring (A, 316).]

**ACROSTOMA** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-s}^2to\text{-ma}^3$ . From *ἀκρος*, a point, and *στόμα*, the mouth. Fr., *acrostome*. Sp., *acrostomo*. A genus of vesicular entozoa. [A, 334.]—*A. amuii*. A species that has been found in the amnion of the cow; supposed to be an immature *Cysticercus*. [Lesauvage (L, 18).]

**ACROTARSUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-ta}^2r^2si^2\text{-u}^3m(u^4m)$ . From *ἀκρος*, topmost, and *ταρσος* (see *TARSUS*). Fr., *acrotarse*. Ger., *Fussrücken*. Sp., *acrotarso*. The upper aspect of the tarsus in birds. [A, 306.]

**ACROTHERIA** (Lat.), n. n. pl.  $A^2k(a^3k)\text{-ro-te}(ta)\text{-ri}^2\text{-a}^3$ . Gen., *acrotheriorum*. Gr., *ἀκροθήρια*. Fr., *acrolères*. Ger., *Akroterien*. Sp., *acroteria*. The extremities. [A, 305.]

**ACROTHERIASIS** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-te}(ta)\text{-ri}^2\text{-a}(a^3)\text{-si}^2s$ . Gen., *acrotheriasis*. From *ἀκροθήρια*, to mutilate by removing a prominent part. Fr., *acrolérisme*. Ger., *Akroteriasie*. It., *acrotierasi*. Sp., *acroterismo*. 1. Mutilation by the loss of the distal portion of a limb. 2. A monstrosity characterized by absence of the same part. [A, 311, 314.]

**ACROTHERIASMA, ACROTHERIASMUS** (Lat.), n's n. and m.  $A^2k(a^3k)\text{-ro-te}(ta)\text{-ri}^2\text{-a}^3\text{-z}(a^3s)\text{-ma}^3\text{-mu}^3s(mu^4s)$ . Gen., *acrotheriasmatos (-tis)*, *acrotheriasmi*. See *ACROTHERIASIS*.

**ACROTHERION** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-te}(ta)\text{-ri}^2\text{-o}^2n$ . See pl., *ACROTHERIA*.

**ACROTHERIOSIS** (Lat.), n. f.  $A^2k(a^3k)\text{-ro-te}(ta)\text{-ri}^2\text{-o}^2si^2s$ . See *ACROTHERIASIS*.

**ACROTHAMNIUM** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-tha}^2m(thu^4m)\text{-ni}^2\text{-u}^3m(u^4m)$ . From *ἀκρον*, a summit, and *θαμνιον*, dim. of *θάμνος*, a bush. Sp., *acrotamnio*. A genus of *Fungi* growing among mosses at the foot of trees. [A, 306.]

**ACROTHIALDINE**, n.  $A^2k\text{-ro-thi}^2a^2l\text{-den}$ . For deriv., see *ACROLEIC ACID* and *THIALDINE*. A base produced by the action of ammonium sulphhydrate on acrolein; a tertiary triamine,  $C_6H_{13}NS_2 = N(C_2H_5)(C_2H_5SH)_2$ . [B, 2.]

**ACROTHEREX** (Lat.), adj.  $A^2k(a^3k)\text{-ro-tho}^2re^2ks$ . Gr., *ἀκροθήρηξ*. Sp., *acrotórez*. 1. Easily intoxicated with wine. [Aristotle (A, 325).] 2. In the first (or, as occasionally used, an extreme) stage of intoxication. [A, 337.]

**ACROTHYMION** (Lat.), n. n.  $A^2k(a^3k)\text{-ro-thi}^2m(thu^4m)\text{-i}^2\text{-o}^2n$ . From *ἀκρος*, pointed, and *θύμιον*, a wart. Fr., *acrothymion*. Ger., *Akrothymion*. It., *acrotymion*. Sp., *acrotymion*. See *CONDYLOMA acuminatum*.

**ACROTMYMOSIS, ACROTMYMIUM** (Lat.), n's f. and n.  $A^2k(a^3k)\text{-ro-thi}^2m(thu^4m)\text{-i}^2\text{-o}^2si^2s\text{-thi}^2m(thu^4m)\text{-i}^2\text{-u}^3m(u^4m)$ . See *ACROTMYMION*.

**ACROTICA** (Lat.), n. n. pl.  $A^2k(a^3k)\text{-ro-ti}^2k\text{-a}^3$ . From *ἀκρος*, outermost. J. M. Good's term for morbid conditions of the cutaneous glands and their secretions. [A, 357.]

**ACROTISMUS** (Lat.), n. m.  $A^2k(a^3k)\text{-ro-ti}^2z(ti^2s)\text{-mu}^3s(mu^4s)$ .

From *a* priv., and *κρότος*, the pulse. Pulselessness, asphyxia. [Plouquet (A, 357).]

**ACROZYMUS** (Lat.), adj.  $A^2k(a^3k)$ -ro-zim( $zu^4m$ ) $u^3s(u^4s)$ . Gr., *ἀκρόζυμος*. Slightly leavened. [Galen (A, 311).]

**ACRUCIA**, n. See **ACROISA**.

**ACRUS** (Lat.), n. m.  $A^2k(a^3k)$ / $ru^3s(ru^4s)$ . From *ἀκρος*, complete. A state of perfect health. [Hippocrates (A, 316).]

**ACRYDIUM** (Lat.), n. n.  $A^2k(a^3k)$ -ri $d(ru^4d)$ / $i^2u^3m(u^4m)$ . See **ACRIDUM**.

**ACRYL**, n.  $A^2k$ / $ri^2l$ . From *acer*, sharp, sour. Fr., *acryle*. Ger., *Acryl*. See **ALLYL**.

**ACRYLATE**, n.  $A^2k$ / $ri^2l$ -at. Fr., *acrylate*. Ger., *acrylsaures* Salz. A salt of acrylic acid. [B.]

**ACRYLIC ACID**, n.  $A^2k$ -ri $i^2l$ / $i^2k$ . Fr., *acide acrylique*. Ger., *Acrylsäure*. Syn.: *acroleic acid*. 1. A monobasic acid,  $CH_2=CH-CO.OH=C_3H_4O_2$ , which may be considered as the oxide of acrolein; a colorless liquid. 2. A general term for organic acids of the group  $C_nH_{2n-2}O_2$ , comprising two groups, the *normal acrylic* and the *isoacrylic* acids. The former either occur in vegetable or animal organisms or are derived from natural products; the latter are formed synthetically by the abstraction of the elements of water from certain acid ethers, which in turn are derived from oxalic acid by the substitution of 2 molecules of an alcohol radicle of the series  $C_nH_{2n+1}$  for an atom of oxygen. The general formula for the latter series is  $C_2H_3O_2.2(C_nH_{2n+1}).H_2O=C_{2+2n}H_{4+2}O_2=C_nH_{2m-2}O_2$ , where  $m=2n+2$ . [B, 2, 4.]

**ACRYLIC ALDEHYDE**, n. Fr., *aldéhyde acrylique*. Ger., *Acrylaldehyd*. See **ACROLEIN**.

**ACRYLSAURE** (Ger.), n.  $A^2k$ / $ru^4l$ -zoi/ $re^2$ . Acrylic acid. [A, 305.]—**A**'*äthylester*. Ethyl acrylate. [B.]

**ACSUO**, n. An alchemical name for red coral. [Ruland (A, 325).]

**ACT**, n.  $A^2kt$ . Lat., *actus* (from *agere*, to put in motion). Fr., *acte*. Ger., *Akt*, *Handlung*, *That*, *Werk*. It., *atto*, *azione*. Sp., *acto*, *hecho*, *acción*. The performance of a function or of a particular part of a function (e. g., a's of respiration).—**Imperative a**. The n. of a lunate in obedience to an imperative morbid impulse. [D, 36.]—**Parturient a**. See **PARTURITION**.—**Sexual a**. See **CORRUS**.

**ACTEA** (Lat.), n. f.  $A^2k(a^3k)$ -te'/( $ta^3e^2$ )- $a^3$ . From *ἀκτῆ*, the elder-tree, from the resemblance of the berry and leaf to those of the elder. Fr., *actée*. Ger., *Actäa*. It., Sp., *actea*. Syn.: *Christophoriana* [Tournefort]. A genus of perennial herbaceous plants established by Linnaeus, of the order *Kanunculaceae*, tribe *Cimicifugeae*, distinguished by the inflorescence being composed of numerous white flowers disposed in short racemes. [B.]—**A. alba**. [Bigelow]

ACTEA ALBA.  
[J. U. and C. G. Lloyd.]

[low]. White cohosh, white baneberry, necklace-weed, white beads, Noah's-ark, coral-and-pearl; a species formerly classed as a variety of *A. spicata*, found in most parts of the United States. It closely resembles the *A. spicata*, var. *rubra*. [J. U. and C. G. Lloyd, "Drugs and Med. of N. America," Sept., 1885, p. 232.]—**A. americana** [Pursh]. Under this genus-name were formerly included *A. alba* and *A. spicata*, var. *rubra*. [J. U. and C. G. Lloyd, l. c.]—**A. spicata**.—**A. christophoriana**. A North American species having the same medicinal properties as *A. spicata*, and formerly confounded with it. [A, 260, 328, 344.]—**A. christophoriana**. See *A. spicata*.—**A. cimicifuga**, **A. monogyna**, **A. racemosa**, **A. longissima**. See *A. racemosa*.—**A. racemosa** [Linnaeus]. Fr., *actée à grappes* (ou *cimicifuge*), *chasse-punaise*. Ger., *traubenförmiges Schwarzkraut*, *schwarze Schlangennurzel*. It., *actea en grappoli*. Syn.: *A. racemosa longissima* [Linnaeus], *A. monogyna* [Walter], *Botrophis actaeoides* [Rafinesque], *Serpentaria phylla*, *rich weed*, *black snakeroot*. See **CIMICIFUGA racemosa**.—**A. rubra** [Bigelow]. Red cohosh, red baneberry. A species having a hemispherical raceme and acute petals; considered by some botanists as *A. spicata* (seu *americana*), var. *rubra*. [B, 5.]—**A. spicata** [Linnaeus]. Fr., *actée épée* (ou en *épi*,

ACTEA SPICATA. [A, 257.]

ou compacte, ou des Alpes), herbe St.-Christophe, faux ellébore noir. Ger., *Schwarzkraut*, *ährentragendes Christophskraut*. It., *erba di S. Cristoforo*, *falso ellébore nero*. Syn.: *A. christophoriana*, *Aconitum racemosum*. Baneberry, herb Christopher; a species found widely distributed through Europe and (in the var. *rubra*, together with *A. alba*) in the United States. Its root (*radix actæe spicatae*, seu *christophoriana*, seu *aconiti racemosi*) is fusiform, blackish externally and yellowish within, and has a disagreeable odor, which it loses on drying. [B, 97.] The medicinal properties are probably the same as those of *cimicifuga racemosa* (q. v.). For the *A. spicata* of Michaux, see *A. brachypetala*.—**Radix actæe americanae**. The root of *cimicifuga racemosa* (q. v.). [B.]—**Radix actæe spicatae**. The root of *A. spicata*. [B.]

**ACTÆÆ** (Lat.), n. f., pl. of *actæa*.  $A^2k(a^3k)$ -te'/( $a^3e^2$ )- $e(a^3e^2)$ . Fr., *actées*. Ger., *Actäen*. See **CIMICIFUGÆÆ**.

**ACTE** (Lat.), n. f.  $A^2k(a^3k)$ -te'(ta). Gen., *actes*. Gr., *ἀκτῆ*, *ἀκτῆς*. Fr., *acté*. Ger., *Actich*. An ancient name for a species of elder, probably the *Sambucus nigra* or the *Sambucus ebulus*. [Hippocrates (A, 311), Pliny (A, 312).]—**A's baccæ**, **A's granae**. Elderberries. [A, 305.]

**ACTE** (Fr.), n.  $A^3kt$ . An act.—**Délire des a's**. See under **DÉLIRE**.

**ACTÉE** (Fr.), n.  $A^3k$ -ta. The genus *Actæa*. [B.]—**A. à grappes**, **A. cimicifuge**. See **CIMICIFUGA racemosa**.—**A. compacte**, **A. des Alpes**, **A. en épi**, **A. épée**. See **ACTÆA spicata**.

**ACTENBEERE** (Ger.), n.  $A^3k$ -te'n-bar- $e^2$ . The dwarf-elder. [A, 315.] See **SAMBUCUS ebulus**.

**ACTINÆSTHESIA** (Lat.), n. f.  $A^2k(a^3k)$ / $ti^2n$ - $e^2s(a^3e^2s)$ -the-( $tha$ )/ $zi^2$ ( $si^2$ )- $a^3$ . From *ἀκτῆς*, a ray, and *αἴσθησις*, perception. Fr., *actinesthésie*. The faculty, possessed by certain larvae, not only of perceiving light, but of distinguishing the direction from which it comes, although in that state they have no apparent external visual organ. [G. Pouchet (A, 321).]

**ACTINAL**, adj.  $A^2k$ -ti $^2n$ - $a^2l$ ,  $a^2k$ -ti $^2n$ - $a^2l$ . From *ἀκτῆς*, a ray. Pertaining to that portion of a radiate which is in relation with the mouth, the most prominent organs being imagined to radiate from that point. [L. Agassiz (B, 39).]

**ACTINARIA** (Lat.), n. n. pl.  $A^2k(a^3k)$ -ti $^2n$ - $a(a^3)$ / $ri^2$ - $a^3$ . Kent's name for the *Non-suctoria*. [B, 77.]

**ACTINENCHYMA** (Lat.), n. n.  $A^2k(a^3k)$ -ti $^2n$ - $e^2n$ - $ki^2$ ( $ku^4$ )- $ma^3$ . Gen., *actinenchymatos* (-is). From *ἀκτῆς*, a ray, and *ἐνχυμα*, a juice or a succulent material. Fr., *actinenchyme*. Ger., *strahlzelliges Gewebe*. Sp., *actinénquimo*. The cellular tissue of a plant when it has a radiated arrangement. [Hayne (A, 323).]

**ACTINÆ** (Lat.), n. f. pl.  $A^2k(a^3k)$ -ti $^2n$ / $i^2e$ - $e(a^3e^2)$ . A division of the *Coralligena*, comprising the *Actinia* and allied genera. [B, 100.] Several of these animals were formerly used as aphrodisiacs, as depilatories, and as remedies for gravel. [A, 344.]

**ACTINIC**, adj.  $A^2k$ -ti $^2n$ / $i^2k$ . From *ἀκτῆς*, a ray. Fr., *actinique*. Ger., *aktinisch*. 1. Having the power of exciting chemical action (see *A. RAYS*). 2. Pertaining to that power or its manifestation. [J. Herschel (B, 39).]

**ACTINIDÆ** (Lat.), n. f. pl.  $A^2k(a^3k)$ -ti $^2n$ / $i^2d$ - $e(a^3e^2)$ . Fr., *actinidiens*, *anémones* (ou *orlées*) *de mer*. Ger., *Aktinien*, *Sesamomen*, *Seelilien*. The sea anemones; a family of marine animals of the class *Actinozoa*, order *Zoantharia*, sub-order *Malacodermata*, distinguished by having no evident corallum, by being rarely compound, and by having the power of locomotion. [A, 359.]

**ACTINIFORM**, adj.  $A^2k$ -ti $^2n$ / $i^2f$ - $o^2rm$ . From *ἀκτῆς*, a ray, and *forma*, form. Fr., *actiniforme*. Ger., *strahlenförmig*. Sp., *actiniforme*. Radiate; having the shape of a ray. [B, 39.] Cf. **ACTINOID**.

**ACTINIDÆ** (Lat.), n. f. pl.  $A^2k(a^3k)$ -ti $^2n$ - $i(e)$ / $i^2d$ - $e(a^3e^2)$ . See **ACTINIDÆ**.

**ACTINIOCHROME**, n.  $A^2k$ -ti $^2n$ / $i^2o$ - $k$ -rom. From *ἀκτῆς*, a ray, and *χρῶμα*, color. The red coloring matter of certain **ACTINIAS**. [A, 316.]

**ACTINISCEÆ** (Lat.), n. f. pl.  $A^2k(a^3k)$ -ti $^2n$ - $i^2s$ / $se(kc^2)$ - $e(a^3e^2)$ . In botany, a sub-family of the *Diatomaceæ*, having cells and stellate bristles. [A, 316.]

**ACTINISM**, n.  $A^2k$ -ti $^2n$ - $i^2zm$ . 1. The actinic property of rays of light. 2. The science of radiant light or heat. [R. Hunt, Craig (B, 39).]

**ACTINIUM** (Lat.), n. n.  $A^2k(a^3k)$ -ti $^2n$ / $i^2u$ - $u^3m(u^4m)$ . A metal, said to have been discovered by Phlipson in 1881, having the property of growing dark in direct sunlight. ["Chem. News," xliii, p. 283 (B).]

**ACTINOBOlia** (Lat.), n. f.  $A^2k(a^3k)$ -ti $^2n$ - $o$ -bo/ $li^2$ - $a^3$ . Gr., *ἀκτινοβολία* (from *ἀκτινοβολέειν*, to send forth rays). Fr., *actinobolisme*. Ger., *Strahlenverfen*. It., Sp., *actinobolismo*. Syn.: *diradiatio*. 1. Diradiation, irradiation; an old term for the process by which "the spirits" conveyed the impulses of the will to the various parts of the body. [A, 358.] 2. A term applied by Van Helmont to certain phenomena characterized by insensibility (constituting what is now called hypnotism), observed in 1646 by Kircher, in birds and other animals, as the result of their being made to look steadily at a brilliant object. [A, 314, 321.] Cf. **MESMERISM** and **SYNCHYSIS**.

**ACTINOBOlISM**, n.  $A^2k$ -ti $^2n$ - $o^2b$ / $o$ - $li^2zm$ . See **ACTINOBOlia**.

**ACTINOBOlISMUS** (Lat.), n. m.  $A^2k(a^3k)$ -ti $^2n$ - $o^2b$ - $o$ - $li^2z$ ( $li^2s$ )- $mu^3s(mu^4s)$ . See **ACTINOBOlia**.

**ACTINOCARPOUS**, adj.  $A^2k$ -ti $^2n$ - $o$ -ka' $rp$ / $u^3s$ . Lat., *actinocarpus* (from *ἀκτῆς*, a ray, and *καρπός*, fruit). Fr., *actinocarpe*. Ger., *strahlenfrüchtig*. Sp., *actinocarpo*. In botany, having radiate fruits. [A, 306.]

**ACTINOCERATE**, **ACTINOCEROUS**, adj's.  $A^2k$ -ti $^2n$ - $o^2s$ / $e^2r$ -at, - $u^3s$ . Lat., *actinoceratus*, *actinocerus* (from *ἀκτῆς*, a ray, and

*κέρας*, a horn). In zoology, having horns or analogous parts arranged in a radiated form.

**ACTINO-CHEMISTRY**, n.  $A^2k/ti^2n-o-ke^2m/i^2st-ri^2$ . See under **CHEMISTRY**.

**ACTINOASTRA** (Lat.), n. n. pl.  $A^2k(a^2k)-ti^2n-o-ga^2s(ga^2s)/tra^3$ . From *aktis*, a ray, and *αστήρ*, the stomach. Haeckel's term for the star-fishes, from their having a radiated digestive apparatus. [B.]

**ACTINOGRAPHY**, n.  $A^2k-ti^2n-o^2g/ra^2f-i^2$ . From *aktis*, a ray, and *γράφειν*, to write. Fr., *actinographie*. See **ACTINOLOGY**.

**ACTINOID**, adj.  $A^2k/ti^2n-oid$ . Gr., *ἀκτινοειδής*, *ἀκτινώδης*. Lat., *actinoides*, *eradians*. Fr., *actinoïde*. Ger., *strahlenähnlich*. Having a radiate form (said of certain zoophytes in which the body-cavity is partitioned off by radial septa). [B. 39.]

**ACTINOLOGY**, n.  $A^2k-ti^2n-o^2l/o-j^2$ . From *aktis*, a ray, and *λόγος* (see *logy*). Fr., *actinologie*. Ger., *Strahlenlehre* (1st def.). 1. The science of radiant light. 2. That part of zoology which deals with the *Radiata*. [A. 306.]

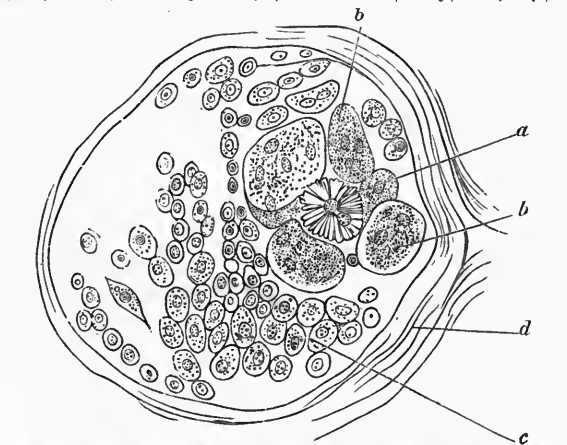

**ACTINOMERE**, n.  $A^2k-ti^2n/o-mer$ . From *aktis*, a ray, and *μέρος*, a part. Fr., *actinomère*. Sp., *actinómera*. A segment of a ctenophorous radiate animal included between two adjacent ctenophores. [A. 359.]

**ACTINOMERIS** (Lat.), n. f.  $A^2k(a^2k)-ti^2n-o^2m/e^2-ri^2s$ . From *aktis*, a ray, and *μέρις*, a portion. A genus of North American perennial herbs of the *Compositae*, established by Nuttall; allied to the *Helianthus*. [A. 252, 360.]—*A. hellanthoides* [Nuttall]. Gravel-weed; a species found on the Western prairies. Said to be useful for gravel and dropsy. ["Therap. Gaz.," Sept., 1881 (A. 247), A. 360.]—*A. squarrosa* [Nuttall]. Syn.: *Coreopsis alternifolia* [Linnaeus]. A species found in western New York and the Western States. [A. 360.]

**ACTINOMETRY**, n.  $A^2k-ti^2n-o-mo^2m/e^2t-ri^2$ . From *aktis*, a ray, and *μέτρον*, a measure. Measurement of the heat radiated from a surface. [B. 39.]

**ACTINOMORPHIC, ACTINOMORPHOUS**, adj's.  $A^2k-ti^2n-o-mo^2rf/i^2k, -u^2s$ . From *aktis*, a ray, and *μορφή*, form. Fr., *actinomorphe*. Ger., *strahlenförmig*. Having a radiated form; developed symmetrically from a common center (said especially of flowers). [B. 75.]

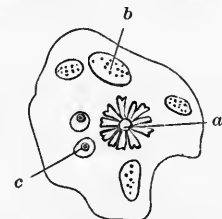

**ACTINOMYCES** (Lat.), n. m.  $A^2k(a^2k)-ti^2n-o^2m/i^2(u^6)-sez-(ke^2)s$ . Gen., *actinomyces* (-is). From *aktis*, a ray, and *μύκης*, a

SECTION OF AN ACTINOMYCOSIS NODULE IN A BRONCHIOLE. (AFTER MARCHAND [A. 319].)

a, an *Actinomyces* collection of recent formation; b, giant-cells with several nuclei; c, epithelioid cells; d, the fibrous wall of the bronchiole.

mushroom. Ger., *Strahlenpilz*. Syn.: *Discomyces* [Rivolta]. A genus of parasitic organisms probably belonging to the *Fungi*, although its affinities are uncertain. [B. 54.]—*A. bovis* [Harz]. The species that produces the disease termed actinomycosis (q. v.). A colony of *A.*, as seen in the abscess-like cavities of actinomycosis, occurs in the form of small grains of a spherical or irregular shape and of a sulphur-yellow color, presenting an internal granular mass and an outer zone composed of the mycelia disposed in a radiating manner. These elements are cylindrical, claviform, or moniliform, and sometimes bifurcated. At its inner extremity each one of them terminates in a fibrilla which loses itself in the granular central zone of the nodule amidst a multitude of similar interlacing fibrillae. The maximum diameter of the elements is from 3 to 10  $\mu$ , and their maximum length from 20 to 30  $\mu$ . They resist the action of strong acids, alkalies, ether, and chloroform, and do not present the reactions of albuminoids. [Firket, "Rev. de méd.," April, 1884, p. 273 (B).] See also **ACTINOMYCOSIS**.

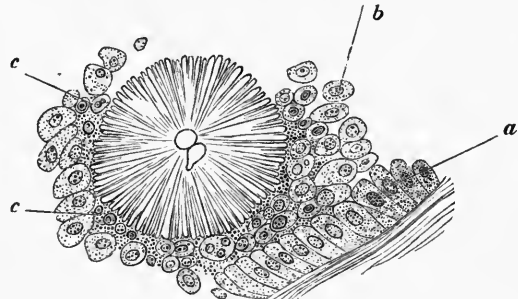

A STILL SMALLER ACTINOMYCOSIS IN THE INTERIOR OF A GIANT-CELL. (AFTER MARCHAND [A. 319].)

a, the *Actinomyces*; b, lymph corpuscles; c, a nucleus of the giant-cell.

**ACTINOMYCOMA** (Lat.), n. n.  $A^2k(a^2k)-ti^2n-o-mi(mu^6)-ko'-ma^3$ . Gen., *actinomycom'atos* (-tis). For deriv., see **ACTINOMYCES** and *-oma*.\* Ger., *Actinomykom*. Johne's term for a tumor-like mass formed as a characteristic of the disease actinomycosis (q. v.). [Marchand (A. 319).]

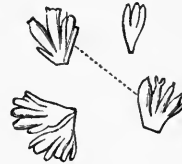

**ACTINOMYCOSIS** (Lat.), n. f.  $A^2k(a^2k)-ti^2n-o-mi(mu^6)-ko'si^2s$ . Gen., *actinomyco'seos*. Fr., *actinomycose*. Ger., *Actinomycose*,

A LARGER ACTINOMYCES IN A LONGITUDINAL SECTION OF A BRONCHIOLE. (AFTER MARCHAND [A. 319].)

a, the epithelia of the bronchiole; b, epithelioid cells; c, lymph corpuscles.

*Wurm, Knochenwurm, Strahlenpilzkrankung*. It., *actinomicosi*. Sp., *actinomicosis*. An infectious disease of cattle, first described by Bollinger, characterized mainly by tumor-like growths of the jaws, due to the lodgment and growth of the *Actinomyces bovis*. The substance of the tumors, which spring mostly from the alveoli of the lower molars, resembles that of certain sarcomata in having a granulation-like structure, but the growths contain abscess-like cavities inclosing sulphur-yellow bodies consisting of felted masses of the mycelia of the *Actinomyces*. The disease has also been observed in man, in connection with sinuses leading to the sockets of the teeth, or first making its appearance in the internal organs. It is chronic in its course, and when it begins in the jaw, is prone to extend by continuity to the neck, the chest, or the vertebrae, and to end fatally. (Bollinger, Ponfick (abstr. in "Brit. Med. Jour.," April 15, 1882); Marchand (A. 319); J. B. Murphy,

THE SEPARATE PARTS, ISOLATED BY PRESSURE. (AFTER MARCHAND [A. 319].)

tebrae, and to end fatally. (Bollinger, Ponfick (abstr. in "Brit. Med. Jour.," April 15, 1882); Marchand (A. 319); J. B. Murphy,

ELEMENTS OF ACTINOMYCES FROM A TUMOR OF AN OX'S JAW. (AFTER MARCHAND [A. 319].)

C. Fenger, W. T. Belfield, et al. ("N. Y. Med. Jour.," Jan. 3, 1885, p. 17).]

**ACTINOMYCOTIC**, adj.  $A^2k-ti^2n-o-mi-ko^2t/i^2k$ . Fr., *actinomycotique*. Ger., *actinomycotisch*. Pertaining to or depending on actinomycosis or the *Actinomyces*.

**ACTINOPHOEUS**, adj.  $A^2k-ti^2n-o^2f/o-ru^2s$ . Gr., *ἀκτινοφόρος*. Lat., *actinophorus*. Fr., *actinophore*. Sp., *actinóforo*. Spine-bearing, spiny. [B. 39.]

**ACTINOPHYRIDÆ, ACTINOPHYRYNA** (Lat.), n's f. and n. pl.  $A^2k(a^2k)-ti^2n-o-fr(i^2ru^6)/i^2d-e(a^2s-e^2), -fri^2(i^2ru^6)-ie/na^3$ . Ger., *Sonnenthierchen*. [A. 316.] A family of rhizopods, of which the typical genus is the *Actinophrys*. [A. 258.]

**ACTINOPHTHALMIC**, adj.  $A^2k-ti^2n-o^2p(o^2f)-tha^2l/mi^2k$ . Lat., *actinophthalmus* (from *aktis*, a ray, and *ὀφθαλμικός*, pertaining to the eye). Fr., *actinophthalme*. In zoology, having eyes the chorioid tapetum of which reflects light to a high degree. [A. 306.]

**ACTINOPHYLLUM** (Lat.), n. n.  $A^2k(a^2k)-ti^2n-o-fi^2(i^2ru^6)/lu^2m-du^2m$ . From *aktis*, a ray, and *φύλλον*, a leaf. Fr., *actinophylle*. Sp., *actinófila*. A genus of araliaceous trees, established by Ruiz and Pavón, indigenous to Peru. Two species, *A. angulatum* and *A. pediculatum*, furnish a gum resembling gum arabic. [A. 305, 344.]

**ACTINOPHYTA** (Lat.), n. n. pl.  $A^2k(a^2k)-ti^2n-o^2f/i^2t(u^6)-a^3$ . From *aktis*, a ray, and *φυτόν*, a plant. Fr., *actinophytes*. Ger., *Actinophyten*. Sp., *actinófitos*. Plants of the *Compositae* the flowers of which are arranged in a radiate form. [A. 334.]

**ACTINOSOMA** (Lat.), n. n.  $A^2k(a^2k)-ti^2n-o-so/ma^3$ . Gen., *actinosom'atos* (-tis). From *aktis*, a ray, and *σῶμα*, a body. The entire body of an *Actinozoon*, whether simple or composed of several zooids. [A. 359.]

**ACTINOSTEOPHYTE**, n. A<sup>2</sup>k-ti<sup>2</sup>n-o<sup>2</sup>s'te-o-fit. Lat., *actinosteophyton* (from *ἀκρίς*, a ray, *ὄστρον*, a bone, and *φύω*, a growth). Fr., *actinostéophyte*, *ostéophyte rayonné*. Ger., *Actinostéophyl*, *strahlendes Knochengeväuch*. A radiated osteophyte. [Lobstein (A, 322).]

**ACTINOSTOMATOUS**, adj. A<sup>2</sup>k-ti<sup>2</sup>n-o-sto<sup>2</sup>m/a<sup>2</sup>t-u<sup>2</sup>s. From *ἀκρίς*, a ray, and *στόμα*, the mouth. Fr., *actinostome*. Ger., *strahl-mundig*. [A, 316.] Sp., *actinostomo*. In zoölogy, having the mouth radiated. [A, 334.]

**ACTINOSTOME**, n. A<sup>2</sup>k-ti<sup>2</sup>n-o-stom: Fr., *actinostome*. The mouth of a radiate animal. [L. Agassiz (B, 39).]

**ACTINOSTOMOUS**, adj. A<sup>2</sup>k-ti<sup>2</sup>n-o-s'to-mu<sup>2</sup>s. See ACTINOSTOMATOUS.

**ACTINOTHYRIUM** (Lat.), n. n. A<sup>2</sup>k(a<sup>2</sup>k)-ti<sup>2</sup>n-o-thi<sup>2</sup>(thu<sup>2</sup>)ri<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). From *ἀκρίς*, a ray, and *θύριον*, a cover, from the radiated integument of the sporidia. [A, 248.] Sp., *actinotiro*. A genus of *Fungi* of the *Pyrenomyces*, established by Kunz. [A, 305.]

**ACTINOTIC**, adj. A<sup>2</sup>k-ti<sup>2</sup>n-o<sup>2</sup>t'i<sup>2</sup>k. Gr., *ἀκτινωτός*. Fr., *actinotique*. Ger., *actinotisch*. Radiate, provided with radii. [A, 305.]

**ACTINOZOA** (Lat.), n. n. pl. A<sup>2</sup>k(a<sup>2</sup>k)-ti<sup>2</sup>n-o-zo<sup>2</sup>a<sup>2</sup>. From *ἀκρίς*, a ray, and *ζῷον*, an animal. Fr., *actinozoaires*. Ger., *Strahlenthiere*. Sp., *actinozoarios*. Blainville's name for a class of marine animals, of which the sea-anemones are the type, of the sub-kingdom *Coelenterata*, in which the alimentary canal, although opening below into the general body-cavity, is separated from the body-wall by a circumvisceral space frequently subdivided into compartments by radiating vertical partitions (mesenteries). [A, 328, 359; B, 28.]

**ACTINOZOARIUS** (Lat.), adj. A<sup>2</sup>k(a<sup>2</sup>k)-ti<sup>2</sup>n-o-zo-a(a<sup>2</sup>)ri<sup>2</sup>-u<sup>2</sup>s-(u<sup>2</sup>s). Fr., *actinozoaire*. Ger., *strahlenthierrig*. In zoölogy, having a regular radiated arrangement, either of the body itself or of the different organs. [Blainville (A, 316).]

**ACTINOZOON** (Lat.), n. n. A<sup>2</sup>k(a<sup>2</sup>k)-ti<sup>2</sup>n-o-zo<sup>2</sup>o<sup>2</sup>n. See pl., ACTINOZOA.

**ACTINULA** (Lat.), n. f. A<sup>2</sup>k(a<sup>2</sup>k)-ti<sup>2</sup>n-u<sup>2</sup>(u)-la<sup>2</sup>. A name given by Allman to the larval condition of the *Hydrophora*, when tentacles first form at the oral extremity. [B, 100.]

**ACTION**, n. A<sup>2</sup>k-shu<sup>2</sup>n. Lat., *actio*, *actus* (from *agere*). Gr., *πράξις*, *ἐνέργεια*. Fr., *action*, *acte*. Ger., *Wirkung*, *Bewegung*. It., *azione*. Sp., *acción*. 1. In mechanics, the effect of a force, whether apparent or concealed. [B, 2.] 2. Any chemical change. Cf. REACTION. 3. In physiology, the performance of a function. 4. In pathology, a morbid process (e. g., *febrile a.*). 5. In therapeutics, the operation of a drug.—**A. current**. See UNDER CURRENT.—**A. of arrest**. See INHIBITION.—**Animal a's**. Lat., *actiones animales*. Fr., *a's animales*. Ger., *Seelenverrichtungen*. The operations of the mind and the voluntary movements of the body. [A, 322, 343.]—**Automatic a.** See REFLEX a.—**Capillary a.** See CAPILLARY ATTRACTION.—**Catalytic a.** Contact a. See CATALYSIS.—**Convulsive a.** See CONVULSIVE.—**Cumulative a.** See CUMULATIVE.—**Diastaltic a.** See REFLEX a.—**Electro-capillary a.** The development of electrical phenomena as the result of chemical reaction taking place between two dissimilar liquids connected with each other by a capillary space the walls of which act to a certain extent as a conducting agent, and complete the circuit between the two liquids considered as a galvanic couple. When one of the liquids is a solution of a metallic salt, the metal set free by the reduction of the latter is deposited on the walls of the capillary space, often in sufficient quantity to shatter the containing medium. Electro-capillary a. has been thought by Becquerel and by Wartmann to play an important part in facilitating the processes of tissue-respiration and in the development of electrical currents in muscles and nerves. [B, 2.]—**Inhibitory a.** See INHIBITION.—**Local a.** 1. Chemical a. producing currents between different parts of the same cell of a galvanic battery, and detracting from the efficiency of the current external to the cells. [B, 2.] 2. The a. of a remedy upon the parts with which it comes in contact, as distinguished from its a. on the system at large.—**Natural a's**. Lat., *actiones naturales*. Fr., *actions naturelles*. Ger., *natürliche Verrichtungen*. Those that serve the needs of organic life, like the ingestion and digestion of food. [A, 322, 343.]—**Peristaltic a.** See PERISTALSIS.—**Private a's**. An old term for those which concern only individual parts. [A, 343.]—**Pseudo-motor a.** Ger., *pseudomotorische Wirkung*. A term applied by Heidenhain to the phenomena observed as the result of stimulation of the chorda tympani after section of the hypoglossal nerve. Movements of the tongue result which he regards as due to increased secretion of the intra-muscular lymphatics. [Landois (K).]—**Public a's**. An old term for those that concern the body as a whole, as opposed to *private a's*. [A, 343.]—**Reflex a.** Lat., *actio reflexa*. Fr., *acte (ou mouvement, ou phénomène) réflexe*. Ger., *Reflexbewegung*. It., *azione riflessa*. Sp., *acción reflexa*. Syn.: *automatic a.*, *diastaltic a.* [M. Hall]. *reflex*. An a. (usually an involuntary muscular movement) which takes place as the result of an impression made upon a sensory nerve, conveyed to the central nervous system, and thence reflected along an efferent or motor nerve to the part in which the a. occurs. [A, 321.]—**Respective a's**. Those peculiar to one organ. [A, 316.]—**Safety-valve a.** A condition described by Hunter, in which the tricuspid valve does not close completely, but allows a certain amount of blood to regurgitate from the ventricle into the auricle. The phenomenon occurs especially in cases of resistance in the pulmonary circulation. [K.]—**Sexual a.** The operation of the generative apparatus. [A, 336.]—**Vital a's**. Lat., *actiones vitales*. Fr., *actes (ou mouvements) vitaux*. Ger., *Lebensverrichtungen*. A's which, like those of the brain, the heart, and the lungs, are essential to the continuance of life. [A, 322.] Cf. REACTION.

**ACTIVATE**, v. tr. A<sup>2</sup>k-ti<sup>2</sup>v-at. Ger., *wirksam machen*. Sp., *activar*. To make active. [A, 361.]

**ACTIVE**, adj. A<sup>2</sup>k-ti<sup>2</sup>v. Lat., *activus*. Fr., *actif*. Ger., *aktiv*,

*thätig*, *wirkend*, *wirksam*. It., *attivo*. Sp., *activo*. Acting or capable of acting, as opposed to *passive*, *inert*, *latent*, etc. For special applications of the word, see under ANEURISM, ATROPHY, CONGESTION, DEMENTIA, DROPSY, ELECTRICITY, ELECTRODE, EXERCISE, FLUXION, HEMORRHOGE, LIFE, PRINCIPLE, REMEDY, and TREATMENT.—**Optically a.** Ger., *optisch aktiv* (oder *wirksam*). Capable of rotating the plane of polarization of polarized light through a certain measurable arc. [B.]

**ACTIVITY**, n. A<sup>2</sup>k-ti<sup>2</sup>v-i<sup>2</sup>-ti<sup>2</sup>. Gr., *ἐνέργεια*. Lat., *activitas*. Fr., *activité*. Ger., *Activität*, *Thätigkeit*, *Wirksamkeit*. It., *attività*. Sp., *actividad*. Capability of action; vitality; sensibility. [A, 305.]—**Sense of muscular a.** See MUSCULAR SENSE.

**ACTON**, n. A<sup>2</sup>k'to<sup>2</sup>n. A village in England, near London, having a spring of bitter, purgative waters, now disused, rich in magnesium sulphate. [A, 341, 343, 344.]

**ACTUAL**, adj. A<sup>2</sup>k'tu<sup>2</sup>a<sup>2</sup>l. Gr., *ἐνέργως*. Lat., *actual*. Fr., *actuel*. Ger., *wirklich*. It., *attuale*. Sp., *actual*. Acting immediately and manifestly, as opposed to *potential*. See A. CAUTERY.

**ACTUARIUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-a(a<sup>2</sup>)ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Anciently, a scribe; a title of dignity (corresponding to that of sub-questor) conferred upon certain physicians in Constantinople. [A, 314.]

**ACTUATION**, n. A<sup>2</sup>k'tu<sup>2</sup>a<sup>2</sup>-shu<sup>2</sup>n. Lat., *actinatio*, *incitatio ad agendum*. Ger., *Actuation*, *Anregung zu Thätigkeit*. Sp., *actuación*. 1. An old term expressing the supposed reaction of the vital powers on a drug after its ingestion, whereby it was made to exert its effect. [A, 358.] 2. See ACTINOBOLIA (1st def.).

**ACTUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>s(u<sup>2</sup>s). Gen., *actus*. From *agere*, to act. See ACT.

**ACUA**, n. A Brahmanic name for zedoary. [A, 344.]

**ACUARIA** (Lat.), n. f. A genus of *Filaridae*. [Bremser (L, 6).]

**ACUATE**, v. tr. A<sup>2</sup>k'tu<sup>2</sup>-at. Lat., *acuare*. Ger., *acuiren*. To sharpen, to make pungent or corrosive. [A, 315.]

**ACUATE**, adj. A<sup>2</sup>k'tu<sup>2</sup>-at. Lat., *acuatus*. Sharp, sharpened. [A, 302.]

**ACUCHIBALSAM** (Ger.), n. A<sup>3</sup>-ku<sup>2</sup>-ch'e-ba<sup>2</sup>l'za<sup>2</sup>m. See ACOUCHI BALSAM.

**ACUCLAUSUR** (Ger.), n. A<sup>3</sup>-ku<sup>2</sup>-kla<sup>2</sup>-u-zur'. See ACUPRESSURE.

**ACUDUCTOR** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-du<sup>2</sup>kt(dukt)<sup>2</sup>o<sup>2</sup>r. Gen., *acuductoris*. From *acus*, a needle, and *ducere*, to conduct. Fr., *porte-aiguille*. Ger., *Nadelführer*. Syn.: *rhapidagogus*. A needle-conductor. [A, 322.]

**ACUFILOPRESSURE**, n. A<sup>2</sup>k-u<sup>2</sup>-fi<sup>2</sup>lo-pre<sup>2</sup>s-shur. From *acus*, a needle, *filum*, a thread, and *pressura*, pressure. Ger., *Acuifilopressur*. It., *acufilopressura*. Billroth's term for a method of acupuncture (*q. v.*) in which the vessel is confined between the needle on one side and a ligature which binds it against the needle on the other. [A, 314; E, 21.]

**ACUI**, n. A<sup>2</sup>ku<sup>2</sup>-i<sup>2</sup>. See ACUE.

**ACUIREN** (Ger.), v. tr. A<sup>3</sup>-ku<sup>2</sup>-e're<sup>2</sup>n. See ACUATE.

**ACUITRE-HUARIACUA** (Sp.), n. A<sup>3</sup>-kwet'tha-wa<sup>2</sup>-re-a<sup>2</sup>-kwa<sup>2</sup>. A West Indian plant, the juice of the root of which is used as a febrifuge, as a cardiac tonic, as an antidote in cases of poisoned wounds, to allay renal colic and ardor urinae, and for various other purposes. [A, 337.]

**ACUTION**, n. A<sup>2</sup>k-u<sup>2</sup>-i<sup>2</sup>shu<sup>2</sup>n. Lat., *acuitio* (from *acuere*, to sharpen). A sharpening or intensification of the action of a drug by the use of another drug. [A, 322.]

**ACUITRE-HUARIACUA** (Sp.), n. A<sup>3</sup>-kwet'tha-wa<sup>2</sup>-re-a<sup>2</sup>-kwa<sup>2</sup>. See ACUITRE-HUARIACUA.

**ACUITY**, n. A<sup>2</sup>k-u<sup>2</sup>-i<sup>2</sup>te<sup>2</sup>i<sup>2</sup>. Gr., *ὀξύτης*. Lat., *acuitas*. Fr., *acuité*. Ger., *Schärfe*. It., *acutezza*. Sp., *agudeza*. 1. Acuteness, keenness. [A, 306.] 2. Acrimony. [A, 322.]—**Visual a.** Fr., *acuité visuelle*. Ger., *Schärfeye*. It., *acutezza visuale*. Sp., *agudeza de la vista*. The keenness or perfection of vision at the macula lutea. [F.]

**ACULA** (Lat.), n. f., dim. of *acus*. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-la<sup>2</sup>. Gr., *ῥαφή-διον*. A little needle. [A, 312.]

**ACULARANTO** (Ar.), n. A species of *Euphorbia*. [A, 337.]

**ACULEATA** (Lat.), n. n. pl. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-le(la)-a(a<sup>2</sup>)ta<sup>2</sup>. See ACULEATES.

**ACULEATE**, **ACULEATED**, adj's. A<sup>2</sup>k-u<sup>2</sup>-le-at, -at-e<sup>2</sup>d. Lat., *aculeatus*. Fr., *aculé*. Ger., *stachelig*. It., *aculeato*. Sp., *aculeado*. 1. In botany, provided with prickles. [B, 2.] In zoölogy, provided with a sting. [B, 39.]

**ACULEATES**, n. pl. A<sup>2</sup>k-u<sup>2</sup>-le-atz. Lat., *aculeata*. Fr., *aculés*. Ger., *Stachelträger*. Sp., *aculeíferos*. Cuvier's name for a division of hymenopterous insects having no ovipositor, but (except the males) a sting capable of being withdrawn. [A, 305.]

**ACULEATO-CILIATUS** (Lat.), adj. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-le(la)-a(a<sup>2</sup>)-ci<sup>2</sup>li<sup>2</sup>ti<sup>2</sup>us. From *aculeatus*, aculeate, and *ciliatus*, an eyelash. In botany, beset with bristles or points like the eyelashes. [A, 343.]

**ACULEIFORM**, adj. A<sup>2</sup>k-u<sup>2</sup>-le-i<sup>2</sup>-fo<sup>2</sup>rm. Fr., *aculéiforme*. Ger., *stachelförmig*. Sp., *aculeiforme*. Having the shape of a spine. [B, 39.]

**ACULEOLATE**, adj. A<sup>2</sup>k-u<sup>2</sup>-le-o-lat. From *aculeolus* (dim. of *aculeus*), a little prick. Covered with small prickles or points. [Gray (A, 302).]

**ACULEOUS**, adj. A<sup>2</sup>k-u<sup>2</sup>-le-u<sup>2</sup>s. Having the form of a prickle or sting. [B, 39.]

**ACULEUS** (Lat.), n. m. A<sup>2</sup>k(a<sup>2</sup>k)-u<sup>2</sup>(u)-le(la)-u<sup>2</sup>s(u<sup>2</sup>s). Fr., *aigu-*

*illon, épine.* Ger., *Stachel, Legestachel* (3d def.). It., *aculeo*. 1. In botany, a prickle. [B.] 2. In zoology, a sting. [B, 39.] 3. The ovipositor of an insect. [A, 305.] 4. A thorn or a splinter-like foreign body. [A, 315.]

**ACULON, ACULOS** (Lat.), n's n. and m.  $\Delta^2k(a^3k)u^2(u)lo^2n$ , -lo's. Gr., *ἀκῦλος*. Sp., *aculos*. The ancient name of an edible acorn. [A, 311, 315, 337.]

**ACUMEN** (Lat.), n. n.  $\Delta^2k(a^3k)u^2(u)me^2n$ . Gen., *acuminis*. From *acuere*, to sharpen. Ger., *Vorspitze*. Sp., *acumen*. A point, a sting; a bony prominence, especially the tuberosity of the ischium. [Deventer (A, 325).] In botany, a sharp-pointed prolongation. [B.] —A, *nasal*. The pinching or pointed contraction of the nose that precedes death. [A, 312.]

**ACUMETER**, n.  $\Delta^2k-u^2me^2t-u^6r$ . See **ACOMETER**.

**ACUMINATE, ACUMINATED**, adj's.  $\Delta^2k-u^2mi^2n-at$ , -at<sup>ed</sup>. Gr., *ἀκρος*. Lat., *acuminatus*. Fr., *acuminé*. Ger., *zugespitzt*. It., *acuminato*. Sp., *acuminado, acuminé*. In botany, becoming gradually narrow and pointed (said of leaves). A leaf is *a. at the base* when the narrowing begins near the base; but, if the leaf begins to be narrow only near its apex, it is said to be *a. without* any qualifying expression. [B.] Pointed (said of papules, etc.).

**ACUMINATION**, n.  $\Delta^2k-u^2mi^2n-a'shu^3n$ . Lat., *acuminatio*. Ger., *Zuspitzen*. The process of becoming or the state of being acuminate.

**ACUMINIFEROUS**, adj.  $\Delta^2k-u^2mi^2n-i^2f'e^2r-u^3s$ . From *acumen*, a point, and *ferre*, to bear. Fr., *acuminifère*. Ger., *spitztragend*. Sp., *acuminifero*. In zoology, having tubercles somewhat pointed. [A, 306.]

**ACUMINIFOLIOUS**, adj.  $\Delta^2k-u^2mi^2n-i^2fo'li^2-u^3s$ . From *acumen*, a point, and *folium*, a leaf. Fr., *acuminifolié*. Ger., *spitzblättrig*. Sp., *acuminifoliado, foliagudo*. In botany, having acuminate leaves. [A, 306.]

**ACUMINOSE, ACUMINOUS**, adj's.  $\Delta^2k-u^2mi^2n-os$ , -u's. See **ACUMINATE**.

**ACUMINULATE**, adj.  $\Delta^2k-u^2mi^2n'u^2-lat$ . Dim. of *acuminate*. Having an abruptly tapered point. [A, 316.]

**ACUOPHONIA** (Lat.), n. f.  $\Delta^2k(a^3k)u^2(u)-o-f'o'ni^2-a^3$ . See **ACUOPHONIA**.

**ACUPUNCTURE** (Fr.), n.  $\Delta^2k-u^2po^2n^2-tu^6r$ . *Acupunctura*.

**ACUPRESS**, v. tr.  $\Delta^2k-u^2pre^2s'$ . To treat by acupressure (q. v.). [A, 313.]

**ACUPRESSION**, n.  $\Delta^2k-u^2pre^2s'shu^3n$ . Lat., *acupressio*. See **ACUPRESSURE**.

**ACUPRESSURE**, n.  $\Delta^2k-u^2pre^2s'shur$ . Lat., *acupressura*, *acupressio* (from *acus*, a needle, and *premere*, to press). Fr., *acupressure, acupression*. Ger., *Acupressur, Acuclausur, Nadeldruck, Nadeldruckung*. It., *acupressura, agopressura, agopressione* [Rizzoli]. Sp., *acupressura, acupresion*. A process of arresting hemorrhage from divided blood-vessels, or impeding the flow of blood through vessels that are not divided, by means of pressure with a needle passed into the tissues; advocated in 1859 by Sir J. Y. Simpson as "a new hemostatic process founded on the principle of the temporary metallic compression of arteries." Similar procedures are said to have been employed before by Petit and Rizzoli. [Sir J. Y. Simpson, "Edinburgh Med. Jour.," Jan., 1860, p. 645; G. A. Peters, "N. Y. Med. Jour.," June, 1869, p. 225; L. Prengueber, "Gaz. hebdom. de méd. et de chir.," July 8, 1870, p. 420; Hofmokl (A, 319).] Simpson's *first method* "consists in passing a needle through the flaps or sides of the wound, so as to cross over and compress the mouth of the bleeding artery or its tube, just in the same way as, in fastening a flower in the lapel of our coat, we cross over and compress the stalk of it with the pin which fixes it, and with this view push the pin twice through the lapel." [Peters, l. c.] In Simpson's *second method*, a pin or a needle armed with fine annealed iron wire, to facilitate its removal, is thrust into the fresh surface of the wound at a short distance from the bleeding vessel; passed on and its point made to emerge as near the vessel as possible without transfixing it; then on again over the vessel, completely compressing it; then

Cutaneous surface of the flap.

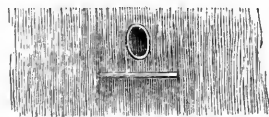

FIG. 2.—(AFTER PIRRIE AND KEITH [PETERS, l. c.] )  
The inner surface of the same flap.

its point dipped once more into the fresh surface close to the vessel on the opposite side; and forced on farther until its point emerges a second time on the cut surface. [Peters, l. c.] In Simpson's *third method*, a needle, threaded with twisted annealed iron wire, is thrust into the soft part on one side of the artery, and carried on behind it, and the point is made to emerge on the opposite side of the vessel; a loop of wire is now passed over the point of the needle, brought back over the tract of the artery and behind the eye-end of the needle, drawn upon with force enough to close the vessel, and then

FIG. 3.—SIMPSON'S SECOND METHOD. (AFTER PIRRIE AND KEITH [PETERS, l. c.] )

fixed by a half-twist around the shank of the needle. J. C. Hutchison has modified this method, for application to the continuity of vessels, as follows: "The artery is first exposed by the usual incisions: a loop of wire about eight inches long is laid in the wound, parallel with and on the side of the vessel next the head-end of the pin; the pin is now carried through the flap, from its

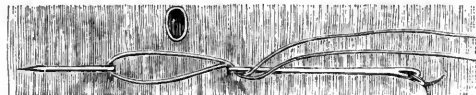

FIG. 4.—SIMPSON'S THIRD METHOD. (AFTER PIRRIE AND KEITH [PETERS, l. c.] )

cutaneous surface, half an inch more or less (according to the depth of the vessel) back from the edge of the incision—say to bring it down to the level or plane of the artery, and then over the wire and beneath the vessel, without disturbing its . . . relations . . . . . When the pin has emerged from beneath the artery, the

First step in the first variety.

wire noose is thrown over the point-end, which is then carried through the opposite flap at a point corresponding to that at which it entered. The wire loop is next brought over the 'tract' of the vessel, which is now compressed between the pin below and the wire above; and, lastly, the wire is fixed by a half-turn around the

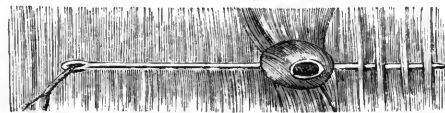

FIG. 6.—(AFTER PIRRIE AND KEITH [PETERS, l. c.] )  
The same, after rotation.

pin." [Peters, l. c.] Simpson's *fourth method* is the same as the third, except that a pin is used instead of the threaded needle. [Peters, l. c.] The *fifth*, or *Aberdeen method*, or *Aberdeen twist*, was devised independently by Knowles, of Aberdeen, and Simpson. There are two varieties. In the first variety, a pin or needle is

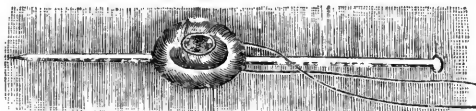

FIG. 7.—SIXTH METHOD. (AFTER PIRRIE AND KEITH [PETERS, l. c.] )

passed under the artery as in Fig. 5; a half-rotation is then given to it, and its point is fixed in the tissues as in Fig. 6. In the second variety, the pin or needle is passed into the tissues by the side of and parallel with the artery; a quarter-rotation is then given to it, and it is fixed as in the first variety. [Peters, l. c.] In the *sixth method*, devised by Keith, of Aberdeen, a pin is passed under the artery; a loop of annealed iron wire is then thrown over its point, the two ends are crossed behind its shaft, the loop is drawn tight

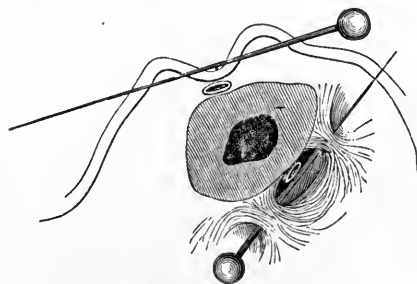

FIG. 8.—SEVENTH METHOD. (AFTER HOFMOKL [A, 319].)

enough to compress the artery, and the wire is fixed by twisting it around the pin. [Peters, l. c.] In the *seventh method* (two varieties of which are shown in Fig. 8), the pin is passed through the tissues on either side of the artery, over which its middle portion rests, compressing the vessel upon the bone beneath. In a procedure the reverse of this (see Fig. 9), the needle is passed under the artery in

such a manner that the tension of the included integument produces the necessary pressure. [Peters, l. c.; Hofmokl (A, 319).]

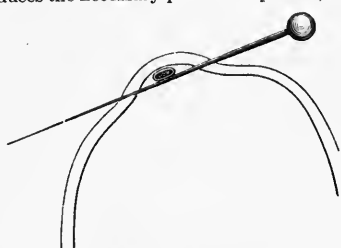

FIG. 9.—(AFTER HOFMOKL [A, 319].)

at the ends. [N. J. Aiken, "Am. Jour. of the Med. Sci.," July, 1865, p. 276.]

**ACUPUNCTATION, ACUPUNCTUATION**, n's.  $A^2k-u^2-pu^2nk-ta'shu^2n$ ,  $-tu^2-a'shu^2n$ . See ACUPUNCTURE.

**ACUPUNCTURAL**, adj.  $A^2k-u^2-pu^2nk-tu^2-ra^2l$ . Used for acupuncture (said of needles, etc.). [A, 306.]

**ACUPUNCTURATION**, n.  $A^2k-u^2-pu^2nk-tu^2-ra'shu^2n$ . See ACUPUNCTURE.

**ACUPUNCTURE**, n.  $A^2k-u^2-pu^2nk-tu^2r$ . Gr.,  $\beta\alpha\theta\upsilon\rho\iota\sigma\tau\iota\varsigma$ . Lat., *acupunctura* (from *acus*, a needle, and *punctura*, a puncture). Fr., *acupuncture*, *acupuncture*, *punction capillaire*. Ger., *Acupunktur*, *Nadelstich*, *Nadelstechen*. It., *agopuntura*. Sp., *acupuntura*. The *kingking*, *zín king*, or *zinkín* of the Chinese; a method of treating diseases by plunging one or more needles deep into the body. It was introduced into Europe from China or Japan toward the close of the seventeenth century, and was much resorted to for a time. It is still used occasionally, mostly for neuralgia.—**Electrolytic a.** See *Electro-puncture*.—**Multiple a.** Fr., *a. multiple*. The procedure of making a number of punctures (e. g., into an abdominal cyst, to excite adhesion between the cyst and the abdominal wall, so that the former can be opened without opening the peritoneal cavity). [A. Trousseau, "Bull. gén. de therap.," 1862, p. 517.]

**ACURE**, n.  $A^2k-u^2r$ . See ACUTURION.

**ACUREB** (Ar.), n. An alchemical name for glass. [Ruland (A, 325).]

**ACURET** (Ar.), n. An alchemical name for lead. [A, 337.]

**ACURGIA** (Lat.), n. f.  $A^2s(a^2k)-u^2r(ur)/ji^2(gi^2)-a^2$ . See ACTURGIA.

**ACURNIER** (Fr.), n.  $A^3-ku^2r-ni^2-a$ . See CORNUS mas.

**ACUROA** (Sp.), n.  $A^3-ku-ro^2a$ . A Guliana tree, the fruit of which is used for diseases of the skin. [A, 337.]

**ACURON** (Lat.), n. n.  $A^2k(a^2k)-u^2(u)/ro^2n$ . From *a priv.*, and *κῠρῖν*, to happen, because it had no effect when taken internally. An old name for the water-plantain (*Alisma plantago*). [A, 343, 358.] Cf. ACYRUS.

**ACURU**, n. See ACUYARI.

**ACUS** (Lat.), n. f.  $A(a^2)/ku^2s(ku^2s)$ . Gen., *a'cus*. Gr.,  $\beta\alpha\phi\iota\varsigma$ ,  $\beta\epsilon\lambda\omicron\nu\gamma$ . Fr., *aiguille* (1st def.). Ger., *Nadel* (1st def.). It., *ago* (1st def.). Sp., *aguja* (1st def.). 1. A needle. 2. A probe. [Celsus (A, 312).] 3. An old botanical genus-name. 4. In anatomy, a median groove on the upper surface of the lamina medullaris transversa. [I, 6; K.]—**A. ad cataractam**. See *Cataract needle*.—**A. canulata**. 1. A trocar and cannula. [A, 333.] 2. A hollow needle. [A, 316.]—**A. capitata**. A pin. [A, 313.]—**A. carolinensis**. See *Carlsbad insect-needle*.—**A. cataractaria**. See *Cataract needle*.—**A. exploratoria**. See *Exploring needle*.—**A. interperforatoria**. See *Cataract needle*.—**A. invaginata**. See *Sheathed needle*.—**A. larga**. A broad, flat needle. [A, 356.]—**A. moschata**. An old name for alum-root (*Geranium maculatum*). [A, 358.]—**A. ophthalmica**. See *Cataract needle*.—**A. paracentetica**. A. paracentetica. See *Trocar*.—**A. pastoris**. The plant shepherd's needle, or Venus's comb (*Scandix pecten*). [A, 358.]—**A. pro ligatura**. See *Aneurysm needle*.—**A. pro setaceo**. See *Seton needle*.—**A. sutoria**. Ger., *Nähnadel*. A suture needle. [A, 356.]—**A. triangularis**. A triangular needle. [B.]—**A. triquetra**. 1. See *A. canulata* (1st def.). 2. A triangular needle. [A, 316.]—**A. Veneris**. An old pharmaceutical name for the *Eryngium campestris*. [A, 344.]

**ACUS** (Lat.), n. n.  $A(a^2)/ku^2s(ku^2s)$ . Gen., *a'ceris*. See ACHYRON.

**ACUSIA** (Lat.), n. f.  $A^2k(a^2k)-u^2(u)/zi^2(si^2)-a^2$ . From  $\alpha\kappa\upsilon\sigma\iota\upsilon$ , to hear. See AUDITION.

**ACUSIMETER, ACUSIOMETER**, n's.  $A^2k-u^2-si^2m/e^2t-u^2r$ ,  $-zi^2-o^2m/e^2t-u^2r$ . See ACUOMETER.

**ACUSIOS** (Lat.), adj.  $A^2k(a^2k)-u^2(u)/zi^2(si^2)-o^2s$ . Gr.,  $\alpha\kappa\upsilon\sigma\iota\upsilon\sigma$  (from *a priv.*, and  $\epsilon\kappa\upsilon\sigma\iota\upsilon\sigma$ , willing). Involuntary. [A, 322.]

**ACUSIS** (Lat.), n. f.  $A^2k(a^2k)-u^2(u)/si^2s$ . Gen., *acu'seos*. Gr.,  $\alpha\kappa\upsilon\sigma\iota\upsilon\sigma$ . See AUDITION.

**ACUSMA** (Lat.), n. n.  $A^2k(a^2k)-u^2(us)/ma^2$ . Gen., *acus'matos* (-tis). See ACUSMA.

**ACUSMETRICUS, ACUSOMETRICUS** (Lat.), adj's.  $A^2k(a^2k)-u^2(us)-me^2t/ri^2k-u^2s(u^2s)$ ,  $-mo-me^2t/ri^2k-u^2s(u^2s)$ . See ACUSMETRIC.

**ACUSTICA** (Lat.), n. f.  $A^2k(a^2k)-u^2(us)/ti^2k-a^2$ . See ACOUSTICS.

**ACUSTICUS** (Lat.), adj.  $A^2k(a^2k)-u^2(us)/ti^2k-u^2s(u^2s)$ . Aoustic. As a n. (*nervus a.*), the auditory nerve. [A, 343.]—**A'kerne** (Ger.). The auditory nuclei. [I, 6, 17; K.]—**A'strang** (Ger.). The fibers of origin of the auditory nerve. [I, 6; K.]—**A'wurzel** (Ger.). The root of the auditory nerve. [I, 17; K.]

**ACUSTO** (Ar.), n. An alchemical name for nitre. [Ruland (A, 325).] See POTASSIUM nitrate.

**ACUTANGULATUS** (Lat.), adj.  $A^2k(a^2k)-u^2(tu^2)/a^2ng(a^2ng)-gu^2(gu)-la(la^2)/tu^2s(tu^2s)$ . From *acutus*, acute, and *angulus*, angular. Fr., *acutangulé*. Ger., *scharfeckig*, *spitzwinkelig*. Sp., *acutangulado*. Acute-angled (said of those parts of a plant that present acute and projecting angles; used also substantively as a species-name). [A, 320; B.]

**ACUTE**, adj.  $A^2k-u^2t'$ . Gr.,  $\delta\acute{\epsilon}\xi\epsilon$ . Lat., *acutus*. Fr., *aigu*, *chaud*. Ger., *acut*, *scharf*, *hitzig*. It., *acuto*. Sp., *agudo*. 1. Sharp-pointed. [B.] 2. Sharp and quick, as opposed to *chronic* (said of diseases). [D, 1.] Cf. SUBACUTE. 3. Sharp and severe (said of pain).

**ACUTELLA** (Lat.), n. f.  $A^2k(a^2k)-u^2(u)/te^2l/la^2$ . See ONONIS spinosa.

**ACUTENACULUM** (Lat.), n. n.  $A^2k(a^2k)/u^2(u)-te^2n-a^2k(a^2k)-u^2(u)-lu^2m(lu^2m)$ . From *acutus*, a needle, and *tenaculum*, a holder. Gr.,  $\beta\alpha\phi\iota\delta\alpha\gamma\omega\gamma\acute{o}\varsigma$ . Fr., *acutenacle*. Ger., *Nadelhalter*. Sp., *acutenáculo*. A needle-holder. [He'ster (A, 358).]

**ACUTICAUDAL**, adj.  $A^2k-u^2t'/i^2-ka^4(da^2l)$ . From *acutus*, pointed, and *cauda*, a tail. Fr., *acuticaude*. Ger., *spitzschwanzig*. Sp., *acuticaude*. In zoology, pin-tailed, having the tail pointed. [A, 306.]

**ACUTICORNIOUS**, adj.  $A^2k-u^2t'/i^2-co^2rn-u^2s$ . From *acutus*, pointed, and *cornu*, a horn. Fr., *acuticorne*. Ger., *spitzgehörnt*. Sp., *acuticórneo*. Having the horns or the antennae pointed. [A, 306.]

**ACUTICOSTAL**, adj.  $A^2k-u^2t'/i^2-ko^2s'ta^2l$ . From *acutus*, pointed, and *costa*, a rib. Fr., *acuticosté*. Sp., *acuticosto*. Having the ribs or the sides of the body salient. [A, 337.]

**ACUTIFLOREOUS**, adj.  $A^2k-u^2t'/i^2-fl-o-ru^2s$ . From *acutus*, pointed, and *flos*, a flower. Fr., *acutiflore*. Sp., *acutiflor*, *acutiflora*. In botany, having the segments of the corolla and of the calyx pointed. [A, 306.]

**ACUTIFOLIATE**, adj.  $A^2k-u^2t'/i^2-fl-i^2-at$ . From *acutus*, pointed, and *folium*, a leaf. Fr., *acutifolié*. Ger., *spitzblättrig*. In botany, having the leaves pointed. [A, 306.]

**ACUTILOBATE**, adj.  $A^2k-u^2t'/i^2-lo^2bat$ . Lat., *acutilobus* (from *acutus*, pointed, and *lobus*, a lobe). Sp., *acutilobulo*. In botany, having the lobes of the leaves pointed. [A, 306.] The Latin form is used as a species-name (e. g., *Hepatica acutiloba*).

**ACUTIPENNATE**, adj.  $A^2k-u^2t'/i^2-pe^2n-nat$ . From *acutus*, pointed, and *penna*, a feather. Fr., *acutipenne*. Sp., *acutipenno*. In ornithology, having the tail-feathers terminating in a point. [A, 306.]

**ACUTIROSTRATE**, adj.  $A^2k-u^2t'/i^2-ro^2s'trat$ . From *acutus*, pointed, and *rostrum*, a beak. Fr., *acutirostre*. Sp., *acutirostro*. In zoology, having a pointed beak. [A, 306.]

**ACUTISSIMUS** (Lat.), adj.  $A^2k(a^2k)-u^2(tu^2)/i^2-si^2-mu^2s(mu^2s)$ . Superl. of *acutus*, acute. Extremely acute, malignant (e. g., *variola acutissima* = malignant small-pox).

**ACUTITIGUEPO**, n. The *Thalia geniculata*. [A, 344.]

**ACUTORSION**, n.  $A^2k-u^2-to^2r'shu^2n$ . From *acus*, a needle, and *torsio* (from *torquere*), a twisting. Fr., *acutorsion*. Ger., *Acutorsion*. It., *agotorisione*. Sp., *acutorsió*. A method of applying acupressure (q. v.) by twisting the artery with the needle and fixing the latter by thrusting it into the tissues. [E.]

**ACUTOSPINOUS**, adj.  $A^2k-u^2t'/o-spi^2nu^2s$ . From *acutus*, pointed, and *spina*, a spine. Fr., *acuto-épineux*. Sp., *acuto-espin*. Having several rows of sharp spines on the body (said of caterpillars). [A, 306.]

**ACUTUS** (Lat.), adj.  $A^2k(a^2k)-u^2(u)/tu^2s(tu^2s)$ . From *acutere*, to sharpen. Acute.

**ACUTUS** (Lat.), adj.  $A^2k(a^2k)/u^2(u)-tu^2s(tu^2s)$ . From *a priv.*, and  $\kappa\upsilon\epsilon\iota\nu$ , to conceive. Barren. [A, 343.]

**ACUYARI**, n. An East Indian term for the aromatic wood of the *Icica altissima*. [A, 252, 258.]

**ACVA, ACVARIUS** (Lat.), n. f. and adj.  $A^2k(a^2k)/va^2(wa^2)$ ,  $-va(wa^2)/ri^2-u^2s(u^2s)$ . See AQUA and AQUARIUS.

**ACYANOBLEPSIA** (Lat.), n. f.  $A^2s(a^2k)-i(u^2)/a^2n(a^2n)-o-ble^2p/si^2-a^2$ . From *a priv.*,  $\kappa\upsilon\alpha\nu\epsilon\omicron\varsigma$ , blue, and  $\beta\lambda\epsilon\pi\epsilon\iota\nu$ , to see. Fr., *acyanoblepsie*, *cécité pour bleu*. Ger., *Acyanoblepsie*, *Nichtblaussehen*, *Blaublintheit*. It., *cecità per azzurro*. Sp., *ceguera por azul*. Syn.: *acyanopsia*. See BLUE-BLINDNESS.

**ACYANOBLEPTIC**, adj.  $A^2s-i(u^2)/a^2n-o-ble^2p/ti^2k$ . Lat., *acyanoblepticus*. Pertaining to, or affected with, acyanoblepsia. [A, 322.]

**ACYANOPSIA** (Lat.), n. f.  $A^2s(a^2k)-i(u^2)/a^2n(a^2n)-o-p/si^2-a^2$ . From *a priv.*,  $\kappa\upsilon\alpha\nu\epsilon\omicron\varsigma$ , blue, and  $\delta\upsilon\psi\iota\varsigma$ , sight. Ger., *Acyanopsie*. See BLUE-BLINDNESS.

**ACYCLIA** (Lat.), n. f.  $A^2s(a^2k)-i^2k(u^2k)/li^2-a^2$ . From *a priv.*, and  $\kappa\upsilon\kappa\lambda\epsilon\iota\nu$ , to circulate. Fr., *acyclie*. Ger., *Stillstand des Säfteumlaufs*. A general suspension of the circulation of the fluids of the body. [Grossi (A, 322).]

**ACYCLIC**, adj.  $A^2s-i^2k/li^2k$ . From *a priv.*, and  $\kappa\upsilon\kappa\lambda\omicron\varsigma$ , a circle. Fr., *acyclique*. Ger., *acyklisch*. 1. In botany, having the parts of the flower arranged in spirals instead of in distinct whorls, and with no line of separation between the different groups of organs composing the flower. [B, 75.] 2. Irregular (said of the sequence of phenomena in disease). [B.]

**ACYESIS** (Lat.), n. f.  $A^2s(a^3k)-i(u^6)-e(a)/si^2s$ . Gen., *acye'seos*. Gr., *ἀκυσίς* (from a priv., and *κύνειν*, to conceive). Fr., *acyésie*. Ger., *Akyesis*. 1. The non-existence of pregnancy. 2. Sterility in the female. [A, 305.] 3. According to some authors, incapability of being delivered naturally. [A, 330.]

**ACYETERION** (Lat.), n. n.  $A^2s(a^3k)-i(u^6)-e(a)/ri^2-o^2n$ . Gr., *ἀκυτήριον*. Ger., *Akyeterion*. 1. A means of preventing conception. [A, 305.] 2. An abortifacient drug. [A, 311.]

**ACYETIC**, adj.  $A^2s-i-e^2/ti^2k$ . Lat., *acyeticus*. Pertaining to, or the subject of, acyesis (q. v.). [A, 322.]

**ACYISIS** (Lat.), n. f.  $A^2s(a^3k)-i^2(u^6)-i(e)/si^2s$ . See ACYESIS.

**ACYLOS** (Lat.), n. f.  $A^2s(a^3k)/i^2(u^6)-o^2s$ . Gr., *ἄκυλος*. The acorn of the holm-oak. [Pliny (A, 312).]

**ACYMON** (Lat.), adj.  $A^2s(a^3k)/i^2m(u^6m)-o^2n$ . Gen., *acym'onos* (-is). Gr., *ἀκύμων* (from a priv., and *κύνειν*, to conceive). Barren. [A, 311.]

**ACYNOS** (Lat.), n. m.  $A^2s(a^3k)/i^2n(u^6n)-o^2s$ . See ACINOS.

**ACYOBLEPSIA** (Lat.), n. f.  $A^2s(a^3k)-i(u^6)-o-ble^2p/si^2a^3$ . See ACYANOBLEPSIA.

**ACYRUS** (Lat.), n. n.  $A^2s(a^3k)-i(u^6)/ru^3s(ru^4s)$ . Gen., *acyr'eis*. From a priv., and *κύρος*, authority, for its slight repute. [A, 343.] An old name for German leopard's-bane (*Doronicum scorpioides*), a plant allied to the genus *Arnica*. [A, 358.] According to others, the *Arnica montana*. [A, 313, 316, 336, 343.]

**ACYSIS** (Lat.), n. f.  $A^2s(a^3k)/i^2s(u^6s)-i^2s$ . Gen., *acy'seos*. From a priv., and *κύνειν*, to conceive. Fr., *acysie*. See ACYESIS.

**ACYSTIA** (Lat.), n. f.  $A^2s(a^3k)-i^2st(u^6st)/i^2a^3$ . From a priv., and *κύστις*, the bladder. Fr., *acystie*. A monstrosity characterized by absence of the urinary bladder. [A, 306.]

**ACYSTINERVIA**, **ACYSTONERVIA** (Lat.), n's f.  $A^2s(a^3k)-i^2st(u^6st)/i^2-nu^6r/vi^2(u^6r)-a^3$ , -o-nu^6r/ne^2r/vi^2(u^6r)-a^3. From a priv., *κύστις*, the bladder, and *νέυρον*, a nerve. Fr., *acystinervie*. Paralysis of the bladder. [A, 301.]

**ACYSTURONERVIE** (Fr.), n.  $A^3-si^2st-u^6-ro-ne^2r-ve$ . From a priv., *κύστις*, the bladder, *ούρον*, urine, and *νέυρον*, a nerve. Piorry's term for paralysis of the urinary bladder. [A, 250.]

**ACYSTROTROPHIE** (Fr.), n.  $A^3-si^2st-u^6-ro-tro-fe$ . From a priv., *κύστις*, the bladder, *ούρον*, urine, and *τρέφειν*, to nourish. Piorry's term for atrophy of the urinary bladder. [A, 259.]

**ACYTERION**, **ACYTERIUM** (Lat.), n's n.  $A^2s(a^3k)-i^2t(u^6t)-e(a)/ri^2-o^2n$ , -u^3m(u^6m). See ACYETERION.

**ACYTTARIA** (Lat.), n. n. pl.  $A^2s(a^3k)-i^2t(u^6t)-ta(ta^3)/ri^2-a^3$ . From a priv., and *κύτταρος*, a cell. In zoology, the lowest legion of rhizopods. [Haeckel (A, 258).]

**ADA**, n. 1. The root of an extremely poisonous Numidian plant. [A, 337.] 2. An East Indian name for ginger. [Roxburgh (A, 328).]

**ADABADANI**, n. A British Guiana tree, the fresh bark of which is a rapid vesicant. [Hooker and Waring (A, 316).]

**ADACA**, n. A Malabar name for the *Sphaeranthus indicus* (q. v.).

**ADACRYA** (Lat.), n. f.  $A^2d(a^3d)-a^2k(a^3k)/ri^2(ru^6)-a^3$ . From a priv., and *δάκρυον*, to shed tears. Ger., *Thärnenmangel*. A deficient secretion of tears. [A, 322.]

**ADACTYL**, **ADACTYLE**, n's.  $A^2d-a^2k/ti^2l$ . From a priv., and *δάκτυλος*, a finger. A limb destitute of digits. [A, 347.]

**ADACTYLIA** (Lat.), n. f.  $A^2d(a^3d)-a^2k(a^3k)-ti^2(tu^6l)/i^2-a^3$ . It., *adactylia*. A monstrosity characterized by lack of all or a portion of the digits. [A, 314.]

**ADACTYLOUS**, adj.  $A^2d-a^2k/ti^2l-u^3s$ . Lat., *adactylus*. Fr., *adactyle*. Sp., *adactilo*. Without digits (said of crustaceans having the anterior limbs without digits). [A, 306.]

**ADAGGREGATED**, adj.  $A^2d-a^2g/gre^2g-a-te^2d$ . From *ad*, to, and *aggregare*, to attach to. Fr., *adagregé*. United by some part of the body (said of individual organisms). [A, 316.]

**ADALI**, n. An Abyssinian name for the *Salvadora persica* (q. v.). [A, 316.]

**ADAIGES**, n. Sal ammoniac. [A, 358.] See AMMONIUM chloride.

**ADA-KODIEN**, n. The Malabar name of a plant, supposed to belong to the *Apocynaceae*, much used in India as an astringent and antophthalmic. [A, 321.]

**ADAL**, n. A term used by Paracelsus to denote that part of a plant which contained the active principle. [A, 325.]

**ADALI**, **ADALY**, n's. 1. A verbenaceous plant, the juice of which, mixed with powdered pepper, is esteemed in India an antidote to the venom of certain snakes. [A, 306.] 2. The Malabar name of the *Zapania nodiflora* (q. v.). [A, 321, 348.]

**ADAM-AND-EVE**, n.  $A^2d-a^2m-a^2nd-ev'$ . Ger., *geflecktes Knabenkraut*. 1. The *Orchis maculata*. [A, 258, 315.] 2. The *Aplectranthemum hiemale*. [A, 252.]

**ADAMANT**, n.  $A^2d-a^2m-a^2nt$ . Gr., *ἀδάμας* (from a priv., and *δάμειν*, to overpower). Lat., *adamans*. Fr., *diamant*. Ger., *Diamant*. It., Sp., *adamante*. 1. The diamond. 2. A magnet. [A, 315.]

**ADAMANTINA** (Lat.), n. f. of adj. *adamantinus* (*substantia* understood).  $A^2d(a^3d)-a^2m(a^3m)-a^2n(a^3n)/ti^2n-a^3$ . Enamel. [B.]—Organon adamantinae. See Enamel organ.

**ADAMANTINE**, adj.  $A^2d-a^2m-a^2nt/i^2n$ . Gr., *ἀδαμαντίνος*. Lat., *adamantinus*. Fr., *adamantin*. Ger., *diamantlich*. It., Sp., *adamantino*. 1. Pertaining to the enamel of the teeth. [J.] 2. Resembling the diamond. [B.]—A substance. Fr., *croûte* (ou couche) a. See ENAMEL.

**ADAMANTINUS** (Lat.), adj.  $A^2d(a^3d)-a^2m(a^3m)-a^2n(a^3n)/ti^2n-u^3s(u^4s)$ . Adamantine. [J.]—Crusta dentium adamantina. See ENAMEL.

**ADAMANTIS** (Lat.), n. f.  $A^2d(a^3d)-a^2m(a^3m)-a^2n(a^3n)/ti^2s$ . Gen., *adamant'idis*. Fr., *adamante*. An ancient magic herb—so called because it could not be bruised or crushed, or, according to some, because it was supposed to have the power of taming lions. [A, 306, Pliny (A, 312).]

**ADAMAS** (Lat.), n. m.  $A^2d(a^3d)/a^2m(a^3m)-a^2s(a^3s)$ . Gen., *adamant'is*. Gr., *ἀδάμας*. 1. Enamel. [J.] 2. The diamond. 3. An old name for the hardest metal, probably steel. [A, 311.] 4. A compound of gold and steel. [A, 311.] 5. The Apuleian name of *Hyoscyamus*. [Waring (A, 316).]

**ADAMBULACRAL**, adj.  $A^2d-a^2m-bu^2-la^2k/ra^2l$ . From *ad*, against, and *ambulacrum*, a walk planted with trees. See A. os-sicles.

**ADAMENON** (Lat.), n. n.  $A^2d(a^3d)-a^2m(a^3m)/e^2n-o^2n$ . See ADAMNON.

**ADAMICUS** (Lat.), adj.  $A^2d(a^3d)-a^2m(a^3m)/i^2k-u^3s(u^4s)$ . Fr., *adamique*. Lit., relating to Adam (formerly applied to any red earth, from the notion that Adam was made of red earth). [A, 322.] See TERRA adamica.

**ADAMI MORSUS** (Lat.), n. m.  $A^2d(a^3d)-a^2m(i^2me)-mo^2r'-su^3s(su^4s)$ . Sp., *adamimorso*. See POMUM ADAMI.

**ADAMITA** (Lat.), n. f.  $A^2d(a^3d)-a^2m(a^3m)-i(e)/ta^3$ . A vesical calculus. [Paracelsus (A, 325).]

**ADAMITUM** (Lat.), n. n.  $A^2d(a^3d)-a^2m(a^3m)-i(e)/tu^3m(tu^4m)$ . Lithiasis. [Paracelsus (A, 325).]

**ADAMNON** (Lat.), n. n.  $A^2d(a^3d)-a^2m(a^3m)/no^2n$ . From *ἀδάμνος*, insuperable. See ADAMAS (5th def.).

**ADAMONIE** (Ger.), n.  $A^3-da-mon-e'$ . See ADEMONIA.

**ADAMSAPPEL** (Ger.), n.  $A^3d-a^2mz-a^2p-fe^2l$ . Adam's apple: 1. The fruit of the *Citrus medica cedra*. 2. That of the *Lyco-persicum esculentum*. [A, 305.] 3. The *Yucca gloriosa*. [B.] 4. The prominence of the thyroid cartilage. See POMUM ADAMI.—A'baum. See CITRUS.

**ADAM'S APPLE**, n.  $A^3d-a^2mz-a^2p-pl$ . Fr., *pomme d'Adam*. Ger., *Adamsapfel*. It., *pomo d'Adamo*. Sp., *adamimorso*. 1. See POMUM ADAMI. 2. The fruit of the plantain-tree (*Musa paradisiaca*). [A, 248.]

**ADAMS COUNTY SPRINGS**, n. pl.  $A^3d-a^2mz-ku^6-un-ti^2-sprizngz'$ . Two springs in Ohio, 94 miles from Cincinnati, of a temp. of 56° F., containing magnesium chloride, calcium sulphate, carbonate, and chloride, sodium chloride, and iron oxide. [A, 363.]

**ADAMS-FLANNEL**, n.  $Fla^2n/ne^2l$ . Ger., *weisses Wollkraut*. The mullein. [B.] See VERBASCUM thapsus.

**ADAM'S-NEEDLE**, n. Ne'dl. Ger., *Adamsnadel*. The botanical genus *Yucca*. [A, 315.]

**ADAMS SPRINGS**, n. pl. Springs in Lake Co., California, about 2 miles from Cobb Valley, between the Geysers and Seigler's. The waters are said to resemble those of Vichy. One pint contains:

Sodium carbonate .....	7.129 grains.
Magnesium carbonate .....	12.378 "
Iron carbonate .....	0.064 grain.
Calcium carbonate .....	3.589 grains.
Sodium chloride .....	0.514 grain.
Potassium salts .....	traces.
Nitric acid .....	traces.
Silica .....	0.902 grain.
Organic matter .....	0.351 "
Carbon dioxide .....	38 cubic in.

["Second Bienn. Rep. of the State Bd. of Health of California" (A, 363).]

**ADANE** (Fr.), n.  $A^3-da^3n$ . The sturgeon that furnishes caviare [A, 306.]

**ADANSONIA** (Lat.), n. f.  $A^2d(a^3d)-a^2n(a^3n)-so^2ni^2-a^3$ . Fr., Ger., *Adansonie*. A genus of trees, established by Linnaeus, of the natural order *Bombaceae*, distinguished by their great size; named in honor of Michel Adanson, a French botanist of the eighteenth century. [B.]—A. baobab [Gärtner]. See A. digitata.—A. digitata [Linnaeus]. Ger., *Affenbaum*, *Affenbrodbaum*. Baobab; a species indigenous to Africa, having a trunk 70 or 80 feet high and very thick, sometimes attaining a diameter of 30 feet. The branches also are very large and spreading, and bear pendent white flowers and a woody fruit from 8 to 18 inches long, resembling a gourd. [B, 19.] The fruit, called *bou* or monkey-bread (Fr., *pain de singe*, *calebasse du Sénégal*), is highly esteemed as a food and medicine; its pulp, mixed with sugar, is used in preparing a drink used in the treatment of putrid and pestilential fevers. The bark is emollient. The leaves, dried and powdered, constitute *loto*, which the negroes use as a remedy for hæmoptysis, dysentery, and intermittent fever. [A, 260, 321.]—A. Gregorii. Sour-gourd, cream-of-tartar tree; an Australian species. The pulp of the fruit has a refreshing acid taste, like cream of tartar, and contains gum, starch, sugar, and malic acid. [A, 252.]

**ADANSONINE**, n.  $A^2d-a^2n/so^2n-en$ . Fr., *adansonine*. Ger., *Adansonin*. A white, crystallizable, bitter alkaloid obtained from the bark and leaves of the *Adansonia digitata*; used as a febrifuge. [S. Martin, "Bull. gén. de thérap." lxxii, 1867, p. 360.]

**ADAPTATION**, n.  $A^2d-a^2p-ta/shu^3n$ . Lat., *adaptatio* (from *adaptare*, to adjust). Fr., *adaptation*. Ger., *Adaptation*, *Anpassung*. It., *adattamento*. Sp., *adaptación*. 1. The faculty possessed by an organism of accommodating itself to varying surroundings. [W. Preyer (A, 319).] See ACCLIMATIZATION. 2. The adjustment of the size of the pupil in accordance with the amount of light that reaches the eye, or, as used by some authors, the func-

tion of accommodation (q. v.). [W. Preyer (A, 319).] 3. See COAPTATION.

**ADAPTER**, n. A<sup>2</sup>d-a<sup>2</sup>p'tu<sup>r</sup>. From *adaptare*, to adjust. Fr., *allonge*. Ger., *Vorstoss*. Sp., *alagadera*. A piece of tube, of more or less conical form, used to elongate the neck of a retort so as to connect it with a receiver. [B, 2.]

**ADAPTION**, n. A<sup>2</sup>d-a<sup>2</sup>p'shu<sup>n</sup>. An obs. form of *adaptation* (q. v.).

**ADAPU CURRIE**, n. A Tamil name for charcoal. [A, 344.]

**ADARCA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-a<sup>2</sup>r'ka<sup>2</sup>. See ADARCE.

**ADARCE** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-a<sup>2</sup>r'se(ka). Gen., *adar'ces*. Gr., *ἀδάρκη*. Fr., *adarce*, *adarcès* (2d def.). Ger., *Meerschaaum*. Sp., *adarce*. 1. An ancient name for a spongy saline incrustation formed on the herbage of salt marshes; formerly used in the treatment of freckles and other blemishes of the skin. [Dioscorides (A, 311), A, 321, 334, 358.] 2. A calcareous deposit from certain mineral waters. [A, 337, 348.]

**ADARCON**, **ADARCS**, **ADARCOS** (Lat.), n's. n., f. and m. A<sup>2</sup>d(a<sup>2</sup>d)-a<sup>2</sup>r'si<sup>2</sup>(ki<sup>2</sup>)-o<sup>n</sup>, -si<sup>2</sup>s(ki<sup>2</sup>s), -ko<sup>2</sup>s. See ADARCE.

**ADARIGO**, n. An alchemical name for orpiment. [Ruland (A, 325).]

**ADARNECH**, n. See AZARNET.

**ADARTICULATION**, n. A<sup>2</sup>d'a<sup>2</sup>r-ti<sup>2</sup>k-u<sup>2</sup>-la'shu<sup>n</sup>. Lat., *adarticulatio*. Fr., *adarticulation*. Ger., *Gelenkverbindung*. It., *adarticolazione*. Sp., *adarticulación*. Ingrassias's name for arthrodia (q. v.). [A, 314.]

**ADAS**, n. A Japanese name for fennel (*Anethum feniculum*), also for *Hyoscyamus niger*. [A, 362.]—**A. pedas**. A Malay name for *Hyoscyamus niger*. [A, 362.]

**ADASARA PAKU**, n. A Telooogo name for the *Justicia adhatoda*. [A, 362.]

**ADATINA-PALAY**, n. Fr., *adinapalé*. An East Indian name for the *Aristolochia bracteata*. [A, 321.]

**ADATODA**, n. See ADHATODA.

**ADATODEY ELLEY**, n. A Tamil name for the *Justicia adhatoda*. [A, 362.]

**ADAXOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-a<sup>2</sup>x(a<sup>2</sup>x)-o'ma<sup>2</sup>. Gen., *adaxom'atos* (-tis). From *ἀδάξασθαι* (= *ὑδάξασθαι*), to feel a biting, stinging pain. Sp., *adaxoma*. An itching, lancinating, or burning pain. [Hippocrates (A, 325).]

**ADCLIVITAS** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-kli<sup>2</sup>vi<sup>2</sup>(wi<sup>2</sup>)-ta's(ta's). More properly written *adclivitas*. Gen., *adclivita'tis*. Fr., *adclivité*. Ger., *Adclivität*. It., *adclività*. An acclivity, an elevation.—**A. tibie**. Ger., *Adclivität der Tibia*. The rough projection on the summit of the tibia, between the two articular surfaces. [Loder (A, 320).]

**ADDA** (Ar.) n. Lat., *Scincus officinalis*. Fr., *scinque officinal*. A small species of lizard, esteemed in Eastern countries as a remedy for various skin diseases. [A, 251, 348.]

**ADDAD**, n. See ADA (1st def.).

**ADD-ADD**, n. An Oriental name for the leaves of the *Celastrus obscurus*. [B.]

**ADDALEY UNNAY**, n. An East Indian name for the *Jatropha glauca*. [A, 344.]

**ADATINAPALEY**, n. See ADATINA-PALAY.

**ADDENTAL**, n. A<sup>2</sup>d-de<sup>2</sup>nt'a<sup>2</sup>l. From *ad*, to, and *dens*, a tooth. Geoffroy's name for the maxillary bone of Owen in fishes. [L, 27.]

**ADDEPHAGIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-de<sup>2</sup>f-a(a<sup>2</sup>s)'ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>2</sup>s. See ADEPHAGIA.

**ADDEPHAGOUS**, adj. A<sup>2</sup>d-de<sup>2</sup>f'a<sup>2</sup>g-u<sup>2</sup>s. See ADEPHAGOUS.

**ADDERLOCK**, n. A Dutch name for the *Allium victorale*. [A, 344.]

**ADDER'S-GRASS**, n. A<sup>2</sup>d-du<sup>2</sup>rz-gra<sup>2</sup>s. Ger., *Knabenkraut*. The botanical genus *Cynosorchis*. [A, 258.]

**ADDER'S-MOUTH**, n. A<sup>2</sup>d-du<sup>2</sup>rz-mu<sup>2</sup>-uth. An American name for the botanical genus *Microstylis*. [A, 252.]

**ADDER'S-TONGUE**, n. A<sup>2</sup>d-du<sup>2</sup>rz-tu<sup>2</sup>ng. Ger., *Natterzunge*, *Schlangezunge*. The botanical genus *Ophioglossum*. [A, 248.]—**Yellow a.-t.** The *Erythronium americanum*. [A, 252.]

**ADDER'S-WORT**, **ADDERWORT**, n's. A<sup>2</sup>d-du<sup>2</sup>rz(du<sup>2</sup>r)-wu<sup>2</sup>rt. Ger., *Natterwurz*. An old English name for bistort (*Polygonum bistorta*), because of its convolute roots. [B, 39.]

**ADDIMODRUM**, n. A Tamil name for licorice (*Glycyrrhiza glabra*). [A, 362.]

**ADDISON'S DISEASE**, n. A<sup>2</sup>d-di<sup>2</sup>-su<sup>2</sup>nz. See under DISEASE.

**ADDISON'S KELOID**, n. See MORPHEA (2d def.).

**ADDITAMENTUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-di<sup>2</sup>t-a<sup>2</sup>s-me<sup>2</sup>nt'u<sup>2</sup>m-(u<sup>2</sup>m). From *addere*, to add. Ger., *Ansatz*. In anatomy, any formation that, like an epiphysis, may be regarded as an addition to the main structure or an extension of the latter. [A, 325.]—**A. ad sacro-lumbale**. See ACCESSORIS sacro-lumbalis.—**A. coli**. See APPENDIX CAECI VERMIFORMIS.—**A. necatum**. A process of the ulna; the olecranon. [Vesalius (A, 325), A, 336.]—**A. suture lambdoidalis**. An old term for the occipito-mastoid suture. [A, 280.]—**A. ulnae**. The radius. [A, 313.]—**A. uncatum ulnae**. The olecranon. [A, 313.]

**ADDITION**, n. A<sup>2</sup>d-di<sup>2</sup>sh'u<sup>2</sup>n. Lat., *additio* (from *addere*, to add). Fr., *addition*. Ger., *Zusatz*. It., *addizione*. Sp., *adición*. In chemistry, the formation of a new molecule by the direct union of two or more different molecules. Many cases, however, which are apparently illustrative of this process are really instances of

double decomposition. [B, 6.]—**A. compound**, **A. product**. See A. COMPOUND.

**ADDIVITELLA GUDDALI**, n. A Telooogo name for the *Erythronium indicum*. [A, 362.]

**ADDLE**, n. A<sup>2</sup>d/dl. From A.-S., *adl*, diseased, or Welsh, *hadl*, *hadyl*, decayed, corrupt. [A, 302.] An English provincial (Somersetshire) name for an abscess. [A, 315.]

**ADDOUA**, n. A Central African name for the *Balanites aegyptiaca*. [A, 321.]

**ADDUCENS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-du<sup>2</sup>(du<sup>2</sup>/se<sup>2</sup>nz(ke<sup>2</sup>ns). Pres. partic. of *adducere*, to draw toward. Fr., *adducteur*. Ger., *anziehend*. Adductive, acting as an adductor; used also as a n. in the sense of adductor.—**A. ad anteriora** [Spigelius]. See ADDUCTOR *auris* and *PLATYSMA MYOIDES*.—**A. humeri**. See PECTORALIS *major*.—**A. maxillam** [Spigelius]. See MASSETER.—**A. oculi**. See RECTUS *oculi internus*.—**A. pedem** [Spigelius]. See TRIBALIS *positicus*.—**Musculi adductores**. Adductor muscles.

**ADDUCENT**, adj. A<sup>2</sup>d-du<sup>2</sup>se<sup>2</sup>nt. See ADDUCENS.

**ADDUCT**, v. tr. A<sup>2</sup>d-du<sup>2</sup>kt'. Gr., *προσάγειν*. Lat., *adducere*. Ger., *adduciren*, *zuführen*. Sp., *adducir*. To draw a part toward the median line of the body or (as used by most writers) toward the median line of a limb.

**ADDUCTEUR** (Fr.), adj. and n. A<sup>2</sup>d-du<sup>2</sup>kt'-tu<sup>2</sup>r. Adductive; an adductor muscle (in the strict sense of one that draws a part toward the median line of the body—including, therefore, some muscles which we call abductors).—**A's de la cuisse**. The adductors of the thigh.—**A. de l'œil**. See RECTUS *oculi internus*.—**A. de l'oreille**. See ADDUCTOR *auris* and TEMPORO-AURICULARIS *externus*.—**A. du bras**. See TERES *major*.—**A. du gros orteil**. See ADDUCTOR *pollicis pedis*.—**A. du petit doigt**. See OPPONENS *minimi digiti*.—**A. du pouce**. See ADDUCTOR *pollicis manus*.—**A. moyen de la cuisse**. See ADDUCTOR *femoris longus*.—**A. premier de la cuisse**, **A. quatrième de la cuisse**. Both these terms have been applied to the pectineus.—**Court a. de la cuisse**. See ADDUCTOR *femoris brevis*.—**Court a. de la jambe**. The gracilis.—**Deuxième a. superficiel de la cuisse**. Syn.: *premier a.* [Boyer], *moyen a.* [Bichat]. See PECTINEUS.—**Grand a. de la cuisse**, **Grand a. profond de la cuisse**. See ADDUCTOR *femoris magnus*.—**Grand rond a. de la cuisse**. See TERES *major*.—**Long a. de la cuisse**. See ADDUCTOR *femoris longus*.—**Long a. de la jambe**. See Long ADDUCTOR of the leg.—**Moyen a. de la cuisse**. See ADDUCTOR *femoris longus* and PECTINEUS.—**Petit a. de la cuisse**, **Petit a. profond de la cuisse**. See ADDUCTOR *femoris brevis*.—**Premier a. de la cuisse**, **Premier a. superficiel de la cuisse**. See PECTINEUS.—**Second a. de la cuisse** [Boyer]. See ADDUCTOR *femoris brevis*.—**Troisième a. de la cuisse** [Boyer]. See ADDUCTOR *femoris magnus*.—**Vaisseaux a's** [Hedwig]. See PROSPHYSES.

**ADDUCTION**, n. A<sup>2</sup>d-du<sup>2</sup>kt'shu<sup>n</sup>. Gr., *προσάγωγη*. Lat., *adductio*. Fr., *adduction*. Ger., *Adduction*, *Anziehung*, *Zuführung*. It., *adduzione*. Sp., *adducción*. A drawing of a part toward the median line of the body or (in the case of the fingers and toes) toward the middle line of a limb. As applied to the hand, flexion toward the ulnar border of the forearm.—**A'sprismen** (Ger.). See under PRISMA.

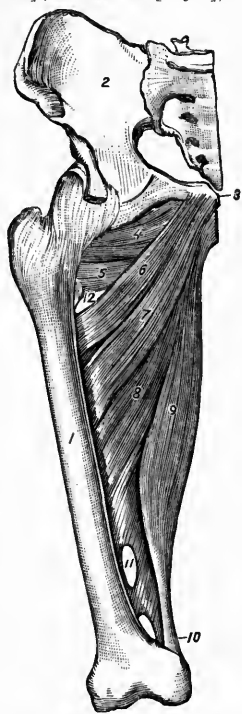

**ADDUCTIVE**, adj. A<sup>2</sup>d-du<sup>2</sup>kt'iv. Fr., *adductif*, *adducteur*. Ger., *anziehend*. Pertaining to or producing adduction. [A, 348.]

**ADDUCTOR** (Lat.), n. m. A<sup>2</sup>d(a<sup>2</sup>d)-du<sup>2</sup>kt(duk'to'r. Gen., *adducto'ris*. From *ad*, toward, and *ducere*, to lead, to draw. Gr., *προσάγειν*. Fr., *adducteur*. Ger., *Anzieher*, *Anziehmuskel*. It., *adduttore*. Sp., *adductor*. Syn.: *adducens*. 1. A muscle that adducts a part. See ADDUCT. 2. As applied to the *Lemnibran-chialia*, a muscle that closes the valves of the shell. [A, 349.] 3. In botany, a very delicate filamentous structure found in the thecae of mosses. [B.] See PROSPHYSES.—**A. ad minimi digitum**. See *A. pollicis manus*.—**A's ad ulni oris**. The levator labii superioris proprius and the levator labii inferioris. [Theile (L, 31).]—**A. auris**. Syn.: *adducens ad anteriora* [Spigelius]. A term applied to certain fleshy fibers of the platysma myoides which are attached to the lower part of the auricle of the ear. [Valsalva (L, 32).]—**A. auris inferior**. It., *adduttore inferiore dell' orecchio*. See ZYGOMATICO-AURICULARIS.—**A. auris superior**. See TEMPORO-AURICULARIS *externus*.—**A. brevis femoris**. See *A. femoris brevis*.—**A. digiti tertii pedis**. The second plantar interosseous muscle. [L.] The term has been incorrectly applied to a dorsal interosseous muscle which is really an abductor. [A, 358.]—**A. femoris brevis**. Fr., *sous-pubio-fémoral* [Chaussier], *court* (ou *second* [Boyer], ou *petit* [Bichat]) *adducteur de la cuisse*, *petit adducteur profond de la cuisse* [Crucellier], *second muscle du triceps* [Winslow]. Ger., *kurzer Anzieher* (oder *Zuzieher*) *des Oberschenkels* (oder *Schenkels*). It., *adduttore breve* (o *corte*) *del femore*, *piccolo* (o *secondo*) *adduttore del femore*, *sotto-pubico-femorale*. Sp., *a. breve del muslo*. Syn.: *a. femoris secundus* [Douglas], *triceps secundus* [Winslow], *subpubio-femoralis* [Chaussier], *caput breve tricipitis*, *alterum caput tricipitis* [Riolan]. The short a. of the thigh; it arises from the anterior surface of the body and inferior ramus of the pubic bone, runs backward and outward, and is inserted flat and tendinous into a line extending from the lesser trochanter of the femur to the linea aspera. [C: L, 31, 32, 35, 43, 44, 45.]—**A. femoris longus**. Fr., *pubio-fémoral* [Chaussier], *premier muscle du triceps* [Winslow], *spino-pubio-fémoral* [L, 33]. Ger., *langer Schenkelanzieher*, *langer Anzieher des Schenkels* (oder *Oberschenkels*). It., *adduttore lungo* (o *primo*, o *secondo*, o *medio*) *del femore*, *pubico-femorale*. Sp., *a. longo del muslo*. Syn.: *pubio-femoralis* [Chaussier], *a. femoris primus* [Douglas], *triceps primus* [Winslow] (seu *minor*), *primum caput tricipitis* [Riolan]. The long a. of the thigh; it arises from the body of the pubic bone, below the crest and near the angle, and is inserted by a tendinous aponeurosis, which is closely united with the vastus internus and the a. femoris magnus, into the inner margin of the linea

aspera. [C; L. 22, 33, 35, 43, 44].—**A. femoris magnus**. Fr., *ischio-fémoral* [Chaussier], *grand* [Bichat] (ou *troisième* [Boyer], ou *long* [L. 43]) *adducteur de la cuisse*, *ischio-pubio-fémoral* [L. 33], *grand adducteur profond* [Cruveilhier], *troisième muscle du triceps* [Winslow]. Ger., *grosser Anzieher* (oder *Zuzieher*) *des Oberschenkels* (oder *Schenkels*). It., *pubo-ischio-femorale*, *adduttore maggiore* (o *grande*, o *terzo adduttore*) *del femore*. Sp., *a. magno del muslo*. Syn.: *tertium caput* [Riolan] (seu *caput magnum* [A. 314]) *tricipitis*. The great a. of the thigh; it arises from the whole length of the inner margin of the pubic arch and the lower part of the tuberosity of the ischium, and, running outward and downward, is inserted into the posterior surface of the femur, inside the gluteal ridge, into the linea aspera and the internal supracondylar line, and a part of it also into the a. tubercle on the inner condyle. Douglas divides it into two muscles, the a. *femoris tertius* and the a. *femoris quartus* (q. v.). [C; L. 33, 35, 43, 44, 45].—**A. femoris minimus**. A term applied by some anatomists to the upper, transverse fibers of the a. *femoris magnus*, considered as a separate muscle. [C; L.].—**A. femoris primus**. The a. *femoris longus*. [Douglas (L. 33)].—**A. femoris quartus**. Douglas's term for that portion of the a. *femoris magnus* which arises from the tuberosity of the ischium. [L.].—**A. femoris secundus**. Douglas's term for the a. *femoris brevis*. [L.].—**A. femoris tertius**. Douglas's term for that portion of the a. *femoris magnus* which arises from the outer edge of the pubic bone. [L.].—**A. femoris tertius cum quarto**. The a. *femoris magnus*. [L. 23].—**A. gracilis**. See **GRACILIS**.

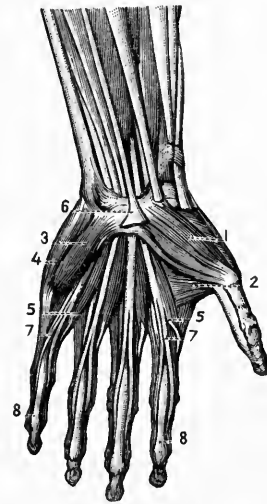

—**A. hallucis**. Fr., *métatarso-sous-phalangien* [Chaussier] (ou *tarsometatarsi-phalangien* [L. 33]) *du pouce* (ou *du gros orteil*), *adducteur du gros orteil*, *antithénar* [Winslow]. Ger., *Anzieher der grossen Zehe*. It., *adduttore* (o *tarsometatarso-falangeo*) *dell'alluce*. Sp., *a. del dedo grande del pié*. Syn.: a. *pollicis pedis*, *metatarso-subphalangeus pollicis*, a. *hallucis obliquus* [L. 33], *alius musculus transversus* [Riolan]. An a. of the great toe; it arises from the tarsal ends of the third and fourth metatarsal bones and from the sheath of the peroneus muscle, runs obliquely forward, and is inserted into the base of the first phalanx of the great toe. Henle and Luschka regard the *transversus pedis* as a portion of this muscle. [C; L. 9, 31, 33, 35, 43, 44, 45].—**A. hallucis obliquus**. An a. of the great toe found in some of the apes. [L. 14].—**A. hallucis transversalis**. An a. of the great toe, also found in some of the apes, arising from the outer side of the first phalanx and inserted along with the tendon of the *perforatus*. [L. 14].—**A. indicis pedis**. A term improperly applied to the first dorsal interosseous muscle of the foot, which is really an abductor. [L.].—**A. longus**. The great a. of the thigh in many of the *Mammalia*. [Percivall (L. 13)].—**A. longus femoris**. See *A. femoris longus*.—**A. mandibulae**. A muscle in the cray-fish, attached to the posterior edge of the mandible. [B. 100].—**A. medii digiti pedis**. The first plantar interosseous muscle. [L.] The term has been incorrectly applied to a dorsal interosseous muscle which is really an abductor. [A. 358].—**A. medius auris**. See **LEVATOR AURIS BREVIS**.—**A. metacarpi minimi digiti manus**. **A. minimi digiti manus**. See **OPPONENS MINIMI DIGITI**.—**A. minimi digiti pedis**. The a. of the little toe, the third plantar interosseous muscle. [L.].—**A. minimus**. See *A. femoris minimus*.—**A. obliquus**. **A. obliquus hallucis**. See *A. hallucis obliquus*.—**A. oculi**. See **RECTUS OCULI INTERNUS**.—**A. of the arm**. Fr., *adducteur du bras*, *grand rond*, *sous-scapulo-huméral*. Ger., *grosser Schulterarmbeinmuskel*, *Niederzieher* (oder *Einwärtszieher*, oder *innerer Benger*) *des Oberarmbeins* (oder *Armbeins*). It., *adduttore del braccio*, *grande rotondo*, *sotto-scapolo-omeroale*. Syn.: *teres major* [Percivall], *subscapulo-humeralis* [Girard], *great scapulo-humeral* [Leyh]. A muscle of the *Mammalia* analogous to the *teres major* in man. [L. 13, 44].—**A's of the foot**. The plantar interossei and the a. *hallucis*. [L.].—**A's of the glottis**. See **CONTRACTORS OF THE GLOTTIS**.—**A's of the hand**. The palmar interossei, the a. *pollicis*, and the a. *minimi digiti*. [L.].—**A's of the thigh**. Some confusion has arisen in the naming of these muscles; usually they are held to include the a. *femoris brevis*, the a. *femoris longus*, the a. *femoris magnus*, the *gracilis*, and the *pectineus* (q. v.). Spigelius regarded the adductores *brevis*, *longus*, and *magnus*, together with the *pectinaeus*, as oblique flexors of the thigh; he named the a. *femoris brevis*, the a. *femoris longus*, and the a. *femoris magnus* the *tertius femur flectentium*, the a. *femoris brevis* and the a. *femoris magnus* the *musculus moventium femur quintus*, and the *pectinaeus* the *quartus femur flectentium*. Vesalius regarded the a. *femoris magnus* and the *pectineus* as one muscle,

THE ADDUCTORS OF THE THIGH.  
(AFTER SAPEY.)

1, the femur; 2, the ilium; 3, the pubes; 4, the obturator externus; 5, the upper portion of the adductor femoris magnus; 6, 7, the upper and lower portions of the adductor brevis; 8, 9, the middle and lower portions of the adductor magnus; 10, the tendinous insertion of the latter; 11, the opening for the femoral vessels; 12, the opening for the internal circumflex artery and veins.

which he named the *musculus moventium femur octavus*. [L.].—**A. ossis metacarpi digiti auricularis**, **A. ossis metacarpi minimi digiti manus**. See **OPPONENS MINIMI DIGITI**.—**A. pectineus**. See **PECTINEUS**.—**A. pollicis**, **A. pollicis ad minimum digitum** [Douglas]. See *A. pollicis manus*.—**A. pollicis manus**. Fr., *métocarpophalangien du pouce* [Chaussier], *adducteur du pouce*, *mésoténar* [Winslow], *antithénar* [Riolan]. Ger., *Anzieher des Daumens*. It., *metacarpophalangeo del pollice*, *adduttore del pollice della mano*, *semi-interosseo del pollice*. Sp., *a. del pulgar*. Syn.: *interosseus pertingens ad indicem* [Bucart], *flexor primus secundi internodii pollicis* [Spigelius], *a. pollicis ad minimum digitum* [Douglas], *metocarpophalangeus pollicis* [L. 45]. The a. of the thumb; it arises from the outer edge of the third metacarpal bone, and is inserted into the base of the first phalanx of the thumb. [C; L. 33, 35, 43, 44, 45].—**A. pollicis manus ad indicem**. See **ABDUCTOR INDICIS**.—**A. pollicis pedis**. See *A. hallucis*.—**A. prostatica** [Santorini]. See **COMPRESSOR PROSTATICUS**.—**A. tertii digiti pedis**. See *A. digiti tertii pedis*.—**A. tibialis**. Percivall's name for the semimembranosus and semitendinosus in the solipeds. [L. 13].—**A. transversalis hallucis**. See *A. hallucis transversalis*.—**A. triceps femoris**. The a. *femoris brevis*, a. *femoris longus*, and a. *femoris magnus* considered as a single muscle having three heads. [L.].—**Great a. of the thigh**. Lat., *a. longus* [Percivall], *posterior pubio-femoralis* [Leyh]. Fr., *grand adducteur de la cuisse*, *portion postérieure du biceps* (ou *du sous-pubic*) *fémoral* (2d def.). Ger., *dicker Einwärtszieher* [Gurlt] (oder *grosser Zuzieher* [Müller]) *des Oberschenkels*, *hinterer Schambackbeinmuskel* [Leyh] (2d def.). It., *adduttore grande della coscia*. 1. The a. *femoris magnus* (q. v.). 2. A muscle in many of the *Mammalia* analogous to the a. *femoris brevis* and a. *femoris magnus* of man combined. [L. 13, 44].—**Long a. of the leg**. Lat., *sartorius* [Percivall], *sublumbo-tibialis* [Girard], *internal tio-rotuleus* [Leyh]. Fr., *long adducteur de la jambe*, *sous-lumbo-tibial* [Girard]. Ger., *dünner* (oder *schmäler*) *Einwärtszieher des Hinterschenkels* [Günther], *innerer Darm-schenkelbeinmuskel*, *Schneidermuskel*. It., *adduttore lungo della gamba*, *sotto-lombo-tibiale*. A muscle of the solipeds analogous to the *sartorius* in man. [L. 13, 44].—**Short a. of the leg**. Lat., *gracilis* [Percivall], *sub-pubio-tibialis* [Girard], *pubiotibialis* [Leyh]. Fr., *sous-pubio-tibial* [Girard], *court adducteur de la jambe*. Ger., *breiter Einwärtszieher des Hinterschenkels* [Gurlt, Günther], *Schambackbeinmuskel*. It., *adduttore corto della gamba*, *sotto-pubico-tibiale*. A muscle of many of the *Mammalia* analogous to the *rectus internus* in man. [L. 13, 44].—**Small a. of the thigh**. Fr., *petit adducteur de la cuisse*. Ger., *langer Einwärtszieher* [Günther] (oder *kurzer Zuzieher* [Müller]) *des Oberschenkels*, *mittlerer Schambackbeinmuskel* [Leyh]. It., *adduttore piccolo della coscia*. A muscle of the solipeds analogous to the a. *femoris longus* in man. [L. 13, 44].—**Triceps a. femoris**. See *A. triceps femoris*.

THE SUPERFICIAL PALMAR MUSCLES. (AFTER SAPEY.)

1, the adductor pollicis; 2, the adductor pollicis; 3, the flexor brevis minimi digiti; 4, the adductor minimi digiti; 5, 5, the lumbricals; 6, the lower end of the tendon of the palmaris brevis; 7, 7, the tendons of the perforatus; 8, 8, the tendons of the perforatus.

**ADDUCTORIUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-du<sup>3</sup>k(du<sup>4</sup>k)-to<sup>3</sup>ri<sup>2</sup>u<sup>3</sup>s-(u<sup>3</sup>s). Adducent.—**Fila adductoria**. See **PROSPHYSES**.

**ADEC** (Ar.), n. Sour milk. [Ruland (A. 325).]

**ADECH** (Ar.), n. The vital spirit in man. [Paracelsus (H).]

**ADECIDUATA** (Lat.), n. n. pl. A<sup>2</sup>(a<sup>3</sup>)-de<sup>2</sup>-si<sup>2</sup>d(ki<sup>2</sup>d)-u<sup>2</sup>(u<sup>3</sup>)-a(a<sup>3</sup>)/ta<sup>3</sup>. See **NON-DECIDUATA**.

**ADECIDUOUS**, adj. A<sup>2</sup>-de<sup>2</sup>-si<sup>2</sup>d-u<sup>2</sup>-u<sup>3</sup>s. Belonging to the non-deciduata (q. v.).

**ADECTA** (Lat.), n., n. pl. of adj. *adectus* (q. v.). A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>k(ta<sup>3</sup>). 1. Corrigents. [A. 306.] 2. Demulcents. [A. 322.] 3. Antidotes. [A. 321.]

**ADECTOS**, **ADECTUS** (Lat.), adj's. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>k(ta<sup>3</sup>)-tu<sup>3</sup>s-(tu<sup>3</sup>s). Gr., *ἀδῆκτος* (from a priv. and *δαῖναι*, to bite), not biting or pungent. Fr., *adecte*. It., Sp., *adecto*. Corrigent; mild, bland (said of drugs). [A. 306, 322, 337.]

**ADEHEMEST** (Ar.), n. An alchemical synonym of *lamina* (q. v.). [Ruland (A. 325).]

**ADEL** (Ger.), n. A<sup>3</sup>de<sup>2</sup>l. A whitlow. [A. 317.]

**ADEL-ADAGAM**, n. An East Indian name for the *Justicia adhatoda* (q. v.). [A. 321.]

**ADELARTHROSMATA** (Lat.), n., n. pl. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l-a<sup>3</sup>r-thro-so<sup>2</sup>m-a<sup>3</sup>-ta<sup>3</sup>. From *ἀδῆλος*, obscure, *ἄρθρον*, a joint, and *σῶμα*, the body. An order of *Arachnida* having the articulations inconspicuous. [A. 258; B. 25.]

**ADELAETER** (Lat.), n., n. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l-a<sup>3</sup>s(a<sup>3</sup>s)/tu<sup>3</sup>r(te<sup>2</sup>r). Gen., *adelasteros* (-ris). From *ἀδῆλος*, obscure, uncertain, and *ἀστὴρ*, a plant. A provisional genus-name for plants which, not having been seen in flower, have not been classified. [A. 258.]

**ADELBEERE** (Ger.), n. A<sup>3</sup>de<sup>2</sup>l-ba-re<sup>2</sup>. The fruit of the wild service-tree (*Sorbus torminalis*). [A. 304, 315.]

**ADELBERTSKRAUT** (Ger.), n. A<sup>3</sup>d<sup>2</sup>l-be<sup>2</sup>rtz-kra<sup>2</sup>-ut. The *Medicago sativa*. [A, 315.]

**ADELESCHÉ** (Ger.), n. A<sup>3</sup>d<sup>2</sup>l-e<sup>2</sup>sh-e<sup>2</sup>. The *Sorbus domestica*. [A, 305.]

**ADELFA** (Sp.), n. A<sup>3</sup>d<sup>2</sup>l'fa<sup>2</sup>. The *Nerium oleander*. [A, 344.]

**ADELHEIDBRUNNEN** (Ger.), n. A<sup>3</sup>d<sup>2</sup>l-hid-brun-ne<sup>2</sup>n. See SCHWALBACH.

**ADELHEIDSQUELLE** (Ger.), n. A<sup>3</sup>d<sup>2</sup>l-hidz-que<sup>2</sup>l-le<sup>2</sup>. Fr., source d'Adélaïde. A cold spring in the village of Heilbrunn, Bavaria, praised by von Nussbaum for its effects in cases of scrofulous disease of bones, and resorted to for the cure of sterility, etc.; 1,000 parts, by weight, contain:

Sodium chloride.....	4.9560
Sodium iodide.....	0.0283
Sodium bromide.....	0.0478
Sodium carbonate.....	0.8000

The water contains also free carbon dioxide. [A, 305, 319.]

**ADELHOLZEN** (Ger.), n. pl. A<sup>3</sup>d<sup>2</sup>l-holts-e<sup>2</sup>n. Three hot springs (containing, respectively, potassium nitrate, sulphur, and alum) in Upper Bavaria, south of Traunstein; used for gout, rheumatism, paralysis, and chronic skin diseases. [A, 304.] According to Buchner, a pound of the water contains:

Calcium carbonate.....	1.670 grains.
Magnesium carbonate.....	0.180 grain.
Potassium nitrate.....	0.010 "
Sodium chloride.....	0.090 "
Sodium carbonate.....	0.020 "
Sodium sulphate.....	0.015 "
Calcium sulphate.....	0.015 "

Traces of iron carbonate, bromine, humic acid, silex, and lithium. [A, 319.]

**ADELIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)/li<sup>2</sup>-a<sup>3</sup>. Fr., *adélie*. A genus of euphorbiaceous plants, established by Linnaeus, found in Jamaica. [A, 305.]—**A. venenata**. See *ADENIA venenata*.

**ADÉLICATER** (Fr.), v. intr. A<sup>3</sup>-da-le-ka<sup>2</sup>-ta. To become delicate in health. [E. Souvestre (A, 306).]

**ADELIDUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l'i<sup>2</sup>d-u<sup>2</sup>s(u<sup>4</sup>s). See *ADELUS*.

**ADELIPARIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l-i<sup>2</sup>p-a(a<sup>3</sup>)ri<sup>2</sup>-a<sup>3</sup>. From *adipn*, abundant, and *liparia*, fatness. Fr., *adéliparie*. Ger., *Fett-leibigkeit*. It., *adeliaria*. Obesity; the first class of Alibert's *Ethimptecoses*. [A, 322.]

**ADELOBRANCHIATE**, adj. A<sup>2</sup>d'e<sup>2</sup>l-o-bra<sup>2</sup>ng'ki<sup>2</sup>-at. From *adēlos*, unseen, and *βράγχια*, gills. Fr., *adélobranche*. Sp., *adelobranquio*. In zoology, having the branchia concealed. [A, 306.]

**ADELOCEPHALOUS**, adj. A<sup>2</sup>d'e<sup>2</sup>l-o-se<sup>2</sup>l'a<sup>2</sup>-u<sup>2</sup>s. From *adēlos*, unseen, and *κεφαλή*, the head. Fr., *adélocéphale*. Sp., *adelocéfalo*. In zoology, having the head almost invisible. [A, 306, 348.]

**ADELOCERATOUS, ADELOCEROUS**, adj's. A<sup>2</sup>d-e<sup>2</sup>l-o-se<sup>2</sup>l'a<sup>2</sup>-u<sup>2</sup>s, -o<sup>2</sup>s'e<sup>2</sup>-ru<sup>2</sup>s. From *adēlos*, unseen, and *κέρας*, a horn. Fr., *adélócère*. Sp., *adélócero*. In zoology, having the horns or antennae concealed. [A, 306.]

**ADELOCODONIC**, adj. A<sup>2</sup>d'e<sup>2</sup>l-o-ko-do<sup>2</sup>n'i<sup>2</sup>k. From *adēlos*, unseen, and *κώδων*, a bell. In zoology, closed and bell-like (said of the genital buds of the *Hydrozoa* when they are closed by the union of their margins). [Allmann (B, 77).]

**ADEL-ODAGAM**, n. A Malabar name for the *Justicia bivalvis* (q. v.). [A, 344.]

**ADELODERMATOUS, ADELODERMOUS**, adj's. A<sup>2</sup>d'e<sup>2</sup>l-o-du<sup>2</sup>rm'at-u<sup>2</sup>s, -du<sup>2</sup>rm'u<sup>2</sup>s. From *adēlos*, unseen, and *δέρμα*, the skin. Fr., *adéلودermie*. Sp., *adéلودermo*. See *ADELOBRANCHIATE*.

**ADELOMORPHOUS**, adj. A<sup>2</sup>d'e<sup>2</sup>l-o-mo<sup>2</sup>r'f'u<sup>2</sup>s. From *adēlos*, unseen, and *μορφή*, form. Fr., *adéломорфе*. An epithet applied by Rollett (1870) to the columnar cells forming the greater part of the lining of the gastric glands. [J.] Cf. *DELOMORPHOUS* and *Principial cells*.

**ADELOPNEUMONOUS**, adj. A<sup>2</sup>d'e<sup>2</sup>l-o-nu<sup>2</sup>'mo<sup>2</sup>n-u<sup>2</sup>s. From *adēlos*, concealed, and *πνεῦμα*, the lung. Fr., *adéлопнеумонé*. Sp., *adéлопнеумо*. Having the respiratory organs concealed in the interior of the body (said of a group of mollusks). [A, 306.]

**ADELOPODA** (Lat.), n. n. pl. A<sup>2</sup>(a<sup>3</sup>d)-e<sup>2</sup>l-o<sup>2</sup>p'o-da<sup>3</sup>. From *adēlos*, concealed, and *πούς*, the foot. Fr., *adéлопoдes*. Ger., *Adéлопoden*. Sp., *adéлопoдos*. Adelopods, adelopodous animals; those that have the organs of locomotion concealed or indistinctly formed. [A, 305, 334.]

**ADELOS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)/lo<sup>2</sup>s. See *ADELUS*.

**ADELOSTOMATA** (Lat.), n. n. pl. A<sup>2</sup>(a<sup>3</sup>d)-e<sup>2</sup>l-o-sto<sup>2</sup>m'a<sup>3</sup>-ta<sup>3</sup>. From *adēlos*, concealed, and *στόμα*, the mouth. Fr., *adélostomes*. Sp., *adélostómitos*. Adélostomatous animals; those that have the mouth concealed. [A, 306.]

**ADELPHÉ** (Fr.), adj. A<sup>3</sup>-de<sup>2</sup>l'f. Adelphous.

**ADELPHÉOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>l'f-e-u<sup>2</sup>s. Having the quality of adelphia (q. v. [3d def.]). [A, 316.]

**ADELPHIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l'f'i<sup>2</sup>-a<sup>3</sup>. From *ἀδελφός*, a brother. Fr., *adelphie*. Ger., *Adelphie*, *Brüderschaft*, *Verbrüderung*. Sp., *adelfia*. Lit., a brotherhood. 1. A general term for monstrosities in which two or more organisms are separated below and united above. [A, 321.] 2. In botany, a group of stamens united at their bases. [B.] See *MONADELPHIA*, *DIADELPHIA*, and *POLYADELPHIA*. 3. A term by which Hippocrates implied the relationship of certain diseases to each other. [A, 358.]

**ADELPHISM**, n. A<sup>2</sup>d-e<sup>2</sup>l'f'i<sup>2</sup>zm. Lat., *adelphismus*. See *ADELPHIA*.

**ADELPHIUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l'f'i<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). Gr., *ἀδελφικός*, *ἀδελφός*. Having the quality of adelphia (q. v. [3d def.]).

**ADELPHIXIA, ADELPHIXIS** (Lat.), n's f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>l'f-i<sup>2</sup>x'i-a<sup>3</sup>, -i's. Gr., *ἀδελφία*, *ἀδελφίς*. Fr., *adelphixie*. Ger., *Verbrüderung*. Sp., *adelficia*. The relationship or sympathy of the different component parts of the body. [Hippocrates (A, 322).]

**ADELPHOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>l'f'u<sup>2</sup>s. Lat., *adelphus*. Fr., *adelphie*, *adelphique*. Ger., *brüderig*. Sp., *adelfo*. In botany, said of stamens which are united by their filaments so that several anthers are supported on a single base. [B.] See *MONADELPHOUS*, *DIADELPHOUS*, and *POLYADELPHOUS*.

**ADELSBEERE** (Ger.), n. A<sup>3</sup>d'e<sup>2</sup>l-z-ba-re<sup>2</sup>. See *ADELBEERE*.

**ADELUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)/lu<sup>2</sup>s(lu<sup>4</sup>s). Gr., *ἀδλος*. Fr., *adélide* [Bégin]. Sp., *adélido*. 1. Invisible, insensible (said of the cutaneous transpiration). 2. Obscure, uncertain, ill-defined (said of symptoms). [A, 306, 334.]

**ADEMONIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>m-o'ni<sup>2</sup>-a<sup>3</sup>. Gr., *ἀδημονία*. Fr., *adémonie*. Ger., *Ademonie*, *Ueberdross*. It., *ademonia*. Sp., *ademonia*. Restlessness, anxiety, extreme agitation, mental depression. [A, 305, 306.]

**ADEMOSYNE** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>m-o<sup>2</sup>s'i<sup>2</sup>n(u<sup>4</sup>n)-e(a). Gr., *ἀδημοσύνη*. See *ADEMONIA*.

**ADEN** (Lat.), n. m. and f. A(a<sup>3</sup>)de<sup>2</sup>n. Gen., *ad/enis*. Gr., *ἀδην*, *ἀδην*. 1. A gland. [Hippocrates (A, 311).] 2. As sometimes used, a bubo. [A, 343.]—**A's canadenses**. Potatoes. [A, 358.]

**ADENALGIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-a<sup>2</sup>l(a<sup>3</sup>l')ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. From *adēn*, a gland, and *άλγος*, pain. Fr., *adénalgie*. Ger., *Drüsen-schmerz*. It., Sp., *adenalgia*. Pain in a lymphatic gland. [E.]

**ADENALGIC**, adj. A<sup>2</sup>d-e<sup>2</sup>n-a<sup>2</sup>l'ji<sup>2</sup>k. Fr., *adénalgique*. Sp., *adénálgico*. Pertaining to adenalgia. [A, 306.]

**ADENANDRA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-a<sup>2</sup>n(a<sup>3</sup>n)/dra<sup>3</sup>. From *adēn*, a gland, and *άνδρ*, a man. Fr., *adénandre*. Sp., *adenandra*. A genus of plants, established by Willdenow, including a part of Linnaeus's genus *Diosma*, indigenous to southern Africa; so called from their having glandular anthers. Several of the species are used as stimulants and diuretics and to allay cough. [A, 305, 306, 321.]—**A. uniflora** [Willdenow]. The leaves of this species, with those of several other plants of the same tribe, are found in the buchu of commerce. [A, 321.]

**ADENANTHERA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-a<sup>2</sup>n(a<sup>3</sup>n)-the(thay'-ra<sup>3</sup>). From *adēn*, a gland, and *άνθηρ*, blooming. Fr., *adénanthere*. Ger., *Drüsenblume*. A genus of tropical mimosaceous trees established by Linnaeus; so called from its gland-tipped anthers. [A, 252, 305, 306, 321, 344.]—**A. pavonina** [Linnaeus]. The *mandisadi*, or *mandisadi*, of Malabar and Ceylon; in India the root is used as an emetic, and a decoction of the leaves for chronic rheumatism; the seeds (the *condoris*, *pois-corail*, or *fèves d'Amérique*, of the French), which are red and lenticular, have been recommended for hydrophobia and epilepsy. [A, 321, 344.]

**ADENANTHEREÆ** (Lat.), n. f. pl. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-a<sup>2</sup>n(a<sup>3</sup>n)-the(thay're)-e(a<sup>3</sup>e<sup>2</sup>). Fr., *adénantherées*. A tribe of leguminous plants of the sub-order *Mimosaceæ*. [B, 93.]

**ADENANTHOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>n-a<sup>2</sup>n'thu<sup>2</sup>s. Fr., *adénanthe*. In botany, having the pedicels springing from the base of glandular organs. [A, 306.]

**ADENECTOPIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-e<sup>2</sup>k-to'pi<sup>2</sup>-a<sup>3</sup>. From *adēn*, a gland, and *εκτόπιο*, out of place. Fr., *adénectopie*. Ger., *Adenektomie*. It., *adenectopia*. The displacement of a gland from its natural situation. [A, 322.]

**ADENECTOPIC**, adj. A<sup>2</sup>d-e<sup>2</sup>n-e<sup>2</sup>k-to'p'i<sup>2</sup>k. Lat., *adenectopicius*. Pertaining to adenectopia. [A, 322.]

**ADENEMPHRACTIC**, adj. A<sup>2</sup>d-e<sup>2</sup>n-e<sup>2</sup>m-fra<sup>2</sup>k'ti<sup>2</sup>k. Lat., *adenemphracticus*. Pertaining to adenemphraxis (q. v.). [A, 322.]

**ADENEMPHRAXIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-e<sup>2</sup>m-fra<sup>2</sup>-x-(fra<sup>2</sup>x)'i's. Gen., *adenemphrax/eos*. From *adēn*, a gland, and *ἐμφράξις*, a stoppage. Fr., *adenemphraxie*. Ger., *Drüsenverstopfung*. It., *adenemphrasia*. Sp., *adenemphrasia*. Engorgement or obstruction of the lymphatic glands. [A, 305, 330.]

**ADENIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)/ni<sup>2</sup>-a<sup>3</sup>. From *adēn*, a gland. Fr., *adénie* [Trousseau]. Ger., *Drüsenübel*. It., Sp., *adenia*. See *PSEUDO-LEUCOCYTHÆMIA*.—**Leucæmia a**. That form in which the white corpuscles of the blood are increased in number. [Langhans (D, 48).]—**Simple a**. That form in which no change in the blood can be detected, or at most only a diminution in its quantity. [Langhans (D, 48).]

**ADENIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)/ni<sup>2</sup>-a<sup>3</sup>. From *aden*, the Arabic name of *A. venenata*. A genus of passifloraceous plants indigenous to Arabia and Africa. [B, 52.]—**A. venenata** [Forskahl]. Syn.: *Adelia venenata* [De Candolle]. According to Forskahl, an Arabian tree, which is the source of an extremely active poison; thought to be the same as the *Modecca abyssinica*. [A, 321.] The juice is said to be caustic. [De Candolle (A, 344).] According to Schweinfurth, an African climbing passion-flower, used as a vesicant. [A, 308.]

**ADÉNTE** (Fr.), n. A<sup>3</sup>-da-ne. Trousseau's term for Hodgkin's disease. [D, 4.] See *PSEUDO-LEUCOCYTHÆMIA*. In the pl., a general term for diseases of the glands.—**A's anglibromiques**. Piorry's term for diseases of the glands annexed to the digestive tube (under which head he enumerates the salivary glands, the pancreas, the liver, the spleen, and the kidneys). [A, 250.]

**ADENIFORM**, adj. A<sup>2</sup>d-e<sup>2</sup>n'i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *adeniformis* (from *adēn*, a gland, and *forma*, shape). Fr., *adéniforme*. Ger., *drüsen-förmig*. See *ADENOID*.

**ADENINE**, n. A<sup>2</sup>d-e<sup>2</sup>n-en. From *adēn*, a gland. Fr., *adénine*. Ger., *Adenin*. It., Sp., *adenina*. A crystalline alkaloid, C<sub>5</sub>H<sub>5</sub>N<sub>5</sub>, a polymer of hydrocyanic acid, obtained by Kossel from the pancreas and spleen, and also from beer-yeast. It forms acicular crystals soluble in hot water and in ammonia water, and in chemical prop-

erties it is related to hypoxanthine and guanine. [<sup>1</sup> Brit. and Colon. Druggist, Feb., 1885, p. 41 (A); <sup>2</sup> Ann. di chim. med.-farm. e di farmacol., July, 1885, p. 52 (B).]

**ADENISATION**, n. A<sup>2</sup>d-e<sup>2</sup>n-i<sup>2</sup>z-a'shu<sup>2</sup>n. See ADENIZATION.

**ADÉNITE** (Fr.), n. A<sup>3</sup>-dan-et. See ADENITIS.—**A. cervicale syphilitique**. A swollen state of the cervical lymphatic glands due to syphilis; according to Ricord, one of the most trustworthy signs of infection at the outset, and also to be detected when no other trace of the disease remains, being then almost certainly prognostic of subsequent relapse. [A, 301.]—**A. chancreuse**. Chancreous adenitis. [G.] See *Virulent bubo*.—**A. syphilitique primitif**. See *Syphilitic bubo*.

**ADENITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-i(e)'ti<sup>2</sup>s. Gen., *adenitidis*. For deriv., see ADEN and -itis.\* Fr., *adénite*. Ger., *Drüsenentzündung*. It., *adenite*. Sp., *adenitis*. Inflammation of a gland, especially of a lymphatic gland. [E.]—**A. axillaris**. Inflammation of the lymphatic glands of the axilla.—**A. cervicalis syphilitica**. See *Adénite cervicale syphilitique*.—**A. cubitalis**. Ger., *Ellbogenbubo*, *Cubitaldrüsenentzündung*. Inflammation of the epitrochlear lymphatic gland, from infection by the hand or forearm. [Grünfeld (A, 319).]—**A. e biennorrhœa**. See *Gonorrhœal bubo*.—**A. e sclerosi**. See *Adenosclerosis* and *Indolent bubo*.—**A. exulcerata**. Ger., *Drüsenchanker*. A suppurating bubo followed by ulceration of the affected gland and the overlying tissue. [Grünfeld (A, 319).]—**A. ex ulcere contagioso**. See *Virulent bubo*.—**A. femoralis**. Inflammation of the lymphatic glands in the subinguinal triangle. [Grünfeld (A, 319).]—**A. gangrenosa**. A bubo of a pronounced phlegmonous character, leading to gangrenous destruction of the gland. [Grünfeld (A, 319).]—**A. hyperplastica**. Ger., *hyperplastische A.* An a. in which plastic exudation predominates, leading to hyperplasia. [Grünfeld (A, 319).]—**A. inguinalis**. See *Bubo*.—**A. lymphatica**. Fr., *adénite lymphatique*. See *LYMPHADENITIS*.—**A. mesenterica**. Inflammation of the mesenteric glands. [A, 311.]—**A. palpebrarum contagiosa**. Fr., *adénite contagieuse des paupières*. Ger., *ansteckende Liddrüsenentzündung*. It., *adenite contagiosa delle palpebre*. Sp., *a. contagiosa de los parpados*. See *Purulent conjunctivitis*.—**A. publica**. A rare form of bubo in the middle of the pubic region, generally accompanied with suppurative lymphangitis on the dorsum of the penis. [Grünfeld (A, 319).]—**A. scrofulosa equorum**. Fr., *gourme*. Ger., *Drüse*. It., *adenite equina*, *piccionaja*, *barbone*, *strangoltoni*. Syn.: *morbus glandulosus*. The strangles; a disease of the horse, beginning as a nasal catarrh, which extends to the contiguous mucous membranes, and is accompanied with inflammatory swelling of the submaxillary lymphatic glands. At first a purely local disease, it extends by infection, producing inflammation of the cervical and thoracic lymphatic vessels and glands. [A, 314.]—**A. universalis**. The induration of various lymphatic glands (the cervical, epitrochlear, axillary, etc.) that accompanies the first cutaneous manifestations of syphilis. [Grünfeld (A, 319).]—**A. venerea**. See *Veneral bubo*.—**A. vulvo-vaginalis**. Inflammation of the vulvo-vaginal gland.—*Chancreous a.* Fr., *adénite chancreuse*. See *Virulent bubo*.—*Meibomian a.* Fr., *adénite meibomienne*. 1. Inflammation of the Meibomian glands. 2. Chalazion, considered as an inflammatory hypertrophy of those glands. [A, 301.]—*Peria*'. See the major list.—*Sclera*'. Ger., *Skleradenitis*. See *ADENOSCLEROSIS*.

**ADENIUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-e(a)'ni<sup>2</sup>-u<sup>2</sup>m(u<sup>2</sup>m). A genus of apocynous plants established by Römer and Schultes; so called from its being indigenous to Aden. [A, 248, 305, 321.]—**A. obesum** [Römer and Schultes]. Syn.: *Nerium obesum* [Forskahl]. The only species; in an Abyssinian shrub, the juice of which is extremely poisonous. [Forskahl (A, 321).]

**ADENIZATION**, n. A<sup>2</sup>d-e<sup>2</sup>n-i<sup>2</sup>z-a'shu<sup>2</sup>n. Fr., *adénisation*. See *Adenoid DEGENERATION*.

**ADENOBLASTS**, n. pl. A<sup>2</sup>d'e<sup>2</sup>n-o-bla<sup>2</sup>stz. From *adēn*, a gland, and *βλαστός*, a germ. Ger., *Adenoblasten*, *Drüsenzellen*. Syn.: *gland cells*. A general term used by Hæckel ("Jenaische Ztg.," xviii, 1884) to designate the cells which form glands, their function being excretory or secretory, according to the gland. [J.]

**ADENOCALYCAL**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-ka<sup>2</sup>l'i<sup>2</sup>k-a<sup>2</sup>l. From *adēn*, a gland, and *κάλυξ*, a calyx. Fr., *adénocalicé*. Sp., *adenocaliceo*. In botany, having a calyx that presents glandular points. [A, 306.]

**ADENO-CARCINOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-ka<sup>2</sup>r-si<sup>2</sup>n-(ki<sup>2</sup>n)-o'ma<sup>2</sup>. Ger., *Drüsen carcinoma*, *Drüsenkrebs*. Adenoid can-

cer, carcinomatous adenoma; an adenoma in which carcinomatous degeneration has taken place, the walls of the glandular spaces having given way and the gland cells having invaded the interstitial connective tissue and the radicles of the lymphatics. [Birch-Hirschfeld (A, 319).]

**ADENOCELE** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-se(ka)'le(la) or, considered as an English word, a<sup>2</sup>d-e<sup>2</sup>n-o-sel. From *adēn*, a gland, and *κύηλα*, a tumor. A rare form of tumor of the breast, first described by Sir B. Brodie, consisting of a cyst or cysts of the ducts or sinuses containing adenomatous growths apparently springing from the walls. [J. Birkett (A, 279).] Cf. *Proliferative cyst*.

**ADENOCHEIRAPSOLOGY**, **ADENOCHEIRAPSOLOGY**, n's. A<sup>2</sup>d'e<sup>2</sup>n-o-ki-ra<sup>2</sup>ps-o'l'o-ji<sup>2</sup>. Lat., *adenochirapsologia* (from *adēn*, a gland [hence scrofula], and *χειρῶν*, a laying on of hands [see also -logy\*]). Ger., *Adenochirapologie*. It., *adenochirapsologia*. The doctrine or practice of the pretended cure of scrofula by the king's touch. Browne, physician to Charles II, wrote a book with this title. [A, 322.]

**ADENOCHERADOLOGIA**, **ADENOCHOIRADOLOGIA** (Lat.), n's f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-ke(ch<sup>2</sup>o-e<sup>2</sup>)-ra<sup>2</sup>-do-l'o-ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>2</sup>. From *adēn*, a gland, and *χέρως* (gen., *χερῶδης*), a scrofulous swelling in the neck. 1. Adenochirapsology (q. v.). [A, 322.] 2. A treatise on scrofula. [A, 313.]

**ADENOCHONDRIUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-ko<sup>2</sup>n-(ch<sup>2</sup>o<sup>2</sup>ni)'dri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). From *adēn*, a gland (in this case probably in the sense of scrofula), and *χόνδρος*, cartilage. An old term, probably meaning scrofulous and at the same time affecting cartilage. [L.] See *ARTHRPHYMA adenochondrium*.

**ADENO-CYSTOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-si<sup>2</sup>st(ku<sup>2</sup>st)-o'ma<sup>2</sup>. Gen., *adeno-cystomatos (-itis)*. For deriv., see ADEN and CYSTOMA. An adenoma in which cysts have formed. [E.]

**ADÉNODERMIE** (Fr.), n. A<sup>3</sup>-da-no-de<sup>2</sup>r-me. A general term for diseases of the cutaneous glands. [A, 250.]

**ADENODES** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-dez(de<sup>2</sup>s). From *adēn*, a gland, and *εἶδος*, an appearance. Gland-like. [A, 322.] See ADENOID.—*Corpora adenodea*. See under *CORPUS*.

**ADENODIASTASIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-di(de)-a<sup>2</sup>s-(a<sup>2</sup>s)'ta<sup>2</sup>-si<sup>2</sup>s. Gen., *adenodiastaseos*. From *adēn*, a gland, and *διαστάσις*, a separation. Fr., *adenodiastase*. 1. An abnormal separation of the lobes of a gland. [A, 305, 306.] 2. Adenectomy (q. v.). [Ludwig (A, 322).]

**ADENODIASTATIC**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-di-a<sup>2</sup>s-ta<sup>2</sup>t'i<sup>2</sup>k. Lat., *adenodiastaticus*. Pertaining to adenodiastasis. [A, 322.]

**ADENODYNIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-di<sup>2</sup>n-du<sup>2</sup>(e<sup>2</sup>n)'i<sup>2</sup>a<sup>2</sup>. From *adēn*, a gland, and *δύνη*, pain. See ADENALGIA.

**ADENO-FIBROMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-fi(fe)-bro'ma<sup>2</sup>. Fr., *adéno-fibrome*. An adenoma having a fibrous stroma. [E.]

**ADENOGENESIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-je<sup>2</sup>n(ge<sup>2</sup>n)'e<sup>2</sup>-si<sup>2</sup>s. Gen., *adenogene<sup>2</sup>seos*. From *adēn*, a gland, and *γένεσις*, a creation. Ger., *Drüsenbildung*. The formation of glands. [A, 322.]

**ADENOGRAPHER**, n. A<sup>2</sup>d-e<sup>2</sup>n-o-g<sup>2</sup>ra'f-u<sup>2</sup>r. From *adēn*, a gland, and *γράφειν*, to write. Fr., *adénographe*. Ger., *Drüsenbeschreiber*. Sp., *adenógrafo*. A writer on glands. [A, 306.]

**ADENOGRAPHIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-gra<sup>2</sup>f(gra<sup>2</sup>f)'i<sup>2</sup>-a<sup>2</sup>. See ADENOLOGY.

**ADENOGRAPHIC**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o-gra<sup>2</sup>f'i<sup>2</sup>k. Lat., *adenographicus*. Fr., *adénographique*. Ger., *adenographisch*. Sp., *adenográfico*. Pertaining to adenography. [A, 306.]

**ADENOGRAPHY**, n. A<sup>2</sup>d-e<sup>2</sup>n-o-g<sup>2</sup>ra'f-i<sup>2</sup>. Lat., *adenographia*. Fr., *adénographie*. Ger., *Adenographie*, *Drüsenbeschreibung*. It., *adenografia*. Sp., *adenografia*. See ADENOLOGY.

**ADENOID**, adj. A<sup>2</sup>d'e<sup>2</sup>n-oid. Gr., *ἀδνοειδής* (from *adēn*, a gland, and *εἶδος*, an appearance). Lat., *adenoides*, *adenoides*. Fr., *adénoïde*. Ger., *adenoid*, *drüsenartig*. It., Sp., *adenoide*. 1. Resembling a gland in structure; as a n., a glandular tumor. See ADENOMA. 2. Pertaining to glands. In 1860 His applied the term to the felt-like or reticular connective tissue forming the framework of lymphatic glands and some other parts. [J.] See A. TISSUE. For further uses of the word, see A. BODY, A. DEGENERATION, and A. VEGETATIONS.—**A. cancer**. See ADENO-CARCINOMA.—**A. muscle**. See THYRO-ADENOIDES.—**A. tumor**. See ADENOMA.

**ADENOIDES** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-i(e)'dez(de<sup>2</sup>s). Adenoid. As a n. (*corpus* understood), an old term for the prostate. [Galen (A, 255).]

**ADENOLOGADITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-lo<sup>2</sup>g-a<sup>2</sup>-di(di)'ti<sup>2</sup>s. Gen., *adenologaditidis*. From *adēn*, a gland, and *λογάδης*, the eyes (see also -itis\*). Fr., *adénologadite*. Ger., *Drüsenbindehautentzündung*. An old term for ophthalmia neonatorum. [A, 305.]

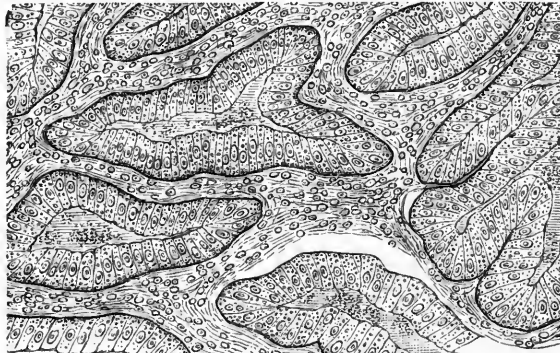

**ADENOLOGICAL**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-lo<sup>2</sup>g'i<sup>2</sup>k-a<sup>2</sup>l. Lat., *adenologicus*. Fr., *adénologique*. Ger., *adenologisch*. Sp., *adenológico*. Pertaining to glands or to adenology. [C.]

**ADENOLOGY**, n. A<sup>2</sup>d-e<sup>2</sup>n-o-l'o-ji<sup>2</sup>. Lat., *adenologia*. Fr., *adénologie*. Ger., *Adenologie*, *Drüsenlehre*. It., *adenologia*. Sp., *adenologia*. That part of anatomy which relates to the glands.

**ADÉNO-LYMPHATOCÈLE** (Fr.), n. A<sup>3</sup>-da-no-li<sup>2</sup>n-fa<sup>2</sup>-to-se<sup>2</sup>l. See *LYMPHATOCÈLE*.

**ADENO-LYMPHITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-li<sup>2</sup>m(lu<sup>2</sup>m)-fi(fe)'ti<sup>2</sup>s. Gen., *adeno-lymphitidis*. Fr., *adéno-lymphite*. See *LYMPHADENITIS*.

**ADÉNO-LYMPHOCÈLE** (Fr.), n. A<sup>3</sup>-da-no-li<sup>2</sup>n-fa<sup>2</sup>-to-se<sup>2</sup>l. 1. A name given by Nélaton to certain lymphangiomata in which the distended lymphatics may be traced into the neighboring glands. [E.] 2. Anger's term for the *lymphangiectasie ganglionnaire* of Verneuil (q. v.).

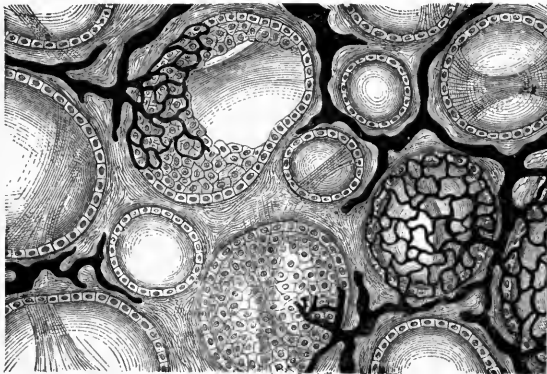

ADENO-CARCINOMA OF THE RECTUM. (AFTER BILLROTH.)

**ADENO-LYMPHOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-li<sup>2</sup>m(lu<sup>6</sup>m)-fo'ma<sup>3</sup>. Gen., *adeno-lymphom'atos* (-ti<sup>2</sup>s). See LYMPHADENOMA.

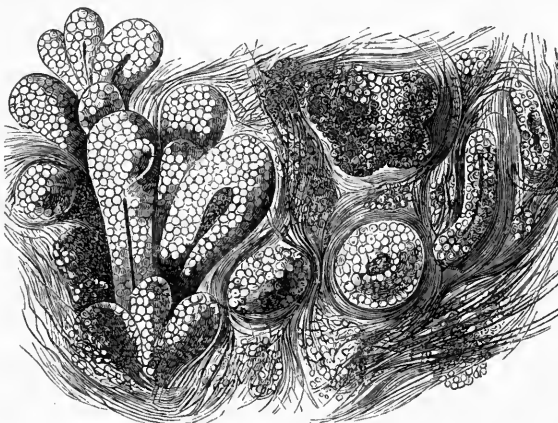

**ADENOM** (Ger.), n. A<sup>2</sup>-de<sup>2</sup>n-om'. See ADENOMA.—**Schweissdrüsen'**. See ADENOMA *sudoriparum*.—**Talgdrüsen'**. See ADENOMA *sebaceum*.

**ADENOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o'ma<sup>3</sup>. Gen., *adenom'atos* (-tis). For deriv., see ADEN and -oma.\* Fr., *adénome*. Ger., *Adenom*, *Drüsengeschwulst*. It., Sp., *adenoma*. Syn.: *glandular* (or *adenoid*) *tumor*. A tumor having a glandular structure. [A, 321.] An homologous neoplasm characterized by the presence of the elements of acinous or tubular glands; or a tumor chiefly

ADENOMA OF THE THYROID. (AFTER BILLROTH.)

made up of an agglomeration of altered glands (as in the skin or a mucous membrane). [P. Broca (A, 328).] The adenomata are less sharply defined than most other classes of tumors. Glandular tissue, more or less resembling that of the organ from which they spring, is usually the predominating element. They are generally encapsulated, but are prone to penetrate the surrounding textures, and in rare instances supplant them, and are apt to give rise to the formation of cysts. As a rule, they do not recur after removal, but some of them tend to malignant degeneration. [A, 291.] Förster distinguishes three forms: 1. Tumors formed by the proliferation of single lobes of normal glands. 2. Those formed by proliferation of the connective tissue in or adjacent to normal glands. 3. Those of a glandular structure that are developed independently of normal glands. Those last named are generally thought, however, to be of the sort defined under *Heterotopous a*. [Birch-Hirschfeld (A, 319).] *A*. of the breast (*chronic mammary tumor*, *hydatid disease of the breast* [Sir A. Cooper], *pancreatic sarcoma* [Abernethy], *mammary glandular tumor*, *proliferative cysts* [Sir J. Paget], *carcinoma hydatides* [Sir C. Bell], *sero-cystic sarcoma* [Sir B. Brodie], *tuberous cystic tumor* [C. Hawkins], *tumeur adénoïde* (ou *fibreuse*, ou *fibreuse*, ou *squirrhe* [Velpeau], *tumeur fibreuse* [Cruveilhier], *tumeur par hypertrophie partielle de la mamelle* [Vidal], *fibröse lappige Adenom* [Billroth]) forms a round or nodulated, highly movable, circumscribed, somewhat elastic lump, in the gland or adjacent to it, made up of new-formed acini, occurring for the most part in young, newly married women, or during the

ADENOMA OF THE BREAST. (AFTER BILLROTH.)

puerperal period. Microscopically, it is a partial hypertrophy of the mammary lobules. [A, 222; J. Birkett (A, 279), Albert (A, 319).] Cf. ADENOCLE. In the liver, where it is included as one of the forms of cancer, it presents nodules of various sizes, either on the surface of the organ or in its substance, having a granular appearance. [C. A. Ewald (A, 319).] In the nose it often undergoes cystic degeneration or forms mucous polypi. [Gottstein (A, 319).] In the pharynx it forms adenoic vegetations. [B. Fraenkel (A, 319).] In the rectum it forms very vascular polypi, which bleed readily, or

vegetations. [Englisch (A, 319).] For *a*. of the ovary, see *A. cylindro-cellulare*. In the uterus it consists of a degeneration of the endometrium by overgrowth of the utricular glands, either diffused or in the form of a polypus. The former variety is prone to relapse and to undergo carcinomatous degeneration. [Bandl (A, 319).] According to Fritsch, carcinoma of the body of the uterus is really malignant *a*. [A, 224].—**Acinous a**. Ger., *acinöses Adenom*. Syn.: *racemose a*. One that contains acinous gland structure; it is the form developed in compound racemose glands, especially the mamma, forming tumors that are usually rounded, circumscribed, and easily enucleated, varying in their gross appearances according as they affect one or more of the lobes of the gland, as the acini or stroma predominate, and as cysts have or have not been formed. [A, 291, 365].—**A. carcinomatousum**. See ADENO-CARCINOMA.—**A. cylindro-cellulare**. Proliferating (or myxoid or colloid) cystoma; clinically, the commonest form of ovarian cystoma, the outer wall of which consists of fibrous connective tissue and is poor in cells, while the inner wall contains an abundance of spindle-cells and round cells, and is lined with cylindrical epithelium having crypts resembling the acini of a gland or showing papillomatous growths. [Pernice (A, 319).] See *Cystoma proliferum glandulare* and *Cystoma proliferum papillare*.—**A. diffusum**. Hyperplasia of a mucous membrane, with a predominance of the glandular elements. [A, 326].—**A. fibrosum**. A fibrous neoplasm in the stroma of a gland. [A, 326].—**A. lupiforme**. A name proposed by Tilbury Fox for lupus erythematosus. [G, 60].—**A. myomatousum**. An *a*. in which the stroma has been invaded by myoma. [R. J. Godlee (A, 364)].—**A. myxomatousum**. 1. An *a*. in which the stroma has been invaded by myxoma. [R. J. Godlee (A, 364).] 2. A myxoma developed in the stroma of a gland; such formations, either nodular or diffused, have been found in the thyroid gland. [A, 326; Birch-Hirschfeld (A, 319).]—**A. polyposum**. A collection of polypi made up of exuberant glands. [A, 326].—**A. sarcomatousum**. A sarcoma developed in the stroma of an *a*. or of a gland. [R. J. Godlee (A, 364), A, 326].—**A. sebaceum**. Ger., *Talgdrüsenadenom*. A cutaneous *a*. the structure of which corresponds in type to that of the sebaceous glands. [Birch-Hirschfeld (A, 319).]—**A. sudoriparum**. Ger., *Schweissdrüsenadenom*. A cutaneous *a*. the structure of which corresponds in type to that of the sudoriparous glands; it may form a nodule under the skin or project in a wart-like mass. [Birch-Hirschfeld (A, 319).]—**Blepharo-a**. See the major list.—**Carcinomatous a**. See ADENOCARCINOMA.—**Cutaneous a**. Ger., *cutanes Adenom*. In Auspitz's classification of skin diseases, the cutaneous *a*. form a subdivision of the family *Hyperakanthoses*, comprising those produced by hyperplasia of the follicles, under which is included *idrotadenoma* (*q. v.*). [G, 4.] See also *A. lupiforme*, *A. sebaceum*, and *A. sudoriparum*.—**Cylindrical a**. See *Tubular a*.—**Cystic a**. An *a*. that contains cysts. [E.] Cf. ADENOCLE and ADENO-CYSTOMA.—**Heterotopous a**. Ger., *heterotopes Adenom*. A rare form, supposed to be developed from elements originally belonging to normal glands, but which have found their way to other parts of the organism. [Birch-Hirschfeld (A, 319).]—**Idrota'**. See the major list.—**Lymph'a**. See the major list.—**Multiglandular a**. Fr., *adénome multiglandulaire*, *polyadénome*. An *a*. made up of a mass of altered small glands. [P. Broca (A, 328).]—**Racemose a**. See *Acinous a*.—**Tubular a**. Ger., *tubulöses Adenom*. A form observed in mucous membranes possessed of sacciform glands, in which the latter are changed into tubular glands. The term is also applied to ovarian cystomata in their early stages. [Birch-Hirschfeld (A, 319).]—**Uniglandular a**. Fr., *adénome uniglandulaire*, *monadénome*. An *a*. affecting a single gland. [P. Broca (A, 328).]

**ADENOMALACIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-ma<sup>3</sup>(ma<sup>3</sup>)l a(a<sup>3</sup>si<sup>2</sup>ki<sup>2</sup>)-a<sup>3</sup>. From *ἀδὴν*, a gland, and *μαλακία*, softness. Fr., *adénomalacie*. Ger., *Drüsenweichung*. It., *adenomalacia*. Softening of the glands. [E.]

**ADENO-MENINGEAL**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-me<sup>2</sup>n-i<sup>2</sup>n-je-a<sup>2</sup>l. For deriv., see ADEN and MENINGEAL. Lat., *adeno-meningeus*. Fr., *adéno-ménégé*. Ger., *adenomeningeisch*. It., *adeno-meningeo*. Sp., *adeno-meningeo*. Affecting the glands of a membrane. [Pinel (A, 306).] See *A. m. FEVER*.

**ADENO-MESENTERITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-me<sup>2</sup>s-e<sup>2</sup>n-te<sup>2</sup>r-i(e)-tis. Gen., *adeno-mesenterit'idis*. For deriv., see ADEN, MESENTERY, and -itis.\* Fr., *adéno-mésentérite*. Inflammation of the mesenteric glands. [A, 320.]

**ADENO-MYXOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)'e<sup>2</sup>n-o-mi<sup>2</sup>x(mu<sup>6</sup>x)-o'ma<sup>3</sup>. Gen., *adeno-myxomatos* (-tis). For deriv., see ADEN and MYXOMA. An adenoma having its stroma invaded by myxoma. [R. J. Godlee (A, 364).]

**ADENONCOSIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-n<sup>2</sup>-ko'si<sup>2</sup>s. Gen., *adenoncō'seos*. From *ἀδὴν*, a gland, and *γκωσις*, an enlargement. Fr., *adénoncose*. Ger., *Adenonkosis*, *Drüsengeschwulst*. It., *adenoncosi*. Sp., *adenoncosis*. A glandular swelling or the process of its formation. [A, 305.]

**ADENONCUS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-n<sup>2</sup>-ku's(ku's). From *ἀδὴν*, a gland, and *γκωσις*, a mass. Ger., *Adenonkos*. A glandular swelling or tumor.

**ADENO-NERVOUS**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-nu<sup>6</sup>r-vu's<sup>2</sup>. Lat., *adeno-nervosus* (from *ἀδὴν*, a gland, and *nervus*, a nerve). Fr., *adéno-nerveux*. It., *adeno-nervoso*. Sp., *adeno-nervioso*. See ADENO-NEUROTIC.

**ADENO-NEUROTIC**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o-nu<sup>6</sup>-ro<sup>2</sup>-ti<sup>2</sup>k. Lat., *adeno-neuroticus*, *adenoneuroticus* (from *ἀδὴν*, a gland, and *νεῦρον*, a nerve). Fr., *adéno-neurotisch*. Ger., *adenoneurotisch*. Affecting glands and nerves. See *A. n. FEVER*.

**ADENONKOS, ADENONKOSIS** (Lat.), n's. See ADENONCUS and ADENONCOSIS.

**ADENOPATHIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-e<sup>2</sup>n-o-pa<sup>2</sup>th(pa<sup>3</sup>th)'i<sup>2</sup>-a<sup>3</sup>. From *ἀδὴν*, a gland, and *πάθος*, a disease. See ADENOPATHY.

**ADÉNOPATHIE** (Fr.), n. A<sup>2</sup>-da-no<sup>2</sup>p-a<sup>3</sup>-te. See ADENOPATHY. —A's angibromiques. See ADÉNIES angibromiques. —A. du chancre infectant. See Syphilitic bubo. —A. trachéo-bronchique, A. trachéo-laryngienne. See Tracheo-bronchial and Tracheo-laryngeal ADENOPATHY.

**ADENOPATHY**, n. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>p-a<sup>2</sup>th-i<sup>2</sup>. Lat., *adenopathia* (q. v. for deriv.). Fr., *adénopathie*. Ger., *Adenopathie*. It., *adenopatia*. A general term for any morbid state of the lymphatic glands, especially a lymphadenitis due to infection. —Primary a. Fr., *adénopathie primaire*. The lymphadenitis that follows an infecting chancre, as distinguished from subsequent glandular manifestations of syphilis. [H. Leloir, "Progr. méd." Feb. 6, 1886, p. 103.] —Syphilitic adenopathies. Fr., *adénopathies syphilitiques*. Enlarged and indurated lymphatic glands symptomatic of syphilis; most commonly the inguinal, the posterior cervical, and the cubital. [G.] —Tracheo-bronchial a. Fr., *adénopathie trachéo-bronchique*. Hypertrophy of the peribronchial glands, observed in certain infectious diseases and those of the air-passages, especially at the outset of pulmonary tuberculosis, in typhoid fever, in measles, etc., giving rise to spasmodic cough. [A. 321.] —Tracheo-laryngeal a. Fr., *adénopathie trachéo-laryngienne*. A disease of the lymphatic glands lying between the larynx and trachea in front and the oesophagus behind. [Gougenheim, "Gaz. hebdom. de méd. et de chir.," Sept. 9, 1881; "Ann. des mal. de l'oreille," etc., May, 1882, p. 102.]

**ADENO-PHARYNGEAL**, adj. A<sup>2</sup>d'<sup>2</sup>e<sup>2</sup>n-o-fa<sup>2</sup>-r-i<sup>2</sup>n'<sup>2</sup>je-a<sup>2</sup>l. For deriv., see ADEN and PHARYNX. Lat., *adenopharyngeus*. Fr., *adéno-pharyngien*. Ger., *adenopharyngeisch*. It., *adeno-faringeo*. Sp., *adeno-faringeo*. Pertaining to the thyroid gland and to the pharynx. [A. 305, 306.] —A. p. muscle. See THYREO-ADENOIDEUS.

**ADENOPHARYNGITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-fa<sup>2</sup>(a<sup>3</sup>)-r-i<sup>2</sup>n(ru<sup>2</sup>n)-i(je)/ti<sup>2</sup>s. Gen., *adenopharyngitis*. For deriv., see ADEN, PHARYNX, and -itis\*. Fr., *adéno-pharyngite*. It., *adeno-faringite*. Sp., *adenofaringitis*. Inflammation of the pharynx and tonsils. [A. 305.]

**ADÉNO-PHLEGMON** (Fr.), n. A<sup>2</sup>-da-no-fle<sup>2</sup>g-mo<sup>2</sup>n<sup>2</sup>. A phlegmonous lymphadenitis (applied by Sirey to phlegmonous forms of pelvic lymphadenitis). [A. 62.]

**ADENOPHORA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>f'o-ra<sup>2</sup>. From *adēphō*, a gland, and *phorēin*, to bear. Fr., *adénophore*. Ger., *Drüsen-träger*. A genus of campanulaceous plants established by Fischer. [A. 304, 305.] —A. *hirsutifolia* [Ledebur]. Ger., *hirsutifolia* *Drüsen-träger*. A species found in Prussia, Posen, and Silesia. [A. 303.] —A. *stylota* [Fischer]. A Siberian species. [A. 304.] —A. *trachelioideus*. The root of this species is used in China as an expectorant and emollient. [A. 261.] —A. *verticillata* [Fischer]. A Siberian species, the root of which is used in China for the same purposes as that of *A. trachelioideus*. [A. 261, 304.]

**ADENOPHOROUS**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>f'o-ra<sup>2</sup>n<sup>2</sup>s. For deriv., see ADENOPHORA. Lat., *adenophorus*. Fr., *adénophore*. Ger., *drüsen-trägend*. Sp., *adenoforo*. In botany, having glands. [A. 306.]

**ADENOPHTHALMIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>p-tha<sup>2</sup>l-(tha<sup>3</sup>l)/mi<sup>2</sup>-a<sup>3</sup>. For deriv., see ADEN and OPHTHALMIA. Fr., *adéno-phthalmie*. Ger., *Adenophthalmie*. It., *adenottalmia*. Sp., *adenoftalmia*. Syn.: *ophthalmia tarsi*. Inflammation of the lining of the Meibomian glands, or of their excretory ducts, or of both. [F.]

**ADENOPHTHALMITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>p-tha<sup>2</sup>l-(tha<sup>3</sup>l)-mi(me)/ti<sup>2</sup>s. Gen., *adenophthalmitidis*. See ADENOPHTHALMIA.

**ADENOPHYLLOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>fi<sup>2</sup>l'u<sup>2</sup>s. From *adēphō*, a gland, and *phyllos*, a leaf. Fr., *adénophylle*. Sp., *adenófilo*. In botany, having the leaves furnished with glands. [A. 306.]

**ADENOPHYMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>fi(fu<sup>2</sup>)/ma<sup>2</sup>s. Gen., *adenophymatos* (-tis). From *adēphō*, a gland, and *phōma*, a swelling. Ger., *Drüsengeschwulst*. A glandular swelling. [G.] —A. *inguinale*. See BUBO.

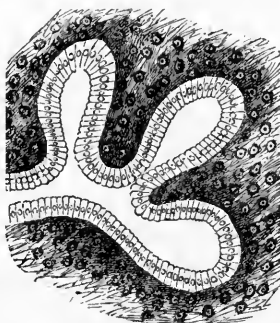

**ADENOPODOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>p'o-du<sup>2</sup>s. Lat., *adenopodus* (from *adēphō*, a gland, and *πους*, a foot). Fr., *adénopode*. Ger., *drüsenfüssig*. Sp., *adenópodo*. In botany, having glands on the petioles. [A. 306, 316.]

**ADENOS**, n. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>s. Fr., *adénos*, *coton de marine*. Ger., *Seebaumwolle*. Syn.: *marine cotton*. A fine quality of cotton-wool from the Levant; so called from Adena. [A. 305, 315, 316.]

**ADENŌS** (Ger.), adj. A<sup>2</sup>-de<sup>2</sup>n-u<sup>2</sup>s'. Glandular. [A. 305.]

**ADENO-SARCOMA** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-sa<sup>2</sup>r-ko<sup>2</sup>ma<sup>2</sup>s. Gen., *adeno-sarcomatos* (-tis). For deriv., see ADEN and SARCOMA. Fr., *adéno-sarcome*. Ger., *Adenosarcom*, *Drüsen-sarkom*. An adenoma with its stroma infiltrated with sarcomatous elements, or a sarcoma developed in a gland. [A. 365, R. J. Godlee (A. 364).] —Cystic a.-s. Fr., *adéno-sarcome kystique*. Syn.: *cysto-sarcoma phyllodes* (seu *proliferum*) [Müller], *phylloid cyst* [Müller], *proliferous cyst* [Sir J. Paget]. An a.-s. that has undergone cystic degeneration.

**ADENO-SCIRRUS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-si<sup>2</sup>r(ru<sup>2</sup>)/ru<sup>2</sup>s(ru<sup>2</sup>s). For deriv., see ADEN and SCIRRUS. Fr., *adéno-squirrhe*. Scirrhus of a gland, or an adenoma with its stroma infiltrated with carcinoma. [A. 322, R. J. Godlee (A. 364).]

ADENO-SARCOMA OF THE MAMMA.  
(AFTER BILLROTH.)

**ADENOSCLEROSIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-skle<sup>2</sup>-ro<sup>2</sup>si<sup>2</sup>s. Gen., *adenosclerosos*. For deriv., see ADEN and SCLEROSIS. Fr., *adénosclérose*. Ger., *Adenosklerose*, *Drüsenverhärtung*. It., *adenosclerosi*. Syn.: *scleradenitis*. Swediaur's term for an indolent induration and tumefaction of a gland not of a scirrhus nature. [A. 320, 322.] Cf. *Indolent BUBO*.

**ADENOSE**, adj. A<sup>2</sup>d'e<sup>2</sup>n-o<sup>2</sup>s. From *adēphō*, a gland. Lat., *adenosus*. Ger., *adenös*, *drüsig*. 1. Resembling a gland. [A. 302.] 2. Abounding in glands. [A. 316.]

**ADENOSIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>si<sup>2</sup>s. Gen., *adenos/eos*. For deriv., see ADEN and -osis\*. Fr., *adénose*. Ger., *Drüsenbildung* (1st def.), *Drüsenkrankheit*. It., *adenosi*. Sp., *adenosis*. 1. Adenogenesis (q. v.). [A. 322.] 2. Any glandular disease, especially (as in Alibert's classification) if chronic. [A. 320.] 3. Scrofula. [A. 305.] 4. Hodgkin's disease. See PSEUDO-LEUCOCYTHEMIA. —A. *scrofulosa*. Scrofula. [A. 313.]

**ADENOSKLEROSIS** (Lat.), n. f. See ADENOSCLEROSIS.

**ADENOSTEMONOUS**, adj. A<sup>2</sup>d'<sup>2</sup>e<sup>2</sup>n-o-ste<sup>2</sup>m'o<sup>2</sup>n-u<sup>2</sup>s. From *adēphō*, a gland, and *στέμονον*, an upright stick. Fr., *adénostémone*. Ger., *drüsenstauhfadig*. In botany, having glands on the filaments of the stamens. [A. 316, 348.]

**ADENOSTYLEÆ** (Lat.), n. f. pl. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-sti(stu<sup>2</sup>)/le<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). From *adēphō*, a gland, and *στυλος*, a column. Fr., *adénostyles*. Sp., *adenostileas*. In botany, a name given by Cassini to a subdivision of the natural order *Compositæ*, comprising those genera in which the branches of the style are beset with glandular hairs. [A. 345; B. 7.]

**ADENOSTYLES**, **ADENOSTYLIS** (Lat.), n's f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>sti<sup>2</sup>(tu<sup>2</sup>)/le<sup>2</sup>-e(a<sup>3</sup>-e<sup>2</sup>). For deriv., see ADENOSTYLEÆ. Fr., *adénostyle*, *adénostylis*. Ger., *Drüsengriffel*. Sp., *adenostilis*. 1. A genus of plants of the natural order *Compositæ*, formerly a part of Tournefort's genus *Cacalia*. [A. 303, 321; B. 19.] 2. A genus of orchids, founded on a single species indigenous to Java. [A. 306.] —A. *albifrons* [Reichenbach]. A species found in the south of Europe. —A. *alpina*. Syn.: *Cacalia alpina* [Jacquin] (seu *glabra* [Villars]). An Alpine species. An infusion of the leaves was formerly used as a remedy for coughs. [A. 303.] —A. *glabra*. A species found in the south of Europe (perhaps identical with *A. alpina*), the leaves of which have been used for the same purpose. [B. 19.]

**ADENOSTYLOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o-stil'u<sup>2</sup>s. Fr., *adénostylé*. In botany, resembling the genus *Adenostyles*. [A. 348.]

**ADENOSUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o<sup>2</sup>su<sup>2</sup>s(su<sup>2</sup>s). From *adēphō*, a gland. Glandular. [E.]

**ADENO-SYNCHITONITIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-si<sup>2</sup>n-(su<sup>2</sup>n)-ki<sup>2</sup>t(ch<sup>2</sup>i<sup>2</sup>ti)-o<sup>2</sup>n-i(e)/ti<sup>2</sup>s. Gen., *adeno-synchitonitis*. From *adēphō*, a gland, *σύν*, with, and *χρῶν*, a skin, membrane, or tunic (see also -itis\*). Fr., *adénosynchitonite*. Ger., *Adenosynchitonitis*. According to von Graefe and Sonnemayer, inflammation of the Meibomian glands. According to the older writers, ophthalmia neonatorum. [F.]

**ADENOTOMICAL**, adj. A<sup>2</sup>d-e<sup>2</sup>n-o-to<sup>2</sup>m'i<sup>2</sup>z-a<sup>2</sup>l. Fr., *adénotomique*. Sp., *adenotómico*. Pertaining to adenotomy (q. v. for deriv.). [A. 306.]

**ADENOTOMY**, n. A<sup>2</sup>d-e<sup>2</sup>n-o<sup>2</sup>ti'o-mi<sup>2</sup>. Lat., *adenotomia* (from *adēphō*, a gland, and *τέμνειν*, to cut). Fr., *adénotomie*. Ger., *Adenotomie*, *Drüsenzergliederung*. It., *adenotomia*. Sp., *adenotomia*. The dissection of glands. [A. 305.]

**ADENO-TYPHUS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>n-o-ti(tu<sup>2</sup>)/fu<sup>2</sup>s-(fu<sup>2</sup>s). For deriv., see ADEN and TYPHUS. It., *adeno-tifo*. See *Typhoid FEVER*.

**ADENOUS**, adj. A<sup>2</sup>d'e<sup>2</sup>n-u<sup>2</sup>s. See ADENOSE.

**ADEN ULCER**, n. See under *ULCER*.

**ADEPHAGIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>ph-a(a<sup>3</sup>)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. Gr., *ἀδεφᾶγία* (from *adēphō*, to satiety, and *φαγείν*, to eat). Fr., *adéphagie*. Ger., *Adéphagie*, *Gefräßigkeit*, *unersättliches Essen*. It., *adefagia*. Sp., *adefagia*. Syn.: *intemperantia edendi*. An insatiable craving for food; regarded by Hofmann as one of the chief causes of intestinal worms in children. [A. 320, Jourdan (A. 330).]

**ADEPHAGOUS**, adj. A<sup>2</sup>d-e<sup>2</sup>ph-a<sup>2</sup>g-u<sup>2</sup>s. Fr., *adéphage*, *adéphagique*. Sp., *adefago*. Having a voracious appetite; in zoology, voracious, carnivorous. [A. 334, 337.]

**ADEPS** (Lat.), n. m. and f. A<sup>2</sup>d(a<sup>3</sup>d')/e<sup>2</sup>ps. Gen., *ad'ipis*. Gr., *λίπος*, *πικρῆ*. Fr., *graisse*. Ger., *Fett*, *Schmeer*. It., *adipe*. Sp., *grasa*. 1. Animal fat, grease. 2. Fatness. 3. In alchemy, that portion of a liquid which is the last to distill over. 4. Lard [U. S. Ph.]. [A. 318; B. 50.] Cf. *AXUNGIA*, *SEBUM*, and *SERUM*. —A. *anserinus*, A. *anseris*. Fr., *graisse d'oie*. Ger., *Gänsefett*. Goose grease; formerly used in pharmacy, and still employed as a domestic remedy, both internally and externally. —A. *benzoatus* [Br. Ph.]. A. *benzoïnatus* [U. S. Ph.]. Fr., *graisse (ou axonge)* [Fr. Cod.]. *benzoïnée*. Ger., *benzoïnirtes Schmalz*. It., *adipe benzoato*. Syn.: *axungia balsamica* (seu *benzoato*), *unquantum benzoini* [U. S. Ph., 1870]. Benzoïnated, or benzoïnated, lard; made by suspending 1 part of powdered benzoïn, loosely wrapped in muslin, in 50 parts of melted lard, and heating on a water-bath, at a temperature not exceeding 60° C. for two hours, when the benzoïn is removed and the lard strained. [U. S. Ph.] The Br. Ph. directs mixing 1 part of benzoïn with 48 parts of lard, melting, and removing the residual benzoïn by straining. The Fr. Cod. orders 5 parts of tincture of benzoïn (representing less than 1 part of benzoïn) to be added to 1,000 parts of melted lard. [B.] —A. *caninus*. Fr., *graisse de chien*. Ger., *Hundefett*. Dog's fat; formerly used in pharmacy. [Vogl (A. 319).] —A. *cantharidibus medicatus*. Fr., *pommade épispastique verte*. See *Pomatum viride cum CANTHARIDE*. —A. *colli equini*. Ger., *Kamuffett*. Fat prepared from the upper part of the neck of the horse (under the mane); used in vete-

inary practice. [A, 303, Vogl (A, 319).]—**A. cortice daphnes gndii medicatus.** Fr. *pomade épistastique au garou.* See *Pomatum epistasticum cum extracto gndii.*—**A. curatus** [Finn. Ph.]. A mixture of 1 part of Peruvian balsam with 48 parts of lard. [B, 35.]—**A. ex fele.** Cat's grease; used by Celsus as an emollient. [B, 45.]—**A. humanus.** Human fat. [A, 316.]—**A. hydrargyri muriate oxygenato medicatus.** See *Pomade de Cirillo.*—**A. hydrargyri nitrate medicatus.** See *Unguentum hydrargyri nitratis.*—**A. hydrargyri oxido rubro et plumbi acetate medicatus.** Fr. *pomade de Régent.* See *Pomatum de Régent.*—**A. hydrargyri medicatus.** See *Unguentum hydrargyri.*—**A. lauro medicatus.** Fr. *pomade (ou onguent) de laurier.* See *Pomatum laurinum.*—**A. medullae bovis.** Fr. *moëlle de bœuf.* Ger. *Rindsmarkfett.* Beef marrow; formerly used in pharmacy. [Vogl (A, 319).]—**A. mineralis.** See *PETROLATUM.*—**A. muris alpin.** Fr. *graisse de marmotte.* Ger. *Murmeltierfett.* Marmot's grease; formerly used in pharmacy. [Vogl (A, 319).]—**A. myristice.** See *Oleum MYRISTICÆ expressum.*—**A. nitrate hydrargyri (seu mercurii) medicatus.** See *Unguentum hydrargyri nitratis.*—**A. nucistæ.** See *Oleum MYRISTICÆ expressum.*—**A. odoriferus.** Aromatic lard; equal parts of lard and magnolia pomade. [A, 316.]—**A. ovillus.** **A. ovis.** Fr. *suif.* Ger. *Hammelfett.* *Hammeltalg.* It. *sevo.* Sp. *sebo.* Mutton tallow. Cf. *SEBUM.*—**A. oxido zinci medicatus.** See *Unguentum zinci oxidi.*—**A. adeps oxygenatus.** Fr. *graisse oxigénée.* Syn.: *unguentum acidi nitrici (seu nitrosi).* Oxygenated lard; made by melting 8 parts of lard in a porcelain capsule over a slow fire, stirring continually with a glass rod, adding 1 part of nitric acid (35°), removing the mixture from the fire when bubbles begin to form, and pouring it into paper molds to solidify. [Bav. Ph. (1822), Sp. Ph. (1798), Fr. Cod. (1837), Finn. Ph. (1819), Gr. Ph. (1837), Han. Ph. (1833), Hess. Ph. (1827), Port. Ph. (1836), Pol. Ph. (1817), Sax. Ph. (1837), Swed. Ph. (1817), Turin Ph. (1833). The U. S. Ph. (1830), Dutch Ph. (1805), Belg. Ph. (1823), Ed. Ph. (1813), and Hamb. Ph. (1835) direct 16 parts of lard and 1 part of acid; the Dub. Ph. (1826) 4 of lard, 4 of olive-oil, and 1 of acid; the Antw. Ph. (1812) 12 of lard and 1 of acid; and the Padua Ph. (1832) 12 of lard and 1 of acid.] Formerly in great repute for tinea, scabies, eczema, and venereal diseases. [A, 302.]—**A. papavere, hyoscyamo et belladonna medicatus.** See *Pomatum populeum.*—**A. pedum tauri.** Ger. *Rindsklauefett.* See *Neat's-foot oil.*—**A. petrolei.** See *PETROLATUM.*—**A. porci, A. porcina.** See *A. suillus.*—**A. preparatus** [Br. Ph.]. Prepared lard. [B.]—**A. stibitatus.** Fr. *graisse (ou pomade) stibiée.* See *Unguentum ANTIMONII tartratis.*—**A. suillus** [Ger. Ph.]. Fr. *graisse de porc.* Ger. *Schweinefett.* *Schweine-schmalz.* It. *adipe porcino.* Sp. *mantea.* Syn.: *A. porcina, axungia porci (seu porcina).* Hog's grease, lard; prepared from the adipose tissue of the omentum, and that surrounding the kidneys, of the hog (*Sus scrofa*) by heating the tissue sufficiently to liquefy the fat and set it free, after which it is strained. It is a soft, white substance, melting between 38° and 42° C. into a clear liquid free from any rancid odor. It consists of about 62 per cent. of liquid fat (olein) and 38 per cent. of solid fat (glycerides of stearic and palmitic acids). [Vogl (A, 319).]—**A. suillus benzoatus** [Russ. Ph.]. See *A. benzoatus.*—**A. suillus curatus (seu depuratus, seu preparatus).** See *A. preparatus.*—**A. sulfure et ammonie muriate medicatus, A. sulfure et carbonate potassæ medicatus.** See *Unguentum SULPHURIS alkalinum.*—**A. tartaro stibii medicatus.** See *Unguentum ANTIMONII tartratis.*—**A. taxi.** Ger. *Dachsfett.* Badger's grease, the fat of the *Meles taxus*; formerly used in pharmacy. [Vogl (A, 319).]—**Ceratum adipis** [U. S. Ph., 1860]. Simple cerate. See *CERATUM.*—**Oleum adipis** [U. S. Ph.]. Fr. *huile de graisse.* Ger. *Schmalzöl.* *Specköl.* Lard oil; a fixed oil (olein) expressed from lard. Used in the preparation of unguentum hydrargyri nitratis. [A, 247, 304, 327.]—**Unguentum adipis** [U. S. Ph., 1860]. Simple ointment. See *UNGUENTUM.*

**ADEPT**, n. **A<sup>2</sup>d-e-pt'**. Lat., *adepus* (from *adipisci*, to attain to). Fr., *adepte*. It., *Sp. adepto*. In alchemy, a master (one who professed to have succeeded in the objects of the art). The name was afterward assumed by Paracelsus and others. [A, 300, 303, 304, 305.]

**ADEPTAM**, n. An old term for alchemy. [A, 305.]

**ADEPTUS** (Lat.), adj. **A<sup>2</sup>d(a<sup>2</sup>d)-e-pt'** u's(u's). See *ADEPT*, *Adepta medicina*, and *Adepta philosophia*.

**ADEQUACY**, n. **A<sup>2</sup>d'e-kwa-si<sup>2</sup>.** From *adæquare*, to be equal. The possession of sufficient functional activity to meet the requirements of the organism (said of the organs of the body).

**ADER**, n. An alchemical term for "lac recens sine butyro." [B, 50.] (? Buttermilk.)

**ADER** (Ger.), n. **A<sup>3</sup>d-e-r.** 1. In general, any vessel serving to convey a juice in an animal organism, including the blood-vessels and the lymphatics; in particular, a vein. [A, 301, 303, 304.] 2. In botany, a vein of a leaf. [B.]—**A<sup>2</sup>ähnlich.** Resembling a blood-vessel. [A, 355.]—**A<sup>2</sup>b-schreibung.** See *ANGIOGRAPHY.*—**A<sup>2</sup>binde.** The fillet or bandage used to obstruct the current of blood in the superficial veins of a limb, to facilitate the operation of venesection. [A, 305.]—**A<sup>2</sup>bruch.** See the major list.—**A<sup>2</sup>chen.** A venule. [A, 315.]—**A<sup>2</sup>druck.** Venous pressure. [B.]—**A<sup>2</sup>ent-zündung.** See *PHLEBITIS.*—**A<sup>2</sup>alten.** The valves of the veins. [A, 355.]—**A<sup>2</sup>istel.** A term applied to a lesion that sometimes forms after venesection in the horse; a hard, painful swelling, with the opening into the vein persisting and discharging a thin, watery, reddish fluid. [A, 305.]—**A<sup>2</sup>flügel.** See *HYMENOPTERA.*—**A<sup>2</sup>gang.** See *Ductus venosus.*—**A<sup>2</sup>gebäude.** The vascular system. [A, 315.]—**A<sup>2</sup>geflecht.** See the major list.—**A<sup>2</sup>geschwulst.** 1. An aneurysm. 2. A varix. 3. A thrombus. [A, 305.]—**A<sup>2</sup>gewebe.** A vascular plexus, especially the chorioid plexus. [A, 315, 320.] See also *RETE vasculosum.*—**A<sup>2</sup>haut, A<sup>2</sup>häutchen, A<sup>2</sup>höhle.** See the major list.—**A<sup>2</sup>icht.** Resembling veins. [A, 315.]—**A<sup>2</sup>ig.** 1. Venous. [J.] 2. Veined. [A, 315.]—**A<sup>2</sup>igrippig.** See *NERVATO-*

**VENOSUS.**—**A<sup>2</sup>knuten, A<sup>2</sup>krampf.** A varix. [A, 305, 315, 320.]—**A<sup>2</sup>krebs.** A cancer excessively rich in blood-vessels. [A, 305.]—**A<sup>2</sup>kropf.** 1. A varix. 2. A thrombus. [A, 305.]—**A<sup>2</sup>kropf des Thranensacks.** See *DACRYOCYSTALGIA varicosa.*—**A<sup>2</sup>lass.** Blood-letting.—**A<sup>2</sup>lassanhänger.** An advocate of bloodletting. [A, 315.]—**A<sup>2</sup>lassbäuschchen.** The compress applied after bloodletting. [A, 305.]—**A<sup>2</sup>lassbecken.** A basin used to receive the blood in venesection. [A, 305.]—**A<sup>2</sup>lassbinde.** See *A<sup>2</sup>binde.*—**A<sup>2</sup>lassblut.** Blood obtained by venesection. [K, 13.]—**A<sup>2</sup>lassessen.** A phlebotomy lancet. [A, 305.]—**A<sup>2</sup>lassen.** See the major list.—**A<sup>2</sup>lasser.** A bloodletter; an advocate of bloodletting. [A, 305.]—**A<sup>2</sup>lassfreund.** An advocate of bloodletting. [A, 315.]—**A<sup>2</sup>lassgeräth.** See *A<sup>2</sup>lasszeug.*—**A<sup>2</sup>lasskunst.** The art of letting blood. [A, 305.]—**A<sup>2</sup>lasslancette.** A phlebotomy lancet. [A, 305.]—**A<sup>2</sup>lasslehre.** The doctrine or the art of bloodletting.—**A<sup>2</sup>lassschneider.** A spring-lancet used in bloodletting. [A, 305.]—**A<sup>2</sup>lassverband.** See *A<sup>2</sup>binde.*—**A<sup>2</sup>lassvertheidiger.** See *A<sup>2</sup>lassfreund.*—**A<sup>2</sup>lasswerkzeug.** See *A<sup>2</sup>lasszeug.*—**A<sup>2</sup>lasswuth.** An excessive fondness for bloodletting. [A, 355.]—**A<sup>2</sup>lasszeit.** The time of year for being bled. [A, 315.]—**A<sup>2</sup>lasszeug.** A set of bloodletting instruments. [A, 305.]—**A<sup>2</sup>los.** In botany, not veined or nerved. [A, 315.]—**A<sup>2</sup>messer.** See *PULSIMETER.*—**A<sup>2</sup>netz.** See the major list.—**A<sup>2</sup>öffnung.** Bloodletting. [A, 305.]—**A<sup>2</sup>pilz.** See *MERULIUS lacrimans.*—**A<sup>2</sup>presse.** A tourniquet. [A, 305.]—**A<sup>2</sup>reich.** Rich in veins. [A, 315.]—**A<sup>2</sup>rippig.** In botany, nerved. [A, 315.]—**A<sup>2</sup>rriss.** Rupture of a vein. [A, 355.]—**A<sup>2</sup>schlag.** A pulsation, the pulse. [A, 315.]—**A<sup>2</sup>schlagmesser.** See *PULSIMETER.*—**A<sup>2</sup>schwamm.** See the major list.—**A<sup>2</sup>staar.** See *CATARACTA chorioidalis.*—**A<sup>2</sup>strang.** A vascular plexus. [A, 315.]—**A<sup>2</sup>verrenkung.** In vet. med., a straining of the tendons of the foot. [A, 305.]—**A<sup>2</sup>vorfall.** See *CHORIOIDAL STAPHYLOMA.*—**A<sup>2</sup>wasser.** Blood-serum. [A, 315.]—**Bluta<sup>2</sup>.** A blood-vessel. [A, 304.]—**Goldene A<sup>2</sup>n.** The hamorrhoidal veins; hamorrhoids. [A, 315, 320.]—**Güldene A.** A hamorrhoid. [A, 303.]—**Halsa<sup>2</sup>.** The jugular vein. [A, 315.]—**Pulsa<sup>2</sup>.** An artery. [A, 304.]—**Scheinbare A.** The saphenous vein. [A, 355.]

**ADERBRUCH** (Ger.), n. **A<sup>3</sup>d-e-r-bruch<sup>2</sup>.** 1. Rupture of a vein. 2. A varix. 3. A mixed aneurysm. 4. Varicocele. [A, 305, 320.]—**Wässeriger A.** Varicocele with cedema of the scrotum. [A, 355.]

**ADERGEFLECHT** (Ger.), n. **A<sup>3</sup>d-e-r-ge<sup>2</sup>-fle<sup>2</sup>-ch<sup>2</sup>t<sup>2</sup>.** 1. A venous plexus, especially the chorioid plexus. [A, 305; I, 17.] 2. A lateral anastomosis. [A, 305.]—**A. der mittleren Hirnhöhle.** The chorioid plexus of the third ventricle. [I, 17.]—**A. der Seitenhöhlen.** The chorioid plexuses of the lateral ventricles. [I, 17.]—**A<sup>2</sup>schlagadern.** The chorioid arteries. [A, 320.]—**A<sup>2</sup>sfalte.** A fold of the chorioid plexus in the descending cornu of the lateral ventricle. [I, 17.]—**A<sup>2</sup>sfurche.** See *FISSURA chorioides* (2d def.).—**A<sup>2</sup>venen.** The chorioid veins. [A, 320.]

**ADERHAUT** (Ger.), n. **A<sup>3</sup>d-e-r-ha<sup>2</sup>-ut.** The chorioid coat of the eye. [A, 305.]—**A<sup>2</sup>ablösung.** See *DETACHMENT of the chorioid.*—**A<sup>2</sup>colobom.** See *COLOBOMA chorioides.*—**A<sup>2</sup>commisur.** The commissure of the chorioid. [B.] See under *Ciliary body.*—**A<sup>2</sup>conus.** See *CONUS* and *STAPHYLOMA posticum* *Searpe.*—**A<sup>2</sup>ent-zündung.** See the major list.—**A<sup>2</sup>muskel.** The ciliary muscle. [B.]—**A<sup>2</sup>schwinden.** Atrophy of the chorioid. [A, 317.]—**A<sup>2</sup>spalt.** See *COLOBOMA chorioides.*—**A<sup>2</sup>spanner.** The ciliary muscle.—**A<sup>2</sup>staar.** See *CATARACTA chorioidalis* (2d def.).—**A<sup>2</sup>staphylom.** See *CHORIOIDAL STAPHYLOMA.*—**A<sup>2</sup>tuberkeln.** See *CHORIOIDITIS tuberculosa.*—**A<sup>2</sup>verknöcherung.** Ossification of the chorioid. [B.]

**ADERHÄUTCHEN** (Ger.), n. **A<sup>3</sup>d-e-r-hoit-ch<sup>2</sup>e<sup>2</sup>n.** 1. The chorioid coat of the eye. 2. The chorion. [A, 355.]—**A. der Nachgeburt.** The chorion. [A, 320.]—**Glattes A.** See *CHORION leve.*

**ADERHAUTENTZÜNDUNG** (Ger.), n. **A<sup>3</sup>d-e-r-ha<sup>2</sup>-ut-e<sup>2</sup>nt-tsu<sup>2</sup>nd-ung.** Inflammation of the chorioid. [B.]—**A. der Greisen.** See *CHORIOIDITIS senilis.*—**Areoläre A.** See *CHORIOIDITIS areolaris.*—**Arthritische A.** See *CHORIOIDITIS arthritica.*—**Ausschwitzende A.** See *CHORIOIDITIS exsudativa.*—**Centrale A.** See *CHORIOIDITIS centralis.*—**Eiternde A., Eitrige A.** See *CHORIOIDITIS suppurativa.*—**Embolische A.** See *CHORIOIDITIS embolica.*—**Metastatische A.** See *CHORIOIDITIS metastatica.*—**Parenchymatöse A.** See *CHORIOIDITIS parenchymatosa.*—**Plastische A.** See *CHORIOIDITIS plastica.*—**Pyämische A.** See *CHORIOIDITIS pyemica.*—**Rheumatische A.** See *CHORIOIDITIS rheumatica.*—**Ringförmige A.** See *CHORIOIDITIS areolaris.*—**Scrofulöse A.** See *CHORIOIDITIS scrofulosa.*—**Seröse A.** See *CHORIOIDITIS serosa.*—**Syphilitische A.** Syphilitic or specific disseminated chorioiditis. [B.]—**Tuberculöse A.** See *CHORIOIDITIS tuberculosa.*

**ADERHÖHLE** (Ger.), n. **A<sup>3</sup>d-e-r-hu<sup>2</sup>el-e<sup>2</sup>.** A venous sinus. [A, 355.]—**A. am Hinterhaupte.** The occipital sinus. [A, 355.]—**A<sup>2</sup>n an der Augenhöhle.** The cavernous sinuses. [A, 355.]—**A<sup>2</sup>n des Gehirns.** The sinuses of the dura mater. [A, 355.]—**A<sup>2</sup>n des Steinbeins.** The petrosal sinuses. [A, 355.]—**Cavernöse A<sup>2</sup>n.** The cavernous sinuses. [A, 355.]

**ADERLASSEN** (Ger.), n. **A<sup>3</sup>d-e-r-la<sup>2</sup>s-se<sup>2</sup>n.** Bloodletting. [A, 305.]—**Derivationsa<sup>2</sup>.** Derivative bloodletting.

**ADERMENNIG** (Ger.), n. **A<sup>3</sup>d-e-r-me<sup>2</sup>n-ni<sup>2</sup>g.** See *AGRIMONIA eupatoria.*

**ADERMIA** (Lat.), n. f. **A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>rm(e<sup>2</sup>rm)/i<sup>2</sup>-a<sup>2</sup>.** From *a* priv., and *derma*, skin. Fr., *adermie*. Ger., *Adermie, Hautmangel*. Congenital absence of the skin of a part; usually associated with defective development of the deeper structures, as in spina bifida. [G.]

**ADERMIN** (Ger.), n. **A<sup>3</sup>d-e-r-men.** See *AGRIMONIA eupatoria.*

**ADERMONERVIA** (Lat.), n. f. **A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>rm(e<sup>2</sup>rm)-o-nu<sup>2</sup>r-(ne<sup>2</sup>r)/vi<sup>2</sup>(w<sup>2</sup>)-a<sup>2</sup>.** From *a* priv., *derma*, the skin, and *nervia*, nerves. See *DERMATANEURIA.*

**ADERMOTROPHIA** (Lat.), n. f. **A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>rm(e<sup>2</sup>rm)-o-tro<sup>2</sup>-fi<sup>2</sup>-a<sup>2</sup>.** From *a* priv., *derma*, the skin, and *τροφῆ*, nourishment. Fr., *adermotrophie*. Thinning or atrophy of the skin. [A, 300.]

**ADERNETZ** (Ger.), n.  $A^3de^2r-ne^2ts$ . A network of blood-vessels, particularly the chorioid plexus. [A, 305.]—**A-e der Seitenhöhlen**. The chorioid plexuses of the lateral ventricles. [I, 30.]—**A-arterien, A-pulsadern**. The chorioid arteries. [A, 305, 317.]—**Chorioidisches A**. The chorioid plexus. [A, 355.]

**ADERSCHWAMM** (Ger.), n.  $A^3de^2r-shwa^2m$ . A common name for the *Cantharellus cibarius* and the *Merulius lacrimans*. [A, 305.]—**Thränender A.**, **zerstörender A.** See **MERULIUS lacrimans**.

**ADESMACEOUS**, adj.  $A^2d-e^2z-ma^2she-u^2s$ . From a priv., and  $\delta\epsilon\sigma\mu\acute{o}s$ , a band. Fr., *adsmacé*. Sp., *adesmíceo*. Having no ligament uniting the valves of the shell (said of certain molluscs). [A, 306.]

**ADESMIA** (Lat.), n. f.  $A^2d(a^3d)-e^2z(e^2s)/mi^2a^3$ . From a priv., and  $\delta\epsilon\sigma\mu\acute{o}s$ , a band. 1. In botany, defective union. [Morren (A, 316).] 2. A genus of South American leguminous plants established by De Candolle. [A, 248; B, 19.]—**A. balsamifera**. A Chilian species, furnishing a balsam used as a vulnerary. [B, 19.]

**ADESMOSIS** (Lat.), n. f.  $A^2d(a^3d)-e^2z(e^2s)-mo^2si^2s$ . Gen., *adsmoscos*. From a priv.,  $\delta\epsilon\sigma\mu\acute{o}s$  a band and so connective tissue. See also *-osis*.\* Ger., *Adesmose*. Atrophy or defective development of the connective tissue, more particularly of the skin. [G.] Cf. **HYPERDESMOSIS** and **PARADESMOSIS**.

**ADESMY**, n.  $A^2d-e^2z/mi^2$ . See **ADESMIA** (1st def.).

**ADEFLUXION**, n.  $A^2d-flu^2k'shu^2n$ . See **AFFLUXION**.

**ADGUSTAL**, n.  $A^2d-gu^2st/a^2l$ . Geoffroy's name for the pterygoid bone of Owen in fishes. [L, 27.]

**ADHADOTA** (Lat.), n. f.  $A^2d(a^3d)-ha^3-do^2ta^3$ . See **ADHATODA**.

**ADHERENS** (Lat.), adj. pres. part. of *adherere*.  $A^2d(a^3d)-he^2(ha^3e^2)-re^2nz(re^2ns)$ . Adherent. [B.]

**ADHERENTIA** (Lat.), n. f.  $A^2d(a^3d)-he^2(ha^3e^2)-re^2n'shi^2(ti)^2a^3$ . Adherence. [B.]

**ADHESIO** (Lat.), n. f.  $A^2d(a^3d) he^2(ha^3e^2)-zhi^2(si)^2o$ . Gen., *adhesio'nis*. Adhesion.

**ADHESIVUS** (Lat.), adj.  $A^2d(a^3d)-he^2s(ha^3e^2s)-i(e)^2vu^2s(wu^2s)$ . Adhesive. [B.]

**ADHATODA** (Lat.), n. f.  $A^2d(a^3d)-ha^3-to^2da^3$ . A Latinized form of a Malabar name for a genus of acanthaceous plants established by Nees von Esenbeck, corresponding in part to the Linnaean genus *Justicia*; also the fruit of one of the species, known as the *Malabar nut*, used as an emmenagogue and to expel the dead fœtus (especially brought into notice by Boerhaave). [A, 321; B, 19, 57, 60.]—**A. hyssopi foliis**, **A. indica**. Fr., *noyer des Indes* (ou de *Ceylan*), *carmentine*. The snap-tree, or willow-leaved Malabar nut-tree. [A, 343; B.]—**A. tranquebariensis**. An Indian species; the juice of the leaves, reputed cooling and aperient, is given to children with small-pox; the bruised leaves are applied to contusions. [A, 316.]—**A. vasica**. See *JUSTICIA a.*—**A. Zeylonensis**. The common Malabar nut. [B.]

**ADHEHE**, n. See **ADEC**.

**ADHERENCE**, n.  $A^2d-he^2re^2ns$ . Lat., *adherentia*. Fr., *adherence*. Ger., *Ankleben*. It., *aderenza*. Sp., *adherencia*. See **ADHESION**.

**ADHERENT**, adj.  $A^2d-he^2re^2nt$ . Lat., *adhærens*. Fr., *adherent*. Ger., *verwachsen*. It., *aderente*. Sp., *adherente*. In botany, growing fast to a dissimilar organ or part. [B.]—**A. attraction**. See **CAPILLARY ATTRACTION**.

**ADHESION**, n.  $A^2d-he^2zhu^2n$ . Lat., *adhesio*. Fr., *adhésion*. Ger., *Adhäsion*, *Vervachsung*. It., *adesione*. Sp., *adhesion*. Syn.: *agglutination*, *cohesion*. 1. The act of sticking or growing fast to, or the condition resulting therefrom. 2. The molecular force which causes bodies to attach themselves to each other when brought into contact. [B.]—**A. figures**. See under **FIGURE**.—**Primary a.** The process of healing of a wound *per primam intentionem* ("by the first intention"), i. e., by a rapid union of its lips, without the occurrence of granulation or suppuration.—**Secondary a.** The healing of a wound "by the second intention," i. e., by the union of opposed granulating surfaces.

**ADHESIVE**, adj.  $A^2d-he^2si^2v$ . Lat., *adhesivus*. Fr., *adhésif*. Ger., *adhäsiv*, *verwachsend*, *anklebend*. It., *adesivo*. Sp., *adhesivo*. 1. Having the property of adhering. 2. Resulting in or accompanied by adhesion. See **A. INFLAMMATION** and **A. PLASTER**.

**ADHESIVENESS**, n.  $A^2d-he^2si^2v-ne^2s$ . Fr., *adhésivité*. 1. The quality of being adhesive (said of inanimate objects). 2. In phrenology, the quality that leads persons to love or cling to other persons. [A, 306.] 3. The faculty of clinging tenaciously to a particular set of ideas, the organ of which is referred to the upper occipital convolutions. [Broussais (A, 301).]

**ADHIB**, n.  $A^2d/hi^2b$ . The plant eye-bright. [A, 258.] See **EUPHRASIA officinalis**.

**ADHIBENDUM** (Lat.), n. n.  $A^2d(a^3d)-hi^2b-e^2nd'u^2m(u^4m)$ . From *adhibere*, to employ. Ger., *anzuwendendes Mittel*. A remedy recommended or ordered to be used. [A, 304.]

**ADHIBITION**, n.  $A^2d-hi^2b-i^2sh'u^2n$ . Lat., *adhibitio*. The employment or administration of a drug. [A, 312.]

**ADHO** (Ar.), n. An alchemical term for milk. [B, 50.]

**ADHOTODA**, n. See **ADHATODA**.

**ADI**, n. A West Indian palm-tree, the source of *abanga* (q. v.). [A, 337.]

**ADIÆTHETICUS** (Lat.), adj.  $A^2d(a^3d)-i(e)-e^2t(a^3e^2t)-e^2t/i^2k-u^2s(u^4s)$ . From a priv., and  $\delta\iota\alpha\tau\rho\eta\tau\acute{\iota}\kappa\acute{o}s$ , dietetic. Ger., *adiæthetisch*. 1. Unsuitable for food. 2. Living in disregard of dietetic requirements. [A, 322.]

**ADIAGNOSTISCH** (Ger.), adj.  $A^3-de-a^3g-no^2s/ti^2sh$ . Difficult or impossible of diagnosis. [A, 305.]

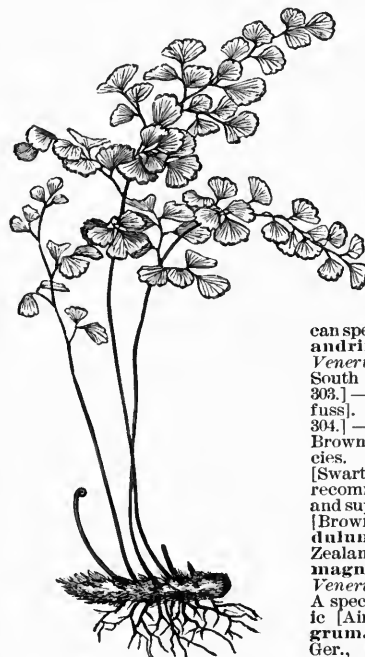

**ADIANTACEÆ** (Lat.), n. f. pl.  $A^2d(a^3d)-i^2-a^2nt(a^3nt)-a(a^3)/se^2(ke^2)-e(a^3-e^2)$ . Fr., *adiantacées*. A tribe of ferns the typical genus of which is the *Adiantum*. [A, 321.]

**ADIANTACEOUS**, adj.  $A^2d-i^2-a^2nt-a^3shu^2s$ . Lat., *adiantaceus*. Fr., *adiantacé*. Sp., *adiantáceo*. Belonging to the *Adiantaceæ* (q. v.).

**ADIANTEÆ** (Lat.), n. f. pl.  $A^2d(a^3d)-i^2-a^2nt(a^3nt)/e^2-e(a^3-e^2)$ . See **ADIANTACEÆ**.

**ADIANTHUM, ADIANTHUS** (Lat.), n's n. and m.  $A^2d(a^3d)-i^2-a^2n(a^3n)/thu^2m(thu^4m)$ ,  $-thu^2s(thu^4s)$ . See **ADIANTUM**.

**ADIANTUM** (Lat.), n. n.  $A^2d(a^3d)-i^2-a^2nt(a^3nt)/u^2m(u^4m)$ . Gr.,  $\delta\delta\iota\alpha\nu\tau\acute{o}s$ ,  $\delta\delta\iota\alpha\nu\tau\acute{o}\nu$ , (from a priv., and  $\delta\iota\alpha\iota\nu\epsilon\iota\omega$ , to moisten, because it sheds water). Fr., *adiante*, *capillaire*. Ger., *Saunfarn*, *Krullfarn*, *Haarfarn*. It., *adianto*. Sp., *adianto*, *capilera*, *culantrillo*. A genus of ferns, established by Linnæus, distinguished by special coverings (*indusia*) for the fruit-dots (*sori*), formed by a reflection of distinct portions of the edge of the frond. The ultimate segments of the frond are dimidiate, the midvein being on the lower margin. [B, 34.]—**A. æthiopicum**. Fr., *capillaire d'Éthiopie*. A species indigenous to the Cape of Good Hope, used there as a pectoral. [Thunberg (A, 344).]—**A. album**. Fr., *capillaire blanc*. See **ASPLENIUM ruta muraria**.—**A. aureum**. See **ASPLENIUM trichomanes**.—**A. bechica**. See **POTIO bechica** and **SYRUPUS bechicus**.—**A. canadense**. See *A. pedatum*.—**A. capillus Veneris** [Linnaeus]. Fr., *capillaire de Montpellier* [Fr. Cod.], *capillaire*, *adiante capillaire*, *cheveu de Vénus*. Ger., *Frauenhaar*, *Venushaar*. It., *adianto capelvenere*. Sp., *capilera de Montpellier*. Maiden-hair; a European species distinguished by its capillary stipe and branches; reputed to be expectorant. [A, 255; B, 34.] See also **CAPILLUS VENERIS**, **SYRUPUS CAPILLORUM VENERIS**, and **CAPILLAIRE**.—**A. coninnum** [Willdenow]. A South American species. [A, 304.]—**A. coriandrifolium**. See *A. capillus Veneris*.—**A. cuneatum**. A South American species. [A, 303.]—**A. curvatum** [Kaulfuss]. A Brazilian species. [A, 304.]—**A. formosum** [R. Brown]. A New Zealand species. [A, 304.]—**A. fragile** [Swartz]. A Jamaica species; recommended for ulcerating and suppurative lung affections. [Browne (A, 344).]—**A. hispidulum** [R. Brown]. A New Zealand species. [A, 304.]—**A. magnum**. See *A. capillus Veneris*.—**A. melanocaulon**. A species used in India as a tonic [Ainslie (A, 344).]—**A. nigrum**. Fr., *capillaire noir*. Ger., *schwarzes Frauenhaar*. See *A. capillus Veneris*.—**A. patens**. See *A. pedatum*.—**A. pedatum** [Willdenow]. Fr., *capillaire du Canada* [Fr. Cod.]

ADIANTUM CAPILLUS VENERIS.  
(AFTER MARCHAND [A, 260].)

(ou en *pedale*). Ger., *canadisches* (oder *fussförmiges*) *Frauenhaar*. It., *adianto del Canada*. Sp., *capilera del Canada*, *culantrillo de pozo*. Syn.: *A. canadense*. Canadian (or American) maiden-hair; distinguished by the frond being pedate; indigenous to North America. It contains mucilage, tannin, and a bitter substance; used as an expectorant, chiefly in France, and often substituted for *A. capillus Veneris*. [A, 255, 304, 319; B, 83.]—**A. rubrum**. Fr., *capillaire rouge*. Ger., *Steinfarn*, *rothe Streifarn*. See **ASPLENIUM trichomanes**.—**A. tenerum**. A South American species; used for the same purposes as *A. capillus Veneris*. [A, 316.]—**A. trapeziforme** [Linnaeus]. Fr., *capillaire du Mexique*. A species indigenous to Mexico, South America, and the West Indies; used in those countries as a pectoral. [A, 304, 341.]—**A. verum nigrum** [Linnaeus]. **A. vulgare**. See *A. capillus Veneris*.—**Herba adianti**, **Herba adianti canadensis**. Old pharmaceutical terms for the leaves of *A. pedatum*. [B, 97.]—**Herba adianti magni**. Syn.: *herba capillorum Veneris*, *folia capilli*. An old pharmaceutical term for the leaves of *A. capillus Veneris*.—**Syrupus adianti canadensis**. Fr., *sirap de capillaire du Canada* [Fr. Cod.]. A syrup made with 100 parts of the leaves of *A. pedatum* infused for six hours, in a closed vessel, with 1,500 parts of boiling distilled water. The infusion is expressed, allowed to cool, and decanted; white sugar is then added, in the proportion of 180 parts to 100 of the infusion, and the liquid is rapidly brought to the boiling point and strained. [Fr. Cod.]

**ADIAPHANIE** (Fr.), n.  $A^3-de-a^3-fa^3-ne$ . Lack of transparency; opacity.—**A. périchrysalique**. See **ACHRYSALEODIAPHANIE**.

**ADIAPHORA** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^2f(a^2f)/o-ra^3$ . See ADIAPHORUM.

**ADIAPHORA** (Lat.), n. n. pl. Adiphorous substances. See ADIAPHOROUS.

**ADIAPHORACY**, n.  $A^2d-i-a^2f/o-ra^2-si^2$ . See ADIAPHORIA.

**ADIAPHORESIS** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^3fo-re(ra)/si^2s$ . Gen., *adiaphore'seos*. From a priv., and *ἀδιαφορέσις*, a sweating. Fr., *adiaphorèse*. Ger., *Adiaphorese*. It., *adiapforese*. Sp., *adiapforese*. Deficiency or suppression of the perspiration. [K.] See ANHIDROSIS.

**ADIAPHORETIC**, adj.  $A^2d-i-a^2f-o-re^2t/i^2k$ . Lat., *adiaphoreticus*. Fr., *adiaphorétique*. See A. SPIRIT.

**ADIAPHORIA** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^3fo-ri^2-a^3$ . Gr., *ἀδιαφορία*, indifference. Fr., *adiaphorie*. Ger., *Adiaphorie*, *Gleichgültigkeit*. It., *adiaphoria*. Sp., *adiaphoria*. 1. In chemistry, the quality of being adiaphorous (q. v.). [A, 305.] 2. Morbid indifference, apathy (said of persons). [A, 322.]

**ADIAPHOROSIS** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^3fo-ro'si^2s$ . Gen., *adiaphoro'seos*. See ADIAPHORESIS.

**ADIAPHOROUS**, adj.  $A^2d-i-a^2f-o-ru^3s$ . Gr., *ἀδιαφορος*, indifferent. Lat., *adiaphoros*, *adiaphorus*. Fr., *adiaphore*. Ger., *adiaphor*, *gleichgültig*. It., *adiaphoro*. Sp., *adiaphoro*. 1. In chemistry, neutral. [A, 315.] 2. Inert (said of drugs). [A, 313.] Cf. INDIFERENT.

**ADIAPHORUM** (Lat.), n. n. of adj. *adiaphorus* (*principium* understood).  $A^2d(a^3d)-i(e)-a^2f(a^2f)/o-ru^3m(ru^4n)$ . See ADIAPHOROUS SPIRIT.

**ADIAPHORY**, n.  $A^2d-i-a^2f/o-ri^2$ . See ADIAPHORIA.

**ADIAPLAST**, n.  $A^2d-i-a^2-pla^2st$ . From *ἀδιάπλαστος* (from a priv., and *ἀπλάσσειν*, to form). It., *adiaplasto*. An abortion (in the sense of an undeveloped foetus). [A, 314.]

**ADIAPNEUSTIA** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^2p(a^3p)-nu^3s/ti^2-a^3$ . Gr., *ἀδιαπνευστία* (from a priv., and *ἀπνεύσσειν*, to perspire). Fr., *adiapneustie*. Ger., *Adiapneustie*. It., Sp., *adiapneustia*. Suppression of the cutaneous transpiration. See ANHIDROSIS.

**ADIAPNEUSTIC**, adj.  $A^2d-i-a^2p-nu^3s/ti^2k$ . Lat., *adiapneusticus*, *adiapneustus*. 1. Pertaining to adiapneustia. [A, 322.] 2. Not perspiring.

**ADIAPTOTOS** (Lat.), n. m.  $A^2d(a^3d)-i(e)-a^2p(a^3p)-to^2to^2s$ . From *ἀδιάπτωτος*, infallible. Fr., *adiaptote*. Sp., *adiaptoto*. An ancient carminative; an electuary of parsley, hysocyan seeds, white pepper, etc. [A, 306, 343.]

**ADIARRHŒA** (Lat.), n. f.  $A^2d(a^3d)-i(e)-a^3r-re(roi)/a^3$ . Gr., *ἀδιάρρῃα*. Fr., *adiarrhée*. Ger., *Adiarrhœe*. It., Sp., *adiarrea*. 1. Constipation. [Hippocrates (A, 311).] 2. The retention or suppression of any excretion. [A, 305, 306, 314.]

**ADIARTHROTOS** (Lat.), adj.  $A^2d(a^3d)-i(e)-a^3r-thro^2to^2s$ . Gr., *ἀδιάρθρωτος*. 1. Not articulated, without joints. [A, 322.] 2. Inarticulate (said of the speech). [A, 311.]

**ADIATHERMIC**, adj.  $A^2d-i-a^3-thu^2rm/i^2k$ . From a priv., *διὰ*, through, and *θερμαίνω*, to heat. Impervious to heat. [A, 302.]

**ADIATHETIC**, adj.  $A^2d-i-a^3-the^2t/i^2k$ . Lat., *adiatheticus* (from a priv., and *διάθεσις* [see DIATHESIS]). Fr., *adiathétique*. Ger., *adiathetisch*. It., *adiathetico*. Not due to a diathesis (said of diseases). [A, 305, 306.]

**ADIB** (Ar.), n. The wolf (the liver, intestines, and excrement of which were formerly used as drugs). [Avicenna (A, 325).]

**ADIBAT**, n. Ar., *zibag*. An alchemical name for mercury. [B, 50, 52.]

**ADICE** (Lat.), n. f.  $A^2d(a^3d)/i^2-se(ka)$ . Gen., *ad'ices*. Gr., *ἀδίκη*. The nettle. [Dioscorides (A, 311).]

**ADIEVEDYUM**, n. The East Indian name of a very bitter root used as a tonic and stomachic. [Ainslie (A, 344).]

**ADIKE** (Lat.), n. f.  $A^2d(a^3d)/i^2-ke(ka)$ . See ADICE.

**ADIMA**, n. A name applied in French Guiana to a species of *Sauvagesia* (q. v.). [A, 344.]

**ADIOWAEN, ADIOWAN**, n's. Ajowan. See AMMI COPTICUM.

**ADIPALIS** (Lat.), adj.  $A^2d(a^3d)-i^2p-a(a^3)/li^2s$ . From *adeps*, fat. Fatty, greasy. [A, 312.]

**ADIPATE**, n.  $A^2d/i^2p-at$ . Fr., *adipate*. Ger., *adipinsäures Salz*. A salt of adipic acid. The general formula of the normal a's is  $(C_6H_9O_4)_xP_x$  or  $(C_6H_9O_4)_xQ_x$ , where P is a univalent and Q a bivalent radicle. The sodium salt, however, is sesquibasic, and several of the other a's are combined with one or more molecules of water of crystallization. [B, 2.]

**ADIPATUS** (Lat.), adj.  $A^2d(a^3d)-i^2p-a(a^3)/tu^3s(tu^4s)$ . From *adeps*, fat. Adipose. [A, 312.]

**ADIPEUX** (Fr.), adj.  $A^3-de-pu^3s$ . Adipose.

**ADIPIC ACID**, n.  $A^2d-i^2p/i^2k$ . Fr., *acide adipique*. Ger., *Adipinsäure*. It., *acido adipico*. Sp., *ácido adipico*. A dibasic crystalline acid,  $C_6H_{10}O_4 = \begin{cases} CH_2CH_2COOH \\ CH_2CH_2COOH \end{cases}$  produced by the action of nitric acid on oleic acid, suet, spermaceti, and other fatty bodies; being the fifth term of the oxalic or succinic series. [B, 2, 4.]

**ADIPIC ETHERS**, n. pl. Fr., *éthers adipiques*. Ger., *Adipinsäure-Estern*. It., *eteri adipici*. Ethyl adipate,  $C_6H_8O_4(C_2H_5)_2$ , is an example of these compounds. [B.]

**ADIPIDE**, n.  $A^2d/i^2p-i^2d$ . Fr., *adipide*. Ger., *Adipid*. Sp., *adipide*. Any fatty proximate principle of animal origin. [A, 303.]

**ADIPINSÄURE** (Ger.), n.  $A^3-de-pen^3zoi-re^2$ . Adipic acid.

**ADIPO-CELLULAR**, adj.  $A^2d/i^2p-o-se^2l/lu^2-a^3r$ . Fr., *adipo-celluleux*. Ger., *fettigzellig*. It., *adipo-celluloso*. Consisting of connective tissue and fat.

**ADIPOCERA** (Lat.), n. f.  $A^2d(a^3d)-i^2p-o-se(ka)/ra^3$ . Adipocere (q. v.).—A. cetosa. Spermaceti. [A, 362.]

**ADIPOCERATION**, n.  $A^2d-i^2p-o-s^2e-r-a^3shu^3n$ . Ger., *Adipocere-Umbildung*. A conversion into adipocere. [A, 315.] In some cases of extra-uterine gestation the dead foetus undergoes this change. [Kleinwächter (A, 319).]

**ADIPOCERE**, n.  $A^2d/i^2p-o-ser$ . Lat., *adipocera* (from *adeps*, fat, and *cera*, wax). Fr., *adipocire*, *gras des cadavres* (ou des cimetières). Ger., *Adipocire*, *Fettwachs*, *Leichenwachs*. It., Sp., *adipocera*. Corpse fat; a peculiar soft, white, cheese-like material consisting chiefly of a mixture of the fatty acids (especially palmitic acid) produced by the decomposition of animal matter under the influence of moisture without the access of air; discovered by Fourcroy in Paris in 1786. It has been regarded as a soap. Buried corpses have often been found converted into a. The name is sometimes applied also to spermaceti and cholesterol. [A, 306, 314; O. Reveil (A, 328); B, 2; D.]

**ADIPOCEROUS**, adj.  $A^2d-i^2p-o-s^2e-ru^3s$ . Fr., *adipocireux*. Ger., *fettwachsig*. Pertaining to adipocere. [A, 324.]

**ADIPOCIRA** (Lat.), n. f.  $A^2d(a^3d)-i^2p-o-si(ke)/ra^3$ . See ADIPOCERA.

**ADIPOCIRE** (Fr.), n.  $A^3-de-po-ser$ . Adipocere.—A. de baine. See ADIPOCERA CETOSA.

**ADIPOCIRIFORM**, adj.  $A^2d/i^2p-o-si^2/ri^2fo^2rm$ . Fr., *adipociriforme*. Resembling adipocere. [A, 306.] See TUMEUR ADIPOCIRIFORME.

**ADIPOMA** (Lat.), n. n.  $A^2d(a^3d)-i^2p-o-ma^3$ . Gen., *adipom'atos (-tis)*. For deriv., see ADIPS and -oma.\* Fr., *adipome*. Ger., *Adipom*. Cruveilhier's term for lipoma (q. v.). [A, 301.]

**ADIPOMALIC ACID**, n.  $A^2d/i^2p-o-ma^3/i^2k$ . For deriv., see ADIPS and MALIC. See HYDROXADIPIC ACID.

**ADIPOSE**, adj.  $A^2d/i^2p-os$ . Gr., *πικρὸς, λιπαρός*. Lat., *adiposus* (from *adeps*, fat). Fr., *adipose*, *gras*. Ger., *adipös*, *fettig*, *fettartig*. It., Sp., *adiposo*. Fatty, pertaining to fat, especially to the tissue containing fat. [J.] See A. ARTERIES, A. CUSHION OF THE EAR, A. DUCTS, A. SARCOMA, A. SYSTEM, A. TISSUE, and A. VEINS.

**ADIPOSE** (Ger.), n.  $A^3-de-po^2ze^2$ . Adiposis.

**ADIPOSIS** (Lat.), n. f.  $A^2d(a^3d)-i^2p-o-si^2s$ . Gen., *adipo'seos*. For deriv., see ADIPS and -osis.\* Ger., *Adipose*, *Fettbildung*, *Fettsucht*, *Fettleibigkeit*. It., *adiposi*. 1. A general term for the formation of fat, fatty degeneration, and fatty infiltration. [A, 314; D.] 2. Obesity. [Birch-Hirschfeld (A, 319).]

**ADIPOSITA**, n.  $A^2d-i^2p-o-s^2s/i^2t-i^2$ . See ADIPOSIS.

**ADIPOSURIA** (Lat.), n. f.  $A^2d(a^3d)-i^2p-o-su^2(su)/ri^2-a^3$ . From *adeps*, fat, and *οὐρον*, urine. See PIMELURIA.

**ADIPOSUS** (Lat.), adj.  $A^2d(a^3d)-i^2p-o-su^2(su)^4s$ . Adipose.

**ADIPOTARTARIC ACID**, n.  $A^2d/i^2p-o-ta^3r-ta^3r/i^2k$ . From *adeps* and *tartaric*. Fr., *acide adipotartrique*. See DIHYDROXYADIPIC ACID.

**ADIPOUS**, adj.  $A^2d/i^2p-u^3s$ . See ADIPOSE.

**ADIPSA** (Lat.), n. n. pl. of adj. *adipus* (q. v.).  $A^2d(a^3d)-i^2p-sa^3$ . Fr., *adipsa*. Ger., *durstlöschende Mittel*. 1. Articles of food that do not cause thirst. [A, 322.] 2. Remedies for thirst. [A, 306.]

**ADIPSATHEON** (Lat.), n. n.  $A^2d(a^3d)-i^2ps-a(a^3)/the(the)^2-o^2n$ . From *ἀδύψος*, quenching thirst, and *θεός*, a god. The ancient name of a shrub which had the power of quenching thirst. [A, 312.]

**ADIPSIA** (Lat.), n. f.  $A^2d(a^3d)-i^2ps-i^2-a^3$ . Gr., *ἀδύψια* (from a priv., and *δύψω*, thirst). Fr., *adipsie*. Ger., *Adipsie*, *Durstlosigkeit*. It., Sp., *adipsia*. Absence of thirst; a phenomenon observed in certain grave diseases, but a natural condition in some aged persons. [A, 321.] Classified by nosologists as a disease, being a genus of Alibert's *gastroses* and of Cullen's *locales dysorexiae*, and a species of Good's *dipsosis*. [A, 320, 326, 327.]

**ADIPSIC**, adj.  $A^2d-i^2ps/i^2k$ . Lat., *adipsicus*. 1. Pertaining to adipsia. [A, 322.] 2. Quenching, or not producing, thirst.

**ADIPSON** (Lat.), n. n.  $A^2d(a^3d)-i^2ps-o^2n$ . 1. A beverage relieving thirst. [N. Biggs (B, 39).] 2. An old name for a species of mallow. [A, 322.] For the pl., see ADIPSA.

**ADIPSOS** (Lat.), n. m.  $A^2d(a^3d)-i^2ps-o^2s$ . 1. An ancient name for the Egyptian palm-tree which furnishes the myrobalani. [B, 69.] 2. An old name for licorice. [Pliny (A, 312).]

**ADIPSOUS**, adj.  $A^2d-i^2ps-u^3s$ . See ADIPSIC.

**ADIPSUM** (Lat.), n. n.  $A^2d(a^3d)-i^2ps-u^3m(u^4m)$ . See ADIPSON.

**ADIPSUS** (Lat.), adj.  $A^2d(a^3d)-i^2ps-u^3s(u^4s)$ . Adipsic. [A, 322.]

**ADIPSY**, n.  $A^2d/i^2ps-i^2$ . See ADIPSIA.

**ADIR** (Ar.), n. An Arabian plant, the fresh leaves of which are used in decoction as a purgative. [Waring (A, 316).]

**ADIRIGE**, n. "Ammoniacum; most probably the salt." [A, 343.]

**ADIRONDACKS**, n. pl.  $A^2d-i^2-ro^2n-da^2ks$ . A wild, mountainous region in the northeastern part of the State of New York, including portions of Clinton, Essex, Franklin, and Hamilton counties, recommended as a resort for phthisical patients, sufferers from hay fever, and others. A sanitarium has been established, called the "Adirondack Cottages." [A, 327, 368; A. L. Loomis, "N. Y. Med. Jour.," June 13, 1885, p. 653.] A cold spring, in the

town of Whitehall, at the base of one of the spurs of the A. mountains, contains in an imperial gallon:

Free carbon dioxide.....	67.257 grains.
Calcium carbonate.....	18.543 "
Magnesium.....	16.618 "
Sodium.....	5.317 "
Potassium.....	5.040 "
Lithium.....	0.023 "
Iron.....	5.040 "
Manganum.....	traces.
Sodium chloride.....	14.340 grains.
Calcium sulphate.....	11.134 "
Alumina.....	traces.
Silica.....	0.742 grains.

The water is a diuretic, aperient, and tonic, and has been used successfully in rheumatism, ascites, and calculous affections. [J. Bell, "Med. Record," 1870, p. 33; "Phila. Med. Times," 1871, p. 144 (D).]

Longitude East 3 from Washington

Longitude West 74 from Greenwich

**ADISCAL**, adj. A<sup>2</sup>d-i'sk'a<sup>2</sup>l. Lat., *adiscalis* (from *a* priv., and *discos*, a disk). In botany, without the intervention of a disk (said of the insertion of stamens). [Lestiboudois (A, 345).]

**ADIS MANIS**, n. A Japanese name for anise. [A, 344.]

**ADITUS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d)/i<sup>2</sup>t-u's(u<sup>4</sup>s). Gen., *ad'itus*. From *adire*, to go to. Gr., *πρόσδος*. Ger., *Zugang*. It., *adito*. Sp., *adite*. An approach; a term applied to the entrance or approach to various canals. [A, 318, 334.]—**A. ad aqueductum** Sylvii. Ger., *Eingangsoffnung* (oder *Zugang*) *der Sylvius'schen Wasserleitung*. It., *adito dell' acquedotto di Silvio*. Syn.: *anus*. The entrance to the Sylvian aqueduct, situated at the lower posterior angle of the third ventricle of the brain. [I, 17.]—**A. ad infundibulum**. Ger., *Trichtereingang*. It., *adito dell' infundibolo*. Syn.: *vulva*. A small canal leading from the third ventricle into the infundibulum. [I, 3.]—**A. ad laryngem**, **A. laryngis**. The upper aperture of the larynx.

**ADIULISTOS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d)-i<sup>2</sup>-u<sup>2</sup>(u)-li<sup>2</sup>st'o<sup>2</sup>s. From *ἀδουλστος* (from *a* priv., and *δουλσεν*, to strain), not strained or filtered. [Galen (A, 311).] An old name for unstrained wine. [A, 325.]

**ADIVAS** (Sp.), n. pl. A<sup>3</sup>-de'va's. From Ar., *adiva*. An inflammatory affection of the throat in domestic animals, corresponding to quinsy in man. [A, 255, 338.]

**ADIVIE AMIDA**, n. An Oriental name for the *Jatropha curcas*. [A, 344.]

**ADIVI GORANTA**, n. An East Indian name for the *Erythroxylon monogynum*. [L. A. Waddell, "Indian Med. Gaz.," Sept., 1885, p. 281.]

**ADYLISTOS** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d)-i<sup>2</sup>-i<sup>2</sup>(u<sup>4</sup>)-i<sup>2</sup>st'o<sup>2</sup>s. See **ADIULISTOS**.

**ADJACENT**, adj. A<sup>2</sup>d-ja'se<sup>2</sup>nt. From *adjacere*, to lie near to. In chemistry, adjoining one another in the structural formula of a body, or attached to two carbon atoms so adjoining (said of two atoms or groups of atoms). [B.]

**ADJECTIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-je<sup>2</sup>k(ye<sup>2</sup>k)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *adjectio'nis*. From *adjicere*, to add to. See **ADJUNCTION**.

**ADJECTIVE**, adj. A<sup>2</sup>d'je<sup>2</sup>k-ti<sup>2</sup>v. From *adjicere*, to add to. Fr., *adjectif*. Ger., *adjectiv*. It., *adiettivo*, *aggettivo*. Sp., *adjetivo*. Accessory. See **A. ALIMENT**.

**ADJOUR DJEBEL, ADJOUR EL AMAR**, n's. Persian names for species of *Cucumis* used in that country as purgatives. [Oliver (A, 344).]

**ADJOWAN**, n. Ajowan. See **AMMI COPTICUM**.

**ADJUMENTUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-me<sup>2</sup>nt'u<sup>2</sup>m(u<sup>4</sup>m). Contr. from *adjuvamentum* (from *adjuvare*, to help). An adjutant. [A, 356.]

**ADJUNCT**, n. A<sup>2</sup>d'-ju<sup>2</sup>nt'kt. Lat., *adjunctum* (from *adjungere*, to join to). See **ADJUVANT**.

**ADJUSTER**, n. A<sup>2</sup>d-ju<sup>2</sup>st'u<sup>2</sup>r. From *adjustare*, to adjust. Ger., *Berichtiger*. An instrument or mechanism for bringing parts into their proper relations.—**Jarvis's a**. A mechanical contrivance formerly used for making forcible extension and counter-extension in the reduction of dislocations. [E.]—**Sims's a**. See **Sims's SHIELD**.

**ADJUSTMENT**, n. A<sup>2</sup>d-ju<sup>2</sup>st'me<sup>2</sup>nt. 1. A process of adjusting. 2. A mechanism for carrying out the process (thus, the *coarse a* of a compound microscope is the device by which the barrel of the instrument is brought rapidly to about the proper distance from the stage; the *fine a*, consisting of a fine screw, completes the process of focusing.)

**ADJUTOR** (Lat.), n. m. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-to<sup>2</sup>r. Gen., *adjutor'is*. From *adjuvare*, to assist. Ger., *Helfer*. Sp., *adjuvador*. See **ADJUVANT**.—**A. partus**. An obstetrician. [A, 313.]

**ADJUTORIUM** (Lat.), n., n. of adj. *adjutorius*. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-to<sup>2</sup>r'i<sup>2</sup>u<sup>2</sup>m(u<sup>4</sup>m). 1. An adjutant. [A, 322.] 2. An old term for the os brachii. [A, 322, 323, 325.]

**ADJUTORIUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-to<sup>2</sup>r'i<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s) Adjutant. [A, 322.]

**ADJUTUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-tu<sup>2</sup>s(tu<sup>4</sup>s). Mediating. See **MEDIATING AFFINITY**.

**ADJUVANT**, adj. and n. A<sup>2</sup>d'ju<sup>2</sup>-va<sup>2</sup>nt. Lat., *adjuvans*, *adjuvator*. Fr., *adjuvant*, *auxiliaire*. Ger., *begünstigend*, *Hilfsmittel*. It., *adjuvante*. Sp., *adyuvante*. Auxiliary, assisting; in therapeutics, a measure or drug designed to assist the action of the principal means. [B.]

**ADJUVANTIA** (Lat.), n., n. pl. of adj. *adjuvans*. A<sup>2</sup>d(a<sup>3</sup>d)-ju<sup>2</sup>(yu)-va<sup>2</sup>n(wa<sup>3</sup>n)/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. Adjuvants.

**ADLERBEERE** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-ba-re<sup>2</sup>. The wild serviceberry (*Crataegus torminalis*). [B, 48.]

**ADLERBLUME** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-blu-me<sup>2</sup>. Columbine; the genus *Aquilegia*. [A.]

**ADLERBOHNE** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-bo-ne<sup>2</sup>. A sort of kidney-bean. [L, 46.]

**ADLERBRUNNEN** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-brun-ne<sup>2</sup>n. One of the hot springs of Wiesbaden.

**ADLERFARN, ADLERFARN** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-fa<sup>2</sup>rn. The common bracken (*Pteris aquilina*). [B; L, 30.]

**ADLERHOLZ** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-holtz. Eagle wood, aloes wood; the wood of *Aquilaria agallocha*, of *Excoecaria agallocha*, or of *Aloexylon agallochum*. [B; L, 37, 46.] See **ALOES WOOD**.—**A'baum**. The *Aquilaria agallocha*, or *Excoecaria agallocha*. [L, 46.]

**ADLERKRAUT** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-kra<sup>2</sup>-ut. The female fern (*Athyrium filix femina*). [A.]

**ADLERMENNIG** (Ger.), n. A<sup>3</sup>d'le<sup>2</sup>r-me<sup>2</sup>n-ni<sup>2</sup>g. Agrimony (*Agrimonia eupatoria*). [A.]

**ADLERSALZ** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>r-za<sup>3</sup>ltz. Mineral salt; sodium chloride occurring native as a mineral. [B, 48.]

**ADLERSAUMFARREN** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>r-za<sup>3</sup>-um-fa<sup>3</sup>r-re<sup>2</sup>n. See **ADLERFARRN**.

**ADLERSBERBAUM** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>rs-bar-ba<sup>3</sup>-um. The wild service-tree (*Crataegus torminalis*). [A; B.]

**ADLERSTEIN** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>r-stin. See **AETITE**.

**ADLERVITRIOL** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>r-fe-tre-ol. Sulphate of copper containing some sulphate of iron. [B, 49.]

**ADLESBERBAUM** (Ger.), n. A<sup>3</sup>d<sup>2</sup>le<sup>2</sup>s-bar-ba<sup>3</sup>-um. See **ADLERSBERBAUM**.

**ADLIGATUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-li<sup>2</sup>g-a(a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). In botany, fixed to an object by means of tendrils or aerial roots. [L, 38.]

**ADLIMENTUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-li<sup>2</sup>n-i<sup>2</sup>-me<sup>2</sup>n'tu<sup>3</sup>m-(tu<sup>4</sup>m). Ger., *lindernde Mittel*. A soothing application. [A, 355.]

**ADLUMIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-lu<sup>2</sup>(tu)/mi<sup>2</sup>-a<sup>3</sup>. From the name of J. Adlum, an American botanist. A genus of North American fumariaceous plants established by Rafinesque. [B, 34; L, 30, 64.]

**ADMASTON**, n. A<sup>2</sup>d<sup>2</sup>ma<sup>2</sup>s-to<sup>2</sup>n. A salt spring in Shropshire, England. [L, 63.]

**ADMELLA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-me<sup>2</sup>l/la<sup>3</sup>. See **ACMELLA**.

**ADMINICLE**, n. A<sup>2</sup>d-mi<sup>2</sup>n/i<sup>2</sup>kl. Lat., *adminiculum*. Fr., *adminicule*. Ger., *Unterstützung* (1st def.), *Hülfe*, *Beihülfe* (3d def.). It., *amminicolo*. Sp., *adminiculo*. Syn.: *fulcrum* (2d def.). 1. A prop; the support of a plant. 2. A name given by Scopoli to all the accessory parts of a plant, such as the sheaths, petioles, stipules, involucre, bracts, hairs, bristles, etc. 3. One of the small spicula found on the abdomen of certain insects in the pupa stage. 4. Anything which aids the effects of a medicine; an adjuvant. [B, 1; L, 46, 56, 106.]

**ADMINICULAR**, adj. A<sup>2</sup>d-mi<sup>2</sup>n-i<sup>2</sup>kl'u<sup>2</sup>-la<sup>3</sup>r. Sp., *adminicular*. Adjuvant. [L, 56.]

**ADMINICULUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-mi<sup>2</sup>n-i<sup>2</sup>kl'u<sup>2</sup>(u)-lu<sup>3</sup>m-(tu<sup>4</sup>m). See **ADMINICLE**.

**ADMINISTER**, v. t. A<sup>2</sup>d-mi<sup>2</sup>n'i<sup>2</sup>z-s-tu<sup>3</sup>r. Lat., *administrare* (2d def.). Fr., *administrer*, *faire prescrire* (1st def.). Ger., *darreichen* (1st def.). Sp., *administrar*. 1. To enforce or superintend the application of a remedy. 2. To attend to, to serve. [L.]

**ADMINISTRATION**, n. A<sup>2</sup>d-mi<sup>2</sup>n'i<sup>2</sup>z-s-tra/shu<sup>3</sup>n. Fr., *administration*. Ger., *Darreichung*. Sp., *administración*. The act or process of administering.

**ADMINIBILIS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-mi<sup>2</sup>r-a<sup>2</sup>b(a<sup>3</sup>b)/i<sup>2</sup>l-i<sup>2</sup>s. Wonderful. An epithet applied to a certain artificial mineral. [L, 53.] See **LAPIS a**.

**ADMISCIREN** (Ger.), n. A<sup>3</sup>d-mi<sup>2</sup>s-tze/re<sup>2</sup>n. An admixture.

**ADMISTIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-mi<sup>2</sup>s'chi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *admistio/nis*. See **ADMISTIO**.

**ADMISURAB**, n. An alchemical name for earth. [L, 53.]

**ADMIX**, v. intr. A<sup>2</sup>d-mi<sup>2</sup>x'. From *ad*, to, and *miscere*, to mix. Ger., *beimischen*. To add something during the preparation of a mixture. [L.]

**ADMIXTIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-mi<sup>2</sup>xt'shi<sup>2</sup>(i<sup>2</sup>)-o. Gen., *admixtio/nis*. Admixture, admixture. [L, 50, 58.]

**ADMIXTION**, n. A<sup>2</sup>d-mi<sup>2</sup>xt'yu<sup>3</sup>n. A mingling or union of different bodies together. It differs from *composition* in that the nature of the substances mixed is not altered. [L, 56.]

**ADMIXTURE**, n. A<sup>3</sup>d-mi<sup>2</sup>x'tu<sup>3</sup>r. Lat., *admistio*, *admixtio*. Ger., *Mischung*, *Beimischung*. Zusatz (1st def.). *Gemischte* (2d def.). 1. The act of mixing or of adding to a mixture. 2. The compound formed by mixing different substances together. [L, 41, 56.]

**ADMIXTUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-mi<sup>2</sup>x'tu<sup>3</sup>s(tu<sup>4</sup>s). Part. of *admiscere*, to mix with. Admixed. [L.]

**ADMOVIVUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-mo-ti(te)/vu<sup>3</sup>s(wu<sup>4</sup>s). Fr., *admotif*. An epithet applied by C. Richard to that form of germination in which the epispem enveloping the extremity of a cotyledon remains laterally attached near the sheath of the cotyledon. [B, 1.]

**ADMOVE**, **ADMOVEATUR** (Lat.), v. tr., imperat. sing. and 3d pers. sing., subj., pass. of *admove*, to apply. A<sup>2</sup>d(a<sup>3</sup>d)-mo-ve(wa), -mo-ve(wa<sup>2</sup>)-a(a<sup>3</sup>)/tu<sup>3</sup>r(tu<sup>4</sup>r). Directions used in prescriptions signifying "apply" and "let there be applied." [L, 107.]

**ADNASAL**, n. A<sup>2</sup>d-na<sup>2</sup>sa<sup>2</sup>l. From *ad*, near to, and *nasus*, the nose. Sp., *adnasal*. The name used by Geoffroy for the premaxillary bone (Owen) of fishes. [L, 27.]

**ADNASCENS** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-na<sup>2</sup>s(na<sup>3</sup>s)/se<sup>2</sup>nz(ke<sup>2</sup>us). Gen., *adnascentis*. From *ad*, to, and *nasci*, to be born. Fr., *cayeu*. Ger., *Stechling*, *Auswuchs*. Syn.: *adnatum*. 1. A bulb, or bulbil (*q. v.*). 2. A branch sprouting from the main stock; a sort of adventitious root. [B, 1, 89.]

**ADNASCENT**, adj. A<sup>2</sup>d-na<sup>2</sup>s/se<sup>2</sup>nt. Growing upon another body or thing. [L, 56.]

**ADNATA** (Lat.), n. f. of adj. *adnatus* (*tunica* understood). A<sup>2</sup>d(a<sup>3</sup>d)-na<sup>2</sup>(na<sup>3</sup>)/ta<sup>3</sup>. Fr., *adnée*. It., Sp., *adnata*. 1. The conjunctiva of the eye; or, more properly, the tendinous expansion of the motor muscles of the eye lying between the conjunctiva and the sclerotic. 2. The tunica albuginea of the testicle. [L, 30, 73, 84.]

**ADNATA** (Lat.), n. n. pl. Gen., *adnatu/rum*. Ger., *Auswüchse*. 1. The plural of *adnatum*. [B.] See **ADNASCENS**. 2. Natural growths, such as hair, wool, etc., found on the external surface of animals or plants; also excrescences upon the surface, such as fungi, etc. [L, 97.]

**ADNATE**, adj. A<sup>2</sup>d<sup>2</sup>nat. Lat., *adnatus*, *adnerus* (from *ad*, to, and *nasci*, to be born). Fr., *adné*. Ger., *angeachsen*. Sp., *adnato*. Grown to, attached to. A term applied in botany to an anther when it is attached by its entire length to a filament; to the floral leaves when they are adherent to the flower-stalk; and to the gills of a mushroom when their internal extremities are adherent to the stipe. [B, 1, 34.]

**ADNATION**, n. A<sup>2</sup>d-na<sup>2</sup>shu<sup>3</sup>n. From *adnasci* (part., *adnatus*), to grow to. Fr., *adnation*. Sp., *adnexión*. In botany, the consolidation of two dissimilar parts or organs, like the calyx and corolla, into a single piece. [B, 75.]

**ADNATUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-na(na<sup>3</sup>)/tu<sup>3</sup>m(tu<sup>4</sup>m). See **ADNASCENS**.

**ADNATUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-na(na<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). Past. part. of *adnasci*, to be born or grow to. Adnate.

**ADNÉ** (Fr.), adj. A<sup>3</sup>d-na. Adnate.

**ADNÉE** (Fr.), n. f. A<sup>3</sup>d-na. See **ADNATA**.

**ADNEXA** (Lat.), n. n. pl. of *adnexum*. A<sup>2</sup>d(a<sup>3</sup>d)-ne<sup>2</sup>x/a<sup>3</sup>. Gen., *adnexorum*. Fr., *annexes*. Ger., *Adnexe*. Appendages.—**A. uteri**. See **UTERINE APPENDAGES**.

**ADNEXE** (Ger.), n. A<sup>3</sup>d-ne<sup>2</sup>x-e<sup>2</sup>. An appendage.—**A'n des Eies**. See **Fœtal APPENDAGES**.

**ADNEXION** (Fr.), n. A<sup>2</sup>d-ne<sup>2</sup>x'yu<sup>3</sup>n. The state of union or consolidation of one part with another. [L, 41.]

**ADNEXUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>3</sup>d)-ne<sup>2</sup>x'u<sup>3</sup>m(tu<sup>4</sup>m). Ger., *Adnexe*. An appendage. Usually employed in the pl., *adnexa*.

**ADNEXUS** (Lat.), adj. A<sup>2</sup>d(a<sup>3</sup>d)-ne<sup>2</sup>x'u<sup>3</sup>s(u<sup>4</sup>s). Adnate.

**ADOC**, n. An alchemical term for milk. [B, 50.]

**ADOLESCENCE**, **ADOLESCENCY**, n's. A<sup>2</sup>d-o-le<sup>2</sup>s/se<sup>2</sup>ns, -se<sup>2</sup>ns-i<sup>2</sup>. Lat., *adolescencia*. Fr., *adolescence*, *jeunesse*. Ger., *Adoleszenz*, *Jugend*, *Jünglingsalter*. It., *adolescenza*, *gioventù*. Sp., *adolescencia*. Syn.: *youth*. "The period between puberty and full development." This is between 14 and 25 in men and between 12 and 21 in women. [K, 4.]

**ADOLESCENT**, adj. and n. A<sup>2</sup>d-o-le<sup>2</sup>s/se<sup>2</sup>nt. Lat., *adolescens*. Fr., *adolescent*, *jeune* (1st def.). Ger., *jung* (1st def.). It., *giovane*, *adolescente*. Sp., *joven*, *adolescente*. 1. (Adj.) pertaining to adolescence; at the age of adolescence; also growing. 2. (N.) one at the age of adolescence. [K; L, 56.]

**ADOLFSBERG** (Swed.), n. A<sup>3</sup>d-olfs-barg. A cold alkaline spring near Örebro (Sweden) containing, according to Berzelius, carbon dioxide, sulphate, chloride, and carbonate of potassium, carbonate of calcium, and oxides of iron, manganese, and silicon. [L, 105.]

**ADOLIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-o<sup>2</sup>l-i<sup>2</sup>-a<sup>3</sup>. Fr., *adoli*, *adolie*. Sp., *adolia*. Syn.: *vetadagou*. A plant found in Malabar, the leaves of which, mixed with oil, are applied locally to assist labor. [L, 105.]

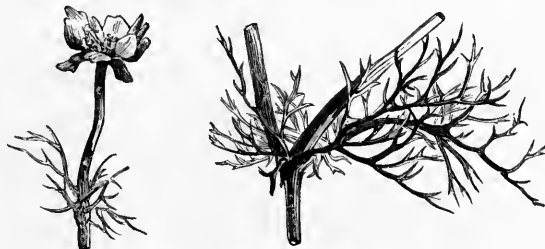

**ADOLODE**, n. A<sup>2</sup>d-o<sup>2</sup>-lod. From a priv. and *δόλος*, wile. An instrument sometimes used for discovering fraud in distillation. [L, 73.]

**ADONIDE**, n. A<sup>2</sup>d-o-nid. Fr., *adoniste*. Ger., *Adonist*. Sp., *adonista*. A gatherer of herbs; also one who describes and catalogues exotic and cultivated plants. [A, 315; L, 95, 96, 98, 109.]

**ADONIDE** (Fr.), n. A<sup>3</sup>d-o-ned. The *Adonis vernalis*.

**ADONIDIN**, n. A<sup>2</sup>d-o<sup>2</sup>n'i<sup>2</sup>d-i<sup>2</sup>n. For deriv., see **ADONIS**. Fr., *adonidine*. It., Sp., *adonidina*. A glucoside extracted by Cerrillo from *Adonis vernalis*; a colorless, odorless, extremely bitter, amorphous substance only slightly soluble in water and in ether, more soluble in alcohol. In physiological action it resembles digitalin. ["Arch. f. exp. Pathol. u. Pharm.," xv, p. 235 (B).]

**ADONIS** (Lat.), n. f. A<sup>2</sup>d(a<sup>3</sup>d)-o<sup>2</sup>n-i<sup>2</sup>s. Gen., *adonidis*. From *Adonis*, from whose blood the plant was fabled to have sprung. Fr., *adonide*. Ger., *Adonis*. It., Sp., *adonide*. A Linnean genus of ranunculaceous herbs belonging to the tribe *Ranunculeae*, distinguished by the absence of appendages to the sepals and by the scarlet or yellow hue of the flowers. [B, 34.]—**A. aestivalis** (Linnaeus). Fr., *adonide d'été*, *œil de perdrix*. Ger., *Sommeradonis*, *Teufelsauge*. Pheasant's-eye; a species growing in England and on the Continent of Europe, bearing small crimson flowers with the corolla much longer than the calyx. It is used as a vesicant, and by Parkinson an infusion of the seeds is recommended for colic. [B, 19, 49; L, 105.]—**A. anomala**. A European species, the leaves of which are used as a vesicant. [L, 105.]—**A. apennina**. A

ADONIS AUTUMNALIS. [A, 257.]

species the leaves of which are used by the Siberians as an abortifacient and vesicant. [L, 105.]—**A. autumnalis** (Linnaeus). Fr., *adonide d'automne*, *goutte de sang*. Ger., *Adonisblume*,

*Adonisröschen*, *Teufelsauge*. Syn.: *flos a.* A European species cultivated in the United States. It is an annual herb, about 1 foot in height, bearing crimson flowers having from 5 to 8 petals, which are of nearly equal length with the sepals. [B, 19, 34, 49.] — *Ablume* (Ger.). See *A. autumnalis*. — *A. capensis*. Ger., *blasenziehender A.* A species found at the Cape of Good Hope; the leaves are used in lieu of cantharides. [L, 105.] — *A. cupaniana* [Gussone]. It., *fiore di Marzo* (o di San Giuseppe). A Sicilian species; an annual herb with a solitary red flower, nearly related in botanical characters to *A. aestivalis*, if not identical with it. It contains a glucoside apparently identical with adonidin. It has been recommended as a substitute for *A. vernalis*. [V. Cervello, "Ann. di chim. medico-farm. e di farmacol.," April-May, 1885, p. 295 (B).] — *A. flos*. See *A. autumnalis*. — *A. gracilis*. A South African species; the leaves are used by the natives as a vesicant. [L, 105.] — *A. röschen*, *A. röslein*. See *A. autumnalis*. — *A. verna*, *A. vernalis* [Linnaeus]. Fr., *adonide printanière*, *adonide*. A species indigenous to Europe and cultivated in the United States, so called because blooming early in the spring. It is a perennial herb about 1 foot in height, bearing lemon-yellow flowers with 10 to 12 petals. The plant contains adonidin, and the leaves contain 10 per cent. of aconitic acid. The fresh plant is a vesicant, but its irritant property is lost by drying. The roots are used in England as a purgative, and the leaves also are said to be drastic. The plant is employed on the Continent as a cardiac tonic and in Siberia as an abortifacient, and the rhizome has been used to adulterate black hellebore. [Huchard, "Gaz. hebdomadaire de méd. et de chir.," Jan. 1, 1886, p. 13 (A); B, 19, 34, 49; L, 105.] — *A. vesicatoria*. See *A. capensis*. — *Blasenziehender A.* (Ger.). See *A. capensis*. — *Flos a.* A common name for *A. autumnalis*. [B, 19.] — *Sommerera* (Ger.). See *A. aestivalis*.

**ADOPTER**, n. A<sup>2</sup>d-o<sup>2</sup>p/tu<sup>2</sup>r. See **ADAPTER**.

**ADOR** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)/or. Gen., *adoris*. 1. A sort of corn; spelt, *Triticum spelta*. 2. Also wheat flour. [L, 48, 102, 105.]

**ADORAL**, adj. A<sup>2</sup>d-o<sup>2</sup>ra<sup>2</sup>l. From *ad*, near to, and *os*, the mouth. Near or in relation to the mouth. [B, 39.]

**ADORBITAL**, n. A<sup>2</sup>d-o<sup>2</sup>r<sup>2</sup>bi<sup>2</sup>a<sup>2</sup>l. From *ad*, near to, and *orbita*, the orbit. Fr., *adorbital*. The name used by Geoffroy for the lachrymal bone (Owen) of fishes. [L, 37, 41.]

**ADORF** (Ger.), n. A<sup>2</sup>d-o<sup>2</sup>rff. A place in Saxony at which are mineral springs containing sodium chloride with traces of bromine, lithium, etc. [L, 49.]

**ADORNKRAUT** (Ger.), n. A<sup>2</sup>d-o<sup>2</sup>rn-kra<sup>2</sup>-ut. The *Ballota nigra*. [B, 92.]

**ADOS**, n. From *ἄδος*, satiety. An alchemical term for water in which red-hot iron has been quenched. [L, 53.]

**ADOS** (Fr.), adj. A<sup>2</sup>-do. Oblique. [L, 101.]

**ADOSCULATION**, n. A<sup>2</sup>d-o<sup>2</sup>s<sup>2</sup>/ku<sup>2</sup>-la<sup>2</sup>/shu<sup>2</sup>n. From *adosculari*, to kiss. Ger., *Befruchtung*, *Schwängung* (1st def.). 1. A term formerly employed to denote impregnation taking place in plants or animals by superficial contact alone. 2. A form of articulation in which one part is fitted into a cavity in another part. [B, 39.]

**ADOSSETTE** (Fr.), n. A<sup>2</sup>d-o<sup>2</sup>s-se<sup>2</sup>t. A genus of mosses. [L, 41.]

**ADOSSEMENT** (Fr.), n. A<sup>2</sup>d-o<sup>2</sup>s-ma<sup>2</sup>n<sup>2</sup>. The application of two surfaces to each other, as in the case of two membranes which are applied to each other by their opposite faces. [L, 41.]

**ADOUCIR** (Fr.), v. tr. A<sup>2</sup>-du-ser. To dilute; said of acids. [L, 52.]

**ADOUCISSANT** (Fr.), n. A<sup>2</sup>-du-se-sa<sup>2</sup>n<sup>2</sup>. A demulcent. [L, 41.]

**ADOXA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-o<sup>2</sup>x<sup>2</sup>a<sup>2</sup>. From *adox*, priv., and *δόξα*, estimation, because of its inconspicuousness. [B, 71.] Fr., *adox*, Ger., *Bisamkraut*, Sp., *adora*. A genus of plants now assigned to the *Caprifoliaceae*, although formerly classed among the *Araliaceae* and *Saxifragaceae*. [B, 19, 71.] — *A. moschatellina* [Willdenow]. Ger., *Bisamkraut*. Musk crow's-foot. A species growing in Europe, England, and North America. It has been used as a detergent and antispasmodic. [L, 37, 46, 105.]

**ADPHALANGINE** (Fr.), n. A<sup>2</sup>d-fa<sup>2</sup>-la<sup>2</sup>n<sup>2</sup>-zhen. An accessory phalanx. [L, 41.]

**ADPLICITUS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-pli<sup>2</sup>s(pli<sup>2</sup>k)/i<sup>2</sup>-tu<sup>2</sup>s(tu<sup>2</sup>s). From *ad*, to, and *plicare*, to fold. Appressed. [B, 121.]

**ADPLUMBATUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-plu<sup>2</sup>m(plu<sup>2</sup>m)-ba(ba<sup>2</sup>)/tu<sup>2</sup>m(tu<sup>2</sup>m). From *ad*, to, and *plumbare*, to solder. Syn.: *ferruminatum*. Solder. [L, 53.]

**ADPRESSED**, adj. A<sup>2</sup>d-pre<sup>2</sup>st'. See **APPRESSED**.

**ADPRESSUS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-pre<sup>2</sup>s(su<sup>2</sup>s)(su<sup>2</sup>s). See **APPRESSED**.

**ADRACALA**, n. See **ADRACHNE**.

**ADRACANTHINE**, **ADRACANTINE** (Fr.), n's. A<sup>2</sup>d-ra<sup>2</sup>-ka<sup>2</sup>n<sup>2</sup>-ten. Adraganthin. [L, 43.] See **TRAGACANTHIN**.

**ADRACHNE** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-ra<sup>2</sup>k(rach<sup>2</sup>ch<sup>2</sup>)/ne(na). Gen., *adrachnes*. Gr., *ἀδράχνη*. Fr., *adrachné*. Ger., *Adrachne*. Sp., *adrachne*. 1. A tree mentioned by Pliny; the strawberry bay, or *Arbutus adrachne* of Linnaeus, an evergreen shrub of the Island of Candia. [B, 114; L, 103.]

**ADRADIAL**, adj. A<sup>2</sup>d-ra<sup>2</sup>/di<sup>2</sup>a<sup>2</sup>l. From *ad*, to, near to, and *radius*, a ray. Near, or in relation with, a ray; in the *Hydrozoa*, disposed on either side of one of the primary radii passing from the centre to the angles of the oral aperture. [E. R. Lankester (B, 77).] Cf. **PERRADIAL** and **INTERRADIAL**.

**ADRADIALLY**, adv. A<sup>2</sup>d-ra<sup>2</sup>/di<sup>2</sup>a<sup>2</sup>l<sup>2</sup>. In an adradial manner, having an adradial relation. [B, 77.]

**ADRAGANT**, **ADRAGANTH**, n's. A<sup>2</sup>d-ra<sup>2</sup>-ga<sup>2</sup>nt, -ga<sup>2</sup>nth.

Fr., *adragant*, *adraganthe*. Ger., *Adragant*, *Adraganth*. It., *adragante*. Sp., *adraganto*, *adraganto*. See **TRAGACANTHA**.

**ADRAGANTHIN**, n. A<sup>2</sup>d-ra<sup>2</sup>-ga<sup>2</sup>n<sup>2</sup>/thi<sup>2</sup>n. Lat., *adraganthina*, *adragantina*. Fr., *adragantine*, *adracanthine*. Ger., *Adraganthin*. Sp., *adragantina*. See **TRAGACANTHIN**.

**ADRAGO** (Sp.), n. A<sup>2</sup>d-ra<sup>2</sup>/go. Syn.: *adrazo*. A distilling apparatus used by the early Spanish navigators. [L, 95, 99.]

**ADRAKA**, n. See **ADA** (2d def.).

**ADRAM**, n. An alchemical name for sodium chloride. [B, 50.]

**ADRARAGI**, n. An alchemical name for garden saffron (some species of *Crocus*). [B, 50.]

**ADRA RHIZA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)/ra<sup>2</sup> ri(re)/za<sup>2</sup>. From *ἄδρα ρίζα*, a thick root. Fr., *adrarize*. Sp., *adrariza*. See **ARISTOLOCHIA**.

**ADRASTÉE** (Fr.), n. A<sup>2</sup>d-ra<sup>2</sup>-sta. Sp., *adrastea*. A small shrub growing in New Holland. [L, 98, 109.]

**ADRAGO** (Sp.), n. A<sup>2</sup>d-ra<sup>2</sup>/tho. See **ADRAGO**.

**ADRELWURT**, n. A<sup>2</sup>d-re<sup>2</sup>l-wu<sup>2</sup>rt. An old name for feverfew (? *Matricaria parthenium*). [Halliwell (L, 73).]

**ADRENAL**, n. A<sup>2</sup>d-re<sup>2</sup>na<sup>2</sup>l. From *ad*, to, and *ren*, the kidney. See **SUPRARENAL CAPSULE**.

**ADRIANUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-ri<sup>2</sup>-a(a<sup>2</sup>)/nu<sup>2</sup>m(nu<sup>2</sup>m). A medicine, invented by the Emperor Hadrian, used in all diseases caused by cold. [L, 53.]

**ADROBOLON**, **ADROBOLUM** (Lat.), n's n. A<sup>2</sup>d(a<sup>2</sup>d)-ro-bo/lo<sup>2</sup>n, -lu<sup>2</sup>m(lu<sup>2</sup>m). From *ἄδρός*, thick, and *βῶλος*, a lump. Indian bdellium; so called because occurring in larger lumps than the Arabian. [B, 69.] More properly written *hadrobolon*.

**ADROP**, n. An alchemical term denoting lead used in the preparation of the philosopher's stone; also the philosopher's stone itself. [L, 53.]

**ADROS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)/ro<sup>2</sup>s. Gr., *ἄδρός*, thick, plump. More properly written *hadros*. Full, as applied to the habit of body or to the pulse. [L, 45.]

**ADROSTRAL**, adj. and n. A<sup>2</sup>d-ro<sup>2</sup>s/tra<sup>2</sup>l. From *ad*, to, near to, and *rostrum*, a beak. Fr., *adrostral*. Sp., *adrostral*. 1. (Adj.) attached to the front portion of the face. 2. (N.) a portion of the superior maxilla in certain of the lower animals. [L, 41, 63, 95.]

**ADROSTRO-LABIAL**, adj. and n. A<sup>2</sup>d-ro<sup>2</sup>s/'tro-la/la<sup>2</sup>/bi<sup>2</sup>a<sup>2</sup>l. For deriv., see **ADROSTRAL** and **LABIAL**. Fr., *adrostro-labial*. Sp., *adrostro-labial*. 1. (Adj.) attached to the front part of the face and to the lip. 2. (N.) a muscle of the frog's mouth. [L, 41, 95.]

**ADROTERON** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-ro<sup>2</sup>t'e<sup>2</sup>r-o<sup>2</sup>n. Gr., *ἄδρότερον*, comp. of *ἄδρός*, thick, full. See **ALICA**.

**ADSAMAR**, n. An old name for the urine. [L, 53.]

**ADSARIA PALA**, **ADSARIA PALLA**, n. A Ceylon name for *Mucuna pruriens*. [L, 45, 105.]

**ADSCAPEAL** (Fr.), n. A<sup>2</sup>d-ska<sup>2</sup>-pa-a<sup>2</sup>l. Sp., *adscapéal*. One of the bony pieces of the internal ear. [L, 41.]

**ADSCAPULO-HUMERAL**, n. A<sup>2</sup>d-ska<sup>2</sup>p/'u<sup>2</sup>-lo-hu<sup>2</sup>/me<sup>2</sup>r-a<sup>2</sup>l. From *ad*, to, near to, *scapula*, and *humeral* (q. v.). Fr., *adscapulo-huméral*. Sp., *adscapulo-humeral*. A muscle in the arm of the salamander. [L, 41, 95.]

**ADSCAPULUM** (Lat.), n. A<sup>2</sup>d(a<sup>2</sup>d)-ska<sup>2</sup>p(ska<sup>2</sup>p)/u<sup>2</sup>(u)-lu<sup>2</sup>m(lu<sup>2</sup>m). Sp., *adscapulo*. One of the pieces of the scapula. [L, 109.]

**ADSELLARE** (Lat.), v. intr. A<sup>2</sup>d(a<sup>2</sup>d)-se<sup>2</sup>l-la(la<sup>2</sup>)/re(re). Also written *assellare*. 1. To go to stool. [L, 58.] 2. As a n., the act of defecation. [L, 53.]

**ADSCENDENT**, adj. A<sup>2</sup>d-se<sup>2</sup>n/de<sup>2</sup>nt. See **ASCENDING**.

**ADSCENSUS** (Lat.), n. A<sup>2</sup>d(a<sup>2</sup>d)-se<sup>2</sup>n(ske<sup>2</sup>n)/su<sup>2</sup>s(su<sup>2</sup>s). Gen., *adscensus*. 1. A flow of blood to the head. [L, 50.] 2. In botany, the stem of a plant. [B, 1.]

**ADSLA** (Jap.), n. The *Bignonia catalpa*. [L, 105.]

**ADSI MAMI** (Jap.), n. The *Faba vulgaris*. [L, 105.]

**ADSEPTION**, n. A<sup>2</sup>d-spe<sup>2</sup>k'shu<sup>2</sup>n. From *adspicere*, to view. See **INSPECTION**.

**ADSPERGO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-spu<sup>2</sup>r(spe<sup>2</sup>r)/go. Gen., *Adspersionis*. 1. A sprinkling with water. 2. A fine dusting powder, especially lycopodium. [L, 46, 50, 81.]

**ADSPERSIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-spu<sup>2</sup>r(spe<sup>2</sup>r)/shi<sup>2</sup>(si<sup>2</sup>)-o. Gen., *adpersio'nis*. See **ADSPERGO**.

**ADSPERSUS** (Lat.), p. p. of *adspicere*. A<sup>2</sup>s(a<sup>2</sup>s)-pu<sup>2</sup>r(pe<sup>2</sup>r)/su<sup>2</sup>s(su<sup>2</sup>s). Spotted. [L, 63.]

**ADSPIRATIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-spi<sup>2</sup>r-a(a<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *adspiratio'nis*. Aspiration, inspiration (q. v.). [J.]

**ADSTANS** (Lat.), adj. and n. A<sup>2</sup>d(a<sup>2</sup>d)/sta<sup>2</sup>nz(sta<sup>2</sup>ns). Gen., *adstantis*. From *adstare*, to stand by. 1. An accessory organ; an old term for the prostate. [L, 45.] 2. One who ministers to the sick. [L, 53.]

**ADSTITES CONGLOMERÉES** (Fr.), n. pl. A<sup>2</sup>d-stet co<sup>2</sup>n<sup>2</sup>-glo<sup>2</sup>m-a-ra. A name given by Terraneus to Cowper's glands, which he supposed he had discovered. [L, 55.]

**ADSTRICTIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-stri<sup>2</sup>k'shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *adstrictio'nis*. From *adstringere*, to draw together. Fr., *adstriction*. Ger., *Adstriction*, *Zusammenziehung*. Sp., *adstricción*. 1. The action of an astringent. [A, 300.] 2. The retention of any natural evacuation, especially constipation. [Galen. Celsus (L, 83), L, 102.] 3. In surgery, the ligation of a blood-vessel. [A, 300.] — **A. alvi**. Constipation. [L, 50.]

**ADSTRICTIO**, n. A<sup>2</sup>d-stri<sup>2</sup>k'shu<sup>2</sup>n. See **ADSTRICTIO** and **CONSTRICTION**.

**ADSTRACTORY**, adj. A<sup>2</sup>d-stri<sup>2</sup>k'to-ri<sup>2</sup>. Astringent. [L, 46, 56.]  
**ADSTRACTUS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-stri<sup>2</sup>k'tu<sup>2</sup>s(tu<sup>4</sup>s). Constricted. [L, 80.]

**ADSTRINGENS** (Lat.), adj. and n. A<sup>2</sup>d(a<sup>2</sup>d)-stri<sup>2</sup>n(stri<sup>2</sup>n)-je<sup>2</sup>nz(ge<sup>2</sup>ns). Astringent. Cf. ADSTRINGENTIA.—A. Fothergillii. Kino. [L, 45.]

**ADSTRINGENT**, adj. and n. A<sup>2</sup>d-stri<sup>2</sup>n'je<sup>2</sup>nt. See ASTRINGENT.

**ADSTRINGENTIA** (Lat.), n., n. pl. of *adstringens* (q. v.). A<sup>2</sup>d(a<sup>2</sup>d)-stri<sup>2</sup>n(stri<sup>2</sup>n)-je<sup>2</sup>n(ge<sup>2</sup>n'shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>). Astringents.

**ADSTRINGENT** (Ger.), adj. A<sup>2</sup>d-stri<sup>2</sup>n-ge<sup>2</sup>re<sup>2</sup>nd. Astringent.

**ADTERMINAL**, adj. A<sup>2</sup>d-tu<sup>2</sup>rm'i<sup>2</sup>n-a<sup>2</sup>l. From *ad*, to, and *termin*, an end. See A. CURRENT.

**ADUCA** (Sp.), n. A<sup>2</sup>-du<sup>2</sup>'ka<sup>2</sup>. A drug formerly used for venereal diseases. [L, 95.]

**ADULESCENS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>(u)-le<sup>2</sup>s'se<sup>2</sup>nz(ke<sup>2</sup>ns). See ADOLESCENS.

**ADULESCENTIA** (Lat.), n. f. A<sup>2</sup>(a<sup>2</sup>d)-u<sup>2</sup>(u)-le<sup>2</sup>s-se<sup>2</sup>n(ke<sup>2</sup>n)-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. See ADOLESCENTIA.

**ADULT**, adj. and n. A<sup>2</sup>d-u<sup>2</sup>l't. Lat., *adultus* (from *adolescere*, to come to maturity). Fr., *adulte*. Ger., *erwachsen* (adj.), *Erwachsene* (n.). It., Sp., *adulto*. 1. Adj., having reached the stage of full development (said of living organisms). 2. N., a fully developed individual. [L.] See A. TEXTURE.

**ADULTERANT**, n. A<sup>2</sup>d-u<sup>2</sup>l't-e<sup>2</sup>-ra<sup>2</sup>nt. 1. A substance with which an article is adulterated. 2. One who adulterates. [L, 46, 73.]

**ADULTERATE**, v. tr. A<sup>2</sup>d-u<sup>2</sup>l't-e<sup>2</sup>-rat. Lat., *adulterare*. Fr., *adultérer*. Ger., *verfälschen*. It., *adulterare*. Sp., *adulterar*. To debase the quality of a medicine or article of food or drink by the fraudulent admixture of foreign matter. [B.]

**ADULTERATION**, n. A<sup>2</sup>d-u<sup>2</sup>l't-e<sup>2</sup>-ra<sup>2</sup>shu<sup>2</sup>n. Lat., *adulteratio*. Fr., *adulteration*, *falsification*. Ger., *Verfälschung* (1st def.), *Verfälschtsein* (2d def.). It., *adulterazione*. Sp., *adulteración*. Syn.: *sophistication*. 1. The fraudulent addition of worthless or injurious material to a drug or an article of food or drink. 2. The state of being adulterated. [B.] 3. A substance used in adulterating.

**ADUMBA**, n. A species of fig. The fruit and bark, boiled in fish soup with cardamoms and a plant called awhintey-whinting, are used by the Ashantees to induce abortion. [Bowditch and Waring (L, 63).]

**ADUNATOS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>n(un)'a<sup>2</sup>t-o<sup>2</sup>s. Gr., *ἄδυνάτος*. See ADYNAMIC.

**ADUNCATIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>n(un)-ka(ka<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *aduncatio'nis*. From *ad*, to, and *uncus*, a hook. A hook-like curvature.—A. *unguim*. Incurvature of the nails. [G.] See ONYCHOGYPSIS.

**ADUNCIOSTRATE**, adj. A<sup>2</sup>d-u<sup>2</sup>n'si<sup>2</sup>-ro<sup>2</sup>s'trat. From *ad*, to, *uncus*, a hook, and *rostratus*, beaked. Fr., *aduncirostre*. Having a curved beak (said of birds). [L, 109.]

**ADUNCITY**, n. A<sup>2</sup>d-u<sup>2</sup>n'si<sup>2</sup>-ti<sup>2</sup>. Lat., *aduncitas*. The state of being curved like a hook. [A, 312.]

**ADUNCUS**, adj. A<sup>2</sup>d-u<sup>2</sup>n'k'u<sup>2</sup>s. Lat., *aduncus* (from *aduncatus*, hooked). Ger., *hakenförmig*, *gekrümmt*. It., Sp., *adunco*. Hooked; curved like the talons of an eagle. [B, 39; L, 46, 93, 95.]

**ADURE**, v. tr. A<sup>2</sup>d-u<sup>2</sup>r'. Lat., *adurere*. Ger., *verbrennen*. Sp., *adure*. To burn. [L, 46, 95.]

**ADURENT**, adj. A<sup>2</sup>d-u<sup>2</sup>r'e<sup>2</sup>nt. Lat., *adurens*. Ger., *aduriend*. Burning (said of the heat of fever); caustic. [L, 41, 63.]

**ADURENTIA** (Lat.), n., n. pl. of adj. *adurens*. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>(u)-re<sup>2</sup>n'shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. Ger., *adurierende Mittel*. Caustics. [L, 50.]

**ADURION** (Ar.), n. The *Rhus coriaria*. [L, 109.]

**ADUST**, **ADUSTED**, adj's. A<sup>2</sup>d-u<sup>2</sup>st'. -u<sup>2</sup>st'e<sup>2</sup>d. Lat., *adustus* (from *adurere*, to burn). Fr., *aduste*. Ger., *hitzig*. It., Sp., *adusto*. Lit., burned; hot and dry (said formerly of a condition characterized by dryness and heat of the skin, thirst, and a dark color of the blood). [L, 41, 45, 46, 53, 93, 95.]

**ADUSTIO** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>s(us)'ti<sup>2</sup>-o. Gen., *adustio'nis*. From *adurere*, to burn. See AMBUSTIO.

**ADUSTION**, n. A<sup>2</sup>d-u<sup>2</sup>st'shu<sup>2</sup>n. Lat., *adustio*. Fr., *adustion*. Ger., *Verbrennung*. It., *adustione*. Sp., *adustión*. 1. Cauterization. [L, 30.] 2. The state of being adust (q. v.). [L, 41, 45, 46.]

**ADUSTUS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>st(ust)'u<sup>2</sup>s(u<sup>4</sup>s). See ADUST.

**ADUTÉRIN** (Fr.), adj. A<sup>2</sup>d-u<sup>2</sup>-ta-ra<sup>2</sup>n<sup>2</sup>. Pertaining to the ad-uterum (q. v.). [L, 109.]

**AD-UTERUM** (Lat.), n. A<sup>2</sup>d(a<sup>2</sup>d)-u<sup>2</sup>(u)'te<sup>2</sup>-ru<sup>2</sup>m(ru<sup>4</sup>m). From *ad*, to, and *uterus*, the womb (*aditus*, *iter*, *canalis*, or some such word being understood, and the gender being determined by that word). Fr., *adutérum*. Sp., *adutero*. G. St. Hilaire's term for the oviduct in birds, or for the lower, dilated portion of it in which the egg acquires its shell. [L, 43, 95, 109.]

**ADVANCEMENT**, n. A<sup>2</sup>d-va<sup>2</sup>ns'me<sup>2</sup>nt. Old Fr., *avancement*. [A, 302.] Fr., *avancement*. Ger., *Vorlagerung*, *Vornähung*. It., *avanzamento*. Sp., *avanzamiento*. 1. An operation by which an ocular muscle is detached from its insertion, and attached at a point farther removed from its origin; the object being to give the action of the muscle increased power over the movements of the eye, for the cure of squint, usually of a parietic or paralytic nature. There are several ways of operating, but in all cases the tendon of the impaired muscle is loosened and, by means of sutures, drawn forward to a point in advance of its original insertion. Division of the opposing muscle may precede or follow the operation of a. [F.] 2. An

operation in which the same end is accomplished by shortening the muscle (or any like structure).—**Capsular a.** Fr., *avancement capsulaire*. A modified form of the operation in which the incision and the sutures involve the capsule of Tenon as well as the tendon of the muscle to be advanced, and the entire correction of the strabismus is effected by a. of this muscle without dividing the tendon of the opposing muscle. [De Wecker, "Progr. méd.," Feb. 14, 1885, p. 135.]—**A. of the round ligaments.** Fr., *raccourcissement chirurgical des ligaments ronds*. Ger., *Verkürzung der ligamenta rotunda uteri*. It., *raccorcimento dei legamenti rotondi*. Syn.: *shortening of the round ligaments*, *Alexander's* (or *Adams's*) *operation*. An operation for overcoming inveterate and troublesome backward displacements of the uterus by pulling out "the slack of the round ligaments." "The operation is performed by cutting down upon each abdominal ring, gathering up the ends of the ligaments, freeing each from its nerve, and gradually releasing them, by patient and cautious traction, from the neighboring tissues, until the position of the uterus, as ascertained by the finger in the vagina, satisfies the operator. The ligament is then stitched to the tissues around the ring." [W. Alexander, "Med. Times and Gaz.," April 1, 1882; "N. Y. Med. Jour.," xxxvi, 1882, p. 83.]

**ADVEHENS** (Lat.), adj. A<sup>2</sup>d(a<sup>2</sup>d)'ve(wa)-he<sup>2</sup>nz(he<sup>2</sup>ns). From *advehere*, to carry to. Affluent. [L, 45.]—**Venæ hepaticæ advehentes.** See *Hepatic veins*.

**ADVENTITIA** (Lat.), n., f. of adj. *adventitius* (*tunica* or *membrana* being understood). A<sup>2</sup>d(a<sup>2</sup>d)-ve<sup>2</sup>n(we<sup>2</sup>n)-ti<sup>2</sup>sh<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. Fr., *tunique adventice*. Ger., *Adventitia*. It., *membrana adventizia*. 1. The outer, or adventitious, coat of a vessel or tube, so called from its being made up of a condensation of the surrounding (and therefore foreign) areolar tissue, the fibres of which are intimately interwoven, but have a general longitudinal direction. [J, 50, 35.] 2. As sometimes used, the perineurium (q. v.). [Krause, "Arch. f. mikr. Anat.," 1881, p. 53 (J).]—**A. capillaris.** See *PERITHELIUM*.

**ADVENTITIAL**, adj. A<sup>2</sup>d-ve<sup>2</sup>n-ti<sup>2</sup>sh'a<sup>2</sup>l. See *ADVENTITIA*. —**A'scheide** (Ger.). See *PERITHELIUM*.—**A'zelle** (Ger.). See *A. CELL*.

**ADVENTITIOUS**, adj. A<sup>2</sup>d-ve<sup>2</sup>n-ti<sup>2</sup>sh'u<sup>2</sup>s. Lat., *adventitius*, *adventicius* (from *advenire*), foreign. Fr., *adventif*, *adventice*, *accidental*. Ger., *adventitiell*, *adventiv*, *zufällig*. It., *adventizio*. Sp., *adventicio*. Syn.: *advential*, *adventine*, *adventive*. 1. Out of place, occurring in an anomalous or extraordinary manner or situation. [B.] 2. Acquired, not hereditary (said of diseases). [D, 20.] See *DEMENTIA adventitia*. 3. In botany, developed in an unnatural situation (said of entire plants and of individual organs). [B.] 4. Added to anything which may already be considered complete. [J.] See *ADVENTITIA*. 5. Pertaining to an *adventitia* (q. v.). [J.]

**ADVENTIV** (Ger.), adj. A<sup>2</sup>d-fe<sup>2</sup>nt-ef. Adventitious.—**A'knospe.** See *Adventitious root*.—**A'wurzel.** See *Adventitious root*.

**ADVERSE**, adj. A<sup>2</sup>d-vu<sup>2</sup>rs'. Lat., *adversus* (from *advertere*, to turn toward). Fr., *adverse*. Sp., *adverso*. In botany, having the lower surface of the leaves turned toward the sun. [B, 7.]

**ADVERSIFOLIATE**, **ADVERSIFOLIOLUS**, adj's. A<sup>2</sup>d-vu<sup>2</sup>rs-si<sup>2</sup>-fo'li<sup>2</sup>-at, -u<sup>2</sup>s. From *adversus* (see *ADVERSE*), and *folium*, a leaf. In botany, having the leaves opposite. [B, 39.]

**ADVOCATENBAUM**, **ADVOGATOBAUM**, **ADVOGATOLORBEER** (Ger.), n's. A<sup>2</sup>d-fo-ka<sup>2</sup>'te<sup>2</sup>n-ba<sup>2</sup>-um, -ga<sup>2</sup>'to-ba<sup>2</sup>-um, -lo<sup>2</sup>r-bar. See *AVOGATOBAUM*.

**ADY**, n. The *Palma ady*; a species of palm growing on the island of St. Thomas, furnishing the fruit called *abanga* (q. v.). [B, 38, 44.] An oil extracted from the kernels of the fruit is used as butter. [L, 63.]

**ADYAO**, n. A verbenaceous shrub, of the genus *Premna*, used locally for headache, colic, and ulcers. [L, 63.]

**ADYNAMIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-i<sup>2</sup>n(u<sup>2</sup>n)-a<sup>2</sup>m(a<sup>2</sup>m)'i<sup>2</sup>-a<sup>2</sup>. Gr., *ἀδυναμία* (from *a priv.*, and *δύναμις*, power). Fr., *adynamie*. Ger., *Adynamie*, *Kraftlosigkeit*. It., Sp., *adynamia*. A temporary but decided impairment of the bodily and mental powers, especially such as occurs in the course of an essential fever. [A, 321.] In Cullen's nosology, the *adynamia* were the second order of diseases of the class *neuroses*, embracing syncope, dyspepsia, hypochondriasis, and chlorosis. [L, 84.]—**A. uteri.** See *ATONY of the uterus*. —**A. virilis.** See *IMPOTENCE*.

**ADYNAMIC**, adj. A<sup>2</sup>d-i<sup>2</sup>n-a<sup>2</sup>m'i<sup>2</sup>q. Lat., *adynamicus*, *adynamicus*. Fr., *adynamique*. Ger., *adynamisch*. It., *adimamico*. Sp., *adimamico*. Pertaining to *adynamia*.—**A. fever.** See *Typhoid fever*.

**ADYNAMICO-ATAXIC**, adj. A<sup>2</sup>d-i<sup>2</sup>n-a<sup>2</sup>m'i<sup>2</sup>q-k-o-a<sup>2</sup>-t-a<sup>2</sup>x'i<sup>2</sup>q. Lat., *adynamico-ataxicus*, *adynamico-atacticus*. Fr., *adynamico-ataxique*. Ger., *adynamisch-ataktisch*. Sp., *adimamico-atáxico*. Having the characteristics of *adynamia* and those of *ataxia*. [L, 41.]

**ADYNAMON**, **ADYNAMUM** (Lat.), n's, n. of adj. *adynamos*, or *adynamus* (*vinum* understood). A<sup>2</sup>d(a<sup>2</sup>d)-i<sup>2</sup>n(u<sup>2</sup>n)-a<sup>2</sup>-mo<sup>2</sup>n, -mu<sup>2</sup>m(mu<sup>4</sup>m). Gr., *ἀδύναμον*. An ancient weakened wine, made by evaporating a mixture of 2 parts of must and 1 part of water until only two thirds of the whole remained. [L, 104.]

**ADYNAMY**, n. A<sup>2</sup>d-i<sup>2</sup>n-a<sup>2</sup>m-i<sup>2</sup>. See *ADYNAMIA*.

**ADYNASIA**, **ADYNATIA** (Lat.), n's f. A<sup>2</sup>d(a<sup>2</sup>d)-i<sup>2</sup>n(u<sup>2</sup>n)-a<sup>2</sup>(a<sup>2</sup>)/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>2</sup>, -shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. See *ADYNAMIA*.

**ADYNATOCOMIUM** (Lat.), n. n. A<sup>2</sup>d(a<sup>2</sup>d)-i<sup>2</sup>n(u<sup>2</sup>n)'a<sup>2</sup>-to-ko'-mi<sup>2</sup>-u<sup>2</sup>m(u<sup>4</sup>m). From *adynatos*, a sick person, and *κομῆν*, to take care of. A hospital. [L, 50.]

**ADYNATOCRASIA** (Lat.), n. f. A<sup>2</sup>d(a<sup>2</sup>d)-i<sup>2</sup>n(u<sup>2</sup>n)'a<sup>2</sup>-to-kras'i<sup>2</sup>(zi<sup>2</sup>)(si<sup>2</sup>)-a<sup>2</sup>. From *adynatos*, weak, and *κράσις*, a mixing. Ger., *Adynatokrasie*. Barthels's term for an unnatural laxity of the organic parts. [L, 50.]

**ADYNATODOCHIUM** (Lat.), n. n.  $\Lambda^2d(a^3d-i^2n(u^6n)/a^3$ -to-do $^2ki^2(ch^2i^2-u^3m(u^4m))$ . From *adynaros*, a sick person, and *δοχῆ*, entertainment. See **ADYNATOCOMIUM**.

**ADYNATOS**, **ADYNATUS** (Lat.), adj's.  $\Lambda^2d(a^3d-i^2n(u^6n)/a^3$ -to $^2s$ , -tu $^3s(tu^4s)$ . Unhealthy, sickly; as a n., an invalid. [L, 50.]

**ADYSETON**, **ADYSETUM** (Lat.), n. n.  $\Lambda^2d(a^3d-i^2s(u^4s)-e(a)^$ -to $^2n$ , -tu $^3m(tu^4m)$ . A section of the botanical genus *Alyssum*. [L, 30, 41.]

**ÆCIDIACEI** (Lat.), n. m. pl.  $E^2(a^3-e^2)-si^2d(ki^2d)-i^2-a(a^3)$ -s-(ke $^2$ )-i(e). In the old classifications of *Fungi*, a division of the *Contomyces*, including those that are parasite upon plants and contain a distinct cellular peridium. They comprise the genera *Æcidium*, *Peridermium*, *Ræstelia*, etc. [B, 61.]

**ÆCIDIOLUM** (Lat.), n. n.  $E^2(a^3-e^2)-si^2d(ki^2d)-i(e)^o$ -lu $^3m(lu^4m)$ . A supposed genus of *Fungi* the members of which are now known to be only the spermogones of other genera. [B, 76.]

**ÆCIDIOMYCETES** (Lat.), n. m. pl.  $E^2(a^3-e^2)-si^2d(ki^2d)-i^2-o$ -mi-(mu $^4$ )-se(ka) $^2$ -(te $^2$ s). From *aiçia*, a wheal, and *μύκης*, a fungus. A collective name for the *Uredineæ* and the *Ustilagineæ*. [B, 49.]

**ÆCIDIOSPORE**, n.  $E^2s-i^2d/i^2$ -o-spor. For deriv., see **ÆCIDIUM** and **SPORE**. One of the conidia, or rounded spores, developed in the æcidium stage of *Fungi* of the order *Uredineæ*. [B.] See **ÆCIDIUM**.

**ÆCIDIUM** (Lat.), n. n.  $E^2(a^3-e^2)-si^2d(ki^2d)/i^2-n^3m(u^4m)$ . From *aiçia*, a blow with a whip. Ger., *Kelchbrand* (2d def.). 1. A wheal. [L, 46, 73.] 2. In botany, a name formerly given to a number of *Fungi*, supposed to constitute a distinct genus, distinguished by the globose shape of the spores, which are arranged in little fragile necklaces radiating from a thin cellular base. The forms grouped under this head are now known to be merely stages in the development of certain *Carposporeæ* (*Fungi*) belonging to the order *Uredineæ*. The latter, at a certain period of their development (called the æcidium stage), form globular masses beneath the epidermis of various plants. These masses consist of an agglomeration of rounded yellowish cells, called æcidiospores, surrounded by a cellular investment called the peridium. By the rupture of the latter the æcidiospores are set free and subsequently develop into a new individual, which then usually passes into what is called the uredo stage. [B, 19, 73.] See **UREDIO**.—*Æ. berberidis* [Persoon]. Barberry rust (or cluster-cup); the æ. stage of *Puccinia graminis*, formerly thought to constitute a distinct species of fungus. It forms bright-red rounded spots on the leaves and fruit of the barberry (*Berberis vulgaris*), containing orange-colored æcidiospores, which subsequently develop on wheat, oats, and other cereals, constituting the so-called red rust and black rust. [B, 19, 35, 54, 73, 76.] See **PUCGINIA graminis**.

**ÆCKER** (Ger.), adj.  $A^1ke^2r$ . See **AGRESTIS**.

**ÆDEPSOS**, **ÆDEPSUS** (Lat.), n's m.  $E(a^3-e^2)-de^2p^2so^2s$ , -su $^2s(su^4s)$ . See **DIPSO**.

**ÆDERCHEN** (Ger.), n.  $A^1de^2r$ -ch $^2e^2n$ . An arteriole. [L, 80.]

**ÆDERIG** (Ger.), adj.  $A^1de^2r$ -i $^2g$ . Venous. [L, 59.]

**ÆDES** (Lat.), n. f.  $A(a^3)-e(a)^o$ -dez(de $^2s$ ). Gen., *ædeos*. From *ἀδής*, unpleasant. That which is unpleasant to the taste. [L, 53.]

**ÆODES** (Lat.), adj.  $E^2d(a^3-e^2d)-o^o$ -dez(de $^2s$ ). See **ÆDEODES**.

**ÆDEA** (Lat.), n. n. pl.  $E^2d(a^3-e^2d)-e(o)^o/a^3$ . Gr., *αιδοία*. Ger., *Aedöa*. The genitals. [L, 50.]

**ÆDEAGRA** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -a $^2g(a^3g)$ -ra $^2$ . For deriv., see **ÆDEA** and **AGRA**. *Æedögra*. Pain in the genitals. [L, 30, 50.]

**ÆDEAGRAPHY**, n.  $E^2d-e-a^2g^2ra^2f-i^2$ . See **ÆDEOGRAPHY**.

**ÆDEALOGY**, n.  $E^2d-e-a^2/o$ -j $^2$ . See **ÆDEOLOGY**.

**ÆDEATOMY**, n.  $E^2d-e-a^2/o$ -mi $^2$ . See **ÆDEATOMY**.

**ÆDEAUXE** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -a $^2x(a^3ux)$ -e(a). Gen., *ædeauxes*. From *aiçia*, the genitals, and *αὔξω*, growth, increase. Swelling of the genitals. [L, 50.]

**ÆDEBLENNORRHÉE** (Fr.), n.  $A$ -da-bla $^3n$ -no-ra. See **ÆDGOBLENNORRHŒA**.

**ÆDECI** (Lat.), n. m. pl.  $E^2d(a^3-e^2d)-e(o)^o/si(ke)$ . From *αιδοικός*, belonging to the genitals. See **ÆDEA**.

**ÆDECRYSIPELAS** (Lat.), n. u.  $E^2d(a^3-e^2d)/e(o)^o$ -e $^2$ -ri $^2$ (ru $^4$ )-si $^2p^2e^1$ -a $^2s(a^3s)$ . Gen., *ædecrysipelatos*. Erysipelas of the genitals. [L, 50.]

**ÆDEICUS** (Lat.), adj.  $E^2d(a^3-e^2d)-e(o)^o/i^2k-u^3s(u^4s)$ . Gr., *αιδοικός*. Pertaining to the genitals. [L, 50.]

**ÆDEITIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -i(e) $^o$ -ti $^2s$ . Gen., *ædeitidis*. For deriv., see **ÆDEA** and **-itis**. Fr., *ædeite*. Inflammation of the genitals. [L, 49, 50.]—*Æ. gangrenosa*. Gangrenous inflammation of the genitals. [L, 63.]—*Æ. gangrenosa puellarum*. The same in young girls. [L, 63.] See **NOMA**.—*Æ. puerperarum*. Inflammation of the genitals in puerperal women. [L, 63.]

**ÆDEITITIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -i $^2$ -t(i) $^o$ -ti $^2s$ . See **ÆDEITIS**.

**ÆDEMANIA** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -e $^2$ -ma(ma $^3$ )/ni $^2$ -a $^3$ . For deriv., see **ÆDEA** and **MANIA**. Nymphomania (q. v.). [L, 45.]

**ÆDEOAGRA** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -e $^2$ -o(o) $^2$ -a $^2g(a^3g)$ -ra $^2$ . See **ÆDEAGRA**.

**ÆDEOBLENNORRHŒA** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -hle $^2n$ -no $^2r$ -re(ro $^4$ ) $^2$ -a $^3$ . For deriv., see **ÆDEA** and **BLENNORRHŒA**. Fr., *ædöblennorrhée*. Ger., *Aedöblennorrhöe*. Blennorrhoea of the genital mucous membrane. [L, 50, 55.]—*Æ. feminarum*. Leucorrhoea. [L, 45.]

**ÆDEODES** (Lat.), adj.  $E^2d(a^3-e^2d)-e(o)^o$ -c $^2$ -dez(de $^2s$ ). From *aiçia*, the genitals, and *είδος*, shape. Pertaining to the genitals. [L, 50.]

**ÆDEODYNIA** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -di $^2n$ (du $^6n$ )/i $^2$ -a $^3$ . For deriv., see **ÆDEA** and **-odyn**. Fr., *ædodynie*. Ger., *Aedöodynie*. Sp., *æeodinia*. Pain in the genitals. [L, 30, 43, 50, 70.]

**ÆDEOGARGALICUS** (Lat.), adj.  $E^2d(a^3-e^2d)-e(o)^o$ -o-ga $^3r$ -ga $^2l(ga^3l)/i^2k-u^3s(u^4s)$ . From *aiçia*, the genitals, and *γαργαλίζειν*, to tickle. Pertaining to masturbation. [L, 50.]

**ÆDEOGARGALISMUS** (Lat.), n. m.  $E^2d(a^3-e^2d)-e(o)^o$ -o-ga $^3r$ -ga $^2l(ga^3l)/i^2z(i^2s)/mu^3s(mu^4s)$ . From *aiçia*, the genitals, and *γαργαλισμός*, a tickling. 1. Masturbation. 2. Nymphomania. [L, 30.]

**ÆDEOGARGALUS**, **ÆDEOGARGARISMUS** (Lat.), n's m.  $E^2d(a^3-e^2d)-e(o)^o$ -o-ga $^3r$ -ga $^2l(ga^3l)-u^3s(u^4s)$ , -ga $^3r$ -ga $^3r$ -i $^2z(i^2s)/mu^3s(mu^4s)$ . See **ÆDEOGARGALISMUS**.

**ÆDEOGRAPHY**, n.  $E^2d-e-o^2g^2ra^2f-i^2$ . For deriv., see **ÆDEA** and **-graphy**. Lat., *ædeographia*. Fr., *ædeographie*. A description of the genital organs. [L, 41.]

**ÆDEOIDES** (Lat.), adj.  $E^2d(a^3-e^2d)-e(o)^o$ -i(e) $^o$ -dez(de $^2s$ ). See **ÆDEODES**.

**ÆDEOTIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -i(e) $^o$ -ti $^2s$ . See **ÆDEOTIS**.

**ÆDEOLOGY**, n.  $E^2d-e-o^2l/o$ -j $^2$ . See **-logy**. Lat., *ædeologia*. Fr., *ædeologie*. The anatomy, physiology, etc., of the genital organs. [L, 50.]

**ÆDEOMYCODERMA**, **ÆDEOMYCODERMIS** (Lat.), n's n. and f.  $E^2d(a^3-e^2d)-e(o)^o$ -mi(mu $^4$ )-ko-du $^2r$ (de $^2r$ )/ma $^3$ , -mi $^3s$ . Gen., *ædeomycodermatos*, -derm $^2$ id $^2$ . For deriv., see **ÆDEA** and **MYCODERMA**. The genital mucous membrane. [L, 50.]

**ÆDEOMYCODERMITIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -mi(mu $^4$ )-ko-du $^2r$ (de $^2r$ )/mi $^3$ -i(e) $^o$ -ti $^2s$ . Gen., *ædeomycodermatitis*. Fr., *ædeomycodermite*. Inflammation of the genital mucous membrane. [L, 50.]

**ÆDEON** (Lat.), n. n.  $E^2d(a^3-e^2d)-e(o)^o$ -o $^2n$ . Gr., *αιδοιον*. The pudendum. [L, 50.] See **ÆDEA**.

**ÆDEOPALMUS** (Lat.), n. m.  $E^2d(a^3-e^2d)-e(o)^o$ -o-pa $^2l(pa^3l)/mu^3s(mu^4s)$ . Gr., *αιδοίοπαλμος* (from *aiçia*, the genitals, and *παλμός*, a throbbing). Ger., *Klopfen der Schamtheile*. A word supposed by Kraus to mean morbid palpitation or throbbing of the genitals. [L, 50.]

**ÆDEOPSIA**, **ÆDEOPSIS** (Lat.), n's f.  $E^2d(a^3-e^2d)-e(o)^o$ -p $^2$ -si $^2$ -a $^3$ , -si $^2s$ . Gen., *ædeop $^2$ sie(-seos)*. From *aiçia*, the genitals, and *ὄψις*, sight. See **ÆDEOSCOPY**.

**ÆDEOPSOPHESIS**, **ÆDEOPSOPHIA** (Lat.), n's f.  $E^2d(a^3-e^2d)-e(o)^o$ -p $^2$ -so-fe(fa) $^2$ /si $^2s$ , -p $^2$ -fi $^2$ -a $^3$ . Gen., *ædeopsophes $^2$ ios*, *ædeopsophia*. From *aiçia*, the genitals, and *ψόφος* (from *ψοφαίνω*, to make a noise). Fr., *ædeopsophie*. See **PHYSOMETRA** and *Cunni GARRULITAS*.—*Æ. uterina*. See **PHYSOMETRA** and *Cunni GARRULITAS*.

**ÆDEOPTOSIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -o-p $^2$ -to $^2$ -si $^2s$ . Gen., *ædeopto $^2$ seos*. From *aiçia*, the genitals, and *πτωσις*, a falling. Lit., a falling of the genitals, but applied also to the bladder. [L, 45.]—*Æ. uteri*. Prolapse of the uterus. [L, 45.]—*Æ. uteri inversa*. Inversion of the uterus. [L, 45.]—*Æ. uteri retroversa*. Retroversion of the uterus. [L, 45.]—*Æ. vaginæ*. Prolapse of the vagina. [L, 45.]—*Æ. vesicæ*. Prolapse of the bladder. [L, 45.]

**ÆDEORRHAPHIE**, **ÆDEORRHAPHIA** (Lat.), n's f.  $E^2d(a^3-e^2d)-e(o)^o$ -o-r $^2$ -ra(r $^2$ )/fe(fa) $^2$ , -ra(r $^2$ )/fi $^2$ -a $^3$ . Gen., *ædeor $^2$ rhap $^2$ hes(-rhap $^2$ h $^2$ æ)*. From *aiçia*, the genitals, and *ῥαφή*, a suture. Ger., *Schamnaht*. See **EPISORRHAPHY**.

**ÆDEOS** (Lat.), adj.  $E^2d(a^3-e^2d)-e(o)^o$ -o $^2s$ . Gr., *αιδοίος*. See **PUBIC**.

**ÆDEOSCOPY**, n.  $E^2d-e-o^2s$ -ko $^2$ -pi $^2$ . Lat., *ædeoscopia* (from *aiçia*, the genitals, and *σκοπεῖν*, to look at). Fr., *ædeoscopie*. Ger., *Ædeoskopie*. A physical examination of the genital organs. [L, 30, 50, 55.]

**ÆDEOTITIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-e(o)^o$ -o-ti(te) $^o$ -ti $^2s$ . Gen., *ædeotitidis*. See **ÆDEOTIS**.

**ÆDEOTOMY**, n.  $E^2d-e-o^2t/o$ -mi $^2$ . Lat., *ædeotomia* (from *aiçia*, the genitals, and *τέμνω*, to cut). Fr., *ædeotomie*. Ger., *Aedöotomie*. The dissection of the genital organs, or a cutting operation practised upon them. [E; L, 30, 41, 55.]

**ÆDEPALMUS** (Lat.), n. m.  $E^2d(a^3-e^2d)-e(o)^o$ -o-pa $^2l(pa^3l)/mu^3s(mu^4s)$ . See **ÆDEOPALMUS**.

**ÆDESCOPY**, n.  $E^2d-e-o^2s$ -ko $^2$ -pi $^2$ . See **ÆDEOSCOPY**.

**ÆDOIA** (Lat.), n. f.  $E^2d(a^3-e^2d)-oi$ -a $^3$ . For this and other words beginning with *ædoi*, see the corresponding words in *æde*.

**ÆDOPTOSIS** (Lat.), n. f.  $E^2d(a^3-e^2d)-o^2p$ -to $^2$ -si $^2s$ . See **ÆDEOPTOSIS**.

**ÆDOS** (Lat.), n. m.  $E/(a^3e^2)$ -do $^2s$ . See **ÆDEON**.

**ÆDOSOPHIA** (Lat.), n. f.  $E^2d(a^3-e^2d)-o$ -so-fi $^2$ -a $^3$ . See **ÆDEOPSOPHESIS**.

**ÆGAGROPILUS** (Lat.), n. m.  $E^2g(a^3-e^2g)-a^2g(a^3g)$ -ro-pi(pe) $^2$ -lu $^3s(lu^4s)$ . From *αἰγάρος*, the wild goat, and *πίλος*, a felted mass. Fr., *ægagropile*. Ger., *Ægagropilus*. The ball of felted hairs sometimes found in the stomach of ruminants. [L, 41.]

**ÆGALE SEPIARIA** (Lat.), n. f.  $E^2g(a^3-e^2g)-a^2l(a^3l)-e(a)$ . A laxative durantiaceous plant found in Japan. [Waring [L, 63].]

**ÆGEIRINON** (Lat.), n. n.  $E^2j(a^3-e^2g)-i(a)^o$ -ri $^2n$ -o $^2n$ . See **ÆGEIRINON**.

**ÆGEIROS** (Lat.), n. f.  $E^2j(a^3-e^2g)-i(a)^o$ -ro $^2s$ . Gr., *αἰγερος*. The black poplar. [A, 248.] See **POPULUS nigra**.

**ÆGERITEI** (Lat.), n. m. pl.  $E^2j(a^3-e^2g)-e^2$ -ri $^2$ -t(e $^2$ )-i(e). Fr., *ægértes*. In the old classifications of *Fungi*, a tribe of the *Gasteromycetes*, sub-order *Trichodermacei*. [B, 48.]

**ÆGERTLING** (Ger.), n. A'ge'rt-li'ng. A mushroom, or agaric. [L, 30.]

**ÆGIAS** (Lat.), n. f. E'(a³-e²)-ji²(gi²)-a²s(a³s). Gen., *ægi'ados*. Gr., *αἰγιάς*. An ancient term for a spot or speck on the eye. [Hippocrates (A, 311).]

**ÆGICERACEÆ** (Lat.), n. f. pl. E²j(a³-e²g)-i²-se²(ke²)-ra(ra³)-se²(ke²)-e(a³-e²). A natural order of plants, established by Blume, consisting of the single genus *Ægiceras*, which is included by most writers in the order *Myrsinaceæ*. [B, 19.] It is distinguished from the latter by the seeds being exalbuminous. [B, 7.]

**ÆGICERAS** (Lat.), n. n. E²j(a³-e²g)-i²-se²(ke²)-ra²s(ra³s). Gen., *ægicer'atos*. From *aiḡ* (gen., *αἰγός*), a goat, and *κέρας*, a horn. Fr., *ægicère*. A genus of trees, of the natural order *Myrsinaceæ* (or of the *Ægicereaceæ* according to Blume), growing in tropical India and Australia. [B, 7, 19.]

**ÆGIDION** (Lat.), n. n. E²g(a³-e²g)-i²d'i²-o²n. Gr., *αἰγίδιον* (dim. of *aiḡ*, a goat). The name of an ancient collyrium, said to have been so called on account of the prevalence of eye troubles in goats. [L, 53, 104.]

**ÆGILOPICAL**, adj. E²j-i²l-o²p'i²k-a²l. Pertaining to or affected with *ægilops* (q. v.). [L, 46.]

**ÆGILOPINÉ** (Fr.), adj. A-zhil-o-pe-na. Resembling the botanical genus *Ægilops*. [L, 109.]

**ÆGILOPINÉÆ** (Lat.), n. f. pl. E²j(a³-e²g)-i²l-o²-pi²n'e²-e(a³-e²). Fr., *ægilopinées*. A tribe of gramineous plants, the sole genus of which is the *Ægilops*. [L, 41.]

**ÆGILOPIUM** (Lat.), n. n. E²j(a³-e²g)-i²l-o²-pi²-u²m(u²m). See *Ægilops*.

**ÆGILOPS** (Lat.), n. f. E²j(a³-e²g)-i²l-o²ps. Gen., *ægilo'pos* (-pis). Gr., *αἰγίλωψ* (from *aiḡ*, a goat, and *ωψ*, the eye). Fr., *égilops* (1st def.), *égilope* (2d def.). Ger., *Ziegenauge* (1st def.), *Hasengras* (2d def.). 1. An old term for a lachrymal abscess that has opened externally. [F, L, 43.] 2. Hard-grass; a genus of grasses allied to wheat, supposed by some to be the original from which the latter has been developed. [B, 19; L, 46.]

**ÆGINETIA** (Lat.), n. f. E²j(a³-e²g)-i²n-e(a³)-shi²(ti²)-a³. Fr., *æginétie*. A genus of orobanchaceous plants, named in honor of Paulus Æginetus. [B, 19; L, 41, 73.]—*Æ. indica*. Prepared with sugar and nutmeg, this species is used in Malabar as an antiscorbutic, under the name of *isjem-cumula*. [B, 19; A. A. Black (L, 67), L, 105.]

**ÆGINIDÆ** (Lat.), n. f. pl. E²j(a³-e²g)-i²n'i²d-e(a³-e²). A family of *Hydrozoa*, of the order *Narcomedusæ*. [E. R. Lankester (B, 77).]

**ÆGIPHILA** (Lat.), n. f. E²j(a³-e²g)-i²f'i²l-a³. From *aiḡ*, a goat, and *φίλος*, fond of. Fr., *ægiphile*, *bois de Cabri*. Ger., *Ziegenstrauch*. A genus of South American verbenaceous plants; the leaves are applied to the bites of poisonous serpents. [A, 315; L, 41.]

**ÆGIPHILEÆ** (Lat.), n. f. pl. E²j(a³-e²g)-i²f'i²l-e²-e(a³-e²). Fr., *ægiphilées*. Ger., *Ziegenbäumchen*. A sub-order of verbenaceous plants. [L, 41, 64.]

**ÆGIRINON** (Lat.), n. n. E²j(a³-e²g)-i²r'i²n-o²n. Gr., *αἰγείρινον* (from *αἰγίρος*, the black poplar). An ancient ointment made from the fruit or flower of the poplar. [L, 53, 104.]

**ÆGIS** (Lat.), n. f. E'(a³-e²)-ji²s(gi²s). Gen., *æ'gidis*. See *ÆGIAS*.

**ÆGLE** (Lat.), n. f. E'(a³-e²)-gle(gla). Gen., *æg'les*. From *αἴγλη*, one of the Hesperides. A genus of plants of the sub-order *Auranticeæ*, of the order *Rutaceæ*; distinguished from the genus *Citrus* by its many discrete stamens. [B, 7, 19.]—*Æ. marmelos* [Correa]. Ger., *Schleimapfelbaum*. Syn.: *Cratæva marmelos* [Linnaeus] (see *religiosa* [Ainslie]). An East Indian species, bearing the fruit known as *bhel*, *bael*, or Bengal quince. [B, 33; L, 65, 110.] See *BELÆ fructus*.

**ÆGLIA** [Lat.], n. f. E²g(a³-e²g)-li²-a³. See *ÆGIAS*.

**ÆGEBRONCHOPHONY**, n. E'go-bro²n²-ko²f'o-ni². Lat., *ægobronchophonia* (from *aiḡ*, a goat, *βρόγχια*, the bronchial tubes, and *φωνή*, the sound of the voice). See *ÆGOPHONY*.

**ÆGOCERAS** (Lat.), n. n. E²g(a³-e²g)-o²s(o²k)e²r-a²s(a³s). Gen., *ægocer'atos*. Gr., *αἰγοκέρας* (from *aiḡ*, a goat, and *κέρας*, a horn). Ger., *Ziegenhorn*, *griechische Heu*. Syn.: *fœnum græcum* [Galen (A, 311)]. The common fenugreek (*Trigonella fœnum græcum*). [A, 248; L, 50.]

**ÆGOLETHRON**, **ÆGOLETHROS** (Lat.), n's n. and m. E²g(a³-e²g)-o²l'e²th-ro²n, -ro²s. Gr., *αἰγόλεθρον*, *αἰγόλεθρος* (from *aiḡ*, a goat, and *δαίρος*, death). Fr., *ægolethron*. Ger., *Ziegenotd*, *Ziegenpest*. Goat's-bane; an old term for the *Azalea pontica* and the *Ranunculus flammula*. [A, 248, 311; L, 50, 103.]

**ÆGONICHON** (Lat.), n. n. E²g(a³-e²g)-o²n'i²k(i²ch²)-o²n. From *aiḡ*, a goat, and *ὄνυξ*, a hoof. The *Lithospermum officinale*. [L, 58, 109.]

**ÆGONY**, n. E²g'o-ni². Lat., *ægonia*. See *ÆGOPHONY*.

**ÆGONYCHON** (Lat.), n. n. E²g(a³-e²g)-o²n'i²k(u²ch²)-o²n. See *ÆGONICHON*.

**ÆGOOR**, n. A bitter, astringent substance used in India as an antidote to poisons. [L, 63.]

**ÆGOPHONIC**, adj. E²g-o-f'o²n'i²k. Lat., *ægophoniceus*. Fr., *ægophonique*. Ger., *ægophonisch*. Pertaining to *ægophony*. [L, 109.]

**ÆGOPHONY**, n. E-go²f'o-ni². Lat., *ægophonia* (from *aiḡ*, a goat, and *φωνή*, the sound of the voice). Fr., *ægophonie*, *voix de chèvre* (ou de polichinelle) [Laennec]. Ger., *ægophonie*, *Meckerton*. It., Sp., *ægofonia*. A morbid modification of the sound of the voice as heard on auscultation, of a tremulous character supposed to resemble that of the bleating of a goat; heard in cases of pleu-

risy with effusion and in certain cases of pneumonia complicated with pleurisy. Some writers distinguish *ægony* (*ægobronchophony*) as intermediate between *æ* and *bronchophony* (q. v.). [A, 314, 321, 322; D, 26; L, 50.]

**ÆGOPIDIUM** (Lat.), n. n. E²g(a³-e²g)-o-po²di²-u²m(u²m). From *aiḡ*, a goat, and *πῶδιον*, dim. of *πούς*, a foot. Fr., *ægopode*, *herbe aux goutteux*. Gout-weed; a genus of umbelliferous plants. [L, 37, 41, 63, 103.]—*Æ. podagraria*. Fr., *boucage*. Ger., *Geissfuss*. Syn.: *Ligusticum podagraria*. The common gout-weed, gout-wort, ash-weed, herb-Gerard, or English masterwort. [L, 67, 105, 110.]

**ÆGOPROSOPHON**, **ÆGOPROSOPON** (Lat.), n's n. E²g(a³-e²g)-o-pro-so²fo²n, -so²po²n. From *αἰγοπρόσωπος*, goat-faced. See *ÆGIDION*.

**ÆGOTOXICUM** (Lat.), n. n. E²g(a³-e²g)-o-to²x'i²k-u²m(u²m). From *aiḡ*, a goat, and *τοξικόν*, a poison. A genus of euphorbiaceous (or, as recently classed, monimaceae) plants. [Black (L, 67).]

**ÆGRIPPA** (Lat.), n. m. E²g(a³-e²g)-ri²p'pa³. See *AGRIPPA*.

**ÆGRITUDO** (Lat.), n. f. E²g(a³-e²g)-ri²-tu²(tu²)do. Gen., *ægri-tu'dinis*. Sickness, whether bodily or mental. [A, 312; L, 58.]—*Æ. bovina*. A disease of cattle, most common in Arabia, due to the lodgment of a worm (supposed by some to be a *Dracunculus*) under the skin. [L, 104.]—*Æ. ventriculi*. Nausea. [L, 83.]

**ÆGROTAT**, n. E-gro²ta²t. Third pers. sing. pres. indic. of the verb *ægrotare*, meaning *he is sick*; the name applied in the English universities to a medical certificate setting forth that a student is sick and unable to pursue his studies. [L, 56.]

**ÆGROTATIO** (Lat.), n. f. E²g(a³-e²g)-ro²-ta²(shi²)(ti²)-o. Gen., *ægrotatio'nis*. From *ægrotare*, to be sick. Sickness. [L, 58.]

**ÆGROTUS** (Lat.), adj. E²g(a³-e²g)-ro²-tu²s(tu²s). Sick, diseased. [L, 58.]

**ÆGYLOPS** (Lat.), n. f. E²g(a³-e²g)-i²l(u²l)-o²ps. See *ÆGILOPS*.

**ÆGYPTENKRAUT** (Ger.), n. A-gu²pt'e²n-kra²t. See *The Melilotus cœrulea*. [A, 305.]

**ÆGYPTIA** (Lat.), n. n., pl. of *ægypitia*. E(a³-e²)-ji²p(gu²p)-shi²(ti²)-a³. See *ÆGYPTIACUM*.

**ÆGYPTIACUM** (Lat.), n. n. E(a³-e²)-ji²p(gu²p)-ti²(e²)-a³-ku²m(ku²m). Gr., *αἰγυπτιακόν*. Fr., *ægypitiac*. Ger., *ægypische Mittel*. An ancient term for a number of pharmaceutical preparations, chiefly preparations of copper and other detergents and styptics, especially the *unguentum æ*. (Fr., *onguent égyptiac*; Ger., *ægypische Salbe*, *ægypischer Honig*.) [A, 305, 322, 323, 325; L, 43.] See *Oxyzel ægypitiac*.

**ÆGYPTION** (Lat.), n. n. E(a³-e²)-ji²p(gu²p)-shi²(ti²)-o²n. See *ÆGYPTIACUM*.

**ÆHAL**, **ÆHALAGUAS**, n's. Ceylon names for the *Cassia fistula*. [L, 105.]

**ÆHATSWEIDE** (Ger.), n. A-ha²ts-vi-de². The *Salix viminalis*. [D.]

**ÆHNLICHKEIT** (Ger.), n. An'li²ch²-kit. Similitude, analogy, affinity. [L, 46, 80.]—*A'smittelpunkt*. See *CENTRE of similitude*.

**ÆHNLICHMACHUNG** (Ger.), n. An'li²ch²-ma²ch²-ung. Assimilation. [A, 305.]

**ÆHRCHEN** (Ger.), n. Ar'ch²e²n. A spikelet. [B.]

**ÆHRE** (Ger.), n. Ar'e². An ear of corn; in botany, a spike. [B.]—*Æn-Ehrenkraut*. The *Veronica spicata*. [L, 88.]—*Æn-farren*. 1. A species of fern. See *STACHIOPTERIS*. 2. The *Lycopodium clavatum*. 3. The *Ophioglossum vulgatum*. [A, 315.]—*Ænförmig*. In the form of ears or spikes; spiked. [A, 305; L, 43.]—*Ænhabend*. Spiked. [A, 305.]—*Ænfrucht*. Grain. [L, 46.]—*Ænreih*. Spicate, abounding in spikes. [A, 305; L, 46.]—*Ænspitze*. See *AWN*. The *Lythrum salicaria*. [A, 315.]

**ÆICHRYSON** (Lat.), n. n. A(a³)-i(a³)-kri(kru²)so²n. A crasulaceous plant; emetic, cathartic, and vesicant. [L, 104.]

**ÆIDES** (Lat.), adj. A(a³)-i(a³)-dez(de²s). Gr., *αἰεῖδης*. Deformed. [L, 63.]

**ÆIDIA** (Lat.), n. f. A(a³)-i'(e²i²)-di²-a³. Gr., *αἰδία*. A deformity.

**ÆIGLEUCES**, **ÆIGLUCES**, **ÆIGLUCIS** (Lat.), n's n. A(a³)-i(e²-i²)-glu²ses(ke²s), -glu²(glu²)ses(ke²s), -sis. Gr., *αἰγλευκές* (from *αἰε*, always, and *γλευκος*, must). Ancient names for a kind of sweet wine. [L, 53.]

**ÆIPATHIA** (Lat.), n. f. A(a³)-i(a³)-pa²th(pa³th)i²-a³. Gr., *αἰπαθία* (from *αἰπαθής*, ever-suffering). 1. Relative health (according to an old doctrine that there never could be perfect health, inasmuch as the germs of disease were constantly present in the system). [Galen (A, 322).] 2. Enduring (incurable) disease; a state of constant suffering. [A, 322.]

**ÆITHALIS** (Lat.), n. f. A(a³)-i(a³)tha²l(thai²)-i²s. From *αἰθαλής*, evergreen. An old name for the *Sedum majus* (q. v.). [L, 97.]

**ÆIZOON** (Lat.), n. n. A(a³)-i(a³)-zo²o²n. Gr., *αἰζών*. See *SEMPERVIVUM*.

**ÆISPHACOS**, n. An Arabian name for the *Salvia officinalis*. [L, 109.]

**ÆLUROPE** (Fr.), n. A-lu²-rop. From *αἰλουρος*, a cat, and *πούς*, a foot. The plant cat's-foot. [L, 109.] See *GNAPHALUM dioicum*.

**ÆLUROPSIS** (Lat.), n. f. E²l(a³-e²l)-u²(u²)-ro²p'si²s. Gen., *ælu-ro'psos*. From *αἰλουρος*, a cat, and *ὄψις*, appearance. Fr., *œil de chat*. Ger., *Katzenauge*. It., *occhio di gatto*. Sp., *ojo de gato*. Cat's-eye; a peculiarity of the Mongol race, due to obliquity of the interpalpebral aperture. [F.] See also *Cat's-EYE*.

**ÆNANTHE, ÆNANTHERA** (Lat.), n. f. See **ENANTHE** and **ENANTHERA**.

**ÆNAS** (Lat.), n. m. See **ENAS**.

**ÆNCEPHALUS** (Lat.), adj. See **ANENCEPHALUS**.

**ÆNEA** (Lat.), n. f.  $E(a^3e^2)ne^2a^3$ . From *æneus*, made of copper or bronze. An old term for a catheter. [L, 104.]

**ÆNEUS** (Lat.), n. m.  $E(a^3e^2)ne^2u^3s(u^3s)$ . See **ÆNEA**.

**ÆNOTHIONIC**, adj. See **ENOTHIONIC**.

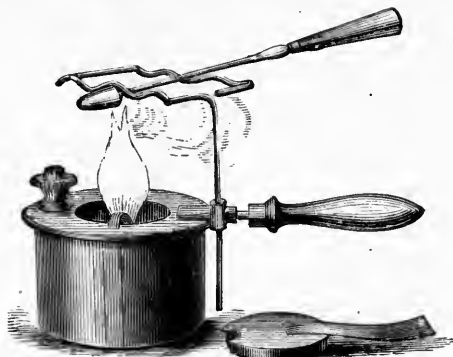

**ÆODEOTOMIA** (Lat.), n. f.  $E(a^3e^2)o-de(doi)o-to^2mi^2a^3$ . See **ÆDEOTOMY**.

**ÆOLANTHUS** (Lat.), n. m.  $E(a^3e^2)o-la^2n(la^3n)^2thu^3s(thu^3s)$ . Fr., *æolanthé*. A genus of labiate plants. [L, 41.]—**Æ. suavis**. A Brazilian plant, used as a diuretic. [L, 63.]

**ÆOLECTHYMA** (Lat.), n. n.  $E(a^3e^2)o-l^2e^2k-thi(thu^3)^2ma^3$ . Gen., *æolecthyrmatos*. From *αἰόλος*, variegated, speckled, and *ἐκθύμα*, a pustule. An old term for small-pox. [L, 50.]

**ÆOLECTHYMATICUS** (Lat.), adj.  $E(a^3e^2)o-l^2e^2k-thi^2m(thu^3m)a^2t(a^2t)^2k-u^3s(u^3s)$ . Pertaining to or affected with small-pox. [L, 50.]

**ÆOLIPYLE**, n.  $E-o^2l^2i^2-pil$ . From *αἰόλος*, windy, and *πύλη*, a narrow passage. Fr., *æolipyle*. A peculiar form of spirit-lamp used for heating cautery-irons. A tight receptacle containing alcohol is heated by setting fire to a little free alcohol beneath it; this

causes the vapor from the contained alcohol to escape from a narrow orifice under great pressure; it takes fire and is projected forcibly in a stream against the article to be heated. [A, 321; L.]

**ÆOLLION** (Lat.), n. n.  $E(a^3e^2)o-l^2i^2o^2n$ . Varicella. [Ploucquet (A, 322).]

**ÆOLOCRENE** (Lat.), n. f.  $E(a^3e^2)o-lo-kre(kra)^2ne(na)$ . From *αἰόλος*, windy, and *κρήνη*, a spring. Gr., *Æolsbrunnen*, *Windbrunnen*, *Waldquelle*. One of the springs at Marienbad, so called from the efficiency of its waters in expelling wind. [A, 322.] See **MARIENBAD**.

**ÆOLODERMUS** (Lat.), adj.  $E(a^3e^2)o-lo-du^2rm(de^2rm)^2u^3s(u^3s)$ . Gr., *αιολόδερμος*. Having a variegated skin, as in urticaria. [L, 50.]

**ÆOLSBRUNNEN** (Ger.), n.  $A'o^2lz-brun-ne^2n$ . See **ÆOLOCRENE**.

**ÆON** (Lat.), n. m. and f.  $E(a^3e^2)o^2n$ . Gen., *æo^2nos*. Gr., *αιών*. 1. A life-time; one's time of life. 2. The spinal cord. [A, 311.]

**ÆONESIS** (Lat.), n. f.  $E(a^3e^2)o^2n-e(a^3)^2si^2s$ . Gen., *æone^2seos*. Gr., *αιώνισος*. A fomenting. [Hippocrates (A, 311).]

**ÆONION, ÆONIUM** (Lat.), n's n.  $E(a^3e^2)o^2ni^2o^2n-u^3m(u^3m)$ . From *αιώνιος*, everlasting. A genus of crassulaceous plants. [L, 64.] Cf. **SENUM** and **SEMPERVIVUM**.

**ÆORA** (Lat.), n. f.  $E(a^3e^2)o-ra^3$ . Gr., *αιώρα*. 1. A suspension apparatus for swinging the body. [A, 311.] 2. Passive exercise, as by swinging in a hammock, being carried in a litter, sailing, driving, etc. [L, 104.]

**ÆPFEL** (Ger.), n., pl. of *Apfel*, an apple. *Ap^2fe^2l*.—**A^2baum**. See **PYRUS malus**.—**A^2cistentinctur**. See *Tinctura FERRI pomata*.—**A^2mark**. Apple must. [L, 80.]—**A^2most**. Cider. [L.]—**A^2säure**. See the major list.—**A^2wein**. Cider.

**ÆPFELSÄURE** (Ger.), n. *Ap^2fe^2l-zoi-re^2*. Malic acid. [B.]—**Brenzliche A**. Maleic acid. [L, 52.]

**ÆPPICH** (Ger.), n. See **EPICHA**.

**ÆQUABILITER** (Lat.), adv.  $E^2k(a^3e^2k)wa^3-bi^2l^2i^2t-u^3r(e^2r)$ . Equably, uniformly. [L, 58.] See **PELVIS æ. justo major** and **PELVIS æ. justo minor**.

**ÆQUALIS** (Lat.), adj.  $E(a^3e^2)kwa(kwa^3)^2li^2s$ . Gr., *ἴσος, ὁμαλός*. Ger., *gleich, gleichmässig*. Equable, homogeneous. [A, 322.] See **PULSUS æqualis** and **Pus æquale**.

**ÆQUATOR OCULI** (Lat.), n. m.  $E(a^3e^2)kwa(kwa^3)^2to^2r(tor)$ . Gen., *æquator^2ris*. From *æquare*, to make equal to. Fr., *équateur de l'œil*. Ger., *Äquator des Auges*. It., *equatore dell'occhio*. Sp., *ecuador del ojo*. That circumference of the eyeball which bounds its central transverse vertical plane; practically, that portion of the circumference of the globe which lies just behind the ciliary region. [F.]

**ÆQUATORIAL**, adj. See **EQUATORIAL**.

**ÆQUILIBRIOMETHODE, ÆQUILIBRIMETHODE** (Ger.), n's.  $A-kwi^2l-i^2b^2ri^2o-ma-to^2de^2$ . -*rer^2ma-to^2de^2*. Mjsisovic's method of treating fractures of the femur by suspension and extension. [L, 57.]

**ÆQUILIBRIUM** (Lat.), n. n.  $E^2k(a^3e^2k)wi^2li^2b^2ri^2u^3m(u^3m)$ . See **EQUILIBRIUM**.

**ÆQUIMANUS** (Lat.), adj.  $E(a^3e^2)kwi^2m^2a^3n-u^3s(u^3s)$ . From *æquus*, equal, and *manus*, the hand. See **AMBIDEXTROSUS**.

**ÆQUINOCTIALBLUMEN** (Ger.), n. pl.  $A-kwi^2l-n-o^2k-ti^2a^2l^2blu^2me^2n$ . Flowers that open at stated hours. [L, 46.]

**ÆQUIVALENT** (Ger.), adj.  $A-kwi^2f-a^2l-e^2nt^2$ . See **EQUIVALENT**.

**ÆQUIVALVIS** (Lat.), adj.  $E^2k(a^3e^2k)wi^2va^2l(wa^2l)^2vi^2s(wi^2s)$ . See **EQUIVALVE**.

**ÆQUIVOCUS** (Lat.), adj.  $E^2k(a^3e^2k)kwi^2(kwe)^2vo(wo)^2ku^3s(ku^3s)$ . From *æquus*, equal, and *vocare*, to call. Gr., *ὁμώνυμος*. Fr., *équivoque*. Ger., *gleichnamig*. Equivocal, ambiguous. [A, 322.]—**Generatio æquivoca**. See **SPONTANEOUS GENERATION**.

**ÆQUORIDE** (Lat.), n. f. pl.  $E^2k(a^3e^2k)wo^2r-i(e)^2de(da^3e^2)$ . A family of *Hydrozoa*, of the order *Calyptoblastea* (*Leptomedusæ*). [E. R. Lankester (B, 77).]

**ÆER** (Lat.), n. m.  $A(a^3)^2u^3r(e^2r)$ . Gen., *æeria*. Gr., *ἀήρ*, air. 1. Air or gas. 2. An oil or tincture. [Paracelsus (U).]—**Æ. dephlogisticatus**. Dephlogisticated air; oxygen. [B, 97.]—**Æ. facitatus**. The air inherent in a body and extracted only by the destruction of the latter or by means of the air-pump. [L, 51.]—**Æ. fixus**. See the major list.—**Æ. ingenuus, A. innatus**. The air contained in the tympanic cavity. [L, 51.]—**Æ. mephiticus**. Mephitic air; carbon dioxide. [B, 97.]—**Æ. perfabilis**. The open air. [L, 73.]—**Æ. purus**. Oxygen. [B, 97.]—**Æ. vitalis**. Vital air; oxygen. [B, 97.]

**ÆERA** (Lat.), n. f.  $E(a^3e^2)^2ra^3$ . From *αἶρα*, darnel. See **LOLIUM**.

**ÆEREMOTOXIA** (Lat.), n. f.  $A(a^3)^2u^3r(e^2r)em(a^3e^2m)o-to^2x^2i^2a^3$ . From *ἀήρ*, air, *αἷμα*, blood, and *τοξικόν*, poison. Fr., *ærehémotoxie*. It., *aerematossia*. Syn.: *aerhæmotoxia*, *aerhæmotoxia*. The morbid condition produced by the introduction of air into the veins. [L, 41, 50.] See **AIR EMBOLISM**.

**ÆERAGE** (Fr.), n.  $A^3a-ra^3zh$ . Aeration. [J; L, 42.]

**ÆERANTHES, ÆERANTHUS** (Lat.), n's f.  $A(a^3)^2u^3r(e^2r)a^2n(a^3n)^2thez(the^2s), -thu^3s(thu^3s)$ . From *ἀήρ*, air, and *ανθος*, a flower. A genus of epiphytal orchids established by Lindley. [B, 19; L, 64.]

**ÆÉRAT** (Ger.), n.  $A^3a-ra^3t^2$ . Carbonic-acid water. [A.] See **Aqua ACIDI CARBONICI**.

**ÆERATE**, v. tr.  $A^2e^2r-at$ . From *aer*, air. Fr., *aérer*. Ger., *auslüften*. It., *aerificare*. 1. To supply with air, especially new or fresh air; to ventilate. 2. To charge with gas, especially carbon dioxide; to expose to the action of carbon dioxide. 3. To arterialize; first used in this sense by Erasmus Darwin (1704). [B; J; L, 56.]

**ÆERATED**, p. p. of *aerate*.  $A^2e^2ra-te^2d$ . Lat., *aeratus*. Fr., *aéré*. It., *aerato*. 1. Furnished with air or gas; ventilated. 2. Arterialized. [B.] See also **A. WATERS**.

**ÆERATING**, adj.  $A^2e^2r-a-ti^2ng$ . Syn.: *respiratory*. Of or pertaining to aeration or respiration (e. g., *a. organs*). [J.]

**ÆERATIO** (Lat.), n. f.  $A(a^3)^2u^3r(e^2r)a(a^3)^2she(tu^3)^2o$ . Gen., *aeratio^2nis*. For deriv., see **AER**. See **AEROSIS** and **AERATION**.

**ÆERATION**, n.  $A^2e^2r-a^2shu^3n$ . Lat., *aeratio*. Fr., *ération*, *aérage*. Ger., *Auslüftung*, *Lüftung*. It., *sciornamento* (1st def.). Syn.: *ventilation* (1st def.); *hæmatosis* (3d def.). 1. The act or process of supplying with air; especially the act of supplying with pure air and removing that which is vitiated. 2. The operation of combining with gas, especially with carbon dioxide. 3. Arterialization. [B; J; L, 56.]

**ÆERATOR**, n.  $A^2u^3r-a-to^2r$ . For deriv., see **AERATE**. An apparatus for making aerated waters. [L, 63.]

**ÆERATUS** (Lat.), adj.  $E(a^3e^2)ra(ra^3)^2tu^3s(tu^3s)$ . For deriv., see **ÆS**. Made of brass or copper. [L.]

**ÆERATUS** (Lat.), adj.  $A(a^3)^2e^2r-a(a^3)^2tu^3s(tu^3s)$ . Aerated. [L.]

**ÆEREAL**, adj.  $A^2e^2re-a^2l$ . See **AERIAL**.

**ÆERELATEROMETER**, n.  $A^2e^2r-e^2l-a^2t^2e^2r-o^2m^2e^2t-u^3r$ . Lat., *Æerelaterometrum*. Fr., *ærélatomètre*. Ger., *Gaselaterometer*, *Luftelasticitätsmesser*. See **ELATEROMETER**.

**ÆERENDOCARDIA** (Lat.), n. f.  $A(a^3)^2e^2r-e^2n-do-ka^3r^2di^2a^3$ . From *ἀήρ*, air, *ἐνδον*, within, and *καρδία*, the heart. The state or condition in which there is air in the cavity of the heart or in the endocardium. [L, 45, 63.]

**ÆÉRENTÉRASIQUE** (Fr.), adj.  $A^3a-re^2n-tar-a^2z-ek$ . Flatulent; tympanitic (said of the intestines). [L, 82.]

**ÆERENTERECTASIA** (Lat.), n. f.  $A(a^3)^2e^2r-e^2n-te^2r-e^2k-taz-(ta^3s)^2i^2a^3$ . From *ἀήρ*, air, *ἐντερον*, the intestine, and *ἐκτασις*, an extension. Fr., *ærentérectasie*. Syn.: *enteraerectasia*. Distension of the intestines with gas; flatulence; tympanitis. [L, 50.]

**ÆERENTERECTASIS** (Lat.), n. f.  $A(a^3)^2e^2r-e^2n-te^2r-e^2k^2ta^2-(ta^3)^2si^2s$ . Gen., *aerenterectas^2eos(e^2tasis)*. See **ÆERENTERECTASIA**.

**ÆÉRER** (Fr.), v. tr.  $A^3a-re^2t-me$ . To aerate.

**ÆÉRETHMIE** (Fr.), n.  $A^3a-re^2t-me$ . Emphysema. [L, 41.]

**ÆÉRETHMOPNEUMONIE** (Fr.), n.  $A^3a-re^2t-mo-nu^6-mo-ne$ . Emphysema beneath the pulmonary pleura. [Piorry (L, 45).]

**ÆERUS** (Lat.), adj.  $E(a^3a)^2re(re^2r)^2u^3s(u^3s)$ . For deriv., see **ÆS**. Pertaining to or resembling copper or brass. Bronzed. [B.] See **CUTIS ærea**.

**AEREUS** (Lat.), adj. A(a<sup>3</sup>-e)(a')(re)(u<sup>3</sup>s(u<sup>4</sup>s)). For deriv., see AER. Also written *aerius*. Aerial; containing gas or air (e. g., *cellula aerea*). [B.]

**AER FIXUS** (Lat.), n. m. Fi<sup>2</sup>x'u<sup>3</sup>s(u<sup>4</sup>s). Gen., *a'eris fix'i*. Fixed air; carbon dioxide. [B, 97.]—**Aqua aeris fixi**. See *Aqua ACIDI CARBONICI*.

**AERGERLICHKEIT** (Ger.), n. Ar'ge<sup>2</sup>r-li<sup>2</sup>ch<sup>2</sup>-kit. Fretfulness. [L, 30.]

**AERGIA** (Lat.), n. f. A(a<sup>3</sup>-u<sup>3</sup>r(e<sup>2</sup>r)/ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>). Gr., *ἀεργία*, sluggishness (said of paralytics). [L, 50.]

**AERHEMATOXIA** (Lat.), n. f. A(a<sup>3</sup>)-er-he<sup>2</sup>m(ha<sup>3</sup>-e<sup>2</sup>m)-a<sup>2</sup>t-(a<sup>3</sup>t)-o<sup>2</sup>x'i<sup>2</sup>-a<sup>3</sup>. See AEREMOTOXIA.

**AERHEMOCTONIA** (Lat.), n. f. A(a<sup>3</sup>)-u<sup>3</sup>r(e<sup>2</sup>r)-hem(ha<sup>3</sup>-e<sup>2</sup>m)-o<sup>2</sup>k-to<sup>2</sup>ni<sup>2</sup>-a<sup>3</sup>. From *ἀήρ*, air, *αἷμα*, blood, and *κτῶνος*, a killing. Fr., *aérhémoctonie*. It., *aeremotonia*. Death produced by the entrance of air into the veins. [L, 49, 63.] Cf. AEREMOTOXIA and *AIR EMBOLISM*.

**AERHEMOTOXIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-he<sup>2</sup>m(ha<sup>3</sup>-e<sup>2</sup>m)-o<sup>2</sup>x'i<sup>2</sup>-a<sup>3</sup>. See AEREMOTOXIA.

**AERHYDROUS**, adj. A-e<sup>2</sup>r-hi<sup>2</sup>dru<sup>3</sup>s. From *ἀήρ*, air, and *ὑδρῶς*, water. Fr., *aérhydre*. Containing air and water. [L, 56.]

**AERIAL**, adj. A-e<sup>2</sup>ri<sup>2</sup>-a<sup>3</sup>l. Gr., *ἀέριος*, *ἀέριος*. Lat., *aerius*, *aereus*. Fr., *aérien*. Ger., *luftig*. It., *aereo*. Sp., *aéreo*, *aeriano*. 1. Of or pertaining to air; consisting of air. 2. Resembling air. 3. Existing in the air, or in contact with air; deriving nourishment from the air. [B; L.] See A. ANIMAL, A. PLANT, A. RESPIRATION, A. ROOT, and A. VESSEL.—**A. acid**. Fr., *acide aérien*. An old name for carbon dioxide. [B, 7.]

**AERICOLOUS**, adj. A-e<sup>2</sup>r-i<sup>2</sup>k'o<sup>2</sup>l-u<sup>3</sup>s. From *aer*, air, and *colere*, to inhabit. Fr., *aéricole*. Living in the air (applied to animals and plants). [L, 42.]

**AERIDES** (Lat.), n. n. A(a<sup>3</sup>)-e<sup>2</sup>r'i<sup>2</sup>d-ez(e<sup>2</sup>s). Gen., *aerid'eos*, *aer'idis*. From *ἀήρ*, air, because living for a long time when suspended in air. Fr., *aéride*. Sp., *aérida*. A genus of orchids indigenous to the tropics, established by Swartz. [B, 19, 71.]—**A. taeniale**. A species found upon trees in Scythia having long flat roots in shape like a tape-worm. [B, 19.]—**A. tessellatum**. Syn.: *Vanda tessellata* [Loddiges], *Vanda Roxburghii*, *Cymbidium tesselloides* [Roxburgh]. A species indigenous to the East Indies, said to be useful as a remedy in various disorders. [B, 71; L, 63.]

**AERIDUCTUS** (Lat.), n. m. A(a<sup>3</sup>)-e<sup>2</sup>r-i<sup>2</sup>-du<sup>3</sup>k(du<sup>4</sup>k')tu<sup>3</sup>s(tu<sup>4</sup>s). Gen., *aeriductus*. One of the gills of fishes, amphibia, etc. [L, 81.] See BRANCHIA.

**AERIEŒN** (Fr.), adj. and n. A<sup>3</sup>-a-re-a<sup>3</sup>n<sup>2</sup>. 1. Aerial. 2. Air-breathing. [J.] 3. In the pl. *a's*, a section of the *Fungi*, embracing those which spring from the surface of the earth. [L, 41.]

**AÉRIER** (Fr.), v. tr. A-a-ri<sup>2</sup>-a. To aerate. [L.]

**AERIFER** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>)-e<sup>2</sup>r'i<sup>2</sup>-fu<sup>3</sup>r(fe<sup>2</sup>r). From *aer*, air, and *ferre*, to bear. See AEROPHOROUS (1st def.).

**ÆRIFER** (Lat.), adj. E(a<sup>3</sup>-e<sup>2</sup>)ri<sup>2</sup>-fu<sup>3</sup>r(fe<sup>2</sup>r). From *æs*, brass, and *ferre*, to bear. Fr., *ærifère*. Bearing or containing brass or copper. [B; L, 41.]

**AÉRIÈRE** (Fr.), adj. A<sup>3</sup>-a-re-far. See AEROPHOROUS (1st def.).

**ÆRIFÈRE** (Fr.), adj. A-re-fe<sup>2</sup>r. See ÆRIFER.

**AERIFEROUS**, adj. A-e<sup>2</sup>r-i<sup>2</sup>f'e<sup>2</sup>r-u<sup>3</sup>s. For deriv., see AERIFER. See AEROPHOROUS (1st def.).

**AERIFICATION**, n. A-e<sup>2</sup>r'i<sup>2</sup>f-i<sup>2</sup>-ka'shu<sup>3</sup>n. Lat., *aerificatio* (from *aer*, air, and *facere*, to make). Fr., *aérification*. Ger., *Verflüchtigung*, *Verdampfung* (1st def.). It., *aerificazione*. Sp., *aerificación*. 1. The act or process of converting a solid or a liquid into the gaseous state. 2. The introduction of air into anything. 3. The state of being filled with air. 4. The state of being aeriform. [L, 41, 53, 56.]—**A. of the lung**. See *Pulmonary EMPHYSEMA*.

**AERIFIED**, adj. A-e<sup>2</sup>r'i<sup>2</sup>-fid. Fr., *aérifié*. It., *aerificato*. Sp., *aerificado*. 1. Converted into air or gas. 2. Filled or combined with air. [L.]

**AERIFLUXUS** (Lat.), n. m. A(a<sup>3</sup>)-e<sup>2</sup>r(ar)-i<sup>2</sup>-flu<sup>3</sup>x(flux)'u<sup>3</sup>s(u<sup>4</sup>s). Gen., *aerifluxus*. For deriv., see AER and FLUXUS. An abnormal discharge of gas from the alimentary canal; flatulence. [L, 45.]

**AERIFORM**, adj. A-e<sup>2</sup>r'i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *aeriformis* (from *aer*, air, and *forma*, form). Fr., *aériforme*. Ger., *luftartig*, *luftförmig*. It., Sp., *aeriforme*. Having the form or the nature of air or of a gas. [L, 56.]

**AERIFY**, v. tr. A-e<sup>2</sup>r'i<sup>2</sup>-fi. From *aer*, air, and *facere*, to make. Fr., *aérifier*, *aériser*. It., *aerificare*. Sp., *aerificar*. 1. To transform to the state of a gas. 2. To infuse or fill with air; to combine with air. [L, 56.]

**ÆRINUS** (Lat.), adj. E(a<sup>3</sup>-e<sup>2</sup>)-ri<sup>2</sup>-nu<sup>3</sup>s(nu<sup>4</sup>s). For deriv., see ÆRA. Fr., *apvov*. Of or pertaining to dandelion, or *Lolium*. [Pliny (B).]

**AERIPERITONIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-i<sup>2</sup>-pe<sup>2</sup>r-i<sup>2</sup>-to<sup>2</sup>ni<sup>2</sup>-a<sup>3</sup>. For deriv., see AER and PERITONÆUM. Fr., *aéripéritonie*. See *Peritoneal TYMPANITES*.

**AÉRIQUE** (Fr.), adj. A<sup>3</sup>-a-rek. Capable of oxidation. [L, 52.]

**ÆRISER** (Fr.), v. tr. A<sup>3</sup>-a-re-za. To aerify. Reflex., *s'a*, to be converted to the condition of a gas. [L, 41, 100.]

**AÉRITES** (Fr.), n. pl. A<sup>3</sup>-a-ret. Animals which live in the air. [B, 38.]

**ÆRITIS** (Lat.), n. f. E(a<sup>3</sup>-e<sup>2</sup>)-ri(re)'ti<sup>2</sup>s. Gen., *ærit'idis*. See ANAGALLIS.

**AÆRIUS** (Lat.), adj. A(a<sup>3</sup>)-e<sup>2</sup>r'i<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *ἀέριος* (from *ἀήρ*, air). Aerial.

**AÆRIVORE** (Fr.), adj. A<sup>3</sup>-a-re-vor. Living upon air. [L, 41.]

**AERMCHEN** (Ger.), n. Arm'ch<sup>2</sup>e<sup>2</sup>n. A little arm. [L, 30.]

**ÆÉROBE** (Fr.), adj. A<sup>3</sup>-ar-ob. See AEROBIOTIC (1st def.).

**AEROBIA** (Lat.), n. n. pl. A(a<sup>3</sup>)-e<sup>2</sup>r-o'bi<sup>2</sup>-a<sup>3</sup>. See AEROBION.

**AEROBIAN**, **AEROBIC**, adj's. A-e<sup>2</sup>r-o'bi<sup>2</sup>a<sup>3</sup>n, -bi<sup>2</sup>k. See AEROBIOTIC (1st def.).

**AEROBION** (Lat.), n. n. A(a<sup>3</sup>)-e<sup>2</sup>r-o'bi<sup>2</sup>-o<sup>2</sup>n. From *ἀήρ*, air, and *bios*, life. Fr., *aérobie* [Pasteur]. Ger., *Aérobie*. It., Sp., *aerobio*. 1. A term introduced by Pasteur to designate an organism requiring free oxygen, either in the air, or dissolved in liquid, for respiration. [J, 4, 33.] Cf. ANAEROBION. 2. A genus of orchidaceous plants. See AEROBIUM.

**AEROBIOTIC**, adj. A'<sup>2</sup>e<sup>2</sup>r-o'bi-o<sup>2</sup>t'i<sup>2</sup>k. Fr., *aérobie* (1st def.), *azymique* (2d def.). Ger., *aërobisch* (1st def.). It., *aerobio* (1st def.). Sp., *aerobio* (1st def.). Syn.: *aerobic* (1st def.). 1. Pertaining to an aerobion, or to respiration or life in the presence of free oxygen; requiring free oxygen for the maintenance of life. 2. Pertaining to something opposed to fermentation. [B; J, 33.]

**AEROBIOUS**, adj. A-e<sup>2</sup>r-o'bi<sup>2</sup>-u<sup>3</sup>s. See AEROBIOTIC (1st def.).

**AEROBIUM** (Lat.), n. n. A(a<sup>3</sup>)-e<sup>2</sup>r-o'bi<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). For deriv., see AEROBION. Fr., *aerobion*. Syn.: *aerobion*. A genus of orchids now referred to *Angraecum*. [L, 64.]

**AEROCYST**, n. A'<sup>2</sup>e<sup>2</sup>r-o-si<sup>2</sup>st. From *ἀήρ*, air, and *κύστις*, a bladder. Fr., *aérocyste*. One of the air-vesicles of the *Algae*. [B, 19.]

**AERODERMECTASIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-du<sup>3</sup>r(de<sup>2</sup>r)-me<sup>2</sup>k-ta(ta<sup>3</sup>'zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>). From *ἀήρ*, air, *δέρμα*, the skin, and *ἐκτασις*, extension. Fr., *aérodermectasie*. See *Surgical EMPHYSEMA*.

**AERODENSIMETER**, n. A'<sup>2</sup>e<sup>2</sup>r-o-de<sup>2</sup>n-si<sup>2</sup>m'e<sup>2</sup>t-u<sup>3</sup>r. For deriv., see AER and DENSIMETER. See MANOMETER.

**AERODIAPHANOMETER**, n. A'<sup>2</sup>e<sup>2</sup>r-o-di<sup>2</sup>'a<sup>3</sup>-fa<sup>2</sup>n-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>3</sup>r. For deriv., see AER and DIAPHANOMETER. Lat., *aerodiaphanometrum*. Fr., *aérodiafanomètre*. It., *aerodiafanometro*. See DIAPHANOMETER.

**AERODIAPHTHORA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-di(de)-a<sup>2</sup>p(a<sup>3</sup>p')-tho-ra<sup>2</sup>. From *ἀήρ*, air, and *διαφθορά*, corruption. See AEROPHTHORA.

**AERODIAPHTHOROSCOPE**, n. A'<sup>2</sup>e<sup>2</sup>r-o-di<sup>2</sup>'a<sup>3</sup>p-tho<sup>2</sup>r'o<sup>2</sup>s-kop. For deriv., see AERODIAPHTHORA and *-scope*. Lat., *aerodiaphthoroscopia*. Fr., *aérodiafthoroscope*. Ger., *Aérodiafthoroskop*. An apparatus for determining the purity or impurity of the atmosphere. [L, 30.]

**AERODUCTOR**, n. A'<sup>2</sup>e<sup>2</sup>r-o-du<sup>3</sup>k'to<sup>2</sup>r. From *aer*, air, and *ducere*, to lead. Fr., *aérodacteur*. A lever invented by Weidmann for the purpose of keeping the orifice of the vagina open so as to admit air in cases of difficult delivery, especially when the after-coming head is in the vagina and there is danger of asphyxia to the child. [L, 49.]

**ÆAERODYNAMIC**, adj. A'<sup>2</sup>e<sup>2</sup>r-o-di-na<sup>2</sup>m'i<sup>2</sup>k. For deriv., see AER and DYNAMICS. Fr., *aérodynamique*. Ger., *aérodynamisch*. It., *aerodinamico*. Sp., *aerodinámico*. Of or pertaining to aerodynamics. [L, 56.]

**AERODYNAMICS**, n. A'<sup>2</sup>e<sup>2</sup>r-o-di-na<sup>2</sup>m'i<sup>2</sup>ks. Lat., *aerodynamice*. Fr., *aérodynamique*. Ger., *Aérodynamik*, *Luftkraftlehre*. It., *aerodinamica*. Sp., *aerodinámica*. That branch of physics which treats of the laws regulating the motion of elastic fluids, of atmospheric pressure, and of the mechanical effects of air in motion. [L, 42, 56.]

**AEROENTERECTASIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-e<sup>2</sup>n-te<sup>2</sup>r-e<sup>2</sup>k-ta(ta<sup>3</sup>'zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>). Fr., *aéroenterectasie*. See AEROENTERECTASIA.

**AEROGAMEN** (Ger.), n. pl. A<sup>3</sup>-e<sup>2</sup>r-o-ga<sup>3</sup>m'e<sup>2</sup>n. Phanerogams (so called because the fertilization of the stigma takes place in the open air). [B, 49.]

**ÆÉROGASTRE** (Fr.), adj. A<sup>3</sup>-ar-o-ga<sup>3</sup>str. An epithet applied to certain *Fungi* growing on the surface of the ground. [L, 109.] Cf. AÆRIENS.

**AEROGNOSY**, n. A-e<sup>2</sup>r-o-g'no-si<sup>2</sup>. From *ἀήρ*, air, and *γνῶσις*, knowledge. Lat., *aerognosia*. Fr., *aérognoie*. Sp., *aerognosia*. The science which treats of air and its properties and functions. [L, 56.]

**AEROGRAPHER**, n. A-e<sup>2</sup>r-o-g'ra<sup>2</sup>f-u<sup>3</sup>r. For deriv., see AEROGRAPHY. Fr., *aérographe*. Ger., *Aerograph*. A writer on the subject of air and its properties. [L, 30.]

**AEROGRAPHY**, n. A-e<sup>2</sup>r-o-g'ra<sup>2</sup>-fi<sup>2</sup>. From *ἀήρ*, air, and *γράφειν*, to write. Lat., *aerographia*. Fr., *aérogaphie*. Ger., *Ärographie*, *Luftbeschreibung*. It., *aerografia*. Sp., *aerografía*. The branch of physics which treats of air and its properties. A treatise on air. [L, 30, 41.]

**ÆÉROHYDRE** (Fr.), adj. A<sup>3</sup>-ar-o-hedr. Aerhydrous. [L, 109.]

**AEROHYDROPATHY**, n. A-e<sup>2</sup>r-o-hi-dro<sup>2</sup>p'a<sup>2</sup>th-i<sup>2</sup>. For deriv., see AER and HYDROPATHY. Lat., *aerohydropathia*. Fr., *aérohydropathie*. Ger., *aerohydropathie*. It., *aeroidropatia*. Syn.: *aerydriatica*, *aerydriasis*. A combination of hydropathic and pneumatic treatment. [L, 50.]

**ÆÉROLE** (Fr.), n. A<sup>3</sup>-a-rol. A corn. [L, 101.] See CLAVUS.

**AEROLEPTYENTER**, **AEROLEPTYENTERION** (Lat.), n's m. and n. A(a<sup>3</sup>)-e<sup>2</sup>r-o-le<sup>2</sup>p-ti<sup>2</sup>n(tu<sup>3</sup>n')tu<sup>3</sup>r(te<sup>2</sup>r), -ti<sup>2</sup>n(tu<sup>3</sup>n)-te(ta')-ri<sup>2</sup>-o<sup>2</sup>n. Gen., *aeroleptynter'os*, *aeroleptynter'ii*. From *ἀήρ*, air, and *αἰρῶν*, to attenuate. An air-pump. [L, 50.]

**AEROLOGIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-lo<sup>2</sup>'ji<sup>2</sup>(gi<sup>2</sup>)-a<sup>3</sup>. See AEROLGY.

**AEROLOGICA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-lo<sup>2</sup>j(lo<sup>2</sup>g'i<sup>2</sup>-ka<sup>3</sup>). See AEROLGY.

**AEROLOGICAL**, adj. A-e<sup>2</sup>r-o-lo<sup>2</sup>'ji<sup>2</sup>k-a<sup>3</sup>l. For deriv., see

**AEROLOGY.** Lat., *aerologicus*. Fr., *aérologique*. Ger., *aërologisch*. Sp., *aerológico*. Of or pertaining to aerology.

**AEROLOGICE** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-lo<sup>2</sup>j(log)<sup>2</sup>i<sup>2</sup>k-e(a). Gen., *aerologicæ*. Aerology. [L, 50.]

**AEROLOGIST**, n. A-e<sup>2</sup>r-o<sup>2</sup>l-o-j<sup>2</sup>st. One who studies aerology. [L, 56.]

**AEROLOGY**, n. A-e<sup>2</sup>r-o<sup>2</sup>l-o-j<sup>2</sup>. From *ἀήρ*, air, and *λόγος* (see *-logy*). Lat., *aerologia*, *aerologica*. Fr., *aérologie*. Ger., *Aërologie*, *Luftkunde*. It., *aerologia*. Sp., *aerologia*. That branch of science treating of air, especially of air in its relations to salubrity. [L, 50, 108.]

**AEROMANCY**, n. A-e<sup>2</sup>r-o-ma<sup>2</sup>n-si<sup>2</sup>. From *ἀήρ*, air, and *μαντεία*, prophecy. Lat., *aeromantia*. Fr., *aéromancie*. Ger., *Aéromantie*. It., *aerimanzia*. Sp., *aeromancia*. Divination practiced by observation of the atmosphere and its movements. [B, 48, 93.]

**AERO-MECHANICS**, n. A-e<sup>2</sup>r-o-me<sup>2</sup>k-a<sup>2</sup>n-i<sup>2</sup>ks. For deriv., see **AER** and **MECHANICS**. Fr., *aéro-mécanique*. Ger., *Aéromechanik*. See **PNEUMATICS**.

**AEROMEL**, **AEROMELI** (Lat.), n's n. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>e-me<sup>2</sup>l, -o<sup>2</sup>m'e<sup>2</sup>l-i(e). Gen., *aeromell'is*, *aeromell'itos* (-is). From *ἀήρ*, air, and *μέλι*, honey. Fr., *aéromelle*. It., *aeromelle*. See **MANNA**.

**AEROMETER**, n. A-e<sup>2</sup>r-o<sup>2</sup>m'e<sup>2</sup>t-t<sup>2</sup>u<sup>2</sup>r. From *ἀήρ*, air, and *μέτρον*, a measure. Lat., *aerometron*, *aerometrum*. Fr., *aéromètre*. Ger., *Aërometer*, *Luftdichtkeitsmesser*. It., *aerometro*. Sp., *aerómetro*. An apparatus invented by Marcus Hunt for ascertaining the mean bulk of gases and the density of air. It consists of a glass globe of a capacity of 10 cubic inches communicating with a tube, which has a capacity of 1 cubic inch and is divided into portions of tenths of an inch by a graduated scale. The instrument is placed in a tube full of water and rises or falls in the latter with changes in the pressure of the atmosphere. [L.]

**AEROMETRICAL**, adj. A-e<sup>2</sup>r-o-me<sup>2</sup>t't<sup>2</sup>ri<sup>2</sup>k-a<sup>2</sup>l. Fr., *aérométrique*. Ger., *aérométrisch*. Sp., *aerométrico*. Of or pertaining to aerometry. [L.]

**AEROMETRY**, n. A-e<sup>2</sup>r-o<sup>2</sup>m'e<sup>2</sup>t-r<sup>2</sup>i<sup>2</sup>. Lat., *aerometria*. Fr., *aérométrie*. Ger., *Aërometrie*, *Luftmessen*. It., *aerometria*. Sp., *aerometria*. That branch of physics which treats of the measurement of the density of gases. [L.] See **PNEUMATICS**.

**AEROMICROBION** (Lat.), n. n. A(a<sup>3</sup>)-e<sup>2</sup>r-o-mi<sup>2</sup>k-ro<sup>2</sup>bi<sup>2</sup>-o<sup>2</sup>n. From *ἀήρ*, air, *μικρός*, small, and *βίος*, life. Ger., *Aëromikrobie*. Lustig's name for any microscopic organism which requires free oxygen for the maintenance of its vitality. ["Ctbl. f. d. med. Wissensch.," June 5, 1885, p. 403 (B).]

**AEROMYCA**, **AEROMYCE** (Lat.), n's f. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>m-i<sup>2</sup>k-(u<sup>2</sup>k)-a<sup>2</sup>, -i<sup>2</sup>s(u<sup>2</sup>k)-e(a). See **AEROMYCES**.

**AEROMYCES** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>m-i<sup>2</sup>s(u<sup>2</sup>k)-ez(e<sup>2</sup>s). Gen., *aeromycet'is*. From *ἀήρ*, air, and *μύκης*, a fungus. Ger., *Luftbalg-pilz*. A variety of gastronomic fungus. [L, 50.]

**AEROMYCUS** (Lat.), n. m. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>m-i<sup>2</sup>k(u<sup>2</sup>k)-u<sup>2</sup>s(u<sup>2</sup>s). See **AEROMYCES**.

**AEROPERITONIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-pe<sup>2</sup>r-i<sup>2</sup>-to<sup>2</sup>ni<sup>2</sup>-a. Fr., *aéropéritoine*. See **AERIPERITONIA**.

**AEROPETES** (Lat.), adj. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>p-e<sup>2</sup>t-ez(e<sup>2</sup>s). Gr., *ἀερόπτες*, flying in the air. Flying. [L, 50.]

**AEROPHANE** (Fr.), adj. A<sup>3</sup>-ar-o-fa<sup>2</sup>n. As transparent as air. [L, 41, 101.]

**AÉROPHOBIE** (Fr.), adj. and n. A<sup>3</sup>-ar-o-fob. See **AEROPHOBIC** and **AEROPHOBUS** (n.).

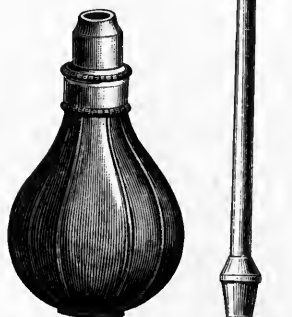

**AEROPHOBIA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>-fo<sup>2</sup>bi<sup>2</sup>-a<sup>3</sup>. From *ἀήρ*, air, and *φόβος*, fear. Fr., *aérophobie*. Ger., *Aërophobie*, *Luftscheu*. It., *aerofobia*. Sp., *aerofobia*. Aerophoby; dread of air or of contact with air, an occasional symptom of rabies and of some other nervous affections. [A, 300.]

**AEROPHOBIC**, adj. A-e<sup>2</sup>r-o<sup>2</sup>-fo<sup>2</sup>bi<sup>2</sup>k. Lat., *aerophobicus*, *aerophobus*. Fr., *aérophobe*. Ger., *aërophobisch*, *Luftscheu*. It., *aerofobo*. Sp., *aeró-fobo*. Afraid of air. [L.]

**AEROPHOBUS** (Lat.), adj. and n. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>-fo<sup>2</sup>bu<sup>2</sup>s(bu<sup>2</sup>s). 1. (Adj.) aerophobic. 2. (N.) a patient suffering from aerophobia. [Aurelianus (L, 84).]

**AEROPHOBY**, n. A-e<sup>2</sup>r-o<sup>2</sup>-fo<sup>2</sup>bi<sup>2</sup>. See **AEROPHOBIA**.

**AEROPHONE**, n. A-e<sup>2</sup>r-o<sup>2</sup>-fon. From *ἀήρ*, air, and *φωνή*, sound. Fr., *aérophone*. Ger., *Aërophon*. An apparatus invented by Edison for rendering the voice audible at a great distance. It consists essentially of a speaking-tube in the lower part of which is a telephone-diaphragm which is set into vibration by the voice, and by its vibration opens and shuts a valve in a whistle from which at the same time a sound is produced by a blast of air. The action of the valve impresses upon the loud sound of the whistle the articulate quality of the speaking voice, so that the words uttered by the latter are transmitted with the former. [B, 49.]

GAIRAL'S AÉROPHORE. (AFTER CHARPENTIER.)

**AÉROPHOR** (Ger.), adj. A<sup>3</sup>-e<sup>2</sup>r-o-for. Aerophorous.

**AÉROPHORE** (Fr.), adj. and n. A<sup>3</sup>-ar-o-f<sup>2</sup>or. 1. (Adj.) aerophorous. [L.] 2. (N.) a tracheal insufflator invented by Gairal, in 1876, for the resuscitation of still-born children. [A, 15.]

**AEROPHOROUS**, adj. A-e<sup>2</sup>r-o<sup>2</sup>f<sup>2</sup>-o<sup>2</sup>r-u<sup>2</sup>s. From *ἀήρ*, air, and *φορέω*, to bear. Lat., *aerophorus*. Fr., *aérophore*, *gastétre*. Ger., *Aërophor*. It., *aeroforo*. Syn.: *aeriferous* (1st def.). 1. Containing or conducting air. 2. Generating gas; causing effervescence. [B; L.]

**AEROPHORUS** (Lat.), adj. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>f<sup>2</sup>-o<sup>2</sup>r-u<sup>2</sup>s(u<sup>2</sup>s). Aerophorous. [B.] See **PULVIS** a.

**AEROPHTHORA** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>p<sup>2</sup>-tho<sup>2</sup>-ra<sup>3</sup>. From *ἀήρ*, air, and *φθορά*, corruption. Ger., *Luftverderbniss*. Syn.: *aerodiphthora*. Impurity of the air. [A.]

**AEROPHTHORICUS** (Lat.), adj. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>p<sup>2</sup>-tho<sup>2</sup>-r<sup>2</sup>i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Produced by, dependent upon, or suffering from, the effects of impure air. [L, 50.]

**AÉROPHYSE** (Fr.), adj. A<sup>3</sup>-ar-o-fes. From *ἀήρ*, air, and *φύσσω*, to distend. Sp., *aerofiso*. Inflated; distended with air. [L, 52, 98.]

**AEROPHYTA** (Lat.), n. n. pl. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>f<sup>2</sup>i<sup>2</sup>(u<sup>2</sup>t<sup>2</sup>)-a<sup>3</sup>. From *ἀήρ*, air, and *φυτόν*, a plant. Fr., *aérophytes*. Ger., *Aërophyten*. It., *aerofiti*. Sp., *aerofitos*. Aerophytes; in the older systems of botanical classification, a cohort of the *Thallogens* comprising the *Lichens*. [B, 34.]

**AEROPHYTE**, n. A-e<sup>2</sup>r-o-fit. Lat., *aerophyton*. Fr., *aérophyle*. Ger., *Aërophyt*. It., *aerofito*. Sp., *aerofito*. 1. A plant which lives and grows wholly in the air. See **AERIAL PLANT**. In the pl., a's, the *Aerophyta*. 2. A plant formerly supposed to be derived from extra-terrestrial sources, as from meteorites. [B, 19, 48.]

**AÉROPLEURIE** (Fr.), n. A<sup>3</sup>-ar-o-plu<sup>2</sup>-re. From *ἀήρ*, air, and *πλευρόν*, a rib. See **PNEUMOTHORAX**.

**AEROPNEUMONASIA**, **AEROPNEUMONECTASIA** (Lat.), n's f. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>p<sup>2</sup>-ni<sup>2</sup>-mo-na<sup>2</sup>(na<sup>2</sup>s)<sup>2</sup>i<sup>2</sup>-a<sup>3</sup>, -mo-ne<sup>2</sup>k-taz(ta<sup>2</sup>s)<sup>2</sup>i<sup>2</sup>-a<sup>3</sup>. From *ἀήρ*, air, *πνεύμων*, the lung, and *έκτασις*, distension. Fr., *aéropneumonie*, *aéropneumonectasie*. See **PULMONARY EMPHYSEMA**.

**AEROPYLE**, n. A-e<sup>2</sup>r-o-pil. From *ἀήρ*, air, and *πύλη*, a gate. An opening, of unknown function, existing in the pods of some leguminous plants. [L, 67.]

**AERORRHACHIA**, **AERORRHACHIS** (Lat.), n's f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-ra<sup>2</sup>(ra<sup>2</sup>)<sup>2</sup>i<sup>2</sup>(ch<sup>2</sup>)<sup>2</sup>-a<sup>3</sup>, -o<sup>2</sup>r-ra<sup>2</sup>k(r<sup>2</sup>a<sup>2</sup>ch<sup>2</sup>)<sup>2</sup>-i<sup>2</sup>s. Gen., *aerorrhach'is*. Fr., *aérorrhachie*. An accumulation of air in the vertebral canal. [L, 41, 45, 63.]

**AEROSCOPE**, n. A-e<sup>2</sup>r-o-skop. From *ἀήρ*, air, and *σκοπεῖν*, to observe. Fr., *aéroscope*. Ger., *Aëroskop*. An instrument devised by Pouchet for determining the purity of the air by microscopical examination. [L, 60.]

**AEROSCOPY**, n. A-e<sup>2</sup>r-o<sup>2</sup>s-ko<sup>2</sup>-pi<sup>2</sup>. Fr., *aéroskopie*. Sp., *aeroscopia*. The observation of the atmosphere to determine its condition. [L, 56.]

**AÉROSE**, adj. E'ros. Lat., *aerosus* [from *æs* (q. v.)]. Made of copper or brass; resembling copper. [L.]

**AEROSIS** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-si<sup>2</sup>s. Gen., *aero'seos* (-o'sis). From *ἀεραῖσθαι*, to become air. Ger., *Luftung*, *Auslüftung*. Syn.: *aeration* (1st def.). 1. The formation of gas within the body. See **PNEUMATOSIS**. 2. Refrigeration by a current of air. 3. Attenuation of the blood; an imaginary resolution of the blood into vapor. [A, 305; L, 53, 97.]

**AEROSPHERE**, n. A-e<sup>2</sup>r-o-sfer. From *ἀήρ*, air, and *σφαῖρα*, a globe. Fr., *aérosphère*. The atmosphere. [L, 56.]

**AEROSTATHION** (Fr.), n. A<sup>3</sup>-ar-o-sta<sup>2</sup>t-me-o<sup>2</sup>n<sup>2</sup>. From *ἀήρ*, air, and *σταθμῖον*, a weighing. An apparatus invented by Carpi for determining variations in the weight and temperature of the atmosphere. [L, 41.]

**AEROSTATIC**, adj. A-e<sup>2</sup>r-o-sta<sup>2</sup>t-i<sup>2</sup>k. For deriv., see **AEROSTATICS**. Fr., *aérostatique*. Ger., *aërostatisch*. It., *aerostatico*. Sp., *aerostático*. Of or pertaining to aerostatics. [L, 56.]

**AEROSTATICS**, n. A-e<sup>2</sup>r-o-sta<sup>2</sup>t-i<sup>2</sup>ks. For deriv., see **AER** and **STATICS**. Lat., *aerostatica*, *aerostatica*. Fr., *aérostatique*. Ger., *Aërostatik*, *Luftgleichgewichtschere*. It., *aerostatica*. Sp., *aerostática*. The science which treats of the conditions of equilibrium of gases. [L, 108.]

**AEROTANNITES** (Lat.), n. A(a<sup>3</sup>)-e<sup>2</sup>r(ar)-o-tan(ta<sup>2</sup>n)-ni(ne)<sup>2</sup>tez(te<sup>2</sup>s). From *ἀήρ*, air, and *ταννέω*, to stretch. Kastner's term for an aereoleptynter (q. v.). [L, 50.]

**AEROTANYSTER** (Lat.), n. m. A(a<sup>3</sup>)-e<sup>2</sup>r-o-ta<sup>2</sup>n(ta<sup>2</sup>n)-i<sup>2</sup>s(u<sup>2</sup>s)<sup>2</sup>-tu<sup>2</sup>r(te<sup>2</sup>r). Gen., *aerotanyster'os*. See **AEROLEPTYNTER**.

**AEROTHERAPY**, n. A-e<sup>2</sup>r-o-the<sup>2</sup>r-a<sup>2</sup>p-i<sup>2</sup>. From *ἀήρ*, air, and *θεραπεύω*, to serve. Fr., *aérothérapie*. Ger., *Aërotherapie*, *pneumatische Therapie*. It., *aeroterapia*. See **PNEUMATIC TREATMENT**.

**AEROTHORAX** (Lat.), n. f. A(a<sup>3</sup>)-e<sup>2</sup>r-o-tho<sup>2</sup>-ra<sup>2</sup>x(r<sup>2</sup>a<sup>2</sup>x). Gen., *aerothora'cis*. From *ἀήρ*, air, and *θώραξ*, the chest. See **PNEUMOTHORAX**.

**AEROTRACTOR**, n. A-e<sup>2</sup>r-o-tra<sup>2</sup>k-to<sup>2</sup>r. Deriv., Lat., *aer*, air, and *trahere*, to draw. Ger., *Aërotractor*. See **AIR-TRACTOR**.

**AEROXEROTES** (Lat.), n. A(a<sup>3</sup>)-e<sup>2</sup>r(ar)-o<sup>2</sup>k-zer(sar)<sup>2</sup>-o-tez(tas). Gen., *aeroxerote'tos* (-tis). From *ἀήρ*, air, and *ξερδύς*, dryness. Ger., *Luftrockniss*. Dryness of the air. [L, 50.]

**AEROXEROTICUS** (Lat.), adj. A(a<sup>3</sup>)-e<sup>2</sup>r-o<sup>2</sup>x-e<sup>2</sup>r-o<sup>2</sup>t-i<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). Pertaining to or produced by dryness of the air. [L, 50.]

**AEROZOA** (Lat.), n. n. pl. A(a<sup>3</sup>)-e<sup>2</sup>r-o-zo<sup>2</sup>-a<sup>3</sup>. From *ἀήρ*, air, and *ζῷον*, an animal. Fr., *aérozoës*. Ger., *Aërozoën*. Animals for whose existence air is requisite. [L, 41, 57.]

**AERTERIVERSION**, n. A-e<sup>2</sup>r-te<sup>2</sup>r-i<sup>2</sup>-vu<sup>2</sup>r'zhu<sup>2</sup>n. From *arteria*, an artery, and *vertere*, to turn. A procedure devised by G. C. E. Weber for constricting the mouths of arteries in amputation-slumps by turning their ends over with the arterierverter (*q. v.*) like a sleeve. [J. A. Liddell (A, 277).]

**AERTERIVERTER**, n. A-e<sup>2</sup>r-te<sup>2</sup>r-i<sup>2</sup>-vu<sup>2</sup>r'u<sup>2</sup>r. G. C. E. Weber's instrument for performing arteriaversion (*q. v.*), consisting of a pair of fine hooks inclosed in a sheath. [E, 4.]

**ÆRUA** (Lat.), n. f. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>(ru)<sup>2</sup>a<sup>3</sup>. From *Ar.*, *ἄρῦα*. A genus of amaranthaceous plants established by Jussieu. [L, 54.]—**Æ. lanata** [Jussieu]. An East Indian species distinguished by its woolly flowers. Its root (*chaya root*) contains a mucilaginous principle and has been used in strangury. [L, 54, 63.]

**ÆRUCA** (Lat.), n. f. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>(ru)<sup>2</sup>ka<sup>3</sup>. The same as *ærugo*. [Vitruvius (B).]

**ÆRUGINATUS** (Lat.), adj. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>(ru)<sup>2</sup>ji<sup>2</sup>n(gi<sup>2</sup>n)-a(a<sup>3</sup>)tu<sup>3</sup>(tu<sup>3</sup>s). For deriv., see *ÆRUGO*. Containing or made with verdigris. [B, 97.]

**ÆRUGINEOUS**, adj. E-ru<sup>2</sup>-ji<sup>2</sup>n'e-u<sup>3</sup>s. See *ÆRUGINOUS*.

**ÆRUGINOUS**, adj. E-ru<sup>2</sup>-ji<sup>2</sup>n-u<sup>3</sup>s. For deriv., see *ÆRUGO*. Lat., *æruginosus*. Fr., *ærgineux*. Ger., *kupfergrün*, *grünspanfarbig*. Resembling verdigris; green like verdigris. [L, 50.]

**ÆRUGO** (Lat.), n. f. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>(ru)<sup>2</sup>go. Gen., *æru'ginis*. From *æs*, copper, brass. Fr., *ærugeo*. Ger., *Grünspan*, *Kupfergrün*. It., *verderame*. Sp., *cardenillo*. 1. Copper rust; verdigris. 2. Rust of any kind. [B, 1, 107.]—**Æ. crystallata**, **Æ. destillata**. Crystallized acetate of copper. [B.]—**Æ. ferri**. Subcarbonate of iron. [L, 45.]—**Æ. plumbi**. Lead carbonate. [L, 50.]—**Æ. preparata**. Prepared verdigris, used as an escharotic. [B, 97.]—**Ceratum æruginis** [Russ. Ph., Ger. Ph. (1st ed.)]. Syn.: *emplastrum æruginis* [Belg. Ph. (1853)], *emplastrum viride* [Swiss Ph.]. A cerate of dark-green color containing about 45 per cent. [Belg. Ph., Russ. Ph., Ger. Ph. (1st ed.)] or 85 per cent. [Swiss Ph.] of verdigris mixed with yellow wax, pine resin, and either ordinary turpentine or larch turpentine, and in the Belg. Ph. with olive oil also. [B, 95.]—**Colica æruginis**. See *Copper colic*.—**Emplastrum æruginis**. See *Ceratum æruginis*.—**Linimentum æruginis** [Lond. Ph. (1824)]. Syn.: *mel egyptiacum*. A preparation formerly employed as a topical stimulant, consisting of 1 part of verdigris dissolved in 7 parts of vinegar and boiled with 14 of honey. [B, 97.]—**Liquor æruginis**. A solution of 3 dr. each of the subacetate of copper and of the sulphates of copper and of zinc in enough water to make 8 oz. Used as an astringent application to wounds. [B, 97.]—**Oxymel æruginis** [Dubl. Ph. (1830)]. See *Linimentum æruginis*.—**Spiritus æruginis**. Syn.: *spiritus Venetis*. A name formerly applied to glacial acetic acid obtained by the distillation of crystallized acetate of copper. [B.]—**Unguentum æruginis**. 1. See *Linimentum æruginis*. 2. A preparation of the Dubl. Ph. (1830), consisting of prepared verdigris  $\frac{1}{2}$  oz. mixed with ointment of white wax 1 lb. The *unguentum subacetatis cupri* [Ed. Ph. (1826)] was made with 1 part of verdigris and 15 parts of resin ointment. Other preparations known as *unguentum cupratum seu viride*, and *unguentum acetatis cupri*, were formerly official. [B, 97.] Cf. *ceratum æruginis*.

**ÆRUMNA** (Lat.), n. f. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>m(rum)<sup>2</sup>na<sup>3</sup>. Distress, misery; especially mental distress. [L, 50.]

**ÆRUMNALE** (Lat.), n. n. E<sup>2</sup>r(a<sup>3</sup>e<sup>2</sup>r)-u<sup>3</sup>m(u<sup>4</sup>m)-na<sup>3</sup>na<sup>3</sup>le(la). A leathern girdle for moving a patient with a broken leg from one bed to another. [L, 50.]

**ÆRUMNOSUS** (Lat.), adj. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ru<sup>2</sup>m(ru<sup>4</sup>m)-no<sup>3</sup>su<sup>3</sup>s(su<sup>4</sup>s). Oppressed with misfortune, distressed; melancholic. [L, 50.]

**ÆRVA** (Lat.), n. f. E<sup>2</sup>r'(a<sup>3</sup>e<sup>2</sup>r)-va<sup>3</sup>(wa<sup>3</sup>). See *ÆRUA*.

**ÆERYDRIASIS** (Lat.), n. f. A(a<sup>3</sup>)e<sup>2</sup>r-i<sup>2</sup>d(u<sup>4</sup>d)-ri<sup>2</sup>a(a<sup>3</sup>)si<sup>2</sup>s. Gen., *æerydrias' eos* (-a'sis). From *ἀῆρ*, air, and *ῥῑδω*, water. See *ÆEROHYDRIASIS*.

**ÆERYDRIATRICA** (Lat.), n. f. A(a<sup>3</sup>)e<sup>2</sup>r-i<sup>2</sup>d(u<sup>4</sup>d)-ri<sup>2</sup>-a<sup>2</sup>t(a<sup>3</sup>)ri<sup>2</sup>-ka<sup>3</sup>. From *ἀῆρ*, air, *ῥῑδω*, water, and *ιατρική*, the art of healing. See *ÆEROHYDROPATHIA*.

**ÆERYDROPATHIA** (Lat.), n. f. A(a<sup>3</sup>)e<sup>2</sup>r-i<sup>2</sup>d(u<sup>4</sup>d)-ro-pa<sup>2</sup>th-(pa<sup>3</sup>th)'i<sup>2</sup>-a<sup>3</sup>. See *ÆEROHYDROPATHIA*.

**ÆERYSIPELAS** (Lat.), n. f. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)ri<sup>2</sup>(ru<sup>4</sup>)-si<sup>2</sup>p'e<sup>2</sup>i<sup>2</sup>-a<sup>3</sup>s(a<sup>3</sup>s). Gen., *ærype'latos* (-tis). See *ERYSIPELAS*.

**ÆERZEN** (Ger.), v. tr. Ar'tse<sup>2</sup>n. To cure. [L, 46.]

**ÆERZTE** (Ger.), n. pl. of *Arzt* (*q. v.*).

**ÆERTZLICH** (Ger.), adj. Artzt'li<sup>2</sup>ch<sup>2</sup>. Medical. [L, 30.]

**ÆS** (Lat.), n. n. E<sup>2</sup>z(a<sup>3</sup>e<sup>2</sup>s). Gen., *æ'ris*. Gr., *χάλκος*. 1. Copper ore; copper. 2. Brass. [B, 1.]—**Æris flores**. See *Flores viridis æris*.—**Æris squama**. See *Squama æris*.—**Æ. combustum**. Copper scale; copper sulphide obtained by roasting copper. [Celsus (B, 45).]—**Æ. crematum**. See *Æ. combustum*.—**Æ. cyprum**. Cypriote brass; copper. [B.]—**Æ. pauperum**. Copper ore deprived of silver. [L, 104.]—**Æ. ustum**. 1. See *Æ. combustum*. 2. Black oxide of lead prepared by exposing molten lead to the action of the air. [B, 97.]—**Æ. viride crystallisatum**. Crystallized acetate of copper. [B, 97.]—**Flores virides æris**, **Flores viridis æris**. Normal copper acetate. [B, 48, 81, 97.]—**Flos æris**. A name given by the ancients to hemioxide of copper obtained by pouring water on the freshly melted metal or exposing the latter to the action of a blast of air [Pliny]. It is classed by Celsus among those agents which corrode the flesh ("exedunt corpus"). [B, 3, 45.]—**Liquor æris cinnamomatus**. Syn.: *miztura styptica, solutio cuprata*. A solution of sulphate of copper in cinnamon water, used as a styptic in internal hæmorrhages and in epilepsy. [B, 97.]—**Squama æris**. Copper scale; peroxide of copper obtained in the form of scales. Classed by Celsus among the styptics, corrosive agents, and purgatives. [B, 45.]—**Squama æris**

**rubri**. Red copper scale; red oxide or hemioxide of copper obtained in the form of scales. Classed by Celsus among the styptics. [B, 45.]—**Viride æris**. Dibasic cupric acetate; verdigris. [B.] See *Copper acetate*.—**Viride æris preparatum**. See *ÆRUGO preparata*.

**ÆSCHOS** (Lat.), n. n. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-ko<sup>2</sup>s(ch<sup>2</sup>o<sup>2</sup>s). Gen., *æsch'eos* (-is). Gr., *ἄσχος*. A deformity. [B, 115; Hippocrates (L, 63).]

**ÆSCHROMYTHESIS** (Lat.), n. f. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-kro(ch<sup>2</sup>ro<sup>2</sup>)-mi<sup>2</sup>th(mu<sup>4</sup>th)-e'(a<sup>3</sup>)si<sup>2</sup>s. Gen., *æschromythes'eos* (-es'is). From *αἰσχρομυθεῖν*, to use obscene language, a word applied by Hippocrates to the utterances of women in delirium. A non-classical word formed to designate the utterance of obscene language by delirious patients, such as occurs in puerperal mania. [B, 115; L, 53, 63.]

**ÆSCHRURGÆ** (Lat.), n. f. pl. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-kru<sup>2</sup>r(ch<sup>2</sup>rur)'je(ga<sup>3</sup>e<sup>2</sup>). From *αἰσχρογυῖος*, obscene. See *TRIBADES*.

**ÆSCHYNANTHIUS** (Lat.), n. f. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-ki<sup>2</sup>n(ch<sup>2</sup>u<sup>4</sup>n)-a<sup>2</sup>n(-a<sup>3</sup>n)'thu<sup>3</sup>s(thu<sup>4</sup>s). From *αἰσχύνειν*, to be ashamed, and *ἄνθος*, a flower. A genus of plants belonging to the *Cyrtandree*. [L, 64.]

**ÆSCHYNOMENE** (Lat.), n. f. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-ki<sup>2</sup>n(ch<sup>2</sup>u<sup>4</sup>n)-o<sup>2</sup>m'(-e<sup>2</sup>n-e(a)). Gen., *æschynomene*. Gr., *αἰσχυνομένη* (from *αἰσχύνειν*), to be ashamed, on account of the sensitiveness of the leaves). Fr., *æschynomène, sensitive*. Ger., *Sinnpflanze*. 1. The sensitive plant (*Mimosa pudica*). 2. A genus of papilionaceous leguminous plants belonging to the tribe *Hedysarce*. [L, 58, 64.]—**Æ. aspera** [Linnaeus]. A species employed in India as a remedy for dropsy. [B, 92.]—**Æ. grandiflora**. A species indigenous to India, used as a febrifuge. [L, 105.]—**Æ. paludosa** [Roxburgh]. A Chinese species, the stalks of which are used in making the so-called rice-paper. [B, 93.]

**ÆSCIGENIN**, n. E<sup>2</sup>s-si<sup>2</sup>'je<sup>2</sup>n-i<sup>2</sup>n. From *æsculus* (*q. v.*), and *γεννᾶν*, to beget. Fr., *æscigénine*. Ger., *Æscigenin*. Also written *æscigenin*. A substance said to have the composition C<sub>12</sub>H<sub>22</sub>O<sub>2</sub>, found in the seeds of the horse-chestnut (*Æsculus hippocastanum*). [B, 2.]

**ÆSIGLYCOL**, n. E<sup>2</sup>s-i<sup>2</sup>-gli-ko<sup>2</sup>l'. For deriv., see *ÆSCULUS* and *GLYCOL*. Fr., *ësiglycol*. Ger., *Æsiglycol*. Also written *ësiglycol*. The first member of a series of compounds, imagined by Rochleder, which are all derivatives of the proximate principles found in the seeds of the horse-chestnut, and which may be regarded as formed from glycol and its derivatives by the addition of the molecule C<sub>2</sub>H<sub>4</sub>. Thus, from glycol, glycolal, glycollic acid, glyoxal, glyoxalic acid, and oxalic acid, are formed *ësiglycol*, *ësiglycolal*, *ësiglycollic acid*, *ësiglyoxal*, *ësiglyoxalic acid*, and *ësigloxalic acid*. [B, 2.]

**ÆSIGLYCOLAL**, n. E<sup>2</sup>s-i<sup>2</sup>-gli'ko<sup>2</sup>l-a<sup>2</sup>l'. For deriv., see *ÆSCULUS* and *GLYCOLAL*. Fr., *ësiglycolal*, *ësiglycolal*. Ger., *Æsiglycolal*. Also written *ësiglycolal*. A substance of the composition C<sub>2</sub>H<sub>4</sub>O<sub>2</sub> = C<sub>2</sub>H<sub>4</sub>O<sub>2</sub> (glycolal) + C<sub>2</sub>H<sub>4</sub>, bearing thus the same relation to glycolal that *ësiglycol* does to glycol. [B, 2.]—**Diformyl-ic æ**. *Æsorcin*, so called because it may be regarded as æ. combined with a double molecule of formyl. [B, 2.]

**ÆSIGLYCOLLIC ACID**, n. E<sup>2</sup>s'i<sup>2</sup>-gli-ko<sup>2</sup>l'i<sup>2</sup>k'. For deriv., see *ÆSCULUS* and *GLYCOLLIC*. Fr., *ësiglycollique* (ou *ësiglycolique*). Ger., *Æsiglycolsäure*. Also written *ësiglycollic*. A substance of the composition C<sub>2</sub>H<sub>4</sub>O<sub>2</sub>, obtained by the action of sodium amalgam upon quercetin and bearing the same relation to glycollic acid that *ësiglycol* bears to glycol. [B, 2.]

**ÆSIGLYOXAL**, n. E<sup>2</sup>s-i<sup>2</sup>-gli-o<sup>2</sup>x'a<sup>2</sup>l'. For deriv., see *ÆSCULUS* and *GLYOXAL*. Fr., *ësiglyoxal*, *ësiglyoxal*. Ger., *Æsiglyoxal*. Also written *ësiglyoxal*. A substance of the composition C<sub>2</sub>H<sub>4</sub>O<sub>2</sub>, bearing the same relation to glyoxal that *ësiglycol* bears to glycol. [B, 2.]—**Diformyl-ic æ**. A name given to *æsculetin* on the supposition that it is made up of æ. combined with a double molecule of formyl. [B, 2.]

**ÆSIGLYOXALIC ACID**, n. E<sup>2</sup>s'i<sup>2</sup>-gli-o<sup>2</sup>x'a<sup>2</sup>l'i<sup>2</sup>k'. For deriv., see *ÆSCULUS* and *GLYOXALIC ACID*. Fr., *ësiglyoxalique* (ou *ësiglyoxalique*). Ger., *Æsiglyoxalsäure*. Also written *ësiglyoxalic*. A substance of the composition C<sub>2</sub>H<sub>4</sub>O<sub>2</sub>, bearing the same relation to glyoxalic acid that *ësiglycol* bears to glycol. In combination with phloroglucin it is said to constitute the tannin of the horse-chestnut. [B, 2.]

**ÆSCINIC ACID**, n. E<sup>2</sup>s-i<sup>2</sup>n'i<sup>2</sup>k'. For deriv., see *ÆSCULUS*. Fr., *acide ëscinique* (ou *ëscinique*). An amorphous-acid substance formed by the action of alkalis upon argyræscin and aphrodæscin. [B, 14, 81.]

**ÆSCIOXALIC ACID**, n. E<sup>2</sup>s'i<sup>2</sup>-o<sup>2</sup>x'a<sup>2</sup>l'i<sup>2</sup>k'. For deriv., see *ÆSCULUS* and *OXALIC ACID*. Fr., *acide ëscioxalique* (ou *ëscioxalique*). Ger., *Æscioxalsäure*. Also written *ëscioxalic*. A substance of the composition C<sub>2</sub>H<sub>4</sub>O<sub>4</sub>, formed by the action of potash upon *æsculetin*, and bearing the same relation to oxalic acid that *ësiglycol* bears to glycol. [B, 2.]

**ÆSCULACEÆ**, **ÆSCULEÆ** (Lat.), n's pl. E<sup>2</sup>s(a<sup>3</sup>e<sup>2</sup>s)-ku<sup>2</sup>-(ku)'la(a<sup>3</sup>)s'e(ke<sup>2</sup>)-e(a<sup>3</sup>e<sup>2</sup>). -ku<sup>2</sup>(ku)'le<sup>2</sup>-e(a<sup>3</sup>e<sup>2</sup>). Fr., *æsculacees*. Ger., *Æsculaceen*. See *HIPPOCASTANÆÆ*.

**ÆSCULETIN**, n. E<sup>2</sup>s-ku<sup>2</sup>'le<sup>2</sup>t-i<sup>2</sup>n. For deriv., see *ÆSCULUS*. Fr., *ësculetine*, *ësculetine*. Ger., *Æsculetin*. It., *ësculetina*. Also written *ësculetin*. A substance derived from the decomposition of *æsculin*, forming acicular or laminar crystals, nearly insoluble in water and in alcohol and having the composition C<sub>6</sub>H<sub>8</sub>O<sub>4</sub> + H<sub>2</sub>O = C<sub>6</sub>H<sub>8</sub>(CH.O)(C.OH)(C.OH)(OH) + H<sub>2</sub>O. It has an isomeric form, *paræsculetin*. [B, 2, 4.]

**ÆSCULETINIC ACID**, n. E<sup>2</sup>s-ku<sup>2</sup>'le<sup>2</sup>t-i<sup>2</sup>n'i<sup>2</sup>k'. Fr., *acide ësculetinique*. An acid produced, along with glucic and apogluccic acids, by decomposing *æsculin* with baryta. [B, 81.]

**ÆSCULIC ACID**, n. E<sup>2</sup>s-ku<sup>2</sup>'li<sup>2</sup>k'. Fr., *acide ësculique*. It., *acido ësculico*. See *SAPOGENIN*.

**ÆSCULIN**, n. E<sup>2</sup>s'ku<sup>2</sup>-li<sup>2</sup>n. For deriv., see *ÆSCULUS*. Fr.,

*esculina*, *æsculina*. Ger., *Aesculin*. It., *esculina*. Also written *esculin*. A glucoside of the formula  $C_{15}H_{16}O_6 + 2H_2O$ , obtained from the bark of the horse-chestnut (*Aesculus hippocastanum*) and other trees of the genera *Aesculus* and *Pavia*. It forms white prismatic crystals, of slightly bitter taste, dissolving readily in hot water and in alcohol, the aqueous solution having a marked blue fluorescence. On treatment with dilute acids it splits up into glucose and *aesculetin*. *Æ* is isomeric with *daphnin*. It has been used as a remedy in malaria in 15-grain doses. [B, 2, 4, 5.]

**ÆSCULINEÆ** (Lat.), n. f. pl.  $E^2s(a^3e^2s)-ku^2(ku)-li^2n'e(a)-e(a^3e^2)$ . For deriv., see **ÆSCULUS**. Fr., *æsculacées*. Ger., *Aesculineen*, *Roskastaniengewächse*. In Eichler's classification, an order (corresponding to a cohort of other systems) of the series *Encycliceæ*. It is distinguished by its five-parted flowers with double or triple-celled ovary and by the arrangement of the stamens, which are disposed in a double row, and are usually inserted on a disk separating them from the corolla; more rarely they are united to form a single tube. There are regularly 10 stamens, but a certain number are usually suppressed. The *Æ* comprise five families (orders of other systems): *Sapindaceæ*, *Acerineæ*, *Hippocastaneæ* (both included by Bentham and Hooker among the *Sapindaceæ*), *Erythroxylaceæ*, and *Polygalineæ*. The order nearly corresponds to the classes *Acera* and *Polygalineæ* of Endlicher's system. [B, 35, 42, 48.]

**ÆSCULUS** (Lat.), n. f.  $E^2s(a^3e^2s)-ku^2(ku)-lu^2s(lu^4s)$ . From *æscu*, food. Also written *esculus*. 1. As used by the ancients, the Italian oak (*Quercus æsculus*), or perhaps the holm-oak (*Quercus ilex*) or beech (*Fagus sylvatica*). [L, 58.] 2. A Linnean genus of trees and shrubs belonging to the natural order *Sapindaceæ*, tribe *Hippocastaneæ*, distinguished by the presence of opposite digitate leaves, a three-celled ovary with 2 ovules in each cell, coriaceous fruit with thick inseparable cotyledons, and flowers arranged in terminal panicles, racemes, or thyrses. [B, 34.]—*Æ. glabra* [Willdenow]. Syn.: *Pavia ohioensis* [Michaux]. Ohio buckeye; a small tree growing along the banks of the Ohio. A remedy obtained from it is said to be useful in portal congestion. [B, 34; L, 61.]—*Æ. hippocastanum* [Linnaeus]. Fr., *marronnier* (ou *châtaignier*) d'Inde. Ger., *Roskastanie*. It., *castagno d'India*. Sp., *castaño de Indias*. Horse-chestnut. A species indigenous to northern Asia, but cultivated throughout Europe and North America. It is a tree 40 or 50 feet in height, bearing pink or white flowers and large dark-brown seeds. The fruit contains tannic acid, starch, a fixed oil, and a bitter glucoside *æsculin* (q. v.). Deprived of the latter by treatment with alkalies, it has been used as food, roasted, it has been given in atony of the uterus, and the powdered kernel of the fruit has been used as a sternutatory. The fixed oil has been employed as a local application in rheumatism and gout. The capsules of the fruit contain *capsulescic acid* (q. v.). The bark contains *fraxin* and tannic acid, and has been given as a remedy in intermittents. [B, 5, 34; L, 77.]—*Æ. macrostachya* [Michaux]. Syn.: *Æ. parviflora* [Walter]. A shrub 2 to 3 feet high, growing in Georgia and South Carolina. The fruit is edible. [B, 34; L, 105.]—*Æ. ohioensis*, *Æ. ohiotensis*. Ohio buckeye. [L, 63.] See *Æ. pavia*.—*Æ. parviflora*. See *Æ. macrostachya*.—*Æ. pavia* [Linnaeus]. Fr., *marronnier à fleurs écarlates*. Syn.: *Pavia* [De Candolle]. Red buckeye. A shrub 3 to 10 feet high growing in the Southern United States, bearing irregular red flowers arranged in thyrses. The bark has been used as a febrifuge, and the fruit is said to be poisonous, producing symptoms analogous to those of strychnine poisoning. [B, 34; L, 61, 77.]—*Æ. rubicunda*. See *Æ. pavia*.

**ÆSECAVUM** (Lat.), n. n.  $E^2s(a^3e^2s)-e^2k-a(a^3y)vu^2m(wu^4m)$ . Deriv., uncertain. Brass made by the union of copper and calamine. [L, 97.]

**ÆSORCEIN**, n.  $E^2s-o^3r/se-i^2n$ . For deriv., see **ÆSCULUS** and **ORCEIN**. Fr., *æsorcéine*, *ésorcéine*. Ger., *Aesorcein*. Also written *esorcein*. A substance of the composition  $C_9H_7NO_6$ , derived from parasculetin by the addition of ammonia. [B, 2.]

**ÆSORCIN**, n.  $E^2s-o^3r/si^2n$ . For deriv., see **ÆSCULUS** and **ORCEIN**. Fr., *ésorcine*, *æsorcine*. Ger., *Aesorcin*. Also written *esorcin*. An acid substance, isomeric with caffeic acid, derived from *aesculetin* and having the composition  $C_8H_6O_4$ , being that of *orcin* with a double molecule of carboxyl added. [B, 2.]

**ÆSTATES** (Lat.), n. f., pl. of *æstat*, summer.  $E^2s(a^3e^2s)-ta(ta^3y)-tez(te^2s)$ . Ephelides (see **EPHELIS**); lentigo (q. v.).

**ÆSTCHEN** (Ger.), n.  $As^2t/ch^2e^2n$ . Dimin. of *As*. A twig; a small branch. [L, 30.]

**ÆSTE** (Ger.), n., pl. of *As* (q. v.).  $As^2te^2$ .

**ÆSTEMATONUSI** (Lat.), n. f. pl.  $E^2s(a^3e^2s)-te^2m-a^2t(a^3t)-o-nu^2(nu)/si(ne)$ . See **ÆSTEMATOLOGUS**.

**ÆSTHEMA** (Lat.), n. n.  $E^2s(a^3e^2s)-the(thay)ma^2$ . Gen., *æsthematos* (-tis). Gr., *αἰσθημα* (from *αἰσθάνεσθαι*, to perceive, perception, sense). Fr., *æsthème*. 1. Sensation. 2. In pl., *æsthemata*, the organs of the senses. [C.]

**ÆSTEMATOLOGY**, n.  $E^2s-the^2m-a^2t-o^2l'o-jii^2$ . For deriv., see **ÆSTHEMA** and **-logy**.\* Lat., *æsthematologia*. Fr., *æsthématologie*. A treatise on sensation and the organs of sensation. [C.]

**ÆSTEMATONUSI** (Lat.), n. f. pl.  $E^2s(a^3e^2s)-the^2m-a^2t(ma^3t)-o-nu^2(nu)/si(se)$ . From *αἰσθημα*, sensation, and *νόσος* (Ionic, *νόσος*), a disease. Diseases of sensation or of the organs of sense. [L, 50.]

**ÆSTEMATORGANON** (Lat.), n. n.  $E^2s(a^3e^2s)-the^2m-a^2t(a^3t)-o^2r/ga^3n-o^2n$ . From *αἰσθημα*, sensation, and *ὄργανον*, an organ. An organ of sense. [L, 50.]

**ÆSTEMATORGANUSI**, **ÆSTEMATORGANUSI** (Lat.), n's f. pl.  $E^2s(a^3e^2s)-the^2m-a^2t(a^3t)-o^2r-ga^3n-o^2-nu^2(nu)/si(se)$ ,  $ga^3n-u^2(nu)/si(se)$ . Diseases of the organs of sensation. [L, 50.]

**ÆSTHESIA** (Lat.), n. f.  $E^2s(a^3e^2s)-the(thay)zi^2(si^2)-a^2$ . See **ÆSTHESIS**.

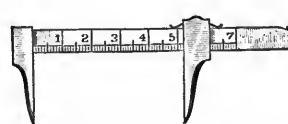

**ÆSTHESIMETER**, n.  $E^2s-the^2s-i^2m'e^2t-u^6r$ . See **ÆSTHESIMETER**.

**ÆSTHESIOGÈNE** (Fr.), n.  $As-taz-i^2-o^2-zhe^2n$ . A term applied by Charcot to any agent which, like the metals, exerts a specific action upon sensibility. [D, 71.]

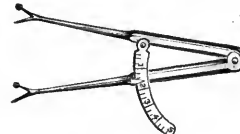

**ÆSTHESIOGRAPHY**, n.  $E^2s-thez-i^2-o^2-g'ra^2-fi^2$ . From *αἰσθησις*, sense, and *γράφειν*, to write. Lat., *æsthesiographia*. Fr., *æsthesiographie*. It., *estesiografia*. A description of the organs of sense. [C.]

**ÆSTHESIOLOGY**, n.  $E^2s-thez-i^2-o^2-l'o-jii^2$ . For deriv., see **ÆSTHESIS** and **-logy**.\* Fr., *æsthésiologie*. It., *estesiologia*. Sp., *estesiologia*. See **ÆSTHETOLOGY**.

**ÆSTHESIMETER**, n.  $E^2s-thez-i^2-o^2-m'e^2t-u^6r$ . From *αἰσθησις*, sensation, and *μέτρον*, a measure. Fr., *æsthésimètre*. Ger., *Aesthesiometer*. It., Sp., *estesiometro*. Also written *æsthesiometer* and *æsthesimeter*. An instrument invented by Sievekink for determining the degree of acuteness of tactile sensibility. In all its

SIEVEKING'S ÆSTHESIMETER.

CARROLL'S ÆSTHESIMETER.

modifications it consists essentially of two movable points, which, being placed upon the skin, are approximated until the two tactile sensations afforded by them are blended into one, and but a single point is felt. The distance between the two points, which is indicated by a graduated scale attached to the instrument, is inversely proportional to the delicacy of tactile sensibility. [B.]

**ÆSTHESIMETRY**, n.  $E^2s-thez-i^2-o^2-m'e^2t-ri^2$ . Fr., *æsthésiométrie*. Ger., *Aesthesiometrie*. Measurement of tactile sensibility by means of the *æsthesiometer*.

**ÆSTHESIONEUROSIS** (Lat.), n. f.  $E^2s(a^3e^2s)-thez(thas)-i^2-o-nu^2-ro/si^2s$ . Gen., *æsthesioneurosis* (-ro/sis). Ger., *Aesthesioneurose*, *Empfindungsneurose*. A disturbance of the sensory function of the nervous system. [D, 35.]

**ÆSTHESIS** (Lat.), n. f.  $E^2s(a^3e^2s)-the(thay)si^2s$ . Gen., *æsthesios* (-the/sis). From *αἰσθάνεσθαι*, sensation, sense. Fr., *æsthésie*. 1. Sensation or feeling. 2. The capacity for sensation; sensibility. [B, 78, 93.]

**ÆSTHESODIC**, adj.  $E^2s-the-so^2d'i^2k$ . From *αἰσθησις*, sensation, and *ὁδός*, a way. Fr., *æsthésodique*. Serving to convey sensation, as the gray substance of the spinal cord. [K, 3.]

**ÆSTHETERION**, **ÆSTHETERIUM** (Lat.), n's n.  $E^2s(a^3e^2s)-the^2t-e(a^3y)ri^2-o^2n$ ,  $-u^3m(u^4m)$ . Gr., *αἰσθητήριον*. Fr., *æsthétère*. See **SENSORIUM**.

**ÆSTHETIC**, adj.  $E^2s-the^2t'i^2k$ . Gr., *αἰσθητικός*. Lat., *æstheticus*. Fr., *esthétique*. Ger., *ästhetisch*. It., *estetico*. Pertaining to æsthesia. [L, 107.]

**ÆSTHETICA** (Lat.), n. n., pl. of adj. *æstheticus*.  $E^2s(a^3e^2s)-the^2t'i^2k-a^3$ . Lit., things which relate to the perception or understanding; in Good's nosology, an order of the fourth class of diseases (*Neurotica*), characterized by dullness, deprivation, or abolition of one or more of the external organs of sense. [L, 83.]

**ÆSTHETICS**, n.  $E^2s-the^2t'i^2ks$ . Fr., *esthétique*. Ger., *Aesthetik*. It., *estetica*. The science treating of the sensations or perceptions. [L, 107.]

**ÆSTHETOS** (Lat.), adj.  $E^2s(a^3e^2s)-the(thay)to^2s$ . Gr., *αἰσθητός*. Acquired through the medium of the senses. [B, 115; L, 50.]

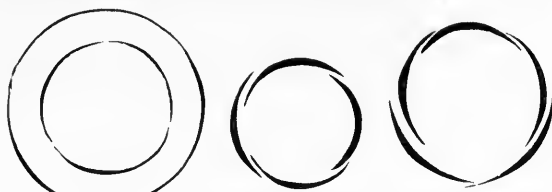

**ÆSTIG** (Ger.), adj.  $As^2t'i^2g$ . Branching; full of branches. [L, 30.]

**ÆSTIVAL**, adj.  $E^2s-ti^2va^2l$ . Lat., *æstivalis* (from *æstivus*, belonging to the summer). Fr., *estival*. It., *estivale*. Sp., *estival*. Belonging to the summer. In botany, applied to a plant which is produced, grows, and flowers during the course of one summer. [B.]

**ÆSTIVATIO** (Lat.), n. f.  $E^2s(a^3e^2s)-ti^2-va(wa^3)/she(ti^2)-o$ . Gen., *æstivatio/nis*. *Æstivation*. [B, 1.]—*Æ. alternativa*. Alternate *æstivation*. [B, 1.]—*Æ. amplexa*. Convolute *æstivation*. [L, 63.]—*Æ. calycularis*. Calycular *æstivation*. [B, 1.]—*Æ. carinalis*. Carinal *æstivation*. [B, 1.]—*Æ. cochlearis*. Cochlear *æstivation*. [B, 1.]—*Æ. contorta*. Contorted *æstivation*. [B, 1.]—*Æ. convoluta*. Convolute *æstivation*. [B, 1.]—*Æ. corrugata*. Plicate *æstivation*; especially the irregularly plicate, or crumpled *æstivation*. [B, 1; L, 63.]—*Æ. equitativa*. Equitant *æstivation*. [B, 1; L, 63.]—*Æ. induplicativa*. Induplicate *æstivation*. [B, 1.]—*Æ. plicativa*. Plicate *æstivation*. [B, 1.]—*Æ. quincuncialis*. Quincuncial *æstivation*. [B, 1.]—*Æ. reduplicativa*. Reduplicate *æstivation*. [B, 1.]—*Æ. spiralis*. Spiral *æstivation*. [B, 1.]—*Æ. supervolutiva*. Supervolute *æstivation*. [B, 1.]—*Æ. valvaris*. *Æ. valvata*. Valvate *æstivation*. [B, 1.]—*Æ. vexillaris*. Vexillary *æstivation*.

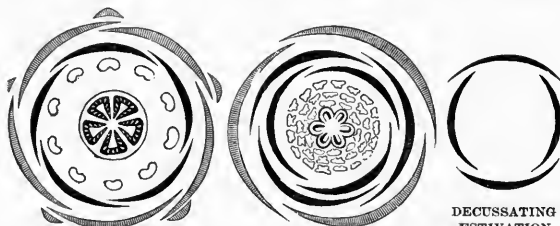

**ÆSTIVATION**, n.  $E^2s-ti^2v-a^3shu^3n$ . Lat., *æstivatio*. Fr., *estivation* [Linnaeus], *préfloraison*. Ger., *Knospendeckung*. It., *estivazione*. Sp., *estivación*. Syn.: *præfloration* (1st def.). 1. The arrangement of the parts of the flower, and especially of the floral envelopes, while yet in the bud. [B, 2.] 2. The time of flowering. [L, 3.] 3. The dormant condition of some animals during the summer. [L, 56.]—*Alternate æ.* Lat., *æstivatio alternativa*. Fr., *præfloraison alternative*. Ger., *abwechselnde Knospendeckung*. That variety of æ. in which the separate pieces of the calyx or co

rolla are disposed in two concentric rows and in such manner that the centre of each piece in the inner row is opposite the interspace between two adjacent pieces in the outer row. *Decussate æ.* is a particular variety of this form of æ. [B, 35, 104.]—**Alternate imbricate æ.** Fr., *préfloraison imbriquée alternative*. A form of imbricate æ. in which, when there are 4 pieces in the calyx or corolla, the first is wholly external, overlapping the second and fourth by either margin, while they in turn overlap the third, which is

ALTERNATE ÆSTIVATION. (AFTER THOMÉ.) ALTERNATE IMBRICATED ÆSTIVATION. (AFTER DE LANESSAN.) COCHLEAR ÆSTIVATION. (AFTER DE LANESSAN.)

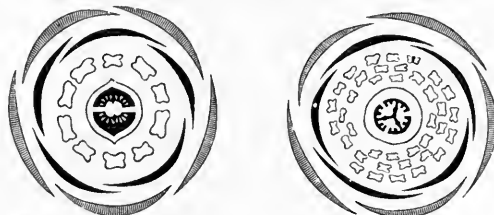

wholly internal. [B, 106.]—**Calycular æ.** Lat., *æstivatio calycularis*. Fr., *préfloraison caliculaire*. A form of æ. in which the pieces of calyx or corolla are arranged in two concentric rows, the outer row covering in only the bases of the pieces in the inner row. [B, 1.]—**Carinal æ.** Lat., *æstivatio carinalis*. Fr., *préfloraison carinale*. A variety of imbricate æ. in which the carina is enlarged and is folded over the other parts, as is the vexillum in vexillary æ. [B, 77.]—**Circular æ.** A general term for æ. in which the separate pieces are situated on the same level and are parts of a single complete whorl; valvate and contorted æ. as distinguished from imbricate æ. [B, 77, 104.]—**Cochlear æ.** Lat., *æstivatio cochlearis*. Fr., *préfloraison cochleaire*. A variety of imbricate æ. in which one piece of the calyx or corolla is wholly internal, being overlapped at either edge by the two adjacent pieces, which are in turn overlapped at their farther edges by the next pair of pieces. By some, cochlear æ. is regarded as identical with vexillary æ., from which in five-parted flowers it usually differs but little except in the position of the piece which lies external to the rest. [B, 77, 104, 106.]—**Contorted æ.** *Contortive æ.* Lat., *æstivatio contorta*. Fr., *préfloraison tordue*. Ger., *gerollte oder gedrehte Knospendeckung*. That form of æ. in which each piece of the calyx or corolla overlaps one of the two pieces adjoining and is overlapped by the other. [B, 34.]—**Convolute æ.** Lat., *æstivatio convolutiva*. Fr., *préfloraison convolutive ou enveloppante*. Ger., *ganz umfassende Knospendeckung*. A variety of imbricate æ. in which each piece of the calyx or corolla envelops completely the pieces next within it. [B, 34, 104.]—**Corrugated æ.** **Crumpled æ.** Fr., *préfloraison corrugative*. See *Plicate æ.*—**Decussating æ.** Lat., *æstivatio decussativa*. Fr., *préfloraison decussée*. A variety of alternate æ. in which there are 4 pieces in the floral envelope, the first and third of which are wholly external and overlap by either edge the second and fourth, which are wholly internal. [B, 106.]—**Enveloping æ.** See *Convolute æ.*—**Equitant æ.** Lat., *æstivatio equitativa*. Fr., *préfloraison équitative*. That variety of imbricated æ. in which one piece overrides one or more others as in the *Papilionaceæ*. It comprises *vexillary æ.* and *carinal æ.* [B, 1, 38.]—**Folded æ.** See *Plicate æ.*—**Imbricate æ.** **Imbricated æ.** **Imbricative æ.** Lat., *æstivatio imbricativa*. Fr., *préfloraison imbricative ou imbriquée*. Ger., *dachziegelige Knospendeckung*. That form of æ. in which one or more of the pieces of the calyx or corolla are external, overlapping by either margin the pieces adjoining. It comprises *alternate imbricate æ.*, *triquetrous æ.*, *convolute æ.*, and, according to some, *quincuncial æ.*, *cochlear æ.*, *vexillary æ.*, and *carinal æ.*, but, according to others,

CONTORTED ÆSTIVATION. CONVOLUTE ÆSTIVATION. (AFTER CAUVET.) DECUSSATING ÆSTIVATION. (AFTER DE LANESSAN.)

these latter should be regarded as distinct varieties of æ. [B, 34, 77, 104, 106.]—**Induplicate æ.** **Induplicative æ.** Lat., *æstivatio induplicativa*. Fr., *préfloraison valvaire indupliquée ou induplicative*. Ger., *einwärtsgeschlagene Knospendeckung*. See *Valvate æ.*—**Plicate æ.** Lat., *æstivatio plicativa*. Fr., *préfloraison chiffonnée ou plicative*. Ger., *zerknitterte Knospendeckung*. A form of æ. occurring in monopetalous flowers in which the undivided corolla is folded or crumpled upon itself. It includes a number of varieties, of which *supervolute æ.* is one. [B, 1, 34, 104.]—**Quincuncial æ.** Lat., *æstivatio quincuncialis*. Fr., *préfloraison quincunciale*. Ger., *fünfschichtige Knospendeckung*. A variety of imbricate æ. occurring in five-parted flowers in which 2 of the five pieces of which the calyx or the corolla is made up lie

wholly outside, 2 lie wholly inside, and the fifth lies with one extremity outside overlapping one of the pieces of the inner row, and with the other extremity inside overlapped by one of the pieces of the outer row. [B, 34.]—**Reduplicate æ.** **Reduplicative æ.** Lat., *æstivatio reduplicativa*. Fr., *préfloraison reduplicative ou*

IMBRICATE ÆSTIVATION. (AFTER CAUVET.) QUINCUNCIAL ÆSTIVATION. (AFTER DE LANESSAN.)

*redupliquée*. Ger., *auswärtsgeschlagene Knospendeckung*. See *Valvate æ.*—**Simple valvate æ.** Fr., *préfloraison valvaire simple*. See *Valvate æ.*—**Spiral æ.** Lat., *æstivatio spiralis*. Fr., *préfloraison spirale*. 1. Quincuncial æ. [B, 77.] 2. A variety of æ. in

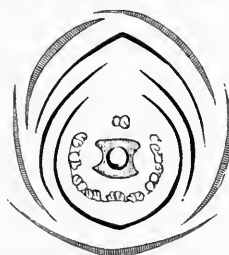

SPIRAL ÆSTIVATION. (AFTER CAUVET.) TRIQUETROUS ÆSTIVATION. (AFTER DE LANESSAN.)

which the separate pieces of calyx or corolla are very numerous and form a spiral series, each piece in which covers in in part the succeeding piece. [B, 104.]—**Supervolute æ.** Lat., *æstivatio*

VALVATE ÆSTIVATION. (AFTER CAUVET.) a, simple; b, induplicate; c, reduplicate.

*supervolutiva*. Fr., *préfloraison supervolutive*. A variety of plicate æ. in which the folds of the corolla all have an oblique turn in the same direction. [B, 34.]—**Triquetrous æ.** Fr., *préfloraison triquètre*. A variety of imbricate æ. in which the pieces of calyx or corolla are arranged in sets of 3, one piece in each set lying external, another internal, and the third with one margin external and the other margin internal. [B, 34.]—**Twisted æ.** See *Contorted æ.*—**Valvate æ.** Lat., *æstivatio valvaris* sen *valvata*. Fr., *préfloraison valvaire*. Ger., *klappige Knospendeckung*. That form of æ. in which the separate pieces of the calyx or corolla meet at their margins without overlapping. It comprises *simple valvate æ.*, in which the edges of the several pieces are not turned either inward or outward; *induplicate æ.*, in which the edges are involute or bent inward; and *reduplicate æ.*, in which the edges are revolute or bent outward. [B, 34, 104.]—**Vexillary æ.** Lat., *æstivatio vexillaris*. Fr., *préfloraison vexillaire*. Ger., *fahnenförmige Knospendeckung*. That form of imbricate æ. in which a single piece (the vexillum) becomes enlarged and is folded over the other parts of the bud. [B, 34, 77.]

VEXILLARY ÆSTIVATION. (AFTER CAUVET.)

**ÆSTIVUS** (Lat.), adj. E<sup>2</sup>s(a<sup>3</sup>-e<sup>2</sup>s)-ti(te)/vu<sup>2</sup>s(wu<sup>4</sup>s). Æstival.

**ÆSTUANT**, adj. E<sup>2</sup>s(tu<sup>2</sup>-a<sup>2</sup>nt. Lat., *æstuan*s (from *æstuar*e, to be boiling hot). Fr., *æstuant*. That which ferments or is boiling. [L, 41.]

**ÆSTUARIUM** (Lat.), n. n. E<sup>2</sup>s(a<sup>3</sup>-es)-tu<sup>2</sup>(tu)-ar(a<sup>3</sup>r)/i<sup>2</sup>-u<sup>2</sup>m-(u<sup>4</sup>m). From *æstus*, burning heat. 1. Lit., a place where currents of water meet, an estuary. 2. A vapor bath. 3. A tube through which a hot iron is introduced to a part to be cauterized. [B, 78.]

**ÆSTUATIO** (Lat.), n. f.  $E^2(a^3e^2s)-tu^2(tu)-a(a^3)/she(t)^2-o$ . Gen., *æstuatio* nts. 1. A heating; also the boiling up or agitation of liquids when mixed. [L. 50, 97.] 2. The heated state of the body or blood in fever. [Sydenham (B. 90).]

**ÆSTUS** (Lat.), n. m.  $Es(a^3e^2s)-tu^2(su^4s)$ . Gen., *æstus*. A burning heat; a burning. [L. 50.]—**Æ. volaticus**. A sudden transitory heat and flushing of the face. [L. 84.]

**ÆTÆ LAGHAS**, n. See *CASSIA fistula*.

**ÆTAS** (Lat.), n. f.  $E(a^3e^2)-ta^2s(ta^3s)$ . Gen., *ætatis*. Contracted from *ævitās*, from *ÆVUM* (Gr., *αἰών*), age or life-time. Age; period of life. [B.]—**Æ. affecta**. Advanced age. [B.]—**Æ. bona**. See **ADOLESCENCE**.—**Æ. crepita**, **Æ. decrepita**. Extreme old age. [L. 63.]—**Æ. firmata**. The prime of life. [L. 107.]—**Æ. inævus**. Childhood. [B.]—**Æ. infirma**. Old age. [B.]—**Æ. ingravescens**. The beginning of old age. [L. 107.]—**Æ. integra**. The flower of youth. [B.]—**Æ. mala**. Old age. [Plantus (B).]—**Æ. matura**. Mature age; manhood. [L. 107.]—**Æ. media**. Middle life. [Celsus (B).]—**Æ. provecta**. See **Æ. senecta**.—**Æ. puerilis**. Boyhood. [Celsus (B).]—**Æ. senecta**, **Æ. senilis**. Old age. [Celsus (B); L. 63.]—**Æ. virilis**. Manhood. [L. 63.]

**ÆTHAL**, n.  $E'tha^2$ . For deriv., see **ÆTHAL**. Fr., *éthale*. Ger., *Äthäl*. Ethal. [B.] See **CETYL ALCOHOL**.

**ÆTHALE** (Lat.), n. f.  $E'(a^3e^2)-tha^3-le(la)$ . Gr., *αιθαλή*. Soot. [B. 111.]

**ÆTHALES** (Lat.), n. f.  $E'(a^3e^2)-tha^3-lez(e^2s)$ . Gen., *æthal'leos* (-is). Gr., *αιθαλής* = *αἰθάλῃς*, evergreen. The *Sempervivens tectorum*. [B. 109, 115.]

**ÆTHALINEI** (Lat.), n. m. pl.  $E(a^3e^2)-tha^3-i^2n^2e^2(i-e)$ . For deriv., see **ÆTHALUM**. Fr., *æthaliens*. In the older classifications, a tribe of gasteromycetous *Fungi* belonging to the suborder *Trichodermacei*, section *Myxogastres*, including the genus *Æthaliium*. The members of this group are now placed among the *Mycomycetes*, and by some are regarded as belonging to the animal kingdom. [B. 48.]

**ÆTHALIUM** (Lat.), n. n.  $E^2th(a^3e^2th)-a^2(a^3l)^{13}-u^3m(u^4m)$ . From *αιθαλος*, soot (2d and 3d defs). 1. Ethal. [B. 120.] 2. A process having the form of a flattened cake or cushion springing directly from the plasmodium in certain *Mycomycetes*, and constituting the spore-bearing body or product of fructification. 3. A genus of *Mycomycetes*, including individuals now classed under *Fuligo*. [B. 54, 75.]—**Æ. septicum**, **Æ. vaporarium**, **Æ. violaceum**, **Wood**, etc. See **FULIGO varians**.

**ÆTHALSÄURE** (Ger.), n. A- $ta^3l$ -zoi-re. Palmitic acid. [B.]

**ÆTHALUS** (Lat.), n. m.  $E^2th'(a^3e^2th)-a^2(a^3l)-u^3s(u^4s)$ . From *αιθαλος*, soot. The soot-grape; a variety of grape indigenous to Egypt mentioned by Pliny. [B. 114.]

**ÆTHAMIN** (Ger.), n. A- $ta^3$ -men. Ethylamine. [B. 48.]

**ÆTHAN** (Ger.), n. A- $ta^3n'$ . Ethane. [B.]

**ÆTHEN** (Ger.), n. A-tan'. Ethene (ethylene). [B.] For compounds, see **ÆTHYLEN**.—**A'hydroxydisulfonsäure**. Ethylenehydroxydisulfonic acid. [B.]—**A'milchsäure**. Ethylene lactic acid. [B.] See **LACTIC ACID**.—**A'protocatechusäure**. Ethyleneprotocatechuic acid. [B.]—**A'trisulfonsäure**. Ethylenetrisulfonic acid. [B.]

**ÆTHENYL** (Ger.), n. A-ta-nu'. Ethenyl. [B.]—**A'bromür-diäthylat**. Ethenyl bromide diethylate; bromoacetal. [B. 4.]—**A'chlorüräthylat**. Ethenyl chloride diethylate hydrate. [B. 4.]—**A'chlorüräthylat**. Ethenyl chloride diethylate; chloroacetal. [B. 4.]—**A'chloroxyd**. Ethenyl oxychloride; mono-chloraldehyde. [B.] See **CHLORALDEHYDE**.—**A'dichlorüräthylat**. Ethenyl dichloride diethylate; bichloroether. [B. 4.]—**A'hydrat-diäthylat**. Ethenyl hydrate diethylate; oxyacetal. [B. 4.]—**A'hydratoxyd**. Ethenyl hydrated oxide; oxyaldehyde. [B. 4.]—**A'triacetat**. Ethenyl triacetate. [B.]—**A'triäthylat**. Ethenyl triethylate. [B.]—**A'tribromür**. Ethenyl tribromide. [B.]—**A'tricarboxylsäure**. Ethenyltricarboxylic acid. [B.]—**A'trichlorür**. Ethenyl trichloride. [B.]

**ÆTHÉOGAMES** (Fr.), n. pl. A-ta-o-ga<sup>m</sup>. More properly *Æthéogames*. The cryptogams or members of the division *Aethéogamia*. [B.]

**ÆTHÉOGAMIA** (Lat.), n. f.  $A(a^3)-e(a)-the(th)a-o-ga^2m(ga^2m)^{12}-a^3$ . From *αἰθήρ*, unusual, and *γάμος*, marriage. Fr., *æthéogamie*, *æthéogamie*. Ger., *Aethéogamie*. Aethéogamy; a term applied by Palisot de Beauvois to the class of cryptogams; by De Candolle restricted to the vascular cryptogams (*Pteridophyta*). [B. 1, 108.]

**ÆTHÉOGAMOUS**, adj. A-e'-the-o-ga<sup>m</sup>-mu<sup>s</sup>. Fr., *æthéogame*. Ger., *æthéogamisch*. Of or belonging to the *Aethéogamia*. [B. 7.]

**ÆTHÉOGAMY**, n. A-e'-the-o-ga<sup>m</sup>-mi<sup>2</sup>. See **ÆTHÉOGAMIA**.

**ÆTHER** (Lat.), n. m.  $E(a^3e^2)-thi^2r(th)^2r$ . Gen., *ætheris*. From *αἰθήρ*, to light up, or burn. 1. Ether. 2. A preparation containing or made from ethyl ether. [B.]—**Æ. æcticus**. See the major list.—**Æ. acetosus**. See **Æ. aceticus**.—**Æ. alcoholicus**. See *Spiritus ætheris*.—**Æ. ammoniacalis**, **Æ. ammoniacatus**. Fr., *ether ammoniac*. Ger., *ammoniakhaltiger Aether*. Ether containing ammonia. [B. 78.]—**Æ. amylicus nitrosus**, **Æ. amylnitrosus** [Fr. Cod.], **Æ. amylnitrosus**. Amyl nitrite. [B.]—**Æ. anæstheticus** [Swiss Ph.], **Æ. anæstheticus Aranii**. Fr., *ether anæsthétique*. Ger., *Aran'scher* (oder *Aran's*) *Aether*. A preparation named after Dr. Aran, of Paris, made by the prolonged action of chlorine upon ethyl chloride or ethylidene dichloride. It is a clear, colorless liquid of ethereal aromatic odor, sweetish aromatic taste and neutral reaction, readily miscible with alcohol, ether, and most of the fixed and volatile oils, but insoluble in water. It consists of a variable mixture of the chlorine substitution compounds of ethane (ethylidene dichloride, trichlorethane, tetrachlorethane,

pentachlorethane, and sometimes carbon hexachloride). [A; B. 95.]—**Æ. anæstheticus Wiggers**. A mixture similar to the *Æ. anæstheticus Aranii*, but especially rich in the more highly chlorinated compounds. [A.]—**Æ. Aranii**. See *Æ. anæstheticus*.—**Æ. azotosus**. See *Æ. nitrosus*.—**Æ. benzoicus**. Benzoic ether; ethyl benzoate. [B. 49.]—**Æ. bromatus**. Ethyl bromide. [B. 108.]—**Æ. bromhydricus** [Fr. Cod.]. Hydrobromic ether; ethyl bromide. [B.]—**Æ. butyricus**. Ethyl butyrate. [B. 48.]—**Æ. cantharidatus** [Swiss Ph.]. An ethereal extract of cantharides made by exhausting 10 parts of the latter with 15 parts of ether until 10 parts of extract are obtained. [B. 95.] Cf. *Liquor epispasticus*.—**Æ. chloratus**. See the major list.—**Æ. chlorhydricus**. Hydrochloric ether; ethyl chloride. [B.]—**Æ. chlorhydricus alcoholicus**. See *Spiritus ætheris chlorati*.—**Æ. chlorhydricus chloratus**. See *Æ. anæstheticus*.—**Æ. chloricus**. Chloric ether. [B.] See *Spiritus chloroformi*.—**Æ. chlorohydricus**. See *Æ. chlorhydricus*.—**Æ. crudus**. Commercial ether. [B. 95.] See *ETHYL ETHER*.—**Æ. cypriacus**. An old name for an ethereal solution of cupric chloride, used as a remedy for epilepsy. [B. 97.]—**Æ. depuratus**. Stronger ether. [B.] See under *ETHYL ETHER*.—**Æ. ferratus**. See the major list.—**Æ. formicicus**, **Æ. formicus**. Formic ether; ethyl formate. [B. 81.]—**Æ. fortior**. Stronger ether. [B.] See under *ETHYL ETHER*.—**Æ. Frobenii**. Ethyl ether; so called from Frobenius, who in 1730 called attention to it. [B. 59, 88.]—**Æ. hydricus**. Ethyl ether. [A. 316.]—**Æ. hydriodicus**. Ethyl iodide. [B.]—**Æ. hydrobromicus**. Ethyl bromide. [B. 95.]—**Æ. hydrochloricus**. Hydrochloric ether; ethyl chloride. [B.]—**Æ. hydrocyanicus**. Hydrocyanic ether; ethyl cyanide. [B. 119.]—**Æ. hydriodicus**, **Æ. hydrojodicus**. Ethyl iodide. [B. 95.]—**Æ. iodosus**. 1. Ethyl iodide. 2. A solution of iodine in ether. [B. 48, 108.]—**Æ. iodydricus** [Fr. Cod.]. Hydroiodic ether; ethyl iodide. [B.]—**Æ. iodosus**. See *Æ. iodosus*.—**Æ. lignosus**. Apparently, impure acetate of methyl. [B. 2.]—**Æ. lotus**. Washed ether; ethyl ether freed from alcohol by washing with water. [B. 14.]—**Æ. martialis**. See *Tinctura ferri chlorati æthereæ*.—**Æ. mercurialis**. Fr., *ether mercuriel*. Ger., *Mercurialäther*. It, *etere mercuriale*. Sp., *éter mercurial*. An ethereal solution of corrosive sublimate containing 16 grains of the latter to an ounce of ether. [B. 97.]—**Æ. methylicus**. Methyl ether. [B. 81.]—**Æ. muriaticus**. Muriatic ether. See *ETHYL CHLORIDE*.—**Æ. muriaticus alcoholicus**. The same as *Æ. chlorhydricus alcoholicus*. [A. 316.] See *Spiritus ætheris chlorati*.—**Æ. muriaticus spurius**. A preparation made by distilling 4 parts each of ether and hydrochloric acid and 1 part of sulphuric acid. [B. 97.]—**Æ. muriaticus trichloratus**. See *Æ. anæstheticus*.—**Æ. nitricus-alcoholicus**. See *Spiritus ætheris nitrosi*.—**Æ. nitricus**, **Æ. nitrosus**. See the major list.—**Æ. onanthicus**. See *CENANTHIC ETHER*.—**Æ. petrolei**. See *Æ. PETROLEI*.—**Æ. phosphoratus**. Fr., *ether phosphoré*. Ger., *phosphorhaltiger Aether*. It, *etere fosforato*. Sp., *éter fosforado*. A preparation made by infusing phosphorus 1 part in ether 48 parts [Russ. Ph.], 60 parts [Swiss Ph.], or 80 parts [Greek Ph.]. Other proportions have been employed in other formularies. The preparation is a clear, colorless, very inflammable liquid, having the odor of ether and phosphorus, and containing, according to the strength of the ether and the circumstances of preparation, from 5 to 12 parts per mille of phosphorus. [B. 95, 97.]—**Æ. phosphoricus**. Fr., *ether phosphorique*. It, *etere fosforico*. Sp., *éter fosfórico*. Ethyl ether prepared by decomposing alcohol with phosphoric acid. [B. 88, 97.]—**Æ. phosphoro-phosphoricus**. A solution of phosphorus in *Æ. phosphoricus*. Essentially the same as *Æ. phosphoratus* (q. v.). [B. 97.]—**Æ. prussicus**. Ethyl cyanide. [A. 316.]—**Æ. purus**. Stronger ether. [B.] See *ETHYL ETHER*.—**Æ. pyroæcticus**. Acetone. [B. 81.]—**Æ. rectificatus**. Stronger ether. [B.] See *ETHYL ETHER*.—**Æ. spirituus**. 1. Ethyl ether. [B. 88.] 2. Impure ethyl ether mixed with alcohol. [B. 97.] See *Spiritus ætheris*.—**Æ. sulfuricus**. [Fr. Cod.]. Fr., *ether dit sulfurique*. Sulphuric ether; ordinary ethyl ether. [B. 113.]—**Æ. sulfuricus alcoolisatus**. See *Spiritus ætheris*.—**Æ. sulphurico-alcoholicus oxydulatus ferratus**, **Æ. sulphurico-ferratus**. See *Tinctura ferri chlorati æthereæ*.—**Æ. sulphuricus**. See the major list.—**Æ. terebinthinatus**. Fr., *ether térébinthiné*. An ethereal solution of oil of turpentine, formed either directly by dissolving the latter in ether, or indirectly by distilling the oil with alcohol and nitric acid; used in cholo-lithiasis. [B. 119.]—**Æ. valerianicus**. Valerianic ether; ethyl valerianate. [B. 108.]—**Æ. venalis**. Commercial ether. [B. 95.] See under *ETHYL ETHER*.—**Æ. vitrioli**. Sulphuric ether; ethyl ether. [B.]—**Æ. vitrioli aquosus**. See *Liquor anodynis mineralis aquosus*.—**Æ. vitriolicus**. See the major list.—**Æ. zinci**. See *Æ. ZINCI*.—**Nitrosus æ**. See *NITROSUS ETHER*.—*Spiritus ætheris* [U. S. Ph., Br. Ph.]. Fr., *ether officinal alcoolisé* [Fr. Cod.], *liqueur anodine d'Hoffmann*. Ger., *Aetherweingeist* [Ger. Ph.], *Hoffmann'sche Tropfen*. It, *spirito di etere*. Syn.: *Spiritus ætheris* [Ger. Ph.], *æ. sulfuricus alcoolisatus* [Fr. Cod.], *æ. sulphuricus alcoholicus seu alcoolisatus* [Belg. Ph.], *liquor anodynis mineralis Hoffmanni*. Spirit of ether. A solution of ether in alcohol containing in 100 parts 30 parts by weight of stronger ether [U. S. Ph.], 33 parts by volume (30 parts by weight) of ether [Br. Ph.], 25 parts by weight of stronger ether [Ger. Ph., Aust. Ph., Dan. Ph., Ph. of Campagna], 33 parts [Russ. Ph.], 50 parts by volume (47 by weight) of ether [Belg. Ph.], 50 parts by weight of absolute ether [Fr. Cod.]. It is a clear, colorless liquid of ethereal odor varying in sp. gr. from .783 [Fr. Cod.] to .811 [Ger. Ph.]. [B. 5, 10.]—*Spiritus ætheris aromaticus*. See *Spiritus ætheris sulphuricus aromaticus*.—*Spiritus ætheris compositus* [U. S. Ph., Br. Ph.]. Fr., *liqueur nervine de Bang*. Ger., *zusammengesetzter Aetherweingeist*. It, *spirito di etere composto*. Syn.: *Hoffmann's anodyne*. Compound spirit of ether. A preparation made up of stronger ether 30 parts, alcohol 67 parts, and ethereal oil 3 parts. The British preparation is made up of ether 8 fluidounces (29 parts), alcohol 16 fluidounces (68.2 parts), and ethereal oil 3 fluidrachms (2.8 parts). It is a colorless liquid of sweetish burning taste and

peculiar odor. [B, 5, 94.]—**Spiritus ætheris ferratus**. See *Tinctura FERRI CHLORATI æthereæ*.—**Spiritus ætheris nitrosus**. Nitrous ether; ethyl nitrite. [B, 97.]—**Spiritus ætheris nitrosus**. See **Spiritus ætheris nitrosi**.—**Spiritus ætheris sulphureus aromaticus** [Lond. Ph. (1824)]. Syn: *æ. sulphuricus cum alcohol aromaticus* [Ed. Ph. (1826)]. An infusion of cinnamon, cardamom, long pepper, and [in Lond. Ph.] ginger in spirit of ether. [B, 97.]—**Spiritus ætheris vinosus**. Ether more or less pure mixed with alcohol. [B, 97.] See *Spiritus ætheris*.—**Sulphuric æ**. See **ETHYL ETHER**.—**Syrupus ætheris**, **Syrupus cum æthere** [Fr. Cod.]. See *Siropp d'Éther*.—**Vitriolic æ**. See **ETHYL ETHER**.

**ÆTHER** (Ger.), n. A-*te*r. Ether.—**A-artig**. Ethereal. [B.]—**A-campfersäure**. Ethylcamphoric acid. [A, 324.]—**A-dampf**. Ether vapor. [B.]—**A-doppelschwefelsäure**. Ethionic acid. [B, 48.]—**A-douche**. An apparatus for throwing a spray of ether. [A.]—**A-einathmung**. Inhalation. The inhalation of ether vapor. [B.]—**A-narcose**, **A-narkose**. Narcosis produced by ether. [B.]—**A-öl**. Heavy oil of wine; ethereal oil. [B.]—**A-rausch**. Intoxication produced by ether. [B.]—**A-säure**. 1. Aldehydic acid. 2. An acid in which ethyl or some other alcohol radicle replaces part of the acid hydrogen. [B, 108, 120.]—**A-schwefelsäure**. See the major list.—**A-sulfokohlensäure**. Xanthic acid. [A, 324.]—**A-welingeist**. See the major list.—**A-weinsäure**. **A-weinsteinsäure**. Ethyltartaric acid. [B, 48.] See *Ethyl tartrate*.—**A-ethyl**. Ethyl ether. [B.]—**A-meisenöl**. Formic ether; ethyl formate. [B, 108.]—**Ammoniakhaltiger A**. See *Æther ammoniacalis*.—**Aran's A**, **Aran'scher A**. See *Æther anæstheticus Aranii*.—**Baldrian's A**. Valerianic ether; ethylvalerianate. [B, 108.]—**Benzoe's A**. Benzoic ether; ethyl benzoate. [B, 49.]—**Brom's A**. Ethyl bromide. [B, 108.]—**Butter's A**. Butyric ether; ethyl butyrate. [B, 49.]—**Canthariden's A**. See *Æther cantharidatus*.—**Chlor's A**. 1. Ethyl chloride. 2. Chlorether. [B.]—**Einfacher A**. See *Simple ETHER*.—**Essig's A**. Acetic ether. [B.]—**Form's A**. Methyl ether. [B.]—**Gemischter A**. See *Mixed ETHER*.—**Holz's A**. Methyl ether. [B.]—**Jod's A**. Ethyl iodide. [B, 108.]—**Jodhaltender A**. See *Æther iodatus*.—**Mercuriat's A**. See *Æther mercurialis*.—**Petroleum's A**. See *PETROLEUM ETHER*.—**Phosphorhaltiger A**. See *Æther phosphoratus*.—**Reiner A**. Ether purus, stronger ether. [B.] See under **ETHYL ETHER**.—**Salpetersäureäthyl's A**. Ethyl nitrite. [B, 49.]—**Salz's A**. Hydrochloric ether; ethyl chloride. [B, 49.] See also **SALZÄTHER**.—**Schwefel's A**. Sulphuric ether; ethyl ether. [B, 49.]—**Zusammengesetzter A**. See *Compound ETHER*.

**ÆTHER ACETICUS** [U. S. Ph., Ger. Ph., Fr. Cod.] (Lat.), n. m. A<sup>3</sup>(a<sup>3</sup>k)-e<sup>2</sup>t<sup>1</sup>u<sup>3</sup>s(u<sup>4</sup>s). Acetic ether, or ethyl acetate; especially a pharmaceutical preparation consisting of ethyl acetate with small quantities of alcohol and water. [A; B, 95.]—**Æ. a. martialis**. See *Tinctura FERRI ACETATIS*.—**Spiritus ætheris aceticus**. Syn: *liquor anodynus vegetabilis Westendorfi*. A mixture of 1 part of acetic ether (ethyl acetate) with 3 parts of alcohol. Used as a stimulant and antispasmodic. [B, 108.]

**ÆTHERAN PHOSPHORATUS** (Lat.), n. m. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>-(tha)-ra<sup>2</sup>n(r<sup>3</sup>a<sup>3</sup>n) fo<sup>2</sup>s-fo-ra(r<sup>3</sup>a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). [B, 3.] See *Æther phosphoratus*.

**ÆTHER CHLORATUS** (Lat.), n. m. Klor-a(a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). Hydrochloric ether; ethyl chloride. [B.]—**Æ. c. alcoholicus**. See *Spiritus ætheris chlorati*.—**Æ. c. Aranii**. See *Æ. anæstheticus Aranii*.—**Æ. c. spirituosus**. See *Spiritus ætheris chlorati*.—**Spiritus ætheris chlorati** [Ger. Ph., 1st ed.]. It, *spirito di sale dolce o muriatico-etero*. Syn: *æ. chlorhydricus alcoholicus*, *æ. c. spirituosus* [Dan. Ph.]. Alcoholic muriatic ether. A solution of ethyl chloride in alcohol, made by distilling a mixture of sodium chloride and manganese dioxide with a mixture of alcohol and sulphuric acid. It is a colorless liquid of peculiar ethereal odor and somewhat aromatic taste. [B, 10.]

**ÆTHÉRÉ** (Fr.), adj. A-ta-ra. Ethereal. See **ÉTHÉRÉ**.

**ÆTHERIAL**, adj. E-the'-re-a<sup>1</sup>l. Ethereal.

**ÆTHEREO-OLEOSUS** (Lat.), adj. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>(tha)/re<sup>2</sup>-o-o-le(le<sup>2</sup>)-o-u<sup>3</sup>s(su<sup>4</sup>s). Containing a volatile or essential oil. [A, 313.]

**ÆTHEREUS** (Lat.), adj. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>(tha)/re<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). More correctly written *ætherius*. From Gr., *αιθέριος*, of or belonging to the æther or upper air. 1. Of or pertaining to the æther or upper air; hence in botany, aerial. 2. Of or pertaining to ether. Ethereal. [B, 1, 114.]

**ÆTHER FERRATUS** (Lat.), n. m. Fe<sup>2</sup>r-ra(r<sup>3</sup>a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). A compound of ether and iron. [B.]—**Alcohol vitriolicus ætheris ferrati**. See *Tinctura FERRI CHLORATI æthereæ*.

**ÆTHERIA** (Lat.), n. f. E(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>(tha)/ri<sup>2</sup>-a<sup>3</sup>. Fr., *athérie*. A genus of orchidaceous plants growing in Central Asia and in Java. [B, 19, 38.]

**ÆTHERIAL**, adj. E-the'-ri<sup>2</sup>-a<sup>3</sup>l. Ethereal.

**ÆTHERID** (Ger.), n. A-ta-ri<sup>2</sup>d'. An etheride (q. v.). [B, 130.]

**ÆTHERIN** (Ger.), n. A-ta-ren'. Etherin. [B.]—**A-ammonium**. See *ETHERIN AMMONIUM*.

**ÆTHERINUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>e<sup>2</sup>th)-e<sup>2</sup>r-i(e)-nu<sup>3</sup>m(mu<sup>4</sup>m). Etherin. [B, 130.]

**ÆTHERISATIO** (Lat.), n. f. E(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>-ri<sup>2</sup>-z-a(a<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *ætherisatio'nis*. Also written *etherisatio*. Etherization. [E.]

**ÆTHERISATION** (Ger.), n. A-ta-re-za<sup>3</sup>-tze-on'. Etherization.

**ÆTHERISATUS** (Lat.), adj. E<sup>2</sup>(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>-ri<sup>2</sup>-z-a(a<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). Also written *etherisatus*. Etherized. [E.]

**ÆTHERISCH** (Ger.), adj. A-ta-ri<sup>2</sup>sh. Ethereal.

**ÆTHERISIREN** (Ger.), v. tr. A-ta-re-ze-re<sup>2</sup>n. To etherize.

**ÆTHERISMUS** (Lat.), n. m. E(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>-ri<sup>2</sup>-z(r<sup>3</sup>i<sup>3</sup>)/mu<sup>3</sup>s(mu<sup>4</sup>s). Ger., *Aetherismus*. Etherism.

**ÆTHERIUS** (Lat.), adj. E(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>(tha)/ri<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). The more correct form of *æthereus* (q. v.). [B, 114.]

**ÆTHER NITRICUS** (Lat.), n. m. Ni(ne)-tri<sup>2</sup>-ku<sup>3</sup>s(ku<sup>4</sup>s). Nitrous ether; ethyl nitrite. [B, 97.]—**Æ. n. alcoholicus**, **Æ. n. alcoolisatus**, **Spiritus ætheris nitrici**. See *Spiritus ætheris nitrosi*.

**ÆTHER NITROSUS** (Lat.), n. m. Ni(ne)-tro<sup>3</sup>-su<sup>3</sup>s(su<sup>4</sup>s). Nitrous ether; ethyl nitrite. [B.]—**Spiritus ætheris nitrosi** [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *acide azotique alcoolisé* [Fr. Cod.], *esprit de nitre dulcifié*. Ger., *versäster Salpetergeist* [Ger. Ph.], It., *spirito di etere nitroso*, *spirito di nitro dolce*. Syn: *spiritus nitri dulcis* [Br. Ph. (1867)], *acidum nitricum alcoolisatum* [Fr. Cod.], *æ. nitricus alcoolisatus seu alcoholicus* [Belg. Ph.]. Spirit of nitrous ether, alcoholic nitrous ether, sweet spirit of nitre. An alcoholic solution of ethyl nitrite, prepared by the action of nitric acid upon alcohol, the nitric acid being converted in the process into nitrous acid by methods which differ in the different Pharmacopœias. The strength of the solution and its sp. gr. vary according to the method of preparation. The *spiritus ætheris nitrosi* of the U. S. Ph. has a sp. gr. of .823, contains 5 per cent. of ethyl nitrite, and is prepared by distilling nitric acid 9 parts with a mixture of alcohol 31 parts and sulphuric acid 7 parts, washing the distillate with water, separating from it the ethereal layer of ethyl nitrite and dissolving the latter in 19 parts of alcohol. The Br. preparation has a sp. gr. of .845, contains about 10 per cent. of ethyl nitrite, and is prepared by distilling a mixture of alcohol 20 fl. oz., sulphuric acid 2 fl. oz., nitric acid 3 fl. oz., and copper wire 2 oz., and diluting 15 fl. oz. of the distillate with 40 fl. oz. of alcohol. The preparation of the Ger. Ph. has a sp. gr. of .840 to .850, and is made by distilling 1 part of nitric acid and 3 parts of alcohol; that of the Fr. Codex is a simple mixture of alcohol 3 parts with 1 part of an aqueous solution of nitric acid containing 47 per cent. of the pure acid; that of the Belg. Ph. resembles the German except in the somewhat greater amount of nitric acid employed, in the addition before distillation of 1 part of sugar to every 10 parts of alcohol, and in its higher sp. gr. (.850 to .860). Spirit of nitrous ether is a straw-colored, mobile, very volatile and inflammable liquid, having a sharp burning taste and a fragrant odor. It regularly contains a small amount of acetic aldehyde and water, and, by long exposure to the air and light, the aldehyde is converted into acetic acid, and various gaseous oxides of nitrogen are generated from decomposition of the ethyl nitrite. [B, 5, 10, 81.]

**ÆTHEROL** (Ger.), n. A-ta-rol'. Etherol. [B.]

**ÆTHEROLATUM** (Lat.), n. n. E(a<sup>3</sup>e<sup>2</sup>)-the<sup>2</sup>-r-o-la(la<sup>3</sup>)/tu<sup>3</sup>m(tu<sup>4</sup>m). See *ÉTHÉROLAT*.

**ÆTHEROLATURA** (Lat.), n. f. E<sup>2</sup>th(a<sup>3</sup>e<sup>2</sup>th)-e<sup>2</sup>r-o-la<sup>3</sup>-tu<sup>2</sup>-(tu<sup>3</sup>)ra<sup>3</sup>. See *ÉTHÉROLATURE*.

**ÆTHEROLEUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>e<sup>2</sup>th)-e<sup>2</sup>r-o-le<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). 1. Etherol. [B, 120.] 2. A volatile oil. [B, 48, 88.] Cf. *Æ. ANETHI*, *Æ. ANISI*, etc.

**ÆTHEROLICUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>e<sup>2</sup>th)-e<sup>2</sup>r-o-l'i<sup>2</sup>-ku<sup>3</sup>m(ku<sup>4</sup>m). For deriv., see *ÆTHER*. An ethereal compound, or preparation made with ether. [B, 120.]

**ÆTHEROLOTIUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>e<sup>2</sup>th)-e<sup>2</sup>r-o-l'i-o-ti(e)-vu<sup>3</sup>m(wu<sup>4</sup>m). See *ÉTHÉROLOTIF*.

**ÆTHERSCHWEFELSÄURE** (Ger.), n. A-tar-shwa'fe<sup>2</sup>l-zoi-re<sup>2</sup>. 1. Ethylsulphuric acid. [B, 49.] See *ETHYL SULPHURIC*. 2. A sulphonic acid derived from ethyl or some other hydrocarbon radicle, or from a compound of such a radicle. [B.]—**Aromatische A**. A sulphonic acid derived from a hydrocarbon of the aromatic group. [B, 108.]

**ÆTHER SULPHURICUS** (Lat.), n. m. Su<sup>3</sup>(su<sup>4</sup>)-fu<sup>3</sup>(fu)/ri<sup>2</sup>-ku<sup>3</sup>s(ku<sup>4</sup>s). Sulphuric or ethyl ether; the official term in the Greek Ph. [B, 95.]—**Æ. s. acidus**. See *MIXTURA SULFURICA ACIDA*.—**Æ. s. alcoholicus**, **Æ. s. alcoolisatus**. A more or less pure alcoholic solution of ethyl ether. [B, 97.] See *Spiritus ætheris*.—**Æ. s. camphoratus aquosus**. A mixture of an ethereal solution of camphor with water. [B, 97.]—**Æ. s. erudus**. Commercial ether. [B.] See *ETHYL ETHER*.—**Æ. s. cum alcohol** [Ed. Ph. (1826)]. A mixture of ether 1 part and alcohol 2 parts. [B, 97.] See *Spiritus ætheris*.—**Æ. s. cum alcohole aromaticus**. 1. See *Spiritus ætheris sulphuricus aromaticus*. 2. See *ACIDUM SULPHURICUM AROMATICUM*.—**Æ. s. ex alcohole**. See *Spiritus ætheris*.—**Æ. s. ferratus**, **Æ. s. martiatus**. See *Tinctura FERRI CHLORATI æthereæ*.—**Æ. s. phosphoratus**. See *Æ. phosphoratus*.—**Spiritus ætheris sulphurici**. See *Spiritus ætheris*.—**Syrupus cum æthere sulphurico paratus**. See *Siropp d'Éther*.

**ÆTHER VITRIOLICUS** (Lat.), adj. Vi<sup>2</sup>t(wi<sup>2</sup>t)-ri<sup>2</sup>-o-l'i<sup>2</sup>-ku<sup>3</sup>s(ku<sup>4</sup>s). Vitriolic, or ethyl ether. [B.]—**Æ. v. ferratus**, **Æ. v. martialis**, **Æ. v. martiatus**. See *Tinctura FERRI CHLORATI æthereæ*.—**Spiritus ætheris vitriolici**. 1. Sulphuric ether. [B, 69.] 2. Ether mixed with alcohol. [B, 97.] See *Spiritus ætheris*.—**Spiritus ætheris vitriolici compositus**. A preparation of the old Lond. Ph. corresponding to *spiritus ætheris compositus*. [B, 69.]

**ÆTHERWEINGEIST** (Ger.), n. A-tarvin'gist. The official synonym for the spiritus æthereus of the Ger. Ph. See *Spiritus ætheris*.—**Chloreisenhaltiger A**. See *Tinctura FERRI CHLORATI æthereæ*.—**Zusammengesetzter A**. See *Spiritus ætheris compositus*.

**ÆTHES** (Lat.), adj. A(a<sup>3</sup>)-e(a<sup>3</sup>)/thez(thas). Gr., *ἄθης*, unusual. Unwonted, extraordinary; an epithet applied to the sputum. [B, 111.]

**ÆTHIDEN** (Ger.), n. A-ti<sup>2</sup>-dan'. Ethidene (ethylidene). For compounds see under *ÆTHYLIDEN*.—**A'milchsäure**. Ethylidene lactic acid. [B.] See *LACTIC ACID*.

**ÆTHIL** (Ger.), n. A-te'l'. Acetylene. [B, 49.]

**ÆTHIN** (Ger.), n. A-ten'. Ethine; acetylene. [B.]

**ÆTHINYL** (Ger.), n. A-te-nu'f. Ethinyl. [B.]—**A' bromür.** Ethinyl bromide. [B.]—**A' pentabromür.** Ethinyl pentabromide. [B.]—**A' pentachlorür.** Ethinyl pentachloride. [B.]—**A' tribromür.** Ethinyl tribromide. [B.]—**A' trichlorür.** Ethinyl trichloride. [B.]

**ÆTHIONAT** (Ger.), n. A-te-o-na't. Ethionate.

**ÆTHIONEMA** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o-ne(na)'ma<sup>3</sup>. Gen., *æthionematos* (-tis). From *αἶθος*, burnt, and *νήμα*, a filament or stamen. Fr., *æthionème*. A genus of cruciferous plants established by R. Brown. [B, 48, 71.]

**ÆTHIONSÄURE** (Ger.), n. A'te-on-zoi-re<sup>2</sup>. Ethionic acid. —**A'anhydrid.** Ethionic anhydride. [B.]

**ÆTHIOPICÆ** (Lat.), n. f. pl. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o<sup>2</sup>p'i<sup>2</sup>-se(ka<sup>3</sup>-e<sup>2</sup>). For deriv., see *ÆTHIOPS*. Medicines having a black color. [B, 59.]

**ÆTHIOPICUS** (Lat.), adj. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o<sup>2</sup>p'i<sup>2</sup>-k-u<sup>3</sup>s(u<sup>4</sup>s). Of or pertaining to a negro. See *ALPHOSIS æthiopica*.

**ÆTHIOPIFICATION** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o<sup>2</sup>p-i<sup>2</sup>-fi<sup>2</sup>-ka-(ka<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *æthiopificationis*. From *Æthiops* (q. v.), and *facere*, to make. Pigmentation of the skin from the application of mercurial or sulphurous ointments or the internal use of silver nitrate. [B, 78.]

**ÆTHIOPISMUS** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o<sup>2</sup>p-i<sup>2</sup>-o'si<sup>2</sup>s. Gen., *æthiopi-smos* (-sis). For deriv., see *ÆTHIOPS*. The act of making black, or of becoming black or discolored. [B, 78.]

**ÆTHIOPS** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i(e)'o-pi<sup>2</sup>s. Gen., *æthiop'idis*. Ger., *Mohrenkraut*. 1. A plant described by Dioscorides and Pliny as growing abundantly in hot climates and having thick hairy leaves, quadrangular stalk, and ovaries with 2-seeded cells. It is generally supposed to be a species of sage, the Ethiopian sage or *Salvia æthiopis* of Linneus, or the silver sage, *Salvia argentea*, but by some it is regarded as the same as the great mullein or *Verbascum thapsus*. It was used in pleurisy, catarrhal affections, and rheumatism. [B, 59, 78, 88, 114.] 2. A plant (probably a species of *Euphorbia*) mentioned by Pliny as useful in dropsy. [Waring (A, 316).]

**ÆTHIOPISMUS** (Lat.), n. m. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>-o-pi<sup>2</sup>-z(p'i<sup>2</sup>)-mu<sup>3</sup>s(mu<sup>4</sup>s). From *αἰθιοῖσμι*, to be like an Ethiopian. The act or condition of becoming black or discolored. [B, 78.]

**ÆTHIOPOLEUCOPHLEGMATIA** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i(e)'o-po-lu<sup>2</sup>-ko-fle<sup>2</sup>-g-ma<sup>3</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. For deriv., see *ÆTHIOPS* and *LEUCOPHLEGMATIA*. Syn.: *pneumatia æthiopum*. A sort of chlorosis occurring in negroes. [B, 78.]

**ÆTHIOPOPOESIS** (Lat.), n. f. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i-o'-po-po-e(a)'si<sup>2</sup>s. Gen., *æthiopopoe-sios* (-sis). From *Æthiops*, and *ποιεῖν*, to make. See *ÆTHIOPIS*.

**ÆTHIOPOPROCALYMA** (Lat.), n. n. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i(e)'o-po-pro-ka<sup>3</sup>-l-i<sup>2</sup>-m(u<sup>3</sup>)/ma<sup>3</sup>. Gen., *æthiopoprocallym'atos*. From *Æthiops*, and *προκαλύμματα*, a veil. See *Hottentot* AFRON.

**ÆTHIOPS** (Lat.), n. m. E'a<sup>3</sup>-e<sup>2</sup>th-i<sup>2</sup>-o<sup>2</sup>ps. Gen., *æthi'opis*. Gr., *αἰθίοψ*, an Ethiopian, literally, a burnt face, from *αἶθερ*, to burn, and *ὄψ*, the face. Fr., *æthiops*, *éthiops*. Ger., *Mohr*, *Metallmohr* (2d def. only). It., Sp., *etiope*. Also written *ethiops*. 1. An Ethiopian. 2. Ploucquet's name for an albino. [Good (A, 357).] 3. An old pharmaceutical term for many black, finely pulverized mineral preparations. [B, 2, 78.]—**Æ. albus.** Fr., *negre blanc* (1st def.). Ger., *weisser Neger* (1st def.). 1. An albino. [A.] 2. Mercury with chalk. See *HYDRARGYRUM cum creta*.—**Æ. alcalisatus.** Mercury with chalk; especially an old pharmaceutical preparation in which mercury was triturated with powdered crab's-eyes. [B, 88, 119.]—**Æ. animalis.** Fr., *æ. ou éthiops animal*. Ger., *Thiermohr*. It., *etiope animale*. Sp., *etiope animal*. 1. Impure animal charcoal obtained by the incineration of small animals. 2. A preparation made by heating together equal parts of mercury and cuttle-fish bone. [B, 78, 119.]—**Æ. antimonial** (Fr.). See *Æ. ANTIMONIALIS*.—**Æ. antimonial de Huxham** (Fr.). Huxham's æ. antimonialis. See *Æ. ANTIMONIALIS*.—**Æ. antimonial de Malouin** (Fr.). Malouin's æ. antimonialis. See *Æ. ANTIMONIALIS*.—**Æ. antimonialis.** See the major list.—**Æ. antimonialo-mercurialis.** See *Æ. ANTIMONIALIS*.—**Æ. antimonii.** See *Æ. ANTIMONIALIS*.—**Æ. antiphthysicus.** A mixture of mercury and balsam of Peru. [B, 59.]—**Æ. antirrhineum.** A mixture of mercury and guaiac resin. [B, 59.]—**Æ. auratus.** A preparation made by triturating together equal parts of mercury and antimony pentasulphide. [B, 48.]—**Æ. auripigmentalis.** Fr., *æ. ou éthiops orpimental*. Ger., *Arsenikmohr*. A mixture of 1 part of mercury and 2 parts of orpiment. [B, 48.]—**Æ. cretaceus.** Fr., *æ. ou éthiops calcaire*. It., *etiope calcare*. See *HYDRARGYRUM cum creta*.—**Æ. cupri.** A preparation consisting of a mixture of cupric carbonate and mercury, used as a remedy against epilepsy. [B, 48.]—**Æ. de Malouin** (Fr.). Malouin's æ. antimonialis. [B, 88.] See *Æ. ANTIMONIALIS*.—**Æ. duri-**

**Æ. duri-** A preparation made up of mercury mixed with juniper gum. [B, 59.]—**Æ. ferriens.** See *Æ. martialis*.—**Æ. graphiticus.** Fr., *æ. ou éthiops graphitique*. It., *etiope grafítico*. Syn.: *mercure charbonneux*. A mixture of 1 part of mercury and 2 parts of charcoal or graphite, recommended in herpes. [B, 46, 48.]—**Æ. gommosus.** Fr., *æ. (ou éthiops) gommeux*. It., *etiope gommoso*. Syn.: *pulvis mercurialis gommosus, mucilago mercurialis seu hydrargyri*. Mercury triturated to the point of extinction with gum arabic or mucilage. [B, 46, 119.] Cf. *Mucilago mercurialis* and *Mucilago HYDRARGYRI*.—**Æ. hypnoticus.** *Æ. hypnoidis*. Fr., *Æ. hypnotique*. Ger., *Schweissmohr*. Black sulphide of mercury prepared by precipitation. It was used as a diaphoretic; hence the epithet *hypnoidis* which was afterward corrupted to *hypnoticus*, and, from the false meaning thus attached to the term, *æ. narcoticus* was often used as a synonym. [B, 78.]—**Æ. jovialis.** Ger., *Zinnmohr*. A mixture of equal parts of tin, mercury, and sulphur, asserted to act as a tennicide. [B, 59.]—**Æ. magnesiacus.** Fr., *æ. ou éthiops magnésien*. It., *etiope magnesiaco*. A preparation made by triturating together 16 parts each of mercury and manna

and 1 part of magnesia, then washing with water to withdraw the manna, and adding 2 parts of magnesia. [O. Revell (B, 46).] Other authorities give slightly different formulas.—**Æ. martialis.** Fr., *æ. ou éthiops martial*. Ger., *Eisenmohr*. It., *etiope marziale*. Sp., *etiope marcial*. Martial æ. Magnetic oxide of iron artificially prepared by infusing iron filings in water until they are reduced to an inky-black powder. [B, 59.]—**Æ. mercurialis.** Fr., *æ. ou éthiops mercuriel*. It., *etiope mercuriale*. See *Æ. mineralis* and *Æ. hypnoidis*.—**Æ. mercurii per se.** See *Æ. per se*.—**Æ. mineral.** See *Æ. mineralis* and the major list.—**Æ. mineralis.** Fr., *æ. ou éthiops mineral*. Ger., *Mineralmohr*. It., *etiope minerale*. Sp., *etiope mineral*. Syn.: *sulphuretum hydrargyri nigrum seu simplex, hydrargyrum cum sulphure, hydrargyrum sulphuratum nigrum, mercurius cum sulphure, pulvis hypnoticus*. *Æ. mineral*, mercury with sulphur. A preparation consisting of mercury and sulphur triturated together. In the Lond. Ph. (1824), Ed. Ph. (1826), Dubl. Ph. (1830), U. S. Ph. (1830), and many others, equal parts of the two ingredients were employed; in the Fr. Codex (1818) and some other formularies, 2 parts of mercury to 1 part of sulphur were used; and still other proportions were given in other Pharmacopœias. Van Mons describes 4 kinds: (1) *Æ. mineral, sulphur triturated with mercury*, a mixture of 1½ part of sulphur and 19 parts of mercury. (2) *Æ. mineral of Harris*, made by triturating mercury with one twelfth of its weight of sulphur till the mercury is extinguished, then adding another twelfth part of sulphur, triturating once more, and repeating these successive processes of addition and trituration until an amount of sulphur equal to that of the mercury has been employed. (3) *Oxydulated æ. mineral*, Lat., *æ. mineralis oxydulatus*, made by triturating together 3 parts of sulphur, 21 of mercury (19 parts, B, 97), and 20 parts of red oxide of mercury. (4) *Double æ. mineral*, a mixture of 1½ part of sulphur and 9 parts of mercury. *Æ. mineralis*, although regarded as a sulphide of mercury, is probably only a simple mixture of mercury and sulphur. It was used formerly in the treatment of syphilis and as an anthelmintic. [B, 48, 97.]—**Æ. mineralis fusione paratus.** A preparation made by mixing mercury with melted sulphur. [B, 48.]—**Æ. mineralis oxydulatus.** See under *Æ. mineralis*.—**Æ. mineralis stibiatus.** See *Æ. ANTIMONIALIS*.—**Æ. mineralis via humida paratus.** A preparation made by triturating at a gentle heat equal parts of sulphate of mercury, sulphur, and a solution of liver of sulphur (sulphurated potassa). [B, 48.]—**Æ. mineral stibié** (Fr.). See *Æ. ANTIMONIALIS*.—**Æ. mohr** (Ger.). See *Æ. mineralis*.—**Æ. narcoticus.** Fr., *Æ. narcotique*. Ger., *betäubender Mohr*. It., *etiope narcotico*. See *Æ. hypnoticus*.—**Æ. orpimentalis.** See *Æ. auripigmentalis*.—**Æ. per se.** Fr., *æ. ou éthiops per se*. It., *etiope per se di Boerhaave*. A preparation described by Boerhaave consisting of a gray powder made either by exposing impure mercury to the air or by triturating mercury either with or without the addition of mucilage. [B, 2, 59, 98.]—**Æ. platineus.** Ger., *Platinmohr*. Platinum black. [B, 48.]—**Æ. purgans.** A mixture of mercury with calomel or jalap. [B, 59.]—**Æ. saccharatus.** Fr., *æ. ou éthiops saccharin*. It., *etiope saccharato*. See *HYDRARGYRUM saccharatum*.—**Æ. vegetabilis.** Fr., *æ. ou éthiops végétal*. Ger., *Pflanzenmohr*. It., *etiope vegetale*. Sp., *etiope vegetal*. Vegetable æ. 1. Charcoal obtained by the combustion of sea-weed such as the *Fucus vesiculosus*. It was used as an application to scrofulous swellings. [B, 46, 59.] 2. Soot. [B, 97.] 3. Roasted opium. [B, 46.]—**Æ. vegetabilis suberinus.** Burnt cork. [B.]—**Animal æ.** See *Æ. animalis*.—**Antimonial æ.** See *Æ. ANTIMONIALIS*.—**Martial æ.** See *Æ. martialis*.—**Orpimental æ.** See *Æ. auripigmentalis*.—**Phlegmatia æthiopum.** See *ÆTHIOPOLEUCOPHLEGMATIA*.—**Vegetable æ.** See *Æ. vegetabilis*.

**ÆTHIOPS ANTIMONIALIS** (Lat.), n. m. A<sup>2</sup>n(a<sup>3</sup>n)-ti<sup>2</sup>-mo<sup>3</sup>-ni<sup>2</sup>-a(a<sup>3</sup>)/li<sup>2</sup>s. Fr., *æ. ou éthiops antimonial*. Ger., *Spießglanzmohr*. It., *etiope antimonial*. Sp., *etiope antimonial*. Syn.: *sulphuretum hydrargyri et stibii, sulphuretum hydrargyri stibiatum sive antimonialium, hydrargyrum stibiato-sulphuratum*. Any combination of mercury and antimony of a black color; especially sulphide of antimony and mercury made by triturating together 4 parts of mercury, 2 of sulphur, and 3 of antimony trisulphide, until the mercury is extinguished. This is Huxham's preparation. That of Malouin was made by triturating 2 parts of antimony pentasulphide with 1 part of mercury. Other preparations were made by mixing crude antimony (native sulphide of antimony) with sea-salt and adding mercury, or by mixing 3 parts of mercury and 1 part of kermes mineral. *Æ. a.* was formerly official in many Pharmacopœias, and was used as a diaphoretic and alterative. [B, 10, 46, 48, 59, 119.]—**Æ. a. Huxhami.** Huxham's æ. a. See *Æ. a.*—**Pulvis ex æthiops antimonial.** Syn.: *pulvis ex hydrargyrio stibiato-sulphurato*. A mixture of 6 grains of æ. a. and 10 grains of licorice root, or of 5 grains of æ. a. and 15 grains of licorice root. [B, 97.]

**ÆTHIOPS MINERAL**, n. Mi<sup>2</sup>n'u<sup>3</sup>r-a<sup>3</sup>. Also written *ethiops mineral*. See *Æ. mineralis*.—**Æ. m. of Harris, Double æ. m., Oxydulated æ. m.** See *Æ. mineralis*.

**ÆTHIOPS** (Lat.), n. m. E'th(a<sup>3</sup>-e<sup>2</sup>th)-i(e)'o-pu<sup>3</sup>s(pu<sup>4</sup>s). *Æthiops*.—**Æ. albus.** See *HYDRARGYRUM cum creta*.

**ÆTHIMETHOXALSÄURE** (Ger.), n. Atme<sup>2</sup>t-o<sup>2</sup>x'a<sup>3</sup>-l-zoi-re<sup>2</sup>. Ethmethoxalic acid.

**ÆTHMOID**, adj. and n. E'th'moid. See *ETHMOID*.

**ÆTHOCES** (Lat.), n. f. pl. E'th(a<sup>3</sup>-e<sup>2</sup>th)-o-sez(ke<sup>2</sup>s). Gen., *æth'ocum*. *Ætholices*. See *ÆTHOLIX*.

**ÆTHOGEN**, n. E'th'o-je<sup>2</sup>n. From *αἶθων*, brilliant, and *γενέσθαι*, to become. Fr., *éthogène*. Ger., *Äthogen*. Also written *ethogen*. A compound of nitrogen with boron, so called on account of its intense brilliancy when heated by the blow-pipe. [B, 7.]

**ÆTHOKIRRHIN**, n. E'th'o-ki<sup>2</sup>r'i<sup>2</sup>n. From *αἶθων*, brilliant, and *κίρπος*, tawny yellow. Fr., *étho-kirrhine* [B, 107]. Ger., *Äthokirrin*. A yellow coloring matter obtained from the flowers of the

*Antirrhinum linaria* (*Linaria vulgaris* [Linnæus]). It is crystalline, devoid of taste or odor, very soluble in alcohol and the oils, difficultly soluble in water. [B, 2, 48, 107.]

**ÆTHOLIX** (Lat.), n. f.  $E^{th}(a^3e^{2th})-o-li^2x$ . Gen., *ætholixicis*. Gr.,  $\alpha\theta\acute{o}\lambda\acute{\iota}\kappa$  (from  $\alpha\theta\epsilon\upsilon$ , to light up, kindle). A fiery pustule of the skin [A]; or a "superficial pustule of the skin raised by heat" [B, 59], or rather a bulla produced by heat. [B, 78.]

**ÆTHOMETHOXALSÄURE** (Ger.), n. A-to-me<sup>2</sup>t-o<sup>2</sup>x-a<sup>3</sup>l-zoi-re<sup>2</sup>. Etemethoxalic acid.

**ÆTHOMMA** (Lat.), n. n.  $E^{th}(a^3e^{2th})-o-m^2ma^3$ . Gen., *æthom-matis*. From  $\alpha\theta\acute{o}\varsigma$ , burnt, brown-red, and  $\mu\mu\alpha$ , the eye (1st def.); Gr.,  $\alpha\theta\acute{o}\varsigma$ , burning or heat, and  $\mu\mu\alpha$  (2d def.). Fr., *œil de loup* (ou de mauvais garçon) (1st def.). Syn.: *oculus leoninus* (1st def.). 1. That condition of the eye in which the humors and tunics are black or pigmented. [Ambrose Paré (B).] 2. A name given by C. G. Kühn to that morbid condition in which flashes of light and flame appear before the eye. [B, 48, 78.]

**ÆTHOXACETSÄURE** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-a<sup>3</sup>tz-e<sup>2</sup>t-zoi-re<sup>2</sup>. Ethoxyacetic acid.

**ÆTHOXYBUTTERSÄURE** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-but<sup>2</sup>e<sup>2</sup>r-zoi-re<sup>2</sup>. Ethoxybutyric acid.

**ÆTHOXYCHINOLIN** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-ch<sup>2</sup>i<sup>2</sup>n<sup>2</sup>o-len. Ethoxyquinoline. [B.]

**ÆTHOXYHYDROÄTHYLCHINOLIN** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-hu<sup>6</sup>-dro-at-u<sup>1</sup>-ch<sup>2</sup>i<sup>2</sup>n<sup>2</sup>o-len. Ethoxyhydroethylquinoline. [B.] See **ETHYLKAIKINE**.

**ÆTHOXYHYDROCHINOLIN** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-hu<sup>6</sup>-dro-ch<sup>2</sup>i<sup>2</sup>n<sup>2</sup>o-len. Ethoxyhydroquinoline. [B.]—**A<sup>3</sup>bromid**. Ethoxyhydroquinoline bromide. [B, 79.]

**ÆTHOXYHYDROMETHYLCHINOLIN** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-hu<sup>6</sup>-dro-ma-thu<sup>1</sup>-ch<sup>2</sup>i<sup>2</sup>n<sup>2</sup>o-len. Ethoxyhydromethylquinoline. [B, 79.]

**ÆTHOXYKOFFEÏN** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-ko<sup>2</sup>f<sup>2</sup>-fa-en. Ethoxycaffeine. [B.]

**ÆTHOXYL** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>l. Ethoxyl.—**A<sup>3</sup>chinolin-carbonsäure**. Ethoxylchinolinecarboxylic acid. [B, 79.]—**A<sup>3</sup>cinchoninsäure**. Ethoxylcinchoninic acid. [B, 79.]—**A<sup>3</sup>piperidin**. Ethoxylpiperidine. [B, 79.]

**ÆTHOXYPROPIONSÄURE** (Ger.), n. At-o<sup>2</sup>x-u<sup>6</sup>-pro<sup>2</sup>pe-o<sup>2</sup>n-zoi-re<sup>2</sup>. Ethoxypropionic acid. [B.] See **ETHYLLACTIC ACID**.

**ÆTHUSA** (Lat.), n. f.  $Ea(a^3e^2)-thu^2(thu)^2sa^2$ . From  $\alpha\theta\epsilon\upsilon$ , to light up, on account of the brilliancy of its leaves, or, according to others, on account of its acidity. Fr., *æthuse*, *éthuse*. Ger., *Gleisse*. It., *etusa*. A Linnaean genus of annual herbs belonging to the order *Umbelliferae*, tribe *Seselinæ*, and subtribe *Enanthæ* (Benth and Hooker). [B, 46, 104.]—**Æ. cynapium** [Linnæus]. Fr., *petite ciguë*, *ciguë des jardins*, *ache des chiens*, *faux persil*. Ger., *Hundspeterstie*, *Gartenschierling*. It., *cicuta agnina* o dei giardini o minore. Syn.: *fool's parsley*. A species growing wild in Europe, and also found occasionally in America. It stands about 2 feet in height, has white flowers and dark-green bipinnate or tripinnate leaves, with narrow wedge-shaped segments. It somewhat resembles parsley, from which it is distinguished by its fetid odor and by the involucre, consisting of 3 linear pendulous bracts found at the base of each partial umbel and exceeding the latter in length. It is said to be an acro-narcotic poison like conium, although recently its poisonous properties have been denied (Harley). It was formerly employed as a stomachic, diuretic, and emmenagogue. [B, 19, 34, 93.]—**Æ. meum** [Linnæus]. Fr., *æthuse meum*. See **MEUM athamanticum**.

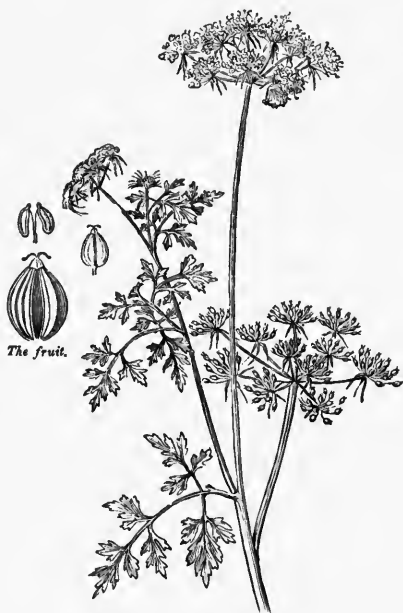

**ÆTHUSE** (Fr.), n. A-tu<sup>2</sup>. *Æthusa*. [B, 107.]—**Æ. fétide**. *Æthusa cynapium*. [B, 107.]

**ÆTHUSINE**, n.  $E^{th}hu^2sen$ . Fr., *æthusine*, *éthusine*. Ger., *Æthusin*. The poisonous alkaloid of *Æthusa cynapium*. It is crystalline and forms a crystalline sulphate. [A, 316.]

**ÆTHYIA** (Lat.), n. f.  $E^{th}(a^3e^{2th})-(u^6)^2i^2a^2$ . From  $\alpha\theta\upsilon\alpha$ , a sort of bird. See **MERGUS**.

**ÆTHYL** (Lat.), n. n.  $E^{th}(a^3e^{2th})-i^2l(u^6)l$ . Indecl. For deriv., see **ETHYL**. Ethyl. The same form is also occasionally used in Ger. instead of *Äthyl*.—**Æ. bromidum**. Ethyl bromide. [B, 81.]—**Æ. iodidum**. Ethyl iodide. [B, 81.]

[B.]—**A'chlorid.** Ethylene chloride (dichloride). [B.]—**A'chloridür.** Ethylene chloridide. [B.]—**A'chlornitrat.** Ethylene chloronitrate.—**A'chlorisulfonsäure.** Ethylenechlorosulphonic acid. [B.]—**A'cyanhydrat.** Ethylene cyanhydrin. [B.]—**A'cyanid.** Ethylene cyanide (dicyanide). [B.]—**A'diacetat.** **A'diacetin.** Ethylene diacetin. [B.]—**A'diamm.** See the major list.—**A'diammondichlorür.** Ethylenediammonium dichloride. [B.]—**A'diammonium.** Ethylenediammonium. [B.]—**A'diäthylat.** **A'diäthyläther.** Ethylenediethyl ether; ethylene diethylether. [B.]—**A'diäthylamin.** Ethylenediethylamine. [B.]—**A'diäthyl-diketon.** Ethylenediethyl diketone.—**A'dibromid.** Ethylene dibromide. [B.]—**A'dicarbonitril.** Ethylene dicarbonitril (dicy-

anide). [B.]—**A'dicarbonsäure**, **A'dicarboxylsäure**. Ethylenedicarboxylic (succinic) acid. [B.]—**A'dichlorür**. Ethylene dichloride. [B, 4.]—**A'dieyanür**. Ethylene dicyanide. [B, 4.]—**A'diformamid**. Ethylenediformamide. [B.]—**A'diformiat**. Ethylene diformate. [B.]—**A'diharnstoff**. Ethylenediurea. [B.]—**A'dihydrat**. Ethylene dihydrate; ethylene glycol. [B.]—**A'dihydür**, **A'dijodür**. Ethylene diiodide. [B.]—**A'dimercaptan**. Ethylene dihydrodisulphide. [B.]—**A'dinitrat**. Ethylene dinitrate. [B.]—**A'dinitril**. Ethylene dinitril. [B.]—**A'diphenyläther**. Ethylenediphenyl ether. [B.]—**A'diphenyldiamin**. Ethylenediphenyldiamine. [B.]—**A'disulphhydrat**. Ethylene disulphhydrate (dihydrosulphide). [B.]—**A'disulfonsäure**. Ethylenedisulphonic acid. [B.]—**A'dithiochlorür**. Ethylene dithiochloride. [B.]—**A'dithiocyanat**. Ethylene dithiocyanate. [B.]—**A'dithiodichlorür**. Ethylene dithiodichloride. [B.]—**A'eisenchlorür**. Ethylene ferroschloride. [B.]—**A'eugenol**. Ethyleneugenol. [B.]—**A'glycol**, **A'glykol**. Ethylene glycol. [B.]—**A'hexäthylarsonium**. Ethylenhexethylarsonium. [B.]—**A'hexäthylarsoniumdibromür**. Ethylenhexethylarsoniumdibromide. [B.]—**A'hexäthylphosphonium**. Ethylenhexethylphosphonium. [B.]—**A'hexäthylphosphoniumdibromür**. Ethylenhexethylphosphoniumdibromide. [B.]—**A'hydrat-acetat**. Ethylene monacetin. [B.]—**A'hydratamin**. Ethylene hydramin. [B.]—**A'hydratäthylat**. Ethylene hydrate ethylate. [B.] See **ETHYLENE ethylate**.—**A'hydratbromür**. Ethylene hydrate bromide; ethylene bromhydrin. [B, 4.]—**A'hydratchlorür**. Ethylene hydrate chloride; ethylene chlorhydrin. [B, 4.]—**A'hydratcyanür**. Ethylene cyanhydrin. [B, 4.]—**A'hydratiodür**, **A'hydratjodür**. Ethylene hydrate iodide; ethylene iodhydrin. [B, 4.]—**A'hydratsulfat**. Ethylenehydroxysulphuric acid. [B.]—**A'hydratsulphhydrat**. Ethylene hydroxysulphide. [B.]—**A'hydroxydisulfonsäure**. Ethylenehydroxydisulphonic acid. [B.]—**A'hydroxyschwefelsäure**. Ethylenehydroxysulphuric acid. [B.]—**A'hydroxysulfonsäure**. Ethylenehydroxysulphonic (isethionic) acid. [B.]—**A'mercaptan**. Ethylene dihydroxysulphide. [B.]—**A'methylat**. Ethylene methylate. [B.]—**A'methyläthylat**. Ethylene methylethylate. [B.]—**A'milchsäure**. Ethylene lactic acid. [B.] See **LACTIC ACID**.—**A'monacetin**. Ethylene monacetin. [B.]—**A'monothiohlogol**. Ethylene hydroxysulphide. [B.]—**A'naphthalen**. Ethylenenaphthalene; acenaphthene. [B.]—**A'nitrat**. Ethylene nitrate. [B.]—**A'nitrit**. Ethylene nitrite. [B.]—**A'oxyl**. Ethylene oxide. [B.]—**A'oxythiocarbonat**. Ethylene oxythiocarbonate. [B.]—**A'phosphonium**. Ethylenephosphonium. [B.]—**A'platinchlorür**. Ethylene platinumchloride. [B.]—**A'schwefelsäure**. Ethylenesulphuric acid. [B.]—**A'selenocyanat**. Ethylene selenocyanate. [B.]—**A'succinat**. Ethylene succinate. [B.]—**A'succinsäure**. Ethylenesuccinic acid. [B.]—**A'sulfid**. Ethylene sulphide. [B.]—**A'sulfonsäure**. Ethylenesulphonic acid. [B.] See **ETHIONIC ACID**.—**A'thiocarbonat**. Ethylene thiocarbonate. [B.]—**A'thiochlorür**. Ethylene thiochloride. [B.]—**A'thiocyanat**. Ethylene thiocyanate. [B.]—**A'thiodichlorür**. Ethylene thiodichloride. [B.]—**A'thioglycol**, **A'thioglykol**. Ethylene dihydroxysulphide. [B.]—**A'trisulfonsäure**. Ethylenetrisulphonic acid. [B.]

**AETHYLENAT** (Ger.), n. A-tu<sup>9</sup>l-an-a<sup>9</sup>t'. An ethylenate. [B.]  
**AETHYLENDIAMIN** (Ger.). A-tu<sup>9</sup>l-an-de-a<sup>9</sup>m'i<sup>n</sup>. Ethylenediamine. [B, 81.]—**Salzsaures A**. Ethylenediamine hydrochloride; ethylenediammonium chloride. [B.]

**ETHYLENUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-(a)<sup>1</sup>/nu<sup>3</sup>m-(nu<sup>4</sup>m). Ethylene. [B.]—**Äthyleni bichloridum**. Ethylene dichloride. [B, 81.]—**Ä. bromatum**. Ethylene dibromide. [B.]—**Ä. chloratum**. Ethylene dichloride. [B, 95.]

**ÄTHYLESTER** (Ger.), n. A-tu<sup>9</sup>l-e<sup>2</sup>s'te'r. An ethyl ether; a salt of ethyl. [B, 4.]—**Ämeisensäureä', Bernsteinsäureä'**, etc. See under **AMEISE** and **BERNSTEIN**.

**ÄTHYLIAC** (Ger.), n. A-tu<sup>9</sup>l-i<sup>2</sup>-a<sup>3</sup>k'. Ethylac; ethylamine. [B, 48.]

**ÄTHYLICES** (Lat.), n. f. pl. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-i-sez(ke<sup>2</sup>s). Gen., *äthyl'icum*. The same as **ÄTHOLICES**. [B, 78.] See **ÄTHOLIX**.

**ÄTHYLICODES** (Lat.), adj. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-i<sup>2</sup>-ko'/dez-(de<sup>2</sup>s). From *αἰθάλειν* (an unclassical form of *αἰθέλειν*), and *είδος*, likeness. Bullous (often wrongly rendered pustular). [B, 78.]

**ÄTHYLICUS** (Lat.), adj. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-i<sup>2</sup>-ku<sup>2</sup>s(ku<sup>4</sup>s). Ethylic. [B, 95.]

**AETHYLIDEN** (Ger.), n. A-tu<sup>9</sup>l-i<sup>2</sup>d-an'. Ethylidene. [B.]—**A'acetamid**. Ethylenacetamide. [B.]—**A'äthylendioxyd**. Ethylene ethylidene oxide. [B.]—**A'bichlorid**. Ethylidene dichloride. [B.]—**A'biuret**. Ethylidene biuret. [B.]—**A'bromacetin**. Ethylidene bromacetin. [B.]—**A'bromid**. Ethylidene bromide (dibromide). [B.]—**A'chloracetat**, **A'chloracetin**. Ethylidene chloracetin. [B.]—**A'chlorid**, **A'chlorür**. Ethylidene chloride (dichloride). [B.]—**A'chlorüräthylat**, **A'chlorüräthyläther**. Ethylidene chloretylethylate. [B.]—**A'chlorürsulfonsäure**. Ethylenchlorosulphuric acid. [B.]—**A'cyanhydrin**. Ethylidene cyanhydrin. [B.]—**A'cyanuramid**. Ethylenecyanuramide. [B.]—**A'diacetat**. Ethylidene diacetate. [B.]—**A'diäthylat**, **A'diäthyläther**, **A'diäthyloxyd**. Ethylidene diethylate; acetal. [B.]—**A'dibromür**. Ethylidene dibromide. [B.]—**A'dicarbonsäure**. Ethylenedicarbonic (isosuccinic) acid. [B.] See **SUCCINIC ACID**.—**A'dichlorür**. Ethylidene dichloride. [B.]—**A'dijodür**. Ethylidene diiodide. [B.]—**A'dilactaminsäure**. Ethylidene dilactamic acid. [B.] See **DILACTAMIC ACID**.—**A'dime-thylat**, **A'dimethyläther**. Ethylidene dimethylate. [B.]—**A'hydramin**, **A'hydratamin**. Ethylidene hydramine; aldehydammonia. [B.]—**A'hydratcyanür**. Ethylidene cyanhydrin. [B.]—**A'lactaminsäure**. Ethylidene lactic acid; alanine. [B.]—**A'methyläthylat**, **A'methyläthyläther**. Ethylidene methyl-ethylate. [B.]—**A'milchsäure**. Ethylidene lactic acid. [B.] See **LACTIC ACID**.—**A'oxychlorür**. Ethylidene oxychloride. [B.]—

**A'oxyl**. Ethylidene oxide; acetic aldehyde. [B.]—**A'propenyl-äther**. Ethylenepropenyl ether; acetoglycerol. [B.] See **GLYCERALS**.—**A'sulfid**. Ethylidene sulphide. [B.]

**ÄTHYLIDENUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-i<sup>2</sup>d-e(a)<sup>1</sup>-nu<sup>3</sup>m(nu<sup>4</sup>m). For deriv., see **ÄTHYLIDENE**. Ethylidene. [B.]—**Ä. chloratum**. Ethylidene dichloride. [B, 108.]

**ÄTHYLIN** (Ger.), n. A-tu<sup>9</sup>l-en. Ethylin. [B.]

**ÄTHYLUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-i<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Ethyl.

**ÄETHYLOXYD** (Ger.), n. A-tu<sup>9</sup>l-o<sup>2</sup>-x-u<sup>4</sup>d'. 1. Ethyl oxide (ethyl ether). 2. Ethoxide. [B.]—**A'hydrat**. Ethyl alcohol. [B.]—**A'oxydsalz**. A salt of ether; a compound ethyl ether. [B, 48.]—**A'oxydschwefelsäure**. Ethylsulphuric acid. [A, 324.] See **ETHYL sulphate**.—**Ämeisensaures A**, **Äpelsaures A**, etc. See **Ämeisensaures ÄTHYL**, **Äpelsaures ÄTHYL**, etc.—**Übergelochlortes A**. Perchloroether. [B, 48.]—**Zweifach gechlortes A**. Tetrachlorether (so called from the formula C<sub>4</sub>H<sub>2</sub>Cl<sub>2</sub>O formerly assigned to it). [B, 48.]

**ÄETHYLTHALLIN** (Ger.), n. A-tu<sup>9</sup>l-ta<sup>9</sup>l'i<sup>2</sup>n. Ethylthalline. [B.]—**Salzsaures A**. Ethylthalline hydrochloride. [B.]

**ÄTHYLUM** (Lat.), n. n. E<sup>2</sup>th(a<sup>3</sup>-e<sup>2</sup>th)-i<sup>2</sup>l(u<sup>6</sup>l)-u<sup>3</sup>m(u<sup>4</sup>m). Ethyl. [B.]—**Ä. bromatum**. Ethyl bromide. [B, 108.]—**Ä. chloratum**. Ethyl chloride. [B.]—**Ä. jodatum**. Ethyl iodide. [B, 108.]

**ÄETHYLÜR** (Ger.), n. A-tu<sup>9</sup>l-u<sup>4</sup>r'. An ethylide. [B.]

**ÄTIA** (Lat.), n. f. E/(a<sup>3</sup>-e<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. Gr., *αιτία*. A cause (as of a disease). [L, 104.]

**ÄETIOI PHLEBES** (Lat.), n. m. pl. A(a<sup>3</sup>-e<sup>2</sup>)-ti(e)<sup>1</sup>voi fle(fla)<sup>1</sup>-bez(he<sup>2</sup>s). Gr., *ἀετιοί φλέβες*. Lit., the eagle-veins; the temporal veins. [A, 311; L, 104.]

**ÄTIOLOGICAL**, adj. E<sup>2</sup>t-i<sup>2</sup>-o-lo<sup>2</sup>j'i<sup>2</sup>k-a<sup>2</sup>l. Fr., *étologique*. Ger., *ätiologisch*. It., *etiologico*. Sp., *etiológico*. Pertaining to aetiology. [L, 50.]

**ÄTIOLOGICALLY**, adv. E<sup>2</sup>t-i<sup>2</sup>-o-lo<sup>2</sup>j'i<sup>2</sup>k-a<sup>2</sup>l-i<sup>2</sup>. As regards aetiology. [D, 50.]

**ÄTIOLOGIST**, n. E<sup>2</sup>t-i<sup>2</sup>-o-l<sup>2</sup>-o-j'i<sup>2</sup>st. Lat., *aetilogus*. One who studies the causes of disease. [A, 322.]

**ÄTIOLOGY**, n. E<sup>2</sup>t-i<sup>2</sup>-o-l<sup>2</sup>-o-j'i<sup>2</sup>. Gr., *αιτιολογία* (from *αιτία*, a cause). Lat., *aetiology*. Fr., *étologie*. Ger., *Aetiology*. It., *etiologia*, *eziologia*. Sp., *etiologia*. 1. That branch of pathology which deals with the causes of disease. [C.] 2. In biology, the science of the causes of biological phenomena and of their relation to general physical laws. [A, 12.]

**ÄTION** (Lat.), n. n. E/(a<sup>3</sup>-e<sup>2</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-o<sup>2</sup>n. See **ÄTIA**.

**ÄTIONYMOUS**, adj. E<sup>2</sup>t-i<sup>2</sup>-o<sup>2</sup>n'i<sup>2</sup>m-u<sup>3</sup>s. Gr., *αιτιώνυμος*. Lat., *ætionymus*. Named from the cause (said of diseases, e. g., lead colic, mercurialism, etc.). [A, 322.]

**ÄTITE**, n. A'e<sup>2</sup>-it. Gr., *ἀέτις*. Lat., *ætites*. Fr., *ætitte*, *pietre d'aigle*. Ger., *Ätīt*, *Adlerstein*. The eagle-stone; a concretion of teroxide of iron, or any kind of stone having a loose nucleus, so called because, having first been found in an eagle's nest, it was fabled to have been carried there by the bird to facilitate the laying of its eggs; bound to the arm, it was supposed to prevent abortion, and, to the thigh, to assist delivery. [L, 30, 42, 50, 52, 53, 96.]

**ÄTONYCHUM** (Lat.), n. n. A(a<sup>3</sup>-e<sup>2</sup>)-o<sup>2</sup>n'i<sup>2</sup>l<sup>2</sup>ku<sup>2</sup>(u<sup>6</sup>ch<sup>2</sup>)-u<sup>3</sup>m(u<sup>4</sup>m). From *ἀέρος*, the eagle, and *ὄνυξ*, a talon. See **LITHOSPERMUM**.

**ÄTZAMMONIAK** (Ger.), n. Ats'a<sup>3</sup>m-mon-i<sup>2</sup>-a<sup>3</sup>k. Caustic ammonia. [B.] See **Liquor ammoniæ fortior**.

**ÄTZBAR** (Ger.), adj. Ats'ba'r. Corrosive, caustic. [L, 46.]—**A'keit**. Corrosiveness. [L, 46.]

**ÄTZBARYT** (Ger.), n. Ats'ba'r-u<sup>4</sup>t. Hydrate of baryta. [L, 37.]

**ÄTZEN** (Ger.), v. tr. and n. Ats'e<sup>2</sup>n. As a v., to cauterize, to corrode, to macerate. [E.] As a n., cauterization. [L, 46.]

**ÄTZEND** (Ger.), adj. Ats'e<sup>2</sup>nd. 1. Caustic, corrosive. 2. Phagedenic. [B; E.]

**ÄTZFLÜSSIGKEIT** (Ger.), n. Ats'flu<sup>4</sup>s-zi<sup>2</sup>g-kit. The *liquor corrosivus* of the Ger. Ph. [B.]

**ÄTZKALI** (Ger.), n. Ats'ka<sup>3</sup>-le. Caustic potash. [B.]—**A'lauge**. See **Liquor potassæ**.—**A'stängelchen**. A stick of caustic potash. [L, 57.]—**Geschmolzenes A**. See **POTASSA fusa**.

**ÄTZKALK** (Ger.), n. Ats'ka<sup>3</sup>lk. Caustic lime, quick-lime. [B.]

**ÄTZKRAFT** (Ger.), n. Ats'kra<sup>3</sup>ft. Causticity. [L, 46.]

**ÄTZLAUGE** (Ger.), n. Ats'la<sup>3</sup>-u-ge<sup>2</sup>. A solution of caustic potash or caustic soda. [L, 37.]

**ÄTZMAGNESIE** (Ger.), n. Ats'ma<sup>3</sup>g-na-ze. See **MAGNESIA usta**.

**ÄTZMITTEL** (Ger.), n. Ats'mi<sup>2</sup>t-te<sup>2</sup>l. A caustic. [L, 46.]—**A'leiter**, **A'trigger**. A caustic-holder. [B; L.]

**ÄTZNATRON** (Ger.), n. Ats'na<sup>3</sup>-tron. Caustic soda. [B.]—**A'lauge**. See **Liquor sodæ**.

**ÄTZPASTA** (Ger.), n. Ats'pa<sup>3</sup>st-a<sup>3</sup>. A caustic paste.—**Wiener A**. See **POTASSA cum calce**.

**ÄTZPINCETTE** (Ger.), n. Ats'pi<sup>2</sup>n-tse<sup>2</sup>t-te<sup>2</sup>. A forceps for holding caustic. [L, 57.]

**ÄTZPINSEL** (Ger.), n. Ats'pi<sup>2</sup>ns-e<sup>2</sup>l. A brush for applying caustic solutions. [L, 57.]

**ÄTZPULVER** (Ger.), n. Ats'pul-fe<sup>2</sup>r. A caustic powder. [L, 46.]—**Wiener A**. See **POTASSA cum calce**.

**ÄTZQUECKSILBER** (Ger.), n. Ats'kwe<sup>2</sup>k-zi<sup>2</sup>l-be<sup>2</sup>r. Corrosive sublimate. [L, 46.]

- AETZSILBER** (Ger.), n. *Ats*<sup>2</sup>zi<sup>1</sup>-be<sup>2</sup>r. Nitrate of silver. [L, 46.]
- AETZSTÄBCHEN, AETZSTÄNGELCHEN** (Ger.), n's. *Ats*<sup>2</sup>stab-ch<sup>2</sup>e<sup>2</sup>n, -stang-e<sup>2</sup>l-ch<sup>2</sup>e<sup>2</sup>n. A stick of caustic. [L, 57.]
- AETZSTEIN** (Ger.), n. *Ats*<sup>2</sup>stin. 1. Caustic potash. [B.] 2. Silver nitrate. [L, 46.]
- AETZSTOFF** (Ger.), n. *Ats*<sup>2</sup>sto<sup>2</sup>f. A caustic substance. [L, 46.]
- AETZSUBLMAT** (Ger.), n. *Ats*<sup>2</sup>zub-le-ma<sup>2</sup>t. Corrosive sublimate. [L, 46.]
- AETZUNG** (Ger.), n. *Ats*<sup>2</sup>ung. Cauterization, corrosion. [E; L, 46.]
- AETZWASSER** (Ger.), n. *Ats*<sup>2</sup>va<sup>3</sup>s-se<sup>2</sup>r. Nitric acid. [L, 46.]
- AEUSSERSTE** (Ger.), n. *Ois*<sup>2</sup>se<sup>2</sup>rs-te<sup>2</sup>. An extremity. [L, 43.]
- ÆGOTICUM** (Lat.), n. n. *E*<sup>2</sup>x(a<sup>2</sup>-e<sup>2</sup>x)-to<sup>2</sup>x'i<sup>2</sup>k-u<sup>2</sup>m(u<sup>2</sup>m). See *ÆGOTICUM*.
- AFABOND**, n. A dried mucilaginous fruit used in India as a tonic. [Waring (L, 63).]
- AFAN**, n. See *ADRAGOT*.
- AFCOON**, n. The Persian name for opium. [L, 77.]
- AFÉ** (Fr.), n. *A*<sup>3</sup>-fa. A kind of fern, the root of which is eaten in India. [L, 105.]
- AFEBRILE**, adj. *A*<sup>2</sup>f-e<sup>2</sup>b'i<sup>2</sup>ri<sup>2</sup>. From *a* priv., and *febrilis*, feverish. Free from fever. [D, 69.]
- AFADIL, AFFADILL**, n's. *A*<sup>2</sup>f-fa<sup>2</sup>-di<sup>2</sup>l. See *DAFFODIL*.
- AFFADISSEMENT** (Fr.), n. *A*<sup>2</sup>f-fa<sup>2</sup>-des-ma<sup>2</sup>n<sup>2</sup>. 1. Nausea. [L, 103.] 2. A perversion of the sense of taste, with loss of appetite and enfeeblement of the digestion. [L, 109.]
- AFFAIBLISSEMENT** (Fr.), n. *A*<sup>2</sup>f-fa-ble<sup>2</sup>s-ma<sup>2</sup>n<sup>2</sup>. Weakness, adynamia. [L, 49.]
- AFFAIRES** (Fr.), n. pl. *A*<sup>2</sup>f-fa<sup>2</sup>r. A popular term for the menes. [L, 42.]
- AFFAISSEMENT** (Fr.), n. *A*<sup>2</sup>f-fas-ma<sup>2</sup>n<sup>2</sup>. 1. The weakness and emaciation that occur as disease approaches a fatal termination. [L, 49, 92, 107.] 2. A diminution or absence of tension (said of tumors and swellings). [E; L, 55.]
- AFFECTIO** (Lat.), n. f. *A*<sup>2</sup>f(a<sup>2</sup>f)-fe<sup>2</sup>k/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *affectio*<sup>2</sup>nis. From *afficere*, to exert an influence upon. An affection (in the sense of disease).—*A. arthritica cordis*. See *Cardiac gout*.—*A. bovina*. A disease of cattle due to a small worm which penetrates the tissues. [L, 96.]—*A. sarmatica*. The Sarmatian disease. [G.] See *PLICA*.—*A. tympanitica*. See *TYMPANITES*.—*A. uterina*. An old term for hysteria. [A, 42.]
- AFFECTION**, n. *A*<sup>2</sup>f-fe<sup>2</sup>k/shu<sup>2</sup>n. Lat., *affectio* (q. v. for deriv.). Fr., *affection*. Ger., *Leidenschaft, Angegriffenwerden*. It., *affezione*. Sp., *afcción*. The action or effect of any morbid influence; a disease. In the pl., grief, terror, etc. [D, 3; L, 43.]—*A. calculuse du foie* (Fr.). See *CHOLELITHIASIS*.—*A. douloureuse de l'intestin* (Fr.). See *Membranous ENTERITIS*.—*A. furunculose de l'intestin* (Fr.). Horse-pox. [Hertwig (D, 72).]—*A. membranouse de l'intestin*. *A. muqueuse* (Fr.). See *Membranous ENTERITIS*.—*A. polyurique* (Fr.). Lithuria. [Bouchardat (L, 45).]—*A. pneumogastro-pituiteuse* (Fr.). Whooping-cough. [D, 29.]—*A. typhoide* (Fr.). Typhus. [L, 45.]—*A's vaporesnes* (Fr.). See *VAPORS*.—*Membranous a. of the intestine*. Membranous enteritis. [Goss (D).]—*Mucous a. of the intestine*. Membranous enteritis. [Whitehead (D).]—*Painful a. of the intestine*. Membranous enteritis. [Powell (D).]—*Primary a.* One that occurs without being caused by any preceding disease. [D.]—*Secondary a.* One that occurs as a complication or a sequel of a pre-existing disease. [D.]
- AFFECTIOSIGKEIT** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>kt'los-i<sup>2</sup>g-kit. Apathy. [L, 80.]
- AFFECTUS** (Lat.), n. m. *A*<sup>2</sup>f(a<sup>2</sup>f)-fe<sup>2</sup>kt'u<sup>2</sup>s(u<sup>2</sup>s). Gen., *affectus*. A diseased state.—*A. flatulentus*. Hypochondriasis, melancholia. [L, 53.]—*A. hyderodes*. Dropsy. [L, 45.]—*A. hystericus*. Hysteria.—*A. implicatus*. A complicated affection; one in which several parts of the body are affected at the same time. [L, 53.]—*A. magnus*. Epilepsy. [Hippocrates (L, 53).]—*A. melancholicus*. Melancholia. [L, 53.]—*A. mirachialis*. An old term for any disease or pain in the abdomen. [A, 325.]—*A. precordialis*. Hypochondriasis. [L, 53.]—*A. spasmodico-convulsivus labiorum*. See *THE douloureux*.
- AFFENAH**, n. An African name for a plant the seeds of which are used by the natives internally and externally in the treatment of swollen parts. [Waring (L, 63).]
- AFFENBAUM** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-ba<sup>2</sup>-u<sup>2</sup>m. See *ADANSONIA digitata*.
- AFFENBEERE** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-bar-e. The *Empetrum nigrum*. [A, 305.]
- AFFENBEZOAR** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-be<sup>2</sup>tz-o-a<sup>2</sup>r'. See *BEZOAR*.
- AFFENBLUME** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-blum-e<sup>2</sup>. A name applied to several species of the botanical genus *Mimulus*. [B, 20.]
- AFFENBRODBAUM, AFFENBROT** (Ger.), n's. *A*<sup>2</sup>f-fe<sup>2</sup>n-brod-ba<sup>2</sup>-u<sup>2</sup>m, -brot. See *ADANSONIA digitata*.
- AFFENGESICHT** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-ge<sup>2</sup>-zi<sup>2</sup>ch<sup>2</sup>u<sup>2</sup>. See *QUADRUMANA*.
- AFFENGESICHT** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-ge<sup>2</sup>-zi<sup>2</sup>ch<sup>2</sup>u<sup>2</sup>. The *Mimosa elengi*. [A, 305.]
- AFFENHAND** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-ha<sup>2</sup>nd. See *MAIN en griffe*.
- AFFENICUM**, n. An alchemical term for the mind or the soul. [Ruland, Johnson (L, 53).]
- AFFENKNABENKRAUT** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-kna<sup>2</sup>b-e<sup>2</sup>n-kra<sup>2</sup>-u<sup>2</sup>t. The *Orchis morio*. [A, 305.]
- AFFENMUSE** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-mu<sup>2</sup>-ze<sup>2</sup>. The *Musa troglodytarum*. [L, 46.]
- AFFENPOCKEN** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-po<sup>2</sup>ck-e<sup>2</sup>n. See *APE-POX*.
- AFFENSCHÄDEL** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-shad-e<sup>2</sup>l. The *Antirrhinum orontium*. [A, 305.]
- AFFENSPALTE** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-spa<sup>2</sup>lt-e<sup>2</sup>. See *FISSURA perpendicularis externa and interna*.
- AFFENTOPF** (Ger.), n. *A*<sup>2</sup>f-fe<sup>2</sup>n-to<sup>2</sup>pf. The *Lecythis ollaria*. [A, 305.]
- AFFERENT**, adj. *A*<sup>2</sup>f-fe<sup>2</sup>r-e<sup>2</sup>nt. Lat., *afferens* (from *adferre*, to bear to), *advehens*. Fr., *afferent*. Ger., *zuführend*. It., *afferente*. Sp., *aficiente*. Syn.: *centripetal* (2d def.). 1. Serving to convey a fluid, like blood or lymph, to an organ or part (e. g., *a. vessels*). 2. Conveying anything from the periphery to the center (e. g., *a. currents, a. nerves*). [K.] See under *CURRENT, NERVE, and VESSEL*.
- AFFHOLDER** (Ger.), n. *A*<sup>2</sup>f-hold-e<sup>2</sup>r. The water-elder (*Vi burnum opulus*). [L, 46.]
- AFFICIRBAR** (Ger.), adj. *A*<sup>2</sup>f-fi<sup>2</sup>tz-er-ba<sup>2</sup>r. Irritable; sensitive. [L, 46.]
- AFFIDRA**, n. Probably for *aphidra* from *ἀφίδρουν*, to sweat. An alchemical term for white-lead, perhaps from its supposed sudorific power. [L, 53, 104.]
- AFFINATIO** (Lat.), n. f. *A*<sup>2</sup>f(a<sup>2</sup>f)-fi<sup>2</sup>n-a(a<sup>2</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *affinatio*<sup>2</sup>nis. Affinity. [B.]—*A. aggregata*. See *AFFINITY of aggregation*.—*A. complicata*. *A. composita*. See *Compound AFFINITY*.—*A. simplex*. See *Simple AFFINITY*.
- AFFINIS** (Lat.), adj. *A*<sup>2</sup>f(a<sup>2</sup>f)-fi(fe)/ni<sup>2</sup>s. Related. [B.]
- AFFINITAS** (Lat.), n. f. *A*<sup>2</sup>f(a<sup>2</sup>f)-fi<sup>2</sup>n-i<sup>2</sup>-ta<sup>2</sup>s(ta<sup>2</sup>s). Gen., *affinitas*<sup>2</sup>nis. Affinity. [B.] *A. adjuncta*. See *MEDIATING AFFINITY*. [B, 140.]—*A. animalium*. The relationship of animals to each other. [B, 124.]—*A. appropriata*. *A. approximata*. See *MEDIATING AFFINITY*. [B, 140.]—*A. chemica*. Chemical affinity.—*A. compositionis*. Affinity of composition. [B, 140.]—*A. divellens*. Divellent affinity. [B, 140.]—*A. mixtionis*. Affinity of composition. [B, 140.]—*A. pradisponens*. Predisposing affinity. [B, 140.]—*A. producta*. Developed affinity. [B, 140.]—*A. quiescens*. Quiescent affinity. [B, 140.]—*A. reciproca*. Reciprocal affinity. [B, 140.]—*A. synthetica*. Chemical affinity. [B.]
- AFFINITÄT** (Ger.), n. *A*<sup>2</sup>f-fi<sup>2</sup>n-i<sup>2</sup>-tat'. Affinity. [B.]—*Anhängungsa'*. Affinity of aggregation. [L, 46.]—*Chemische A.* Chemical affinity. [B.]—*Mischungsa', Vermischende A., Zusammensetzende A.* Affinity of composition. [B.]
- AFFINITÉ** (Fr.), n. *A*<sup>2</sup>-fen-e-ta. Affinity. [L.]—*A. chimique*. Chemical affinity.—*A. complexe*. Double affinity. [B, 38.]—*A. composée*. Compound affinity. [L, 52.]—*A. d'aggrégation*. Affinity of aggregation. [L, 52.]—*A. de composition*. Affinity of composition. [B.]—*A. de soi pour soi* [Geoffroy St.-Hilaire]. See *AFFINITY* (3d def.).—*A. de solution*. Affinity of solution. [B, 92.]—*A. divellente*. Divellent affinity. [B, 38.]—*A. double*. *A. double élective*. Double affinity. [L, 52.]—*A. élective*. Elective affinity. [L, 41.]—*A. élémentaire*. Elementary affinity. [L, 52.]—*A. indirecte*. Elective affinity. [L, 52.]—*A. moléculaire*. Chemical affinity. [B, 38.]—*A. morbide*. The tendency displayed by certain groups of diseases to exist simultaneously or to follow each other. [L, 49.]—*A. pour l'oxygène*. Affinity for oxygen. [L, 52.]—*A. produite*. Developed affinity. [B, L, 52.]—*A. quiescente*. Quiescent affinity. [B, 38.]—*A. réciproque*. Reciprocal affinity. [B.]—*A. secondaire*. Developed affinity. [B.]—*A. simple*. Affinity of composition. [B, 38.]—*A. simple élective*. Simple elective affinity.
- AFFINITY**, n. *A*<sup>2</sup>f-fi<sup>2</sup>n-i<sup>2</sup>-t<sup>2</sup>. Lat., *affinitas, affinitio*. Fr., *affinité*. Ger., *Affinität, Verwandtschaft*. It., *affinità*. Sp., *afinidad*. Literally, relationship or kinship. 1. In chemistry, the attraction of substances for each other, or the tendency of dissimilar substances to unite with each other. It was formerly applied both to true chemical compounds and to mechanical mixtures forming homogeneous combinations, but is now restricted to the former. [B.] 2. In botany and zoölogy, a relationship, founded upon similarity of structure existing between the members of a species, genus, or other natural division. It is distinguished from *analogy*, which relates to functional similarity only, and from *homology*, which has regard merely to similarity in the general plan upon which the related organisms are formed. [Dana (B, 116).] 3. In teratology, the tendency, first pointed out by Geoffroy St.-Hilaire, of double monsters to unite by their homologous surfaces, parts, or organs. [B, 38.]—*A. for oxygen*. Fr., *affinité pour l'oxygène*. Inflammability. [L, 52.]—*A. of aggregation*. Lat., *affinitas aggregata*. Fr., *affinité d'aggrégation*. Ger., *Anhängungsa'ffinität*. Syn.: *mechanical a., cohesive attraction*. The force which unites similar molecules together and builds them up into masses. [B.]—*A. of an intermedium*. See *MEDIATING A.*—*A. of composition*. Lat., *affinitas compositionis* (scu mixtionis). Fr., *affinité simple* (ou de composition). Ger., *zusammensetzende* (oder *vermischende*) *Affinität*. The tendency displayed by two or more substances to unite directly to form a compound without the destruction of any previously existing compound. [B, 140.]—*A. of heat*. The supposed attraction of heat for a substance, producing the decomposition of the latter when heated. [B, 140.]—*A. of mixture*. See *A. of composition*.—*A. of solution*. Fr., *affinité de solution*. The attraction existing between a dissolved substance and its solvent. [L, 77.]—*Alternating elective a.* See *RECIPROCATING A.*—*Appropriate a.* Lat., *affinitas appropriata*. See *MEDIATING A.*—*Chemical a.* Lat., *affinitas chemica*. Fr., *affinité chimique*. Ger., *chemische Anziehungskraft* (oder *Affinität*, oder *Verwandtschaft*). It., *affinità chimica*. Sp., *afinidad química*. See *A.* (1st def.).—*Compound A.* Lat., *affinitas composita*. Fr., *affinité composée*. Ger., *mehrfache Verwandtschaft*. See *A. of*

**composition.**—**Compound elective a.** Double a. [B, 59.]—**Current a.** The electrical force developed in a galvanic battery. [Todd and Bowman (L, 73).]—**Developed a.** Lat., *affinitus producta*. Fr., *affinité produite* (ou *secondaire*). Ger., *erzeugte Verwandtschaft*. The a. manifested by a compound of two substances for a third substance with which neither of the components separately enters into combination. [B, 140.]—**Disposing a.** See *Predisposing a.*—**Divalent a.** Lat., *affinitas divellens*. Fr., *affinité divellente*. Syn.: *separating a.* Kirwan's (1782) term for the force which leads to the formation of new compounds by the decomposition of old ones. [B, 33, 53.] Opposed to *Quiescent a.*—**Double a.** Double elective a. Lat., *attractio electiva duplex*. Fr., *affinité double* (ou *double élective*). Ger., *doppelte chemische Verwandtschaft*, *doppelte Wahlverwandtschaft*. Syn.: *double elective attraction*. That variety of chemical force which produces double decomposition; i. e., from two binary compounds, AB and CD, produces two new compounds, AC and BD. [B, 104.]—**Elective a.** Fr., *affinité élective*. Ger., *Wahlverwandtschaft*. The attraction exerted by a body A or a compound AD for one component B of a compound BC, producing decomposition of the latter and the formation of a new compound AC. [B.] See *Simple elective a.* and *Double elective a.*—**Elementary a.** Fr., *affinité élémentaire*. The a. existing between the elements of which two or more compounds are made up. [B, 144.]—**Inducing a.** Inductive a., **Imparted a.** Intermediate a. See *Mediating a.*—**Latent a.** See *Quiescent a.*—**Mechanical a.** See *A. of aggregation.*—**Mediating a.** Lat., *affinitas approximans* (seu *appropriata*, seu *adjuta*). Ger., *vermittelnde Verwandtschaft*. Syn.: *inducing (or appropriate) a.* The a. by virtue of which a substance which is not itself capable of entering into direct combination with a second substance becomes so capable by uniting with a third substance which can combine with the second. [B, 140.] Cf. *Predisposing a.*—**Mixing a.** A. of composition. **Predisposing a.** Lat., *affinitas predisponens*. Ger., *prädisponirende Verwandtschaft*. Syn.: *disposing a.* The a. of a substance D for a compound AC, which a. is supposed to be able to effect the formation of the latter when D is added to a mixture of a substance C and a compound AB, although the affinity of C for A is less than that of A for B. This sort of a. is now generally believed not to exist. [B, 140.]—**Quiescent a.** Lat., *affinitas quiescens*. Fr., *affinité quiescente*. Syn.: *latent a.* A name given by Kirwan (1782) to the force which tends to keep the dissimilar molecules of a compound united. Opposed to *Divalent a.* [B, 140, 144.]—**Reciprocal a.** Lat., *affinitas reciproca*. Fr., *affinité réciproque*. Ger., *reciproke Verwandtschaft*. Chemical a. the result of which is the exact converse of that produced by ordinary chemical a.; i. e., an attraction existing between the products of composition and decomposition due to chemical action, which attraction results in the formation of the original bodies compounded or decomposed. Reciprocal a. never exists unless the circumstances under which the original chemical action took place are altered. That is, if 2 compounds AB and CD form, when brought together, 2 new compounds AD and BC, the latter will not be re-formed into the original bodies AB and CD unless from some change in the conditions under which the primary decomposition occurred. [B.]—**Resulting a.** Secondary a. See *Developed a.*—**Separating a.** See *Divalent a.*—**Simple a.** Fr., *affinité simple*. See *A. of composition.*—**Simple elective a.** Lat., *attractio electiva simplex*. Fr., *affinité simple élective*. Ger., *einfache Wahlverwandtschaft*. Syn.: *simple elective attraction*. Elective a. exerted by a simple body A upon one component of a compound BC, as distinguished from *double elective a.*, or the mutual attraction of the elements of two compound bodies, AD and BC. [B, 140.]—**Single a.** See *Simple a.*—**Single elective a.** See *Simple elective a.*—**Vital a.** The power which forms the fluids and solids of the body out of the common circulating fluids. [L, 107.]

**AFFION, AFFIONI, n's.** From Ar., *afiân*, Turk., *Afiân*-opium (perhaps a corruption of Gr., *σμοιον* opium). Written also *affiun*, *affium*, and *offium*. 1. A name formerly given to an elect. nary containing opium, used in the East as an aphrodisiac. [A, 305; B, 53.] 2. Crude opium; especially that prepared from the red or wild poppy, containing regularly 10 per cent. of morphine. [A, 314; B, 78, 93, 111.]

**AFFIUM, n.** See *AFFION*.—**A. d'Aubergier** (Fr.). See *AFFION* (2d def.).

**AFFIUN, n.** See *AFFION*.

**AFFIXION, n.** A<sup>2</sup>f-fi<sup>2</sup>k'shu<sup>3</sup>n. Lat., *affixio* (from *affigere*, to fasten to). Fr., *affixion*. Ger., *Anheftung*. See *ADHESION*.

**AFFLATUS** (Lat.), n. m. A<sup>2</sup>f(a<sup>2</sup>f)-fla(fl<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>4</sup>s). Gen., *afflatus*. From *afflare*, to blow upon. 1. A blast of air which produces disease by striking the body. [L, 53.] 2. The violent expulsion of gas from the body; belching. 3. A kind of erysipelas which attacks people suddenly. [L, 84.]

**AFFLEUREMENT** (Fr.), n. A<sup>3</sup>f-flu<sup>2</sup>r-ma<sup>3</sup>n<sup>2</sup>. The act or process of bringing one surface to the same level as another. [L, 41.]—**Mettre à l'a.** To weight a hydrometer till it sinks in a liquid to the point d'a (q. v.). [B, 38.]—**Point d'a.** The fixed point on a hydrometer scale indicating the level it should be made to sink to in a liquid, in determining the sp. gr. of the latter. [B, 38.]

**AFFLEURER** (Fr.), v. tr. A<sup>3</sup>f-flu<sup>2</sup>r-a. See *Mettre à l'AFFLEUREMENT*.

**AFFLICTIO** (Lat.), n. f. A<sup>2</sup>f(a<sup>2</sup>f)-fl<sup>2</sup>p'k'shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *afflictio*nis. From *affligere*, to strike, to cast down. Pain or suffering of mind or body. Despondency; mental disorder accompanied by bodily trouble. [B, 114; L, 50, 53.]

**AFFLUENCE, n.** A<sup>3</sup>f-flu<sup>2</sup>-e<sup>3</sup>ns. Lat., *affluentia* (from *affluere*, to flow to). Fr., *affluence*. Ger., *Zufluss*, *Zuströmen*. 1. A flowing into, or influx. 2. Profusion; abundance. 3. Hence, in pathology, an afflux (q. v.). [B, 38, 116.]—**A's électriques.** The currents of electricity which are conveyed to an electrified body. [B, 38.]

**AFFLUENT, adj.** A<sup>2</sup>f-flu<sup>2</sup>-e<sup>3</sup>nt. Lat., *affluens*. Fr., *affluent*. Ger., *zuströmend*. It., *affluente*. Sp., *afluente*. 1. Flowing toward; proceeding in a determinate direction. [L, 41.] 2. In pathology, accumulating in excess in one part or organ; producing an afflux. [B, 38.] 3. Confluent. [L, 108.]

**AFFLUX, AFFLUXION, n's.** A<sup>2</sup>f-flu<sup>2</sup>x, A<sup>2</sup>f-flu<sup>2</sup>k'shu<sup>3</sup>n. Lat., *affluxus*. Fr., *afflux*. Ger., *Zufluss*, *Zuströmen*. It., *afflusso*. Sp., *afujo*, *afusión*. A flowing to or into; in pathology, the accumulation of an unnaturally large quantity of fluid in any part of the body. [C.]—**Idiopathic a.** Fr., *a. idiopathique*. An a. of blood or humors produced directly by irritation of the part at which the a. occurs. [L, 109.]—**Symptomatic a.** Fr., *a. symptomatique*. An a. of blood or humors produced as a symptom of irritation or disease in a part remote from the one at which the a. occurs. [L, 109.]

**AFFODIL** (Ger.), n. A<sup>3</sup>f-f<sup>2</sup>-del'. The genus *Asphodelus*. [B, 48.]—**A'illie.** The day-lily (*Heimerocallis*). [B, 48.]—**A'wurzel.** Asphodelus. [B, 131.]—**A'wurzel.** The root of some species of Asphodelus, formerly official. [B, 20.]

**AFFODILLE** (Ger.), n. A<sup>3</sup>f-f<sup>2</sup>-di<sup>2</sup>le<sup>2</sup>. See *AFFODIL*.

**AFFODILUS** (Lat.), n. m. A<sup>2</sup>f(a<sup>2</sup>f)-fo<sup>2</sup>d'i<sup>2</sup>l-u<sup>3</sup>s(u<sup>4</sup>s). See *ASPHODELUS luteus*.

**AFFOLAGE** (Fr.), n. A<sup>3</sup>f-fo-la<sup>2</sup>zh. From *affoler*, to render foolish. Lit., madness; a disease of anemones in which they produce leaves vigorously but do not blossom. [L, 42.]

**AFFOLDERWURZEL** (Ger.), n. A<sup>3</sup>f-fol<sup>2</sup>-de<sup>2</sup>r-vur-tze<sup>2</sup>l. See *Affodilwurzel*, under *AFFODIL*.

**AFFOLÉ** (Fr.), adj. A<sup>3</sup>f-fo-la. Lit., crazy. Of plants, affected with *affolge*; of a magnet, made to deviate from its true position. [L, 41.] See *AGUILLE affolée*.

**AFFOLLE** (Ger.), n. A<sup>2</sup>f-f<sup>2</sup>-le<sup>2</sup>. The mistletoe. [B, 48.] See *VISCUM*.

**AFFORMAS, n.** An alchemical term for glass. [L, 53.]

**AFFRENGI, n.** An old term for red lead. [B, 87.]

**AFFRODILE, n.** A<sup>2</sup>f-fro<sup>2</sup>-di<sup>2</sup>l. The daffodil. [L, 46.] See *NARCISSUS pseudo-narcissus*.

**AFFRODINA, n.** An alchemical name for copper. [L, 96.]

**AFFRONITRUM, n.** See *APHRONITRUM*.

**AFFRONTEMENT** (Fr.), n. A<sup>3</sup>f-fro<sup>2</sup>-nt-ma<sup>3</sup>n<sup>2</sup>. The coaptation of the edges of a wound. [L, 49.]

**AFFRONTER** (Fr.), v. tr. A<sup>3</sup>f-fro<sup>2</sup>-n-ta. To bring together; to coaptate the edges of a wound. [L, 55.]

**AFFRUITER** [S] (Fr.), v. reflex. A<sup>3</sup>f-fru<sup>2</sup>-e-ta. To fruit. [L, 42.]

**AFFRUSCH** (Ger.), n. A<sup>3</sup>f-frush. Also spelled *Afrusch*. The abrotanum. [L, 30.] See *ARTEMISIA abrotanum*.

**AFFUNENA, n.** A plant found in Guinea, which, boiled in wine, is said to be a purgative. [L, 105.]

**AFFUSE, v. tr.** A<sup>2</sup>f-fu<sup>2</sup>-e<sup>3</sup>. From *affundere*, to pour upon. Fr., *affuser*. Ger., *aufgiessen*, *hinzugießen*. To pour upon; to sprinkle. [L, 56.]

**AFFUSIO** (Lat.), n. f. A<sup>2</sup>f(a<sup>2</sup>f)-fu<sup>2</sup>(fu<sup>3</sup>)/zhi<sup>2</sup>(si<sup>2</sup>)-o. Gen., *affusio*nis. 1. An affusion. [A, 2.] 2. An infusion. [L, 53.] 3. Suffusion. [L, 53.] 4. A cataract. [B, 87.]—**A. frigida.** See *Cold AFFUSION*.—**A. oculi.** Cataract. [L, 53.]—**A. orbicularis.** See *PLACENTA uteri*.

**AFFUSION, n.** A<sup>2</sup>f-fu<sup>2</sup>-zhu<sup>3</sup>n. Gr., *ᾠροσχυσις, ἐπιχυσις*. Lat., *affusio*. Fr., *affusion*. Ger., *Aufgiessung*, *Zuguss*, *Nachfülle*. It., *affusione*. Sp., *afusión*. A pouring upon; especially the discharge of liquid from a reservoir upon any part of the body. It differs from douching in that the water is poured from a height. [D; L.]—**Cold a.** Lat., *affusio frigida*. Fr., *affusion froide*. Ger., *kalte Aufgiessung*. A method of cooling the body in fevers by pouring cold water over the patient; sometimes called Currie's method, from its having been advocated and practiced by an English physician of that name toward the close of the last century.

**AFFHOLDER** (Ger.), n. A<sup>3</sup>f-hold-e<sup>3</sup>r. See *VIBURNUM*.

**AFIAC, n.** A Madagascar name for the *Vitex trefolia*. [L, 105.]

**AFIM, AFION, AFIOUN, AFIUN, n's.** See *AFFION*.

**AFLATUN** (Ar.), n. See *BRELLIUM*.

**AFOBA, n.** A plant of Guinea, which, bruised with oil, is used in the itch. [L, 105.]

**AFETAL, adj.** A<sup>2</sup>f-e<sup>3</sup>-ta<sup>2</sup>l. From *a* priv., and *fœtus* (q. v.). Having no fœtus. [L, 63.]

**AFORUS** (Lat.), adj. A<sup>2</sup>(a<sup>2</sup>)/fo<sup>2</sup>r-u<sup>3</sup>s(u<sup>4</sup>s). From *a* priv., and *forare*, to pierce. In botany, not provided with an opening. [B.]

**AFOUCHE** (Fr.), n. A<sup>3</sup>-fush. See *AFOUTH*.

**AFOURANOUNOU, n.** A Madagascar name for a species of *Euphorbia*, the juice of which is very acrid. [L, 109.]

**AFOUTH** (Fr.), n. A<sup>3</sup>-fut. A fig-tree growing in the Isle of France, the bark of which is used to make ropes and the wood as tinder. [B.]

**AFRAGAR, n.** A name given by the older alchemists to verdigris. [L, 41.]

**AFOB, n.** An alchemical name for lead or substances resembling it; black lead, crude antimony. [B, 87; L, 53, 104.]

**AFROS, n.** A corruption of *ἀφρός*, foam. Scum, foam. [L, 104.]

**AFFROUSA, n.** A name given in some of the Alpine cantons to the Alpine strawberry (*Fragaria vesca*). [L, 103.]

**AFFRUSCH** (Ger.), n. A<sup>3</sup>f-rush. See *AFFRUSCH*.

**AESANTIN** (Ar.), n. Perhaps a corruption of *ἀψινθιον*. Wormwood (*Artemisia absinthium*). [L, 77.]

**AETADEN-ZIDHAN** (Pers.), n. Prolapse of the uterus. [L, 83.]

**AFTENÄHNLICH** (Ger.), adj. A<sup>3f</sup>/te<sup>2n</sup>-an-li<sup>2</sup>ch<sup>2</sup>. Aphthous. [L, 80.]

**AFTER** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>. 1. The anus. 2. The buttocks.—**A'abscess**. See *Rectal abscess*.—**A'atrophie**. Atrophy of the sphincter muscles of the anus. [A, 305.]—**A'ausdehner**. An anal dilator. [L, 50.]—**A'ausdehnung**. Stretching of the anus. [L, 50.]—**A'beule**. A rectal abscess.—**A'binde**. See *T-BANDAGE*.—**A'blutfluss**. 1. Rectal hemorrhage. 2. Hemorrhoids. [A.]—**A'blutflüssig**. Hemorrhoidal. [E.]—**A'blutung**. Rectal hemorrhage. [E.] See *PROCTORRHAGIA*.—**A'bremse**. The *Gastrophilus hemorrhoidalis*. [B; L.]—**A'bruch**. See *PROCTOCELE* and *PROLAPSE of the anus*.—**A'darm**. 1. The rectum. 2. The lowest part of the intestinal canal of the embryo; the outermost part of the cloaca; opposed to *Munddarm* and *Mitteldarm*. It comprises the anus and the lower end of the rectum.—**A'entzündung**. 1. Proctitis. 2. Any inflammation about the anus.—**A'fatte**. The cleft between the nates. [L, 59.]—**A'finne**. An anal fin. [L, 46.]—**A'fissur**. Fissure of the anus. [A, 305.]—**A'fistel**. Fistula in ano. [A, 305.]—**A'flosse**. An anal fin. [L, 46.]—**A'fluss**. A mucous discharge from the rectum; proctorrhoea mucosa. [A, 305; L, 30.]—**A'fratt**. Intertrigo about the anus. [A, 305.]—**A'geburt**. See *AFTERGEBURT* (2d def.).—**A'gegend**. The anal region. [L, 59.]—**A'geschwulst**. 1. A cystic tumor springing from the region of the anus. 2. A polypus protruding from the rectum. 3. Any tumor about the anus. [A, 305.]—**A'geschwür**. Ulceration of the anus. [A, 305.]—**A'gewächs**. Any excrescence about the anus. [A, 305.]—**A'hämorrhoiden**. Hemorrhoids. [L, 80.]—**A'heber**. See *LEVATOR ani*.—**A'hypertrophie**. Hypertrophy of the sphincter ani. [A, 305.]—**A'jucken**. Pruritus ani. [L.]—**A'kerbe**. The cleft between the nates. [L, 59.]—**A'knoten**. Hemorrhoids. [A, 305.]—**A'krampf**. Spasm of the sphincter ani; proctospasmus. [E.]—**A'krebs**. Cancer of the rectum or anus. [A, 305.]—**A'kriecher**. The *Gastrophilus hemorrhoidalis*. [B; L.]—**A'lähmung**. Paralysis of the sphincter ani. [A, 305.]—**A'los**. Having no anus. [L, 80.]—**A'made**. The *Oxyuris vermicularis*. [A, 305; L, 30.]—**A'muskel**. The anal muscles. [L, 30.]—**A'öffnung**. The orifice of the anus. [A, 305.]—**A'polyp**. A rectal polypus. [A, 305.]—**A'schlagader**. The inferior hemorrhoidal artery. [L, 43.]—**A'schliesser**, **A'schliessmuskel**. The sphincter ani externus. [L.]—**A'schmerz**. 1. Neuralgia of the rectum. 2. Rectal tenesmus. 3. Proctalgia. 4. Proctalgia. [A, 305.]—**A'spate**. The cleft of the nates.—**A'sperre**. 1. Rectal tenesmus. 2. Stricture of the rectum. [A, 305; L, 46.]—**A'spiegel**. A rectal speculum. [A, 305.]—**A'verengerung**. Stricture of the anus. [E.]—**A'verschliessung**. 1. Imperforate anus or rectum. 2. Atresia ani. [A, 305.]—**A'verschluss**. Closure of the anus by contraction of the sphincter ani. [K, 16.]—**A'verwachsung**. Atresia of the anus or rectum. [A, 305.]—**A'vorfall**. Prolapse of the rectum. [A, 305.]—**A'web**. Proctalgia. [E.]—**A'wurm**. The *Oxyuris vermicularis*. [A, 305.]—**A'zwang**. 1. Rectal tenesmus. [A, 305.] 2. Rectal obstruction [L, 46.]—**Künstlicher A.** An artificial anus. [A, 305.]—**Schrunde an A.** Fissure of the anus.—**Widernatürlicher A.** A preternatural anus. [A, 305.]

**AFTER-ACTION**, n. A<sup>3f</sup>/tu<sup>2r</sup>-a<sup>2k</sup>/shu<sup>2n</sup>. Ger., *Nachwirkung*. A term used by Du Bois Raymond to describe the negative variation in the current which is observed for a short time in a muscle after it has been tetanized. [B; K, 3.]—**Inner a.-a.** Ger., *innere Nachwirkung*. A.-a. involving the entire muscle or muscular fiber. [K, 3.]—**Terminal a.-a.** Ger., *terminale Nachwirkung*. A.-a. which is confined to the ends of the muscular fibers. [K, 3.]

**AFTERAHORN** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-a<sup>2</sup>-ho<sup>2</sup>rn. See *ACER pseudo-platanus*.

**AFTERALAUN** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-a<sup>2</sup>-la<sup>2</sup>-un. See *ALUMEN saccharinum*.

**AFTERARZT** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-a<sup>2</sup>-rtzt. A quack, a charlatan. [L, 46.]

**AFTERBIER** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ber. Beer made from malt that has been used once before. [A, 305.]

**AFTERBILDUNG** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-bi<sup>2</sup>ld-un<sup>2</sup>g. Pseudomorphosis; including tumors, deformities, and malformations. [A, 305.]

**AFTERBIRTH**, n. A<sup>3f</sup>/tu<sup>2r</sup>-bu<sup>2</sup>rt. Lat., *secundine*. Fr., *arrière-faix*. Ger., *Aftergeburt*, *Nachgeburt*. 1. The secundines (*q. v.*). 2. In a more restricted sense, the placenta.

**AFTERBLATT**, **AFTERBLÄTTCHEN** (Ger.), n's. A<sup>3f</sup>/te<sup>2r</sup>-blat-ch<sup>2</sup>en. A stipule. [A, 305; L, 46.]

**AFTERBLUT** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-blut. The hemorrhoidal flux.—**A'flüssig**. Hemorrhoidal. [A, 315.]—**A'kraut**. The lesser burnet (*Potierium sanguisorba*). [A, 305.]

**AFTERBRAIN**, n. A<sup>3f</sup>/tu<sup>2r</sup>-bran. Ger., *Nachhirn*. See *ME-TENCEPHALON*.

**AFTERBÜRDE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-bu<sup>2</sup>r-de<sup>2</sup>. See *SECUNDINES*.

**AFTERBURTHEN**, n. A<sup>3f</sup>/tu<sup>2r</sup>-bu<sup>2</sup>r-th<sup>2</sup>en. The afterbirth. [L, 73.]

**AFTER-CURRENT**, n. A<sup>3f</sup>/tu<sup>2r</sup>-ku<sup>2</sup>r/'re<sup>2</sup>nt. See under *CURRENT*.—**Polarizing a.-c.** See *Polarizing after-current*.

**AFTER-DAMP**, n. A<sup>3f</sup>/tu<sup>2r</sup>-da<sup>2</sup>mp. From Ger., *Dampf*, vapor. The irrespirable mixture of carbon dioxide, carbon monoxide, and other gases formed as the result of the explosion of fire-damp in coal-mines. [B, 3, 7.]

**AFTERDOLDE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-dol-de<sup>2</sup>. A cyme. [L, 46.]—**A'nförmig**. Cymose. [L, 46.]—**A'ntragend**. Bearing cymes. [L, 46.]

**AFTERDOLDIG** (Ger.), adj. A<sup>3f</sup>/te<sup>2r</sup>-dol-di<sup>2</sup>g. Cymose. [L, 46.]

**AFTERDOTTER** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-do<sup>2</sup>t-te<sup>2</sup>r. The *Myagrum sativum*. [A, 305.]

**AFTERFLÜGEL** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-flu<sup>2</sup>-g-el. See *ALULA*.

**AFTERGEBILDE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-bi<sup>2</sup>ld-e<sup>2</sup>. See *PSEUDOMORPHOSIS*.

**AFTERGEBURT** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-burt. 1. The afterbirth. [L, 46.] 2. The birth of a child presenting by the breech. [A, 305.]

**AFTERGEFÄSSBILDUNG** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-fas-bi<sup>2</sup>ld-ung. A pseudangeloma. [L, 80.]

**AFTERGELENK** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-le<sup>2</sup>n<sup>2</sup>k. See *NEARTHROSIS*.

**AFTERGERÄUSCH** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-roish. 1. A secondary cardiac murmur. [L, 59.] 2. A false murmur, i. e., one not due to valvular disease, but to changes in the quantity or the composition of the blood. [L, 30, 40.]

**AFTERGETREIDE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ge<sup>2</sup>-tri-de<sup>2</sup>. See *AFTERKORN*.

**AFTERHAUT** (Ger.), n. A<sup>3f</sup>-te<sup>2r</sup>-ha<sup>2</sup>-ut. A false membrane. [L, 80.]

**AFTERHORNBILDUNG** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ho<sup>2</sup>rn-bi<sup>2</sup>ld-un<sup>2</sup>g. See *PSEUDOCERATOGENESIS*. [L, 80.]

**AFTER-IMAGE**, n. A<sup>3f</sup>/tu<sup>2r</sup>-i<sup>2</sup>m/'aj. Fr., *arrière-image*. Ger., *Nachbild*. It., *ritratto secondo*, *seconda imagine*. Sp., *retrato segundo*, *segunda imagen*. An impression of an object upon the retina which remains for a certain time after the light is withdrawn. [F.]—**Colored a.-i's**. Fr., *arrière-images colorées*. Ger., *farbige Nachbilder*. It., *seconde immagini colorate*. Sp., *segundas imagenes coloradas*. Retinal impressions of objects looked at, which remain after the object has passed away from the field of vision. They may be either of the same color as the object or of a complementary color. [F.]—**Negative a.-i's**. Fr., *arrière-images negatives*. Ger., *negative Nachbilder*. It., *seconde immagini negative*. Sp., *segundas imagenes negativas*. A.-i's in which what is bright in the image corresponds to what is dark in the object, and vice versa. [F.]—**Positive a.-i's**. Fr., *arrière-images positives*. Ger., *positive Nachbilder*. It., *seconde immagini positive*. Sp., *segundas imagenes positivas*. Those in which the bright parts of the image correspond to the bright parts of the object, and the dark parts to the dark parts of the object. [F.]—**Positive complementary a.-i.** Fr., *arrière-image positive complémentaire*. Ger., *positives complementäres Nachbild*. It., *positiva seconda imagine complementaria*. Sp., *positiva segunda imagen complementaria*. A retinal impression of varying duration and of a complementary color to that of the original object often following rapidly upon an a.-i. of the same color as the object. [F.]

**AFTERING**, n. A<sup>3f</sup>/tu<sup>2r</sup>-i<sup>2</sup>ng. Ger., *Aftermilch*. The last milk drawn in milking. [L, 56.]

**AFTERKAMILLE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ka<sup>2</sup>-m-i<sup>2</sup>l-e<sup>2</sup>. A name given to several species of *Anthemis*. [B.]—**Edle A.** *Anthemis nobilis*.—**Stinkende A.** *Anthemis cotula*.

**AFTERKIND** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ki<sup>2</sup>nd. 1. A posthumous child. 2. A bastard. 3. A degenerate ovum. [A, 305.] See *MOLE*.

**AFTERKLAUEN** (Ger.), n. pl. A<sup>3f</sup>/te<sup>2r</sup>-kla<sup>2</sup>-u-e<sup>2</sup>n. Horny outgrowths about the feet in quadrupeds. [A, 305.]

**AFTERKORN** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ko<sup>2</sup>rn. Spurred grain. [A, 305.] See *SECALE cornutum*.

**AFTERKRISTALLE** (Ger.), n. pl. A<sup>3f</sup>/te<sup>2r</sup>-kri<sup>2</sup>-sta<sup>2</sup>l-e<sup>2</sup>. See *PSEUDOMORPHOSIS*.

**AFTERMARK** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-ma<sup>2</sup>rk. Pseudomyloma. [L, 80.]—**A'gebilde**. See *A*.

**AFTERMEHL** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-mal. Coarse meal. [L, 46.]

**AFTERMILCH** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-mi<sup>2</sup>lk<sup>2</sup>. See *AFTERING*.

**AFTERMILKING**, n. A<sup>3f</sup>/tu<sup>2r</sup>-mi<sup>2</sup>lk/'i<sup>2</sup>ng. See *AFTERING*.

**AFTERMILZ** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-mi<sup>2</sup>ltz. An erectile tumor. [A, 305.]

**AFTERMINZE** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-mi<sup>2</sup>n-tze<sup>2</sup>. The *Monarda didyma*. [L, 30.]

**AFTERMOOSE** (Ger.), n. pl. A<sup>3f</sup>/te<sup>2r</sup>-mo-ze<sup>2</sup>. The liverworts, or *Hepaticæ*. [B, 49.]

**AFTERORGAN** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-o<sup>2</sup>r-ga<sup>2</sup>n. See *PSEUDOMORPHOSIS*.

**AFTERORGANISATION** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-o<sup>2</sup>r-ga<sup>2</sup>-n-e<sup>2</sup>-za<sup>2</sup>-tzi-on. A malformation. [A, 305.]

**AFTER-PAINS**, n. pl. A<sup>3f</sup>/tu<sup>2r</sup>-panz. Lat., *dolores* (seu *tormenta*) *post partum*. Fr., *douleurs tranchées* (ou *coliques*), *tranchées utérines*. Ger., *Nachwehen*. Painful contractions of the uterus after delivery.

**AFTER-PERCEPTION**, n. A<sup>3f</sup>/tu<sup>2r</sup>-pu<sup>2</sup>r-se<sup>2</sup>p/'shu<sup>2n</sup>. Fr., *perception secondaire*. Ger., *Nachempfindung*. It., *percezione secondaria*. Sp., *secundaria percepción*. The perception of a sensory impression after the cause producing the impression has been removed; the conscious reception of an after-sensation. [B.]—**A.-p. of sound**. Fr., *perception secondaire des sons*. Ger., *Nachempfindung der Schallen*. It., *percezione secondaria dei suoni*. Sp., *secundaria percepción de los sonidos*. Perception of sound continuing for a short time after the action of the objective source of sound has ceased. By some this is regarded as a picture of the memory, by others as similar to the after-images of the retina. [F.]

**AFTERPRODUCTION** (Ger.), n. A<sup>3f</sup>/te<sup>2r</sup>-pro-duk-tse-on/' A neoplasm. [L.]

**AFTERRAUPEN** (Ger.), n. pl. A<sup>3f</sup>/te<sup>2r</sup>-ra<sup>2</sup>-up-e<sup>2</sup>n. The larvae of *Tenthredinidae*; insects which infest roses and fruit-trees. [B, 20.]

**AFTER-SENSATION**, n.  $A^3f/tu^3r-se^2n-sa''shu^3n$ . The persistence of a sensory impression after the sensory stimulus which gives rise to it has ceased to act. [L, 63.] Cf. AFTER-IMAGE and AFTER-PERCEPTION.

**AFTER-SHAFT**, n.  $A^3f/tu^3r-sha^3ft$ . See HYPORRHACHIS.

**AFTERSILBER** (Ger.), n.  $A^3f/te^2r-zi^2l-be^2r$ . Silver containing dross. [L, 46.]

**AFTERSKORPIONE** (Ger.), n. pl.  $A^3f/te^2r-sko^3r-pi^2o-ne^2$ . *Pseudoscorpiones*. [B, 49.]

**AFTERSPINNEN** (Ger.), n. pl.  $A^3f/te^2r-spi^2n-ne^2n$ . *Phalangidae*. [B, 49.]

**AFTERSTRAUSS** (Ger.), n.  $A^3f/te^2r-stra^3-us$ . See CORYMBUS.

**AFTER-TREATMENT**, n.  $A^3f/tu^3r-tret''me^2nt$ . Ger., *Nachbehandlung*. A term generally applied to the management of a case after a surgical operation. [E.]

**AFTERZEHEN** (Ger.), n. pl.  $A^3f/te^2r-tza-he^2n$ . See AFTER-KLAUEN.

**AFTERZÉLIE** (Fr.), n.  $A^3f-te^2r-za-le$ . See AFZELIA.

**AFTERZEUGUNG** (Ger.), n.  $A^3f/te^2r-tzoig-ung$ . See PSEUDO-GENESIS.

**AFT-HORN**, n.  $A^3ft/ho^2rn$ . See Posterior CORNU.

**AFTO**, n. A cruciferous plant of Guinea, which, dried and pulverized, is used as an emetic in headache. [L, 105.]

**AFYUN**, n. See AFFION.

**AFZELIA** (Lat.), n. f.  $A^2f(af^2f)-ze(za)/i^2a^3$ . From Afzelius, a Swedish botanist. Fr., *afzelie*. A tropical genus of leguminous trees, belonging to the suborder *Cesalpiniaceae*, distinguished by their abruptly pinnate leaves and their large monopetalous flowers growing in terminal panicle racemes. It comprises two sections: 1. *Eufazelia*, including African species with usually seven perfect stamens and arillate seeds. 2. *Intsia*, including Asiatic and Madagascar species, with three perfect stamens and exarillate seeds. [B, 19.]

**AGA CRETENSIMUM** (Lat.), n. f.  $A(a^3)/ga^3-kre(kra)-te^2n/si^2-u^3m(u^4m)$ . The small Spanish milk-thistle (a species of *Silybum*). [B; L, 84.]

**AGABOR**, n. From Ar., *Al-ghobâr*, the powder. An alchemical term for powder. [B, 53.]

**AGACANT** (Fr.), adj.  $A^3g-a^3-sa^3n^2$ . Producing shock or irritation of the nerves; in the pl.,  $A^3s$ , used as a n., medicines which act as gentle stimulants. [L, 42, 90.]

**AGACEMENT**, n.  $A^3-ga^3-sa^3n^2$ . 1. A disagreeable sensation produced by the contact of acid substances with the teeth. 2. A slight irritation. [L, 42.]—**A. des dents**. See *A.* (1st def.) and *HEMODYA*.—**A. des nerfs**. An irritable condition of body or mind in which irritations ordinarily unnoticed become unbearable. [L, 49.]

**AGACER** (Fr.), v. tr.  $A^3ga^3-sa$ . 1. To set the teeth on edge. 2. To irritate. [L.]

**AGAH**, n. Intermittent fever. [L, 45.]

**AGAL**, n.  $A^2g-a^2l$ . See AGALLOCHUM.—**A. wood**. See ALOES-WOOD.

**AGALACTATIO** (Lat.), n. f.  $A^2g(a^3g)-a^2l(a^3l)-a^2k(a^3k)-ta(ta^3)-shi^2(t^2i)^2-o$ . Gen., *agalactatio*. See AGALACTIA.

**AGALACTE** (Fr.), adj.  $A^3-ga^3-la^3kt$ . See AGALACTOUS (1st and 2d def's.).

**AGALACTIA**, **AGALACTIO** (Lat.), n's. f.  $A^2g(a^3g)-a^2l(a^3l)-a^2k(a^3k)/shi^2(t^2i)^2-a^2$ , -o. Gen., *agalactiae*, *actio*. From a priv., and  $\gamma\acute{\alpha}\lambda\alpha$ , milk. Fr., *agalactie*. Ger., *Agalactie*, *Milchmangel*. It., *agalattia*. Sp., *agalatia*. A failure of the mammary secretion to appear after confinement, or its untimely disappearance.

**AGALACTOS** (Lat.), n. f.  $A^2g(a^3g)-a^2l(a^3l)-a^2k(a^3k)/to^2s$ . Gen., *agalacti*. Gr.,  $\acute{\alpha}\gamma\acute{\alpha}\lambda\alpha\kappa\tau\omicron\varsigma$ . A woman who has no milk in her breasts. [L, 102.]

**AGALACTOUS**, adj.  $A^2g-a^2l-a^2k/tu^3s$ . Gr.,  $\acute{\alpha}\gamma\acute{\alpha}\lambda\alpha\kappa\tau\omicron\varsigma$  (from a priv., or copulative (4th def.), and  $\gamma\acute{\alpha}\lambda\alpha$ , milk). Lat., *agalactus*. Fr., *agalacte* (1st and 2d def's.). Ger., *milchtee*, *milchlos* (1st and 2d def's.), *milchvertreibend* (3d def.), *verbrüdet*, *verschwistert* (4th def.). Sp., *agalacto*. 1. Having no milk in the breasts; affected with agalactia. 2. Not suckled (said of children). 3. Having the power of stopping or diminishing the secretion of milk. 4. Suckled from the same breast. [B, 38, 115; L, 50, 63.]

**AGAL-AGAL**, n. See AGAR-AGAR.

**AGALASIA** (Lat.), n. f.  $A^2g(a^3g)-a^2l(a^3l)-az(a^3s)/i^2-a^3$ . See AGALACTIA.—**A. contagiosa**. It., *stornarella*, *osciutarella*, *sito*. An epidemic contagious disease of sheep and goats characterized by agalactia. [L, 44.]

**AGALAX** (Lat.), adj.  $A^2g(a^3g)-a^2l(a^3l)-a^2x(a^3x)$ . Gen., *agalac-* (*-tis*). Gr.,  $\acute{\alpha}\gamma\acute{\alpha}\lambda\alpha\varsigma$ . Agalactous. [B, 78, 115.]

**AGALAXY**, n.  $A^2g-a^2l/a^2x-i^2$ . Gr.,  $\acute{\alpha}\gamma\acute{\alpha}\lambda\alpha\varsigma$ . Lat., *agalaxia*, *agalaxis*. Fr., *agalaxie*. Ger., *Agalaxie*. It., *agalasia*. Sp., *agalaxia*. See AGALACTIA.

**AGALIA**, n. A commercial term for musk. [A, 305.]

**AGALLIS** (Lat.), n. f.  $A^2g(a^3g)-a^2l(a^3l)/i^2s$ . Gen., *agal/iadis*. Gr.,  $\acute{\alpha}\gamma\alpha\lambda\lambda\iota\varsigma$ . A plant known to the ancients, belonging to the genus *Iris*. [B, 115.]

**AGALLOCH**, n.  $A^2g-a^2l-o^2k$ . See AGALLOCHUM.

**AGALLOCHE** (Fr.), n.  $A^2g-a^2l-osh$ . Agallochum. [B, 38.]—**Bois d'a**. Aloes-wood. [B, 38.]

**AGALLOCHE-BLINDBAUM** (Ger.), n.  $A^2g-a^2l/osh-bli^2nd-ba^3um$ . See EXCÆCARIA. [B, 49.]

**AGALLOCHEHOLZ** (Ger.), n.  $A^2g-a^2l/osh-ho^3ltz$ . Aloes-wood. [B, 49.]

**AGALLOCHUM** (L. Lat.), n. n.  $A^2g(a^3g)-a^2l(a^3l)/lo^2k(lo^2ch)^2-u^3m(u^4m)$ . From  $\acute{\alpha}\gamma\alpha\lambda\lambda\omicron\chi\omicron\nu$ . Hebr., *ahalim*, *ahaloth*. Sanscr., *haloha*. Fr., *agalloche*. Ger., *Agallocheholz* (1st def.). 1. Aloes-wood. 2. The tree from which aloes-wood was obtained, especially the *Ercæcaria agallocha* or the *Aquilaria agallocha*. [B.]—**Agallochi verilignum**. Aloes-wood. [B, 141.]—**A. verum**. See *A.* (2d def.).

**AGALLUGEN**, **AGALLUGI**, n's. See AGALLOCHUM (1st def.).

**AGALMIDÆ** (Lat.), n. f. pl.  $A^2g(a^3g)-a^2l(a^3l)/mi^2d-e(a^3-e^2)$ . A family of *Hydrozoa*, of the order *Siphonophora*, suborder *Physophoridae*. [E. K. Lankester (B, 77).]

**AGALMYLA** (Lat.), n. f.  $A^2g(a^3g)-a^2l(a^3l)-mi(mu^6)/la^3$ . From  $\acute{\alpha}\gamma\alpha\lambda\mu\alpha$ , an ornament, and  $\acute{\omega}\lambda\eta$ , wood. A genus of tropical gesneraceous plants of the tribe *Cyrtandree*. [B, 19; L, 64.]

**AGALORRHŒA** (Lat.), n. f.  $A^2(a^3)-ga^3l(ga^3l)-o-re'(ro'e^2)-a^3$ . From a priv.,  $\gamma\acute{\alpha}\lambda\alpha$ , milk, and  $\rho\acute{\epsilon}\upsilon\iota$ , to flow. Fr., *agalorrhée*. Sp., *agalorrae*. That form of agalactia in which there is cessation of the flow of milk, as distinguished from an original absence of the secretion. [L, 43, 63, 70.]

**AGALOSTÉMONE** (Fr.), adj.  $A^3g-a^3l-o-sta-mon$ . From a priv.,  $\gamma\acute{\alpha}\lambda\alpha$ , a sister-in-law, and  $\sigma\tau\acute{\eta}\mu\omega\nu$ , a spun thread (a stamen). Of a flower, having the stamens inserted alternately upon the calyx and corolla. [L, 41.]

**AGALOUÉ** (Fr.), n.  $A^3g-a^3-lu$ . A sort of shrub or thorny plant growing in thickets or tufts. [L, 41.]

**AGALUGI**, **AGALUGIN**, n's. See AGALLOCHUM.

**AGAMÉ** (Lat.), n. f. pl.  $A^2g(a^3g)-a^2m(a^3m)-e(a^3-e^2)$ . From a priv., and  $\gamma\acute{\alpha}\mu\omicron\varsigma$ , marriage. A name sometimes given to the cryptogams. [B, 1, 19; L, 50.]

**AGAME** (Fr.), adj. and n.  $A^3-ga^3m$ . 1. Agamous. 2. Agamic. 3. N. pl.,  $A^3s$ . (a) The *Agamæ*; (b) a group of lacertilian reptiles established by Cuvier; (c) a class of molluscs established by Latreille, comprising all the bivalves and some of the univalves (*Gastropoda*). [B, 1, 38, 93; L.]

**AGAMEN** (Ger.), n. pl.  $A^3-ga^3-me^2n$ . See AGAMIDÆ.

**AGAMIA** (Lat.), n. f.  $A^2g(a^3g)-a^2m(a^3m)/i^2-a^2$ . From  $\acute{\alpha}\gamma\alpha\mu\iota\alpha$ , celibacy. Fr., *agamie*. Ger., *Agamie*. It., Sp., *agamia*. The class *Cryptogamia* of Linnæus. [B, 1.]

**AGAMIC**, adj.  $A^2g-a^2m/i^2k$ . Fr., *agame*. Ger., *agamisich*. In zoology, reproducing without impregnation, or pertaining to reproduction without impregnation. [B.]

**AGAMIDÆ** (Lat.), n. f. pl.  $A^2g(a^3g)-a^2m(a^3m)/i^2d-e(a^3-e^2)$ . From *Agama*, one of the genera. Fr., *agamides*. A family of lizards (*Lacertilia*) resembling the *Iguanidae*, but distinguished by the double row of teeth on the posterior edge of the palate and by the scales covering the tail. [B, 28.]

**AGAMIEN** (Fr.), adj. and n.  $A^3-ga^3-mi^2-a^3n^2$ . 1. (Adj.), resembling the genus *Agama* of lizards. 2. (N. pl.),  $A^3s$ , a division of lacertilian reptiles including the *Agamidæ*. [B, 38.]

**AGAMIUS** (Lat.), n. m.  $A^2g(a^3g)-a^2m(a^3m)/i^2-u^3s(u^4s)$ . See AGAMIA. [L, 63.]

**AGAMOGENESIS** (Lat.), n. f.  $A^2g(a^3g)-a^2m(a^3m)-o-je^2n(ge^2n)/e^2s-i^2s$ . Gen., *agamogenesios* (*-gen'esis*). From a priv.,  $\gamma\acute{\alpha}\mu\omicron\varsigma$ , marriage, and  $\gamma\acute{\iota}\nu\epsilon\iota\varsigma$ , birth. Fr., *agamogenèse*. Ger., *Agamogenesis*. It., *agamogenesis*. Sp., *agamogenesis*. Non-sexual reproduction; that form of generation in which the germ develops into an independent organism without undergoing the influence of any other living matter. [A, 12.]

**AGAMOGENETIC**, adj.  $A^2g-a^2m/o-je^2n-e^2t/i^2k$ . Fr., *agamogénétique*, *agamogénétique*. Ger., *agamogenetisch*. Non-sexually reproductive. See AGAMOGENESIS.

**AGAMOID**, adj.  $A^2g-a^2m-oid$ . From *Agamia*, and  $\epsilon\iota\delta\omicron\varsigma$ , a likeness. Like the class *Agamia*, or the cryptogams. [L, 73.]

**AGAMONEMA** (Lat.), n. n.  $A^2g(a^3g)-a^2m(a^3m)-o-ne(na)/ma^3$ . Gen., *agamonematos*. From a priv.,  $\gamma\acute{\alpha}\mu\omicron\varsigma$ , marriage, and  $\nu\eta\mu\alpha$ , a filament. A genus of non-sexual nematode worms. [L.]—**A. piscium**. See SPIROPTERA hominis.

**AGAMONEMATODUM** (Lat.), n. n.  $A^2g(a^3g)-a^2m(a^3m)-o-ne(na)-ma^3-to^2du^3m(du^4m)$ . From  $\acute{\alpha}\gamma\alpha\mu\omicron\varsigma$ , unmarried,  $\nu\eta\mu\alpha$ , a filament, and  $\epsilon\iota\delta\omicron\varsigma$ , likeness. A larval form of a nematode found in the intestines or the peritoneal cavity of certain animals, such as the armadillo. [L, 63.]

**AGAMOUS**, adj.  $A^2g-a^2m-u^3s$ . For deriv., see AGAMIC. Lat., *agamus*. Fr., *agame*. Ger., *agamisich*. Sp., *agamo*. In botany, belonging to the *Agamia*, or cryptogams. [B.]

**AGANACTESIS** (Lat.), n. f.  $A^2g(a^3g)-a^2n(a^3n)-a^2k(a^3k)-te(ta^3)/s-i^2s$ . Gen., *aganactes* (*-es-esis*). From Gr.,  $\acute{\alpha}\gamma\alpha\nu\acute{\alpha}\kappa\tau\epsilon\iota\varsigma$ , physical pain or irritation. Pain; a painful condition of a part. [L, 30.]

**AGANISIA** (Lat.), n. f.  $A^2g(a^3g)-a^2n(a^3n)-i^2z(i^2s)/i^2-a^2$ . From  $\acute{\alpha}\gamma\alpha\nu\omicron\varsigma$ , of a pleasing appearance. Fr., *aganisie*. A South American genus of orchidaceous plants. [L, 41, 64.]

**AGANITE** (Fr.), n.  $A^3g-a^3-net$ . A provincial name for spurred grain. [L, 41.]

**AGANOBLEPHARON** (Lat.), n. n.  $A^2g(a^3g)-a^2n(a^3n)-o-ble^2p/-a^3r-o^2n$ . From  $\acute{\alpha}\gamma\alpha\nu\omicron\beta\lambda\epsilon\phi\alpha\rho\omicron\varsigma$ , mild-eyed. It., *aganoblefaro*. Cello's name for an abnormal adhesion of the eyelids, preventing the opening of the eye. [L, 44.]

**AGANOSMA** (Lat.), n. f.  $A^2g(a^3g)-a^2n(a^3n)-o^2z(o^2s)/ma^3$ . From  $\acute{\alpha}\gamma\alpha\nu\omicron\varsigma$ , agreeable, and  $\sigma\mu\acute{\alpha}\varsigma$ , odor. An Indian genus of apocynaceous plants established by Don. [B; L, 64.]

**AGAPANTHÆ** (Lat.), n. f. pl.  $A^2g(a^3g)-a^2p(a^3p)-a^2n(a^3n)/the(the^2)-i(a^3-e^2)$ . For deriv., see AGAPANTHUS. Fr., *agapanthées*.

Ger., *Agapantheen*. A suborder of *Liliaceae* made by Endlicher. [B, 49; L, 41.]

**AGAPANTHUS** (Lat.), n. m.  $A^2g(a^2g)-a^2p(a^2p)-a^2n(a^2n)/thu^2s$  (thu<sup>2</sup>s). From *ἀγαντῶν*, to love, and *ἄνθος*, a flower. Fr., *agapanthe*. Ger., *Schmucklilie*. Sp., *agapanto*. A South African genus of liliaceous plants belonging to the tribe *Asphodeleae*, established by L'Héritier. [B, 19, 34.]

**AGAR**, n. An alchemical name for lime. [L, 53.]

**AGARA**, n. See Bois de senteur.

**AGAR-AGAR**, n.  $A^2g/a^2r-a^2g/a^2r$ . An East Indian word. Fr., *algue de Java*, *mousse de Jafna* (ou de Ceylan). Ger., *Ceylonmoos*, *Jaffnamoos*. Syn.: *aja-aja*, *ager-ager*, *agal-agal*. Ceylonmoos, Bengal isinglass. A substance resembling isinglass, consisting of a dried sea-weed brought into commerce from the East Indies under the form of transparent colorless strips, almost wholly soluble in water, forming a large quantity of thick jelly. It forms an article of food in the East Indies and is used in the arts as a substitute for gelatin. It is also employed as a medium for the cultivation of the *Bacteria* by Koch's method. It contains gelose. [A, 1; Fristedt, "Pharm. Ztg.," Aug. 22, 1885; "Indian Med. Gaz.," Nov., 1885, p. 335 (A); B, 19, 48, 49, 93.]—**Ceylon a.-a.** Fr., *mousse de Ceylan*, *lichen de Ceylan amyglé*. Ger., *Ceylonmoos*. The variety imported from Ceylon, consisting chiefly of *Gracilaria* (or *Plocaria*, or *Sphaerococcus*, or *Fucus*) *lichenoides*, the *Alga* which is said (but probably erroneously) to be used by the *Hirundo esculenta* in making its edible nest. [Fristedt, l. c. (A); B, 19.]—**Japanese a.-a.** Syn.: *Japanese isinglass*. A variety derived from several *Algae*, especially *Gelidium corneum* [Lamarck] and *Gelidium cartilagineum* [Gaill.] (*Sphaerococcus cartilagineus* [Agardh]), and, according to some, also from *Gloiopeltis* (*Sphaerococcus*) *tenax* [J. Agardh] and *Sphaerococcus compressus* [Agardh]. It occurs in commerce in transparent pieces 2 feet long and as thick as a straw (prepared in Singapore by steeping the *Algae* in hot water), or oftener in yellowish-white masses a foot long and upward of an inch wide. It is the kind suitable for bacterial cultivation. [Fristedt, l. c. (A).]—**Macassar a.-a.** A variety coming from the straits between Borneo and the Celebes Island, and consisting of impure *Eucheuma spinosum* incrustated with salt. [Fristedt, l. c. (A).]

**AGARIC**, n.  $A^2g/a^2r-i^2k$ . From *ἀγαρίκον*, A., white a., derived by Dioscorides from *Agara*, a town in Sarmatia, and by others from *Agarci*, a town in Asia; but more probably from Pers., *ghârî-qân*, with the art., *al*, prefixed, or perhaps from Ar., *ghâr*, belly. [B, 78.] Lat., *agaricon*, *agaricus*. Fr., *agaric*. Ger., *Blätterpilz*, *Blätterschwamm*, *Baumschwamm* (2d def.). It., *agarico*. Sp., *agárico*. 1. A genus of hymenomycetous *Fungi* comprising the mushrooms and toad-stools. See *Agaricus* (1st def.). 2. A name given to certain *Fungi* forming excrescences upon trees. See *Agaricus* (2d def.) and *POLYPORUS*. 3. When used without qualification, white a. or *Polyporus officinalis*. [B.]—**A. amadouvier** (Fr.). *Polyporus igniarius*.—**A. amer** (Fr.). *Agaricus amarus*. [B, 104.]—**A. anisé** (Fr.). *Agaricus odoratus*. [B, 38.]—**A. annulaire** (Fr.). *Agaricus melleus*. [A.]—**Piñules d'aloes et d'a.** See under *ALOES*. **Poudre d'a.** (Fr.). See *Poudre d'a. BLANC*.—**Poudre d'a. hydragyrée** (Fr.). A powder consisting of 3 parts each of powdered white a. and red oxide of mercury and 50 of white sugar, used to insufflate into the eye in cases of corneal opacity. [L, 85.]—**Poudre d'a. opiacée** (Fr.). A powder made up of white a. 40 to 135 centigrammes, opium 12 to 22 centigrammes, and gum arabic 7 grammes. Employed in doses of 1-3 grammes for colliquative sweats. [L, 77.]—**Purgant a.** Fr., *a. purgatif*. See *POLYPORUS officinalis*.—**Sirop d'a.** (Fr.). See *MEL rosatum solutum cum agarico*.—**Spring a.** *Agaricus vernus*. [B.]—**Surgeons' a.** Lat., *agaricus chirurgorum*. Fr., *a. des chirurgiens*. It., *agárico dei chirurghi*. Sp., *agárico de los cirujanos*. *Polyporus igniarius*. [B.]—**Troches of a.**, **Trochises of a.** Fr., *trochisques d'a.* See *Trochisci de AGARICO*.—**Vin d'a.** (Fr.). A medicinal wine, containing white a. 4 parts, lesser cardamom 6, gentian 7, and Spanish wine 120. Used as a stomachic. [L, 85.]—**White a.** Lat., *agaricus albus*. Fr., *a. blanc* [Fr. Cod.]. It., *agárico bianco*. Sp., *agárico blanco*. *Polyporus officinalis*.

**AGARICACEÆ** (Lat.), n. f. pl.  $A^2g(a^2g)-a^2r-i^2k-a(a^2)/se(ke^2)-e(a^2e^2)$ . Fr., *agaricacées*. Ger., *Agaricaceen*. In Cohn's classification of the thallophytes, a family of non-chlorophyllaceous plants of the order *Basidiomycetes* and the section *Basidiomycetes*. It corresponds to the order *Hymenomycetes* of other systems. [B, 75.]

**AGARIC ACID**, n.  $A^2g-a^2r-i^2k$ . See *AGARIC ACID*.

**AGARIC AUX MOUCHES** (Fr.), n.  $A^2g-a^2r-ek-o$  mush. *Agaricus muscarius*. [L.]—**Marmelade d'a.**, **a. m.**, **Teinture d'a.**, **a. m.**, **Vinaigre d'a.**, **a. m.** Unofficial preparations formerly employed, consisting of the dried *Agaricus muscarius* prepared respectively with sugar, syrup of orgeat, and sweet almonds, with wine, and with vinegar. These preparations were employed as excitants in various nervous affections. [L, 85.]

**AGARIC BLANC** (Fr.), n.  $Bl a^2n^2$ . White agaric; *Polyporus officinalis*.—**A. b. officinal** [Fr. Cod.]. Syn.: *polypore du mélèze*. *Polyporus officinalis*. [B.]—**Poudre d'a. b.** [Fr. Cod.]. Lat., *pulvis boleti laticis*. White agaric (*Polyporus officinalis*) pulverized and passed through a fine sieve. [B, 113.]

**AGARICE** (Fr.), n.  $A^2g-a^2r-es$ . See *Mineral AGARIC*.

**AGARICÉ** (Fr.), adj. and n.  $A^2g-a^2r-i^2sa$ . Resembling an agaric. As a n. pl., *a's*, the *Agaricini*. [L, 41.]

**AGARICIC ACID**, n.  $A^2g-a^2r-i^2s-i^2k$ . Fr., *acide agaricique*. Ger., *Agaricinsäure*. A white crystalline acid obtained by Fleury from larch agaric (*Polyporus officinalis*). [B, 2, 10.]

**AGARICICOLOUS**, adj.  $A^2g-a^2r-i^2s-i^2k-o^2l-u^2s$ . From *Agaricus* and *colere*, to inhabit. Fr., *agaricicole*. Sp., *agaricicola*, *agáricola*. Living on *Agarici*; a term applied to certain insects. [B, 1, 63.]

**AGARICIFORM**, adj.  $A^2g-a^2r-i^2s-i^2fo^2rm$ . Fr., It., Sp., *agáriciforme*. Having the shape of a mushroom. [L, 41.]

**AGARICIN**, n.  $A^2g-a^2r-i^2s-i^2n$ . Fr., *agaricine*. Ger., *Agaricin*. It., Sp., *agaricina*. 1. A principle extracted by Schoonbroodt from white agaric (*Polyporus officinalis*); a white crystalline powder, soluble with difficulty in water and insoluble in ether, having a taste at first insipid, then sweetish, and finally bitter and acid. It has been used to check night-sweats in phthisis. [B, 10; O. Seifert, "Wien. med. Wochenschr.," No. 38, 1883 (B).] 2. (Ger.) *agaricine*.—**A'säure** (adj.). *Agaricic acid*. [L.]

**AGARICIN** (Fr.), adj.  $A^2g-a^2r-i^2s-a^2n^2$ . Resembling agaric. [B, 38.]

**AGARICINE** (Lat.), n. f. pl.  $A^2g(a^2g)-a^2r(a^2r)-i^2s(i^2k)-i(e)/ne(na^3-e^2)$ . See *AGARICINI*.

**AGARICINE**, n.  $A^2g-a^2r-i^2s-i^2n$ . Fr., *agaricine*. Ger., *Agaricin*. It., Sp., *agaricina*. 1. An alkaloid obtained by Gobley from several species of *Agaricus*; probably identical with amanitine. [B, 93.] 2. (Fr.) *agaricin*.

**AGARICINÉES** (Fr.), n. pl.  $A^2g-a^2r-es-e^2-na$ . The *Agaricini*. [B, 38.]

**AGARICINEI** [Fries], **AGARICINI** (Lat.), n's m. pl.  $A^2g(a^2g)-a^2r(a^2r)-i^2s(i^2k)-i^2n(e^2c^2)-i(e)$ ,  $i(e)/ni(ne)$ . Fr., *agariciniens*. Ger., *Agaricinen*. An order of hymenomycetous *Fungi* (*Carpoporeae*), characterized by the disposition of the hymenium into distinct gill-like laminae. It comprises 20 genera, the most important of which are *Agaricus*, *Coprinus*, *Cortinarius*, *Paxillius*, *Hygrophorus*, *Lactarius*, *Russula*, *Cantharellus*, and *Marasmius* (q. v.). [B, 19, 74, 75.]

**AGARICINOUS**, adj.  $A^2g-a^2r-i^2s-i^2n-u^2s$ . Fr., *Agaricin*. Resembling an agaric. [L, 63.]

**AGARICOID**, adj.  $A^2g-a^2r-i^2k-oïd$ . From *AGARICUS* and *εἶδος*, likeness. Fr., *agaricoïde*. Sp., *agáricoides*. Resembling an agaric. [L, 41, 98.]

**AGARICOIDES** (Lat.), n. m.  $A^2g(a^2g)-a^2r(a^2r)-i^2k-o-l(e)/dez(das)$ . Gen., *agaricoid'es* (-eis). Fr., *agaricoïde*. 1. A sort of fungus resembling the agaric. [L, 97.] 2. In the pl., *A.*, a division of the *Agaricini* having the genus *Agaricus* as its type. [B, 38.]

**AGARICON**, **AGARICUM** (Lat.), n's n.  $A^2g(a^2g)-a^2r(a^2r)-i^2k-o^2n$ ,  $-u^2m(u^2m)$ . Gr., *ἀγαρίκον*. White agaric. [L, 41, 77.] See *POLYPORUS officinalis*.

**AGARICUS** (Lat.), n. m. A<sup>2</sup>g(a<sup>2</sup>g)-a<sup>2</sup>r(a<sup>3</sup>r)<sup>i</sup>2k-u<sup>3</sup>s(u<sup>1</sup>s). For deriv. and foreign equivalents, see AGARIC. 1. A genus of hymenomycetous *Fungi* (*Carpesporae*) belonging to the order *Agaricini*, distinguished by the fleshy character of the hat-shaped cap, or pileus, and by the gill-like, spore-bearing laminae which the latter bears upon its inferior surface, which are composed of 2 readily separable parallel lamellae inclosing a filamentous tissue continuous with the substance of the pileus. It comprises about 1,300 species, which are arranged, according to the character of the spores, into 5 series, and these again are divided into 36 subgenera. Series A, the *Leucospori*, or *Agarici* with white spores (and with lamellae which do not change their color), comprises the following subgenera: 1. *Amanita*, which includes the more permanent species provided with a double universal veil (*volva*), and in some cases with an enveloping ring (*annulus*). 2. *Lepiota* [Fries], in which there are a simple universal veil and a ring. 3. *Armillaria* [Fries], with a partial veil (*velum*) and a ring. 4. *Tricholoma* [Fries], with a very fugacious flocculose veil and emarginate or rounded lamellae. 5. *Clitocybe* [Fries], without a veil, with a fleshy pileus, convex in the younger specimens, depressed in the older, and with lamellae adnate or strongly decurrent. 6. *Collybia* [Fries], including small dry species with a fleshy-membranous flattish pileus, having its margin at first involute, and with non-decurrent lamellae. 7. *Myccena* [Fries], including slender species with a hollow stalk (*stipes*) and a membranous bell-shaped pileus. 8. *Omphalia* [Fries], with a fleshy or fleshy-membranous pileus, umbilicated in the younger specimens. 9. *Pleurotus*, with stipes eccentric or lateral. Series B, the *Hyporrhodii*, or rose-spored *Agarici*, comprises the subgenera: 10. *Volvaria* [Fries], distinguished by the decidedly developed universal veil or *volva*. 11. *Annularia* [Schulz], containing a few species provided with a ring. 12. *Pluteus* [Fries], with no veil, and with the pileus and lamellae distinct from the stipes. 13. *Entoloma* [Fries], with laminae adnate or just parting from the fleshy stipes, which is also continuous with the pileus. 14. *Clitopilus* [Fries], with decurrent lamellae and a fleshy pileus confluent with the fleshy or fibrous stipes. *Mousseron*, a subgenus formerly recognized, including *A. prunulus*, is now referred to *Clitopilus*. 15. *Leptonia* [Fries], including small species with a fleshy or membranous pileus which, at first convex, afterward becomes flat. 16. *Nolanea* [Fries], with a slender hollow stipes and bell-shaped pileus. 17. *Eccilia* [Fries], with an umbilicated pileus and adnate decurrent lamellae. 18. *Claudopus* [Smith], including species by some referred to *Crepidotus* in the next series. Series C, the *DERMINI*, or *Agarici*, with ferruginous spores (and discolored, rather persistent lamellae), comprises the subgenera: 19. *Pholiota* [Fries], with a dry woven veil forming a ring upon the stipes. 20. *Inocybe* [Fries], with a fugacious veil formed of the longitudinal fibres of the pileus and with whitish lamellae. 21. *Hebeloma* [Fries], with a marginal fugacious veil and emarginate lamellae. 22. *Flammula* [Fries], with a fugacious veil, a fleshy convex pileus, and lamellae not emarginate. 23. *Naucoria* [Fries], including small species with a flattish fleshy-membranous pileus and cinnamon-colored lamellae. 24. *Pluteolus* [Fries], including 2 or 3 species intermediate in character between *Galera* and *Naucoria*. 25. *Galera* [Fries], with a hollow slender stipes and a bell-shaped membranous pileus. 26. *Tubaria* [Smith], comprising some species taken from *Naucoria* or other subgenera. 27. *Crepidotus* [Fries], with an eccentric or sessile pileus. Series D, the *PRATELLI*, or *Agarici* with brownish-purple spores, comprises the subgenera: 28. *Clitonia* [Fries], with a small *volva*, a viscid yellowish pileus, and sooty-black lamellae. 29. *Psalliota* [Fries], with a veil having the shape of a ring adherent to the stipes. 30. *Plasocae* [Fries], including but a single species. 31. *Stropharia* [Fries], including species with usually adnate or decurrent lamellae, separated from *Psalliota*. 32. *Hypoloma* [Fries], with a fugacious marginal veil, emarginate lamellae, and a bulbous stipes. 33. *Psilocybe*, with a fugacious non-annular veil, a somewhat fleshy pileus having the margin at first incurved, and the stipes not bulbous. 34. *Psathyra* [Fries], without a veil, with a somewhat membranous, often bell-shaped, pileus, and with a brittle stipes. Series E, the *COPRINARI*, or *Agarici* with black spores, comprises the subgenera: 35. *Paracolus*, with the veil, when present, interwoven, and the margins of the rather fleshy pileus extending beyond the lamellae, which are somewhat clouded. 36. *Psathyrella*, with a veil not interwoven and a membranous pileus, the margin of which does not extend beyond the lamellae. These last two subgenera are sometimes united into a single subgenus, *Coprinarius*. Some of the subgenera just given, especially *Amanita* and *Lepiota*, and less often *Armillaria*, *Tricholoma*, and *Volvaria*, are often raised to the rank of distinct genera. On the other hand, by the older writers, the genus *A.* was held to include species now grouped under other genera of the *Agaricini*, notably under *Hygrophorus* (the old subgenus *Limacium* of *A.*), *Coprinus* (the subgenus *Coprinus* of *A.*), *Cortinarius* (the subgenera *Tetamonia*, *Inoloma*, *Dermocybe*, and *Myzocium* of *A.*), *Psarillus* (the subgenus *Tapinea* of *A.*), *Russula* (the subgenus *Russula* of *A.*), *Lactarius* (the subgenus *Galarthaus* of *A.*), *Cantharellus*, *Marasmius*, *Lentinus*, *Panus*, *Bolbitis*, and *Gomphidius*. 2. A sort of fungus growing upon trees, now assigned to the genus *Polyporus* (formerly to *Boletus*); especially the *Polyporus officinalis*, *igniarius*, and *fomentarius*. 3. When used without qualification, white agaric or *Polyporus officinalis*. [B, 19, 46, 61, 71, 74, 105, 147, 148.]—*Agarici coprinarii*, *Agarici dermini*, *Agarici hyporrhodii*, *Agarici leucospori*, *Agarici pratelli*. See under *A.* (1st def.). Series E, or *COPRINARI*, Series C, or *DERMINI*, etc.—*A. acris*. See *LACTARIUS acris*, *LACTARIUS controversus*, and *LACTARIUS piperatus*.—*A. aeruginosus* [Schumacher]. See *A. odoratus*.—*A. aeruginosus* [Curtis]. A poisonous species belonging to the subgenus *Stropharia*, with the pileus at first of an æruginous color, afterward becoming paler, and the stipes floccose below the ring. [B, 74.]—*A. agrestis* [Withering]. A variety of *A. dealbatus*. [B, 71.]—*A. albellus* [Fries]. Fr., *mousseron de France*, *vrai-mousseron*. Syn.: *Hypophyllum aromaticum* [Paulet]. An edible French species belonging to *Tricholoma*, remarkable for its milky whiteness and its musky odor. [B, 74, 105, 106.]—*A. albus*. 1.

White agaric. See *POLYPORUS officinalis*. 2. The name given by Schäffer to a species of *A.* belonging to the subgenus *Tricholoma*. [B, 74.]—*A. alliatus*. See *MARASMIUS scorodoniensis*.—*A. alutaceus*. 1. A species now referred to *Russula*. See *RUSSULA alutacea*. 2. A species established by Persoon, placed in the subgenus *Annularia* of *A.* [B, 71, 74.]—*A. alutaris* [Persoon]. The *A. campestris*. [B, 149.]—*A. amanita* [Schumacher]. See *A. gracilentus*.—*A. amarus*. 1. Of Bulliard, the *A. fascicularis*. 2. Of Schäffer, the *Lactarius piperatus*. [B, 104, 105.]—*A. amethysteus* [Bulliard]. *A. laccatus*. [B, 149.]—*A. amethystinus*. Fr., *palomet*, *palomette des Béarnais*, *colombe*, *mousseron* (all of 1st def.). Syn.: *A. palometus* [De Candolle], *Hypophyllum palumbinum* [Paulet] (both of 1st def.). 1. *A. a.* of Scopoli. An edible European species belonging to *Tricholoma*, distinguished by the white pileus with lilac spots and the white stipes and lamellae. 2. *A. a.* of Hudson. See *A. laccatus*. [B, 74, 104, 105, 149.]—*A. amygdalinus* [Curtis]. An edible American species. [B, 61.]—*A. angustissimus* [Lasch]. A species, probably edible, belonging to *Collybia*, with white very thickly set, narrow lamellae and a flexuous stipes. [B, 74.]—*A. anisatus* [Persoon]. Fr., *agaric anisé*.—*A. odoros*. [B, 149.]—*A. annularis* [De Candolle]. *A. annularius* [Bulliard]. Fr., *agaric annulaire*. See *A. melleus*. [B, 104, 105, 149.]—*A. aquifolii* [Fries]. Fr., *agaric du houx*. A European species said to be edible, belonging to *Pleurotus*, distinguished from *A. olearius* by its white stipes and the less distinctly marked lamellae, which at their inner (posterior) extremities are joined together to form a ring. [B, 74, 104.]—*A. arcuatus* [Bulliard]. *A. geminus* [Fries]. [B.]—*A. arenarius* [Latreille]. *A. bufonius*. [B, 105.]—*A. arvensis* [Schäffer]. Ger., *Schafchampignon*. Meadow-mushroom, horse-mushroom; an edible species belonging to the subgenus *Psalliota*, closely allied to *A. campestris*, of which it is regarded as a variety by some. It is distinguished from the latter chiefly by its hollow stipes and its broad double ring. It sometimes reaches a very great size. [B, 61, 74, 106.]—*A. atramentarius*. *Coprinus atramentarius*. [B, 105.]—*A. atramentosus* [Kalch]. A species belonging to *Collybia*, distinguished by its black flesh and the dark hue of its pileus, stipes, and closely set, rather narrow lamellae. It is said to contain dioxiquinone. [B, 5, 74.]—*A. attenuatus*. See *A. cylindraceus*.—*A. aurantiacus* [Bulliard]. See *A. caesareus*. [B, 51, 93, 106.] See also *LACTARIUS aurantiacus* and *HYGROPHORUS conicus*.—*A. auratus*. 1. Of Fries, a species belonging to *Tricholoma* with a smooth yellow pileus, afterward changing to red, and yellow lamellae. 2. Of Withering, the *A. xanthopus* of Fries. 3. A name given to species now referred to *Cortinarius* and *Russula*. [B, 71, 74.]—*A. auriculae forma*, *A. auricula* Jude. *Hirneola auricula* Jude. [B, 61.]—*A. auriculatus* [Dubois]. Fr., *oreillette*. An edible French species [B, 88], probably *A. ermgii*. [B.]—*A. aurivellus* [Batsch]. *A. rimosus*. [B, 149.]—*A. badius* [Delle]. *A. vaginatus*. [B, 105.]—*A. bifidus* [Bulliard]. *Russula virescens*. [B, 150.]—*A. bombycinus* [Schäffer]. An edible species, occurring in the United States and Europe, although rarely in England, belonging to the subgenus *Volvaria*, having a dry fibrillose pileus and solid stipes. [B, 61, 74.]—*A. brevipes* [Bulliard]. Fr., *tortue*, *bouclier*. Syn.: *Hypophyllum testudo*. A species said to be edible, belonging to *Tricholoma* and distinguished by its short, solid, rigid, dark-colored stipes. [B, 61, 74, 105.]—*A. bufonius* [Bulliard]. Fr., *dore souffrée*. Syn.: *Hypophyllum aureo-sulfureum* [Paulet]. An

A section of the young plant.  
AGARICUS CAMPESTRIS. (AFTER B. FRANK [B, 49].)

edible species belonging to *Tricholoma*, having an agreeable taste and a marked odor. It resembles the poisonous *A. sulfureus*, from which it is distinguished chiefly by its less pronounced sulphur color, its striated flocculose stipes, and its more closely set lamellae. [B, 74,

105.]—*A. bulbosus*. 1. Of Sowerby, the *Cortinarius bulbosus*. 2. Of Bulliard, also called *Amanita bulbosa*, a species comprising the genera *A. virosus*, *A. phalloides*, *A. vernus*, and *A. mappa*.—*A. bullaceus* [Bulliard]. A species belonging to *Psilocybe* with a tawny-brown pileus, fibrillose stipes, and adnate iron-colored lamellae. [B, 74.]—*A. caesareus* [Scopoli]. Fr., orange. Ger., *Kaiserring*, *Kaiserschwamm*. Syn.: *Amanita caesarea* (seu *aurantiaca*); *Hypophyllum caesareum* [Paulet]. Golden agaric; a very excellent edible species belonging to the suborder *Amanita*, distinguished by its orange-colored pileus, pale-yellow lamellae, and very large volva. [B, 19, 74, 106.]—*A. caespitosus* [Curtis]. An edible species found in the United States growing in clusters of 50 to 100 individuals. [B, 61.]—*A. campanulatus* [Schrank]. *A. hypnorum*. [B, 71.]—*A. campestris* [Linnaeus]. Fr., *agaric champêtre* ou *comestible*, *champignon de couche*. Ger., *Champignon*, *Drüschling*. Sp., *hongo*, *hongo de los semilleros*. Syn.: *Hypophyllum campestre* (seu *exquisitum*, seu *gibbosum*). The common edible mushroom. A species belonging to *Psalliota*, distinguished by the silky floccose or finely scaly pileus, the somewhat reddish tint of the flesh, and the pinkish lamellae changing to a dark brown. There are many varieties, some of which are cultivated on a large scale, especially in France. [B, 49, 61, 74.]—*A. canalicularis* [Schumacher]. *A. nebularis*.—*A. cantharellus*. See *CANTHARELLUS cibarius*.—*A. carneus*. 1. Of Schäffer, *A. laccatus*. 2. Of Bulliard, a species belonging to the subgenus *Tricholoma*. [B, 74, 149.]—*A. caryophylleus* [Schäffer]. *Marasmius oreades*. [B, 149.]—*A. caseus* [Withering]. *A. nebularis* [Batsch].—*A. castaneus*. Fr., *agaric châtain*. See *CORTINARIUS castaneus*.—*A. cecillie* [Berkeley and Br.]. A species said to be edible, belonging to *Amanita*. It is nearly the same as, if not identical with, *A. vaginatus*. [B, 61, 147.]—*A. cepæstipes* [Sowerby]. Syn.: *Lepiota cepæstipes*. A poisonous species belonging to *Lepiota*, having a bell-shaped pileus with scattered scales and a hollow ventricose stipes. It grows on the bark of trees. It presents 2 varieties, a white and a yellow, the former of which has been identified by some with the *A. cretaceus* of Bulliard. [B, 71, 74, 149.]—*A. chantarellus*. *Cantharellus cibarius*. [B, 144.]—*A. chiturgorum*. Surgeons' agaric. See *POLYPORUS igniarius*.—*A. chiturgorum preparatum*. Amadou. [L, 30.]—*A. cinamomeus*. *Cortinarius cinamomeus*. [B.]—*A. claviformis*, *A. claviformis* [Schäffer]. *Hygrophorus pratensis* (seu *virginus*). [B, 105, 149.]—*A. clavus*. 1. Of Schäffer, *A. esculentus*. 2. Of Linnaeus, a species belonging to *Collybia*. [B, 74.]—*A. clypeolarius* [Bulliard]. Fr., *coulelemelle*, *bouclier*, *agaric en bouclier*. Syn.: *Lepiota clypeolaria*. A poisonous species belonging to *Lepiota*, characterized by the epidermis of the pileus peeling off and being broken up into ferruginous scales, by the white numerous lamellae, a subquamous stipes, and a floccose fugacious ring. It is distinguished from *A. procerus* by its smaller size, its non-bulbous stipes, and, according to some, its marked odor, which, however, is frequently absent. There are several varieties, some of which are now regarded as distinct species. [B, 71, 74, 105.]—*A. coccola* [Scopoli]. Syn.: *Amanita coccola*. An

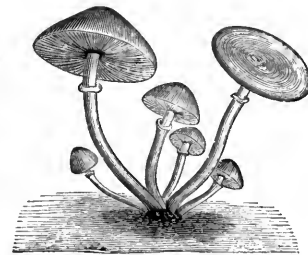

AGARICUS CEPÆSTIPES.  
(AFTER LONDON.)

AGARICUS CLYPEOLARIUS.  
(AFTER LONDON.)

edible species belonging to *Amanita*, found on the shores of the Mediterranean, having a grayish-white pileus with an incurved margin. [B, 105.]—*A. collinus*. 1. Of Scopoli, a species belonging to *Collybia*. 2. Of Persoon, the *Marasmius oreades*. [B, 74, 149.]—*A. colubrinus*. Syn.: *Lepiota colubrina*. 1. Of Persoon, a poisonous species now included with *A. clypeolarius*. 2. Of Bulliard, an edible species now referred to *A. procerus*. 3. Of Krombholz, a species allied to 1 and 2, and belonging to *Lepiota*, characterized by the imbricated tomentose scales which cover the pileus. [B, 38, 74, 93, 105.]—*A. columbetta* [Fries]. A small species belonging to *Tricholoma*, growing in sandy places in Europe and the United States, with a white pileus which, at first smooth, afterward becomes scaly and cracked, and is often covered with reddish or lilac spots; said to be edible. [B, 61, 71, 74.]—*A. comarus*, *A. comatus*. See *COPRINUS comatus*.—*A. conchatus* [Fries]. *Panus conchatus*. [B, 74, 105.]—*A. congregatus* [Bolton]. *A. melleus*. [B, 149.]—*A. conicus*. 1. Of Schäffer, the *Hygrophorus conicus*. 2. Of Picco, the *A. viperinus*. [B, 41, 46, 105.]—*A. consociatus* [Curtis]. An edible species growing in the United States. [B, 61.]—*A. contortus*. A variety of *A. fusipes* (q. v.). [B, 105.]—*A. contraversus* [Persoon]. See *LACTARIUS contraversus*.—*A. coriaceus* [Lightfoot]. *Marasmius oreades*. [B, 149.]—*A. cornucopiae* [Persoon]. *Panus conchatus*. [B, 105.]—*A. corrugis* [Persoon]. A species belonging to *Psathyra*, with a somewhat rose-colored pileus and dark-violet lamellae. [B, 74.]—*A. corticatus* [Fries]. *Marasmius oreades*. [B, 149.]—*A. cossus* [Sowerby]. See *HYGROPHORUS cossus*.—*A. crassipes* [Schäffer]. *A. fusipes*. [B, 71.]—*A. cretaceus*. 1. Of Fries, an edible species belonging to *Psalliota*, closely allied to *A. campestris*, growing in the United States and Europe. It is distinguished by its white pileus, hollow stipes, and the white lamellae which retain their hue for a long time. 2. Of Bulliard, an edible species belonging to *Lepiota*, usually considered to be a variety of *A. cepæstipes*, but probably distinct from the latter. [B, 46, 61, 74.]—*A. cristatus* [Albertini and Schweinitz]. Syn.: *Lepiota cristata*. A species alleged to be poisonous, having a whitish pileus covered with reddish scales, and slender deciduous ring. It has a penetrating fetid odor. It is closely allied to *A. clypeolarius*, of which it is sometimes regarded as a variety. [B, 46, 71, 74.]—*A. crustuliniformis* [Bulliard]. A non-edible species belonging to *Hebeloma*.

[B, 74.]—*A. cumulatus* [Withering]. *A. melleus*. [B, 149.]—*A. cyanoxanthus*. *Russula cyanoxantha*. [B, 105.]—*A. cylindraceus* [De Candolle]. Fr., *agaric attenué, pivouade*. Syn.: *A. attenuatus*. An edible French species belonging to *Pholiota*, with a dirty-yellow pileus, a white stipes thinned at its lower part, and lamellae white changing to a ferruginous hue. [B, 46, 74, 151.]—*A. cylindricus* [Withering, Sowerby]. *Coprinus comatus*. [B, 71, 149.]—*A. dealbatus* [Sowerby]. An edible species with an ivory-white, somewhat shiny pileus and slender stipes, belonging to *Clitocybe*. A variety, *A. dealbatus*, var. *agrestis* (*A. agrestis* of some), is described. [B, 61, 71, 74.]—*A. deliciosus*. See *LACTARIUS deliciosus*.—*A. depileus* [Batsch]. An edible species belonging to *Claudopus* (*Crepidotus*, according to the older authorities), growing on willows and alders by river-banks, distinguished by its pale, reddish pileus and its broad grayish-red lamellae. [B, 74, 105.]—*A. dimidiatus*. 1. Of Bulliard, *A. ostreatus*. 2. Of Schäffer, *A. dryinus*. [B, 71, 105.]—*A. dryinus* [Persoon]. Fr., *coquille du chêne*. Syn.: *Dendrosarcom quercinus* [Paulet]. An edible species, having quite an agreeable odor and taste, growing on trunks of old oaks. It belongs to *Pleurotus* and is distinguished by its hard white pileus, marked here and there with brownish scales, and by its fugacious veil. [B, 74, 105.]—*A. durus* [Bolton]. A poisonous species belonging to *Pholiota*, allied to *A. præcox*, but distinguished by its harder pileus. [B, 74.]—*A. eburneus*. See *HYGROPHORUS eburneus*.—*A. echinocephalus* [Vittadini]. Fr., *orange à pointes de trocarter*. Syn.: *Amanita flandinia* [Pleé]. *Hypophyllum tricuspidatum* [Paulet]. A poisonous species belonging to *Amanita*, marked by its grayish-white color and the acutely pyramidal warts studding the surface of the pileus. [B, 74, 105.]—*A. edulis* [Bulliard]. *A. campestris*. [B, 149.]—*A. elaeodes*. See *A. fascicularis*, var. *elaeodes*.—*A. emeticus*. See *RUSSULA emetica*.—*A. epigeus* [Persoon]. *A. depileus*. [B, 105.]—*A. epixanthus* [Fries]. A species belonging to *Hypholoma* and closely allied to *A. fascicularis* [Hudson], of which it is sometimes regarded as a variety. [B, 74, 105.]—*A. ericeus* [Bulliard]. *Hygrophorus virgineus*. [B, 149.]—*A. eryngii* [De Candolle]. Fr., *oreille de chardon*, *oreillette*, *brigoulet*. Syn.: *Hypophyllum eryngii* [Paulet]. A rare but very excellent edible species growing on old roots of *Eryngium campestre*. It belongs to *Pleurotus*, and is characterized by its grayish-red pileus and its decurrent fleshy-white lamellae. [B, 74, 105.]—*A. esculentus* [Wulfen]. Fr., *agaric en clou*. Ger., *Nagelschwamm*. Nail fungus. A species belonging to *Collybia*, growing in England and on the Continent, distinguished by its rather fleshy, obtuse, clay-colored pileus supported on a smooth, white, fistulous stipes. In Austria, where it occurs frequently in fir plantations, it is much eaten. [B, 49, 61, 71, 74, 105.]—*A. euosmus* [Berkeley]. A species belonging to *Claudopus*, resembling *A. ostreatus*, but not edible. It has a marked odor. [B, 19, 61, 74.]—*A. excelsus* [Fries]. Syn.: *Amanita excelsa*. A species belonging to *Amanita*, with a fibrillose pileus and rounded lamellae; by some said to be poisonous, by others regarded as nearly innocuous. [B, 46, 74.]—*A. exoriatum*. Syn.: *Lepiota exoriatum*. 1. Of Schäffer, a species, probably edible, belonging to *Lepiota*, allied to *A. procerus*, but distinguished by its short equal stipes. It grows in beech-woods. [B, 61, 71, 74.] 2. Of Lasch, the same as *A. naucius*.—*A. exquisitum* [Vittadini]. *A. campestris*. [B, 105.]—*A. farinaceus* [Hudson]. *A. laccatus*. [B, 149.]—*A. fascicularis* [Hudson]. Ger., *Schweifkopf*, *Büschelschwamm*. Syn.: *Hypophyllum fasciculare* and *Hypophyllum ruthense* [Paulet]. A poisonous variety belonging to *Hypholoma*, distinguished by its sulphur-colored pileus, its hollow, yellow-colored stipes, and lamellae varying in color from a sulphur-yellow to a bright green. A variety, *A. fascicularis*, var. *elaeodes* [Fries], has dark-green or olive-colored lamellae. [B, 49, 74.]—*A. fastidius* [Fries]. A non-edible species belonging to *Hebeloma*, with a dark, tawny pileus and emarginate, rather widely separated lamellae. It has a fetid odor and a nauseous taste. [B, 71, 74.]—*A. ficosides*. Fr., *agaric ficoside*. 1. Of Bulliard, the *Hygrophorus pratensis*. 2. Of Withering, the *Panus stypticus*. [B, 71, 149.]—*A. finetarius*. See *COPRINUS finetarius*.—*A. flabelliformis*. 1. Of Sowerby, the *Panus stypticus*. 2. Of Bolton, a species referred to *Pleurotus*. [B, 71.]—*A. floccosus* [Curtis]. A species corresponding to *A. squarrosus*. [B, 149.]—*A. foeniculifolius* [Persoon]. A species belonging to *Psilocybe*, with a sooty-brown pileus and pale reddish stipes. [B, 74.]—*A. fetens*. *Russula fetens*. [B, 93.]—*A. fossulatus* [Cooke]. An edible species found on the Cabul hills. [B, 61.]—*A. fragilis* [Persoon]. See *Russula fragilis*.—*A. fragrans* [Sowerby]. Fr., *godets montés*. A species valued as a food and a condiment and distinguished by its anise-like odor. It belongs to *Clitocybe* and has a pale tawny color and whitish sub-decurrent lamellae. [B, 61, 74, 105.]—*A. frumen-taceus* [Bulliard]. An edible species found in the United States and Europe, belonging to *Tricholoma*, marked by its reddish pileus and its white lamellae changing to red. [B, 61, 74.]—*A. fulvulus* [Fries]. A species belonging to *Tricholoma*, having smooth, tawny, reddish pileus, and white lamellae. [B, 74.]—*A. fulvosus* [Bolton]. *Hygrophorus pratensis*. [B, 149.]—*A. fulvus*. 1. Of Bulliard, the *A. fulvellus*. 2. Of Withering, the *Hygrophorus pratensis*. 3. Of Schäffer, a variety of *A. vaginatus*. [B, 74, 149.]—*A. furcatus* [Lamarck]. *Russula furcata*. [B, 105.]—*A. fusco-pallidus* [Bolton]. *A. melleus*. [B, 149.]—*A. fusipes* [Bulliard]. Fr., *chénier-ventru*. Syn.: *Hypophyllum fusipes* [Paulet]. An edible

AGARICUS FASCICULARIS.  
(AFTER MARCHAND [B, 105].)

species found at the foot of oak-trees, belonging to *Collybia*, distinguished by the fusiform dilatation of the stipes, the spotted reddish pileus, and the spotted adnate lamellae. There are 2 varieties, *A. fusipes*, var. *contortus* [Bulliard], with a tortuous stipes, and *A. fusipes*, var. *cedematopus* [Schäffer], with a fibrillose, pulverulent stipes. [B. 74, 105.]—*A. galeatus* [Léveillé]. *A. personatus*. [Fries.]—*A. gambosus* [Fries]. Ger., *Pomonaschwamm*. A very excellent edible species belonging to *Tricholoma*, found in the spring and early autumn. It has an odor of flour, is mouse-colored, has a spotted pileus with flocculose margin and a flocculose stipes. [B. 61, 74.]—*A. Garducii*. A species which is believed to be the phosphorescent fungus of Borneo. [B. 61.]—*A. Garidelii* [Fries]. Fr., *pinédo, garidel*. Syn.: *Hypophyllum Garidelii* [Paulet]. An edible species belonging to *Clitocybe*, growing in Provence. [B. 74, 105.]—*A. geminus* [Fries]. Fr., *jumeau-canelle*. Syn.: *Hypophyllum geminum* [Paulet]. An edible species belonging to *Tricholoma*, with a fissured cinnamon-red pileus and white lamellae. [B. 74, 105.]—*A. gemmatus* [Fries]. Syn.: *Amanita geminata*. An edible species belonging to *Amanita*, with a solid bulbous stipes and unprovided with a ring. [B. 46, 74.]—*A. geogenius* [De Candolle]. Fr., *bergroule*. A species belonging to *Pleurotus*, occasionally eaten in France, although by some it is regarded as poisonous. [B. 74, 105.]—*A. Georgii*. St. George's mushroom. 1. Of Clusius, a very large edible species belonging to *Tricholoma*, closely related to *A. gambosus*, of which it is sometimes considered a variety, and from which it is distinguished by the non-flocculose margin of the pileus and other characters. 2. Of Sowerby, a large species belonging to *Psalliota*, closely allied to *A. campestris*, probably the *A. arvensis*. 3. Of Linnaeus, a variety of *Russula emetica*. [B. 19, 71, 74.]—*A. geotropus* [Bulliard]. Fr., *grand-ailier, entonnoir vénéneux*. A species believed to be poisonous, but edible according to Cooke, belonging to *Clitocybe*, distinguished by the brownish color of the pileus and the white hue of the decurrent lamellae and of the flesh, changing to the same color as the pileus. [B. 61, 74, 105.] See also *A. subinvolutus*.—*A. giganteus* [Sowerby]. A large species closely allied to *A. maximus*, with which it is sometimes identified. [B. 74.]—*A. gilvus*. 1. Of Persoon, a species belonging to *Clitocybe*, related to *A. geotropus*, with which it is sometimes identified. It is distinguished by its thickly set, branching lamellae and the ochre-color which the stipes and flesh acquire. 2. Of Schäffer, the *A. fastibilis*. 3. A synonym for *A. nebularis*. [B. 71, 74, 149.]—*A. glandulosus* [Bulliard]. The *A. ostreatus*, var. *glandulosus*. [B. 147.]—*A. glutinosus* [Curtis]. *A. semiglobatus*. [B.]—*A. gracilentus* [Krombholz]. Syn.: *Leptota gracilenta*. A species, probably edible, belonging to *Leptota*, distinguished by its elongated stipes, by the shape of the pileus, which, from being campanulate, becomes expanded, and by the splitting of the epidermis of the pileus into persistent appressed segments. [B. 61, 74.]—*A. gracilis*. 1. Of Fries, a species belonging to *Psathyrella*. 2. Of Withering, a species referred to *Clitocybe*. [B. 71, 74.]—*A. graveolens* [Persoon]. Fr., *mousseron, prunelle d'Italie*. Ger., *Maischwamm*. Syn., *Hypophyllum prunulum* [Paulet]. An edible species, having a very penetrating odor, growing in France and Switzerland. It belongs to *Tricholoma*, and is marked by its smooth pileus, becoming fissured when dry and having a sooty brownish margin, and by its lamellae whitish changing to a sooty hue. [B. 49, 74, 105.]—*A. griseus* [Persoon]. *Russula rubra*. [B. 150.]—*A. hariolorum* [De Candolle]. An edible species of agreeable odor, belonging to *Collybia*, growing on dead leaves in woods. It is distinguished by its whitish-red pileus, and its reddish hairy stipes, thinned at its upper part. [B. 74, 105.]—*A. heterophyllum*. *Russula heterophylla*. [B. 150.]—*A. holosericeus* [Fries]. Syn.: *Leptota holosericea*. A species, probably edible, belonging to *Leptota*, having a silky-fibrillose pileus and fibrillose stipes. [B. 46, 61, 74.]—*A. hypnorum* [Batsch]. A species belonging to *Galera*, of tawny-ochre color, with striate pileus, covered with small papillae. There are one or two varieties. [B. 74.]—*A. hypophytus* [Curtis]. An edible species confined to the United States. [B. 61.]—*A. igneus* [Rumphius]. A phosphorescent species growing at Amboyna. [B. 61.]—*A. ignarius*. See *Polyporus ignarius*.—*A. ilicinus* [De Candolle]. An edible species growing at the foot of willow-trees. [B. 88.] Perhaps *A. cylindraceus*; by some referred to *Flammula* and *Collybia*.—*A. imperialis*. 1. Of Fries, a species belonging to *Tricholoma*. 2. Of Batsch, *A. muscarius*. [B. 74, 149.]—*A. infundibuliformis* [Schäffer]. Fr., *gyrolle*. An edible species, of agreeable though feeble odor, belonging to *Clitocybe*. It is to be distinguished from the poisonous *A. inversus* (q. v.). [B. 74, 105.]—*A. insidiosus* [Letellier]. Syn.: *Amanita insidiosa*. A poisonous species belonging to *Amanita*. It resembles *A. phalloides*, and has a plano-convex pileus of coppery-red color. [B. 46.]—*A. inversus* [Scopoli]. Fr., *gyrolle trompeuse*. A poisonous species belonging to *Clitocybe*. It is distinguished from *A. infundibuliformis* by its disagreeable, acidulous odor, its orange-reddish pileus, and the distinct orange tint of its whitish flesh. [B. 74, 105.]—*A. involutus*. See *Hygrophorus involutus*.—*A. lactatus* [Scopoli]. An edible species belonging to *Collybia*, devoid of odor or taste and very variable in color. It has a farinose, somewhat scaly pileus, and thick, widely separated, adnate, gayly-colored lamellae. [B. 74, 105.]—*A. lacrimabundus* [Fries]. A species belonging to *Hypophoma*, used as seasoning, but probably not fit for food. The pileus is covered with indistinct scales, the stipes and flesh are whitish, and the lamellae are dull-brown and emit a thin fluid. In the variety *A. lacrimabundus*, var. *velutinus* [Persoon], the pileus is tomentose, and there are black points on the lamellae. [B. 61, 74.]—*A. lactiflorus*. See *LACTARIUS subdulcis*.—*A. lactifluus aureus*. *Lactarius volemus*. [B. 105.]—*A. laricius*. See *A. melleus*, var. *laricinus*.—*A. lariciis*. See *Polyporus officinalis*.—*A. lateritius*. 1. Of Persoon and of Schäffer, *A. fascicularis*. 2. Of Fries, a species belonging to *Galera* with a tawny, ochre-colored pileus, yellowish-rusty lamellae, and a white, frosted stipes. [B. 74, 105, 149.]—*A. leiocephalus* [De Candolle]. Fr., *orange tête lisse*. Syn.: *Amanita leiocephala*. An edible species belonging to *Amanita*, having no ring and a silky pileus with smooth margin. [B. 74, 105.]—*A. leochromus* [Cooke]. An edible species be-

longing to *Pholiota*, with a tawny-yellow pileus, and lamellae changing to cinnamon-color. [B. 61, 74.]—*A. lepidus*. *Russula lepidota*. [B. 93.]—*A. lepista* [Fries]. *Paxillus lepista*. [B. 105.]—*A. leucocephalus* [Léveillé]. Fr., *nombri blanc*. Syn.: *Hypophyllum umbilicatum* [Paulet]. An edible species, belonging to *Tricholoma*, with a white, fleshy convex pileus, depressed in the centre, and a white, short, hollow stipes. [B. 74, 105.]—*A. lucidus* [Otto]. *A. fascicularis*. [B. 149.]—*A. luridus*. 1. *Lactarius luridus*. 2. Of Schäffer, a species of *Tricholoma*. [B. 74.]—*A. maleficus* [Roques]. Syn.: *Amanita malefica*. A poisonous variety belonging to *Amanita*, included by Letellier in *A. insidiosus*. [B. 46.]—*A. mappa* [Fries]. Fr., *orange blanche*. Syn.: *Amanita mappa* [Fries] (seu *citrino-alba* [Vittadini]), *Hypophyllum citrino-album* [Paulet]. A very poisonous species belonging to *Amanita*, white or yellowish in color, with a dry, convex pileus, afterward becoming flat, covered with large, flat, fugacious warts, and with a loose, soft ring at the upper part of the slender stipes, which is attenuate above, bulbous below. It has a disagreeable odor and taste. [B. 74, 105.]—*A. mas*. *Polyporus officinalis*. [L. 51.]—*A. mastoideus* [Fries]. Syn.: *Leptota mastoidea*. A species, probably edible, belonging to *Leptota*, distinguished by its slender stipes and ovate-expanded pileus. [B. 61, 74.]—*A. maximus* [Fries]. A very large, strongly scented, white species belonging to *Clitocybe*, with a compact striate stipes. It includes, according to some, the *A. giganteus* of Sowerby. [B. 61, 74.]—*A. meleagris*. *A. cygneolarius*, var. *meleagris*. [B.]—*A. melleus* [Linnaeus]. Fr., *tête de Méduse, agaric annulaire*. Ger., *Hallimasch*. Syn.: *A. annularis*, *A. annularius*, *A. polymyces*; *Hypophyllum polymyces* [Paulet]. An edible species belonging to *Armillaria*, growing in groups of 20 or more at the foot of trees. It has a brownish-yellow or brown pileus, with striate margin at first convex, afterward flat, and covered with felted scales; closely set, acute, decurrent lamellae; and a brownish stipes, 3 to 4 inches long, with a white, funnel-shaped, persistent ring. It is said to cause a peculiar disease of the coniferous trees near which it grows. A variety, *A. melleus*, var. *laricinus*, growing on larch-trees, has a smooth margin. [B. 19, 49, 74, 105.]—*A. mineralis*. See *Mineral agaric*.—*A. mollis* [Bolton]. *A. nebularis*. [B. 74, 149.]—*A. muscarius* [Linnaeus]. Fr., *agaric aux mouches, agaric moucheté, fausse-orange*. Ger., *Fliegen-schwamm, Fliegenpilz*. It., *agarico muscario*. Sp., *agárico pintado*. Syn.: *Amanita muscaria* [Persoon], *Hypophyllum muscario* [Paulet]. Fly agaric: bug agaric. A very poisonous species belonging to *Amanita*, distinguished by its bright-orange or red pileus

AGARICUS MELLEUS.  
(AFTER LOUDON.)

AGARICUS MUSCARIUS.  
(AFTER B. FRANK [B. 49].)

covered with soft, fugacious, whitish warts, its white, rarely yellowish lamellae, and its white flocculose stipes, bulbous at the base and bearing, at its upper attenuated extremity, a white ring. It is to be carefully differentiated from the edible *A. caesareus*. It possesses marked excitant and narcotic properties analogous to those possessed by alcohol. The narcotic principle is excreted in the urine, and it is said that in Siberia, where the *A. muscarius* is used as an intoxicant, the urine of those who partake of it is drunk as a means of prolonging the intoxication. It is used for killing flies and other insects, and in large quantity it is a fatal poison to man; yet cooking is said to render it innocuous, and it is eaten in Russia. *A. muscarius* has been used as a local application to cancerous tumors and ulcers and internally in chronic skin diseases, in epilepsy, as an excitant in paralysis, and recently as an anti-hidrotic in phthical sweating. It contains the alkaloids *muscarine* and *amanitine*, *muscaric acid*, and a volatile acid principle not yet isolated. [B. 19, 49, 54, 61, 105, 145.]—*A. mutabilis* [Schäffer]. Ger., *Stockschwamm*. An edible species, growing on tree-trunks, belonging to *Pholiota*, with a cinnamon-colored pileus, a rigid-brown scaly stipes, and a fugacious ring changing from white to brown. [B. 49, 74.]—*A. naucius* [Fries]. Syn.: *Leptota naucina*. An edible species belonging to *Leptota*, white, with lamellae changing from white to rose-colored. [B. 46, 74.]—*A. nauseosus*. *Russula nauseosa*. [B. 93.]—*A. nebularis* [Batsch]. Fr., *agaric pileolaire*. A large species, belonging to *Clitocybe*, regarded as edible by good authorities, although some consider it noxious. It is found growing upon dead leaves in woods, and is distinguished by its sooty-gray pileus, becoming pale in dry weather, its pale, closely set arcuate lamellae, and its spongy elastic stipes. [B. 74, 105.]—*A. necator* [Bulliard]. Fr., *agaric meurtrier*. *Lactarius torminosus*. [B. 105.]—*A. nigricans* [Bulliard]. *Russula*

*la nigricans*. [B, 105.]—*A. nitens* [Bulliard]. *A. semiglobatus*. [B.]—*A. nitidus* [Fries]. Syn.: *Amanita nitida* [Persoon]. A poisonous species belonging to *Amanita*, having a yellowish-white pileus with dry, readily separable epidermis and thick, acutely pyramidal gray or greenish warts, large white lamellae, and a white stipes bulbous at the base. [B, 46, 74, 105.]—*A. niveus*. 1. Of Scopoli, *Hypophorus niveus*. 2. Of Sowerby, *A. variabilis*. 3. Of Paulet, a poisonous species, also called *Amanita nivea*, referred to *Amanita* and by some included with *A. insidiosus*. 4. Of Quélet, a species referred to *Mycena*. [B, 46, 71, 74, 149.]—*A. nobilis* [Bolton]. *A. muscarius*. [B, 149.]—*A. noctilucens* [Léveillé]. A phosphorescent species growing in Manila. [B, 61.]—*A. nudus* [Bulliard]. Fr., *plateau violet*. Syn.: *Hypophyllum ianthinum* [Paulet]. An edible species, little employed, belonging to *Tricholoma*, distinguished by the violet hue of its pileus, lamellae, and farinose stipes, and by its acidulous odor. [B, 74, 105.]—*A. obscurus* [Schäffer]. *A. melleus*. [B, 149.]—*A. odoratus* [Bulliard]. Fr., *mousseron odorant, agaric anisé*. Ger., *Anisschwamm*. A species, probably edible, belonging to *Clitocybe*, distinguished by its fragrant anise-like odor, the green color of its pileus, and the pale color of the stipes and adnate, distant lamellae. [B, 61, 74, 105.]—*A. olearius*

AGARICUS OLEARIUS. (AFTER MARCHAND [B, 105].)

[De Candolle]. Fr., *oreille de l'olivier, agaric de l'olivier*. Syn.: *Polymyces phosphoreus* [Battarra]. *Dendrosarcos phosphoreus* [Paulet]. A very poisonous phosphorescent species belonging to *Pleurotus*. It grows in tufts at the foot of olive-trees, and is characterized by its brownish-orange or red irregular pileus, at first convex then infundibuliform, by its golden-yellow decurrent lamellae, and by its short reddish-brown stipes, attenuate at the lower part. [B, 61, 74, 105.]—*A. opiparus* [Fries]. An edible species, of agreeable taste, belonging to *Clitocybe*, having a shining, white, grayish, or rose-colored pileus, white lamellae, and a white, fleshy, non-elastic pileus. [B, 74, 105.]—*A. orcella* [Bulliard]. An edible species belonging to *Clitopilus* and closely related to *A. prunulus*. It has a yellowish-white, soft, moist pileus with closely set lamellae, and emits an odor of meal. [B, 61, 74.]—*A. oreades*. *Marasmius oreades*. [B, 49, 105.]—*A. ostreatus* [Jacquin]. Fr., *peuplière-brune*. Ger., *Austernpilz, Buchenpilz, Drehling*. Syn.: *Dendrosarcos populeus* [Paulet]. The oyster mushroom; a very excellent edible species, belonging to *Pleurotus*, growing in tufts upon oaks and poplars. It has a grayish or brown fleshy pileus, subsequently becoming paler, white stipes, inconspicuous, sometimes suppressed. A variety, *A. ostreatus*, var. *glandulosus*, has glandular swellings upon the lamellae. [B, 49, 74, 105, 147.]—*A. ovatus* [Schäffer]. *Coprinus ovatus*. [B, 74, 149.]—*A. ovoideus* [Bulliard]. Fr., *coucoumelle, champignon blanc, bôulé*. Syn.: *Amanita alba* [Persoon] (seu *ovoidea*). An edible species belonging to *Amanita*, found in oak groves, distinguished by its white color, its large loose volva, its large thick ring, and the smooth, inflexed margin of the pileus. [B, 38, 74, 105.]—*A. pallidus* [Sowerby]. *A. prunulus*. [B, 71.]—*A. palometus* [De Candolle]. *A. amethystinus* [Fries].—*A. pantherinus* [Fries]. Fr., *orange perlée*. Ger., *Pantherschwamm*. Syn.: *Amanita pantherina* [Krombholz]. *Hypophyllum margaritiferum* [Paulet] (in part). A very poisonous species belonging to *Amanita*, distinguished by its brown pileus with viscid epidermis, covered with whitish, farinose, flat, adherent warts and with a striate margin, and by its white flesh and lamellae, and white stipes, bulbous below, and bearing a white ring. [B, 74, 105.]—*A. pectinatus*. See *Russula pectinata*.—*A. pellitus*. 1. Of Paulet, a poisonous species belonging to *Amanita*, having a large thick stipes attenuate above, bulbous below, bearing a large floating fugacious ring, grayish or yellowish pileus with smooth margin, white lamellae reaching the stipes, and soft volva, which in the course of its development tears into irregular fugacious plates, leaving beneath it a soft pellicle readily separable from the pileus. 2. Of Persoon, a species belonging to *Pluteus*. [B, 74, 105.]—*A. personatus* [Fries]. Fr., *mascarille, champignon masqué*. Syn.: *Lepista personata*, *Hypophyllum persona-*

AGARICUS OSTREATUS. (AFTER LOUDON.)

*tum* [Paulet]. Masked mushroom: a very excellent edible species, of agreeable odor and taste, belonging to *Tricholoma*. The pileus is compact, obtusely campanulate, and of a violet hue changing to brown; the margin is villous and frosted; the lamellae are rounded and villous; the stipes is long, white with a violet tint, cylindrical, and fibrous. [B, 71, 74, 105.]—*A. phalloides* [Fries]. Fr., *orange ciqûe jaunâtre*. Ger., *Knollenblätterschwamm*. Syn.: *Amanita phalloides* (seu *viridis* [Persoon]) seu *venenosa* [Persoon]. A very poisonous species belonging to *Amanita*, having a green or yellow, obtuse, viscid, rather scaly pileus with a smooth margin, bulbous half-free volva, and white or yellow stipes which becomes fistulous at the top. It is said to contain an alkaloid, *bulbosine*. [B, 46, 71, 74, 105.]—*A. pileolarius* [Bulliard]. *A. nebularis*. [B, 147, 149.]—*A. piperatus*. 1. Of Scopoli, *Lactarius piperatus*. 2. Of Bulliard, *Russula foetens*. [B, 49, 105.]—*A. plumbeus*. 1. Of Fries, a species with a lead-colored pileus, belonging to *Mycena*. 2. Of Schäffer, a lead-colored variety of *A. vaginatus*. 3. A variety of *Lactarius turpis*. [B, 71, 74.]—*A. polymyces* [Persoon]. *A. melleus*. [B, 149.]—*A. pometi* [Fries]. An edible species belonging to *Pleurotus*, found in the United States. It is white, with an irregular pileus and an elastic, villous, rooting stipes. [B, 61, 74.]—*A. Pomona* [Lenz]. Ger., *Pomonaschwamm*. *A. gambosus*. [B, 49, 74.]—*A. praecox* [Persoon]. A poisonous species referred by some, along with the allied *A. durus*, to *A. semiglobatus*, but usually made a distinct species assigned to the subgenus *Pholiota*. It belongs to the series of terriolous *Agarici* with brownish-rusty spores, and is characterized by its soft, pale pileus and whitish, farinose-pubescent stipes. [B, 74, 147.]—*A. pratensis*. Ger., *Wiesenschwamm*. The meadow mushroom. 1. Of Schäffer, an edible species belonging to *Psalliota*, closely allied to *A. campestris*, chiefly distinguished by its ashy-white pileus and ash-colored lamellae, rounded at their inner extremities. *A. pratensis*, var. *fulveolus* [Lasch], has yellowish lamellae. 2. Of Persoon, the *Psalliota lepista*. 3. Of Hudson, the *Marasmius oreades*. 4. The *Hypophorus pratensis*. [B, 49, 74, 105, 147.]—*A. procerus* [Scopoli]. Fr., *coquemelle des prés, coulemotte, parasol*. Ger., *Parasolschwamm*. Syn.: *Lepiota procera*, *Hypophyllum globoso-cameratum* [Paulet]. The parasol-mushroom; a very excellent edible species, of agreeable odor, belonging to *Lepiota*. It has a very tall sub-bulbous stipes, attaining sometimes a foot in height, and a white or brownish-white pileus covered with a thick epidermis which breaks up into grayish-brown imbricated scales, separating from the pileus. [B, 49, 61, 74, 105.]—

AGARICUS PHALLOIDES. (AFTER LOUDON.)

AGARICUS PRO CERUS. (AFTER THURBER [B, 138].)

AGARICUS PRUNULUS. (AFTER LOUDON.)

*A. prunulus* [Scopoli]. Fr., *mousseron, petite-manelle*. Ger., *Mousseron*. Syn.: *Dendrosarcos mammosa* [Paulet]. A choice edible species belonging to *Clitopilus*, distinguished by its mealy odor, its ashy-white fleshy pileus, the rather widely separated lamellae, in color, white changing to red, and the striate stipes. [B, 49, 74, 105.]—*A. pseudo-aurantiacus* [Bulliard]. *A. muscarius*. [B, 149.]—*A. pseudo-mousseron* [Bulliard]. *Marasmius oreades*. [B, 149.]—*A. pudicus* [Fries]. An edible species belonging to *Pholiota*, growing on trunks of trees, marked by its smooth, dry, white pileus and by lamellae at first whitish then tawny-yellow. [B, 61, 74.]—*A. pulverulentus* [Bulliard]. *A. fascicularis*. [B, 105, 149.]—*A. pustulatus*. 1. Of Schäffer, *A. rubescens* (1st def.). 2. A species referred to the genus *Hypophorus*. [B, 71, 74.]—*A. putridus* [Scopoli]. *A. melleus*. [B, 149.]—*A. pyrogalus* [Bulliard]. *Lactarius pyrogalus*. [B, 93, 105.]—*A. quercinus*. Oak agaric; *Polyporus igniarius*. [L, 51.]—*A. quercinus preparatus*. Amadou; *Polyporus igniarius* (or *fomentarius*) prepared for surgical use. [L, 57.]—*A. quereus*. See *A. quercinus*.—*A. quietus*. See *Lactarius quietus*.—*A. rachodes*. See *A. rhachodes*.—*A. radiatus* [Relhan]. An edible species belonging to *Collybia*, marked by its rugose, glutinous, whitish, or fuscous pileus, widely separated white lamellae, and tall stipes. [B, 61, 74.]—*A. rhachodes* [Vittadini]. Syn.: *Lepiota rhachodes*. A species, regarded by some as edible, belonging to *Lepiota*. It resembles *A. procerus*, from which it is chiefly distinguished by the thin reticulate epidermis, which breaks up into persistent scales. [B, 46, 61, 74.]—*A. rimosus* [Bulliard]. Ger., *rissige Blätterschwamm*. A poisonous species belonging to *Moocybe*, with a fissured pileus, changing from a dusky hue to yellow, and a smooth sub-bulbous stipes, white at its sum-

mit. [B. 49, 74].—*A. rosellus*. 1. Of Batsch, *A. laccatus*. 2. Of Fries, a rose-colored species belonging to *Myceus*. [B. 74, 149].—*A. roseus* [Persoon]. *Russula fragilis*. [B. 105].—*A. rubellus*. 1. Of Schäffer, *A. laccatus*. 2. Of Scopoli, a species belonging to *Entoloma*, with a reddish, somewhat viscid pileus and a white stipes. [B. 74, 149].—*A. rubens* [Scopoli]. *A. muscarius*. [B. 149].—*A. ruber*. 1. Of Trattinick, *Lactarius volemus*. 2. *Russula rubra*. [B. 105, 150].—*A. rubescens*. 1. Fr., *golmotte*, *golmelle*, *orange vineuse*. Ger., *Perleuschwamm*, *graue Fliegenschwamm*. Syn.: *Amanita rubescens*, *Hypophyllum vinosum* [Paulet]. A species, belonging to *Amanita*, established by Fries, considered as edible, although stated by some to be poisonous. It has a reddish or brownish pileus studded with flat or obtuse, whitish, farinose, fugacious warts, and a red or brownish, finely scaly pileus, attenuate at its upper part. Its flesh becomes red when bruised. 2. Of Withering, *Lactarius rufus*. 3. Of Scopoli, *Lactarius volemus*. 4. *Lactarius quietus*. [B. 49, 61, 71, 74, 105, 150].—*A. rufus* [Scopoli]. *Lactarius rufus*.—*A. russula* [Schäffer]. Fr., *russule*. An edible species of agreeable odor, belonging to *Tricholoma*, having a rose-colored, more or less spotted, scaly or granular pileus, rounded sub-decurrent white lamellae, changing to red, and a solid rose-colored stipes. [B. 38, 74, 105].—

AGARICUS RUBESCENS. (AFTER THOMÉ.)

*A. salignus* [Persoon]. Fr., *oreille de noyer*. Syn.: *Dendrosarcos juglandis* [Paulet]. An edible species, said to be very good when young, belonging to *Pleurotus*. It is found growing on walnut-trees, is of a sooty-ochre color, has a horizontal spongy pileus, sub-ramose pale lamellae, and a tomentose stipes. It is found in the United States, Continental Europe, and China. [B. 61, 74, 105].—*A. sanguineus* [Bulliard]. *Russula sanguinea*. [B. 71, 93].—*A. saxosus*. Syn.: *Lepiota saxosa* [Bertillon]. An edible French species, resembling *A. rhachodes*, belonging to *Lepiota*. [Bertillon (B. 46)].—*A. scorodoni*. *Marasmius scorodoni*. [B. 49, 71].—*A. scurpus* [Fries]. Fr., *darmes des Prevençaux*. Syn.: *Hypophyllum provinciale* [Paulet]. An edible species, abounding in the south of France, belonging to *Armillaria*, having the pileus rough with closely set rugae, a white ring, and a whitish or brown stipes. It has an agreeable odor of fresh flour. [B. 46, 74, 105].—*A. semiglobatus* [Batsch]. A species said to be poisonous, belonging to *Stropharia*. It grows on dung, is yellowish in color, glutinous, and has a smooth pileus, slender stipes, and broad blackish lamellae. [B. 74, 147].—*A. semilanceatus* [Fries]. A species belonging to *Psilocybe*, with a moist, viscous, yellowish-green pileus, almost cuspidate in shape, and a pale stipes. [B. 74].—*A. semiorbicularis* [Bulliard]. A species belonging to *Nauoria*, with the pileus changing from a tawny-reddish to an ochre color, and with a hollow, shining, rust-colored stipes. [B. 74].—*A. semipetiolatus* [Schäffer]. *Panus stypticus*. [B. 105].—*A. sessilis* [Bulliard]. *A. variabilis*. [B. 149].—*A. setiger* [Fries]. Syn.: *Hypophyllum setigerum* [Paulet]. *A. silvaticus*, var. *setiger*. [B. 105].—*A. silvaticus* [Schäffer]. Ger., *Waldchampignon*. An edible species belonging to *Psalliota*, closely allied to *A. campestris*, of which it is sometimes regarded as a variety. It is chiefly distinguished by its reddish color, and its fibrillose squamose pileus. The variety *A. silvaticus*, var. *haemorrhoidalis* [Kalkbrenner], is covered with broad appressed scales, and the flesh when broken becomes blood-red in color. *A. silvaticus*, var. *setiger* [Fries], is distinguished by the brownish felt-like hairs covering the pileus and stipes. [B. 61, 74, 105].—*A. silvicola*. *A. campestris*, var. *silvicola*. [B. 74].—*A. sinuatus* [Fries]. An edible species belonging to *Entoloma*, with a smooth, moist, yellowish-white pileus, and a fibrillose stipes. [B. 74].—*A. solitarius* [Bulliard]. Fr., *amanite solitaire*. Syn.: *Amanita solitaria*. An edible species belonging to *Amanita*, white, with a bulbous rooting stipes, covered with imbricated scales. [B. 38, 74].—*A. spadiceus* [Fries]. A species belonging to *Psilocybe*, with a smooth, moist pileus, reddish-brown lamellae, and a pale stipes, used as a seasoning for ketchup, but probably dangerous. [B. 61, 74].—*A. speciosus* [Fries]. An edible species found in the United States and Europe, and eaten in the former country. It belongs to *Volvaria*, is white, and has a smooth viscid pileus, a loose villous volva, and a villous stipes. [B. 61, 74].—*A. spissus* [Fries]. Fr., *orange à verrues*, *orange perlée*. Syn.: *Amanita spissa*, *Hypophyllum margaritiferum* [Paulet] (in part). A poisonous species belonging to *Amanita*, having a dark, rusty-brown, viscid pileus with flat or obtuse ash-colored warts, white lamellae, a white stipes, bulbous below, attenuate above, and firm white flesh. [B. 74, 105].—*A. squamosus* [Fries]. A species belonging to *Stropharia*, having a yellow pileus covered with superficial concentric floccose scales, and a slender floccose stipes. [B. 74]. See also *A. squarrosus*, *A. procerus*, and *A. phalloides*.—*A. squarrosus* [Müller]. A species belonging to *Pholiota*, edible according to some, dangerous according to others. It is rusty-yellow in color, and its stipes is attenuate at the base and covered with crowded, scurfy scales. There are several varieties, distinguished by the shape or color of the pileus. [B. 61, 74].—*A. stipitidis* [Sowerby]. *A.*

*melleus*. [B. 149].—*A. stipticus*. *A. stypticus*. See *PANUS stypticus*.—*A. strobiliformis* [Vittadini]. Syn.: *Amanita strobiliformis*. A species, said to be edible, belonging to *Amanita*. It has a grayish-white or grayish-yellow pileus covered with flattened polyhedral tenacious warts, a white, thick, flocculose-farinose, fugacious ring, and a white thick stipes, smooth above, floccose and bulbous below. [B. 61, 74, 105].—*A. stypticus*. *Panus stypticus*. [B. 74, 151].—*A. suavis* [Persoon]. *A. infundibuliformis*. [B. 105].—*A. subcarneus* [Batsch]. *A. laccatus*. [B. 149].—*A. subdulcis*. *Lactarius subdulcis*. [B. 74].—*A. subinvolutus* [Saunders and Smith]. An edible species belonging to *Clitocybe*, often considered as a variety of *A. geotropus* or referred to the allied *A. gilvus*. It is distinguished from the former by its fibrillose, zoned, yellowish stipes. [B. 61, 74, 149].—*A. sublateralis* [Schäffer]. A species, alleged to be poisonous, belonging to *Hypholoma*, with a dry, discoid, tawny pileus, whitish compact flesh, and lamellae changing from white to dark olive-color. *A. sublateralis*, var. *silaceus* [Persoon], has an orange-red pileus, whitish at the margin, and a bulbous stipes. [B. 74].—*A. subocreateus* [Cooke]. An edible species found in Asia, exported from China and Singapore. [B. 61].—*A. sulfureus* [Bulliard]. Fr., *citron, agaric soufre*. Syn.: *Hypophyllum citrinum* [Paulet]. A poisonous species belonging to *Tricholoma*, having a very fetid odor, a pronounced sulphur color, a sub-umbonate pileus, broad, widely separated lamellae, and a smooth, striate, non-floccose stipes. [B. 74, 105].—*A. sylvaticus*, *A. sylvicola*. See *A. silvaticus*, *A. silvicola*.—*A. tessulatus* [Bulliard]. An edible species belonging to *Pleurotus*, with a yellowish guttate pileus, uncinately adnate lamellae, and a smooth stipes. [B. 61, 74].—*A. theiogalus*. *Lactarius theiogalus*. [B. 74, 144].—*A. torminosus*. *Lactarius torminosus*. [B. 105].—*A. tortilis*. 1. Of De Candolle, *Marasmius oreades*. 2. Of Bolton, a species belonging to *Collybia*, allied to *A. laccatus*. [B. 74, 105, 149].—*A. transluens* [De Candolle]. An edible species belonging to *Cladophorus*, allied to, and by some identified with, *A. depluens*. It is sub-sessile, with lamellae at first pale, then becoming reddish or purple. [B. 74, 105].—*A. trochiscatus*. White agaric in the form of troches. See *Trochisci* DE AGARICO.—*A. tuba* [Fries]. A white species belonging to *Clitocybe*, with an umbilicate, dry, white pileus, and broad, crowded, decurrent lamellae. It is said to be used in diarrhoea. [B. 71, 74].—*A. turgidus* [Greville]. *A. nebularius*. [B. 145].—*A. turpis*. *Lactarius turpis*. [B. 74].—*A. typhoides* [Bulliard]. *Coprinus comatus*. [B. 105, 149].—*A. umariis* [Bulliard]. Fr., *agaric (ou oreille) de forme, coquille noire du hêtre*. Syn.: *Dendrosarcos nigrescens* [Paulet]. A very good edible species belonging to *Pleurotus*, of acidulous, agreeable odor, growing upon elms, oaks, and other trees. It has a whitish, orange-tinted pileus, large emarginate, adnate, whitish lamellae, and a white, firm, elastic stipes, villous, with a bulbous base. [B. 61, 74, 105].—*A. umbellatus* [Fries]. *Lentinus umbellatus*. [B. 105].—*A. umbratilis* [Fries]. Fr., *cel de cornelle*. Syn.: *Hypophyllum corvinum* [Paulet]. A poisonous species belonging to *Omphalia*, said to be used as a poison for rats. It has a brownish-black pileus convex at first, afterward umbilicate, large, arcuate, decurrent lamellae, and a brownish stipes. [B. 105].—*A. urens*. Fr., *agaric brûlant*, *Marasmius urens*. [B. 74].—*A. vaginatus* [Fries]. Fr., *orange satinée (ou rayée)*, *amanite engainée*. Ger., *Scheidenschwamm*. Syn.: *Amanita vaginata* (sen *spadicea* [Persoon]), *Hypophyllum latum* [Paulet]. An edible species belonging to *Amanita*, distinguished by the absence of the ring, by the pectinate-sulcate margin of the pileus, and by the white lamellae. [B. 19, 74, 105].—*A. vaporarius* [Otto; Vittadini]. A variety of *A. campestris*. [B. 147].—*A. variabilis* [Persoon]. A species belonging to *Cladophorus*, allied to *A. depluens*, distinguished by its tomentose white pileus, well-separated lamellae, and short stipes. [B. 74].—*A. vellereus*. *Lactarius vellereus*. [B. 74].—*A. venenosus*. Syn.: *Amanita venenosa* [Persoon]. A species including *A. phalloides*, *A. virosus*, and *A. vernus*. [B. 105].—*A. vernus* [Bulliard]. Fr., *orange ciguë blanche*. Ger., *Frühlingsblätterschwamm*. Syn.: *Amanita bulbosa* (in part), *Agaricus bulbosus*, var. *vernus*. Spring agaric; a very poisonous species, belonging to *Amanita*, having a fetid odor, and characterized by its white, rather scaly, campanulate pileus, reflected swollen ring, and stipes bulbous at the base. It is found in the woods in spring-time. [B. 49, 74].—*A. verrucosus* [Bulliard]. *A. rubescens* (1st def.). [B. 105].—*A. vesca*. *Russula vesca*. [B. 74].—*A. veterosus*. *Russula veterosus*. [B. 105].—*A. villaticus* [Brond]. A variety of *A. campestris*. [B. 147].—*A. violaceus*. The violet mushroom. 1. Of Sowerby, *A. personatus*. 2. *Cortinariis violaceus*. [B. 74].—*A. viperinus* [Fries]. Fr., *orange souris*, *orange serpent*. Syn.: *Hypophyllum anguinum* [Paulet]. A poisonous species belonging to *Volvaria*, much resembling *A. caesareus*. It has a brilliant, grayish, silky, conical pileus, yellowish-white lamellae, a small white volva, and a grayish-white, fistulose stipes. [B. 74, 105].—*A. virescens*. 1. Of Schäffer, *Russula virescens*. 2. A variety of *A. phalloides*. [B. 71, 150].—*A. virgineus*. *Hygrophorus virgineus*. [B. 71, 105].—*A. virosus*. 1. Of Fries. Fr., *orange ciguë jaunâtre*, *amanite sulfuree*. Syn.: *Amanita citrina* [Persoon], *Hypophyllum virosus* [Paulet]. A poisonous species, closely related to *A. phalloides*, belonging to *Amanita*. It is distinguished chiefly by its fetid odor, its campanulate, yellowish [B. 105], or white [B. 74] pileus, and its squamose, less bulbous stipes. As first established by Fries, it included *A. vernus*. 2. Of Sowerby, *A. semiglobatus*. [B. 74, 105, 149].—*A. Vittadini* [Fries]. Syn.: *Amanita Vittadini*. A species belonging to *Amanita*, chiefly distinguished by the dense mucated warts with which the pileus is covered, and the squarrose, scaly stipes. [B. 46, 74].—*A. volemus* [Fries]. *Lactarius volemus*. [B. 74, 105].—*A. volucaeus* [Bulliard]. Syn.: *Fuligo vaporaria* [Persoon]. A species suspected to be poisonous, belonging to *Volvaria*, characterized by its sooty pileus striped with black, its loose volva, and its solid stipes. [B. 51, 74].—*A. xanthopus* [Fries]. A species belonging to *Collybia*, by some regarded as a variety of *Russula alutacea*, having a light-yellowish pileus, whitish lamellae, and a yellow stipes with hairy, rooting base. [B. 71, 74].—*A. xerampellinus*. 1. Of Sowerby, a species assigned to *Tricholoma*.

2. *A. caesareus*. 3. *Russula xerampelina*. [B, 71, 74].—**Black-spored agarici**. See under *A.* series E, or *Coprinarii*.—**Extractum agarici alcoholicum**. Fr., *extrait alcoolique d'agaric*. An extract made from white agaric (*Polyporus officinalis*) by digesting the latter with alcohol, filtering, and evaporating to a suitable consistence. [Wurtemb. Ph. (1798).] [L, 85].—**Extractum agarici aquosum** [Fr. Cod., 1837]. Fr., *extrait aqueux d'agaric*. Made by extracting white agaric with cold water, filtering, expressing, and evaporating. [L, 85].—**Extractum agarici gummo-resinosum**. Fr., *extrait gomme-résineux d'agaric*, *extrait hydrat-collé d'a*. An extract of white agaric (*Polyporus officinalis*); made by digesting 345 parts of the latter with 115 of alcohol and 2,760 of boiling water, decanting, filtering, and evaporating the filtrate to dryness. [Sp. Ph. (1798).] Other proportions were employed in unofficial formulæ. [L, 85].—**Ferruginous-spored agarici**. See under *A.* series C, or *Dermini*.—**Mel rosatum solutivum cum agarico**. See under *MEL*.—**Purple-spored agarici**. See under *A.* series D, or *Pratensis*.—**Rose-spored agarici**. See under *A.* series B, or *Hyporrhodii*.—**Rusty-spored agarici**. Ferruginous-spored agarici.—**Trochisci de agarico**. Fr., *trochisques d'agaric*. Syn.: *a. trochiscatus*. Troches made out of white agaric (*Polyporus officinalis*) by triturating the latter with white wine to which usually ginger and sometimes gum tragacanth were added. [Sydenham (B, 90); Disp. Palatinat. (1764), Sard. Ph. (1773), Brunsw. Ph. (1777), Wurtemb. Ph. (1793), Sp. Ph. (1798) (L, 85).]—**White-spored agarici**. See under *A.* series A, or *Leucospori*.

**AGARIFIED** (Provenc. Eng.), adj.  $A^2g\text{-}a^2r\text{-}i^2f\text{-}id$ . Feverish. [L, 45.]

**AGARIKON, AGARIKUN** (Lat.), n's n.  $A^2g(a^2g)\text{-}a^2r(a^2r)\text{-}i^2k\text{-}o^2n$ ,  $u^2n(u^2n)$ . Barbarous forms of *agaricon*. [L, 105.] See *POLYPORUS officinalis*.

**AGARISTA** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^2r\text{-}i^2st\text{-}a^3$ . A genus of ericaceous plants, established by Don. [L, 64.]

**AGARUM** (Lat.), n. n.  $A^2g(a^2g)\text{-}a^3\text{-}ru^3m(ru^4m)$ . A genus of olive-spored *Algae*, distinguished from *Laminaria* chiefly by the frond being always perforated with roundish holes. [L, 67].—*A. esculentum*. See *LAMINARIA esculenta*.

**AGATAMARAY**, n. An Indian name for the *Pistia stratiotes*. [L, 105.]

**AGASSIN** (Fr.), n.  $A^3\text{-}ga^3s\text{-}sa^2n^2$ . A vine bud from which no fruit is developed. [L, 42.]

**AGASSIZIA** (Lat.), n. f.  $A^3\text{-}ga^3s\text{-}se\text{-}zi^2a^3$ . A genus of plants, named in honor of Agassiz, belonging partly to the genus *Galvesia* and partly to the genus *Camissonia*. [L, 30.]

**AGASTACHYS** (Lat.), n. m.  $A^2g(a^2g)\text{-}a^2s(a^2s)\text{-}ta^3\text{-}ki^2s(ch^2u^2s)$ . Gen., *agastachyos*. From *ἀγαστός*, admirable, and *στάχυς*, an ear of corn, a spike. A genus of proteaceous plants, established by R. Brown. [L, 64.]

**AGASTER** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}u^3r(e^2r)$ . Gen., *agasteris*. From *α* priv., and *γαστήρ*, the paunch. An animal without an alimentary canal.

**AGASTOR** (Lat.), n. m.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}o^2r$ . Gen., *agastoris*. From *α* copul., and *γαστήρ*, the womb. 1. A twin. 2. An agaster (q. v.). [L, 50.]

**AGASTRARIUS** (Lat.), n. m.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ra(a^3r)\text{-}i^2u^3s(u^3s)$ . Fr., *agastraire*. An organism without a proper alimentary canal. [Blainville (L, 63).]

**AGASTREÆ** (Lat.), n. f. pl.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}re^2e(a^3e^2e)$ . See CESTODA.

**AGASTRIA** (Lat.), n. n. pl.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ri^2a^3$ . Agastriac animals. [L, 103.]

**AGASTRIC**, adj.  $A^2g\text{-}a^2st\text{-}ri^2k$ . Lat., *agastricus*. Fr., *agastrique*. Ger., *magenlos*. It., *agastrico*. Sp., *agastrico*. Syn.: *anenterate*. Having no internal digestive cavities. [L, 41, 56, 98, 103.]

**AGASTRICA** (Lat.), n. n. pl.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ri^2k\text{-}a^3$ . See AGASTRIA.

**AGASTRONERVIA** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ro\text{-}nu^6r\text{-}(ne^3r)\text{-}vi^2(wi^2)\text{-}a^3$ . From *α* priv., *γαστήρ*, the stomach, and *νέυρον*, a nerve. Fr., *agastronervie*. Sp., *agastronervia*. Diminished power in the nerves of the stomach. [L, 41.]

**AGASTRONOMIA** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ro\text{-}no\text{-}mi^2a^3$ . Fr., *agastronomie*. Ger., *Agastronomie*. It., *agastronomia*. Sp., *agastronomia*. See AGASTRONERVIA.

**AGASTROZOA** (Lat.), n. n. pl.  $A^2g(a^2g)\text{-}a^2st(a^2st)\text{-}ro\text{-}zo\text{-}a^3$ . From *α* priv., *γαστήρ*, the stomach, and *ζῷον*, an animal. Fr., *agastrozoaires*. See AGASTRIA.

**AGASYLLIS** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^3\text{-}si^2l(su^6l)\text{-}li^2s$ . Gen., *agasyllidis*. Gr., *ἀγασυλλίς* (the *Heracleum gummiferum* [Dioscorides (L, 47)]). A genus of umbelliferous plants. [L, 30, 67].—*A. galbanum*. See *DOREMA ammoniacum*.

**AGATE**, n.  $A^2g\text{-}at$ . See *ACHATES*.—*A.*-snail. See AGATINE.

**AGATE** (Fr.), n.  $A^2g\text{-}a^3t$ . 1. The agate. 2. Agarie. [A, 324.] *A. de chène*. See *POLYPORUS igniarius*.—*A. minéral*. See *Mineral AGARIC*.—*A. mondé*. Prepared agarie. [L, 52.]

**AGATHENQUELLE, AGATHENSQUELLE** (Ger.), n's.  $A^3ga^3te^2n(te^2nz)\text{-}kwe^2le^2$ . A Norwegian spring. [A, 305.]

**AGATHIS** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^3\text{-}thi^2s$ . Gen., *agathidis*. From *ἀγᾱθῆς*, a heap or cluster, from the arrangement of the flowers. A genus of East Indian coniferous trees, established by Salisbury. [L, 64].—*A. Dammaria*. The dammar-pine, from which dammar turpentine is extracted. [B, 5; L, 61.]

**AGATHODES** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^3\text{-}tho\text{-}dez(de^2s)$ . A genus of gentianaceous plants, of the family *Chironiæ*, established by Don. [A, 321].—*A. angustifolia* [Don]. Syn.: *Suertia angusti-*

*folia* [Wallroth]. This, the only species, has a bitter root, employed in the north of India as a tonic, stomachic, and febrifuge. [A, 321.] Cf. *AGATHOTES*, *GENTIANA*, and *OPHELIA*.

**AGATHOICUS** (Lat.), adj.  $A^2g(a^2g)\text{-}a^3\text{-}tho\text{-}i^2k\text{-}u^3s(u^3s)$ . In botany, transparent like agate. [L, 63.]

**AGATHOLEPIS** (Lat.), adj.  $A^2g(a^2g)\text{-}a^3\text{-}tho\text{-}le^2p\text{-}i^2s$ . From *ἀγᾱθός*, beautiful, and *λεπίς*, a scale. In botany, having brilliant or colored scales. [L, 63.]

**AGATHOPHYLLUM** (Lat.), n. n.  $A^2g(a^2g)\text{-}a^3\text{-}tho\text{-}fi^2l(fu^6l)\text{-}lu^3m(lu^4m)$ . From *ἀγᾱθός*, beautiful, and *φυλλόν*, a leaf. Fr., *agathophylle*. Ger., *Gewürzblatt*. A genus of plants of the laurel family. [Masters (L, 67).]—*A. aromaticum*. A Madagascar tree, the drupaceous fruit of which has an aromatic odor and a bitter, acrid, balsamic taste, and possesses stimulant properties. The kernel is known as the *Madagascar clove nutmeg*. The natives use the leaves as a condiment. [B, 97; L, 67.]

**AGATHOSMA** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^3\text{-}tho\text{-}z(tho^3s)\text{-}ma^3$ . From *ἀγᾱθός*, pleasing, and *σμήνη*, an odor. Fr., *agathosme*. Ger., *Wohlgeruch*. A genus of diosmeous plants, established by Willdenow. [L, 37, 41, 64].—*A. crenata*. See *Diosma crenata*.—*A. pulchella*. A blunt-leaved species constituting one of the varieties of "bucku," or "booko" (see BUCHU). The dried and powdered leaves, mixed with grease, are used by the Hottentots for anointing themselves. [L, 64.]

**AGATHOTES** (Lat.), n. f.  $A^2g(a^2g)\text{-}a^3\text{-}th(a^3th)\text{-}o^2t\text{-}ez(e^2s)$ . Gen., *agathote'tos (-tis)*. From *ἀγᾱθός*, goodness. A genus of gentianaceous plants. [B, 19].—*A. chirayta*. Syn.: *Gentiana chirayta*, *Ophelia chirata*. A species indigenous to northern India, containing a pure bitter, used for the same purposes as gentian and known as *chiretta*. [L, 67.] See *CHIRATA*.

**AGATHWASSER** (Ger.), n.  $A^3g\text{-}a^3t\text{-}va^3s\text{-}ser$ . See *ACHATINSQUELLE*.

**AGATI** (Lat.), n. m., indecl. (really a Hindu word).  $A^3\text{-}ga^3\text{-}te$ . A genus of leguminous plants, of the sub-order *Papilionaceæ*, established by Desvieux. [A, 306; L, 87].—*A. æschynomene grandiflora* [Linnaeus], *A. grandiflora*. An East Indian tree (the *buka* of Bengal, the *yerra avesti* of Tegal), the leaves, flowers, and young pods of which are used in making curry. The juice of the flower is used for dimness of vision, and the bark, which is bitter and tonic, is used in small-pox. [L, 67, 87.]

**AGATIBAD** (Ger.), n.  $A^3g\text{-}a^3t\text{-}i^2i\text{-}ba^3d$ . See *ACHATINSQUELLE*.

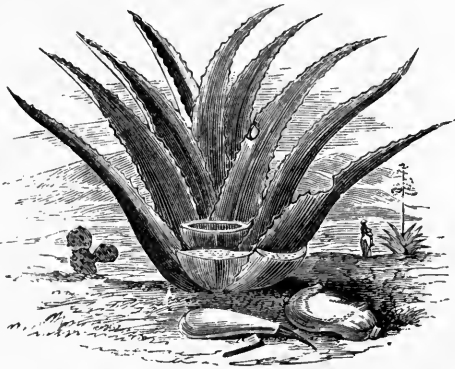

**AGATINE** (Fr.), n.  $A^3\text{-}ga^3t\text{-}en$ . The agate-snail, a genus of terrestrial pulmonobranchous gastropods found in the tropics. A species found on Princes' Island (*Achatina bicarinata*) was formerly made the basis of a syrup used in phthisis. [L, 49, 110.]

**AGAVE** (Lat.), n. f.  $A^2g(a^2g)\text{-}a(a^3)\text{-}ve(wa)$ . Gen., *aga'ves*, *aga'veæ*. From *ἀγᾱνός*, admirable, or *ἀγᾱνή*, the name of one of the Nereids. Fr., *agavé*. A genus of herbaceous plants of the natural order *Amarylhidaceæ*, distinguished by bearing a many-flowered scape with flowers the perianth of which is destitute of a crown, straight, and adherent to the ovary, with the segments fused into a tube above the ovary. [B, 34.] Several of the species bear a considerable resemblance in appearance to plants of the genus *Aloe*, with which they are sometimes confounded. Most of the species yield a rather bitter and astringent juice. [a, 5].—*A. americana* [Linnaeus]. Fr., *agavé d'Amérique*. Ger., *Baumaloe*, *grosse* (oder *hundert-jährige*) *Aloe*. The American aloe or century-plant (one of the *maguays* of South America, the *mezcal* of Mexico); a very large herb indigenous to tropical America and naturalized in Florida and on the shores of the Mediterranean, having a scape from 15 to 25 feet high, or even higher, surmounted by a panicle of yellow flowers. [B, 34; L, 65.] When the plant has reached maturity, which takes from ten to seventy years, according to the climate, it sends forth a stem 40 feet in height, which puts out numerous branches, each bearing flowers that continue in full bloom for several months. As soon as the flowers fall, the plant dies. [A, 327.] From an extract of the leaves balls are made which form a lather with water, like soap. The central portion of the stem, split longitudinally, is used for hones or razor-strops. A translucent gum, *gum maguay*, is obtained from the plant. The fibre is used to some extent for the same purposes as hemp fibre. The fresh juice is said to be laxative, diuretic, and emmenagogue, and has been used in scurvy and in syphilis. [L, 30, 50, 65, 85, 86].—*A. d'Amérique* (Fr.). See *A. americana*.—*A. foetida*. A species from which a variety of aloes is made in Spain. [L, 77].—*A. lutea*. Sp., *maguay meco* [Mex. Ph.]. A species found in Central Mexico, from the purified juice of the leaves of which a pectoral syrup is made. [J. M. Maisch, "Am. Jour. of Pharm." Jan., 1886, p. 20].—*A. mexicana*. A species closely allied to *A. americana*. The juice is used in Mexico for bleaching. [L, 65, 77].—*A. Palmeri*, *A. Par-*

AGAVE.

ryl. Both these species are used in making *mezcal*. [B, 66.]—**A. potatorum** [Salm]. Sp., *maquey manso* [Mex. Ph.]. Syn.: *A. salmiana*. A Mexican species. The leaves are rubefacient and epispastic, and are used in tetanus; the root is diuretic, diaphoretic, and antisiphilitic. [J. M. Maisch, l. c.]—**A. pulque**. Sp., *a. (o maquey) del pulque*. This species is the source of the popular Mexican drink known as *pulque*. [a, 5.]—**A. ramosa**. See *A. americana*.—**A. salmiana**. See *A. potatorum*.—**A. Saponaria**. A species the root of which is used in Mexico as a detergent in place of soap. [A, 252.]—**A. virginica** [Linnaeus]. False aloe; a species found in the Atlantic States, from Pennsylvania southward. It has a scape from 4 to 6 feet high,

AGAVE PULQUE.

Showing the implements for collecting the juice.

with greenish-yellow fragrant flowers. [B, 34.] A tincture of the root is used in the Southern States as a remedy for colic and in the treatment of snake-bites. [L, 65.]—**A. uvula** (Ger.). See *Vinum a's*.—**American a.** See *A. americana*.—**Radix agave**. The root of *A. americana*. [B, 97.]—**Vinum a's** [Mex. Ph.]. Ger., *Agavenwein*. Sp., *pulque*. The slightly fermented sap of *A. pulque* (q. v.). The sap is collected in leather bags. At a very early stage of fermentation it is a sweet, sparkling, refreshing liquid, scarcely if at all intoxicating. Before the sap has fermented at all it is termed *aguamiel*. [a, 5.]

**AGAVEÆ** (Lat.), n. f. pl.  $A^2j(a^3g)-a(a^3)/ve(we^2)-e(a^2-e^2)$ . Fr., *agavées*. Ger., *Agavengewächse*. In Eichler's classification, a family (corresponding to an order of other systems) of plants belonging to the order (cohort) *Ensateæ*, class *Liliifloræ*. [B, 35.] In the ordinary classification it is included among the *Amaryllidaceæ*. [B, 34, 75.]

**AGE**, n. Aj. Gr., αἰών, ηλικία. Lat., *ætas* (a contraction of *ævitas*). Fr., *âge* (in various old and provincial forms, *éage*, *aage*, *édage*, *aige*, *atge*). Ger., *Alter*, *Lebensalter*, *Lebensperiode*. It., *età*. Sp., *edad*. 1. The whole duration of the existence of an organism or an object. 2. The particular time of life of an organism; usually, in man, divided into five periods: infancy, childhood, youth, manhood (or womanhood), and old age. [A, 300, 305, 306.]—**Adult a.** Fr., *âge d'adulte*. Sp., *edad adulta*. The a. of maturity.—**A. of consent**. The a. at which a young person is capable of consenting (in the legal sense) to sexual intercourse; generally that of 14 years in boys and 12 in girls. [Bouvier (A, 302).]—**A. of maturity**. Lat., *ætas major* (seu *legitima*). Fr., *âge mûr* (ou *légal*). Ger., *Grossjährigkeit*. Syn.: *majority*. See *MATURITY*.—**A. of puberty**. See *PUBERTY*.—**A. of virility**. See *VIRILITY*.—**Marriageable a.** See *NUBILITY*.—**Mature a.** See *MATURITY*.—**Nubile a.** See *NUBILITY*.—**Old a.** Gr., γῆρας. Lat., *senectus*. Fr., *âge avancé*, *vieillesse*. Ger., *Greisenalter* (*Matronenalter*), *höheres Alter*. Sp., *vejez*. See *SENILITY*, *SENECTUS*, and *CENTENARIANISM*.—**Virile a.** See *VIRILITY*.

**AGE** (Ger.), n.  $A^3ge^2$ . An awn; the chaff of corn or flax. [L, 46.]

**ÂGE** (Fr.), n.  $A^3zh$ . Age.—**Â. adulte**. Adult age.—**Â. avancé**. Old age.—**Â. critique**. The period of "the change of life" in women. See *MENOPAUSE*.—**Â. de l'adolescence**. See *ADOLESCENCE*.—**Â. de puberté**. See *PUBERTY*.—**Â. de retour**. See *Â. critique*.—**Â. d'homme**. 1. The natural period of man's life. 2. The period of virility. [L, 42.]—**Â. du lait**. Lit., the age of the milk; the length of time that has elapsed since a woman's confinement (said of wet-nurses). [A, 306.]—**Â. mûr**. See *MATURITY*.—**Â. nubile**. See *NUBILITY*.—**Â. tendre**. Infancy. [A, 306.]—**Â. viril**. See *VIRILITY*.—**Bas â.** Infancy. [A, 306.]—**Bel â.** Fleur de l'â. Youth. [A, 306.]—**Jeune â.** premier â. Infancy. [A, 306.]—**Retour d'â.** See *Â. critique*.

**AGEDOÏDE**, **AGEDOÏL** (Fr.), n's.  $A^2zh-do-ed(el)$ . See *AGEDOÏTE*.

**AGEDOÏTE**, n.  $A^2j-e^2d'o-it$ . Fr., *agedoïde*, *agedoïl* [Caventon], *agédôite*. A crystalline substance obtained by Robiquet from licorice-root, now known to be identical with asparagine. [B, 5.]

**AGELÆA** (Lat.), n. f.  $A^2j(a^3g)-e^2l-e'(a^3e^2)-a^3$ . Fr., *agelée*. A genus of conaraceous plants found in tropical Asia and Africa. [L, 79.]—**A. emetica**. A species the leaves of which are used as an emetic by the natives of Madagascar. [L, 49.]—**A. Lamarckii**. A species used in Madagascar as a remedy for gonorrhoea and dysentery. [L, 49.]

**AGELAST**, n.  $A^2j'e^2l-a^2st$ . Lat., *agelastos*, *agelastus* (from *a* priv., and *γελᾶν*, to laugh). One who can not laugh. [L, 30, 58, 73.]

**AGELÉE** (Fr.), n.  $A^3-zhe^2l-a$ . See *AGELÆA*.

**AGELEI**, **AGELEY** (Ger.), n's.  $A^3g'e^2l-i$ . See *AQUILEGIA*.

**AGELENIDES** (Lat.), n. f. pl.  $A^2j(a^3g)-e^2l-e^2n'i^2d-ez(e^2s)$ . A family of the order *Araneida*, or spiders. [Cambridge (B, 77).]

**AGELHOLZ** (Ger.), n.  $A^3g'e^2l-ho^2ltz$ . See *ALOES-WOOD*.

**AGEN**, n. The Persian lilac. [L, 84.]

**AGÈNE** (Fr.), n.  $A^3-zhan$ . See *AGENOSOMA*.

**AGÈNE** (Fr.), adj.  $A^3-zhe^2n$ . See *AGENUS*.

**AGENEIOS** (Lat.), adj.  $A^2j(a^3g)-e^2n-i(a^3)/o^2s$ . Gr., ἀγένοιος (from *a* priv., and *γενέας*, the beard). Beardless. [L, 47.]

**AGENESIA** (Lat.), n. f.  $A^2j(a^3g)-e^2n-e(a^3)/zhi^2(s)^2-a^3$ . From *a* priv., and *γενέσις*, generation, formation. Fr., *agénésie*. Ger., *Agénésie*. It., Sp., *agenesia*. 1. Impotence or barrenness. 2. As now more commonly used, defective development of a portion of the body. [D, 18, 70; L, 43, 84.] Cf. *APLASIA*.—**A. dysspermia**. See *DYSPERMASIA*.—**A. incongrua**. See *Relative STERILITY*.

**AGENESIS** (Lat.), n. f.  $A^2j(a^3g)-e^2n'e^2s-i^2s$ . Gen., *agene'seos*. See *AGENESIA*.

**AGENIA** (Lat.), n. f.  $A^2j(a^3g)-e(a^3)/ni^2-a^3$ . See *AGENOSOMA*.

**AGENNESIA**, **AGENNESIS** (Lat.), n's f.  $A^2j(a^3g)-e^2n-ne(na^3)/zhi^2(s)^2-a^2$ ,  $-e^2n'ne^2s-i^2s$ . Gen., *agenne'siae*, *agenne'seos*. See *AGENESIA*.

**AGENOSOMUS** (Lat.), n. m.  $A^2j(a^3g)-e^2n-o-so^2mu^2s(mu^4s)$ . From *a* priv., *γενᾶν*, to produce, and *σῶμα*, a member of the body. Fr., *agénosome*, *agène*. A monster characterized by median or lateral evagination, especially at the lower part of the abdomen, with defective development of the genitals. [L, 49.]

**AGENT**, n.  $A^3je^2nt$ . Lat., *agens* (pres. part. of *agere*, to act). Fr., *agent*. Ger., *Agent*. It., Sp., *agente*. Anything, material (like a drug) or potential (like heat), that produces an effect.

**AGENTURARZT** (Ger.), n.  $A^3-ge^2nt'ur-a^2rtzt$ . A physician in the employ of a company, especially a medical examiner in life-insurance. [L, 57; a, 7.]

**AGENUS** (Lat.), adj.  $A^2j(a^3g)-e^2n-u^2s(u^4s)$ . From *a* priv., and *γενός*, offspring. Fr., *agène*. A term proposed by Lestiboudois to describe cellular plants, as opposed to the terms endogenous and exogenous. [L, 106.]

**AGER** (Lat.), n. m.  $A(a^3)/ju^2r(ge^2r)$ . Gen., *ag'ri*. A field, the soil. [L, 84.]—**A. chymicus**. The chemist's field (i. e., water, since, says Dorneus, it is the field "in which the root of minerals is fixed, from whence the trunk and branches shoot into the earth"). [L, 104.]—**A. nature**. The uterus. [L, 84.]

**AGER** (Lat.), adj. See *AGRESTIS*.

**AGERASIA** (Lat.), n. f.  $A^2j(a^3g)-u^2r(e^2r)-a(a^3)/zhi^2(s)^2-a^3$ . Gr., ἀγερσία (from *a* priv., and *γῆρας*, old age). Fr., *agérésie*. Ger., *Agerasie*. It., Sp., *agerasia*. Old age without the feebleness usually accompanying it. [A, 305.]

**AGERASY**, n.  $A^2j-e^2r'a^3-si^2$ . See *AGERASIA*.

**AGERAT** (Ger.), n.  $A^3g-e^2-ra^3t'$ . See *ACHILLEA ageratum*.

**ÂGÉRÂTE** (Fr.), n.  $A^3-zha-ra^3t$ . See *ACHILLEA ageratum*.

**ÂGÉRÂTÉ** (Fr.), adj.  $A^3-zha-ra^3-ta$ . Resembling the genus *Ageratum* (q. v.). [L, 41.]

**AGERATON** (Lat.), n. n.  $A^2j(a^3g)-e^2r'a^3-to^2n$ . See *AGERATUM*.

**AGERATUM** (Lat.), n. n.  $A^2j(a^3g)-e^2r'a^3-tu^2m(tu^4m)$ . Gr., ἀγέρων, the ancient name of the *Achillea* a. (from *a* priv., and *γῆρας*, old age, because it was supposed not to fade). Fr., *agératon*. Sp., *agerato*. 1. Sweet maudlin, maudlin tansy; a genus of composite plants, of the sub-order *Tubulifloræ*, distinguished by the following characters: the flowering head is devoid of rays, the receptacle is unprovided with pales or bristles, the pappus forms a circle of from 5 to 10 aristate chaffy scales, the lobes of the corolla are equal, and the leaves are opposite. [B, 2.] In pharmacy, the *Achillea a.* [L, 47, 84, 97, 99, 101.]—**A. altissimum**. See *ERUPATORIUM ageratoides*.—**A. conyzoides** [Linnaeus]. Bastard hemp; a plant from 12 to 18 inches high, with blue or white flowers, found in Georgia. [B, 34; L, 67.]—**A. febrifugum**. See *PRIVERIA trinervia*.—**A. mexicanum**. A species closely resembling *A. conyzoides*, with densely clustered lavender-blue flowers. [B, 19.]—**A. ptarmica** [Linnaeus]. A species formerly used as an errhine and sialagogue, to relieve toothache, and as a remedy for palsy. [L, 97.]

**AGERATUS** (Lat.), n. m.  $A^2j(a^3g)-e^2r'a^3-tu^2s(tu^4s)$ . Gr., ἀγέρως. Syn.: *lapis a.* An ancient name for a shoemaker's polishing-stone; used as an astringent and to aid digestion. [L, 97, Galen (L, 47, 50).]

**AGERAZIA** (Lat.), n. f.  $A^2j(a^3g)-e^2r-a(a^3)/zhi^2(z)^2-a^3$ . See *AGERASIA*.

**AGERMENNIG** (Ger.), n.  $A^3g'e^2r-me^2n-ni^2g$ . The *Agrimonia eupatoria*. [A, 305.]

**AGES** (Lat.), adj.  $A(a^3)/jez(ge^2s)$ . Gr., ἀγῆς. Lit., wicked, accursed; formerly used as a *n.* to designate the palm of the hand, as being generally the instrument of wicked acts. [L, 84, 104.]

**AGESTER** (Lat.), n. m.  $A^2j(a^3g)-e^2st'u^2r(e^2r)$ . See *AGASTOR*.

**AGEUSIA** (Lat.), n. f.  $A^2j(a^3g)-u^2-si^2-a^3$ . From *a* priv., and *γεῦσις*, the sense of taste. Ger., *Ageusie*, *Geschmacksangel*. Loss of the sense of taste. [A, 305; K, L, 43.]

**AGEUSIE** (Ger.), n.  $A^3-ge^2-u^2ze$ . See *AGEUSIA*.—**Centrale A.** Ageusia due to a lesion of the cerebral centres of the nerves of taste. [L, 57.]—**Leitungs-A.** Ageusia due to a lesion in the nerves between their origin and distribution. [L, 57.]—**Periphere A.**

Ageusia due to disease of the terminal extremities of the gustatory nerves. [L, 57.]

**AGEUSIS** (Lat.), n. f.  $A^2j(a^2g)-u^2/si^2s$ . Gen., *ageu'seos*. See AGEUSTIA.

**AGEUSTIA** (Lat.), n. f.  $A^2j(a^2g)-u^2st/i^2a^2$ . Gr., *ἀγευστία*. Fr., *ageustie*. Ger., *Ageustie*. Sp., *ageustia*. 1. Fasting. [A, 311.] 2. Loss of the sense of taste. [L, 46.] See AGEUSIA. 3. Any disease of the sense of taste. [Pinel, Alb. [L, 50].]

**AGEUSTUS** (Lat.), adj.  $A^2j(a^2g)-u^2st/u^2s(u^2s)$ . Gr., *ἀγευστος*. 1. Fasting. [A, 311.] 2. Lacking the sense of taste. 3. Untasted, untried. [L, 50.]

**AGE VITA** (Lat.), n. f.  $A(a^2j)je(ga)-vi(we)/ta^2$ . Syn.: *jugis vita*. An old name for a medicated wine used as an antidote; made with galangal-root, long and white pepper, sage, ginger, cinnamon, saffron, and cloves, boiled in wine. [L, 97.]

**AGGEDULA** (Lat.), n. f.  $A^2j(a^2g)-e^2d'u^2(u^2)a^2$ . Fr., *aggédule*. 1. The theca of most of the mosses. [Necker (B, 1).] 2. The cups (cluster-cups) of the *Puccinæ* in the acidium stage. [Hoffmann (B, 1).]

**AGGER** (Lat.), n. m.  $A^2g(a^2g)/ju^2r(ge)^2r$ . Gen., *ag'geris*. Lit., a heap; in anatomy, a prominence.—**A. perpendicularis**, **A. pontificus**. See *EMINENTIA scapulae*.—**A. valvularum venarum**. The little projection at the junction of the valves of a vein with the wall of the vessel. [A, 305.]

**AGGLET, AGGLETTE**, n.  $A^2g/le^2t$ . Fr., *aiguillette*. 1. An anther. [Kersey (L, 73).] 2. An ament or catkin. [Gerard (L, 73).]

**AGGLOMERATE**, adj.  $A^2g-glo^2m/e^2r$ -at. Lat., *agglomeratus* (from *agglomerare*, to gather into a ball or skein). Fr., *aggloméré*. Ger., *agglomerirt*. It., *agglomerato*. Sp., *aglomerado*. In botany, collected into a mass (like the stamens in some varieties of *Anona*). [B.]

**AGGLOMERATION**, n.  $A^2g-glo^2m-e^2r$ -a'shu<sup>3</sup>n. Lat., *agglomeratio*. Fr., *agglomération*. Ger., *Agglomeriren*, *Anhäufung*. It., *agglomerazione*. Sp., *aglomeración*. 1. In chemistry, a collection of dissimilar uncombined molecules into a loose mass. [L, 109.] 2. In botany, the state of being agglomerate (q. v.). [L.]

**AGGLUTINANT**, adj. and n.  $A^2g-glu^2t/i^2n$ -a<sup>2</sup>nt. Gr., *προσκόλλων* (adj.), *προσκόλλητικός* (n.). Lat., *agglutinans* (from *agglutinare*, to glue to). Fr., *agglutinant*, *agglutinatif*. Ger., *agglutinierend* (adj.), *agglutinirendes Mittel* (n.). It., *agglutinante*. Sp., *aglutinante*. 1. Promoting the repair of wounds by adhesion (said of sticking-plaster and the like). 2. As formerly used, a medicine which favored the union of wounds by promoting nutrition. [A, 321.]

**AGGLUTINANTIA** (Lat.), n., n. pl. of *agglutinans* (q. v.).  $A^2g(a^2g)-glu^2t(glu)-tin$ -a<sup>2</sup>n(a<sup>2</sup>n)/shi<sup>2</sup>(ti)<sup>2</sup>-a<sup>2</sup>. Agglutinants.

**AGGLUTINATED**, adj.  $A^2g-glu^2t/i^2n$ -a-te<sup>2</sup>d. Gr., *προσκόλλητος*. Lat., *agglutinus*. Fr., *agglutiné*. Ger., *agglutiniert*. It., *agglutinato*. Sp., *aglutinado*. Adherent. In botany, adherent by means of a secretion (said of the utricles of the pollen, as in certain *Orchideæ*). [Mirbel (L, 106).]

**AGGLUTINATEUR, AGGLUTINATIF** (Fr.), adj's.  $A^2g-glu^2t-i^2n$ -a<sup>2</sup>-tu<sup>2</sup>r, -tef. Agglutinant. [L, 42, 43.]

**AGGLUTINATIO** (Lat.), n. f.  $A^2g(a^2g)-glu^2t(glu)-ti^2n$ -a(a<sup>2</sup>)/shi<sup>2</sup>(ti)<sup>2</sup>-o. Gen., *agglutinatio'nis*. Agglutination.—**A. maxillæ inferioris**. Trismus. [L, 30].—**A. pili**. The reduction of ingrowing eyelashes to their natural order by means of glutinous matter on a probe. [L, 97.]

**AGGLUTINATION**, n.  $A^2g-glu^2t-i^2n$ -a'shu<sup>3</sup>n. Gr., *προσκόλλησις*. Lat., *agglutinatio*. Fr., *agglutination*. Ger., *Agglutination*, *Zusammenleimen*, *Anklebung*. It., *agglutinazione*. Sp., *aglutinación*. The state of being adherent, or the process of adhering. [L, 30, 43, 46, 50, 56, 99].—**Immediate a.** The healing of a wound by simple adhesion. [L, 63].—**Mediate a.** Healing by the interposition of new material. [L, 63.]

**AGGLUTINATIVE**, adj.  $A^2g-glu^2t/i^2n$ -a-ti<sup>2</sup>v. Fr., *agglutinatif*. Ger., *agglutinierend*. Tending to adhesion, or having the property of promoting adhesion. [L, 43, 56.]

**AGGLUTINENTIEN** (Ger.), n. pl.  $A^2g-glu^2t-i^2n$ -e<sup>2</sup>nt/en. Agglutinants. [L, 46.]

**AGGLUTINIREND** (Ger.), adj.  $A^2g-glu^2t-i^2n$ -e-re<sup>2</sup>nd. Agglutinative, vulnerary.—**A<sup>e</sup> Mittel**. Agglutinants.

**AGGLUTITIO** (Lat.), n. f.  $A^2g(a^2g)-glu^2t(glu)-ti^2$ /shi<sup>2</sup>(ti)<sup>2</sup>-o. Gen., *agglutitio'nis*. An obstruction of the oesophagus, or difficulty in swallowing. [L, 84.]

**AGGRAVATION**, n.  $A^2g-gra^2v$ -a'shu<sup>3</sup>n. From *aggravare*, to make heavier. Fr., *aggravation*. Ger., *Erschweren*. It., *aggravazione*. Sp., *agravación*. 1. An increase in the severity of a disease or of its symptoms. 2. See AGGRAVEE.

**AGGRAVE** (Fr.), n.  $A^2g-gra^2v$ . See AGGRAVÉE.

**AGGRAVÉE** (Fr.), n.  $A^2g-gra^2v$ -a. A disease of the feet in dogs, due to fatigue in hunting, exposure of the feet to snow and ice, etc.; an inflammation of the tissue beneath the epidermis covering the plantar tubercles, sometimes ending in abscesses. [L, 41.]

**AGGRAVEMENT** (Fr.), n.  $A^2g-gra^2v$ -ma<sup>2</sup>n<sup>2</sup>. See AGGRAVÉE.

**AGGREGAT** (Ger.), n.  $A^2g-gre^2g$ -a<sup>2</sup>t. An aggregation.—**A<sup>h</sup>körnchenhaufen**. The masses of granular matter contained in the protoplasm of the white blood-corpuscles. [K, 13].—**A<sup>z</sup>ustand**. The manner in which molecules are bound together. [L, 50.] See AGGREGATION and *Molecular AFFINITY*.

**AGGREGATÆ** (Lat.), n. f. pl.  $A^2g(a^2g)-gre^2g$ -a(a<sup>2</sup>)/te(ta<sup>2</sup>-e<sup>2</sup>). Ger., *Hauptblüte*. In Eichler's classification of dicotyledonous plants, an order (corresponding to a cohort in other systems) of gamopetalous plants, having the following characters: the stamens are generally adherent to the corolla, and do not correspond in number with the lobes of the latter, being usually limited to two;

the calyx is small or wanting; and the ovary is inferior. It comprises the following families (orders in other systems): *Caprifoliaceæ*, *Rubiaceæ*, *Valerianaceæ*, *Dipsaceæ*, and *Compositæ*. [B, 35.]

**AGGREGATE**, n.  $A^2g-gre^2g$ -at. From *aggregare*, to add to a flock. Ger., *Aggregat*. A mass or assemblage of homogeneous elements. [A, 315; L, 56.]

**AGGREGATE**, adj.  $A^2g-gre^2g$ -at. Lat., *aggregatus*. Fr., *aggrégé*. Ger., *aggregirt*, *angehäuft*. It., *aggregato*. Sp., *agregado*. 1. United into a common organized mass. [L, 56.] 2. In botany, collected into one mass or bundle. [B.] Cf. AGGREGATÆ and AGGREGATEN. 3. Agminate (q. v.). [J.] 4. A term used by Darwin (in 1875) to characterize the condition of the protoplasm of the cells in the tentacles of the sun-dew after its collection into ameboid masses, due to excitation. [J.]

**AGGREGATEN** (Ger.), n. pl.  $A^2g-gre^2g$ -a<sup>2</sup>t-e<sup>2</sup>n. Aggregate flowers (those composed of florets united by means of the receptacle or calyx). [A, 315.]

**AGGREGATI** (Lat.), n. m. pl.  $A^2g(a^2g)-gre^2g$ -a(a<sup>2</sup>)/ti(te). In botany, fruits that are aggregated. [Lindley (L, 73).]

**AGGREGATION**, n.  $A^2g-gre^2g$ -a'shu<sup>3</sup>n. Lat., *aggregatio*. Fr., *aggrégation*. Ger., *Aggregation*, *Aggregat*, *Zusammenhäufung*. It., *aggregazione*. Sp., *agregación*. The collection of matter into well-defined masses. [J.] See A. ELEMENTS, A. MASSES, and AFFINITY.—**A<sup>s</sup>form** (Ger.). See AGGREGATzustand.

**AGGREGATIVILEN** (Ger.), n. pl.  $A^2g-gre^2g$ -a<sup>2</sup>t-ef/pi<sup>2</sup>l-e<sup>2</sup>n. See *PILULE aggregativæ*.

**AGGREGATUS** (Lat.), adj.  $A^2g(a^2g)-gre^2g$ -a(a<sup>2</sup>)/tu<sup>2</sup>s(tu<sup>2</sup>s). Agggregate. [B.]

**AGGUR, AGHA LUCHIE, AGHAR**, n's. Oriental names for aloes-wood. [L, 105.]

**AGHEUSTIA** (Lat.), n. f.  $A^2g(a^2g)-hu^2s'chi^2(ti)^2$ -a<sup>2</sup>. See AGEUSTIA.

**AGHIL**, n. An East Indian name for aloes-wood. [B, 78.]

**AGHOUL** (Pers.). See ALAGI.

**AGI**, n. A West Indian name for the red pepper. [L, 78.]

**AGIAHALID, AGIHALID**, n's. East Indian names for the Indian thorn, probably a species of *Prunus*. The fruit is bitter and styptic, and the leaves are sour and astringent. [L, 97.]

**AGILA-WOOD**, n.  $A^2g-la^2$ -wu<sup>2</sup>d. See ALOES-WOOD.

**AGILOCHUM** (Lat.), n. n.  $A^2g(a^2g)-i^2l'o$ -ku<sup>2</sup>m(ch<sup>2</sup>u<sup>2</sup>m). See ALOES-WOOD.

**AGININ**, n.  $A^2j/i^2n$ -i<sup>2</sup>n. Fr., *aginine*. Ger., *Aginin*. A yellow substance obtained by the decomposition of axinic acid. [L, 63.]

**AGIOXYLUM** (Lat.), n. n.  $A^2j(a^2g)-i^2o$ -x'i<sup>2</sup>(u<sup>2</sup>l)-u<sup>2</sup>m(u<sup>2</sup>m). From *ἄγιος*, sacred, and *ξύλον*, wood. Lignum vitæ. [L, 30.]

**AGIS**, n. An old name for the thigh. [L, 84.]

**AGITATEUR** (Fr.), n.  $A^2$ -zhi<sup>2</sup>-ta<sup>2</sup>-tu<sup>2</sup>r. See AGITATOR.

**AGITATION**, n.  $A^2j-i^2t$ -a'shu<sup>3</sup>n. Gr., *δύνημα*. Lat., *agitatio*. Fr., *agitation*. Ger., *Aufgeregtheit*, *Erschütterung*, *Bewegung*. It., *agitazione*. Sp., *agitación*. 1. In pharmacy, a shaking or stirring. 2. A constant and fatiguing motion of the body; the restlessness of severe fevers. See JACTITATION. 3. A perturbed state of mind. [a, 8; D; L, 43, 49.]

**AGITATOR**, n.  $A^2j/i^2t$ -a-to<sup>2</sup>r. Fr., *agitateur*. A glass rod for stirring liquids; any apparatus for shaking or stirring. [L.]

**AGITATORIUS** (Lat.), adj.  $A^2j(a^2g)-i^2t$ -a(a<sup>2</sup>)-to<sup>2</sup>-ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Convulsive. [L, 45.] In the pl., *agitorii*, used as a n., convulsive diseases. [L, 84.]

**AGITÉ** (Fr.), n.  $A^2$ -zhe-ta. An insane person who, on account of restlessness, needs to be restrained. [L, 49.]

**AGLACTATION**, n.  $A^2g-la^2$ -ka'ta'shu<sup>3</sup>n. Lat., *aglactatio*. Fr., *aglactation*. See AGALACTIA.

**AGLAIA** (Lat.), n. f.  $A^2g(a^2g)-la(la^2)/i^2$ -a<sup>2</sup>. Gr., *ἀγλαία*, splendor. A genus of meliaceous trees. [L, 67].—**A. edulis**. An edible species found in Asia and Oceania. [L, 49].—**A. odorata**. A species the flowers of which are used in China to perfume tea. [L, 49.]

**AGLANDEAU** (Fr.), n.  $A^2g-la^2$ -nd-o. A kind of olive. [L, 67.]

**AGLAOPHOTIS** (Lat.), n. f.  $A^2g(a^2g)-la(la^2)-o$ -fo'ti<sup>2</sup>s. Gen., *aglaophot'idos*. Gr., *ἀγλαοφῶτις*. Fr., *aglaofotis*. The *Pæonia officinalis*. [L, 47, 50, 105.]

**AGLAR** (Ger.), n.  $A^2g-la^2$ r. The columbine. See AQUILEGIA. [L, 46].—**A<sup>h</sup>kraut**. The rest-harrow (*Ononis arvensis*). [A, 315.]

**AGLAURIDÆ** (Lat.), n. f. pl.  $A^2g(a^2g)-la^2-u^2(u^2)/ri^2d$ -e(a<sup>2</sup>-e<sup>2</sup>). A family of *Hydrozoa* of the order *Trachomedusæ*. [E. R. Lankester (B, 77).]

**AGLAXIS** (Lat.), n. f.  $A^2g(a^2g)-la^2$ -x(la<sup>2</sup>x)/i^2s. See AGALACTIA.

**AGLEI** (Ger.), n.  $A^2g/li$ . See AGLAR.

**AGLERKRAUT** (Ger.), n.  $A^2g-le^2r$ -kra<sup>2</sup>-ut. The thorny rest-harrow (*Ononis spinosa*). [A, 305.]

**AGLET, AGLETTE**, n's.  $A^2g/le^2t$ . Old names for an anther. [L, 73.]

**AGLEY** (Ger.), n.  $A^2g/li$ . 1. The columbine. See AQUILEGIA. 2. A whitlow. [A, 305.]

**AGLIA** (Lat.), n. f.  $A^2g(a^2g)/li^2$ -a<sup>2</sup>. Fr., *aglie*. See ÆGIAS.

**AGLIDION, AGLIS, AGLITHES** (Lat.), n's n. and f.  $A^2g(a^2g)-li^2d/i^2$ -on,  $a^2g(a^2g)/li^2$ s,  $a^2g(a^2g)-li$ (le)/thez(the<sup>2</sup>s). Gen's, *aglid'i*, *aglit'hos*, *aglit'hum*. Gr., *ἀγλιδ* (gen., *ἀγλιδος*). A head of garlic. [A, 311.]

**AGLIO** (It.), n.  $A^2j/yi^2$ -o. Garlic (*Allium sativum*). [D.]

**AGLOBULIA** (Lat.), n. f.  $A^2g(a^2g)-lo^2b$ -u<sup>2</sup>(u)/li^2-a<sup>2</sup>. From a

priv., and *globulus*, a globule. Fr., *aglobulie*. Ger., *Aglobulie*. It., *Sp., aglobulia*. A deficiency in the number of the red globules of the blood, with an increase in the quantity of the serum; especially, as used by Beau, that condition occurring as a sequel of long-continued dyspepsia. [D. 72, 74.]

**AGLOSSA** (Lat.), n. n. pl. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s/sa<sup>3</sup>. From a priv., and *γλωσσα*, the tongue. Animals in which the tongue is not developed. [L. 66.]

**AGLOSSE** (Fr.), adj. A<sup>3</sup>-glo<sup>2</sup>s. See AGLOSSUS.

**AGLOSSIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s/si<sup>2</sup>-a<sup>3</sup>. Gr., *ἀγλωσσία*. Fr., *aglossie*. Ger., *Aglossie*, *Zungenmangel*. It., *aglossia*. Sp., *aglosia*. 1. Dumbness. 2. Absence of the tongue. 3. Impairment of the faculty of speech in aged persons. [A. 305; L. 40, 50.]

**AGLOSSOSTOMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s-so<sup>2</sup>s/to-ma<sup>3</sup>. Gen., *aglossostom'atis*. From a priv., *γλωσσα*, the tongue, and *στόμα*, the mouth. A monstrosity characterized by the presence of the mouth without the tongue. [L. 50, 63.]

**AGLOSSOSTOMATOGRAPHIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s/-so-sto<sup>2</sup>m''a<sup>3</sup>t-o-gra<sup>2</sup>f(i)gr(a<sup>3</sup>f)/i<sup>2</sup>-a<sup>3</sup>. Fr., *aglossostomatographie*. Ger., *aglossostomatographie*. It., *aglossostomatografia*. Sp., *aglossostomatografia*. A treatise on aglossostomata. [L. 44.]

**AGLOSSOSTOMIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s-so-sto<sup>2</sup>/mi<sup>2</sup>-a<sup>3</sup>. Fr., *aglossostomie*. Ger., *Aglossostomie*. It., *aglossostoma*. The presence of a mouth without a tongue. [A. 305; L. 50.]

**AGLOSSOSTOMOGRAPHIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s/-so-sto<sup>2</sup>m''o-gra<sup>2</sup>f(i)gr(a<sup>3</sup>f)/i<sup>2</sup>-a<sup>3</sup>. See AGLOSSOSTOMATOGRAPHIA.

**AGLOSSUS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>s/si<sup>2</sup>s(su<sup>3</sup>s). Gr., *ἀγλωσσοσ*. Ger., *zungelos*. Tongueless; as a n., a person without a tongue. [L. 50.]

**AGLOTTIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lo<sup>2</sup>t/ti<sup>2</sup>-a<sup>3</sup>. See AGLOSSIA.

**AGLUMACEOUS**, adj. A<sup>2</sup>g-lu<sup>2</sup>-ma<sup>3</sup>/shu<sup>3</sup>s. From a priv., and *gluma*, a husk. In botany, devoid of glumes. [B.]

**AGLUTITIO** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-lu<sup>2</sup>(lu)-ti<sup>2</sup>/shi<sup>2</sup>(ti<sup>2</sup>)-o. See AGGLUTITIO.

**AGLYPHODONTIA** (Lat.), n. n. pl. A<sup>2</sup>g(a<sup>3</sup>g)-li<sup>2</sup>f(lu<sup>3</sup>f)-o-do<sup>2</sup>n'-shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>3</sup>. From a priv., *γλῶφία*, a notch, and *ὀδούς*, a tooth. In zoology, a division of the *Ophidia* having none of the maxillary teeth grooved. [L. 66.]

**AGMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)/ma<sup>3</sup>. Gen., *ag'matos* (-tis). From *ἄγμα*, a fragment. See AGMOS.

**AGMATOLOGIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ma<sup>2</sup>t(ma<sup>3</sup>t)-o-lo<sup>2</sup>/ji<sup>2</sup>-(gi<sup>2</sup>)-a<sup>3</sup>. Fr., *agmatologie*. Ger., *Agmatologie*. It., *agmatologia*. From *ἄγμα*, a fracture, and *λόγος* (see -logy<sup>2</sup>). A treatise or description of fractures. [L. 41, 50.]

**AGME** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)/me(ma). Gr., *ἄμμή*. See AGMOS.

**AGMINA** (Lat.), n. n., pl. of *agmen*. A<sup>2</sup>g(a<sup>3</sup>g)/mi<sup>2</sup>n-a<sup>3</sup>. Collected multitudes.—A. *digitorum manus*. The phalanges of the fingers. [L. 45.]

**AGMINALIS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-mi<sup>2</sup>n-a(a<sup>3</sup>)/li<sup>2</sup>s. Agmina'e. [J.]

**AGMINATE**, **AGMINATED**, adj's. A<sup>2</sup>g/mi<sup>2</sup>n-at, -at-e<sup>2</sup>d. Lat., *agminatus* (from *agmen*, an array). Fr., *agminé*. Ger., *agminirt*. Syn.: *aggregate*. Grouped (said especially of the intestinal glands). [J; L. 66.] See *Peyer's GLANDS*.

**AGMINATION**, n. A<sup>2</sup>g-mi<sup>2</sup>n-a'shu<sup>3</sup>n. An arrangement in groups.

**AGMOS** (Lat.), n. m. A<sup>2</sup>g(a<sup>3</sup>g)/mo<sup>2</sup>s. Gr., *ἄγμος* [Hippocrates (A. 311).] A fracture. [L. 63.]

**AGNACAL**, **AGNACAT**, n's. The *Persea gratissima*. The pulp of the fruit is said to be aphrodisiac. [L. 63, 97.]

**AGNAGUIN**, n. A plant used in Guinea as a vulnerary. [A. 105.]

**AGNAIL**, n. A<sup>2</sup>g'nal. A.-S., *agnægl*. See HANGNAIL.

**AGNAKOPON**, n. According to Mérat and De Lens, the equivalent of a Greek word used by Dioscorides for the *Anagyris foetida*. [L. 105.]

**AGNALAHOLZ** (Ger.), n. A<sup>3</sup>g-na<sup>3</sup>/la<sup>3</sup>-ho<sup>3</sup>ltz. See ALOES-WOOD.

**AGNATA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-na(na<sup>3</sup>)/ta<sup>3</sup>. See ADNATA.

**AGNATEN** (Ger.), n. pl. A<sup>3</sup>g-na<sup>3</sup>/e<sup>2</sup>n. Monstrosities characterized by an approximation of parts that are normally separated. [A. 305.]

**AGNATHIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-na(na<sup>3</sup>)/thi<sup>2</sup>-a<sup>3</sup>. From a priv., and *γνάθος*, the jaw. Fr., *agnathie*. Ger., *Agnathie*, *Kiefermangel*. Congenital absence of one or both of the jaws. [L. 41, 44.]

**AGNATHUS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)/na(na<sup>3</sup>)-thu<sup>3</sup>s(thu<sup>3</sup>s). Fr., *agnathe*. Affected with agnathia (q. v.). [L. 50.]

**AGNAYL**, **AGNAYLE**, n's. A<sup>2</sup>g'nal. See HANGNAIL.

**AGNEAU DE SCYTHIE** (Fr.), n. A<sup>3</sup>n-yo-d'se-te. See CIBOTUM BAROMETZ.

**AGNELE**, n. A<sup>2</sup>g'nel. See HANGNAIL.

**AGNESQUELLE** (Ger.), n. A<sup>3</sup>g'ne<sup>3</sup>/s-kwe<sup>2</sup>l-le<sup>2</sup>. A cold alkaline spring in the Hungarian town of Moha. [A. 305; L. 57.]

**AGNIL**, n. A Malay name for the indigo plant. [L. 97.]

**AGNINUS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-ni(ne)/nu<sup>3</sup>s(nu<sup>3</sup>s). From *agnus*, a lamb. Amniotic.—*Agnina membrana*, *Agnina tunica*. See AMNION.

**AGNŒA**, **AGNOÏA** (Lat.), n's f. A<sup>2</sup>g(a<sup>3</sup>g)-ne'(no'e<sup>2</sup>)-a<sup>3</sup>, -noi'a<sup>3</sup>. Gr., *ἀγνοία* (from *ἀγνοῦν*, not to perceive). Fr., *agnoie*. Loss of the perceptive power from disease; that condition of a fever patient in which he does not recognize his friends. [Galen (L. 84).]

**AGNUS CASTUS** (Lat.), n. m. A<sup>2</sup>g(a<sup>3</sup>g)/nu<sup>3</sup>s(nu<sup>3</sup>s)-ka<sup>3</sup>st(ka<sup>3</sup>st')-u<sup>3</sup>s(u<sup>3</sup>s). See VITEX a. c.

**AGNUS CHRISTUS** (Lat.), n. m. Kri<sup>2</sup>st(ch<sup>2</sup>ri<sup>2</sup>st')/u<sup>3</sup>s(u<sup>3</sup>s). See RICINUS *communis*.

**AGNUS SCYTHICUS** (Lat.), n. m. Si<sup>2</sup>th(sku<sup>3</sup>th)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Fr., *agneau de Scythie*. See CIBOTUM *Barometz*.

**AGOAEDATE**, n. A Brazilian variety of rum. [L. 30.]

**AGOAS BELLAS** (Port.), n. pl. A<sup>3</sup>gwa<sup>3</sup>-be<sup>2</sup>l'ya<sup>3</sup>z. A sulphurous spring near Lisbon. [L. 63.]

**AGOGE** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o'je(ga). Gen., *ago'ges*. Gr., *ἀγωγή*. Method in the treatment of disease. [Galen (A. 311).]

**AGOMPHIANS**, n. pl. A<sup>2</sup>g-o<sup>2</sup>m-fi<sup>2</sup>-a<sup>2</sup>nz. From a priv., and *γομφίος*, a molar tooth. Fr., *agomphes*. Ehrenberg's name for rotifers whose jaws have no teeth. [L. 108.]

**AGOMPHIASIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>m-fi<sup>2</sup>-a(a<sup>3</sup>)/si<sup>2</sup>s. Gen., *agomphia'seos*. See AGOMPHOSIS.

**AGOMPHIOUS**, adj. A<sup>2</sup>g-o<sup>2</sup>m-fi<sup>2</sup>-u<sup>3</sup>s. Gr., *αγόμφιος*. Fr., *agomphe*. Toothless. [A. 311.]

**AGOMPHOSIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>m-fi<sup>2</sup>/si<sup>2</sup>s. Gen., *agompho'seos*. From a priv., and *γομφίος* (see GOMPHOSIS). Fr., *agomphose*. Ger., *Agomphose*. It., *agomfosi*. Sp., *agomfosis*. Loosening of the teeth from disease. [A. 305.]

**AGOMPHIASIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>m-pi<sup>2</sup>-a(a<sup>3</sup>)/si<sup>2</sup>s. See AGOMPHOSIS.

**AGON** (Lat.), n. m. A(a<sup>3</sup>)/go<sup>2</sup>n. Gen., *ago'nos* (-nis). Gr., *ἀγών*. 1. The death-struggle. [A. 305.] See AGONY. 2. An Egyptian name for the *Cichorium intybus*. [Dioscorides (L. 105).]

**AGONÉ** (Fr.), adj. A<sup>3</sup>-go-na. See AGONIOUS.

**AGONIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o'ni<sup>2</sup>-a<sup>3</sup>. From *ἀγωνία*, a struggle (1st def.), *ἀγώνος*, barren (2d def.). 1. The death-struggle. See AGONY. 2. Sterility. [L. 84.]

**AGONIADA**, n. See AGORIADA.

**AGONIADIN**, n. A<sup>2</sup>g-o<sup>2</sup>n-i'a<sup>2</sup>d-i<sup>2</sup>n. See AGORIADIN.

**AGONIC**, adj. A<sup>2</sup>g-o<sup>2</sup>n-i<sup>2</sup>ck. See AGONIOUS.

**AGONIE** (Fr., Ger.), n. A<sup>3</sup>-gon-e, -e'. See AGONY.

**AGONIOUS**, adj. A<sup>2</sup>g-o'ni<sup>2</sup>-u<sup>3</sup>s. Gr., *ἀγώνιος*. Fr., *agoné*. Without an angle. [A. 311; L. 63.]

**AGONISANT** (Fr.), adj. A<sup>3</sup>-go-ne-za<sup>3</sup>n<sup>2</sup>. In a dying condition. [A. 44.]

**AGONISIRT** (Ger.), adj. A<sup>3</sup>-go<sup>2</sup>n-ez-ert'. See AGONISANT.

**AGONISIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>n-i<sup>2</sup>s-i<sup>2</sup>s. Gr., *ἀγώνισις*. See AGONY.

**AGONISMA**, **AGONISMUS** (Lat.), n's n. and m. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>n-i<sup>2</sup>z(i<sup>2</sup>s)/ma<sup>3</sup>, -mu<sup>3</sup>s(mu<sup>3</sup>s). Gen., *agonis'matos* (-tis), *agonismi*. Gr., *ἀγωνισμα*, *ἀγωνισμός*. See AGONY.

**AGONISTA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>n-i<sup>2</sup>st-a<sup>3</sup>. See AGONY.

**AGONISTIC**, adj. A<sup>2</sup>g-o<sup>2</sup>n-i<sup>2</sup>st-i<sup>2</sup>ck. Lat., *agonisticus*. Ger., *agonistisch*. Sp., *agónico*. Pertaining to, caused by, or occurring during, the death-agony.

**AGONISTICA**, **AGONISTICE**, **AGONISTICON**, **AGONISTICUM** (Lat.), n's f. and n. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>n-i<sup>2</sup>st-i<sup>2</sup>ck-a, -i<sup>2</sup>-seka), -o<sup>2</sup>n, -u<sup>3</sup>m(u<sup>3</sup>m). Cold water considered as an antipyretic. [Ægletus (L. 53).]

**AGONIZANS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>n-i<sup>2</sup>z-a<sup>2</sup>nz(a<sup>3</sup>ns). Moribund. [L. 50.]

**AGONOS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)/o<sup>2</sup>n-o<sup>2</sup>s. Gr., *ἀγονος*. 1. Unborn. 2. Unfruitful, impotent, barren. [Hippocrates (A. 311).] 3. Terminating in the death of the mother undelivered (said of labor). [A. 311.] 4. Childless. [A. 311.]

**AGONOUS**, adj. A<sup>2</sup>g-o<sup>2</sup>n-u<sup>3</sup>s. See AGONOS.

**AGONY**, n. A<sup>2</sup>g-o<sup>2</sup>n-i<sup>2</sup>. Gr., *ἀγώνία*. Lat., *agonia*. Fr., *agonie*. Ger., *Schmerz*, *Angst* (1st def.), *Todeskampf* (2d def.). It., *agonia*. Sp., *agonia*. 1. Extreme suffering, bodily or mental. [D. 20.] 2. The final bodily struggle that precedes death; the death-struggle. [D. 3.]

**AGOR**, n. A Hindu name for aloes-wood. [L. 105.]

**AGORAPHOBIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>r-a<sup>3</sup>-fo'bi<sup>2</sup>-a<sup>3</sup>. From *ἀγορά*, a market-place, and *φόβος*, fear. Fr., *agoraphobie*, *peur des espaces* [Legrand du Sault]. Ger., *Agoraphobie*, *Platzangst*, *Platzschwindel*. It., *agorafobia*, *angoscia delle piazze*. Syn.: *kenophobia* [Gélinau]. Morbid terror at being alone in a large open space, often accompanied with vertigo. [Westphal (A. 10).]

**AGORIADA** (Port.), n. A<sup>3</sup>-go-re-a'da<sup>3</sup>. A Brazilian name for agoriadin (q. v.) and for the plant that furnishes it.

**AGORIADIN**, n. A<sup>2</sup>g-o<sup>2</sup>r-i'a<sup>2</sup>d-i<sup>2</sup>n. Fr., *agoriadine*. A crystalline substance, probably a glucoside, C<sub>16</sub>H<sub>14</sub>O<sub>6</sub>, closely allied to arbutin, extracted by Peckolt from the bark of *agoriada* (*Plumieria lancifolia*); used in Brazil as a remedy for intermittent fever. [B. 2; L. 49.]

**AGOSTOS**, **AGOSTUS** (Lat.), n's m. A<sup>2</sup>g(a<sup>3</sup>g)-o<sup>2</sup>st-o<sup>2</sup>s, -u<sup>3</sup>s(u<sup>3</sup>s). Gr., *ἀγοστός*. 1. The palm of the hand. 2. The forearm. [L. 84.]

**AGOUMAN**, n. See SOLANUM *nigrum*.

**AGRA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)/ra<sup>3</sup>. Gr., *ἀγρα*. 1. A seizure (generally used as a suffix—see -agra<sup>3</sup>). 2. See Bois de *senteur*.

**AGRACARAMBA**, n. A Japanese sweet-smelling wood. [L. 105.]

**AGRAFE** (Fr.), n. A<sup>3</sup>-gra<sup>3</sup>f. 1. A hook-like instrument for holding the lips of a wound in apposition (e. g., one devised by Valentin for use after the operation for hare-lip); also Malgaigne's

hooks for the treatment of fractured patella. [L. 49, 55.] 2. In the pl., a's, in botany, the ham (hooked spines) of plants. [B.]

**AGRAFFE** (Fr.), n. A<sup>3</sup>-gra<sup>2</sup>f. See **AGRAFE**.

**AGRAHALID** (Ar.), n. See **AGIAHALID**.

**AGRAMMATISM**, n. A<sup>2</sup>g-ra<sup>2</sup>m<sup>2</sup>ma<sup>2</sup>t-i<sup>2</sup>zm. Lat., *agrammatismus* (from *ἀγράμματος*, unable to read or write). Syn.: *akathaphasia*. A form of aphasia characterized by "inability to form words grammatically and to arrange them in sentences syntactically." [Kussmaul (A, 370).] Cf. **PARAPHASIA**.

**AGRANDISSEMENT** (Fr.), n. A<sup>3</sup>-gra<sup>2</sup>nd-es-ma<sup>2</sup>n<sup>2</sup>. Magnification, amplification (with a lens). [L. 52.]

**AGRAPHIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ra<sup>2</sup>(ra<sup>3</sup>/fi<sup>2</sup>-a<sup>3</sup>). From *a* priv., and *γραφία*, the art of writing. Fr., *agraphie*. Ger., *Aggraphie*. Inability to write, due to disease of the central nervous system. "In attempting to write, sometimes only lines are made, sometimes separate letters, but not words; or words may be written, but not to form sentences." [A, 370.]—**A. literalis**. A variety in which letters can not be formed, but only pot-hooks and hangers. [D, 18.]—**A. verbalis**. A variety in which, while the letters may be correctly formed, the words into which they are joined are either fanciful or entirely inappropriate. [D, 18.]

**AGRÉGAT, AGREGATION** (Fr.), n's. A<sup>3</sup>-gra-ga<sup>3</sup>, -ga<sup>3</sup>-sho<sup>2</sup>n<sup>2</sup>. See **AGGREGATE** and **AGGREGATION**.

**AGRÉGÉ** (Fr.), adj. A<sup>3</sup>-gra-zha. 1. Aggregate. 2. As a n., an adjunct professor. [A, 321; B.]

**AGRELCOSIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-re<sup>2</sup>l-ko'si<sup>2</sup>s. See **AGRIELCOSIS**.

**AGRÉMIE** (Fr.), n. A<sup>3</sup>-gra-me. The alteration of the blood that takes place in gout; also gout itself. [L, 82.]

**AGRENAS** (Fr.), n. A<sup>3</sup>-gran-a<sup>3</sup>. A Provence name for the wild plum-tree. [L, 41.]

**AGREST** (Ger.), n. A<sup>3</sup>-gre<sup>2</sup>st'. The juice of unripe fruit, especially of grapes; verjuice. [A, 305, 315.]—**A'ampfer**. The *Rumex scutatus*. [A, 305.]—**A'wasser**. A drink made by mixing verjuice with sugar and water. [L, 30.]

**AGRESTEN**, n. An old name for cream of tartar. [L, 53.]

**AGRESTIS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-re<sup>2</sup>st'i<sup>2</sup>s. From *ager*, a field. Fr., *agreste*. Ger., *Acker-* (in compos.). In botany, growing spontaneously in cultivated fields; also wild, as opposed to *sativus* (cultivated). [B.]

**AGRIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-a<sup>3</sup>. From *ἀγριος*, wild. 1. The holly. 2. A malignant pustule. [L, 84.]

**AGRIACANTHA, AGRICANTHA** (Lat.), n's f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-a<sup>2</sup>k(a<sup>3</sup>k)-a<sup>2</sup>n(a<sup>3</sup>n)/tha<sup>3</sup>, -ri<sup>2</sup>k-a<sup>2</sup>n(a<sup>3</sup>n)/tha<sup>3</sup>. From *ἀγριος*, wild, and *ἀκανθα*, a prickly plant. A plant supposed to be the *Cnicus syriacus*. [C. Sprengel (A, 322).]

**AGRIAMPELOS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-a<sup>2</sup>m(a<sup>3</sup>m)/pe<sup>2</sup>-o<sup>2</sup>s. Gr., *ἀγριαμπελος*, *ἀμπελος ἀγρία* (ἡ γενική). An ancient name for a wild creeping plant, supposed to have been the white or black bryony. [A, 311; L, 84.]

**AGRIE** (Fr.), n. A<sup>3</sup>-gre. The gout. [L, 82.] Scrofula. [A, 310.]

**AGRIELÆA, AGRIELAIA** (Lat.), n's f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-e<sup>2</sup>l-e'(a<sup>3</sup>e<sup>2</sup>)-a<sup>3</sup>, -a(a<sup>3</sup>)i<sup>2</sup>-a<sup>3</sup>. From *ἀγριος*, wild, and *ἐλαία*, the olive-tree. The wild olive-tree. [L, 84.]

**AGRIELCOSIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-e<sup>2</sup>l-ko'si<sup>2</sup>s. Gen., *agri-elco'seos*. From *ἀγριος*, wild, and *ἐκκοσις*, ulceration. Fr., *agrielcose*. A malignant ulceration. [E; J, 41, 50.]

**AGRIFOLIUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-fo'li<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). Ger., *Stecheiche*. It., *agrifoglio*. Sp., *agrifolio*. Syn.: *aquifolium*. The holly. [L, 30, 51, 102.]

**AGRIFOUS** (Fr.), n. A<sup>3</sup>-gri<sup>2</sup>-f-u. A popular name in the south of France for the *Ilex aquifolium*. [L, 49.]

**AGRIMONIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-mo'ni<sup>2</sup>-a<sup>3</sup>. From *ἀγρός*, a field, and *μόνος*, alone (because pre-eminent among the plants of the fields as a medicine). Fr., *aignemoine*. Ger., *Ackermennig*, *Odermennig*. It., Sp., *agrimonia*. Agrimony, liverwort; a genus of perennial rosaceous plants, of the sub-order *Roseae*, tribe *Rosideae*, distinguished from the roses by having only two carpels in a dry, prickly calyx. [B, 34; L, 64.]—**A. eupatoria** [Linnaeus]. Fr., *aignemoine*, *eupatoire des Grecs*. Ger., *Wundodermennig*, *Leberklette*, *Steinwurz*. Syn.: *A. officinalis*, *hemp-agrimony*. A species growing wild in the United States and Canada. It is hairy, attains a height of from 1 to 3 feet, and bears small yellow flowers set on very short pedicels. Two sub-varieties have been described: 1. *A. eupatoria hirsuta* [Torrey], smaller and more hairy. 2. *A. eupatoria parviflora* [Hooker], which is less hairy, and has smaller flowers set on longer pedicels. The latter variety is considered by some a distinct species, and called *A. parviflora* [De Candolle], but this name is applied also to a different plant. *A. eupatoria* contains a bitter principle and tannic acid, and is sometimes used as a tonic and astringent. [B, 33; L, 46, 67, 85.]—**A. officinalis**. See *A. eupatoria*.—**A. orientalis**. See *A. repens*.—**A. parviflora** [Aiton]. A species growing in the east-central region of the United States, attaining a height of 3 or 4 feet, bearing a yellow flower, and having an agreeable aromatic odor. The *A. parviflora* of De Candolle is a variety of *A. eupatoria*. [B, 34.]—**A. repens** [Linnaeus]. Fr., *aignemoine rampante*. A creeping species, indigenous to the Levant. [A, 248; D, 92.]—**A. suaveolens** [Pursh]. See *A. parviflora*.—**A. vulgaris**. Fr., *aignemoine vulgaire*. See *A. eupatoria*.—**Aqua agrimonie** [Sard. Ph. (1773)]. Fr., *eau (ou hydrolat) d'aignemoine*. Made by macerating 1 part of agrimony in 2 parts of water, and distilling until two thirds have passed over. [D, 133.]—**Extractum agrimonie aquosum** [Amst. Ph. (1792)]. Fr., *extrait aqueux d'aignemoine*. Aqueous extract of agrimony; made by

boiling 1 part of the herb for 2 hours in 2 parts of water, expressing, decanting, straining, and evaporating until the residue will not ad-

The flower.

The fruit.

AGRIMONIA EUPATORIA. (AFTER DE LANESSAN.)

here to the fingers. [D, 133.]—**Herba agrimonie**. The herb of *A. eupatoria*; used as an astringent and tonic. [B, 97.]

**AGRIMONODES** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-mo-no'dez(de<sup>2</sup>s). Resembling agrimony. [L, 50.]

**AGRIMONY**, n. A<sup>2</sup>g'ri<sup>2</sup>-mo-ni<sup>2</sup>. See **AGRIMONIA** and **AGRIMONIA eupatoria**.—**Hemp a**. See **AGRIMONIA eupatoria**.

**AGRIOCARDAMUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-ka<sup>3</sup>rd'a<sup>2</sup>m-(a<sup>3</sup>m)-u<sup>3</sup>m(u<sup>4</sup>m). From *ἀγριος*, wild, and *κάρδαμον*, the cress. See *NASTURTium aquaticum*.

**AGRIOCASTANUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-ka<sup>3</sup>st(ka<sup>3</sup>st')-a<sup>2</sup>n(a<sup>3</sup>n)-u<sup>3</sup>m(u<sup>4</sup>m). From *ἀγριος*, wild, and *κάστανον*, a chestnut. See *BUNium bulbocastanum*.

**AGRIOCINARA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-si<sup>2</sup>n(ki<sup>2</sup>n)/a<sup>3</sup>-ra<sup>3</sup>. From *ἀγριος*, wild, and *κινάρα*, the artichoke. The wild artichoke. [L, 51.]

**AGRIOCOCCIMELA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-ko<sup>3</sup>k-si<sup>2</sup>(i<sup>2</sup>)-me(ma)/la<sup>3</sup>. From *ἀγριος*, wild, and *κοκκυμυλέα*, the plum-tree. The wild aloe. See *PRUNUS spinosa*.

**AGRIOKRINOPULVER** (Ger.), n. A<sup>3</sup>g-ri<sup>2</sup>-o-kre'no-pul-fe<sup>2</sup>r. From *ἀγριος*, wild, and *κρίνον*, a lily. An irritant fecula made from the root of a species of *Iris*; said to have been used by the Greek women to give their cheeks an enduring red hue. [A, 305; D.]

**AGRIOLEICHEN, AGRIOICHEN** (Lat.), n. m. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-l'i(le<sup>2</sup>/i<sup>2</sup>)-ke<sup>2</sup>n(ch<sup>2</sup>e<sup>2</sup>n), -li(le)/ke<sup>2</sup>n(ch<sup>2</sup>e<sup>2</sup>n). Gr., *ἀγριολεϊχην*. See *LICHEN agrius*.

**AGRIOMELA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-me(ma)/la<sup>3</sup>. From *ἀγριος*, wild, and *μήλον*, an apple. See *PYRUS mala*.

**AGRION** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o<sup>2</sup>n. From *ἀγριος*, wild. An ancient term for a number of plants.

**AGRIOPASTINACA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-pa<sup>3</sup>s(pa<sup>3</sup>s)-ti<sup>2</sup>n(a<sup>3</sup>)ka. From *ἀγριος*, wild, and *pastinaca*, the parsnip. The Canadian saxifrage. [L, 51.]

**AGRIOPHYLLON** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-fi<sup>2</sup>l(fu<sup>2</sup>l)/lo<sup>2</sup>n. From *ἀγριος*, harsh, and *φύλλον*, a leaf. See *PEUCEDANUM*.

**AGRIOPHYMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-fi(fu<sup>2</sup>)ma<sup>3</sup>. Gen., *agriophym'atos*. From *ἀγριος*, malignant, and *φύμα*, a swelling. A malignant swelling. [L, 50.]

**AGRIOPSORIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-so'ri<sup>2</sup>-a<sup>3</sup>. From *ἀγριος*, vehement, and *ψώρα*, the itch. An inveterate itch. [L, 47.]

**AGRIORIGANUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-ri<sup>2</sup>g'a<sup>2</sup>n(a<sup>3</sup>n)-u<sup>3</sup>m(u<sup>4</sup>m). From *ἀγριος*, wild, and *ῥιγανον*, an acrid herb. The wild marjoram. [L, 84.]

**AGRIOS** (Lat.), adj. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o<sup>2</sup>s. See **AGRIUS**, **AGRESTIS**, and **SILVESTRIS**.

**AGRIOSELINUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-se<sup>2</sup>l(i<sup>2</sup>e)/nu<sup>3</sup>m-(nu<sup>4</sup>m). From *ἀγριος*, wild, and *σέλινον*, parsley. See *SMYRNUM olosatrum*.

**AGRIOSTARI, AGRIOSTEARI** (Lat.), n's n. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-sta(sta<sup>3</sup>ri(re), -ste(sta<sup>3</sup>a<sup>3</sup>ri(re)). Gen., *agrioste'atos*. From *ἀγριος*, growing in the fields, and *στέαρ*, dough made of wheat flour. An old name for a species of wild grain (*Triticum creticum*). [L, 63, 84.]

**AGRIOT**, n. A<sup>2</sup>g'ri<sup>2</sup>-ot. Fr., *agriote*. A species of black cherry; used in France for making cherry brandy, etc. [L, 41, 73.]

**AGRIOTHYMYIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>3</sup>g)-ri<sup>2</sup>-o-thi<sup>2</sup>m(thu<sup>2</sup>m)/i<sup>2</sup>-a<sup>3</sup>. From *ἀγριοθύμος*, wild of temper. Fr., *agriothymie*. Ger., *Agriothymie, wilde Gemüthsart*. It., Sp., *agriotimia*. Homicidal insanity. [L, 43.]—**A. ambitiosa**. An irrepressible desire for the extermination of one's own species. [Swediaur (L, 43).]—**A. hydrophobica**. The ferocity shown in rabies. [L, 43.]—**A. reli-**

**giosa.** An overwhelming desire to kill those of a religion different from one's own. [Swediaur (L. 43).]

**AGRIOTIER** (Fr.), n. A<sup>2</sup>-gre-o-te-a. A species of wild cherry-tree. [L. 41.] See **AGRIOT**.

**AGRIPALMA GALLIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>-pa<sup>2</sup>l(pa<sup>2</sup>l)/ma ga<sup>2</sup>(ga<sup>2</sup>l)l<sup>2</sup>s. Fr., *agripaume*. The *Leonurus cardiaca* (q. v.). [L. 84.]

**AGRIPINUS** (Lat.), adj. See **AGRIPPINUS**.

**AGRIPPA** (Lat.), n. m. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p<sup>2</sup>pa<sup>2</sup>. Perhaps from *ἄγριος*, wild, and *ππος*, a horse (because the Greeks often observed that wild foals were born feet foremost). [A. 322.] Others, who write it *ægrippa*, derive it from *æger*, disturbed, and *partus*, labor; and still others take it to be from the Roman family name, one of the Agrippas having been born feet foremost. Sp., *agripa*. A person born feet foremost. [L. 58, 84.]

**AGRIPPINUS** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p<sup>2</sup>pi(pe)/nu<sup>2</sup>s(nu<sup>2</sup>s). Fr., *agrippin*. Sp., *agripin*. Pertaining to an *agrippa* (q. v.) or to a foot presentation. [L. 109.] See **PARTUS** a.

**AGRIUS** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)/ri<sup>2</sup>-u<sup>2</sup>s(u<sup>2</sup>s). Gr., *ἄγριος*, malignant, virulent, severe. [L.] See **LICHEN** a.

**AGROM**, n. An East Indian name for a disease which occurs in Bengal and other parts of India, characterized by roughening and fissuring of the tongue, and sometimes by the development of white spots upon it. [D. 77, 90.]

**AGROMANIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>2</sup>g)-ro-ma(ma<sup>2</sup>)/ni<sup>2</sup>-a<sup>2</sup>. From *ἄγρος*, a field, and *μανία*, madness. Fr., *agromanie*. Ger., *Agromanie*, *Ackerbauschucht*. Sp., *agromania*. An insane passion for agriculture, or simply for living in the country. [D. 77, 98, 112.]

**AGROPHYMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>2</sup>g)-ro-fi(fu<sup>2</sup>)/ma<sup>2</sup>. See **AGRIOPHYMA**.

**AGROPILE** (Fr.), n. A<sup>2</sup>-gro-pel. See **ÆGAGROPILUS**.

**AGROPYRUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>2</sup>g)-ro-pi(pu<sup>2</sup>)/ru<sup>2</sup>m(ru<sup>2</sup>m). Fr., *agropyron*. Ger., *Quecke*. Sp., *agropyron*. A genus of graminaceous plants established by Gärtner, corresponding in part to the genus *Triticum* (q. v.). [D. 12.]—**A. acutum** [Römer and Schultes]. A species the roots of which are used in southern Europe as food for cattle. [D. 8.] It is regarded by some as a variety of *A. (or Triticum) repens*. [A. 264.]—**A. junceum** [P. Beauvais]. *A. lævis-simum*, *A. pungens* [Römer and Schultes]. Regarded by some as varieties of *A. (or Triticum) repens*. [A. 264; D. 8, 90.]—**A. repens** [P. Beauvais]. See **TRITICUM repens**.

**AGROSTÆ** (Lat.), n. f. pl. A<sup>2</sup>g(a<sup>2</sup>g)-ro-st<sup>2</sup>e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *agrostées*. See **AGROSTIDÆ**.

**AGROSTEMMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>2</sup>g)-ro-stē<sup>2</sup>m<sup>2</sup>/ma<sup>2</sup>. Gen., *agrostematos*. From *ἄγρος*, a field, and *στέμμα*, a garland. Fr., *agrostemme*, *nielle*. Ger., *Agrostemma*, *Ackerkrone*, *Raden*. Sp., *agrostema*. The rose-campion; a genus of Caryophyllaceae plants, of the sub-order *Caryophyllineae*, established by Linnaeus; distinguished from the allied genus *Lychnis* by the petals being undivided and not provided with a crown, and by the capsule containing but one cell. [B. 34; D. 12, 114.]—**A. coronaria**. Ger., *Samtnelke*, *Stechnelke*, *Vexirnelke*. A species growing wild in Germany. Two varieties are mentioned: the white-flowered (*A. coronaria alba*) and the double-flowered (*A. coronaria plena*). [D. 114.]—**A. githago** [Linnaeus]. Fr., *alènes*, *nielle*, *nielle des champs* (ou des blés, ou *bâtarde*). Ger., *Rade*, *Kornrade*, *Ackerkimmel*. Syn.: *Githago segetum* [Desfontaines], *Lychnis githago*. The corn-cockle, an herb from 2 to 3 feet high, growing in wheat-fields, bearing large dark-purple flowers, and having purplish-black seeds. [B. 34; D. 12, 90.]—**A. nicaensis**. The Italian corn-cockle. [D. 114.]

**AGROSTEMMINE**, n. A<sup>2</sup>g-ro-stē<sup>2</sup>m<sup>2</sup>/men. Fr., *agrostemmine*. Ger., *Agrostemmin*. Syn.: *githagine*. A crystalline alkaloid obtained from the seeds of the corn-cockle (*Agrostemma githago*). [B. 2.]

**AGROSTEOGRAPHY, AGROSTEOLOGY**, n's. A<sup>2</sup>g-ro-stē<sup>2</sup>-e-o<sup>2</sup>g-ra<sup>2</sup>f-i<sup>2</sup>, -o<sup>2</sup>l'o<sup>2</sup>-j<sup>2</sup>. See **AGROSTOGRAPHY** and **AGROSTOLOGY**.

**AGROSTIDE** (Fr.), n. A<sup>2</sup>-gro-s<sup>2</sup>-ted. See **AGROSTIS**.

**AGROSTIDÆ** (Lat.), n. f. pl. A<sup>2</sup>g(a<sup>2</sup>g)-ro-st<sup>2</sup>i<sup>2</sup>d<sup>2</sup>/e<sup>2</sup>-e(a<sup>2</sup>-e<sup>2</sup>). Fr., *agrostidées*. A tribe of grasses (*Gramineæ*), named from *Agrostis*, the typical genus; distinguished by the paniculate inflorescence and by the spikelet bearing but one flower, which is provided with glumes and thin, soft pales. [B. 34.]

**AGROSTIOGRAPHY**, n. A<sup>2</sup>g-ro-st<sup>2</sup>-i<sup>2</sup>-o<sup>2</sup>g-ra<sup>2</sup>f-i<sup>2</sup>. See **AGROSTOGRAPHY**.

**AGROSTIS** (Lat.), n. f. A<sup>2</sup>g(a<sup>2</sup>g)-ro-st<sup>2</sup>i<sup>2</sup>s. Gen., *agrostidos* (-rost<sup>2</sup>eos). From *ἄγριος* (the name of several different grasses). Fr., *agrostide*. Ger., *Windhalm*, *Strausgras*. A genus of graminaceous plants established by Linnaeus; bent-grass, couch-grass, quitch-grass. [D. 8, 12, 77, 78.]—**A. alba**. Ger., *Fioringras*, *kleine Quecke*. Syn.: *A. stolonifera*. Marsh-bent. [D. 117.]—**A. canina**. Ger., *Hundsstrausgras*. Dog-bent; said to be chewed by dogs and cats for its emetic effect. [D. 8, 117.]—**A. interrupta**. An Austrian species. [D. 12.]—**A. linearis**. A species used in India in the preparation of a refreshing beverage. [D. 108.]—**A. spica venti**. Ger., *Ackerstrausgras*, *Ackerschmiele*, *Thaugras*, *grosse Meddel*. The corn bent-grass, common bent. [A. 315; D. 8.]—**A. stolonifera**. See *A. alba*.—**A. verticillata**. See *ANDROPOGON muricatum*.

**AGROSTOGRAPHER**, n. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>g-ra<sup>2</sup>f-u<sup>2</sup>r. For deriv., see **AGROSTIS**. Lat., *agrostographus*. Fr., *agrostographe*. Sp., *agrostografo*. A writer on grasses; one skilled in agrostography. [D. 109.]

**AGROSTOGRAPHIC**, adj. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>-gra<sup>2</sup>f-i<sup>2</sup>k. Lat., *agrostographicus*. Fr., *agrostographique*. Ger., *agrostographisch*. It., Sp., *agrostografico*. Pertaining to agrostography. [D.]

**AGROSTOGRAPHY**, n. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>g-ra<sup>2</sup>f-i<sup>2</sup>. Lat., *agrostographia*. Fr., *agrostographie*. Ger., *Agrostographie*. It., *agrostografia*. Sp., *agrostografia*. Syn.: *agrostology*. 1. A treatise on the grasses. [D. 9.] 2. Agrostology.

**AGROSTOLOGICAL**, adj. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>-lo<sup>2</sup>-i<sup>2</sup>k-a<sup>2</sup>l. Lat., *agrostologicus*. Fr., *agrostologique*. Ger., *agrostologisch*. It., Sp., *agrostologico*. Pertaining to agrostology. [D. 10.]

**AGROSTOLOGIST**, n. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>-l'o<sup>2</sup>-ji<sup>2</sup>st. Lat., *agrostologus*. Fr., *agrostologiste*. Ger., *Agrostolog*. It., Sp., *agrostologo*. One versed in agrostology.

**AGROSTOLOGY**, n. A<sup>2</sup>g-ro-st<sup>2</sup>-o<sup>2</sup>-l'o<sup>2</sup>-ji<sup>2</sup>. Lat., *agrostologia*. Fr., *agrostologie*. Ger., *Agrostologie*. It., *agrostologia*. Sp., *agrostologia*. The botany of the grasses. [D. 9.]

**AGROSTOPHYLLUM** (Lat.), n. n. A<sup>2</sup>g(a<sup>2</sup>g)-ro-st<sup>2</sup>-o<sup>2</sup>-fi<sup>2</sup>(fu<sup>2</sup>)/lu<sup>2</sup>m(lu<sup>2</sup>m). From *ἄγριος* (see **AGROSTIS**), and *φύλλον*, a leaf. Fr., *agrostophylle*. A genus of orchids indigenous to Java. [D. 10, 117.]

**AGROUELLE** (Fr.), n. A<sup>2</sup>-gru-e<sup>2</sup>l. A corruption of *écrouelles*. 1. A popular term for the prawn, because it was supposed to cause ulcers in the mouths of those who ate it. 2. The blind nettle, or fig-wort, which was commonly believed to be a cure for scrofula (*écrouelles*). [D. 10.]

**AGROUELLES** (Fr.), n. pl. A<sup>2</sup>-gru-e<sup>2</sup>l. 1. A name by which scrofula nodosa is known in certain parts of France. 2. Small aquatic worms. [D. 106, 108.]

**AGROUETTE** (Fr.), n. A<sup>2</sup>-gru-e<sup>2</sup>t. See **AGROUELLE**.

**AGRUMI** (It.), n. pl. A<sup>2</sup>-gru-me. A general name for lemons and oranges. [D. 114.]

**AGRUMINA** (Lat.), n. n. pl. A<sup>2</sup>g(a<sup>2</sup>g)-ru<sup>2</sup>(ru)/mi<sup>2</sup>-n-a<sup>2</sup>. An old name for leeks and onions. [D. 90, 100.]

**AGRUNA, AGRUNELA** (Lat.), n's f. A<sup>2</sup>g(a<sup>2</sup>g)-ru<sup>2</sup>(ru)/na<sup>2</sup>, -ne(na)/la<sup>2</sup>. See *PRUNUS spinosa*.

**AGRYPNA, AGRYPNE** (Lat.), n's f. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/i(e)na<sup>2</sup>, -ne(na). A kind of swelling of the head; perhaps from *agrypnia*, sleeplessness. [D. 80.]

**AGRYPNETIC**, adj. A<sup>2</sup>g-ri<sup>2</sup>p-ne<sup>2</sup>t-i<sup>2</sup>k. Lat., *agrypneticus* (see **AGRYPNIA**). Ger., *agrypnetisch*. 1. Inclined to sleeplessness, incapable of sleeping. [A. 305; D. 80.] 2. Preventing sleep. [A. 305.]

**AGRYPNIA** (Lat.), n. f. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/ni<sup>2</sup>-a<sup>2</sup>. Gr., *ἀγρυπνία* (from *ἄγριος*, and *πνιμι*, sleep). Fr., *agrypnie*. Ger., *Agrypnie*. Sleeplessness. [D. 75.]—**A. excitata**. Sleeplessness from mental excitement. [D. 90.]—**A. pertassa**. Sleeplessness due to external disquieting influences. [D. 90.]—**A. senilis**. The sleeplessness of aged persons. [D. 90.]

**AGRYPNICUS** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/ni<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). See **AGRYPNETIC**.

**AGRYPNOCOMA** (Lat.), n. n. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/no<sup>2</sup>-ko<sup>2</sup>-ma<sup>2</sup>. Gen., *agrypnocomas*. For deriv., see **AGRYPNIA** and **COMA**. Fr., *agrypnocome*. Ger., *Wachschlafsucht*. See **COMA-vigil**.

**AGRYPNODES** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/no<sup>2</sup>-dez(de<sup>2</sup>s). Gr., *ἀγρυπνώδης*. Fr., *agrypnode*. Accompanied by sleeplessness; as a n., a fever that prevents sleep. [D. 10, 80, 90.]

**AGRYPNOS** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/no<sup>2</sup>s. Gr., *ἀγρυπνος*. Sleepless. [A. 322.]

**AGRYPNOTICA** (Lat.), n. n. pl. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/no<sup>2</sup>t-i<sup>2</sup>k-a<sup>2</sup>s. Fr., *agrypnotiques*. Ger., *schlafraubende Mittel*, *Wachmittel*. Agrypnotics; measures or drugs that prevent sleep. [A. 305; D. 90.]

**AGRYPNUS** (Lat.), adj. A<sup>2</sup>g(a<sup>2</sup>g)-ri<sup>2</sup>p(ru<sup>2</sup>p)/nu<sup>2</sup>s(nu<sup>2</sup>s). See **AGRYPNOS**.

**AGTSTEIN** (Ger.), n. A<sup>2</sup>g-t<sup>2</sup>stin. 1. Amber. 2. The agate. [A. 1; D. 12.]

**AGUA** (Sp.), n. A<sup>2</sup>-g<sup>2</sup>wa<sup>2</sup>. Water; in pharmacy, a medicated water, or distilled water.—**A. acerada**. Water impregnated with iron filings. [D. 101.]—**A. ácida gaseosa**, *A. acidula*. 1. Carbonic-acid water. 2. Any sparkling mineral water. [D. 101.]—**A. albuminosa**. See *Eau albumineuse*.—**A. alcalina**. See *Acqua alcalina effervescentes*.—**A. s. alcalinas gaseosas**. Sparkling alkaline waters. [D. 119.]—**A. alcanforada**. Camphor-water. [D. 119.]—**A. anjélica**. 1. A purgative preparation consisting mainly of manna and an infusion of senna. 2. See *Eau angélique*. [D. 101.] Cf. *Acqua angelica*.—**A. anodina**. See *Acqua anodina di Praga*.—**A. antiescrofulosa**. A mixture of 4 parts of calcium chloride, 50 of Corsican moss, and 350 of distilled water. [Righini (A. 371).]—**A. antihépética**. See *Acqua del Cardinale di Luynes*.—**A. antiof-tálmica**. See *Acqua antioftálmica di Loche*.—**A. antipedicular**. See *Acqua antipedicular de Caudet*.—**A. antipsórica**. 1. A mixture of 24 parts of mercuric chloride, 144, each, of alum and gum arabic, and 2073.6 of distilled water; an external application for scabies. [A. 371.] 2. See *Acqua antipsórica di Ranque*.—**A. antipitrida de Beaufort**. See *Acqua antipitrida di Beaufort*.—**A. ardiente**. Any distilled alcoholic liquor; alcohol. [D. 88.]—**A. arterial**. A solution of 144 parts, each, of sulphate of zinc and sulphate of aluminium, in 345.6 of rose-water; a styptic. [A. 371.]—**A. azul**. See *Acqua celestis*.—**A. bendita**. See *Acqua benedicta della carità*.—**A. blanca**. See *Liquor PLUMBI SUBACETATIS dilutus*.—**A. calibenda**. See *A. ferruginosa*.—**A. s. Calientes**. A town in Mexico with warm mineral springs in the neighborhood. [D. 12.]—**A. carmelitana**. See *Aqua MELISSÆ composita*.—**A. cloroformizada**. See *Eau chloroformisée*.—**A. celeste**. See *Acqua celestis*.—**A. s. compuestas**. Compound medicinal watery solutions. [D. 119.]—**A. de Alibour**. See *Eau d'Alibour*.—**A. de arcabuzazo**. See *ALCOBOLATRE vulnéraire*.—**A. de Beiloste**. See *Acqua di Beiloste*.—**A. de Bonferme**. See *Acqua di Bonferme*.—**A. de Botot**. See *Eau dentifrice de Botot*.—**A. de breu**. Tar-water, made by macerating 1 part of tar in 40 parts of water. [D. 119.]—**A. de cal**. Lime-water. [D. 119.] See *Liquor CALCIS*.—**A. de Colonia**. Cologne water. [D. 118.] See *SPIRITUS odoratus*.—

**A's de Comangillas.** Hot mineral springs in Mexico which flow from a basaltic rock. [D, 79.]—**A. de Dardel.** See *Aqua melissæ composita*.—**A. de Egipto.** See *Acqua d'Egitto*.—**A. de Esmeralda.** A preparation of certain aromatic plants macerated in alcohol. [D, 119.]—**A. de Goulard.** See *Liquor PLUMBI SUBACETATIS*.—**A. de Guerlain.** See *Acqua di Guerlain*.—**A. de Javela.** **A. de Javelle.** See *Javelle WATER*.—**A. del ámnios.** The liquor amnii. [D, 119.]—**A. de la reina de Hungria.** See *Acqua della regina d'Ungheria*.—**A. de La Vrillière.** A tonic alcoholic preparation of cannella, nasturtium, and cochlearia. [D, 119.]—**A. del carmen.** See *Aqua melissæ composita*.—**A. del mar.** Sea-water. [B.]—**A. de Luce.** See *Eau de Luce*.—**A. de magnanimitad.** See *Aqua magnanimitatis simplex*.—**A. de melisa.** See *Aqua melissæ composita*.—**A. de Mettemberg.** See *Acqua di Mettemberg*.—**A. de Rabel.** See *Mixtura sulfurica acida*.—**A. de ramillete.** An alcoholic preparation containing honey. [D, 119.]—**A. de sal.** A solution of salt in water. [a, 5.]—**A. destilada.** 1. Distilled water. 2. A preparation made by distilling vegetable substances with water. [D, 101.]—**A's destiladas espirituosas.** See *Alcoólat*.—**A. de tartaro mineral.** A solution of 4 grains of tartar emetic and  $\frac{1}{2}$  oz. of sodium sulphate in 8 oz. of water; an emetic and cathartic. [a, 5.]—**A. de Theden.** See *Aqua traumatica vegeto-mineralis Thedeni*.—**A. de Van Swieten.** See *Chloruretum hydrargyricum aqua solutum*.—**A. de vejeto mineral.** See *Liquor PLUMBI SUBACETATIS dilutus*.—**A. de Verruga.** A Peruvian spring the water of which is reputed to give rise to the disease *verruca*. [D, 2.] See *Verruga peruana*.—**A. de vida.** See *Aguardiente*.—**A. de violeta.** See *Acqua di violetta*.—**A. diuréctica alcanforada.** A mixture of 60 parts of potassium nitrate, dissolved in 500 of water of parietaria, and a solution of 60 of acetic acid and 10 of camphor in 120 of alcohol, shaken and filtered; used for dropsy.—**A. divina.** See *COLLYRE de sels fondus*.—**A. en las piernas.** Grease (a disease of horses). [D, 119.] See *Eaux aux jambes*.—**A. espirituosa.** A pharmaceutical water in which the essential ingredient is an alcoholic solution. [D, 119.]—**A. espirituosa de Anhalt.** See *Acqua anhaltina*.—**A. esiptica.** See *A. arterial*.—**A. etérica alcanforada.** A solution of 1 part of camphor in 3 parts of sulphuric ether and 5 or 6 of water. [D, 119.]—**A. fajedénica.** See *Lotio HYDRARGYRI flava* and *Lotio HYDRARGYRI nigra*.—**A. ferruginosa.** A ferruginous water. [a, 5.]—**A. filtrada.** Filtered water. [a, 5.]—**A. fuerte.** Aqua fortis. [B.] See *NITRIC ACID*.—**A. fundente de Trevez.** See *Acqua fondente di Trevez*.—**A. griega.** See *Acqua d'Egitto*.—**A. hepática.** **A. hidrosulfurosa.** Water containing hydrogen sulphide; reputed stimulant and diaphoretic and used in chronic skin diseases. [D, 101.]—**A. iodurada.** Lugol's solution. [D, 119.] See *Liquor iodi compositus*.—**A. laxante de Viena.** See *INFUSUM laxativum viennense*.—**A. lithontriptica.** Lithontriptic water; a solution of potassium carbonate. [D, 101.]—**A. madre.** See *Mother liquor*.—**A. madre de vitriolo.** Mother liquor of vitriol; a solution of ferrous sulphate. [D, 101.]—**A. marcial.** 1. A ferruginous water. 2. A solution of 0.15 part of tartrate of iron and potassium in 650 parts of artificial Seltzer water. [Trousseau (A, 371).]—**A's mayores y menores.** The fecal and urinary excretions. [D, 98.]—**A. mercurial.** See *Acqua mercuriale*.—**A's minerales.** Mineral waters. [D, 101.]—**A's minerales salinas.** Saline waters. [D, 119.]—**A. minero-medical.** A medicinal mineral water. [D, 102.]—**A. negra.** See *Lotio HYDRARGYRI nigra*.—**A. oriental.** See *Eau orientale*.—**A. oxigenada.** See *Acqua ossigenata*.—**A. ozonizante.** See *Eau ozonisante*.—**A. para la boca.** See *Spirito di PRESTO composito*.—**A. para la hemicránea.** See *Aqua sedativa*.—**A. que no moja.** Lit., water which does not moisten; quicksilver, mercury. [D, 101.]—**A. regia.** Aqua regia. [B.] See *NITROHYDROCHLORIC ACID*.—**A. roja.** **A. roja del hospital de San Luis.** See *Eau rouge d'Alibert*.—**A. ras.** Oil of turpentine. [D, 119.]—**A. sal.** Hydrochloric acid. [a, 5.]—**A's salinas.** Saline waters. [D, 119.]—**A. Santa de Vimeiro.** A feebly saline spring in the province of Estremadura. [D, 107.]—**A. sedativa.** See *Eau sédative de Raspail*.—**A. segunda.** A mixture of 1 part of nitric acid and 2 parts of water. [D, 119.]—**A. sin igual.** Cologne water. [D, 119.] See *Spiritus odoratus*.—**A's sulfurosas.** Sulphurous waters. [D, 119.]—**A. sulfurosa y sulfúrica.** See *A. hidrosulfurosa*.—**A. ternal.** A thermal water. [D, 98.]—**A. Tofana.** See *Acqua Tofana*.—**A. trementinada.** A solution of 35 oz. of Venice turpentine in 12 quarts of water; used in urinary diseases and in chronic bronchitis, also externally as a hæmostatic. [A, 371.]—**A. vegeto-mineral.** See *Liquor PLUMBI SUBACETATIS dilutus*.—**A. vital.** A mineral lemonade made of sweetened water and Rabel water. [D, 119.]—**A. vulneraria.** See *ALCOOLATURE vulnéraire*.—**A. vulneraria de Theden.** See *Aqua traumatica vegeto-mineralis Thedeni*.—**A. vulneraria roja.** See *ALCOOLATURE vulnéraire*.—**A. yodurada.** **A. iodurada.**

**AGUACATE** (Sp.), n.  $A^3g-wa^3-ka^3-ta$ . The alligator pear. [D, 77.] See *LAURUS persea*.

**AGUADOS CALIENTES** (Sp.), n.  $A^3g-wa^3-dth^2os Ka^3-li^2-e^2nt'-e^2s$ . See *AGUAS Calientes*.

**AGUADURA** (Sp.), n.  $A^3g-wa^3-dth^2u^3ra^3$ . A disease of horses and mules, either rheumatism or a spasmodic contraction of the muscles of the limbs. [D, 102, 119.]

**AGUAGUIN**, n. The native name of an African plant reputed vulnerary. [D, 77.]

**AGUAIGUAREL**, n. A Paraguayan tree yielding an aromatic resin and a balsam. [Waring (D, 90).]

**AGUAJA** (Sp.), n.  $A^3g-wa^3-ha^3$ . See *AGUAJAS*.

**AGUAJAKE** (Sp.), n.  $A^3g-wa^3-ha^3-ka$ . A dirty-white resinous matter which exudes from fennel; said to be palliative of toothache. [D, 98.]

**AGUAJAS** (Sp.), n. pl.  $A^3g-wa^3-ha^3z$ . A disease of horses, characterized mainly by ulceration about the hoofs. [D, 98.]

**AGUAMIEL** (Sp.), n.  $A^3g-wa^3-me-al'$ . 1. The unfermented

juice of the *Agave pulque*. [a, 5.] 2. Water mixed with honey. [D, 101.]

**AGUAPA** (Sp.), n.  $A^3g-wa^3-pa^3$ . A West Indian tree, the shade of which is said to have a poisonous influence. [D, 98.]

**AGUA-PÉ** (Port.), n.  $A^3g-wa^3-pa'$ . 1. A nymphaeous plant of Brazil, the leaves and root of which are said to be febrifuge. [D, 108.] 2. A variety of white water-lily. [D, 92, 98.] See *NYMPHÆA alba*. 3. An inferior kind of wine made in Brazil. [A, 374.]

**AGUAPIEGUAZIE**, n. A Paraguayan plant, an infusion of the flowers of which is said to be diuretic, emollient, aphrodisiac, and sedative. [Waring (D, 90).]

**AGUARACIUNHA-ACU, AGUARACIUNHA FEDAGOSO**, n's. A Brazilian borragineous plant, said to be abstergent and alterative. [D, 108.]

**AGUARAIBAY**, n. A South American tree, which yields a medicinal balsam. [“Rev. med.-quir. de Buenos Aires,” 1865, ii, 26-28 (D, 125).]

**AGUARAPONDA**, n. A Brazilian species of violet of a very aromatic odor. [D, 98, 106.]

**AGUARAQUIYA**, n. A Brazilian name for a plant, thought to be the *Solanum olereaceum*, used as a sedative application to wounds. [D, 90.]

**AGUARÁS** (Sp.), n.  $A^3g-wa^3-ra^3s'$ . A Mexican variety of oil of turpentine, obtained from the *Pinus teocote*; a balsamic stimulant. [a, 5; J. M. Maisch, “Am. Jour. of Pharm.,” Mar., 1886, p. 122.]

**AGUARAYBAY**, n. See *AGUARAIBAY*.

**AGUARDIENTE** (Sp.), n.  $A^3g-wa^3-dth^2e^2-e^2nt'a$ . 1. A distilled alcoholic liquor, especially brandy. [D, 98.] 2. In pharmacy, rectified spirit, alcohol. [a, 5.]—**A. alcanforado.** Camphorated spirit; a solution of 1 part of camphor in 39 parts of 60-per-cent alcohol. [A, 371.]—**A. aleman.** “German brandy.” See *Teinture de JALAP composée*.—**A. de maguey.** A spirit distilled from the fermented juice of the *Agave pulque*. [a, 5.] Cf. *TEQUILA*.—**A. de pisco.** See *Pisco*.

**AGUARRAS** (Sp.), n.  $A^3g-wa^3-ra^3s'$ . Oil of turpentine. [D, 98.]

**AGUAXIMA**, n. A Brazilian name for *Piper umbellatum*. [D, 108.]

**AGUE**, n.  $A^3gu^2$ . From Fr., *aigu*, acute. An acute disease of malarial origin, especially intermittent fever or an individual paroxysm of that disease. [D.]—**Aden a.** Probably dengue (*q. v.*). [D, 90.]—**A. and fever.** Intermittent fever. [D, 2.]—**A. cake.** Lat., *placenta febrilis*. Fr., *gâteau fébrile*. Ger., *Febrerkuchen*. Chronic enlargement of the spleen in consequence of malarial disease. [D, 110.]—**A. face.** Malarial neuralgia of the face. [D, 90.]—**A. fit.** Ger., *Feberschauer*. A paroxysm of a. [D, 77.]—**A. grass.** See *ALETRIS farinosa*.—**A. plant.** See *GEMIASMA*.—**A. poison.** See *MALARIA*.—**A. proof.** Ger., *feberfest*. Insusceptible to a. [D, 77.]—**A. root.** See *ALETRIS farinosa*.—**A. spell.** Ger., *Feberzaubermittel* (2d def.). 1. See *A. fit.* 2. A charm, or spell, to prevent or cure a. [Gay (D, 20).]—**A. struck.** Attacked with a. [D, 77.]—**A. tree.** The *Sassafras officinale*. [D, 77.]—**A. weed.** The *Eupatorium perfoliatum*. [D, 2.]—**Anticipating a.** See *Anticipating intermittent fever*.—**Brass a.** [Thackrah], *Brass founders' a.* [Greenhow]. A form of disease common among brass-founders and those who are habitually exposed to the fumes of zinc; characterized by a decided feeling of weariness, nervousness, shivering, and a sense of oppression in the chest, followed by heat, and then by profuse sweating. [D, 25, 46.]—**Brow a.** Neuralgia of the brow of an intermittent character, supposed to be due to malaria. [D.]—**Catenating a.** One that is associated with other diseases, such as lumbago or epilepsy. [D, 90.]—**Dead a.** See *Latent a.*—**Double quartan a.** **Double quotidian a.** **Double tertian a.** **Double unequal tertian a.** See under *FEVER*.—**Dumb a.** See *Latent a.*—**Duplicated quartan a.** **Duplicated tertian a.** See under *FEVER*.—**Fever and a.** A popular term for intermittent fever.—**Hebdomadal a.** See under *FEVER*.—**Irregular a.** See *Masked a.*—**Latent a.** Syn.: *dumb a.* 1. Intermittent fever in which the paroxysms are not attended with a chill. [D, 5.] 2. A form in which, instead of the ordinary well-marked paroxysms, there is a feeling of great depression and chilliness, with pains in certain parts of the body, or in some cases nausea and vomiting, and a coated tongue, the symptoms showing a certain degree of periodicity. [D, 5, 25.]—**Leaping a.** See *Dancing mania*.—**Masked a.** Fr., *fièvre larvée* (ou *masquée*). Ger., *larvirtes Wechselfieber*. A general term for various forms of malarial poisoning resembling intermittent fever in certain important respects, but not with sufficient exactness to warrant their classification under that head. [D.]—**Partial a.** A. accompanied by pain confined to a particular part or organ. [D, 90.]—**Postponing a.** **Protracted a.** **Quartan a.** **Quintan a.** **Quotidian a.** **Retarding a.** **Septan a.** **Sextan a.** **Tertian a.** **Third-day a.** **Triple quartan a.** **Triple quotidian a.** **Triple tertian a.** **Triplicated quartan a.** Various forms of intermittent fever. See the corresponding expressions under *FEVER*.

**AGUED**, adj.  $A^3gu^2d$ . Ger., *feberhaft*. Affected with ague. [D, 77.]

**AGUILBOQUIL** (Sp.), n.  $A^3g-wel-bo-ke'l$ . The Chilian name for the berries of the *Lardizabala biternata*. [D, 117.]

**AGUILLOU** (Fr.), n.  $A^3g-el-u$ . See *SCANDIX pecten*.

**AGUIOS** (Lat.), adj.  $A^3g(a^3g)wi^2-o^3s$ . Gr., *ἀγίος*. Without limbs, weak of limb. [Hippocrates (A, 311).]

**AGUISH**, adj.  $A^3gu^2-i^3sh$ . Like, pertaining to, or affected with, ague. [D, 122.]

**AGUISHNESS**, n.  $A^3gu^2-i^3sh-ne^2s$ . The state of being aguish (*q. v.*). [D, 122.]

**AGUL** (Ar.), n. See **ALHAGI**.  
**AGUNIE CHAR**, n. A native name for a product of western India, reputed a remedy for rheumatism. [D, 90.]  
**AGUOMADA**, n. See **AGORIADA**.  
**AGUTI-GUEPA**, **AGUTIGUEPOBI BRASIL**, n's. Indian names for one or more species of *Sagittaria*. [D, 100, 106.]  
**AGUTIGUEPO-OPI**, n. An Indian name for the *Thalia geniculata*. [D, 108.]  
**AGY**, n. A Peruvian name for the *Capsicum annuum*. [D, 108.]  
**AGYAGOS**, n. An Austro-Hungarian sulphurous water of a temp. of 77° F. [D, 90.]  
**AGYION**, **AGYIUM** (Lat.), n's n.  $A^2j(a^3g) \cdot i(u^6) \cdot i^2 \cdot o^2n$ ,  $-u^3m$  ( $u^4m$ ). See **AGYIOS**.  
**AGYNARIUS** (Lat.), adj.  $A^2j(a^3g) \cdot i^2n(u^6n) \cdot a(a^3) \cdot ri^2 \cdot u^3s(u^4s)$ . From  $\alpha\gamma\eta\eta$ , a female. Fr., *agynaire*. In botany, having no pistils, and having the stamens changed into the form of petals. [De Candolle (B, 1).]  
**AGYNE** (Fr.), n.  $A^2 \cdot zhi^2n$ . A plant the flower of which has no pistil. [D, 112.]  
**AGYNICUS** (Lat.), adj.  $A^2j(a^3g) \cdot i^2n(u^6n) \cdot i^2k \cdot u^3s(u^4s)$ . For deriv., see **AGYNARIUS**. Fr., *agynique*. In botany, not adherent to the ovary (said of the insertion of the stamens). [Lestiboudois (A, 345).]  
**AGYNOS**, **AGYNUS** (Lat.), adj's.  $A^2j(a^3g) \cdot i^2n(u^6n) \cdot o^2s$ ,  $-u^3s(u^4s)$ . Gr.,  $\alpha\gamma\nu\sigma$ . Fr., *aggyne*. Ger., *unbeucibt*. In botany, without a pistil. [D, 12.]  
**AGYRATE** (Lat.), n. f. pl.  $A^2j(a^3g) \cdot i^2(u^6) \cdot ra(ra^3) \cdot te(ta^2 \cdot e^2)$ . See **DANEACEE**.  
**AGYRIACEI** (Lat.), n. m. pl.  $A^2j(a^3g) \cdot i^2(u^6) \cdot ri^2 \cdot a(a^3) \cdot se(ke^2) \cdot i(e)$ . A family of *Fungi*. [D, 90.]  
**AGYRIE** (Lat.), n. f. pl.  $A^2j(a^3g) \cdot i(u^6) \cdot ri^2 \cdot e(a^2 \cdot e^2)$ . A section of *Fungi* of the tribe *Cyathidæ*. [D, 90.]  
**AGYRIAS** (Lat.), n. f.  $A^2j(a^3g) \cdot i(u^6) \cdot ri^2 \cdot a^2s(a^3s)$ . From  $\alpha\gamma\rho\iota\varsigma$ , a gathering. Cloudiness of the crystalline lens. [Bégin (D, 80).]  
**AGYRIUM** (Lat.), n. n.  $A^2j(a^3g) \cdot i(u^6) \cdot ri^2 \cdot u^3m(u^4m)$ . A genus of hymenomycetous *Fungi* established by Fries, being small, dot-like perennial gregarious plants growing on wood and resembling some species of *Leclidea*. [D, 12, 114.]  
**AGYRTA**, **AGYRTES** (Lat.), n's m.  $A^2j(a^3g) \cdot u^6rt(u^6rt) \cdot a^3$ ,  $-ez(e^2s)$ . Gr.,  $\alpha\gamma\upsilon\rho\tau\eta\varsigma$ . A quack. [Lancisius (H).]  
**AGYRTIA** (Lat.), n. f.  $A^2j(a^3g) \cdot u^6rt(u^6rt) \cdot i(e) \cdot a^3$ . Gr.,  $\alpha\gamma\upsilon\rho\tau\epsilon\iota\alpha$ . Quackery. [D, 80.]  
**AGYRTODES** (Lat.), adj.  $A^2j(a^3g) \cdot u^6rt(u^6rt) \cdot o^2dez(de^2s)$ . Gr.,  $\alpha\gamma\upsilon\rho\tau\omega\delta\eta\varsigma$ . Quackish. [D, 130.]  
**AHALE** (Sp.), n.  $A^2 \cdot a^3 \cdot la$ . A tree of the Philippine Islands, the leaves of which are used as irritant cataplasms and in decoction as a purgative and as a remedy for vertigo. [D, 101.]  
**AHATA**, **AHATE**, n's. The *Anona triloba*. [D, 108.]  
**AHCAI**, n. See **AHOUA**.  
**AHENJE** (Ar.), n. Pompholyx, ecephlysis. [D, 14.]  
**AHETS BOULE**, **AHETS MANGHA**, n's. Madagascar names for *Cannabis indica*. [D, 108.]  
**AHI** (It.), n.  $A^3 \cdot e$ . 1. See **AI**. 2. The fruit of *Inocarpus edulis*. [D, 76.]  
**AHILOU**, n. A district in Roumelia, on the Black Sea, where there are several salt springs. [A, 375.]  
**AHIPHI**, n. The *Erythrina corallo-dendron*. [D, 108.]  
**AHIUS**, n. An alchemical term for rock-salt. [Ruland, Johnson (D, 90).]  
**AHLBAUM** (Ger.), n.  $A^3 \cdot l \cdot ba^3 \cdot um$ . See **LONICERA xylosteum**.  
**AHLBECK** (Ger.), n.  $A^3 \cdot l \cdot be^2k$ . A sea-bathing resort on the island of Usedom, in the Baltic Sea. [D, 18.]  
**AHLBEERE** (Ger.), n.  $A^3 \cdot l \cdot ba \cdot re^2$ . See **AALBEERE**.  
**AHLER EISENHÜTTE** (Ger.), n.  $A^3 \cdot le^2r \cdot i^2ze^2n \cdot hu^6t \cdot te^2$ . A mineral spring in Schaumburg. [D, 12.]  
**AHLKIRSCH** (Ger.), n.  $A^3 \cdot l \cdot k \cdot ir^2sh \cdot e^2$ . See **AALKIRSCH**.  
**AHMELLA**, n. See **ACMELLA**.  
**AHORA** (Lat.), n. f.  $A^2(a^3) \cdot ho^2ra^3$ . From  $\alpha\omega\rho\sigma$ , untimely, immature. Retarded development. [D, 2.]  
**AHORN** (Ger.), n.  $A^3 \cdot ho^2rn$ . The genus *Acer* (q. v.).—**A'gewächse**. See **ACERACEE**.—**A'säure**. Acetic acid.—**A'zucker**. Maple sugar. [D, 77].—**Felda'**. The *Acer campestre*.—**Gestreifter A.** The striped maple (*Acer pennsylvanicum*). [D, 129].—**Rother A.** The red maple (*Acer rubrum*). [D, 8].—**Zuckera'**. See **ACER saccharinum**.  
**AHOUA**, **AHOVAL**, **AHOUNI**, **AHOVAL**, **AHOVALI**, **THEVETIC-LUSH**, **AHOVAL**, n's. Names applied in various tropical countries to a poisonous plum-tree (the *Cerbera ahoval* or the

*Thevetia nerifolia*). The leaves are said to be used as an application to snake-bites. [D, 10, 77, 90, 100, 101, 106.]

**AHRBLEICHERT** (Ger.), n.  $A^3r \cdot bli \cdot ch^2e^2rt$ . A red variety of Ahrwein (q. v.).

**AHRWEIN** (Ger.), n.  $A^3r \cdot vin$ . A wine grown by the river Ahr, in the province of Coblenz, in Rhenish Prussia. [A, 303.] Cf. **AHRBLEICHERT**.

**AHITE**, n. The *Anona triloba*. [D, 108.]

**AHTUA**, **AHUAL**, n's. See **AHOUA**.

**AHUBER**, n. The fruit of the *Juniperus phœnicea*; used for gastralgia and, infused in oil, for rheumatism. [Lord, Waring (D, 90).]

**AHUCK** (Ar.), n. Calcium. [D, 108.]

**AHUL** (Ar.), n. Staphyloma. [D, 14.]

**AHUND MADOQ**, n. An Abyssinian name for a species of *Chenopodium*, used as an application to ulcers. [Waring (D, 90).]

**AHUSAL** (Ar.), n. An alchemical name for orpiment. [Ruland, Johnson (D, 83).] See **ARSENIC trisulphide**.

**AHYPNIA** (Lat.), n. f.  $A^2(a^3) \cdot hi^2p(hu^6p) \cdot ni^2 \cdot a$ . Gr.,  $\alpha\upsilon\upsilon\nu\iota\alpha$  [Aretæus (A, 311)]. Sleeplessness. [D, 90.]

**AI** (Fr.), n.  $A^3 \cdot e$ . It., *ahi*. Syn.: *a. douloureux*, *laï*, *ténosynite crépitante*, *ténosite crépitante et séreuse*. A painful swelling of the forearm in those whose vocations lead them to make movements of torsion of the closed hand upon the forearm. It is probably due to an inflammation of the fibrous structures enveloping the tendons of the external radial muscles or their bursæ, or of the long abductor and short extensor of the thumb. The word itself is a common exclamation of pain. The affection is treated with rest, bandaging, flying blisters, etc. [Ik. Larger, "Rev. de chir.," May, 1882, p. 399 (D; L).]

**AIAKAZATH**, n. Ar., *al-râqas*, *al-râdz*. An alchemical term for lead. [B, 50.]

**AIAULT**, **AIAUT** (Fr.), n's.  $A^3 \cdot e \cdot o$ . Provincial names for the *Narcissus pseudo-narcissus*. [A, 300; D, 117.]

**AIAVOE**, n. Ajowan. [D, 108.] See **AMMI opticum**.

**AIBEIG** (Ar.), n. The *Polypodium vulgare*. [D, 101.]

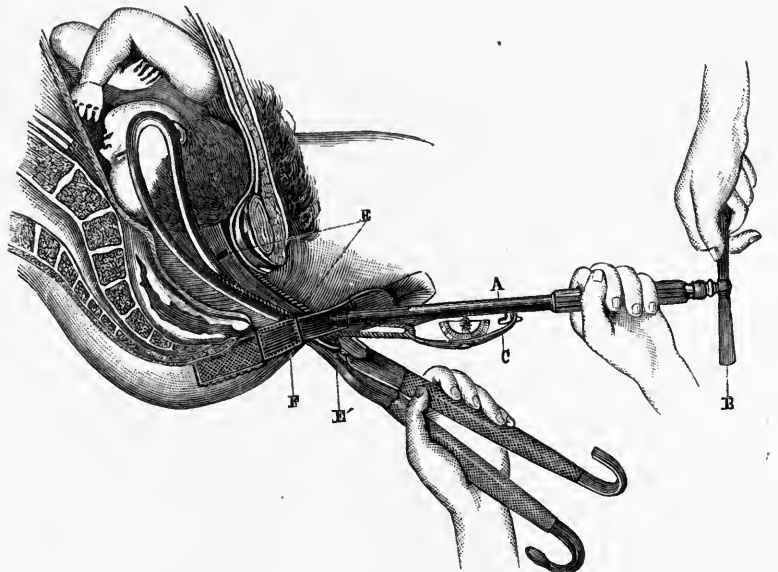

**AIBEN**, n. A Tartar name for fermented cows' milk. [Waring (D, 90).]

**AIBLING** (Ger.), n.  $A^3 \cdot i^2b \cdot li^2ng$ . A town in the valley of the Mangfall, in Upper Bavaria, between Munich and Salzburg, where there are several bathing establishments. The baths (*Sool-Mutter-laugen-Moorbäder*) are compounded of bog-mud, saline-spring water, and the mother-liquor of the latter, and are said to be very efficient in promoting the absorption of old exudates. [A, 319; D, 18.]

**AICH** (Ger.), n.  $A^3 \cdot i^2ch^2$ . A mineral spring at Kempten (q. v.). [D, 12.]

**AICHAR**, n. See **ACHAR**.

**AIDE-FORCEPS** (Fr.), n.  $Ad \cdot fo^2r \cdot se^2ps$ . The aid-forceps. [A, 40]; a mechanical contrivance devised by Joulin for exerting continuous traction with the obstetrical forceps by means of a fillet passed through the fenestræ. It works by a mechanism analogous to that of the handle of an *écraseur*, counter-pressure being made against the ischia, and is furnished with a small dynamometer. [A, 15.]

JOULIN'S AIDE-FORCEPS. (AFTER CHARPENTIER.)

A, B, the *écraseur* mechanism; C, the dynamometer; E, a fillet passing through the fenestræ of the forceps and attached to the dynamometer.

**AIDION**, n. An ancient remedy for snake-bites; wine and the dried testicles of the stag. [Waring (D, 90).]

**AIDOIAGRAPHY**, n. A-doi-a<sup>2</sup>g-ra<sup>2</sup>f<sup>2</sup>. For this and other words in *Aidoi*, see the corresponding words in *Ædœ*.

**AIDOS** (Gr.), n. A<sup>3</sup>i<sup>2</sup>d-o<sup>2</sup>s. A town in Greece having warm sulphurous springs. [D, 79.]

**AIERSA** (Ar.), n. The *Iris germanica*. [D, 108.]

**AIES**, n. See *BATTATAS*.

**AIESCH**, n. See *ALUMEN plumosum*.

**AIGE** (Fr.), n. Azh. See *ÆGLAS*.

**AIGELBEERE** (Ger.), n. A<sup>3</sup>i<sup>2</sup>g-e<sup>2</sup>l-ba-re<sup>2</sup>. The *Vaccinium myrtillus*. [D, 75.]

**AIGILOPS** (Fr.), n. A-zhel-o<sup>2</sup>ps. See *ÆGILOPS*.

**AIGITIS**, n. The *Anagallis arvensis*. [D, 108.]

**AIGLANTINE** (Fr.), n. A-gla<sup>2</sup>n-ten. The *Aquilegia vulgaris*. [D, 117.]

**AIGLE** (Fr.), n. Agl. 1. See *EAGLE*. 2. A French bathing resort and water-cure. [D, 87.] 3. See *BEX*.—*A. celeste*. An old name for ammonium hydrochlorate. [D, 108.]—*A. impérial*. The *Pteris aquilina*. [B, 19.]

**AIGLET**, n. Ag<sup>2</sup>le<sup>2</sup>t. See *ANTHER*.

**AIGRE** (Fr.), adj. Agr. 1. Unpleasantly sour, sharp. 2. Not ductile, not malleable (said of metals). [A, 300.]—*A. de vitriol*. Oil of vitriol. [D, 106.] See *SULPHURIC ACID*.—*A. doux*. Acid and sweet at the same time. [A, 300.]

**AIGRELET** (Fr.), adj. Agr-la. Slightly acid. [D, 11.]

**AIGRELIER** (Fr.), n. Agr-le-a. The *Pyrus torminalis*. [D, 117.]

**AIGREMOINE** (Fr.), n. Agr-mwa<sup>2</sup>n. Agrimony; the *Agri-monia eupatoria*. [Fr. Cod. (B).]—*A. eupatoire*. See *AGRIMONIA eupatoria*.—*Eau d'a*. See *Aqua agrimonie*.—*Extrait aqueux d'a*. See *Extractum agrimonie aquosum*.—*Hydrolat d'a*. See *Aqua agrimonie*.

**AIGRET** (Fr.), adj. A-gra. See *AIGRELET*.

**AIGRETIER** (Fr.), n. Agr-te-a. The *Cratægus torminalis*. [D, 79.]

**AIGRETTE** (Fr.), n. A-gré<sup>2</sup>t. Ger. *Federchen* (1st def.). It., *pennachino* (1st def.). 1. In botany, a tuft. [B; D, 11.] See *PARPUS*. 2. The *Rumex acetosus*. [D, 2.] 3. A peculiar phenomenon produced when a metallic ball is brought within 2 or 3 inches of a person seated on an insulated platform and charged with static electricity; being the emission of a bundle of radiating luminous striæ, enveloped in a bluish haze, from the surface of the body to that of the ball. [Charcot, "Rev. de méd.," Feb., 1881; "N. Y. Med. Jour.," June, 1881, p. 720 (B).]

**AIGRETTÉ** (Fr.), adj. A-gret-ta. In botany, furnished with aigrettes. [B.]

**AIGREUR** (Fr.), n. A-gru<sup>2</sup>r. Acidity, bitterness. [D, 106.]—*A. d'estomac*, A's. See *PYROSIS*.

**AIGU** (Fr.), adj. A-gu<sup>2</sup>. Acute. [D, 10.]

**AIGUEPERSE** (Fr.), n. A-ge<sup>2</sup>-pars. A cold calcareous spring, little used, in the district of Puy-de-Dôme, in France. [D, 79.]

**AIGUES-BONNES, AIGUES-CHAUDÈS** (Fr.), n's. A-ge<sup>2</sup>-bo<sup>2</sup>n, shod. See *Eaux-Bonnes* and *Eaux-Chaudes*.

**AIGUESSAC** (Fr.), n. A-ge<sup>2</sup>s-sa<sup>2</sup>k. A village in the Department of Aveyron, in France, with three cold mineral springs. [D, 108.]

**AIGUILLE** (Fr.), n. A-gwe-y<sup>2</sup>. 1. A needle. 2. A disease of falcons, attributed to worms and lice. [D, 85.]—*A. à acupuncture*. See *ACUPUNCTURE NEEDLE*.—*A. à appareil*. A common sewing-needle, used in making bandages. [D, 75.]—*A. à bec-de-lièvre*. See *Hare-lip NEEDLE*.—*A. à cataracte*. See *Cataract NEEDLE*.—*A. à contre-ouverture*. See *Sheathed NEEDLE*.—*A. à électropuncture*. See *Electropuncture NEEDLE*.—*A. affolée*. A compass needle that has been caused to deviate from its true position by some disturbing influence. [B, 52.]—*A. à fistule*. A grooved director. [D, 10.]—*A. à gaine*. See *Sheathed NEEDLE*.—*A. à galvanopuncture*. See *Electropuncture NEEDLE*.—*A. aimantée*. See *Magnetic NEEDLE*.—*A. à injection hypodermique*. See *Hypodermic NEEDLE*.—*A. à inoculation*. See *Vaccinating NEEDLE*.—*A. à ligature*. See *Aneurysm NEEDLE*.—*A. à manche*. See *Sheathed NEEDLE*.—*A. à résection*. A blunt, angular needle which, threaded with stout silk, is used for carrying a chain-saw around a bone. [D, 92.]—*A. arrondie*. A rounded needle. [D, 75.]—*A. à sêton*. See *Seton NEEDLE*.—*A. à suture*, *A. chirurgicale*. See *Suture NEEDLE*.—*A. courbe*. A curved needle. [D, 75.]—*A. de berger*. The plant shepherd's-needle (*Scandix pecten*). [D, 117.]—*A. de Deschamps*. See *Deschamps NEEDLE*.—*A. de fistule*. A grooved director. [D, 10.]—*A. droite*. A straight needle. [D, 75.]—*A. emmanchée*. A needle with a handle. [D, 75.]—*A. engagée*. See *Sheathed NEEDLE*.—*A. exploratrice*. See *Exploring NEEDLE*.—*A. indicatrice*. The indicating shaft, or guide, of Farnier's obstetrical forceps (q. v., under *FORCEPS*). [A, 15.]—*A. plate*. A flat needle. [D, 75.]—*A. thermo-électrique*. See *Thermo-electric NEEDLE*.—*A. triangulaire*. A triangular needle. [D, 75.]—*Baume d'a's*. See *Baume d'acier*.

**AIGUILLÉ** (Fr.), adj. A-gwe-ya. Needled. [D, 85.] See *NEEDLING*.

**AIGUILLON** (Fr.), n. A-gwe-yo<sup>2</sup>n<sup>2</sup>. An aculeus (q. v.); hence, figuratively, the immediate cause of an inflammation. [Vicq d'Azyr (D, 10).]

**AIGUILLONNÉ** (Fr.), adj. A-gwe-yo<sup>2</sup>n-na. Aculeate. [D, 75.]

**AIGUISEUR** (Fr.), n. A-gwe-zu<sup>2</sup>r. A grinder of edged tools. [A, 300.]—*Phthisie des a's*. See *Grinders' PHTHISIS*.

**AIJ-PUTI**, n. A name given in the island of Borneo to the tree that furnishes oil of cajuput (the *Melaleuca leucadendron*). [A, 264.]

**AIKEN**, n. A'ke<sup>2</sup>n. A town in S. Carolina, 585 feet above the level of the sea, having a mean winter temperature of 48°50° F., with a remarkably dry and salubrious atmosphere; an excellent resort for consumptives, especially if anemic and sensitive to cold. [W. H. Geddings, "N. Y. Med. Jour.," xxxi, 1880, p. 1.]

**AIL**, v. intr. Al. To be ailing (q. v.).

**AIL**, n. Al. A popular term for disease, especially if not considered of much importance. [D.]—*Wetherbee a*. A Massachusetts popular name for progressive muscular atrophy, from its having been observed in several generations of the Wetherbee family. [D, 34.]

**AIL** (Fr.), n. A<sup>3</sup>-i<sup>2</sup>-y<sup>2</sup>. Pl., *ails* (as the name of a plant), *aulx*. Garlic. [D, 10; L, 41.] See *ALLIUM*.—*Acétolature d'a*. See *Acetum ALLII*.—*Acétomellé d'a*. See *OXYMEL alliatum*.—*A. a feuilles étroites*. See *ALLIUM leptophyllum*.—*A. à toupet*, *A. à toupet*. The *Muscari comosum*. [D, 117; L, 41.]—*A. à tunique*. The *Allium parvum*. [L, 64.]—*A. ciboule*. The *Allium fistulosum*. [L.]—*A. cultivé*, *A. commun*. The *Allium sativum*. [D, 92, 133.]—*A. de mulot*. The *Allium angulosum*. [D.]—*A. des bois*, *A. des ours*. The *Allium ursinum*. [D, 117.]—*A. d'Espagne*. The *Allium scorodoprasum*. [D, 117.]—*A. des potages*. The *Allium oleraceum*. [D.]—*A. des vignes*. The *Allium vineale*. [D.]—*A. doré*. The *Allium moly*. [D, 117.]—*A. d'Orient*. The *Allium ampeloprasum*. [D, 117.]—*A. échalotte*. The *Allium ascalonicum*. [D.]—*A. faux-poireau*. The *Allium ampeloprasum*. [D.]—*A. faux-spicaard*. The *Allium victorale*. [D.]—*A. leptophylle*. The *Allium leptophyllum*. [D.]—*A. oblique*. The *Allium obliquum*. [D.]—*A. oignon*. The *Allium cepa*. [D.]—*A. poireau*. The *Allium porrum*. [D.]—*A. rocanbole*. The *Allium scorodoprasum*. [D.]—*A. serpent*. The *Allium victorale*. [D.]—*A. stérile*. The *Allium ascalonicum*. [L, 64.]—*A. tubéreux*. The *Allium tuberosum*. [D.]—*Essence d'a*, *Huile d'a*. See *Oil of GARLIC*.—*Liniment d'a*. A mixture of lard and *Allium sativum*, well triturated; recommended by Buchan to be rubbed on the soles of the feet in whooping-cough and other obstinate coughs. [De Gassecourt (L, 85).]—*Oxéolé d'a*. See *Acetum ALLII*.—*Oxymel d'a*. See *OXYMEL alliatum*.—*Pulpe d'a*. [Fr. Cod.] A preparation made by rasping garlic and passing the powder through a sieve. [B.]—*Sirap d'a*. See *Syrupus ALLII*.—*Tête d'a*. A cluster of small onions. [L, 109.]—*Vinaigre d'a*. See *Acetum ALLII*.

**AILANTE, AILANTHE** (Fr.), n's. A<sup>3</sup>-e-la<sup>2</sup>nt. See *AILANTUS*.—*A. élevé*. The *Ailantus excelsa*. [D.]—*A. glanduleux*. The *Ailantus glandulosa*. [D, 10.]

**AILANTHIC ACID**, n. A-la<sup>2</sup>n'thi<sup>2</sup>k. See *AILANTIC ACID*.

**AILANTHUS** (Lat.), n. f. A(a<sup>3</sup>-e)-la<sup>2</sup>n(la<sup>3</sup>n'thu<sup>2</sup>s(thu<sup>2</sup>s). See *AILANTUS*.

**AILANTIC ACID**, n. A-la<sup>2</sup>nt'i<sup>2</sup>k. Fr., *acide ailantique*. An acid derived from the bark of *Ailantus excelsa*. [B, 5, 81.]

**AILANTUS** (Lat.), n. f. A(a<sup>3</sup>-e)-la<sup>2</sup>n(la<sup>3</sup>n'thu<sup>2</sup>s(thu<sup>2</sup>s). From the Chinese *ailanto*. Fr., *ailante, langit, vernis du Japon* (ou de la Chine). Ger., *Götterbaum*. Syn.: Chinese *sumach, tree of heaven*. A genus of simarubaceous trees and shrubs established by Desfontaines, distinguished by polygamous flowers with from 3 to 5 pistils, not united, 10 stamens, and, for fruit, a one-celled samara containing one seed. [B, 34; D, 12.] It is said to be poisonous to ducks, and the poisonous principle is supposed to reside in the very acrid resinous juice of the buds and leaves. [Caraven-Cachin, "Jour. de pharm. et de chim.," Dec., 1885; "Gaz. hebdomadaire de méd. et de chir.," Dec. 18, 1885; "N. Y. Med. Jour.," Jan. 9, 1886, p. 56.]—*A. excelsa*. Fr., *ailante élevée*. An East Indian species described by Roxburgh; the bark is used in India as a tonic and febrifuge. [D, 12, 115.]—*A. glandulosa* (Desfontaines). Fr., *ailante glanduleux, vernis du Japon*. Ger., *Götterbaum*. A large tree with abundant foliage and green paniculate flowers of a very disagreeable odor; a native of eastern Asia, cultivated in the United States as a shade-tree. [B, 34; D, 12.] The leaves and bark have been used as an anthelmintic. [A, 319.]—*A. integrifolia*. See *A. excelsa*.—*A. malabarica*. An East Indian species; the bark is said to be used as an antidiarrhetic, tonic, and febrifuge, and the resinous juice for dysentery and bronchitis. [D, 90.]

**AILÉ** (Fr.), n. Al. 1. A wing. [B.] See *ALA*. 2. The axilla. 3. Ale. [L.]—*A. grise*. See *ALA cinerea*.

**AILÉ** (Fr.), adj. A-la. See *ALATE*.—*Sonde a*. See *Winged CATHETER*.

**AILIFORME** (Fr.), adj. Al-fô<sup>2</sup>rm. See *ALIFORM*.

**AILERON** (Fr.), n. Al-e<sup>2</sup>-ro<sup>2</sup>n<sup>2</sup>. Any wing-like structure.—*A's de la matrice*, *A's du ligament large*. The folds of the broad ligament of the uterus. [D, 11.]

**AILING**, adj. Al'i<sup>2</sup>ng. A popular term for out of health, especially with the idea of chronicity and lack of severity.

**AILLAME**, n. The *Sorbus aucuparia*. [D, 108.]

**AILMAD**, n. An alchemical name for antimony. [D, 132.]

**AILMENT**, n. Al'me<sup>2</sup>nt. A disease or infirmity, especially if imperfectly developed and apparently not very severe. [D, 20.]

**AIL-PUTTAY**, n. A yellowish aromatic root used in India as an application for rheumatism, and given in decoction as a febrifuge. [D, 108.]

**AIMA** (Lat.), n. n. A'(a<sup>3</sup>i<sup>2</sup>)-ma<sup>3</sup>. Gen., *aim'atos*. See *HÆMA*.

**AIMAGOGON** (Lat.), n. n. A(a<sup>3</sup>-i<sup>2</sup>)-ma<sup>3</sup>-go<sup>2</sup>gon. From *aima-*

*γῶγος*, drawing off blood. The *Paeonia officinalis*. [A, 311; Dioscorides (D, 108).]

**AIMANT** (Fr.), n. A-ma<sup>3</sup>n<sup>2</sup>. A magnet, the loadstone. [D, 126].—**A. arsenical**. A substance obtained by fusing together equal parts of sulphur, antimony, and arsenic. [D, 10.]—**A. artificiel**. See *Artificial magnet*.—**A. blanc**. A white aluminous mineral which has been supposed to be aphrodisiac, detersive, astringent, and antiscorbutic. [D, 108.]—**A. de fer**. A piece of iron artificially magnetized. [D, 126.]—**A. en fer à cheval**. See *Horse-shoe magnet*.

**AIMANTATION** (Fr.), n. A-ma<sup>3</sup>n-ta<sup>3</sup>-si<sup>2</sup>-o<sup>2</sup>n<sup>2</sup>. Ger., *Magnetisation*. It., *calamitazione*. Sp., *imantación*. 1. Magnetization. 2. The use of a magnet for experimental, diagnostic, or therapeutic purposes.

**AIMANTÉ** (Fr.), adj. A-ma<sup>3</sup>n-ta. Magnetized. [B.]

**AIMANTER** (Fr.), v. tr. A-ma<sup>3</sup>n<sup>2</sup>-ta. To magnetize. [B.]

**AIMANTIN** (Fr.), adj. A-ma<sup>3</sup>n-ta<sup>3</sup>n<sup>2</sup>. Magnetic. [D, 106.]

**AIMA TOMATON**, n. Perhaps from *αἶμα*, blood, and *réveur*, to cut. A cupping and puncturing apparatus made in Rochester, N. Y. [D, 87.]

**AIMORRHEA** (Lat.), n. f. A(a<sup>3</sup>-i<sup>2</sup>)-mo<sup>2</sup>r-re/(ro<sup>2</sup>c<sup>2</sup>)-a<sup>3</sup>. Gr., *αἰμόρροια*. A discharge of blood, a bloody flux. [Hippocrates (A, 311).]

**AIMORRHEIS**, **AIMORRHOIS**, **AIMORROIS** (Lat.), n.s.f. A(a<sup>3</sup>-i<sup>2</sup>)-mo<sup>2</sup>r-re/(ro<sup>2</sup>c<sup>2</sup>)-i<sup>2</sup>s, -ro<sup>2</sup>i<sup>2</sup>s. Gr., *αἰμόρροϊς*. See *HEMORRHOID*.

**AIMOS** (Lat.), n. m. A(a<sup>3</sup>-i<sup>2</sup>)-mo<sup>2</sup>s. Gr., *αἶμός*. The *Rubus fruticosus*. [Dioscorides (D, 108).]

**AIMOSCOPIE** (Fr.), n. A-mo<sup>2</sup>s-ko-pe. See *HEMATOSCOPY*.

**AIN**, n. Ar., *Qaïn*, a fountain. A name given in Algeria to a number of mineral springs. [B, 93.]—**A. Afouzer**. A cold ferruginous spring near Djidjell (northwest of Constantine). [B, 93.]—**A. Ainia**. A cold sulphurous spring near La Calle. [B, 93.]—**A. Baroud**. 1. A cold sulphurous spring near Mourzaïa-les-Mines. 2. A warm ferruginous and saline spring near Kroubs. [B, 93.]—**A. bou Chagroum**. A hot spring near Biskra. [B, 93.]—**A. bou Merzoug**. A warm spring near Constantine. [B, 93.]—**A. Chetma**. A hot spring near Biskra. [B, 93.]—**A. Dahia**. A cold ferruginous spring near Dahia. [B, 93.]—**A. des Beni-Ismaël**. A cold ferruginous spring near Sétif. [B, 93.]—**A. Djerob**. A hot spring without mineral constituents on the upper Chélif River. [B, 93.]—**A. Drouen**. A warm spring near Batna. [B, 93.]—**A. el Djerob**. A tepid sulphurous spring near Bordj-bou-Arreidj. [B, 93.]—**A. el Hammam**. 1. A spring near Sebda. 2. A sulphurous hot spring near A. Djerob. 3. A sulphurous saline spring containing carbonic acid near Saïda. 4. Several saline springs near Mascara. [B, 93.]—**A. el Hamza**. A cold spring on the road from Sétif to Bougie containing alkaline carbonates and carbonic acid. [B, 93.]—**A. el Kibrit**. A sulphurous tepid spring near Bordj-bou-Arreidj. [B, 93.]—**A. el Meïda**. A hot spring without mineral constituents near Biskra. [B, 93.]—**A. el Mouza**. A hot sulphurous mineral spring in Arabia Pétrée. [D, 90.]—**A. Fesguia**. A warm spring with potable water near Constantine. [B, 93.]—**A. Garsa**. A warm sulphurous spring near Ain Beïda. [B, 93.]—**A. Guergour**. A ferruginous hot spring near Sétif. [B, 93.]—**A. Hamama**. A ferruginous spring near Milianah containing carbonic acid. [B, 93.]—**A. Hamza**, **A. Karsa**. A cold spring near Milianah containing iron, carbonates, and gaseous constituents. [B, 93.]—**A. Kebrit**. 1. A cold sulphurous spring near Constantine. 2. A hot sulphurous spring near Aumale. [B, 93.]—**A. Kebrita**. A cold sulphurous spring near Beni-Chaïf. [B, 93.]—**A. Kebrit M'Karta**. A spring near Bordj-bou-Arreidj. [B, 93.]—**A. Keddara**. A cold spring on the upper Chélif River. [B, 93.]—**A. Kef el Hammam**. A sulphurous hot spring near La Calle. [B, 93.]—**A. Ksar**. A warm spring near Batna without mineral constituents. [B, 93.]—**A. Ma Allah**. A warm ferruginous spring near Milah. [B, 93.]—**A. Malah**. 1. A cold spring near Orléansville containing sodium chloride. 2. A spring near Bou Saïda containing sodium chloride. [B, 93.]—**A. Merdjah**. A hot saline spring on the left bank of the Tafna. [B, 93.]—**A. Mkebrtza**. A cold sulphurous spring and sanitarium near Constantine. [B, 93.]—**A. Nouissy**. A tepid, ferruginous, saline, and sulphurous spring near Mostaganem, used for both bathing and drinking in cases of diseases of the lymphatic glands and anemia. [B, 93; D, 18.]—**A. Okhris**. A hot sulphurous spring near Aumale, recommended in syphilis. [B, 93.]—**A. Ouled Messaoud**. A sulphurous hot spring with sanitarium near Bône. [B, 93.]—**A. Ouled Youb**. A hot sulphurous spring near La Calle. [B, 93.]—**A. Ouled Zaid**. A hot sulphurous spring near Souk-Arrhas. [B, 93.]—**A. Oumach**. A hot spring without mineral constituents near Biskra. [B, 93.]—**A. Oumi el Snam**. The same as *A. Ksar*. [B, 93.]—**A. Sedcloud**. A hot spring without mineral constituents in the oasis of Tolga. [B, 93.]—**A. Seïan**. A tepid spring near the border of Segana. [B, 93.]—**A. Sennour**. A cold ferruginous gaseous spring near Souk-Arrhas. [B, 93.]—**A. Siddia**. A cold ferruginous spring near Mostaganem. [B, 93.]—**A. Sidi-Aidelli**. A saline hot spring near the village of Isser. [B, 93.]—**A. Sidi Aïd**. A hot sulphurous spring near Ain Ténouchent. [B, 93.]—**A. Sidi Trad**. A hot sulphurous spring near La Calle. [B, 93.]—**A. Tahami-mant**. A tepid ferruginous spring near Bordj-bou-Arreidj. [B, 93.]—**A. Tamersit el Dahraoun**. A cold sulphurous spring about 100 miles from Biskra. [B, 93.]—**A. Tamersit el Guebl**. A cold sulphurous spring nearly 100 miles distant from Biskra. [B, 93.]—**A. Zerguin**. A hot spring without mineral constituents on the upper Chélif River. [B, 93.]

**AINCILLE** (Fr.), n. A<sup>2</sup>n<sup>2</sup>-sel. A cold spring containing sodium chloride in the department of the Basses-Pyrénées in the extreme southwest of France. [B, 93.]

**AINE** (Fr.), n. An. The groin. [D.]—**Pli de l'a**. See *FOLD of the groin*.—**Région de l'a**. See *Inguinal region*.

**AINGNE** (Fr.), n. An. See *AINE*.

**AINHUM**, n. An African word signifying to saw or to saw off.

Lat., *dactylolysis spontanea*. Fr., *ainhum*. Ger., *Absägen*. Sp., *dactilolisia*. A disease peculiar to the negro, consisting in a spontaneous amputation of the little toe. It begins with a furrow on the lower surface of the toe at the proximal interphalangeal joint. This furrow gradually surrounds the member and deepens until the bone is exposed, and finally (in the course of several years) the toe, which in the mean time becomes hypertrophied and much enlarged, drops off. By some the disease is believed to be produced artificially by a ligature. It is most commonly met with on the west coast of Africa, in Bahia, Rio de Janeiro, and Buenos Ayres, and is also said to occur occasionally in India and in the southern United States. [G.]

**AINITU**, n. An aromatic shrub of the Moluccas. [D, 98.]

**AINSWORTHIA** (Lat.), n. f. Anz-wu<sup>2</sup>th/i<sup>2</sup>-a<sup>3</sup>. A genus of *Umbelliferae* established by Boissier, resembling *Tordylium*, but differing from the latter in the absence of calyx teeth and in having fruit with a smooth margin. [D, 117.]

**AIOCOCHTLI**, n. A name given, according to Monard, in some Spanish colonies to a small bone in the tail of the armadillo, which is made into pills and introduced into the external auditory canal for the relief of otalgia. [D, 108.]

**AIOPHYLOUS**, adj. A-i-o<sup>2</sup>f/i<sup>2</sup>-n<sup>3</sup>s. From *αἰών*, a life-time, and *φύλλον*, a leaf. Fr., *aiophylle*. Sp., *aiofileo*, *aiófilo*. Having leaves which last longer than a single year; evergreen. [D, 98, 101, 112.]

**AIOUN-EL-BELLAIA** (Ar.), n. A warm spring in Algeria near Ain Beïda. [B, 93.]

**AIOUN SKHAKNA** (Ar.), n. A cold chalybeate spring in Algeria containing carbonates. The water is drank in cases of chlorosis and anemia. [B, 93.]

**AIPATHES** (Lat.), adj. A(a<sup>3</sup>-i<sup>2</sup>p/a<sup>2</sup>th(a<sup>3</sup>th)-ez(e<sup>2</sup>s). For deriv., see *AEPATHIA*. More properly written *aipathes*. Always complaining or being sick. [D, 80.]

**AIPATHIA** (Lat.), n. f. A(a<sup>3</sup>-i<sup>2</sup>-pa<sup>2</sup>th(pa<sup>3</sup>th)/i<sup>2</sup>-a<sup>3</sup>. See *AEPATHIA*.

**AIPHANES** (Lat.), n. f. A(a<sup>3</sup>-i<sup>2</sup>f/a<sup>2</sup>n(a<sup>3</sup>n)-ez(e<sup>2</sup>s). Gen., *aiphaneos*. From *αἶ*, ever, and *φαίνεσθαι*, to appear. Fr., *aiphane*. A genus of palms established by Willdenow in 1804. [B, 170; D, 12.]—**A. aculeata**, **A. praga**. South American species. [D, 12.]

**AIPI**, n. A South American native name. 1. The tapioca or cassava plant (*Jatropha manihot*). [D, 92, 100.] 2. A Brazilian plant probably belonging to the genus *Cynanchum*. [B, 132.]—**A. makaxata**. A Brazilian plant, from the root of which the drink *aipi* is prepared. [A, 305.]

**AIPII**, n. 1. A Brazilian drink prepared from the root of the *Aipi makaxata*. [A, 305.] 2. See *AIPI* (1st def.).

**AIPIM**, **AIPIM COXERA**, **AIPIPOCA**, n's. See *AIPI* (1st def.).

**AIR**, n. Ar. From Lat., *aer*, Gr., *ἀήρ*. Lat., *aer*. Fr., *air*. Ger., *Luft*. It., *aere*, *aria*. Sp., *aire*. A name originally applied to any gas. It is now restricted to the gas forming the earth's atmosphere. The latter is made up of a mechanical mixture of nitrogen and oxygen, with a small proportion of carbon dioxide, ammonia, free nitric acid, ozone, aqueous vapor, and various adventitious inorganic and organic substances either in the form of gas or of suspended solid particles. Of these constituents, although all are constantly present, all except the first two are regarded as impurities, chemically pure a. consisting only of nitrogen and oxygen. The relative quantities of these elements vary with the locality, the season, and other factors, the proportion of oxygen ranging from 20.26 to 21 per cent. by volume, the mean being 20.96 per cent. by volume, or rather more than 23 per cent. by weight. A. is a colorless, tasteless, and odorless gas. It exhibits the properties of its constituent gases, maintaining oxidation, combustion, and respiration, like pure oxygen, but acting with less energy than the latter, on account of the diluting influence of the inert nitrogen. The sp. gr. of a. compared with hydrogen is 14.47, compared with water,  $\frac{1}{775}$ ; a litre of it under a pressure of 760 mm. and at 0° C. weighing 1.293 grammes. A. is slightly soluble in water, its two constituents dissolving in different proportions so that the composition of the dissolved a. is different from that of atmospheric a., containing indeed nearly 35 per cent. by volume of oxygen. [B.] See also, *ATMOSPHERE*.—**Acid of a.** Atmospheric carbonic acid; carbon dioxide. [B, 3.]—**A. acide vitriolique** (Fr.). See *Vitriolic acid*.—**A. alcalin** (Fr.). Priestley's name for ammonia. [B.]—**Atmospheric a.** Lat., *aer atmosphaericus*. Fr., *a. atmosphérique*. Ger., *atmosphärische Luft*. It., *aria atmosferica*. Sp., *aire atmosférico*. Ordinary a. See *A.*—**Azotic a.** Fr., *a. azotique*. Nitrogen. [B.]—**Breathing a.** See *Tidal a.* and *BREATHING a.*—**Complemental a.**, **Complementary a.** Fr., *a. complémentaire*. Ger., *Complementarluft*. A term introduced by Hutchinson [J, 12] to designate the volume of a. in addition to the tidal a., which may be drawn into the lungs by a forced inspiration. The average amount for an adult man is about 1,500 cu. cent. [J, 19, 40].—**Dephlogisticated a.** Fr., *a. dephlogistiqué*. Ger., *dephlogisticirte Luft*. It., *aria deflogisticata*. Sp., *aire deflogisticada*. Priestley's name for oxygen. [A.]—**Dephlogisticated nitrous a.** Priestley's term for nitrogen monoxide. [B, 3, 86].—**Empyrean a.** Fr., *a. empyré de Schéele*. Oxygen. [B, 158].—**Expiratory a.**, **Expired a.** Fr., *a. expiré*, *exhalation pulmonaire*. Ger., *Ausathmungsluft*, *Expirationsluft*. It., *alto*, *lena*. Sp., *aliento*, *halito*. Syn.: *breath*, *pulmonary exhalation*. The a. forced from the lungs in expiration. It differs from inspired a. in composition, an average specimen containing, at the standard temperature and pressure and when deprived of its aqueous vapor, O 16.06 per cent. by volume, N 79.56 per cent., and CO<sub>2</sub> 4.38 per cent. The composition, moreover, varies much more than that of inspired a. Expired a. differs from the latter in the following respects also: 1. It is loaded with aqueous vapor. 2. It acquires a trace of organic matter, and frequently contains various volatile and odorous substances (alcohol, garlic, etc.) taken into the mouth and stomach or excreted by the lungs. 3. It is changed in temperature—that is, if of a lower temperature than the body it is heated, if of a higher temperature it is cooled. [J.] See *Inspired a.*—**Factitious a.** Lat., *aer factitius*. It., *aria fattizia*. Sp., *aire facticio*. Carbon dioxide. [D, 76].—**Fixed a.** Fr., *a. fixe*. Ger., *fixe Luft*. It., *aria fissa*. Sp., *aire fijo*. A name given by J. Black to carbon dioxide. [A, 1; D, 108].—**Fluor acid a.** A name given by Priestley to silicon tetrafluoride. [B, 3].—**Heavy combustible a.**, **Heavy inflammable a.** Ger., *schwere brennbare Luft*. Methane. [B, 140].—**Hepatic a.** Lat., *aer hepaticus*. Fr., *a. hépatique*. Ger., *Schwefeleberluft*. It., *aria epatica*. An old term for hydrogen sulphide. [B, 86].—**Inflammable a.** Lat., *aer inflammabilis*. Fr., *a. inflammable*. Ger., *brennbare Luft*. It., *aria infiammabile*. An old term for various inflammable gases; usually applied to hydrogen, but also to methane and ethylene. [B, 3, 86]. See *Heavy inflammable a.*—**Inspired a.** Fr., *a. inspiré*. Ger., *Elnathmungsluft*, *Inspirationsluft*. The a. taken into the lungs in inspiration. Its composition is that of the surrounding atmosphere (*q. v.*). [J.]—**Marine acid a.** An old term for gaseous hydrochloric acid. [B, 2, 86].—**Mephitic a.** Lat., *aer mephiticus*. Fr., *a. méphitique*. It., *aria mephitica*. Old terms for (a) nitrogen, (b) carbon dioxide; so called because both are fatal to animal life. [B.]—**Nitrous a.** Fr., *a. nitreux*. Ger., *Salpeterluft*. It., *aria nitrosa*. A term of Priestley's for nitrogen dioxide. [B, 3, 86].—**Phlogisticated a.** Fr., *a. phlogistique ou phlogistiqué*. Ger., *phlogisticirte Luft*. It., *aria flogistica*. Sp., *aire flogistizado*. Priestley's term for nitrogen. [B, 3, 86].—**Phosphoric a.** A term given by Kirwan (1787) to a gas obtained by heating phosphorus with an alkali, and consisting of gaseous hydrogen phosphide mixed with a small quantity of the vapor of liquid hydrogen phosphide. [B, 3, 86].—**Pure a.** Lat., *aer purus*. Fr., *a. pur*. Ger., *reine Luft*. It., *aria pura*. Sp., *aire puro*. One of Lavoisier's names for oxygen. [A.]—**Reserve a.** Fr., *réserve respiratoire*. Ger., *Reserveluft*. Syn.: *respiratory reserve*. A term introduced by Hutchinson (1840-1850) to designate the volume of a. that may be voluntarily forced from the lungs after an ordinary respiration. The average amount of reserve a. for an adult man is about 1,500 cu. cent. [J, 18, 19, 28, 46].—**Residual a.** Fr., *résidu respiratoire*, *a. résiduel*. Ger., *Residualluft*. Syn.: *respiratory residue*. A term introduced by Hutchinson (1840-1850) to designate the volume of a. that remains in the lungs after the most forcible expiration. It amounts in the average, for an adult man, to about 1,800 cu. cent. [J, 18, 19, 28, 46].—**Solid a. of Hales**. Fr., *a. solide de Hales*. It., *aria solida di Hales*. Sp., *aire solido de Hales*. A name given to carbon dioxide on account of its property of forming solid carbonates with the metallic oxides. [B, 125; D.]—**Stationary a.** Fr., *capacité pulmonaire*. The amount of a. which remains constantly in the lungs in ordinary respiration. It includes: (a) the *reserve a.*, which may be expelled; and (b) the *residual a.*, which always remains even after the most powerful expiration. The average amount of stationary a. in an adult man is about 3,300 cu. cent. [J, 19, 41].—**Supplemental a.**, **Supplementary a.** See *Reserve a.*—**Tidal a.** Fr., *capacité inspiratrice ordinaire*. Ger., *Volum des mittleren Athmens*. Syn.: *breath*, *breathing a.*, *breathing volume*. The volume of a. taken in at one inspiration in ordinary tranquil breathing. This averages about 500 cu. cent. in an adult man. [J.]—**Vital a.** Lat., *aer vitalis*. Fr., *aria vitale*. Sp., *aire vital*. An old name for oxygen. [B, 86].—**Vitriolic acid a.**, **Vitriolic a.** Priestley's term for sulphur dioxide. [B, 3, 86.] For other

applications of a. see *A.*—**PASSAGES**, **A.**—**PUMP**, **A.**—**BAG**, **A.**—**BATH**, **A.**—**BATTERY**, **A.**—**BED**, **A.**—**BLADDER**, **A.**—**CANALS**, **A.**—**CAVITIES**, **A.**—**CELL**, **A.**—**CHAMBER**, **A.**—**CURE**, **A.**—**CUSHION**, **A.**—**DOUCHE**, **A.**—**DUCT**, **A.**—**EMBOLISM**, **A.**—**CAS**, **A.**—**LACUNULE**, **A.**—**PESSARY**, **A.**—**PILLOW**, **A.**—**SAC**, **A.**—**SINUSES**, **A.**—**THERMOMETER**, **A.**—**TRACTOR**, **A.**—**TRAP**, **A.**—**TUBE**, **A.**—**VEESICLE**, and **A.**—**VESSLS**.

**AIRA** (Lat.), n. f. A(a<sup>3</sup>)<sup>12</sup>ra<sup>3</sup>. From *alpa*, daniel. Fr., *aire*, *canche* (2d def.). Ger., *Schmiele*, *Haargras* (2d def.). 1. Among the Greeks, the daniel (*Lolium temulentum*). 2. A name applied by Linnaeus (1737) to a genus of *Gramineae* belonging to the tribe *Aveneae*, distinguished by the presence of 2 perfect florets and sometimes of the rudiments of a third within the glumes. [B, 115, 170; D, 117].—**A. aquatica** [Willdenow]. Fr., *canche aquatique*. Ger., *süsses Milzgras*, *Wasserschmiele*. Water hair-grass; a species found in pools, eaten by cattle and water-fowl. [B, 71, 171].—**A. caespitosa** [Willdenow]. Fr., *canche élevée*, *canche des gazons*. Ger., *Ackerschmiele*, *Rasenschmiele*. Tufted hair-grass; a species with stiff erect stalks sometimes reaching the height of 6 feet, growing in marshy meadows. It is eaten by cattle. [B, 71, 173; D, 3, 117].—**A. canescens** [Linnaeus]. Fr., *canche blanchâtre*, *erbu cendré*. Ger., *düstige Schmiele*. Syn.: *Avena canescens* [Weber]. *Corynephorus canescens* [Beauvais]. A species eaten by cattle. [B, 173].—**A. caryophylla** [Willdenow]. Fr., *canche à feuilles d'aillet*. Ger., *Silbergras*, *Silberhaargras*. Syn.: *Avena caryophylla*. Silver hair-grass; an English and European species. [B, 71, 173].—**A. flexuosa** [Willdenow]. Fr., *canche flexible*. Ger., *Bergschmiele*. Syn.: *Avena montana* [Weber]. Waved hair-grass. A species with a wavy peduncle and setaceous leaves. [B, 71].—**A. holcus lanatus**. See *Holcus lanatus*.—**A. mollis**. See *Holcus mollis*.—**A. montana** [Scheuchz]. **A. setacea** [Hudson]. **A. flexuosa** [B, 173].

**AIRAGE** (Fr.), n. A<sup>2</sup>ra<sup>3</sup>zh. 1. Ventilation. 2. Brass. [D.]

**AIRAN** (Fr.), n. A<sup>2</sup>ra<sup>3</sup>zn. Brass. [D.]

**AIRE** (Fr.), n. A<sup>2</sup>r. See *AREA*, *AIRA*, and *AMÉLIE-LES-BAINS*.—**A. claire**. See *Transparent AREA*.—**A. embryonnaire**. See *Embryonic AREA*.—**A. fœtale**. The expressed juice of the berries of *Vaccinium myrtillus*, allowed to stand for 24 hours at a temperature of from 12° to 15° C., and then decanted. [D, 125.]

**AIREN**, n. A Tartar name for fermented cows' milk. [D, 108.]

**AIRI**, n. A species of Brazilian palm. [D, 10.]

**AIRIGNE**, **AIRINE** (Fr.), n's. A-ren. More properly written *érigne*. A dissecting-hook. [D, 96.]

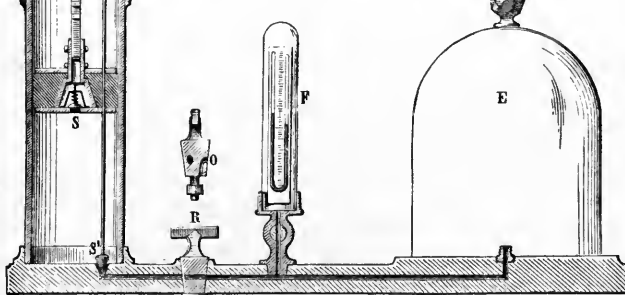

**AIROIDEA** (Lat.), n. n. pl. A(a<sup>3</sup>)<sup>12</sup>-ro<sup>2</sup>-i<sup>2</sup>d'e(e)<sup>2</sup>-a<sup>3</sup>. A division of gramineous plants made by Wahlberg, including *Aira*, *Arun-do*, and 6 other genera. [B, 170.]

**AIROPSIDEÆ** (Lat.), n. f. pl. A(a<sup>3</sup>)<sup>12</sup>-ro<sup>2</sup>-p-si<sup>2</sup>d'e(e)<sup>2</sup>-a<sup>3</sup>-e<sup>2</sup>. A tribe of the *Gramineae*, including *Airopsis* and 2 other genera. [B, 170.]

**AIROPSIS** (Lat.), n. f. A(a<sup>3</sup>)<sup>12</sup>-ro<sup>2</sup>-p-si<sup>2</sup>s. A genus of gramineous plants established by Desvaux; included by Fries as a section of the genus *Aira*. [D, 10, 112, 117].—**A. agrostidea** [De Candolle]. A species indigenous to Spain, Italy, and France. [D, 101].—**A. caryophylla**. A British species. [D, M, D, 117.]

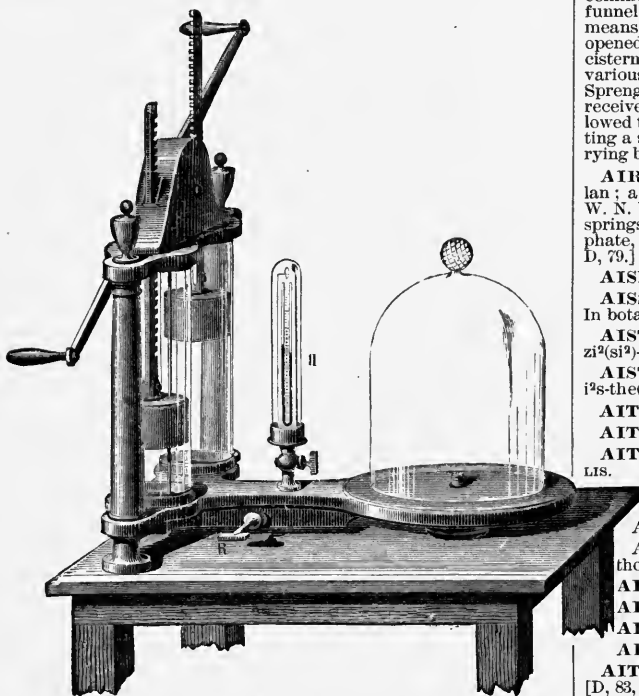

**AIR-PASSAGES**, n. pl. A<sup>2</sup>rpa<sup>3</sup>s-sa-je<sup>2</sup>z. Lat., *viae aeriferæ*. Fr., *voies aériennes*. Ger., *Luftwege*. It., *vie aerice*. Sp., *vias aeríferas*. 1. The passages through which air reaches the vesicular structure of the lungs, including the nasal passages, the mouth, the larynx, the trachea, and the bronchial tubes. 2. In botany, the air-canals. [A, 321; D, 90.]

**AIR-PUMP**, n. A<sup>2</sup>rpu<sup>3</sup>mp. Fr., *pneumatique*, *machine* (ou *pompe*) *pneumatique*. Ger., *Luftpumpe*. An apparatus for more or less completely exhausting a closed space of its con-

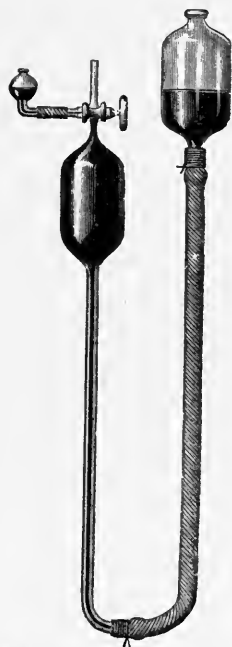

AIR-PUMP. (AFTER PRIVAT-DESCHANEL.)

tained air, invented by Otto Guericke about 1650. The ordinary a.-p. consists of a receiver, to be exhausted, connected with a barrel and

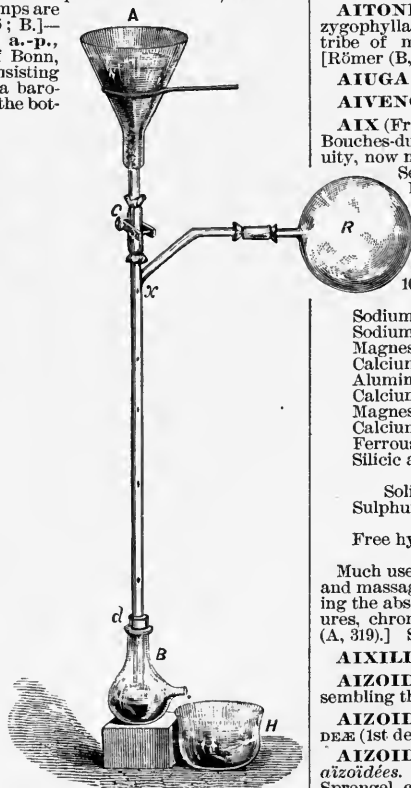

DOUBLE-BARRELED AIR-PUMP. (AFTER PRIVAT-DESCHANÉL.)

piston, the latter provided with a valve opening outward, so that at each stroke a certain amount of air escapes from the barrel, but none can enter. Double-barreled pumps are most commonly used. [A, 376; B.]—Geissler's a.-p., *Mercurial a.-p.*, Sprengel's a.-p. Geissler, of Bonn, invented a mercurial a.-p. consisting of a vertical tube, serving as a barometric tube, communicating at the bot-

GEISSLER'S MERCURIAL AIR-PUMP. (AFTER LOMMEL [A, 304].)

SPRENGEL'S AIR-PUMP. (AFTER PRIVAT-DESCHANÉL.)

tom, by means of an India-rubber tube, with a globe serving as a cistern. At the top of the tube there is a three-way stopcock by which communication can be established either with the receiver or with a funnel, the latter having an ordinary stopcock at the bottom. By means of another stopcock communication with the receiver can be opened or closed. The machine is worked by alternately raising the cistern above the level of the funnel stopcock and lowering it, the various stopcocks being opened or closed accordingly. [A, 376.] Sprengel's machine, an improvement on Geissler's, consists of a receiver connected with a vertical tube down which mercury is allowed to pass in a broken column by alternately opening and shutting a stopcock at the top, each separate portion of the column carrying before it a certain amount of air drawn from the receiver. [B.]

**AIRTHREY, AIRTHRIE**, n.  $A^2r/thri^2$ . The Bridge of Allan; a popular resort in the town of Stirling, in Scotland, 31 miles W. N. W. of Edinburgh, on the river Forth, where there are cold springs containing sodium chloride, calcium chloride, calcium sulphate, and iron. The water is laxative and tonic. [A, 319, 327; D, 79.]

**AISNE** (Fr.), n. An. See AINE.

**AISSELLE** (Fr.), n.  $A-se^2l$ . 1. The armpit. See AXILLA. 2. In botany, an axil (*q. v.*). [D, 106.]

**AISTHESIA, AISTHESIS** (Lat.), n's f.  $A(a^3)-i^2s-the(th'a)-zi^2(si^2)-a^3, -si^2s$ . See AESTHESIS.

**AISTHETERION, AISTHETERIUM** (Lat.), n's n.  $A(a^3)-i^2s-the(th'a)-te(ta)/ri^2-o'n, -u^3m(u^4m)$ . See SENSORIUM.

**AIT**, n. At. Scottish for oat. [A, 258.] See AVENA sativa.

**AITCH**, n. Ach. Pain. [D, 2.]

**AITHALES** (Lat.), n. f.  $A(a^3)-i^2th'a^2l(a^3l)-ez(e^2s)$ . See AEITHALIS.

**AITHOMOMA** (Lat.), n. n.  $A(a^3)-i^2-the^2m-o'ma^3$ . See AETHOMMA.

**AITHER** (Lat.), n. m.  $A(a^3)/i^2-thu^2r(the^2r)$ . See AETHER.

**AITHOMMA, AITHOMMA** (Lat.), n's n.  $A(a^3)-i^2-tho'm-ma^3, -tho^2m-o'ma^3$ . See AETHOMMA.

**AITIA** (Lat.), n. f.  $A(a^3)/i^2-shi^2(ti^2)-a^3$ . See AETIA.

**AITIOLOGY**, n.  $A-i^2-o^2l'o-jl^2$ . See AETIOLOGY.

**AITION** (Lat.), n. n.  $A(a^3)/i^2-shi^2(ti^2)-o^2n$ . See AETIA.

**AITIOPIS** (Lat.), n. f.  $A(a^3)-i^2-ti(te)'o-pi^2s$ . See AETHIOPIS.

**AITMAT, AITRUAD**, n's. Alchemical names for antimony. [D, 83, Fallopius (D, 108).]

**AITONIA** (Lat.), n. f.  $A-to-ni^2-a^3$ . Fr., *aitonie*. A genus of mellaceous plants, named in honor of W. Aiton, an English gardener. [A, 248].—**A. capensis**. A small shrub indigenous to the Cape of Good Hope. [D, 117.]

**AITONIEÆ** (Lat.), n. f. pl.  $A-to-ni(ne)'e^2-e(a^3-e^2)$ . 1. A tribe of zygothylaceous plants including *Aitonia*. [Harvey (B).] 2. A tribe of mellaceous plants including *Aitonia* and *Schizocalyx*. [Römer (B, 170).]

**AIUGA** (Lat.), n. f.  $A(a^3)-i^2-u^2(u)'ga^3$ . See ABIGA.

**AIVENON, AIVENOU**, n's. The *Lawsonia inermis*. [D, 108.]

**AIX** (Fr.), n. Ax. A city of Provence, in the department of Bouches-du-Rhône, where there are thermal baths of great antiquity, now not so much used as anciently. [D, 8.]—**A.-en-Savoie**. See *A.-les-Bains*.—**A.-la-Chapelle**. See *AACHEN*.—**A.-les-Bains**. The *Aque allobrogum* (seu *Domitia*, seu *Gratiæ*) of the ancient Romans; a village in the department of Savoie, in France, on the road from Lyons to Turin, having an elevated situation, a mild climate, and pure air and water, also sulphurous and aluminous springs, of a temperature of about 45° C., containing in 10,000 parts:

	The sulphur spring.	The alum spring.

Much use is made of various forms of douche, also of frictions and massage. The treatment has been found efficacious in promoting the absorption of exudates, muscular atrophy, caries, contractures, chronic skin diseases, syphilis, and catarrhs. [A. Reumont (A, 319).] See also CHALLES and MARLIOZ.

**AIXILLE** (Fr.), n.  $A^2x-el$ . The axilla. [D, 94.]

**AIZOID**, adj.  $A^3/i^2-zoid$ . Fr., *aizoidé*. Sp., *aizoides*. Resembling the *Aizoon*. [D, 10.]

**AIZOIDEÆ** (Lat.), n. f. pl.  $A(a^3)-i^2-zo/i^2d-e(a^3-e^2)$ . See AIZOIDEÆ (1st def.). [Sprengel (B, 170).]

**AIZOIDEÆ** (Lat.), n. f. pl.  $A(a^3)-i^2-zo-i^2d-e^2-e(a^3-e^2)$ . Fr., *aizoidées*. Ger., *Aizoiden*. 1. An order of plants established by Sprengel, comprising genera now classed under *Tetragoniaceæ* and *Mesembryaceæ*. 2. A family of plants established by Reichenbach, belonging to *Rosifloræ*, and comprising as subdivisions (a) the

*Atripliceae* (including the orders *Tetragoniaceae*, *Mesembryaceae*, *Neuradaceae*, and perhaps also *Phytolaccaceae*), and (b) the *Tamaricaceae*. [B, 170.]

**AIZOON** (Lat.), n. n.  $A(a^3)^2-i^2-zo^2n$ . Gr.,  $\alpha\epsilon\iota\zeta\omega\nu$ . Syn.: *sempervivum*. 1. The houseleek (*Sempervivum tectorum*). 2. The *Sedum album*. 3. A genus of tetragoniaceae (according to Endlicher, portulacaceae) herbs established by Linnaeus. [D, 10.]—**A. canariense** [Linnaeus]. Sp., *siempreviva de México* [Mex. Ph.]. A species indigenous to the Canary Islands, where it is incinerated for the soda which it contains. [D, 79.] It is used in Mexico as a dentifrice and antiscorbutic, and the juice as an astringent. [J. M. Maisch, "Am. Jour. of Pharm.," March, 1886, p. 122.]—**A. hispanicum**. A Spanish species, used as a source of soda. [D, 79.]—**A. paniculatum**. A species indigenous to the Cape of Good Hope. [D, 99.]

**AIZOOM** (Lat.), n. n.  $A(a^3)^2-zo^2-u^2m(u^2m)$ . See AIZOON.

**AJA-AJA**, n. See AGAR-AGAR.

**AJACCIO** (It.), n.  $A^3-ya^2t'chi^2-o$ . A town in Corsica, somewhat popular as a health resort, chiefly on account of the evenness of its temperature. [D, 18.]

**AJAME, AJAMI**, n's. Japanese names for the *Iris versicolor*. [D, 112.]

**AJARAZAT** (Ar.), n. See AIARAZATH.

**AJAS**, n. A Turkish health resort in Galatea, near Angora, where there are hot springs of some repute for the cure of skin diseases. [D, 90.]

**AJAVA, AJAVACID, AJAVA-SEEDS**, n's. Ajowan. [D.] See AMMI COPTICUM.

**AJAZARATH** (Ar.), n. See AIARAZATH.

**AJENJO** (Sp.), n.  $A^3-he^2n'ho$ . See ABSINTHIUM.

**AJESCH**, n. See AJAS.

**AJICUBA**, n. Fr., *ajicube*. Sp., *ajicubo*. A Japanese bush bearing a red fruit with black seeds. [D, 10, 90, 112.]

**AJIHALID**, n. An Egyptian bush, the leaves of which are said to be a remedy for lumbrici. [D, 101.]

**AJMUD**, n. An East Indian name for the fruit of *Carum* (*Ptychotis roxburghianum*; carminative and stomachic. [D, 90.]

**AJNAKSKÖ**, n. A Hungarian spring containing free carbon dioxide, a little hydrogen sulphide, calcium sulphate, silica, iron carbonate, calcium carbonate, and a resinous material. [D, 12.]

**AJO** (Sp.), n.  $A^3-ho$ . Garlic (*Allium sativum*). [B.]—**A. cañete**, **A. castañete**, **A. castañuelo**. Varieties of *Allium sativum*. [D, 102.]—**A. cebollino**. *Allium schoenoprasum*. [B.]—**A. chalote**. *Allium ascalonicum*. [B.]—**A. cultivado**. *Allium sativum*. [D, 119.]—**A. de Ascalonia**. *Allium ascalonicum*. [B.]—**A. fino**. *Allium scorodoprasum*. [D, 119.]—**A. puerro**. *Allium porrum*. [D, 108.]—**A. victorial**. *Allium victorale*. [D, 108.]

**AJONEC** (Ar.), n. See ADEHEMET.

**AJOUAIN, AJOWAEN, AJOWAINS**, n's. Ajowan. [D, 18, 90, 117.] See AMMI COPTICUM.

**AJOWAN**, n. See AMMI COPTICUM.—**A. raphul**. A Hindústani name for a stearoptene obtained from the essential oil of a.; the same as thymol. [B; D, 90, 126.]

**AJUAGAS** (Sp.), n.  $A^3-hwa^3/ga^2z$ . A sort of ulcer of the hoofs in horses and mules. [D, 102.]

**AJUAPAR**, n. A South American name for the *Hura crepitans* (q. v.). [D, 115.]

**AJUBATIPITA**, n. A native name for a Brazilian plant, the oil of which is used to improve the respiratory power. [D, 108.]

**AJUGA** (Lat.), n. f.  $A^2(a^3)^2-ju^2(yu)^2ga^3$ . A form of *abiga* (q. v., for deriv.). Fr., *ajuga*. Ger., *Günsel*, *Ginsel*. It., *ajuga*. Sp., *ayuga*. The bugle; a genus of herbaceous plants of the natural order Labiateae, tribe *Ajugoideae*, established by Linnaeus. [B; D.]—**A. chamæpitys** [Schreber]. Fr., *chamæpitys*, *ivette* [Fr. Cod.]. Ger., *Schlagkraut*, *Erdweihrauch*. It., *camepizio*, *iva commune*. Sp., *campeiteo*. Syn.: *Teucrium chamæpitys* [Linnaeus] (see *iva*), *abiga*. The ground-pine; a small annual growing in all parts of Europe and in some parts of the United States. The flowering top, *herba chamæpitys* (see *iva arthritica*) is official in the Fr. Cod. The plant was anciently reputed abortifacient. The leaves, which have a strong resinous odor and a bitter balsamic taste, furnish a stimulant, diuretic, and aperient volatile oil. [B, 5, 19; D, 88, 125.]—**A. Dealingii**, **A. decumbens**. Himalayan species; the former is used by the natives in quartan ague. [D, 90.]—**A. foliosa**. See *A. genevensis*.—**A. fruticosa**. See ANISOMELES MALABARICA.—**A. genevensis** [Linnaeus]. Fr., *bugle de Genève*. A variety of *A. pyramidalis*, indigenous to southern Europe. [B, 97; D, 99.]—**A. iva** [Schreber]. Fr., *ivette musquée* [Fr. Cod.]. Ger., *Bisamgünsel*. Syn.: *Teucrium iva* [Linnaeus]. An herb much used by the Arabs in cholera and certain other diseases; the flowering top is official in the Fr. Cod. [D, 125, 126.]—**A. orientalis**. An oriental species having inverted flowers. [D, 99.]—**A. procumbens**. A Chinese species. [D, 124.] See BRUNELLA.—**A. pyramidalis** [Linnaeus]. Fr., *bugle pyramidale*. Ger., *Gulden-günsel*, *Berggünsel*. Syn.: *Consolida media*. Mountain bugle, indigenous to Sweden, Germany, Switzerland, and England; distinguished by its unbranched lanuginous stalk and dentate leaves. The leaves, *herba consolida media* (see *bugula*), are astringent and tonic. [B, 5, 97; D, 88, 99, 108, 132.]—**A. reptans** [Linnaeus]. Fr., *bugle* [Fr. Cod.], *bugle rampante*. Ger., *kriechender Günsel*, *Wiesgünsel*. It., *erba mora*, *bugula*. Sp., *bugla*, *búgula*. Common, or pasture, bugle; a European species having dull-purple leaves. The leaves, *herba bugula*, have a sweetish-bitter taste, and are slightly astringent; they were formerly reputed a remedy for consumption. [A, 319; B, 19, 97; D, 99.]

**AJUGEÆ** (Lat.), n. f. pl.  $A^2(a^3)^2-ju^2(yu)^2je^2(ge^2)^2-e(a^2-e^2)$ . 1. A tribe of the Labiateae, including *Teucrium* and *Ajuga*. [Grisebach (B, 170).] 2. A tribe including the same and 4 other genera. [Bentham (B, 170).] 3. A sub-order of *Lamiaceae*, nearly the same as Bentham's *Ajugoideae*. [Lindley (B, 170).]

**AJUGOIDEÆ** (Lat.), n. f. pl.  $A^2(a^3)^2-ju^2(yu)^2go-i^2d'e^2-e(a^2-e^2)$ . Fr., *ajugoïdées*. 1. A tribe of labiate plants of which *Ajuga* is the typical genus. [D, 10.] 2. Practically the *Ajugeae* (2d def.), somewhat modified by subsequent botanists. [Bentham (B, 170).]

**AJUGOIDEOUS**, adj.  $A^2-ju^2-go-i^2d'e-u^2s$ . Lat., *ajugoideus*. Fr., *ajugoïde*. Belonging to the *Ajugoideae*, or resembling the genus *Ajuga*. [D, 10.]

**AJURATIBA**, n. A Brazilian bush from which an oil is obtained with which the natives anoint their bodies. [D, 112.]

**AJVAIN, AJWAIN, AJWAINS**, n's. Bengal names for ajowan. See AMMI COPTICUM.—**Ajwain-ka-pheul**. See AJOWAN RAPHUL.

**AK**, n. Ak. See AKE, n.

**AK** (Hindústani), n. The *Calotropis gigantea*. [B, 172.]

**AKA**, n. The New Zealand name for the *Metrosideros scandens*. [L, 67.]

**AKAMATHESIA, AKAMATHESIS** (Lat.), n's f.  $A^2k(a^3k)^2-a^2m(a^3m)^2-a^2th(a^2th)^2-ez(as)^2i^2-a^3-e(a^3)^2si^2s$ . Gr.,  $\alpha\kappa\alpha\mu\alpha\theta\eta\sigma\iota\varsigma$  (contracted from  $\alpha\kappa\alpha\mu\alpha\theta\eta\sigma\iota\varsigma$ ). A blunting of the perceptive faculties.—**A. acustica**. See PSYCHICAL DEAFNESS.—**A. optica**. See PSYCHICAL BLINDNESS.

**AKAMBER**, n. A Turkish name for amber. [L, 77.]

**AKAMPTISCH** (Ger.), adj.  $A^2k-a^3mp'i^2sh$ . Rigid; inflexible. [L, 40.]

**AKANIA** (Lat.), n. f.  $A^2k(a^3k)^2-a(a^3)^2ni^2-a^3$ . A genus of sapindaceous trees found in East Australia. [L, 67.]

**AKANTHACEEN, AKANTHEN** (Ger.), n's pl.  $A^3k-a^3n-ta^3-tza-e^2n$ ,  $-ka^3n'te^2n$ . See ACANTHACEÆ.

**AKANTHUS** (Ger.), n.  $A^2k-a^3n'tus$ . See ACANTHUS.—**A'pfianzen**. See ACANTHACEÆ.

**AKANTUHIA**, n. A Tahiti name for the *Cassia occidentalis*. [L, 49.]

**AKAR-KANTA** (Hindústani), n. The *Alangium hexapetalum*. [B, 172.]

**AKAROA**, n. A Maori name for the *Plagianthus betulinus*. [L, 67.]

**AKAROIDHARZ** (Ger.), n.  $A^3k-a^3r-o'i^2d-ha^3rtz$ . See ACAROID RESIN.

**AKASA-GHEROODA**, n. A Teloogo name for *Bryonia epigea*. [B, 172.]

**AKASGIA** (Lat.), n. f.  $A^2k(a^3k)^2-a^2z(a^2s)^2ji^2(gi^2)^2-a^3$ . See AKAZGINE.

**AKASGINE**, n.  $A^2k-a^2z'jen$ . See AKAZGINE.

**AKASHA-VULLE** (Hindústani), **AKASH-BULLEE** (Bengali), n's. The *Cassia filiformis*. [B, 172.]

**AKAZGA**, n. An African word. Syn.: *Boundou* or *M'boundou*, *quai*. A poisonous plant growing on the west coast of Africa, probably belonging to the genus *Strychnos*. Its stem is about 6 feet high and nearly an inch thick, covered with an adherent, sometimes tubercular, bark, which is distinguished by its parenchyma cells being disposed in a continuous layer 3 or 4 cells deep. The leaves are ovate-acuminate, and from 3 to 6, sometimes 12, inches in length. The seeds are sub-globular,  $\frac{1}{8}$  inch in diameter, and provided with a central cavity. The bark and other parts have a bitter, somewhat aromatic, taste and contain *akazgine* (q. v.) and another alkaloid answering to some of the tests of strychnine. [Heckel and Schlagendaußen (B, 2, 5; L, 65).]

**AKAZGIA** (Lat.), n. f.  $A^2k(a^3k)^2-a^2z(a^2s)^2ji^2(gi^2)^2-a^3$ . *Akazgine*. [L.]

**AKAZGINE**, n.  $A^2k-a^2z'$  joined. Fr., *akazgine*. Ger., *Akazgin*. It., *akazgina*. An alkaloid obtained from *akazga* by T. R. Fraser; a colorless, difficultly crystallizable substance, forming colorless salts with acids, and having an action similar to that of strychnine. [B, 2, 5, 10, 81.]

**AKAZIE** (Ger.), n.  $A^3k-a^3tz'i^2-e^2$ . *Acacia*.—**A'nbaum**. The false acacia or locust-tree (*Robinia pseud-acacia*). [B.]—**A'nfrucht**. The fruit of *Prunus spinosa*. [L, 30.]—**A'ngummi**. Gum acacia; gum arabic. [B.]—**A'nsaft**. See ACACIÆ VERA SUCCUS and ACACIA NOSTRAS.—**Amerikanische A**. See *A'nbaum*.—**Farnesische A**. *Acacia farnesiana*. [B, 131.]—**Unechte A**. See *A'nbaum*. [L, 30.]

**AKAZIN** (Ger.), n.  $A^2k-a^3tz'i^2n$ . *Acacin*; gum arabic. [L, 30.]

**AKCETHINE**, n.  $A^2k'se^2th-en$ . Fr., *akcétine*. A substance formed by the action of sulphur and ammonia upon acetone. According to some, it is the same as thiactonine. [L, 49.]

**AKE**, n. Ak. From A.-S., *ac*, *æc*. Better, *ak*. The oak. [B, 39; L, 73.]

**AKE**, v. intr. Ak. See ACHE. [B, 39; L, 73.]

**AKEBIA** (Lat.), n. f.  $A^2k(a^3k)^2-e(a^3)^2bi^2-a^3$ . From the Japanese name *akebi-kadsura*. Fr., *akébie*. A genus of plants belonging to the *Lardizabaleae*, established by Decaisne. [B, 175; L, 64.]—**A. quinata** [Decaisne]. Syn.: *Rajania quinata*. A Japanese species the fruit of which is an emollient. [L, 67.]

**AKEE**, n. Fr., *akée*. Also written *aki*. An African term for the fruit of *Blighia sapida* or the tree itself. [L, 67, 87.]

**AKÉE** (Fr.), n.  $A^3-ka$ . *Akee*.—**A. d'Afrique**. The *Akeasia africana*. [B, 173.] See *BLIGHIA SAPIDA*.

**AKEESIA** (Lat.), n. f.  $A^2k\text{-}ez\text{'i}^2\text{-}a^3$ . For deriv., see **AKEE**. Fr., *akeesie*. Tussac's name for a genus of sapindaceous trees, found in Africa and the West Indies, now referred to *Blighia* or *Cupania*. [B; L, 105, 109].—**A. Africana** [Tussac]. See **BLIGHIA sapida**.

**AKEL** (Ar.), n. The *Contorta* of Good's "Nosology." [L, 83.]

**AKELEI** (Ger.), n.  $A^2k\text{'e}^2\text{'i}$ . 1. The columbine. [L, 37.] See **AQUILEGIA**. 2. A whitlow. [L, 57.]—**Gemeiner A. Aquilegia communis**. [L, 80.]

**AKENA, AKENIUM** (Lat.), n's f. and n.  $A^2k(a^2k)\text{-}e(a)\text{'na}^3\text{'n}^2\text{-}u^3m(u^4m)$ . Fr., *akene*. See **ACHENIUM**.

**AKÉNOCARPE** (Fr.), n.  $A^3\text{-}ka\text{-}no\text{-}ka^3rp$ . See **ACHÉNOCARP**.

**AKÉOMINE** (Fr.), n.  $A^3\text{-}ka\text{-}o\text{-}men$ . See *Teinture de NOIX DE GALLE composée*.

**AKÉRATODIAPHANIE** (Fr.), n.  $A^3\text{-}ka\text{-}ra^3t\text{-}o\text{-}de\text{-}a^3f\text{-}a^3n\text{-}e$ . From a priv., *képas*, a horn, and *διαφανής*, transparent. A corneal opacity. [L, 82.]

**AKERATOPHOROUS**, adj.  $A^2k\text{'e}^2r\text{-}a^2t\text{'o}^2f\text{'o}^2r\text{'u}^3s$ . From a priv., *képas*, a horn, and *φορεῖν*, to bear. Not provided with horns. [B, 39.]

**AKERSPIRE**, n.  $A^2k\text{'u}^3r\text{-}spir$ . See **ACROSPIRE**.

**AKESTOMA** (Lat.), n. n.  $A^2k(a^2k)\text{-}e^2s\text{'to}\text{'ma}^3$ . Gen., *akesto/-matus* (-is). From *ἀκεσθαι*, to heal. Ger., *Akestom*. A new growth made up of granulations; granulation tissue. [L, 54.]

**AKHEZET** (Ar.), n. Tetanus. [L, 83.]

**AKHIL AL-MELECH** (Ar.), n. Or *ajel-melekh* [Forskål]. A medicinal plant among the Arabs; according to Forskål, *Trigonella hamosa* [B, 174], or perhaps *Melilotus aegyptiaca*. [B, 121.]

**AKHROOTIE** (Malay), **AKHROT** (Hindústani), n's. The *Aleurites triloba*. [L, 172.]

**AKI**, n. See **AKEE** and **BLIGHIA sapida**.

**AKIBOT**, n. From Ar., *al-kibrit*. An old name for sulphur. [B; L, 53.]

**AKIDO-GALVANO-CAUTERY**, n.  $A^2k\text{'i}^2d\text{-}o\text{-}ga^2\text{'i}\text{'va}^2n\text{-}o\text{-}ka^4\text{'te}r\text{'i}^2$ . From *akis*, a point, and *galvano-cautery*. Mild galvanic cauterization with a needle-electrode connected with a battery not specially intended for cautery purposes. [Heitzmann, "St. Louis Courier of Med.," Jan., 1882 (A).]

**AKINESIA** (Lat.), n. f.  $A^2k(a^2k)\text{-}i^2n\text{-}ez(as)\text{'i}^2\text{-}a^3$ . Fr., *akinésie*. Ger., *Akinesie*. See **ACINESIA**.—**A. iridis**. Fr., *akinésie de l'iris*. Ger., *Starrheit der Regenbogenhaut*. It., *immobilità dell' iride*. Sp., *inmovilidad (ò rigidez) del iris*. An obsolete term meaning rigidity or immobility of the iris. [F.]

**AKINESIC**, adj.  $A^2k\text{'i}^2n\text{-}ez\text{'i}^2k$ . See **ACINESIC** and **ACINETIC**.

**AKINESIS** (Lat.), n. f.  $A^2k(a^2k)\text{-}i^2n\text{-}e(a)\text{'si}^2s$ . Gen., *akines/ios* (-is). See **ACINESIA**.—**Cerebral A.** Fr., *akinesie cérébrale*. Ger., *cerebrale Akinesie*. It., *acinesia cerebrale*. Sp., *akinesia cerebral*. A. the cause of which lies in the cerebrum; especially an a. of which the pre-lucal lesion is seated in the middle line of the encephalon or in both hemispheres at the same time. [D, 70.]—**Crossed a.** Fr., *akinesie croisée*. Sp., *akinesia cruzada*. A motor paralysis occurring on the side of the body opposite to that in which the causative lesion is situated. [D, 70.]—**Reflex a.** Disease of the reflex mechanism producing diminution or absence of reaction to stimuli. [D, 35.]—**Spinal a.** Fr., *akinesie spinale*. Ger., *spinale Akinesie*. It., *acinesia spinale*. Sp., *akinesia espinal*. A. due to lesion of the spinal cord. [D, 70.]

**AKIRUT, AKIRUT JOWZ**, n's. See **AKROOT**.

**AKIURGIE** (Fr. and Ger.), n.  $A^2k\text{'i}^2r\text{-}uz\text{-}he\text{'-}ge'$ . See **ACIDURGIA**.

**AKKARAKAROUN** (Tamil), n. The *Anacyclus pyrethrum*. [L, 77.]

**AKLEI, AKLEY** (Ger.), n.  $A^2k\text{'li}$ . See **AKELEI**.

**AKMELE** (Ger.), n.  $A^2k\text{'me}^2\text{'le}^2$ . *Acemella*.—**A'samen**. *Acemella* seeds.—**Deutsche A.** *Bidens cernua*. [L, 80.]

**AKNA-RAHO** (Hung.), n. An alkaline chalybeate spring in Austro-Hungary. [L, 63.]

**AKNA-SUGATAGH** (Hung.), n. A saline mineral spring in Austro-Hungary. [L, 63.]

**AKNA-SZLATINA** (Hung.), n. Salt baths at the salt mines of Szlatina in Austro-Hungary. [L, 63.]

**AKNÉMIE** (Fr.), n.  $A^2k\text{'na-me}$ . 1. See **ACNEMIA**. 2. One affected with acnemia. [L, 41, 49.]

**AKOËMETER** (Ger.), n.  $A^2k\text{'o}^2\text{'e}^2m\text{-}a\text{'te}^2r$ . See **ACOUETER**.

**AKOKO**, n. A Kanaka name for a species of *Euphorbia*, the juice of which is used as an application to ulcers. [L, 63.]

**AKOLA** (Hindústani), n. The *Alangium hexapetalum*. [B, 172.]

**AKOMETER** (Ger.), n.  $A^2k\text{'o}^2\text{'me}^2\text{'t-e}^2r$ . See **ACOUETER**.

**AKONITON, AKONITOS** (Lat.), n's n. and m.  $A^2k(a^2k)\text{-}o\text{'ni}\text{'(ne)\text{'to}^2n\text{'-}to}^2s$ . Gr., *ἀκόνιτον, ἀκόνιτος*. Names given by Theophrastus and other Greek authors to plants belonging to *Aconitum* or allied to that genus. [B, 115; L, 65.]

**AKOOGEL A SEMOOROOMIE, AKOOPELA SEMOOROOMIE** (Ar.), n's. The *Amyris gileadensis*. [L, 105.]

**AKORWURZ** (Ger.), n.  $A^2k\text{'or-vurtz}$ . The *Acorus calamus*. [L, 43.]

**AKOSMOI** (Lat.), n. m. pl.  $A^2k(a^2k)\text{-}o^2z(o^2s)\text{'moi}$ . Gr., *ἄκοσμοι*. Bald persons. [G.] See under **ACOSMIA**.

**AKRA**, n. An Indian name for the *Vicia sativa*. [L, 67.]

**AKRATOTHERMIE** (Ger.), n.  $A^2k\text{'ra}^3t\text{-}o\text{-}tar\text{'me}^2$ . Syn.: *indifferent Therme*. A mineral water poor in saline constituents and effective by its heat alone. [B, 20.] Cf. **ACRATOPEGE**.

**AKRET** (Ar.), n. Aphorla. [L, 83.]

**AKRITOCROMATIE** (Ger.), n.  $A^2k\text{'ri}^2t\text{-}o\text{-}ch^2ro\text{'ma}^3\text{'te'}$ . See **ACRITOCROMACY**.

**AKROKARP** (Ger.), adj. and n.  $A^2k\text{'ro-}ka^3rp$ . Acrocarpous. As a n. pl., *A'e*, the *Acrocarpæ*. [B, 49.]

**AKROOT**, n. Also written *akirut* and *akirut jowz*. 1. An Indian name for the walnut (*Juglans regia*). [L, 77, 105, 117.] 2. See **AKHROT**.

**AKROSPOREN** (Ger.), n. pl.  $A^2k\text{'ro-spor-e}^2n$ . See **ACROSPORÆ**.

**AKROTIEREN** (Ger.), n. pl.  $A^2k\text{'ro-te}^2r\text{-}re\text{'e}^2n$ . See **ACROTIERIA**.

**AKSIS**, n.  $A^2k\text{'si}^2s$ . An old English form for access; ague, fever. [B, 39.]

**AKTINIEN** (Ger.), n. pl.  $A^2k\text{'ti}^2-ne\text{'e}^2n$ . See **ACTINILÆ**.

**AKULKARA** (Ar.), n. Pellitory (*Anacyclus pyrethrum*).

**AKULONION** (Lat.), n. n.  $A^2k(a^2k)\text{-}u^2(u)\text{'lo}\text{'ni}^2\text{'o}^2n$ . A name applied by Dioscorides to the genus *Lychnis*. [B, 121.]

**AKUMETER** (Ger.), n.  $A^2k\text{'u}\text{'ma-te}^2r$ . See **ACOUETER**.

**AKUND** (Hindústani), n. The *Calotropis gigantea*. [B, 172.]

**AKUR KHURA** (Ar.), n. See **AKULKARA**.

**AKURGIE** (Ger.), n.  $A^2k\text{'ur-ge'}$ . See **ACIDURGIA**.

**AKUSMETER, AKUSIOMETER** (Ger.), n's.  $A^2k\text{'us-i}^2\text{'ma-te}^2r\text{'-i}^2\text{'o}^2m\text{'a-te}^2r$ . See **ACOUETER**.

**AKUSTICUS** (Ger.), n.  $A^2k\text{'us-ti}^2\text{'kus}$ . The auditory nerve. See **ACUSTICUS**.

**AKUSTICUSKERN** (Ger.), n.  $A^2k\text{'us-ti}^2\text{'kus-karn}$ . Also written *Acusticus Kern*. The auditory nucleus.—**Aeusserer A.** See **Superior auditory nucleus**.—**Innerer A.** See **Inner auditory nucleus**.—**Obere Abtheilung des vorderen A's.** The superior auditory nucleus. [I, 17.]—**Oberer A.** See **Superior auditory nucleus**.

**AKUSTICUSWURZEL** (Ger.), n.  $A^2k\text{'us-ti}^2\text{'kus-vurtz-e}^2l$ . The root of the auditory nerve.—**Aeusserer A.** The external (superior) root of the auditory nerve. [I, 17.]

**AKWA**, n. A Japanese name for the *Cucumis sativa*. [L, 105.]

**AKYSTIQUE** (Fr.), adj.  $A^2k\text{'i}^2s\text{'tek}$ . Having no swimming-bladder. [L, 41.]

**AL** (Hindústani), n. The *Morinda citrifolia*. [B, 172.]

**ALA** (Lat.), n. f.  $A(a^2y)\text{'la}^3$ . Gr., *πτερυξ, πτερύγιον*. Fr., *aile*. Ger., *Flügel*. It., Sp., *ala*. A wing or wing-like structure. 1. The wing of a bird or insect. 2. The axilla (obsolete). 3. The whole arm or shoulder. 4. In animals, the shoulder-blade. 5. Any wing-like process of a bone, muscle, or other part of the body. 6. The pavilion of the ear. 7. One of the two wing-like lateral portions of each piece of the shell of a cirripede, when such portion is overlapped by the portion adjacent. Cf. **RADIUS**. 8. In botany, any thin membranous wing-like projection upon a plant, especially one of the lateral petals of a papilionaceous flower, or a membranous lateral expansion of a seed or a stalk; also the axil or axilla. [A; B, 1, 19, 77, 100; L, 48, 53, 66, 67.]—**A. alba lateralis**. The glossopharyngeal nucleus. [L, 2.]—**A. alba medialis**. The hypoglossal nucleus. [L, 6.]—**A. auriculæ, A. auris**. The pinna of the ear. [L, 50.]—**A. brevis**. Ger., *kurzer Flügel*. A bird's wing which when folded does not reach beyond the sides of the coccyx. [B, 7.]—**A. calcarata**. A bird's wing of which the carpus is provided with one or two horny spurs. [B, 7.]—**A. cinerea**. Fr., *aile grise*. A small triangular tract of gray matter in the lower part of the fourth ventricle of the brain, the base of which corresponds to the point of the calamus, while its apex extends upward almost to the striæ medullares. According to Stilling, it gives origin to part of the vagus roots. [L, 6.]—**A. descendens**. The pterygoid process of the sphenoid bone. [L, 117.]—**A. diaphragmatis**. The lateral segments of the diaphragm. [L.]—**A. diaphragmatis**. A bird's wing the length of which when folded equals or exceeds that of the body. It comprises *A. longa* and *A. perlonga*. [B, 7, 48.]—**A. ethmoidalis**. A wing-like expansion on the extremity of the crista galli of the ethmoid bone. [L, 114.]—**A. extrema**. See **ALULA**.—**A. fornix**. The posterior pillar of the cerebral fornix. [I, 3.]—**A. impennata**. A bird's wing the plumes of which are equal in length, loose, and unsuited for flying. [B, 7.]—**Alæ internæ clitoridis**. It., *ali della vulva*. The labia minora of the vulva. [L, 104.]—**Alæ laterales**. 1. See *Alæ magnæ ossis sphenoidæ*. 2. See *Alæ spinæ nasalis*. [L, 31, 115.]—**Alæ laterales ossis sphenoidæ. See *Alæ magnæ ossis sphenoidæ*. [L, 31.]—**A. longa**. Ger., *langer Flügel*. A bird's wing which is of such a length as to reach just to the tip of the tail. [B, 48.]—**A. longissima**. Ger., *äusserst langer Flügel*. A bird's wing which extends far beyond the tip of the tail. [B, 48.]—**A. magna**. One of the *alæ magnæ ossis sphenoidæ*. [L, 31.]—**Alæ magnæ ossis sphenoidæ, Alæ magnæ ossis sphenoidis, Alæ majores**. Fr., *grandes ailes du sphénoïde*. Ger., *grosse Flügel des Keilbeins*. It., *ali grandi dello sfenoide*. Syn.: *alæ laterales* (seu temporales), *aliphenoidalia*. The great, or temporal, wings of the sphenoid bone; the wing-like processes projecting from each side of the body of the bone. They present 3 surfaces: a cerebral, forming a part of the base of the skull; an orbital, forming a part of the outer wall of the orbit; and a temporal, forming a part of the temporal and zygomatic fossæ. The posterior extremities terminate in the spinous process which is inserted in the angle between the squamous and petrous portions of the temporal bone. The *alæ magnæ* are separated from the *alæ parvæ ossis sphenoidæ* by the sphenoidal fissure, and contain constantly 3 foramina, the foramen rotundum, foramen ovale, and foramen spinosum. [L.]—**A. mediocris**. A bird's wing which, when folded, is of a sufficient length to cover the base of the tail. [B, 7.]—**Alæ minimæ ossis sphenoidæ**. Two small bony processes on each side of the ethmoidal spine of the sphenoid bone. [L, 34.]—**Alæ minores clitoridis**. The labia minora of the vulva. [L, 104.]—**Alæ minores****

**ossis sphenoidi.** See *Alae parvae ossis sphenoidi*.—*Alae muliebres minores.* The labia minora of the vulva. [L, 63, 68.]—*Alae narium, Alae nasi.* Fr., *ailes du nez.* Ger., *Nasenflügel.* It., *ali del naso.* The lower lateral cartilages of the nose. [A; L.]—*Alae of the sacrum.* Fr., *ailes du sacrum.* The wings of the sacrum; the triangular portions of the bone, on each side, which stand out laterally and are made up of outgrowths from the central portion fused together at their extremities; the supposed analogues of ribs. [A.]—*Alae of the thyroid cartilage.* The lateral flat portions of the thyroid cartilage which unite anteriorly. [L.]—*Alae of the vomer.* See *Alae vomeris*.—*Alae orbitales ossis sphenoidi.* See *Alae parvae ossis sphenoidi*.—*Alae ossis sphenoidalis.* Fr., *ailes du sphenode.* Ger., *Flügel des Keilbeins, Keilbeinflügel.* It., *ali dello sferoide.* The wing-like processes of the sphenoid bone. [A; L.] See *Alae magnae ossis sphenoidi*, *Alae minime ossis sphenoidi*, *Alae parvae ossis sphenoidi*, and *Alae ossis sphenoidi descendentes*.—*Alae ossis sphenoidi descendentes.* Ger., *Gaumenflügel.* The pterygoid plates of the sphenoid bone. [L, 117.]—*Alae palatina.* The pterygoid process of the sphenoid bone. [L.]—*Alae parvae Ingrassiae.* Ger., *kleine Flügel des Keilbeins.* It., *ali piccole dello sferoide.* Syn.: *alae orbitales* (seu *minores*) *ossis sphenoidi*, *processus ensiformes ossis sphenoidi*, *orbitasphenoidalia*. The lesser, or orbital, wings of the sphenoid bone; wing-like processes projecting from the upper part of each side of the body of the bone. A portion of the anterior lobes of the brain rests upon their upper surface; the lower surface forms the back part of the roof of the orbit; in their base they contain the foramen opticum, and a projection from each near the sella turcica forms the anterior clinoid process. [L.]—*A. perlonga.* Ger., *sehr lange Flügel.* A bird's wing of such a length as to extend a little beyond the tip of the tail. [B, 48.]—*A. perquam brevissima.* Ger., *äusserst kurzer Flügel.* A bird's wing which is so short as not to reach the base of the tail. [B, 48.]—*A. pontis.* Ger., *Flügel der Brücke.* Reichert's term for what Henle calls the *ponticulus*, a small transverse ridge between the pyramids of the medulla oblongata and the pons Varolii. [A.]—*Alae processus vermiformis lobuli centralis.* Ger., *Flügel des Centralhöfchens.* The lamellae connected with the lobus centralis of the superior vermiform process of the cerebellum. [L, 63.]—*Alae pterygoideae.* The pterygoid processes of the sphenoid bone. [L, 63.]—*Alae pudendi muliebris.* The labia majora and minora of the vulva. [L, 63.]—*Alae pulmonum.* Fr., *ailes du poulmon.* Ger., *Lungenflügel.* Syn.: *lobi pulmonum*. The lobes of the lungs; also the lungs themselves. [L.]—*Alae septi cartilagineae narium.* The superior and inferior lateral cartilages of the nose. [L, 63.]—*Alae spinæ nasalis.* Syn.: *alae laterales.* Wing-like processes on each side of the nasal spine of the frontal bone. [L, 81.]—*A. spuria.* See *ALULA*.—*A. sublonga.* Ger., *fast langer Flügel.* A bird's wing of such a length as not quite to reach to the tip of the tail. [B, 48.]—*Alae temporales ossis sphenoidi.* Ger., *Temporallflügel.* See *Alae magnae ossis sphenoidi*.—*A. uvulae.* A thin medullary lamina extending from the posterior part of the uvula of the cerebellum to the amygdalæ. [I, 6.]—*Alae vespertilionis.* Ger., *Fledermausflügel.* It., *ali dell' uero.* Literally, the bat's wings; the broad ligaments of the uterus, from their resemblance to the outspread wings of a bat. [A.]—*Alae vomeris.* The alae of the vomer; the two divisions of the superior thick border of the vomer which fit under the body of the sphenoid, receiving the rostrum of the latter into the groove between them. [C.]—*Alae vulvae.* The labia minora. [L, 50.]—*Hircus alarum.* See under *HIRCUS*.

**ALABA, n.** See *ALABE*.

**ALABARI, n.** Ar., *al-abâr*, lead. An alchemical term for lead. [B, 52.]

**ALABASTER, n.**  $A^1a^2b^2a^2s^2u^5r$ . From *ἀλάβαστρος*, said to be derived from a town, Alabastron, in Upper Egypt, where a. was obtained. Lat., *alabastrites* (1st def.), *alabastrer*, *alabastrum*. Fr., *albâtre.* Ger., *Alabaster.* Sp., *alabastro.* 1. A name given to several calcareous minerals distinguished by their translucency and susceptibility of a polish. 2. Alabastrum (*q. v.*). [B.]—*Alabastri capparis* (Lat.). Capers. See *CAPPARIS spinosa*.—*A. glass.* See *Alabaster glass*.—*A. stein* (Ger.). See *A.* (1st def.).—*Common a.* Ger., *Gipsalabaster.* A compact mineral, capable of receiving a high polish, consisting of calcium sulphate (gypsum), with traces of iron oxide; obtained chiefly from Italy and employed for ornamental purposes. [B, 7, 49, 77.]—*Gipsa* (Ger.). See *Common a.*—*Kalka* (Ger.). See *Oriental a.*—*Oriental a.* Ger., *Kalkalabaster.* A mineral found in limestone caverns in the form of stalactites and in other places where water containing lime in solution is present. It consists of a fibrous translucent form of calcium carbonate. [B, 49, 77.]

**ALABASTER CAVE, n.**  $A^1a^2a^2ba^2s^2u^5r$  kav. A cave in El Dorado County, California, containing a mineral spring rich in calcium salts. [B, 15.]

**ALABASTRINUS** (Lat.), adj.  $A^2l(a^1l)a^2b(a^3b)a^2s(a^3s)tri(tre)^n$   $nu^2s(nu^4s)$ . Of or pertaining to alabaster; resembling alabaster. [B, 78.] See *UNGUENTUM alabastrinum*.

**ALABASTRON** (Lat.), n.  $A^2l(a^1l)a^2b(a^3b)a^2s(a^3s)tro^2n$ . A sort of ointment. [L, 104.]

**ALABASTRUM, ALABASTRUS** (Lat.), n's n, and m.  $A^2l(a^1l)a^2b(a^3b)a^2s(a^3s)tru^2m(tru^4m)$ ,  $-tru^2s(tru^4s)$ . Gr., *ἀλάβαστρον, ἀλάβαστρος*. Also written *alabaster* (*q. v.*). The form *alabastrus* is not classical. 1. A box for holding ointment. [Pliny.] 2. A flower-bud, so called from its resembling a box of ointment. [B, 19; Pliny (B, 134).]

**ALABE** (Lat.), n. f.  $A^2l(a^1l)a^3be(ba)$ . Gr., *ἀλάβη*, a sort of ink. Carbon. [L, 50.]

**ALABRI, n.** See *ALABARI*.

**ALACAB, ALACAP, n's.** From Ar., *al-ooqâb*, an eagle. An alchemical term for sal ammoniac. [B, 52; L, 53.]

**ALACH** (Ger.), n.  $A^3la^3ch^2$ . A village near Erfurt, with a weak ferruginous spring.

**ALACREATINE, n.**  $A^2l-a^2k-re^2a^2t-i^2n$ . From ALANINE and CREATINE. Fr., *alacréatine.* Ger., *Alakreatin.* It., Sp., *alacreatina.* Syn.: *lactyl guanidine.* A base,  $C_4H_9N_3O_3$ , isomeric with creatine, and formed by the direct combination of alanine with cyanamide. [B, 2.]

**ALACREATININE, n.**  $A^2l-a^2k-re^2a^2t-i^2n-i^2n$ . From ALANINE and CREATININE. Fr., *alacréatinine.* Ger., *Alakreatinin.* It., Sp., *alacreatinina.* A body, isomeric with creatinine, obtained by the dehydration of alacreatine, and forming long prismatic crystals of the composition  $C_4H_7N_3O = CH_3.CH.NH(CO.NH) : C : NH$ ; usually associated with one molecule of water of crystallization. [B, 2, 4.]

**ALACTIA** (Lat.), n. f.  $A^2l(a^1l)a^2k(a^3k)ti^2a^3$ . Fr., *alactie.* Ger., *Alaktie.* See *AGALACTIA*.

**ALACUOTH, n.** An Arabic term for one who defecates during coition. [L, 53.]

**ALADY, n.** A Hindûstan name for the *Curcuma longa*. [L, 105.]

**ALAEFORM, adj.**  $A^2l-e^2fo^2rm$ . See *ALIFORM*.

**ALAFI, n.** See *ALKALI*. [L, 53.]

**ALAFOR, ALAFORT, n's.** See *ALKALI*.

**ALAFREG, n.** A kind of white lead. [L, 53.]

**ALAGAO, n.** Syn.: *arago, tongay* (1st def.). 1. A shrub growing in the Philippines, used in diseases of the head and stomach. [L, 109.] 2. The sacrum or coccyx. [L, 45.]

**ALAGHEÆ** (Lat.), n. f. pl.  $A^2l(a^1l)a^2g(a^3g)e^2e^2e^2e^2$ . See *ALHAGÆÆ*.

**ALAGI, n.** See *ALHAGI*.

**ALAHABAR, n.** See *ALABARI*.

**ALAHATIBIS, n.** See *LAPIS rubeus*.

**ALAHIC, n.** An alchemical name for an oven, also for charcoal or carbon. [L, 63.]

**ALAIOS** (Lat.), adj.  $A^2l(a^1l)a^2(a^3a^2)i^2o^2s$ . See *ALAIOS*.

**ALAIKE** (Fr.), adj.  $A^3l-a^2r$ . See *ALAR*.

**ALAIS** (Fr.), n.  $A^3l-a$ . A sub-prefecture of the department of Gar in France, near which are several mineral springs, of which the following are the most important: 1. *Mas de Boac*, not used. 2. *Brouzen*, containing iron and arsenic and used for vaginal douches. 3. *La Marquise*. 4. *La Comtesse*, containing iron, calcium, and magnesium, and having a purgative action. [L, 87.]

**ALAISE, ALAIZE** (Fr.), n's.  $A^3l-az$ . See *ALÈZE*.

**ALALIA** (Lat.), n. f.  $A^2l(a^1l)a^2l(a^3l)i^2a^3$ . From a priv., and *alalēv*, to talk. Fr., *alalie.* Ger., *Alalie.* Lordat's name for an inability to utter words, especially when such inability is due to injury or disease of the vocal apparatus itself and not to central causes. [B, 108; D.] Cf. *APHASIA*, *DYSALALIA*, and *PARALALIA*.

**ALAMAD, n.** From Ar., *al-ithmud*, antimony. An alchemical name for antimony. [B; L, 104.]

**ALAMBIC** (Fr.), n.  $A^3l-a^3n^2-bek$ . See *ALEMERIC*.

**ALAMBICUS** (Lat.), n. m.  $A^2l(a^1l)a^2m(a^3m)bi^2ku^3s(ku^4s)$ . See *ALEMERIC*.

**ALAMED, n.** See *ALAMAD*.

**ALAMEDA DE CERVERA** (Sp.), n.  $A^3l-a^3ma^2da^3a$  *tha-ra^3*. A cold chalybeate spring in the province of Ciudad Real in Spain. [L, 49.]

**ALAMEDA WARM SPRINGS, n.**  $A^3l-a^3ma^2da^3a$ . Warm springs near San José, in Alameda County, California, containing sulphur, calcium, magnesium, and iron. [B, 15.]

**ALAMPES** (Lat.), adj.  $A^2(a^3l)a^2m(la^3m)pez(pe^2s)$ . Gr., *ἀλαμπής*. Obscure (said of fever). [L, 50.]

**ALAMUM, n.** See *ARUM maculatum*. [L, 105.]

**ALAND** (Ger.), n.  $A^3-lan^d$ . See *ALANT*.

**ALANDAHAL, n.** See *ALHANDAL*.

**ALANDINA** (Lat.), n. f.  $A^2l(a^1l)a^2n(a^3n)di^2de^2na^3$ . See *MORINGA*.

**ALANFUTA, n.** An old name of a vein, situated between the chin and the lower lip, which was cut for the cure of foetor of the mouth. [L, 53.]

**ALANGAZI, n.** The name of some South American springs which contain a small amount of chlorides. [L, 49.]

**ALANGE** (Sp.), n.  $A^3-lan^2ha$ . Warm alkaline springs in Spain, near Merida, in the province of Badajoz. [L, 49.]

**ALANGI, n.** A Malabar name for the *Alangium decapetalum*. [L, 49.] Also written *alingie*.

**ALANGIACEÆ** (Lat.), n. f. pl.  $A^2l(a^1l)a^2n(a^3n)ji^2gi^2a^2s^2e^2e^2e^2e^2$ . From *ALANGIUM*. Fr., *alangiacées.* Ger., *Alangiaceen.* It., *alangiacee.* Alangiads; Lindley's name for an order of plants, belonging to his alliance *Onagraceae*, corresponding to the *Alangiceæ* of De Candolle. [B, 170.]

**ALANGIACEOUS, adj.**  $A^2l-a^2n-ji^2a^2shu^2s$ . Fr., *alangiacé.* Of or pertaining to the *Alangiaceæ* or *Alangiceæ*. [B.]

**ALANGIADS, n. pl.**  $A^2l-a^2n^2ji^2a^2dz$ . The *Alangiaceæ*. [B, 19.]

**ALANGIEÆ** (Lat.), n. f. pl.  $A^2l(a^1l)a^2n(a^3n)ji^2ge^2e^2e^2e^2$ . Fr., *alangiees.* Ger., *Alangiees.* An order of plants whose typical genus is *Alangium*; separated by De Candolle from the *Myrtaceæ*, from which they are distinguished by the anthers being adnate and the fruit one-celled. [B, 19.]

**ALANGIER** (Fr.), n.  $A^3-lan^2zhe-a$ . See *ALANGIUM*.

**ALANGILAN, ALANGIULAN**, n's.  $A^2l\text{-}an^2g^2l^2a^2n$ ,  $j^2\text{-}u^2\text{-}la^2n$ . See CANANOA oil.

**ALANGIUM** (Lat.), n. n.  $A^2l(a^3l)\text{-}a^2n(a^3n)/j^2(gi^2)\text{-}u^3m(u^4m)$ . From *alangi* or *alingie*, the Malabar name for *A. decapetalum*. Fr., *alangier*. Syn.: *Angolam* [Adanson], *Angolamia* [Scopoli], *Kara-angolam* [Adanson]. A genus of alangiaceous trees growing in India, established by Lamarck. [B, 19, 170.]—**A. decapetalum** [Lamarck]. Syn.: *Grewia salvifolia* [Linnaeus]. Sage-leaved a.; akola, akar-kanta, alangi or alingi-marum, angolam. A species growing in rocky places in Malabar. The juice of the bitter, aromatic root is employed as an anthelmintic and the root itself as a hydragogue cathartic in cases of dropsy, and in the form of a powder as an antidote to snake-bites. [B, 172, 173; L, 49.]—**A. hexapetalum** [Roxburgh]. Kara-angolam. A species growing in Bengal, Malabar, and Africa, having properties similar to those of *A. decapetalum*, and also used as a hydragogue cathartic. [B, 172, 173; L, 49.]—**A. Lamarekii** [Thwaites]. See *A. hexapetalum*.—**A. tomentosum** [De Candolle]. See *A. decapetalum*.

**ALANINE**, n.  $A^2l(a^3l)\text{-}n^2n^2n$ . Fr., *alanine*. Ger., *Alanin*. It., *Sp., alanina*. Syn.: *lactamic acid*, *amidopropionic acid*. 1. A body, isomeric with lactamide, sarcosine, and urethane, produced by the action of hydrochloric and hydrocyanic acids upon aldehyde-ammonia, and occurring under the form of prismatic crystals having the composition  $C_2H_7NO_2 = CH_3\cdot CH(NH_2)\cdot CO\cdot OH$ , or that of propionic acid in which amidogen replaces hydrogen in the acid radicle. It may also be regarded as lactic acid in which amidogen replaces hydroxyl. It unites with acids, salts, and metallic oxides to form compounds. 2. A generic term for the series of amic acids of which a. is a type, formed from the hydroxy-acids of the glycolic series, including glycocine (glycolamic acid), a. (lactamic acid), leucine (leucamic acid), etc. [B, 2, 4, 158.]

**ALANT** (Ger.), n.  $A^3\text{-}la^2nt'$ . The genus *Inula*.—**Aechter A.** Elecampane (*Inula helenium*). [L, 80.]—**A'aquavit.** A tincture of *Inula helenium* made with brandy. [A.]—**A'astervurzel.** Elecampane root. [B, 180.]—**A'beer.** See AALBEERE.—**A'beerstrauch.** The black-currant bush. [L, 46.] See *Ribes rubrum*.—**A'bier.** Beer made from or flavored with elecampane. [A, 305.]—**A'campher.** Fr., *camphre d'aunée*. Syn.: *inulol*. Alant (or elecampane) camphor; a substance having the properties of a camphor, extracted from elecampane root, having probably the composition  $C_{15}H_{16}O$ , and in taste and odor resembling peppermint. It is one of the constituents of what was formerly known as helenin. [B, 2, 18.]—**A'extract.** Extract of elecampane. See *Extractum HELENII*.—**A'kampher.** See *A'campher*.—**A'meth.** Mead made from or flavored with elecampane. [A, 305.]—**A'salbe.** See *Unquenum HELENII*.—**A'säure.** Alantic acid. [B.]—**A'säureanhydrid.** Alantic anhydride. [D, 18.]—**A'stoff.** Alantin; inulin. [L.]—**A'syrup.** See *Syrupus ENULÆ*.—**A'tinctur.** See *Tinctura HELENII*.—**A'vein.** See *Vinum ENULÆ*.—**A'wurzel.** See *Inula helenium*.—**A'wurzel-extract.** See *Extractum HELENII*.—**A'wurzel-salbe.** See *Unquenum HELENII*.—**Brusta'**. *Inula helenium*. [B, 180.]—**Deutscher A.** *Inula germanica*. [L, 80.]—**Echter A.** *Inula helenium*.—**Englischer A.** *Inula britannica*. [L, 80.]—**Grosser A.** *Inula viscosa*. [B, 180.]—**Meerfeischelähnlicher A.** *Inula crithmifolia*. [B, 180.]—**Starkriechender A.** *Inula graveolens*. [B, 180.]—**Steifhaariger A.** *Inula hirta*. [B, 180.]—**Wahrer A.** *Inula salicina*. [B.]—**Weidenblättriger A.** *Inula salicina*. [L, 80.]

**ALANTIC**, adj.  $A^2l\text{-}a^2n^2ti^2k$ . Fr., *alantique*. Derived from elecampane. [B.]—**A. acid.** Fr., *acide alantique*. Ger., *Alant-säure*. Syn.: *inulinic acid*. An acid of the composition  $C_{15}H_{16}O_8$ , formed by the union of a. anhydride with water. [B, 5, 15.]—**A. anhydride.** Fr., *anhydride alantique*. Ger., *Alant-säureanhydrid*. A crystalline substance,  $C_{15}H_{16}O_8$ , melting at  $66^\circ C$ , obtained from elecampane root and sometimes occurring as a natural efflorescence on roots which have been kept a long time. [B, 15.]

**ALANTIN**, n.  $A^2l\text{-}a^2n^2ti^2n$ . Lat., *alantinum*. Fr., *alantine*. Ger., *Alantin*. *Alantstoff*. It., *Sp., alantina*. A name given by Rose to what is now known as inulin. [B, 2, 5.]

**ALANTOIS**, n. See ALLANTOIS.

**ALANTOL**, n.  $A^2l\text{-}a^2n^2to^2l$ . From ALANT and OLEUM. Ger., *Alantöl*. An oily liquid, boiling at  $200^\circ C$ , and having probably the composition  $C_{15}H_{16}O$ , obtained from elecampane root and forming what used to be known as helenin. [B, 2, 8.]

**ALANTOTOXICON** (Lat.), n. n. See ALLANTOTOXICON.

**ALAO** (Lat.), adj.  $A^2l(a^3l)a^2(a^3)\text{-}o^2s$ . Gr., *ἀλαός*, blind. Obscure, unnoticed. A term applied by Hippocrates to forms of tabes (*φθίσις ἀλαός*) which are latent or unobserved. [B, 115; L, 50.]

**ALATOCUS** (Lat.), adj.  $A^2l(a^3l)a^2(a^3)\text{-}o^2t^2o^2k\text{-}u^3s(u^4s)$ . Gr., *ἀλατόκος* from *ἀλαός*, blind, and *τίκτειν*, to bring forth. Bringing forth the young blind, as in the case of dogs. [L, 50.]

**ALAP** (Hung.), n. A town in Hungary containing two mineral springs, *Felső-Alap* (Ger., *Ober-Alan*) and *Alsó-Alap* (Ger., *Unter-Alap*). These contain in 1,000 parts the following constituents:

	Ober-Alap.	Unter-Alap.
Magnesium sulphate.....	3.136	4.094
Sodium sulphate.....	5.711	18.149
Calcium sulphate.....	1.828	0.260
Sodium chloride.....	4.186	14.498

At Unter-Alap there is a bathing establishment. [B, 108; L, 63.]

**ALAQUECA**, n. A native name for a small stone found in India, used as a styptic. [L, 103, 104.]

**ALAR**, adj.  $A^2la^3r$ . Gr., *πτερυγῶδης*. Lat., *alaris*. Fr., *alaire*. Ger., *flügelartig*, *flügelartig* (1st, 2d, 3d def's), *achselsständig* (4th def.). It., *alare*. Sp., *alar*. 1. Pertaining to a wing. 2. Pertaining to the shoulder or axilla. 3. Wing-like. 4. In botany, axillary.—

**A'arterie** (Ger.). See *Alar thoracic ARTERY*.—**A'ligamente** (Ger.). The lateral ligaments of the knee-joint.—**A'processe** (Ger.). The pterygoid processes of the sphenoid bone.—**A'stücke des Diaphragmas** (Ger.). The lateral segments of the diaphragm. [L, 80.]—**A'vene** (Ger.). See *ALAR VEIN*.—**A'venen der Nase** (Ger.). The veins of the alae of the nose. [L.]

**ALARARY**, adj.  $A^2la^3r\text{-}a^2r^2$ . See ALAR.

**ALARES** (Lat.), n., m. pl. of *Alaris* (*musculi* understood) for 1st def., or f. pl. (*partes* understood) for 2d def. 1. The pterygoid muscles. 2. See *ALÆ ossis sphenoidalis*. [L, 40, 104.]

**ALARIA** (Lat.), n. f.  $A^2l(a^3l)\text{-}a^2(a^3)r^2i^2a^3$ . Fr., *alarie*. 1. A genus of *Algae* (*Oosporeae*); belonging to the order *Eucoideae*. [B, 19, 35.] 2. A genus of *Entozoa*. [L.]—**A. esculenta** [Greville]. Badderlocks, hen-ware, murlins, honey-ware. An edible species of *Alga* found on the coasts of Great Britain. [B, 19, 35.]—**A. vulpis**. The *Holostomum alatum*. [Schrank (L, 8).]

**ALARIS** (Lat.), adj., and n. m.  $A^2l(a^3l)\text{-}a^2(a^3)r^2i^2s$ . 1. (Adj.) alar. 2. (N. with *musculus* understood.) A name applied to certain muscles.—**A. externus**. See *PTERYGOIDEUS externus*. **A. internus**. See *PTERYGOIDEUS internus*.

**ALARTAR**, n. See *Æs combustum*.

**ALARY**, adj.  $A^2la^3r\text{-}i^2$ . See ALAR and *A. MUSCLES*.

**ALAS** (Ar.), n. The *Myrtus communis*. [L, 105.]

**ALASALET** (Ar.), n. An alchemical term for sal ammoniac. [L, 84.]

**ALASCHIL**, n. See ALASHIL.

**ALASET**, n. See ALASALET.

**ALASHIL** (Ar.), n. Probably *σκίλλα* with the Ar., article *Al*. Also written *Alaschil*. Squill (*Scilla maritima*). [B; L, 105.]

**ALASTAR** (Ar.), n. See ALARTAR.

**ALASTROB**, n. Ar., *al-osrob*, lead. An alchemical term for lead; or, according to some, for lime. [B, 50, 52; L, 53.]

**ALATAN** (Ar.), n. See ALATON.

**ALATAR**, n. See ALARTAR.

**ALATE**, adj.  $A^2lat$ . Lat., *alatus*. Fr., *ailé*. Ger., *geflügelt*. It., *alato*. Sp., *alado*. Provided with wings or alae. [B.]

**ALATED**, adj.  $A^2la\text{-}te^2d$ . Alate. [L, 56.]

**ALATE-PINNATE**, adj.  $A^2lat\text{-}pi^2n^2nat$ . Of a leaf, pinnate and provided with an alate petiole. [L, 63.]

**ALATERN**, n.  $A^2la\text{-}ti^2n^2n$ . See ALATERNUS.

**ALATERNE** (Fr.), n.  $A^2l\text{-}a^2te^2rn$ . The *Rhamnus alaternus*. [B, 173.]—**A. bâtaré**. An African variety of *Ceanothus*. [B, 38.]

**ALATERNOIDES** (Lat.), adj.  $A^2l(a^3l)a^2t(a^3t)\text{-}u^5r(e^2r)\text{-}no\text{-}i(e)^2\text{-}dez(de^2s)$ . Gen., *alaternoid/eos*. From *alaternus*, and *ειδος*, likeness. Fr., *alaternoïde*. Resembling the *Alaternus* or *Rhamnus alaternus*.

**ALATERNUS** (Lat.), n. m.  $A^2l(a^3l)\text{-}a^2t(a^3t)\text{-}u^5r(e^2r)\text{-}nu^3s(nu^4s)$ . Perhaps related to alder. Fr., *alaterne*. Sp., *alaterno*. 1. A plant mentioned by Pliny; the alatern (*Rhamnus alaternus*). 2. A genus made by Tournefort, including the same plant, now referred to *Rhamnus*.—**A. latifolius**. See *RHAMNUS alaternus*.

**ALATION**, n.  $A^2l\text{-}a^2shu^2n$ . For deriv., see ALA. The state of being alate or winged; in zoölogy, the form and disposition of the wings of an insect. [B, 39.]

**ALATON**, n. Also written *alatan*. Gold litharge. [L, 84, 104.]

**ALATUS** (Lat.), adj., and n. m.  $A^2l(a^3l)a^2(a^3)r^2i^2s(tu^4s)$ . 1. (Adj.) alate. 2. (N.) a person in whom the scapulae project backward like wings. [B; L, 84.]

**ALAUDA** (Lat.), n. f.  $A^2l(a^3l)\text{-}a^2(a^3)u\text{-}da^3$ . Ger., *Lerche*. A lark. In zoölogy, a genus of inessorial birds, including the larks. [B.]—**A. arvensis** [Linnaeus]. Fr., *alouette*. Ger., *Feldlerche*. The common field-lark. Its blood (*sanguis alaudæ*) was formerly given in wine for the relief of colic and of calculous affections. [B, 180; L, 53, 105.]—**Sanguis alaudæ**. Fr., *sang de l'alouette*. Ger., *Lerchenblut*. See *A. arvensis*.

**ALAUN** (Ger.), n.  $A^3\text{-}la^3un$ . Alum.—**Aethylamina'**, **Aethylammoniuma'**. See ALUMINIUM and *ethylamine sulphate*.—**A'fera'**. See *ALUMEN saccharinum*.—**A'ähnlich**. Resembling alum. [L.]—**A'beize**. An aluminous mordant. [L, 46.]—**A'blumen**. See *Flowers* of ALUM.—**A'erde**. See the major list.—**A'erz**. An aluminous ore; a mineral from which alum is obtained. [A, 305.]—**A'geist**. See *Spiritus ALUMINIS*.—**A'haltig**. Aluminous; containing alum. [L, 43.]—**A'hydrat**. Aluminium hydrate. [A; L.]—**A'kessel**. A pan or boiler used for the evaporation of an aluminous solution in the preparation of alum. [B, 48.]—**A'klystier**. An enema containing alum. [L, 57.]—**A'kuchen**. See *ALUM cake*.—**A'mehl**. See *ALUM meal*.—**A'molken**. Alum whey. See *Serum lactis aluminatum*.—**A'mutter**. Alum ore. [L, 46.]—**A'mutter-lauge**. The mother liquor from which alum has been extracted. [B, 48.]—**A'pulver**. See *ALUM meal*.—**A'pyrophor**. See *Homburg's PYROPHORUS*.—**A'quelle**. An aluminous spring. [L.]—**A'rohlinge**. The "raw liquor" of the alum manufactories; the liquor from which alum is extracted. [B, 37, 48.]—**A'roth**. A red pigment derived from *Alaunschlamm*. [B, 48.]—**A'salpeter**. Aluminium nitrate. [A, 305.]—**A'salz**. Common alum occurring native. [A, 305.]—**A'sauer**. An adjective which, qualifying the name of a base, denotes the aluminous of that base. [B; L, 46.]—**A'säure**. Aluminic acid. [B.]—**A'schlamm**. A sediment containing iron, occurring as a by-product in the manufacture of alum, and used in the preparation of *Alaunroth* and other substances. [B, 48.]—**A'stift**. See *ALUM PENCIL*.—**A'snifat**. *A'sulphat*. Aluminium sulphate. [L, 46.]—**A'vergiftung**. Poisoning with alum. [A, 305.]—**A'wasser**. A medicinal aqueous solution of alum. See *Aqua ALUMINIS vitriolata*. In the pl., *A'wässer*, mineral waters

FROM above, white, and below, a tan. Fl., abundant. Ger., weiss-schwanzig. Having a white tail. [L. 116.]

**ALBICAUL**, adj. A<sup>2</sup>/bi<sup>2</sup>-ka<sup>4</sup>. From *albus*, white, and *caulis*, a stem. Lat., *albicaulis*. Fr., *albicaule*. Ger., *weissstengelig*. In botany, having the stem covered with a white down. [L, 107, 116.]

**ALBICEPS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-se<sup>2</sup>ps(ke<sup>2</sup>ps). Gen., *albicipitis*. Having a white head. [L, 116.]

**ALBICERIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-(be)/se<sup>2</sup>r(ke<sup>2</sup>r)-i<sup>2</sup>s. From *albus*, white, and *ceras*, a horn. Fr., *albicère*. See **ALBICORNIS**.

**ALBICOLLIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ko<sup>2</sup>/li<sup>2</sup>s. From *albus*, white, and *collum*, the neck. Fr., *albicolle*. Ger., *weissalsig*. Having a white neck. [L, 116.]

**ALBICOMUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ko<sup>2</sup>/mu<sup>2</sup>s(mu<sup>4</sup>s). From *albus*, white, and *coma*, hair. Having white hair. [L, 58.]

**ALBICORNIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-kor<sup>2</sup>/ni<sup>2</sup>s. From *albus*, white, and *cornu*, a horn. Fr., *albicorne*. Ger., *weisshornig*. Having white antennae. [L, 116.]

**ALBICOSTATUS, ALBICOSTUS** (Lat.), adj's. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ko<sup>2</sup>s-ta(ta<sup>3</sup>)/tu<sup>2</sup>s(tu<sup>4</sup>s), -ko<sup>2</sup>s/tu<sup>2</sup>s(tu<sup>4</sup>s). Fr., *albicosté*. Ger., *weissrippig*. Having white ribs (said of shells). [L, 116.]

**ALBID**, adj. A<sup>2</sup>/bi<sup>2</sup>d. See **ALBIDUS**.

**ALBIDIPENNIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-i<sup>2</sup>d-i<sup>2</sup>-pe<sup>2</sup>n<sup>2</sup>i<sup>2</sup>s. From *albidus*, white, and *penna*, a wing. Fr., *albidipenné*. Ger., *weissgeflegt*. Having white wings. [L, 116.]

**ALBIDULUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-d-u<sup>2</sup>(u)-lu<sup>2</sup>s(lu<sup>4</sup>s). Dim. of *albidus*. Somewhat white. [L, 58.]

**ALBIDURIA** (Lat.), n. f. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-d-u<sup>2</sup>(u)/ri<sup>2</sup>a<sup>3</sup>. From *albidus*, white, and *urine*, to micturate. Albuminuria. [L, 81.]

**ALBIDUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-d-u<sup>2</sup>s(u<sup>4</sup>s). Whitish. [B.] See **ANNULUS a**.

**ALBIFICATIO** (Lat.), n. f. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-fi<sup>2</sup>-ka(ka<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *albificatio*. 1. Albification. 2. The second "aqua spiritnalis" of the alchemists; one of the substances formed in the process of transmutation of metals. [B, 111; L, 1.]

**ALBIFICATION**, n. A<sup>2</sup>/bi<sup>2</sup>-fi<sup>2</sup>-ka<sup>3</sup>/shu<sup>3</sup>n. Lat., *albificatio*. Fr., *albification*. Ger., *Weissmachen, Metallbleichung*. It., *albificazione*. Sp., *albificación*. The process of bleaching or making anything white; especially, in alchemy, the rendering metals white in transmuting them into silver. [B, 1; L, 42, 46.]

**ALBIFLORUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-flo<sup>2</sup>/ru<sup>2</sup>s(ru<sup>4</sup>s). From *albus*, white, and *flos*, a flower. Fr., *albiflore*. Ger., *weissblumig*. Having white flowers. [L, 116.]

**ALBIFRONS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-fro<sup>2</sup>nz(fro<sup>2</sup>ns). Gen., *albifrontis*. White-browed; a specific epithet of some plants, e. g., *Adenostylis a*.

**ALBIGO** (Lat.), n. f. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-(be)/go. Gen., *albig'inis*. Mil-dew. [L, 63.]

**ALBILABRIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-la<sup>2</sup>b(la<sup>3</sup>b)/ri<sup>2</sup>s. From *albus*, white, and *labrum*, a lip. Fr., *albilabre*. Ger., *weisslippig*. Having white lips or labra (said of crustaceans with white-spotted labra and of univalve shells with a white border). [L, 116.]

**ALBIMANUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ma<sup>2</sup>(ma<sup>3</sup>)-nu<sup>2</sup>s(nu<sup>4</sup>s). Fr., *albinmane*. Ger., *weissständig*. Having white hands. [L, 116.]

**ALBIMEC**, n. Orpiment. [L, 84.] See **ARSENIC trisulphide**.

**ALBINA** (Sp.), n. A<sup>2</sup>/be<sup>2</sup>na<sup>3</sup>. A female albino. [L, 41, 95.]

**ALBIN D'ŒUF** (Fr.), n. A<sup>2</sup>/ba<sup>2</sup>n<sup>2</sup>-du<sup>2</sup>f. The white of egg. [L, 45.]

**ALBINE** (Fr.), n. A<sup>2</sup>/ben. Aleurone. [B, 121.]

**ALBINERVIUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-nu<sup>2</sup>r(ne<sup>2</sup>r)/vi<sup>2</sup>(wi<sup>2</sup>)-u<sup>2</sup>s(u<sup>4</sup>s). From *albus*, white, and *nervus*, a nerve. Fr., *albinervé*. Ger., *weissnervig*. White-nerved, as the leaves of some plants. [L, 116.]

**ALBINISM**, n. A<sup>2</sup>/bi<sup>2</sup>n-i<sup>2</sup>zm. From *albino*. Lat., *albinismus*, *albor natus*, *albinus æthiopia*, *achromatosis congenialis*, *leucithopia*. Fr., *albinisme, albinie*. Ger., *Leucithiopia, Leukopathie, Albinismus*. It., *albinismo, leucopatia*. Sp., *albinismo*. Syn.: *Albinismo, kakeralakism*. 1. The state of being an albino (q. v.). 2. Congenital achromatosis, either partial or general. See **ALBINISMUS partialis** and **universalis**. 3. The spontaneous decoloration of a plant or its parts. [A; B, 121; G; L, 79.]

**ALBINISMUS** (Lat.), n. m. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>n-i<sup>2</sup>zm(i<sup>2</sup>s)/mu<sup>2</sup>s(mu<sup>4</sup>s). Albinism. [A; F.]—**A. partialis**. Fr., *vittiligo congeniale*. Syn.: *epichrosis pœctilia*. Partial or circumscribed albinism; characterized by congenital white patches of skin, sharply defined, of various sizes, which usually remain unchanged during the life of the individual, but, according to some authors, increase in extent. It has been observed most often in negroes. See **VITILIGO** and **PREBALD negro**. [G.]—**A. universalis**. See **ALBINISM** (1st def.).

**ALBINISTIC**, adj. A<sup>2</sup>/bi<sup>2</sup>n-i<sup>2</sup>s/ti<sup>2</sup>k. Presenting the phenomena of albinism. [L, 56.]

**ALBINO**, n. A<sup>2</sup>/bi<sup>2</sup>(be)/no. From *albus*, white (through Port. and Sp., *albino*). Pl., a's, a'es. Lat., *æthiops albus, leucæthiops*. Fr., *albino, albinos, nègre blanc, blafard, kakeralaque*. Ger., *weisser Neger, Kakeralake*. It., Sp., *albino*. A term originally applied by the Portuguese to white negroes met with on the west coast of Africa. [Encycl. Britann.] A person in whom the normal pigmentation of the epidermis, the hair, the iris, and the choroid is congenitally deficient, the skin being uncommonly white, the hair yellowish, resembling flax or silk in color; and the eyes pinkish and usually affected with photophobia, more or less blepharospasm, and occasionally nystagmus. The term is also applied to the lower animals having like peculiarities. [F; G.] Cf. **DONDO, KAKERLAK**, and **BEDO**.—**A.-skin**. See **ALBINISM** and **ALPISISM**.

**ALBINOISM**, n. A<sup>2</sup>/bi<sup>2</sup>(be)/no-i<sup>2</sup>zm. Lat., *albinismus*. Fr., *albinisme*. See **ALBINISM**.

**ALBINOS** (Fr.), n. A<sup>2</sup>/be-no. An albino.

**ALBINOTIC**, adj. A<sup>2</sup>/bi<sup>2</sup>n-o<sup>2</sup>t/i<sup>2</sup>k. Pertaining to an albino; affected with albinism. [B.]

**ALBINUM** (Lat.), n. n. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>(be)/nu<sup>2</sup>m(nu<sup>4</sup>m). The *Gnaphalium murorum*. [L, 30.]

**ALBINURIA** (Lat.), n. f. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>n-u<sup>2</sup>(u)/ri<sup>2</sup>a<sup>3</sup>. From *albus* and *urine*, to micturate. Fr., *albinurie*. Albuminuria. [L, 80.]

**ALBION**, n. See **ALBINO**.

**ALBIPENNIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-pe<sup>2</sup>n<sup>2</sup>i<sup>2</sup>s. See **ALBIDIPENNIS**.

**ALBIPES** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-pe<sup>2</sup>z(pe<sup>2</sup>s). Gen., *albi'p'edis*. Ger., *weissfüssig*. Having white feet. [L, 116.]

**ALBIPERLE** (Fr.), n. A<sup>2</sup>/bi<sup>2</sup>-parl. Sp., *albi'perla*. A substance mixed with adipocere found by Moretti in a concretion of the abdominal parietes. [L, 43, 95.]

**ALBIQUE** (Fr.), n. A<sup>2</sup>/bek. A kind of chalk. [L, 103.]

**ALBIR**, n. Pitch obtained from the yew-tree. [L, 84.]

**ALBIROSTRIS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ro<sup>2</sup>s(tri<sup>2</sup>s). From *albus*, white, and *rostrum*, a beak. Fr., *albirostre*. Ger., *weisschnabelig*. Having a white beak or snout. [L, 116.]

**ALBISBRUNN** (Ger.), n. A<sup>2</sup>/bi<sup>2</sup>s-brun. A hydropathic establishment in the Canton of Zurich. [L, 57.]

**ALBITARSUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ta<sup>3</sup>/su<sup>2</sup>s(su<sup>4</sup>s). From *albus*, white, and *tarsus* (q. v.). Fr., *albitarse*. Ger., *weissfüsswrig*. Having white tarsi. [L, 116.]

**ALBITUDO** (Lat.), n. f. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-tu<sup>2</sup>(tu)/do. Gen., *albitu'dinis*. See **ALBINISM**.

**ALBIVENTUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bi<sup>2</sup>-ve(wa)/ni<sup>2</sup>-u<sup>2</sup>s(u<sup>4</sup>s). From *albus*, white, and *vena*, a vein. See **ALBINERVIUS**.

**ALBIVENTRAL**, adj. A<sup>2</sup>/bi<sup>2</sup>-ve<sup>2</sup>n(tri<sup>2</sup>a). From *albus*, white, and *venter*, the belly. Lat., *albiventer, albinventris*. Fr., *albiventre*. Ger., *weissbauchig*. White-bellied. [L, 116.]

**ALBIZZIA** (Lat.), n. f. A<sup>2</sup>/bi<sup>2</sup>z/i<sup>2</sup>a<sup>3</sup>. Fr., *albizzie*. Syn.: *Serianthus* [Bentham]. A genus of leguminous plants closely related to *Acacia*, from which they were separated by Durazzini. It comprises two sections, *Eualbizzia* and *Lophantha*. [B, 19, 170.]—**A. anthelmintica**. Syn.: *Acacia* (seu *Besenna*) *anthelmintica*. Besenna, mesenna, kumada; an Abyssinian tree bearing flowers in axillary heads, and having bipinnate leaves composed of one or two pinnae, each provided with 3 or 4 pairs of obovate leaflets. The bark is highly esteemed by the natives as a remedy for tape-worm. [B, 19.]—**A. lebbek**. See *ACACIA lebbek*.—**A. lophantha** [Bentham]. Syn.: *Acacia lophantha* [Willdenow]. An Australian species growing to a height of about 12 feet and bearing bright-yellow flowers. It is often cultivated. Its crushed roots and seeds give out an odor due perhaps to a mustard oil or some like constituent contained or developed in them. [B, 49; L, 73.]—**A. saponaria**. A species found in India, the bark of which acts like soap, forming a lather with water. [L, 87.]

**ALBKRAUT** (Ger.), n. A<sup>2</sup>/lb'kra<sup>3</sup>-ut. The *Eupatorium cannabinum*. [A, 305.]

**ALBODACTYLOUS**, adj. A<sup>2</sup>/bo-da<sup>3</sup>k'ti<sup>2</sup>l-u<sup>2</sup>s. From *albus*, white, and *δάκτυλος*, a finger. Lat., *albodactylus*. Fr., *albodactyle*. Having white digitated wings. [L, 110, 116.]

**ALBOFLAVESCENS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-fla<sup>2</sup>(fla<sup>3</sup>)-ve<sup>2</sup>s(we<sup>2</sup>s)/se<sup>2</sup>nz(ke<sup>2</sup>ns). From *albus*, white, and *flavescens*, light-yellow. Fr., *jaunâtre*. Ger., *weissgelblich*. Yellowish-white. [L, 63.]

**ALBOGUTTATUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-gu<sup>2</sup>t(gu<sup>4</sup>t)-ta(ta<sup>3</sup>)-tu<sup>2</sup>s(tu<sup>4</sup>s). From *albus*, white, and *gutta*, a drop. Ger., *weissefleckt*. Spotted with white. [L, 63.]

**ALBOLACTESCENS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-la<sup>2</sup>k(la<sup>3</sup>k)-te<sup>2</sup>s(se<sup>2</sup>nz(ke<sup>2</sup>ns). From *albus*, white, and *lactescens*, milky. Ger., *weissmilchicht*. Milk-white. [L, 63.]

**ALBOLITHE** (Fr.), n. A<sup>2</sup>/bo-let. A cement having magnesium chloride as its base. [L, 77.]

**ALBOPUBESCENS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-pu<sup>2</sup>(pu)-be<sup>2</sup>s(se<sup>2</sup>nz(ke<sup>2</sup>ns). From *albus*, white, and *pubescens*, pubescent. Pubescent with white hairs; hoary-pubescent. [L, 63.]

**ALBOR**, n. From Ar., *al-bâl*, urine. An alchemical name for the urine. [B, 50, 52.]

**ALBOR** (Lat.), n. m. A<sup>2</sup>/a<sup>3</sup>/bor. Gen., *albo'ris*. From *albus*. A whiteness, or something white. Hence: 1. The same as *albatto* and *albificatio*. 2. White of egg. [L, 53, 58.]—**A. cutis**. Achromatosis "diffused over the face or entire body." [G, 11; L, 83.] See **ALBINISM** (1st def.).—**A. nativus**. Albinism.—**A. ovi**. White of egg. [L, 104.]

**ALBORA**, n. A name given by Paracelsus to a skin disease resembling leprosy. [L, 53.] The same as **ALBARAS** (q. v.). [B, 52.]

**ALBORCA**, n. Mercury. [L, 84.]

**ALBOSE** (Fr.), n. A<sup>2</sup>/bos. Epinyctis. [L, 43.]

**ALBOT**, n. An alchemical term for a crucible. [L, 53.]

**ALBOTAL**, n. See **ALBOTIN**.

**ALBOTAL, ALBOTAR**, n's. Perhaps from Ar., *al-abâr*, molten lead. Cerussa. [B; L, 53, 84.]

**ALBOTARSUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-ta<sup>3</sup>/su<sup>2</sup>s(su<sup>4</sup>s). See **ALBITARSUS**.

**ALBOTIM, ALBOTIN**, n's. Ar., *al-bot'um*. An old pharmaceutical term for the pine-tree and pine-resin. [B, 52; L, 53.] See also **TERMINTHOS**.

**ALBOTIS**, n. Ar., *al-bot'um*. See **TERMINTHOS**.

**ALBO-TOMENTOSUS** (Lat.), adj. A<sup>2</sup>/a<sup>3</sup>/bo-to-me<sup>2</sup>n-to/su<sup>2</sup>s.

(su<sup>4</sup>s). From *albus*, white, and *tomentosus*, woolly. Ger., *weissfilzig*. Hoary-tomentose. [L, 63.]

**ALBOTRA**, n. See **ALBOTIN**.

**ALBOCOR**, n. Port., *albacor* (from Ar., *al-bukhûr*). A name formerly given to incense, or the tree furnishing incense; also to various aromatic woods, especially aloes-wood. [B, 52.]

**ALBO-VARIEGATUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-bo-va(wa<sup>3</sup>)-ri<sup>2</sup>e<sup>2</sup>-ga(ga<sup>3</sup>)tu<sup>3</sup>s(tu<sup>4</sup>s). From *albus*, white, and *variegatus*, variegated. Ger., *weissgefleckt*. White-spotted. [L, 63.]

**ALBO-VILLOSUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-bo-vi<sup>2</sup>l(wi<sup>2</sup>l)-lo<sup>3</sup>su<sup>3</sup>s(su<sup>4</sup>s). From *albus*, white, and *villosus*, shaggy. Ger., *weisszottig*. Hoary-villose; covered with tufts of white hair. [L, 63.]

**ALBO-VITTATUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-bo-vi<sup>2</sup>t(wi<sup>2</sup>t)-ta(ta<sup>3</sup>)tu<sup>3</sup>s(tu<sup>4</sup>s). From *albus*, white, and *vitta*, a band. Having white bands or vittae. [L, 63.]

**ALBRADE** (Ger.), n. A<sup>3</sup>lbr<sup>3</sup>a<sup>3</sup>-de<sup>2</sup>. The *Artemisia abrotanum*. [L, 46.]

**ALBRAUNE** (Ger.), n. A<sup>3</sup>lbra<sup>3</sup>-un-e<sup>2</sup>. *Mandragora*. [L, 37.]

**ALBUCA** (Lat.), n. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-fwa<sup>3</sup>/ka<sup>3</sup>. From *albus*, white, on account of the white hue of the flowers in some species. Bastard star-of-Bethlehem. A genus of liliaceous plants belonging to the suborder *Asphodelae* established by Willdenow. [L, 64, 67.]—**A. major** (Willdenow). An African species; the stalk contains mucilage and is used by the Hottentots for quenching thirst. [L, 105.]

**ALBUGINE** (Fr.), n. A<sup>3</sup>l-bu<sup>6</sup>-zhen. *Albugo*. [L, 72.]

**ALBUGINÉ** (Fr.), adj. A<sup>3</sup>l-bu<sup>6</sup>-zhe-na. *Albugineous*. [L, 49.]

**ALBUGINEA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-ji<sup>2</sup>n(gi<sup>2</sup>n)/e<sup>2</sup>-a<sup>3</sup>. Fem. of adj. *albugineus* (*tunica* understood). Fr., *albuginée*. Ger., *weisse Haut*. It., *Sp., albuginea*. A layer of firm, white fibrous tissue forming the investment of an organ or part. [L.]—**A. epididymidis**. Fr., *albuginée de l'épididyme*. Ger., *weisse Haut des Nebenhodens*. It., *albuginea dell'epididimo*. Sp., *albuginea del epididimo*. The fibrous coat of the epididymis, resembling the *A. testis*, but much less firm and strong. [B, 125.]—**A. hienis**. Fr., *albuginée de la rate*. Ger., *weisse Haut der Milz*. It., *albuginea della milza*. Sp., *albuginea del bazo*. Syn.: *tunica propria of the spleen*. The white, highly elastic fibrous coat, lying directly beneath the serous investment of the spleen, and sending into the interior of the organ trabecular projections which serve as sheaths for the splenic vessels. It contains numerous elastic fibres and a variable amount of unstripped muscular tissue. [B.]—**A. oculi**. Fr., *albuginée de l'œil*. Ger., *weisse Haut des Auges*. It., *albuginea dell'occhio*. Sp., *albuginea del ojo*. The sclerotic. [L.]—**A. ovarii**. Fr., *albuginée de l'ovaire*. Ger., *weisse Haut des Eierstocks*. It., *albuginea dell'ovario*. Sp., *albuginea de los ovarios*. The layer of firm fibrous tissue lying beneath the epithelial covering of the ovary. It is not properly a distinct tunic, but a part of the ovarian stroma distinguished from the rest by its density. [Quain (B).]—**A. penis**. Fr., *albuginée de la verge*. Ger., *weisse Haut der männlichen Ruthe*. It., *albuginea del pene (o della verga)*. Sp., *albuginea del pene (o del miembro viril)*. A strong, very elastic white fibrous coat, forming an investment common to both corpora cavernosa of the penis, and also furnishing for each corpus cavernosum a separate sheath from which fibrous trabeculae pass into the interior of this body. [Quain (B).]—**A. renum**. Fr., *albuginée des reins*. Ger., *weisse Haut der Nieren*. It., *albuginea dei reni*. Sp., *albuginea de los riñones*. The fibrous capsule of the kidneys; a firm, thin coat of fibrous tissue, enveloping the kidney and readily separable from the latter under normal conditions. [B.]—**A. testiculi**. Fr., *albuginée du testicule*. Ger., *weisse Haut des Hodens*. It., *albuginea del testicolo*. Sp., *albuginea de los testiculos*. Often called simply *a. tunica*. A. The dense, thick, unyielding layer of white fibrous tissue lying beneath the tunica vaginalis and completely investing the body of the testicle. It gives off at its posterior border a prolongation into the substance of the testis, forming an incomplete vertical septum (the *corpus Highmori* or *mediastinum testis*), from which again are given off fibrous cords passing to the inner surface of the *a. testis* and dividing the gland more or less completely into lobules. The *a. testis* affords a support for the vessels of the testicle, which ramify upon the inner surface of this membrane and along its fibrous prolongations, forming a network called the *tunica vasculosa*. [Quain (B).]

**ALBUGINEAN**, adj. A<sup>2</sup>l-bu<sup>2</sup>-ji<sup>2</sup>n'e-a<sup>2</sup>n. Fr., *albuginé*. Resembling the albuginea. [Todd (B, 39).]

**ALBUGINÉE** (Fr.), n. A<sup>3</sup>l-bu<sup>6</sup>-zhe-na. The albuginea. [L.]—**A. de la rate**. See *ALBUGINEA hienis*.—**A. de la verge**. See *ALBUGINEA penis*.—**A. de l'épididyme**. See *ALBUGINEA epididymidis*.—**A. de l'œil**. The albuginea oculi. [L, 49.] See *SCLEROTIC*.—**A. de l'ovaire**. See *ALBUGINEA ovarii*.—**A. des reins**. See *ALBUGINEA renum*.—**A. du pénis**. See *ALBUGINEA penis*.—**A. du testicule**. See *ALBUGINEA testis*.

**ALBUGINET** (Lat.), n. m. pl. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-ji<sup>2</sup>n(gi<sup>2</sup>n)/e<sup>2</sup>-i(e). Masc. pl. of adj. *albugineus* (*fungi* understood). A division of *Uredineae* made by Tulane, including the genus *Cystopus*, or white rust. [B, 170.]

**ALBUGINEOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>-ji<sup>2</sup>n'e-u<sup>3</sup>s. Lat., *albugineus*. Fr., *albuginé*, *albugineux*. It., *Sp., albugineo*. 1. Of or resembling white of egg; albuminous. 2. Of or pertaining to the albuginea; especially pertaining to the albuginea oculi or sclerotic. [B, 39; L, 42, 46, 95.] Cf. *A. FIBRE*.

**ALBUGINEUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-ji<sup>2</sup>n(gi<sup>2</sup>n)/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Of or resembling white of egg; white like albumen. [B.] See *ALBUGINEA*, *ALBUGINET*, *HUMOR a. oculi*, and *MEMBRANA albuginea*.

**ALBUGINITE** (Fr.), n. A<sup>3</sup>l-bu<sup>6</sup>-zhe-net. *Albuginitis*. [G.]—**A. syphilitique**. Record's term for syphilitic orchitis. [G.]

**ALBUGINITIS** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-ji<sup>2</sup>n(gi<sup>2</sup>n)-i(e)/ti<sup>2</sup>s.

Gen., *albuginitidis*. Fr., *albuginite*. Sp., *albuginitis*. Inflammation of the albuginea, especially of the albuginea testis; orchitis. Also any inflammation of white fibrous tissue. [G; L, 45, 63.]

**ALBUGINOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>-ji<sup>2</sup>n-u<sup>3</sup>s. See *ALBUGINEOUS* (1st def.).

**ALBUGINOUSNESS**, n. A<sup>2</sup>l-bu<sup>2</sup>-ji<sup>2</sup>n-u<sup>3</sup>s-ne<sup>2</sup>s. 1. The state of being albuginous; albuminousness. 2. The white of egg; albumen. [B, 39.]

**ALBUGO** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-go. Gen., *albuginis*. Fr., It., *albugine*. Syn.: *albula*, *macula*, *leucuma album oculi*. 1. A white spot or film upon the cornea, especially when due to a previous inflammation. (Obsolete.) 2. The white of egg. (Obsolete.) 3. A scaly eruption upon the head. 4. A section of the genus *Uredo* made by Persoon. [B, 39, 134, 170; F; L.]—**A. capitis**. See *A. (3d def.)*.—**A. corallii**. See *Magisterium CORALLIORUM*.—**A. oculi**. Ger., *Weisse im Auge*. The white of the eye.—**A. oculorum**. See *A. (1st def.)*.—**A. ovi**. See *A. (3d def.)*.

**ALBUHAR**, n. See *ALBOTAL*.

**ALBUHEN**, n. See *ALBOTIN*.

**ALBUKALIN**, n. A<sup>2</sup>l-bu<sup>2</sup>-ka<sup>2</sup>-i<sup>2</sup>n. A body found in the blood of leucemic patients, having the composition C<sub>8</sub>H<sub>16</sub>N<sub>2</sub>O<sub>8</sub> + H<sub>2</sub>O. [L, 63.]

**ALBULA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-la<sup>3</sup>. Fem. of adj. *albus* (*macula* understood). See *ALBUGO*.

**ALBULÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-le(la<sup>3</sup>e<sup>2</sup>). Properly *Aque Albule*. Fr., *albulæ*. The name given by the ancients to the mineral springs at Tivoli. [B, 134.] See *Acque Albule*.

**ALBULUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-lu<sup>3</sup>s(lu<sup>4</sup>s). Dim. of *albus*. Somewhat white. [B.]

**ALBUM** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>3</sup>m(bu<sup>4</sup>m). Neut. of adj. *albus*. A term applied to a number of substances distinguished by their whiteness, also (obs.) to leucorrhœa. [B, 39; L, 53.]—**A. candidense**. See *A. Hispanica*.—**A. canis**. See *A. græcum*.—**A. ceti**. *Spermaceti*. [B, 180.] See *CETACEUM*.—**A. græcum**. Ger., *Hundekoth*. Syn.: *spodium Græcorum*, *cynocoprus*, *stercus caninum album*. The white excrement of dogs which have been fed upon bones. It consists chiefly of calcium phosphate and has been used in medicine. [B, 7; L.]—**A. Hispania**, **A. hispanicum**. Fr., *blanc d'Espagne*. Substrate of bismuth, used for cosmetic purposes. [B; Gmelin (L, 105).]—**A. nigrum**. Ger., *Mäusekoth*. The excrements of rats and mice, formerly official under this title and used as a diuretic and purgative. [L.]—**A. oculi**. Fr., *blanc de l'œil*. Ger., *Weisse im Auge*. It., *bianco dell'occhio*. Sp., *parte blanca de los ojos*. An obsolete term for the white tunic of the eye. [F.] See *SCLEROTIC*.—**A. ovi**. The white of egg. [L.]—**A. Rhazis**. Fr., *onguent blanc de Rhazès*. From Rhazes, an Arabian physician. An ointment made of lead carbonate and lard. [B; L, 51.] See *Pomatum cum CARBONATE PLUMBI*.

**ALBUMEN** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-me<sup>2</sup>n. Gen., *albu'minis*. Gr., τὸ λευκὸν τοῦ ᾠῶν. Fr., *blanc d'œuf*, *albumine*. Ger., *Ei-weiss*, *Sameneiweiss* (2d def.). It., *albume*. Syn.: *oleuleon*, *liquor ovi albus*, *lac ovis*, *candidum ovi*. 1. The white of egg; also formerly applied to the principle contained in the white of egg or albumin (q. v.). 2. In botany, the nutritive material deposited in the seed about the embryo and serving for the nutrition of the latter during the growth. [A; B.]—**A. aluminosum**. Fr., *albumine aluminieuse*, *blanc d'œuf aluminieux*. A mixture of alum 60 grs. and 1 oz. each of rose-water and elder-flower water mixed with the white of one egg; used as an eye-wash. [Ph. batav., 1805; Disp. brunsv., 1777 (L, 85).]—**A. iodatum**. A preparation consisting of iodine 1 part and egg albumin 8 parts, mixed with water and dried. [L, 63.]—**A. oculi**. See *ALBUGO* (1st and 2d defs.).—**A. ovi**. See *A. (1st def.)*, and *OVI a.*—**A. spirituosum**. A mixture of white of egg and spirit, used as an external application.—**Solution of a.** A test solution of the Br. Ph., consisting of the white of one egg triturated with 4 oz. of distilled water and filtered. [B, 5.]—**Tata a.** Ger., *Tataeiweiss*. See under *Egg ALBUMIN*.—**Test solution of a.** [U. S. Ph.] A filtered solution of the white of one egg in 100 cu. cent. of distilled water. [B, 5.] Cf. *Solution of a.*

**ALBUMENATE**, n. A<sup>2</sup>l-bu<sup>2</sup>-me<sup>2</sup>n-at. See *ALBUMINATE*.

**ALBUMENIZE**, v. tr. A<sup>2</sup>l-bu<sup>2</sup>-me<sup>2</sup>n-iz. Fr., *albuminer*. To cover with white of egg. [B.]

**ALBUMENOID**, n. and adj. A<sup>2</sup>l-bu<sup>2</sup>-me<sup>2</sup>n-oid. See *ALBUMINOID*.

**ALBUMENTUM** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-me<sup>2</sup>n'tu<sup>3</sup>m(tu<sup>4</sup>m). White of egg. See *ALBUMEN*.

**ALBUMENURIA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-me<sup>2</sup>n-u<sup>2</sup>(u)/ri<sup>2</sup>a<sup>3</sup>. See *ALBUMINURIA*.

**ALBUMIN**, n. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>n. Lat., *albuminum*. Fr., *albumine*. Ger., *Albumin*. It., *albumina*. Sp., *albumina*. A substance constituting the chief and characteristic constituent of *albumen* (white of egg), and found also in the blood, chyle, lymph, and all serous fluids, as well as in the juice of flesh, in the brain, the pancreas, and the liquor amnii, and generally in all transudations from the blood-vessels, being essentially the same under all these circumstances. In certain conditions of disease it is found in the urine. (See *ALBUMINURIA*.) It also exists in small quantities in vegetable juices. In its chemical behavior, forming both acid and neutral salts (*albuminates*) with bases; and it also combines with acids to form the compounds known as *acid a's*. [B, 2, 4.] For the properties and chemical composition of the different varieties of *a.*, see *Egg a.*, *Serum a.*, *Vegetable a.*, and *Whey a.*—**A-drüse** (Ger.). See *DOTTERSTOCK*.—**A-gang** (Ger.). The vitelline duct in *Teniac*. [B, 27.]—**A-stoff**. See the major list.—**Acid a.** Fr., *albumine acide*. Ger., *Acidalbumin*. It., *albumina acida*. Sp., *albumina acida*. Syn.: *syntonin*, *albuminide*. A compound

formed by the prolonged action of an acid upon a. or an albuminoid. The acid a. obtained from ordinary a. is distinguished by its insolubility in distilled water and in neutral saline solutions, by its solubility in weak acid and alkaline solutions, and by its not coagulating from its acid or alkaline solution when heated to 70° C., although it coagulates readily as soon as its solution is neutralized. [B, 2, 12].—**A. peptone**. See under **PEPTONE**.—**Alkali a.** See **ALBUMINATE**.—**Animal a.** Fr., *albumine animale*. Ger., *thierisches Eiweiss*. It., *albumina animale*. Sp., *albumina animal*. The form of a. which occurs in the animal tissues or fluids.—**Bence-Jones a.** A form which gives no precipitate with an excess of nitric acid, unless left to stand or unless heated and left to cool, when it forms a solid coagulum, which redissolves on heating and coagulates again on cooling. It is separated from ordinary a. by adding nitric acid, boiling and filtering; while the ordinary a. remains on the filter, the B.-J. a. passes through. Found in the urine in false albuminuria. [L.]—**Blood a.** Fr., *albumine du sang*. Ger., *Blutalbumin*. It., *albumina del sangue*. See **Serum a.**—**Casiform a.** Fr., *albumine casiforme*. The name given by Mialhe to a variety of a. precipitated by nitric and acetic acids, but not coagulable by heating. The name *incipient a.* was given to a similar body by Prout. [A. Gubler (B, 46)].—**Circulating a.** Fr., *albumine circulatoire*. Ger., *circulirendes A.* 1. Voit's term for the a. in solution in the lymph, which he supposes to be derived from the blood, in contradistinction to that derived from the tissues. [J, 52; Hoppe-Seyler, "Arch. f. ges. Physiol.," vii, 1873, p. 993 (J); C. Voit, "Ztschr. f. Biol.," x, 1874, p. 202 (J)]. 2. A. in solution in the lymph, as distinguished from that stored in the tissues. [J.]—**Coagulated a.** Fr., *albumine coagulée*. Ger., *coagulirtes Eiweiss*. It., *albumina coagulata*. Sp., *albumina coagulada*. A. converted by the action of heat or of chemical reagents into a modification insoluble in water, in neutral saline solutions, and in dilute solutions of the acids or alkalis. Its chemical constitution is not well understood. [B, 12].—**Crystalline a.** Fr., *albumine cristalline*. Ger., *krystallinisches Eiweiss*. It., *albumina cristallina*. Sp., *albumina cristallina*. A form of a. obtained by Grüber ("Journ. f. pract. Chem.," n. F., xxiii, 1880, p. 97) from pumpkin-seeds and by Ritthausen ("Ib.," xxiii, p. 481; xxv, pp. 181, 187) from various oily seeds (such as those of the hemp and castor-oil plant and sesame). Grüber's a. was obtained in the form of octahedral crystals, formed crystalline compounds with the alkaline metals and alkaline earths, and had the percentage composition: C, 53.21, H, 7.22, N, 19.22, S, 1.07, O, 19.10, ash, 0.18. Ritthausen's a. was also crystalline, and had the composition: C, 50.88 to 50.98, H, 6.92 to 6.98, N, 18.57 to 18.73, S, 0.77 to 0.82, O, 22.55 to 22.79. [B.]—**Derived a.** Fr., *albumine dérivée*. Ger., *Eiweisskörper*. A modified form of a. produced by the action of various chemical reagents. [B.] See **Acid a.** and **ALBUMINATE**.—**Egg a.** Lat., *ovi albumen* [Br. Ph.], *albumen ovi* [Br. Ph. (1867)]. Fr., *albumine de l'œuf*. Ger., *Eiweiss, Eialbumin*. It., *albume, albumina dell'uovo*. Sp., *albumina del huevo*. That variety of a. occurring in white of egg, of which, under the form of an alkaline solution of sodium albuminate, it constitutes about 12 per cent. When obtained by evaporation of its aqueous solution, egg a. is a yellowish-white, transparent, brittle, amorphous mass, having a sp. gr. of 1.314; soluble in water and in dilute acid and alkaline solutions as well as in neutral saline solutions; and in solution having a specific levorotatory power of 35.5°. It is coagulated by heat, alcohol, ether, and nitric acid, and dissolves with difficulty or not at all in an excess of the latter. A variety of egg a. found by Tarchanoff in the egg of the bank-swallow and other birds, and denominated by him "Tataeiweiss," is thinner and more watery than ordinary a., diffuses more readily, is digested with much greater rapidity, and coagulates at a much higher temperature. In solution it is highly fluorescent. ["Ctrbl. f. d. med. Wissensch.," 1834, p. 501.] The percentage chemical constitution of egg a. is: C, 53 to 53.4, H, 6.8 to 7.0, N, 15.1 to 15.8, S, 1.4 to 2.0, O, 22.4 to 22.8. From this have been deduced the empirical formulae  $C_{216}H_{338}N_{54}S_{10}O_{58}$  (Liebig),  $C_{50}H_{135}N_{22}SO_{50}$  (Mulder),  $C_{72}H_{112}N_{14}SO_{22}$  (Lieberkühn), and  $C_{50}H_{122}N_{22}S_{10}O_{58}$  (Harnack in "Ztschr. f. physiol. Chem.," v, p. 198). [B, 2, 4].—**Elera' (Ger.)**. See **Egg a.**—**Imperfect a.** Fr., *albumine imparfaite*. A variety of a. which does not give all the ordinary reactions of a. [Prout (B)].—**Incipient a.** Fr., *albumine incipiente*. A name given by Prout to a variety of imperfect a. met with in chyle and chylous urine. [B.] Cf. **Casiform a.**—**Insoluble a.** Fr., *albumine insoluble*. Ger., *unlösliches Eiweiss*. Sp., *albumina insoluble*. 1. Coagulated a. 2. An acid a. or alkali a. (albuminate), so called because insoluble in distilled water. [A.]—**Lactoa'.** Fr., *albumine du lait*. Ger., *Lactalbumin*. A variety of a. found in milk, differing from serum a. in the degree of its action upon the plane of polarized light. [B.] See **Whey a.**—**Meta'.** See the major list.—**Muscle a.** Fr., *albumine des muscles*. Ger., *Muskelalbumin*. A variety of a. occurring in small quantities in the aqueous extract made from muscular tissue. In neutral solutions it coagulates between 46° and 47° C. [A, 319].—**Native a.** An a. occurring in the natural state in the animal or vegetable tissues and juices. [B.] See **Egg a.**, **Muscle a.**, **Serum a.**, **Vegetable a.**, **Crystalline a.**, and **Whey a.**—**Non-retractile a.** Fr., *albumine non-rétractile*. Ger., *nicht-rétractiles Eiweiss*. See under **RETRACTILE a.**—**Organ a.** That portion of the a. contained in the matters introduced into the organism which is directly absorbed and goes to build up the tissues. Cf. **Circulating a.** (2d def.).—**Para'.** See the major list.—**Retractile a.** Fr., *albumine rétractile*. Ger., *retractiles Eiweiss*. A. which coagulates in concrete particles and solid masses, as distinguished from *non-retractile a.*, which on coagulation remains suspended in a state of uniform diffusion. According to Bouchard, the former, when occurring in the urine, is diagnostic of nephrogenous, the latter of hæmatogenous, albuminuria. [B, 93, 108].—**Salivary a.** Fr., *albumine salivaire*. Ptyalin. [B, 93, 108].—**Serum a.** [F. W. Pavry, "Med. Times and Gaz.," Oct. 17, 1833, p. 539].—**Serum a.** Fr., *albumine du serum*. Ger., *Serumalbumin*. It., *albumina del siero*. Syn.: *blood a.*, *serosin*, *serin*. The variety of a. occurring in blood-serum and other animal liquids. It closely resembles egg a., but has a specific levoro-

tary power of 50°, is not coagulated by ether, is precipitated with difficulty by hydrochloric acid, and after precipitation by nitric acid re-dissolves in an excess of the reagent. Its percentage composition is almost precisely the same as that of egg a., although it contains a little less sulphur and a little more oxygen. [B, 4.] It is the form usually found in albuminous urine. See also **METALBUMIN** and **PARALBUMIN**.—**Soluble a.** Fr., *albumine soluble*. Ger., *lösliches Eiweiss*. Sp., *albumina soluble*. A. that has not been coagulated nor so altered by chemical reagents as to be insoluble in distilled water. [B.]—**Vegetable a.** Fr., *albumine végétale*. Ger., *pflanzliches Eiweiss*. The variety of a. found in vegetable tissues and juices. It resembles egg a. in properties but differs from it somewhat in composition, containing from 15.5 to 17.6 per cent. of nitrogen and from 0.75 to 1.35 per cent. of sulphur. [B, 4.] See also **Crystalline a.**—**Vorrathsa' (Ger.)**. Voit's term for that portion of the a. contained in the circulating fluids which is derived from the tissues and cellular elements of the body, as distinguished from the circulating a. which is derived from the food. [J, 52].—**Whey a.** Ger., *Molkeneiweiss*. An albuminous substance, readily soluble in water, obtained, along with another less soluble a., from whey. Composition: C, 50.01 to 50.56, H, 6.80 to 7.19, N, 13.10 to 13.59, ash, 7.48 to 8.25. [Kösler, "Upsal. läkarefören. Förhandl.," xvi, 514 (B).]

**ALBUMINAGE** (Fr.), n. A<sup>3</sup>-bu<sup>6</sup>-mi<sup>2</sup>n-a<sup>3</sup>zh. The act of albumenizing or coating with white of egg. [A, 324.]

**ALBUMINAS** (Lat.), n. m. or f. A<sup>2</sup>(a<sup>3</sup>l)-bu<sup>2</sup>(bu)/mi<sup>2</sup>n-a<sup>2</sup>s(a<sup>2</sup>s). An albuminate.

**ALBUMINAT** (Ger.), n. A<sup>3</sup>-bu-mi<sup>2</sup>n-a<sup>3</sup>t'. An albuminate.—**Acida'.** An acid albumin. [A, 319].—**Alkalita'.** An alkali albumin, an albuminate. [A, 319].—**Antia'.** An antialbumate.

**ALBUMINATE**, n. A<sup>2</sup>-bu<sup>2</sup>/mi<sup>2</sup>n-at. Lat., *albuminas*. Fr., *albuminate*. Ger., *Albuminat*. It., Sp., *albuminato*. Syn.: *derived (or alkali) albumin*. A compound of albumin with a base; a salt of albumin considered as an acid. [B, 2, 4.] According to some, but less correctly, a compound of albumin with either a basic radicle (alkali a., alkali albumin), or with an acid (acid albumin). [B, 12].—**Acid a.** Fr., *a. acide*. Ger., *Acidalbuminat*. See **Acid ALBUMIN**.—**Alkali a.** Fr., *a. alcalin*. Ger., *Alkalialbuminat*. See **A.**

**ALBUMINATUS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>-na(na<sup>3</sup>/tu<sup>2</sup>s-(tu<sup>4</sup>s). Containing or combined with albumin. [B, 95.]

**ALBUMINE** (Fr.), n. f. A<sup>3</sup>-bu<sup>6</sup>-men. Albumin.—**A. acide**. See **Acid ALBUMIN**.—**A. alcaline**. An alkali albumin. See **ALBUMINATE**.—**A. alumineuse**. **A. aluminose**. See **ALBUMEN aluminosum**.—**A. animale**. See **Animal ALBUMIN**.—**A. casiforme**. See **Casiform ALBUMIN**.—**A. cérébrale**. Neurine. [B, 107].—**A. circulatoire**. See **Circulating ALBUMIN**.—**A. coagulée**. See **Coagulated ALBUMIN**.—**A. coagulée des cheveux, des cornes, des ongles, et du sabot**. See **KERATIN**. [B, 107].—**A. cristalline**. See **Crystalline ALBUMIN**.—**A. de l'œuf**. See **Egg ALBUMIN**. [B, 93].—**A. dérivée**. See **Derived ALBUMIN**.—**A. des muscles**. See **Muscle ALBUMIN**. [B, 93].—**A. du lait**. See **Lacto-ALBUMIN**.—**A. du petit-lait**. See **Whey ALBUMIN**.—**A. du sang**. Blood albumin. [B, 93]. See **Serum ALBUMIN**.—**A. du serum**. See **Serum ALBUMIN**. [B, 93].—**A. imparfaite**. See **Imperfect ALBUMIN**.—**A. incipiente**. See **Incipient ALBUMIN**.—**A. insoluble**. See **Insoluble ALBUMIN**.—**A. modifiée des cheveux, des cornes, etc.** See **A. coagulée des cheveux, des cornes, etc.**—**A. non-rétractile**. See **Non-retractile ALBUMIN**.—**A. organique**. See **Organ ALBUMIN**.—**A. rétractile**. See **Retractile ALBUMIN**.—**A. salivaire**. Ptyalin. [B, 107].—**A. solide**. Coagulated albumin.—**A. soluble**. Soluble albumin. [B, 46].—**A. végétale**. Vegetable albumin. [B, 107].—**Mét-a.** See **METALBUMIN**.—**Par-a.** See **PARALBUMIN**.

**ALBUMINÉ** (Fr.), p. p. A<sup>3</sup>-bu<sup>6</sup>-mi<sup>2</sup>n-a. 1. Albumenized; coated with white of egg. 2. Albuminous (2d def.). [B, 52.]

**ALBUMINER** (Fr.), v. tr. A<sup>3</sup>-bu<sup>6</sup>-mi<sup>2</sup>n-a. To albumenize, or coat with white of egg. [B, 52.]

**ALBUMINEUSE** (Fr.), n. A<sup>3</sup>-bu<sup>6</sup>-mi<sup>2</sup>n-u<sup>6</sup>z. A term used by Mialhe as synonymous with peptone. [K.]

**ALBUMINEUX** (Fr.), adj. A<sup>3</sup>-bu<sup>6</sup>-mi<sup>2</sup>n-u<sup>6</sup>. Albuminous. [B.]

**ALBUMINIDE**, n. A<sup>2</sup>-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>d. Fr., *albuminide*. Ger., *Albuminid*. A name given by Rollet ("Wien. akad. Sitzungsbericht.," lxxxiv, 3, p. 332) to acid albumin derived from serum albumin by the action of dilute acids. [B.]

**ALBUMINIFEROUS**, adj. A<sup>2</sup>-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>f-e<sup>2</sup>r-u<sup>2</sup>s. From *albumin*, and Lat., *ferre*, to bear. Fr., *albuminifère*. Producing or generating albumin. [B, 39.]

**ALBUMINIFORM**, adj. A<sup>2</sup>-bu<sup>2</sup>-mi<sup>2</sup>n-i<sup>2</sup>-fo<sup>2</sup>rm. From *albumin*, and Lat., *forma*, form. Fr., Sp., *albuminiforme*. Ger., *eiweissähnlich*. Resembling albumin.

**ALBUMINIMETER**, n. A<sup>2</sup>-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>m-e<sup>2</sup>t-u<sup>2</sup>r. From *albumin*, and Gr., *μέτρον*, a measure. Fr., *albuminimètre*. Ger., *Albuminimeter*. It., *albuminimetro*, *albuminometro*. Sp., *albuminimetro*. An apparatus for estimating the amount of albumin in a liquid. The term is ordinarily applied to a polarimeter so devised that the deviation produced in the plane of a ray of polarized light by its passage through a column of the liquid measures the amount of albumin present. Esbach's a. consists of a small graduated tube, which is filled up to a certain mark with the liquid under examination; the level of the liquid is then brought up to another mark by adding a solution containing 10 grammes of picric acid and 20 grammes of citric acid to 1 litre of water; the tube is closed with a rubber stopper, shaken and allowed to stand for 24 hours; the precipitate of albumin may then be read off in grammes to the litre. ["Allg. med. Ctrbl.-Ztg.," "St. Petersb. med. Wehnschr.," Oct. 19 (31), 1885, p. 355 (A).]

**ALBUMININ**, n. A<sup>2</sup>-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>n. Fr., *albuminine*. Ger., *Albuminin*. It., Sp., *albuminina*. The substance forming the walls of the cells which inclose the albumin in the white of egg.

It differs from albumin in containing no nitrogen and in its different behavior toward reagents. [B, 2, 48.]

**ALBUMINIPAROUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>p-a<sup>2</sup>-ru<sup>2</sup>s. From *albumin*, and *parere*, to bear. Fr., *albuminipare*. Generating albumin. [B, 39.]

**ALBUMINIZATION**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-i<sup>2</sup>-za'shu<sup>2</sup>n. The act or process of conversion, or of re-conversion, of a tissue into albumin. [T. Addison, "Guy's Hosp. Rep.," 1843 (B, 39).]

**ALBUMINIZE**, v. tr. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-iz. To transform into albumin. [B, 39.]

**ALBUMINO-CASEIN**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-ka'ze-i<sup>2</sup>n. For deriv., see *ALBUMIN* and *CASEIN*. Fr., *albumino-caséine*. Ger., *Albuminocasein*. It., Sp., *albumino-caseina*. Amygdalin. [A, 337.]

**ALBUMINO-CASEOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-ka'ze-u<sup>2</sup>s. Fr., *albumino-caséux*. It., Sp., *albumino-caseoso*. Compounded of albumin and a cheesy material, or a material resembling casein; a term applied to amygdalin. [B, 38.]

**ALBUMINO-CHLORIDE**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-klo'ri<sup>2</sup>d. Fr., *albumino-chlorure*. Ger., *Albuminochlorür*. A compound of a chloride with albumin. [B, 39.]

**ALBUMINO-FIBRIN**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-fl'brī<sup>2</sup>n. For deriv., see *ALBUMIN* and *FIBRIN*. Fr., *albumino-fibrine*. Ger., *Albuminofibrin*. It., Sp., *albumino-fibrina*. A compound of albumin and fibrin. [Todd (B, 39).]

**ALBUMINO-FIBRINOUS**, **ALBUMINO-FIBROUS**, adj's. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-fl'brī<sup>2</sup>n-u<sup>2</sup>s, -fl'bru<sup>2</sup>s. Fr., *albumino-fibreux*. It., Sp., *albumino-fibrinoso*. Compounded of albumin and fibrin. [B, 38, 39; Bryant (B, 39).]

**ALBUMINO-GELATINOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-je<sup>2</sup>l-a<sup>2</sup>t'i<sup>2</sup>-u<sup>2</sup>s. Fr., *albumino-gélatineux*. Compounded of albumin and gelatin. [B, 38; Todd (B, 39).]

**ALBUMINO-GLUTINOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-glu<sup>2</sup>t'i<sup>2</sup>n-u<sup>2</sup>s. For deriv., see *ALBUMIN* and *GLUTEN*. Fr., *albumino-glutineux*. Compounded of albumin and gluten. [B, 38.]

**ALBUMINO-GRAISSEUX** (Fr.), adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-gra<sup>2</sup>-u<sup>2</sup>s. Containing both albumin and fat.

**ALBUMINOID**, adj. and n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-oid. Fr., *albuminoïde, gélatinogène*. Ger., *eivweißähnlich, Albuminstoff, Eivweisskörper*. It., *albuminoide*. Sp., *albuminoide*. 1. (Adj.) resembling albumin; of or pertaining to a substance resembling albumin. For special uses of the term see *A. DISEASE* and *A. DEGENERATION*. 2. (N.) one of a class of nitrogenous proximate principles of which ordinary albumin is a type. The a's in part occur native, forming the essential constituents of all the animal tissues and fluids, except the bile, tears, sweat, and urine, and occurring also in vegetables; in part are derived from these native a's by the action of chemical or vital processes. All are amorphous with the exception of the crystalline albumin of plants; all when in solution rotate the plane of polarization to the left; all except the peptones are non-diffusible; and all under suitable conditions undergo putrefactive decomposition with the evolution of hydrogen, hydrogen sulphide, ammonia, carbon dioxide, leucine, tyrosine, and various other compounds consisting chiefly of the fatty acids and their derivatives. Heated with nitric acid, they become of a yellow color, which is changed to a deep orange by the addition of ammonia (xanthoproteic reaction); they are reddened by Millon's reagent, and color Fehling's solution violet; they are dissolved by strong acetic, phosphoric, and hydrochloric acids; and are precipitated by tannic acid, chlorine, and salts of the heavy metals. Their percentage composition is C, 50.6 to 54.3, H, 6.7 to 7.3, N, 12.8 to 18.4, S, 0.4 to 1.7, O, 20.6 to 26.8, with a variable amount of ash. Their molecular constitution is very complex and still undetermined, although they are believed to be compounds of amides of acids of the fatty series with urea (Schützenberger). The a's comprise: 1. Albumin. 2. Acid albumins. 3. Alkali albumins (albuminates). 4. Globulins. 5. Fibrin. 6. Coagulated albumins. 7. The amyloid substance. 8. Albumose. 9. Peptones. [B, 2, 4, 12, 13, 92, 108.] According to the usage of many authors the term *proteids* is applied to this class of bodies, the word a, being applied to substances, such as mucin, chondrin, gelatin, collagen, elastin, keratin, and nuclein, which are allied to the proteids, but differ in composition and some important properties. [B, 11, 12, 13, 108.] On the other hand, those who use the term a, in the sense here adopted call bodies of the latter class *proteids*.

**ALBUMINOIDAL**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-oid-a<sup>2</sup>l. See *ALBUMINOID*.

**ALBUMINOMETRY**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-no<sup>2</sup>m'e<sup>2</sup>-tri<sup>2</sup>. From *albumin*, and *μετρον*, a measure. The determination of the proportion of albumin present in albuminous urine. [J. E. Blomfield, "Lancet," Jan. 23, 1886, p. 153 (A).]

**ALBUMINONE**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-non'. Fr., *albuminone*. Ger., *Albuminon*. A substance derived from an albuminoid, soluble in alcohol and not coagulable by heat. [Kingzett (B, 39).]

**ALBUMINO-PURULENT**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o-pu<sup>2</sup>-ru<sup>2</sup>-le<sup>2</sup>nt. Ger., *albuminös-eitrig*. Containing both albumin and pus.

**ALBUMINORRHŒ** (Ger.), n. f. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o<sup>2</sup>-ru<sup>2</sup>-e<sup>2</sup>. Albuminuria. [B.]

**ALBUMINÖS**, (Ger.), adj. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>n-u<sup>2</sup>z'. Albuminous. [B.]

**ALBUMINOSA** (Lat.), n. n. pl. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>n-o'sa<sup>2</sup>. Medicinal and dietetic substances containing albumin.

**ALBUMINOSÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>n-o'se(a<sup>2</sup>-e<sup>2</sup>). In Lindley's system, the first cohort of the *Polypetales*, including the alliances *Rancales*, *Anonales*, *Umbellales*, *Grossales*, and *Pittosporales*. [B, 170.]

**ALBUMINOSE**, adj. and n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-os'. Fr., *albuminose*. Ger., *Albuminose* (2d and 3d def's). It., *albuminosio* (2d def.). 1. (Adj.) albuminous. 2. (N.) a term applied by Bouchardat to a prod-

uct of the decomposition of fibrin by very dilute hydrochloric acid, and by Mialhe to a peculiar substance into which he supposed albumin to be converted by the action of gastric juice before assimilation takes place. [B, 2.] For the former, see *Acid ALBUMIN*; for the latter, see *ALBUMOSE*. 3. In Fr. and Ger., also albuminosis.—*A. chronique* (Fr.). Engel's name for plethora. [B, 38.]

**ALBUMINÖS-ETTRIG** (Ger.), adj. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>n-u<sup>2</sup>z'/i'tri<sup>2</sup>g. Albumino-purulent.

**ALBUMINOSIC**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-o'si<sup>2</sup>k. Fr., *albuminotique*. Of or pertaining to albuminosis (albumose); as a, *ferment*.

**ALBUMINOSIS** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>n-o'si<sup>2</sup>s. Gen., *albuminosis*. Fr., *albuminose*. Ger., *Albuminose*. It., *albuminost*. That condition of the system in which the albuminous constituents of the blood or tissues are in excess of the normal amount. [B, 48.]

**ALBUMINOSO-SUCRÉ** (Fr.), adj. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>n-o-so-su<sup>2</sup>-kra. Albuminous and saccharine. [B, 38.]

**ALBUMINOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-nu<sup>2</sup>s. Lat., *albuminosus*. Fr., *albumineux, albuminé* (2d def.). Ger., *albuminös, eivweissaltig*. It., *albuminoso*. Sp., *albuminoso, albuminado, albumineo* (2d def.). 1. Of or pertaining to albumin; containing albumin. 2. In botany, applied to seeds which contain albumen (endosperm) when ripe. [B, 19, 75.] For special uses of the term see under *CELL*, *DEGENERATION*, *EXUDATE*, *EXUDATION*, *INFILTRATION*, and *METAMORPHOSIS*.

**ALBUMINOUSNESS**, n. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>n-u<sup>2</sup>s-ne<sup>2</sup>s. The condition of being albuminous. [A, 302.]

**ALBUMINSTOFF** (Ger.), n. A<sup>2</sup>l-bu<sup>2</sup>-men'sto<sup>2</sup>f. An albuminoid. [B, 108.]—*Coagulirte A'e*. Coagulated albumins.—*Pflanzliche A'e*. The albuminous principles of plants. [B, 108.]

**ALBUMINURETICA** (Lat.), n. n. pl. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>n-u<sup>2</sup>(u)-re<sup>2</sup>t'i<sup>2</sup>k-a<sup>2</sup>s. Gen., *albuminuretico'rum*. Drugs which cause albuminuria. [A, 305.]

**ALBUMINURIA** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>-nu<sup>2</sup>(nu)/ri<sup>2</sup>-a<sup>2</sup>. From *albumin*, and *ουρη*, to urinate. Fr., *albuminurie*. Ger., *Albuminurie, Eivweissarnen*. It., Sp., *albuminuria*. 1. The presence of albumin in the urine. 2. That condition or habit of the body in which there is a tendency to the discharge of albumin in the urine. Under most circumstances this is indicative of disease, and the greater the quantity of albumin excreted the more serious is the lesion. A. may be a concomitant of acute disease (as scarlatina) [see *Temporary a.*], or it may indicate a permanent condition. It is often used as a synonym for Bright's disease. [D.] See also *GLOBULINURIA* and *PEPTONURIA*.—*A. acuta*. See *Acute a.*—*A. gravidarum*. Fr., *albuminurie gravidique*. Ger., *Albuminurie der Schwangeren*. A. occurring during the course of pregnancy.—*A. longa*. See *Chronic a.*—*A. of parturition*. Fr., *albuminurie du travail*. A form of a. that comes on during labor or two or three days before; distinguished by certain French writers from a. *gravidarum* (q. v.). [A, 15.]—*A. post-operatoria*. A. occurring after a surgical operation.—*A. spuria*. See *False a.*—*A. vera*. See *True a.*—*Acute a.* Lat., *a. acuta*. Fr., *albuminurie aiguë*. Ger., *akute Albuminurie*. It., *a. acuta*. Sp., *a. aguda*. A phrase recognized by the Royal College of Physicians as a synonym for acute Bright's disease. [D.]—*Cardiac a.* *Cardial a.* Fr., *albuminurie cardiaque*. A. which has for its cause some disease of the heart. It is especially apt to accompany valvular disease. [D.]—*Chronic a.* Lat., *a. chronica* (see *longa*). Fr., *albuminurie chronique (ou lente)*. Ger., *chronische Albuminurie*. It., *a. cronica*. Sp., *a. crónica*. A synonym for chronic Bright's disease, recognized by the Royal College of Physicians. [D.]—*Cyclic a.* A name given by F. W. Pavy to "a. in the apparently healthy," "physiological a.," "intermittent a.," or "a. in adolescents," from his observation that there is a diurnal periodicity in the maximum excretion of albumin. ["Med. Times and Gaz.," Oct. 17, 1885, p. 529.]—*Dyscrasic a.* Fr., *albuminurie dyscrasique*. Ger., *dyscrasische Albuminurie*. See *Hæmatogenous a.*—*False a.* Lat., *a. spuria*. Fr., *fausse albuminurie*. Ger., *falsche Albuminurie*. 1. Apparent a.; i. e., one in which the urine does not contain albumin, but throws down a precipitate resembling it on the ordinary tests. 2. A. in which some albuminous substance passes into the urine from the circulation, but not serum-albumin. [T. L. Bruntton (A, 364).] 3. A. in which the albumin does not come from the kidneys. [G. Griswold, "N. Y. Med. Jour.," Jan. 17, 1885, p. 64; A, 319.]—*Fatty a.* Fr., *albuminurie graisseuse*. See *CHYLURIA*.—*Febrile a.* A. due to a febrile condition.—*Functional a.* A. due to digestive or neurotic disturbances or to alterations in the composition of the blood. [Ralfé (B).]—*Hæmatogenous a.* Ger., *hæmatogene Albuminurie*. A. due to some morbid condition of the blood and not to any structural disease of the kidney. [A, 319.] Cf. *Nephrogenous a.*—*Mixed a.* Fr., *albuminurie mixte*. Ger., *gemischte (oder combinirte) Albuminurie*. A combination of true and false a.; i. e., an a. in which the urine contains albumin derived from the blood circulating in the kidneys, together with blood, pus, and mucus from the uro-genital tract. [B, 108.]—*Nephrogenous a.* Ger., *nephrogene Albuminurie*. A. due to kidney disease, as distinguished from hæmatogenous a. (q. v.). [A, 319.]—*Neurotic a.* Fr., *albuminurie névrotique*. Ger., *neurotische Albuminurie*. A. due to nervous disturbance. [Ralfé (B).]—*Pathological a.* Ger., *pathologische Albuminurie*. A. dependent upon some diseased condition, as distinguished from physiological a. [B, 108.]—*Permanent a.* Fr., *albuminurie persistante*. Ger., *dauernde Albuminurie*. A name given by Parkes to a. which is due to permanent disease and is itself a lasting condition. [D, 1.]—*Physiological a.* Fr., *albuminurie physiologique (ou normale)*. Ger., *physiologische Albuminurie*. Temporary a. occurring in a healthy condition of the system and having no pathological significance. Such an a. occurs frequently in new-born children, and sometimes in adults after the ingestion of food rich in albuminoids, physical exertion, emotional excitement, or the use of cold baths. [B, 108.]—*Pseudo-a.* Fr., *pseudo-albuminurie*. Ger., *Pseudoalbuminurie*. See *False a.*—*Sero-a.* Ger., *Seroalbuminurie*. A. in which only

serum albumin is found in the urine. [B, 108].—**Spastic a.** Fr., *albuminurie spastique*. Ger., *spastische Albuminurie*. A dependent upon a convulsive attack. [A.]—**Temporary a.** Fr., *albuminurie passagère*. According to Parkes, the presence of albumin in the urine for a few days or weeks, as a concomitant of some form of acute disease (e. g., scarlatina), or from some unknown cause. [D, 1].—**Toxic a.** Fr., *albuminurie toxique*. Ger., *toxische Albuminurie*. A dependent upon the introduction of a poison into the system. [B.]—**True a.** Lat., *a. vera*. Fr., *albuminurie vraie*. Ger., *wahre Albuminurie*. A. in which the albumin enters the urine at the time of the secretion of the latter in the kidneys. [B, 49, 108.] Cf. *Falsae a.*

**ALBUMINURIC**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-nu<sup>2</sup>/ri<sup>2</sup>k. Fr., *albuminurique*. Ger., *albuminurisch*. 1. Affected with albuminuria (said of persons). 2. Accompanied with or dependent upon albuminuria (e. g., *a. convulsions*, *a. nephritis*).

**ALBUMINURIE** (Fr., Ger.), n. f. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>-nu<sup>2</sup>-re, a<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup> nu<sup>2</sup>-re. Albuminuria. [D, 65].—**A. anoxémique** (Fr.). Albuminuria due to asphyxia. [B.]—**A. Brightique** (Fr.). Albuminuria due to Bright's disease. [B, 105].—**A. cachectique** (Fr.). Albuminuria due to cachexia. [B, 105].—**A. cantharidienne** (Fr.). Albuminuria due to poisoning by cantharides. [Bouillaud (B, 105)].—**A. catarrhale** (Fr.). Albuminuria due to destruction or alteration of the renal epithelium, as in Bright's disease and the albuminuria of pyrexia. [A. Gubler (B, 46)].—**A. colligative**, **A. consumptive** (Fr.). Albuminuria dependent upon excessive dissimilation of the blood-corpuscles or of the adipose tissue and the muscles. In the latter case, it is called *A. colligative musculaire*. [A. Gubler (B, 46)].—**A. der Schwangeren** (Ger.). See *ALBUMINURIA gravidarum*.—**A. du travail** (Fr.). See *ALBUMINURIA of parturition*.—**A. dyscrasique** (Fr.). Dyscrasic (haematogenous) albuminuria. See also *A. cachectique*.—**A. dystrophique** (Fr.). Albuminuria due to deficient formation of the blood-corpuscles. [A. Gubler (B, 46)].—**A. exsudative** (Fr.). Albuminuria dependent partly upon filtration of albumin through the renal membranes, partly upon the presence of inflammatory products in the urine, as in the case of intense nephritis produced by toxic agents. [A. Gubler (B, 46)].—**A. globulaire** (Fr.). Albuminuria dependent upon destruction of the blood-corpuscles [A. Gubler (B, 46)], or upon the presence in the urine of blood or haemoglobin. [Jaccoud (B, 105)].—**A. gouteuse** (Fr.). Albuminuria of gouty origin. [D, 65].—**A. graisseuse** (Fr.). Fatty albuminuria. See *CHYLURIA*.—**A. gravidique** (Fr.). See *ALBUMINURIA gravidarum*.—**A. lente** (Fr.). See *CHRONIC ALBUMINURIA*.—**A. névrotique** (Fr.). See *NEUROTIC ALBUMINURIA*.—**A. normale** (Fr.). See *PHYSIOLOGICAL ALBUMINURIA*.—**A. passagère** (Fr.). See *TEMPORARY ALBUMINURIA*.—**A. persistante** (Fr.). Chronic albuminuria not dependent upon Bright's disease. [Jaccoud (B, 105)].—**A. saturnine** (Fr.). Albuminuria due to lead poisoning. [Ollivier (B, 105)].—**A. scarlatineuse** (Fr.). Albuminuria due to scarlatina.—**A. spastique** (Fr.). See *SPASTIC ALBUMINURIA*.—**A. toxique** (Fr.). See *TOXIC ALBUMINURIA*.—**A. transitoire** (Fr.). See *TEMPORARY ALBUMINURIA*.—**A. transsudative** (Fr.). Albuminuria dependent solely upon filtration of albumin through the renal membranes, and not upon the presence of inflammatory products in the urine. [A. Gubler (B, 46)]. Cf. *A. exsudative*.—**A. typhoïde** (Fr.). See *TYPHOID NEPHRITIS*.—**A. vraie** (Fr.). See *TRUE ALBUMINURIA*.—**Chronische A.** (Ger.). See *CHRONIC ALBUMINURIA*.—**Combinée A.** (Ger.). See *MIXED ALBUMINURIA*.—**Dauernde A.** (Ger.). See *PERMANENT ALBUMINURIA*.—**Dyscrasische A.** (Ger.). Dyscrasic (haematogenous) albuminuria.—**Falsche A.** (Ger.). **Fausse a.** (Fr.). See *FALSE ALBUMINURIA*.—**Gemischte A.** (Ger.). See *MIXED ALBUMINURIA*.—**Hämatogene A.** (Ger.). See *HAEMATOGENOUS ALBUMINURIA*.—**Nephrogène A.** (Ger.). See *NEPHROGENOUS ALBUMINURIA*.—**Neurische A.** (Ger.). See *NEUROTIC ALBUMINURIA*.—**Pathologische A.** (Ger.). See *PATHOLOGICAL ALBUMINURIA*.—**Physiologische A.** (Ger.). See *PHYSIOLOGICAL ALBUMINURIA*.—**Pseudo-a.** (Fr.). See *FALSE ALBUMINURIA*.—**Séro-a.** (Ger.). See *SERO-ALBUMINURIA*.—**Spastische A.** (Ger.). See *SPASTIC ALBUMINURIA*.—**Toxische A.** (Ger.). See *TOXIC ALBUMINURIA*.—**Wahre A.** (Ger.). See *TRUE ALBUMINURIA*.

**ALBUMINURIOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>/mi<sup>2</sup>-nu<sup>2</sup>/ri<sup>2</sup>-u<sup>2</sup>s. See *ALBUMINURIC*.

**ALBUMINURIQUE** (Fr.), adj. and n. A<sup>2</sup>l-bu<sup>2</sup>-mi<sup>2</sup>-nu<sup>2</sup>-rek. 1. Albuminuric. 2. (N.) one affected with albuminuria. [B, 93.]

**ALBUMINURORRHŒA** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)-mi<sup>2</sup>nu<sup>2</sup>(u)/ro-re<sup>2</sup>(ro/e<sup>2</sup>)-a<sup>2</sup>. From *albumin*, *ὄσπον*, urine, and *ρῶα*, a flow. Fr., *albuminurorrhée* [Piorry]. Albuminuria. [Ultzmann (A, 319).]

**ALBUMO** (Lat.), n. m. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>(bu)/mo<sup>2</sup>r. The same as *albumen* (as *a. ovi*, white of egg). [B, 59.]

**ALBUMOSE**, n. A<sup>2</sup>l-bu<sup>2</sup>-nos<sup>2</sup>. Fr., *albumose*. Ger., *Albumose*. It, *albumosio*. An albuminoid substance into which other albuminoid bodies are converted before their transformation into peptones in the process of natural or artificial digestion. [B.]—**Anti-a.** Fr., *anti-albumose*. Ger., *Antialbumose*. A. produced by the digestion of that portion of an albuminoid substance which is ultimately converted into antipeptone. It closely resembles, and is perhaps identical with, syntonin. [B, 12].—**Deutero-a.** Fr., *deutero-albumose*. Ger., *Deuteralbumose*. A variety of a distinguished by its solubility in distilled water, and by its being precipitated by the addition of acids and of sodium, but not by an excess of the latter reagent. It has a specific levorotatory power of 71°4' to 73°8'. [W. Kühne and R. H. Chittenden, "Ztschr. f. Biol.," "Contrib. f. d. med. Wssnsch.," Aug. 23, 1884, p. 595 (B).]—**Dys-a.** Fr., *dys-albumose*. Ger., *Dysalbumose*. A species of a. described by Kühne and Chittenden, distinguished by its insolubility in hot and cold water and in hydrochloric acid, and by its being precipitated from its solutions by the addition of sodium chloride in excess. [B.]—**Hemi-a.** Fr., *hemi-albumose*. Ger., *Hemialbumose*. A. produced in the digestion of that portion of an albuminoid which is ultimately converted into hemipeptone. It is characterized by becoming soluble at 70° C., and being pre-

cipitated from its solution on cooling; and also by its solubility in a 10-per-cent solution of sodium chloride. [B, 12].—**Hetero-a.** Fr., *hétéro-albumose*. Ger., *Heteroalbumose*. A variety of a. described by Kühne and Chittenden (l. c.) which is soluble in dilute and concentrated hydrochloric acid, is precipitated by the addition of sodium chloride in excess, and is insoluble in hot and cold water. It has a specific levorotatory power of 68°65'. On further digestion this is converted into antialbumate. [B.]—**Proto-a.** Fr., *proto-albumose*. Ger., *Protalbumose*. A variety of a. described by Kühne and Chittenden, distinguished by its solubility in both hot and cold water, being precipitated from its solutions by the addition of sodium chloride in excess. It has a specific levorotatory power of 71°4' to 79° [B.]

**ALBUNA** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>r(bur)/na<sup>2</sup>. See *ALBURNUM*.

**ALBURNITAS** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>r(bur)/ni<sup>2</sup>-ta<sup>2</sup>s(ta<sup>2</sup>s). For deriv., see *ALBURNUM*. A disease of trees in which there is an arrest of the transformation of the sap-wood (albumum) into the heart-wood, and in which, therefore, rings of the former are found mingled with the substance of the latter. [B, 19.]

**ALBURNŒIDE** (Fr.), adj. A<sup>2</sup>l-bu<sup>2</sup>r-no-ed. Resembling albumum. [B, 38.]

**ALBURNŒOUS**, adj. A<sup>2</sup>l-bu<sup>2</sup>r-nu<sup>2</sup>s. Pertaining to or having the characters of albumum. [B, 39.]

**ALBURNUM** (Lat.), n. n. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>r(bur)/nu<sup>2</sup>m(nu<sup>2</sup>m). From *albus*, white. Fr., *aubier*. Ger., *Splint*. Sp., *albarno*, *alburo*. The white sap-wood of trees. [B, 19.]

**ALBUS** (Lat.), adj. A<sup>2</sup>l(a<sup>2</sup>l)-bu<sup>2</sup>s(bus). White. Cf. also *ALBUM*.

**ALCACHINGI**, n. Alkengengi. [B.] See *PHYSALIS alkengengi*.

**ALCEA** (Lat.), n. f. A<sup>2</sup>l(a<sup>2</sup>l)-se/(ka<sup>2</sup>e<sup>2</sup>)-a<sup>2</sup>. See *ALCEA*.

**ALCAEST**, n. See *ALCAHEST*.

**ALCAFUCHE** (Port.), n. A<sup>2</sup>l-ka<sup>2</sup>-fu<sup>2</sup>zha. Hot sulphurous mineral springs situated at Viseu in the province of Beira, Portugal. They contain hydrogen sulphide and are said to differ in composition from all known springs. Employed in cutaneous and articular affections. [B, 88, 93.]

**ALCAHEST**, n. A<sup>2</sup>l'ka<sup>2</sup>-he<sup>2</sup>st. Deriv. uncertain; perhaps a contraction for *aleali est*, it is (or it equals) alkali (potash). [B, 52, 78.] 1. A name given by Paracelsus to a liquid supposed to be curative of all sorts of congestions, and by Van Helmont to a liquid capable of dissolving every substance. 2. An alchemical name for mercury prepared for administration in diseases of the liver. [B, 44, 52, 78.]—**A. Glauberi**, **A. Helmontii**. Fr., *a. de Glauber*. It., *a. di Glaubero*. Sp., *a. de Glaubero*. Impure potassium carbonate. [B, 78.]—**A. Respurii**. Fr., *a. de Respour*. It., *a. di Respour*. Sp., *a. de Respour*. A substance produced by the lixiviation of the product obtained by decrepitating nitre with metallic zinc; a mixture of potash and zinc oxide. [B, 78.]—**A. Zwolferi**. Acetic acid, probably impure. [B, 78.]

**ALCAHESTIC**, adj. A<sup>2</sup>l-ka<sup>2</sup>-he<sup>2</sup>st/i<sup>2</sup>k. Ger., *alkahestisch*. Solvent. [D, 77.]

**ALCAHOL**, n. See *ALCOHOL* (2d and 5th def's).

**ALCALÁ DEL REY** (Sp.), n. A<sup>2</sup>l-ka<sup>2</sup>-la<sup>2</sup>/de<sup>2</sup>-ra'e. The name of a town in New Castile, in Spain, having a mineral spring. [B, 88.]

**ALCALAMIDE** (Fr.), n. f. A<sup>2</sup>l-ka<sup>2</sup>-a<sup>2</sup>-med. Alkalamide. [B, 38.]

**ALCALESCENCE** (Fr.), n. f. A<sup>2</sup>l-ka<sup>2</sup>-e<sup>2</sup>s-sa<sup>2</sup>ns. Alkaliescence. —**A. des humeurs**. See *ALCALESCENCE of the humors*.

**ALCALESCENS** (Lat.), adj. A<sup>2</sup>l(a<sup>2</sup>l)-ka<sup>2</sup>(ka<sup>2</sup>)-le<sup>2</sup>s-se<sup>2</sup>nz(ke<sup>2</sup>ns). Alkaliescent.

**ALCALESCENT** (Fr.), adj. A<sup>2</sup>l-ka<sup>2</sup>-le<sup>2</sup>s-sa<sup>2</sup>n<sup>2</sup>. Alkaliescent.

**ALCALESCENTIA** (Lat.), n. f., and n. pl. A<sup>2</sup>l(a<sup>2</sup>l)-ka<sup>2</sup>(ka<sup>2</sup>)-le<sup>2</sup>s-se<sup>2</sup>n(ke<sup>2</sup>n)/shi<sup>2</sup>(ti<sup>2</sup>)-a<sup>2</sup>. 1. Alkaliescence. 2. Alkalizing materials or remedies. [B, 78, 93.]

**ALCALI** (Lat., Fr.), n. n. A<sup>2</sup>l(a<sup>2</sup>l)/ka<sup>2</sup>(ka<sup>2</sup>)-li(le), a<sup>2</sup>l-ka<sup>2</sup>-le. In decl. For deriv., see *ALKALI*. An alkali. Cf. *ALCALIN*.—**A. aééré** (Fr.). See *AERATED ALKALI*.—**A. ammoniacal** (Fr.). Ammonium sesquicarbonate. See *AMMONIUM CARBONATE*.—**A. ammoniacal anisé** Fr.). See *SPIRITUS AMMONII ANISATUS*.—**A. ammoniacum acetatum** (Lat.). An old term for liquor ammonii acetatis. [A, 305.]—**A. ammoniacum aquosum** (Lat.). A watery solution of ammonia. [A, 305.]—**A. ammoniacum causticum** (Lat.). See *CAUSTIC AMMONIA*.—**A. ammoniacum fluidum** (Lat.). Liquor ammoniæ. [B, 97.]—**A. ammoniacum spirituosum** (Lat.). Spiritus ammoniæ. [B, 97.]—**A. ammoniacum succinatum** (Lat.). Ammonium succinate. [B, 119.]—**A. ammoniacum vinosum** (Lat.). See *ALCOHOLIC AMMONIA* and *SPIRITUS AMMONIÆ*.—**A. ammoniacum volatile** (Lat.). Ammonium sesquicarbonate. See *AMMONIUM CARBONATE*.—**A. ammoniatum spirituosum**. See *SPIRITUS AMMONIÆ*.—**A. animal** (Fr.). Ammonia. [B, 92.]—**A. carbonaté** (Fr.). A carbonated alkali; an alkaline carbonate. [B, 51.]—**A. causticum** (Lat.). **A. caustique** (Fr.). See *CAUSTIC ALKALI*.—**A. déliquescent** (Fr.). Deliquescent potash. [B, 93.]—**A. doux** (Fr.). See *MILD ALKALI*.—**A. du nitre** (Fr.). Potash obtained from nitre. [B, 93.]—**A. du tartre** (Fr.). See *A. tartari*.—**A. effervescent** (Fr.). **ALCALICITÉ** (Fr.), n. f.  $A^1-k a^3-l i^2-s-i^2-t a$ . Alkalinity. [B. 38.]

**ALCALIDE** (Fr.), n. f.  $A^1-k a^3-l e d$ . An alkaloid. [B. 92.]

**ALCALIFIANT** (Fr.), adj.  $A^1-k a^3-l i^2-f-i^2-a^3-n^2$ . Alkaligenous. [B. 52.]

**ALCALIGEE** (Ger.), n.  $A^1-k a^3-l i^2-g a$ . See *ALCALIGENIUM*.

**ALCALIGEN**, adj. and n.  $A^1-k a^3-l i^2-j e^2-n$ . Fr., *alcaligène*. Ger., *alkaligen*, *alcaligen*. 1. Alkaligenous. 2. Alkaligenium.

**ALCALIGENIUM** (Lat.), n. n.  $A^1(a^1)-k a^2(k a^3)-l i^2-j e(g a)^2-n i^2-u^3-m(u^3-m)$ . Fr., *alcaligène*. Ger., *Alkaligen*, *Alcaligen*. It., *alcaligeno*. Sp., *alcaligeno*. Alkaligen, alkaligene; old names for nitrogen. [B.] Cf. *ALKALIGENOUS*.

**ALCALIGENUS** (Lat.), adj.  $A^1(a^1)-k a^2(k a^3)-l i^2-j e^2(g e^2)-n u^3-s(n u^3-s)$ . Alkaligenous.

**ALCALIMETER**, n.  $A^1-k a^3-l i^2-m e^2-t u^3-r$ . Fr., *alcalimètre*. See *ALKALIMETER*.

**ALCALIMÉTRIE** (Fr.), n. f.  $A^1-k a^3-l i^2-m a-t r e$ . Alkalimetry.

**ALCALIMÉTRIQUE** (Fr.), adj.  $A^1-k a^3-l i^2-m a-t r e k$ . Alkalimetric.

**ALCALIMETNUM** (Lat.), n. n.  $A^1(a^1)-k a^2(k a^3)-l i^2-m e^2-t u^3-m(r u^3-m)$ . See *ALKALIMETER*.

**ALCALIN** (Fr.), adj. and n.  $A^1-k a^3-l a^2-n^2$ . 1. Alkaline. 2. (N.) an alkaline substance or remedy. [B. 93.] The term is especially restricted to denote an alkaline salt formed by the incomplete neutralization of a base by an acid, as distinguished from *alkali* which is the base itself or its oxide. [B. 105.]

**ALCALINISER** (Fr.), v. tr.  $A^1-k a^3-l i^2-n-i^2-z a$ . To render alkaline. [B. 52.]

**ALCALINITAS** (Lat.), n. f.  $A^2(a^1)-k a^2(k a^3)-l i^2-n^2-t a^2-s(t a^2-s)$ . Gen., *alcalinitat'is*. Alkalinity. [A. 320.]

**ALCALINITÉ** (Fr.), n. f.  $A^1-k a^3-l i^2-n-i^2-t a$ . Alkalinity.

**ALCALINO-CUPRIQUE** (Fr.), adj.  $A^1-k a^3-l e-n o-k u^6-p r e k$ . Alkaline and containing copper. [B.]

**ALCALINO-FERRUGINEUX** (Fr.), adj.  $A^1-k a^3-l e-n o-f e^2-r u^3-z h e-n u^3$ . Containing both alkalies and iron. [B. 38.]

**ALCALINO-PLOMBIFÈRE** (Fr.), adj.  $A^1-k a^3-l e-n o-p l o^2-n^2-b i^2-f e^2-r$ . Alkaline and containing lead. [B. 38.]

**ALCALINO-TERREUX** (Fr.), adj.  $A^1-k a^3-l e-n o-t e^2-r u^3$ . Alkaline earthy. [B. 38.]

**ALCALINULE** (Fr.), adj.  $A^1-k a^3-l i^2-n u^3$ . Slightly alkaline (said of a salt in which there is a slight excess of the basic element or radicle over the amount required to neutralize the acid element). [B. 38.]

**ALCALINURIA** (Lat.), n. f. See *ALKALINURIA*.

**ALCALINUS** (Lat.), adj.  $A^2(a^1)-k a^2(k a^3)-l i^2-l e^2-n u^3-s(n u^3-s)$ . Alkaline.

**ALCALISATIO** (Lat.), n. f.  $A^2(a^1)-k a^2(k a^3)-l i^2-z a(s a^3)-s h i^2-t i^2-o$ . Gen., *alcalisatio'nis*. Fr., *alcalisation*. Alkalinization. [B. 73.]

**ALCALISATUS** (Lat.), adj.  $A^2(a^1)-k a^2(k a^3)-l i^2-z a(s a^3)-t u^3-s(t u^3-s)$ . Fr., *alcalisé*. Alkalinized. [B.]

**ALCALOÏDE** (Fr.), n. m.  $A^1-k a^3-l o-e d$ . An alkaloid.—**A. s. animaux**. Animal alkaloids. [B. 52].—**A. artificiel**. An artificial alkaloid. [B. 38].—**A. cadavérique**. A cadaveric alkaloid. [B.] See *PROMAINE*.—**A. naturel**. A natural alkaloid. [B. 38].—**A. s. pyridiques**. See *PYRIDINE bases*.—**A. s. végétaux**. Vegetable alkaloids. [B.]

**ALCALOIDES** (Lat.), n. n.  $A^2(a^1)-k a^2(k a^3)-l o-i(e)-d e z(d e^2-s)$ . Gen., *alcaloid'eos (-eis)*. Really the neuter (Gr., *ἀλκαλοειδές*) of the adjective *alcaloides* (Gr., *ἀλκαλοειδής*), resembling an alkali. An alkaloid. [B. 78].—**Alcaloïdea acria**, **alcaloïdea narcotica**. See *ALCALOIDEA acria* and *ALCALOIDEA narcotica*.

**ALCALOIMETRIA** (Lat.), n. f.  $A^2(a^1)-k a^2(k a^3)-l o-i^2-m e^2-t u^3-r i^2-a^3$ . From *alcaloides*, and *μέτρον*, a measure. Fr., *alcaloïmétrie*. The quantitative estimation of alkaloids. [B. 78, 92.]

**ALCALOIMETRUM** (Lat.), n. n.  $A^2(a^1)-k a^2(k a^3)-l o-i^2-m e^2-t u^3-r u^3-m(r u^3-m)$ . Fr., *alcaloïmètre*. Ger., *Alkaloiometer*. An instrument for the quantitative estimation of alkaloids. [B. 78.]

**ALCALURETICA** (Lat.), n. n. pl.  $A^2(a^1)-k a^2(k a^3)-l u^2-l u^2-r e^2-t i^2-k a^3$ . Gen., *alcaluretico'rum*. From *acali*, and *ουρετικόν*, to urinate. Drugs supposed to render the urine alkaline. [A. 305.]

**ALCAMO** (It.), n.  $A^1-k a^3-m o$ . A sulphurous mineral spring in Sicily, containing in 10,000 parts by weight:

Sulphur.....	70
Calcium carbonate.....	48
Magnesium carbonate.....	20
Sodium chloride.....	30
Hydrogen sulphide gas, about 9,000 parts by volume.....	138
Carbon dioxide gas, about 2,100 parts by volume.....	44

Temperature 74° C. Recommended for respiratory, articular, and cutaneous affections. [B. 88, 93.]

**ALCAMOR**, n. From Ar., *al-qamar*, the moon. An alchemical term for silver. [B. 52.]

**ALCAMPORA**, n. A name given in Brazil to the *Croton perdicipes*, or to a remedy made from it. [B. 7, 19.]

**ALCANA**, n. See *ALCANA and ALKANNA*.

**ALCANETTE** (Fr.), n. f.  $A^1-k a^3-m e^2$ . Alkanet. [A. 342.]

**ALCANNA** (Lat.), n. f.  $A^2(a^1)-k a^2(n k a^3)-n^2$ . 1. Alkanna (q. v.). 2. A species of *Phillyrea*. [B. 110].—**Alcannæ radix**, **Alcannæ spuria radix**, **A'roth**, etc. See under *ALKANNA*.

**ALCANTUD** (Sp.), n.  $A^1-k a^3-n t u^3$ . An acidulous mineral spring situated in the province of Cuenca, Spain, containing sulphur, magnesia, and iron; recommended in digestive and nervous disorders and in anæmia. [A. 253, 321.]

**ALCAOL**, n. An old name for mercury (in the alchemical sense of the word). [B. 50.] See *MERCURY*.

**ALCAPTONE** (Fr.), n. f.  $A^1-k a^3-p-t o n$ . Alcaptone. [B. 107.]

**ALCAPTONURIE** (Fr.), n.  $A^1-k a^3-p-t o n-u^6-r e$ . Alcaptonuria. [B.]

**ALCAR** (Lat.), n. n.  $A^2(a^1)-k a^3-r$ . From *ἀλκαρ*, a defense. A remedy. [B. 111.]

**ALCARA**, n. From Ar., *al-qarā*, a gourd. A gourd; in alchemical nomenclature, the heater (cucurbita) of an alembic. [B. 52.]

**ALCARAZ** (Sp.), n.  $A^1-k a^3-r a^3-t h^2$ . A sulphurous mineral spring in the province of Salamanca, Spain; recommended in nervous and alimentary disorders. [B. 130.]

**ALCARAZZA**, **ALCARRAZA**, n. s.  $A^1-k a^3-r a^3-z a^3$ . From Sp., *alcarraza* (from Ar., *al*, the, and *kurrāz*, a jug). A vessel used in hot climates, made of slightly burnt clay, which is very porous, so that the contained liquid oozes through to the outside, forming a sort of dew, by the rapid evaporation of which the vessel is cooled. [B. 2.]

**ALCARSINE** (Fr.), n. f.  $A^1-k a^3-r-s e n$ . See *ALKARSINE*.

**ALCARGEN**, n.  $A^1-k a^3-r-j e^2-n$ . Cacodylic (dimethylarsinic) acid. [A. 346.]

**ALCE** (Lat.), n. f.  $A^2(a^1)-s e(k a)$ . Gen., *al'ces*. From *ἀλκή*, strength, defense. 1. Strength, power. 2. Defense, protection. [A. 322.]

**ALCEA** (Lat.), n. f.  $A^2(a^3)/se(ka)-a^3$ . From  $\alpha\lambda\epsilon\alpha$ , the mallow, Fr., *alceé*. Ger., *Alce*. It., *sp.*, *alcea*. 1. A sort of mallow mentioned by Pliny and Dioscorides. 2. A subdivision made by Linnaeus of the genus *Althaea*, to which the species included by him under *A.* are now usually referred. [B. 48, 93.]—*Alcea aegyptiaca*. See *Semen ABELMOSCHI*.—*Alcea radix*. The root of *Malva alcea* (q. v.). [B. 97.]—*A. indica*. See *ABELMOSCHUS*.—*A. rosea* [Linnaeus]. See *ALTHAEA rosea*.—*A. villosa*. See *ABELMOSCHUS*.—*A. vulgaris major*. *Arnica montana*. [B. 59.]

**ALCEBAR**, n. Agallochum, or aloes-wood. [B. 59.]

**ALCEBRIS**, n. From Ar., *Al-kibrit*, sulphur. An alchemical term for sulphur. [B.]—*A. vivum*. See *SULPHUR vivum*.

**ALCEDA** (Sp.), n.  $A^2(th'a)/dth'a^3$ . A sulphurous spring in the province of Santander, Spain, between the cities of Santander and Burgos. It has a temp. of  $26^\circ$  to  $27^\circ$  C., and contains hydrogen sulphide, sodium chloride, magnesium chloride, and calcium sulphate. It has been recommended in the treatment of elephantiasis. [A. 319, 337.]

**ALCEE** (Fr.), n. f.  $A^3$ -sa. The hollyhock. See *ALTHAEA rosea*.—*A. de la Floride*. The *Gordonia lasianthus*. [B. 19.]

**ALCEENMALVE** (Ger.), n. f.  $A^3$ -tza'e'n-ma $^2$ /fe $^2$ . The *Malva alcea*.

**ALCES** (Lat.), n.  $A^2(a^3)/sez(ke)s$ . Gen., *al'cis*. From  $\alpha\lambda\kappa\eta$ , the elk (said to be from  $\alpha\lambda\kappa\eta$ , strength, but more probably related to  $\epsilon\lambda\alpha\phi\sigma$ , the deer). O. H. G., *alaho*. Also written *alchis* [Pliny]. Fr., *élan*. Ger., *Elenthier*. The elk or moose (*Cervus alces* [Linnaeus]). It was believed to be subject to epilepsy and to furnish a remedy for that disease. Also the genus to which the elk belongs. [B. 28, 73, 114, 115.]—*A. palmatus*. See *Cervus alces*.—*Alcis cornu*. Hart's horn. [B. 57.]—*Alcis cornu philosophice præparatum*. A preparation of some pharmacopœias of the last century, made by boiling stag's horn, cut into small pieces, in water, until it became soft, removing the cortical and inner spongy portions, drying, and pulverizing. [B. 57.]—*Alcis ungulae*. Elk's hoofs; once employed as a specific for epilepsy. [B. 78.]—*Spiritus ungulae alcis*. See *Spiritus CORNU CERVI*.—*Ungulae alcis*. See *Alcis ungulae*.

**ALCETO** (It.), n.  $A^3$ -cha'to. See *MONTE ALCETO*.

**ALCHABRIC**, n. See *ALKIBRIC*.

**ALCHACHENGE** (Fr.), n.  $A^3$ -ka-sha'n $^2$ zh. Alkekengi. A term applied both to *Cardiospermum halicacabum* and *Physalis alkekengi*. [B. 88.]

**ALCHACHIL**, n. Rosemary. [B. 59.]

**ALCHAHEST**, n. See *ALCAHEST*.

**ALCARAB**, **ALCARAD**, **ALCHARAD**, n's. Old Egyptian names for *Acacia Senegal* or the gum arabic derived from it. [B. 88, 128, 130.]

**ALCHARIT**, **ALCHARITH**, n's. Old names for mercury. [B. 59, 111.]

**ALCHAZONON**, n. See *LUTUM rotæ fabrorum*.

**ALCHECHENGI** (It.), n.  $A^3$ -ka-ke'n $^2$ /ji $^2$ . See *PHYSALIS alkekengi*.

**ALCHEMIA** (Lat.), n. f.  $A^2(a^3)/ke^2m(ch^2am)-i(e)/a^3$ . Alchemy.

**ALCHEMIC**, **ALCHEMICAL**, adj.  $A^2$ -ke $^2$ /mi $^2$ k, -ke $^2$ /mi $^2$ -ka $^2$ . Fr., *alchimique*. Ger., *alchemisch*. It., *alchimico*. Sp., *alquímico*. Of or pertaining to alchemy.

**ALCHEMILLA** (Lat.), n. f.  $A^2(a^3)/ke^2m(ch^2e^2m)-i^2/la^3$ . Ar., *ál-kemilyeh*, because it was much used by the alchemists. Fr., *alchimille*. Ger., *Frauenmantel*, *Sinaw*. Sp., *alquimilla*. A genus of rosaceous herbs established by Linnaeus, belonging to the sub-order *Sanguisorbeæ*, having a persistent tubular calyx, four-parted and provided with 4 external bracteoles, 1 to 4 very short stamens inserted on the calyx, and 1 to 4 carpels with the style laterally disposed. The flowers are scattered (i. e., not arranged in clusters). [B. 34, 51.]—*A. alpina* [Linnaeus]. *A. alpinus*. Fr., *alchimille satinée* (ou *argentée*). Ger., *Alpenfrauenmantel*. Silvery ladies'-mantle. A species of *A.* growing upon rocks in the mountainous districts of Europe, and, according to some authors, in America. It has occasionally been used as a substitute for *A. vulgaris* in medicine. [B. 34, 48, 71, 93.]—*A. aphanes*, *A. arvensis* [Scopoli]. Fr., *petit pied-de-lion*, *perce-pierre des champs*. Ger., *Ackersinaw*. Syn.: *Aphanes arvensis* [Linnaeus]. Parsley-piert; a small annual species with minute green flowers arranged in axillary tufts, growing in waste lands and cultivated fields in America and Great Britain. [B. 19, 34, 71.]—*A. argentea* [Lamarck]. *A. alpina*. [B. 173.]—*A. vulgaris* [Willdenow]. Fr., *alchimille*, *manseau des dames*, *pied-de-lion*. Ger., *gemeiner Frauenmantel*, *Ackerfrauenmantel*, *Alchemistenkraut*. It., *piede di leone*. Sp., *alquimilla*, *pied de leon*. Ladies'-mantle; a species common in Europe, bearing petiolate, roundish, lobate leaves and small golden-green flowers. Its root is thick, fibrous, and of a black color, and has a disagreeable odor and an astringent taste. The leaves were formerly official, and the root (*radix alchemille majoris*, *radix pedis leonis*, *radix leontopodii*) has been used in medicine as an astringent, diuretic, and vulnerary. Two varieties of the plant are described: *A. vulgaris*, var. *alpina*, and *A. vulgaris*, var. *glabra*. [B. 19, 47, 52, 112, 173.]—*Radix alchemille majoris*. See *A. vulgaris*.

ALCHEMILLA VULGARIS.  
[B. 106.]

**ALCHEMILLA** (Lat.), n. f.  $A^2(a^3)/ke^2m(ch^2u^6m)-i^2/la^3$ . See *ALCHEMILLA*.

**ALCHMY**, n.  $A^2$ /ki $^2$ -mi $^2$ . For deriv., see *ALCHEMY*. Lat., *alchymia*. Fr., *alchymie*. Ger., *Alchymie*. It., *alchimia*. Sp., *alquimia*. 1. Alchemy. 2. An alloy of copper and arsenic resembling silver. [B. 59.]

**ALCHYTRAN**, n. Deriv. perhaps through Ar. from Gr.,  $\chi\upsilon\tau\rho\alpha$ , a pot. Also written *alkytran*. A remedy applied to painful and carious teeth; perhaps rock alum, or some mineral salt melted in pots. [B. 111.]

**ALCIBADIUM**, **ALCIBIUM** (Lat.), n's n.  $A^2(a^3)/si^2(ki^2)-bi^2(be)-a^2(a^3)/di^2-u^2m(u^4m)$ , - $si^2(ki^2)/bi^2-u^2m(u^4m)$ . Gr.,  $\alpha\lambda\kappa\iota\beta\acute{\alpha}\delta\iota\omicron\nu$  [Galen, Dioscorides], from  $\alpha\lambda\kappa\eta$ , protection, and  $\beta\iota\omicron\varsigma$ , life. The viper's bugloss (*Echium vulgare*), so called because used as an antidote to the bite of the viper. [A. 311, B. 78.]

**ALCICORNIS** (Lat.), adj.  $A^2(a^3)/si^2(ki^2)-ko^2r-ni^2s$ . For deriv., see *ALCES* and *CORNU*. Fr., *alcicorne*. Having horns resembling those of an elk. [A. 346.]

**ALCIMAD**, **ALCIMOD**, n's. Ar., *al-uthmad*, antimony. An alchemical term for antimony. [B. 52.]

**ALCHEMIST**, n.  $A^2$ /ke $^2$ m-i $^2$ st. Fr., *alchimiste*. Ger., *Alchemist*. It., *alchimisto*. Sp., *alquimista*. One who practises alchemy.

**ALCHEMISTENKRAUT** (Ger.), n.  $A^3$ -ch $^2$ e $^2$ m-i $^2$ s/te $^2$ n-kra $^3$ -ut. See *ALCHEMILLA vulgaris*.

**ALCHEMY**, n.  $A^2$ /ke $^2$ m-i $^2$ . From Ar., *Al-kimīd* (probably from  $\chi\eta\mu\acute{\alpha}$ , chemistry, with the article *al*, the, prefixed; but perhaps from Ar., *Alhakīm*, a philosopher). The form *alchymy* was made on the theory of the derivation from  $\chi\eta\mu\acute{\alpha}$ , a melting-together (in Byzant.-Gr., also meaning chemistry). [A. 302, 311; B. 39, 52, 78.] Fr., *alchimie*. Ger., *Alchemie*. It., *alchimia*. Sp., *alquimia*. 1. A pretended science, much in vogue in the Middle Ages and down to the end of the 17th century, which had for its object the transmutation of the metals into gold and the discovery of the elixir of life, the panacea, and the philosopher's stone. The researches carried on by the votaries of *A.* laid the foundation of modern chemistry and formed the basis of much of the medical science of the 17th and 18th centuries. [B.] 2. An alloy. See *ALCHMY*.

**ALCHERME**, n. See *ALKERMES*.

**ALCHERON**, n. See *LAPIS a.* and *BEZOAR bovinus*.

**ALCHIBERT**, **ALCHIBRIC**, n's. See *ALKIBRIC*.

**ALCHIEN**, n. See *ALKIAN*.

**ALCHIMELECH**, n. See *ALKHILAL-MELECH*.

**ALCHIMIE** (Fr.), n. f.  $A^3$ -shi $^2$ -me. Alchemy.

**ALCHIMILLA** (Lat.), n. f.  $A^2(a^3)/ki^2(ch^2i^2)-mi^2/la^3$ . 1. Of Tournefort, a genus comprising the *Alchemilla* and *Aphanes* of Linnaeus. 2. Of Hallier, the *Alchemilla* of Linnaeus. [B. 170.]

**ALCHIMILLE** (Fr.), n. f.  $A^3$ -shi $^2$ -mel. *Alchemilla*, especially the *Alchemilla vulgaris*. [B. 52.]—*A. Alpine*. 1. *Alchemilla alpina*. 2. *Alchemilla vulgaris*, var. *alpina*.—*A. argentée*. *Alchemilla alpina*. [B. 46.]—*A. commune*. *Alchemilla vulgaris*. [B.]—*A. des Alpes*. *Alchemilla alpina* [B. 51.]—*A. glabre*. *Alchemilla vulgaris*, var. *glabra*. [B. 173.]—*A. satinée*. *Alchemilla alpina*. [B. 173.]

**ALCHIMILLEÆ** (Lat.), n. f. pl.  $A^2(a^2)/ki^2m(ch^2i^2m)-i^2/le^2e-(a^3-e^2)$ . See *ALCHEMILLEÆ* (1st def.).

**ALCHIMINIER** (Fr.), n.  $A^3$ -shi $^2$ -mi $^2$ -ni $^2$ -a. The medlar (*Mespilus germanica*). [B. 88.]

**ALCHIMIQUE** (Fr.), adj.  $A^3$ -shi $^2$ -mek. Alchemical.

**ALCHIMISTE** (Fr.), n. m.  $A^3$ -shi $^2$ -m-est. An alchemist.

**ALCHITRAN**, **ALCHITRON**, n's. From Ar., *al-qat'rān* (Sp., *alquitran*), resin, pitch. Lat., *alchitrum*, *alquitrum*. Also written *alkatran*, *alkitran*, *alkitrum*, etc. 1. An alchemical term for resin, and allied substances, such as oil of juniper, tar, and bitumen. 2. Prepared arsenic. [B. 39, 48, 50.] Cf. *CATRAME* and *GOUDRON*.

**ALCHOLIZED**, adj.  $A^2$ -ko $^2$ /i $^2$ -za $^2$ /te $^2$ d. Alcoliolized.

**ALCHOOL**, n.  $A^2$ /ko $^2$ -ol. An old form of *alcohol*. [B. 109.]

**ALCHORNEA** (Lat.), n. f.  $A^2(a^3)/ko^2r(ch^2o^2r)-ne^2-a^3$ . Fr., *alchornée*. A genus of euphorbiaceous plants established by Solander. [B. 48.]—*A. cordata* [Bentham]. Fr., *buisson de Noël*. Syn.: *Schousboea cordifolia*. A species growing in Senegal and Guinea, distinguished by its cordate leaves. It has been used as a sudorific. [B. 46.]—*A. iricurana* [Casar]. A Brazilian species with long-petiolate, ovoid leaves. Used in anginas and as a vulnerary. [H. Baillon (B. 46).]—*A. latifolia* [Swartz]. A species growing in Jamaica, employed as a sudorific in rheumatism and syphilis. It was at one time thought to be the source of alcornoque bark. [B. 48, 88, 93.]

**ALCHORNIN**, n.  $A^2$ -ko $^2$ -ni $^2$ n. See *ALCORNIN*.

**ALCHUR**, n. An alchemical name for sulphur. [A. 337.]

**ALCHUTE** (Ar.), n. An excrescence (*morum*) occurring upon the eyelids. [B. 59.] See under *TRACHOMA carunculolum*.

**ALCHYMIA** (Lat.), n. f.  $A^2(a^3)/ki^2m(ch^2u^6m)-i^2/a^3$ . See *ALCHMY*.

**ALCHYMILLA** (Lat.), n. f.  $A^2(a^3)/ki^2m(ch^2u^6m)-i^2/la^3$ . See *ALCHEMILLA*.

**ALCHYMY**, n.  $A^2$ /ki $^2$ -mi $^2$ . For deriv., see *ALCHEMY*. Lat., *alchymia*. Fr., *alchymie*. Ger., *Alchymie*. It., *alchimia*. Sp., *alquimia*. 1. Alchemy. 2. An alloy of copper and arsenic resembling silver. [B. 59.]

**ALCHYTRAN**, n. Deriv. perhaps through Ar. from Gr.,  $\chi\upsilon\tau\rho\alpha$ , a pot. Also written *alkytran*. A remedy applied to painful and carious teeth; perhaps rock alum, or some mineral salt melted in pots. [B. 111.]

**ALCIBADIUM**, **ALCIBIUM** (Lat.), n's n.  $A^2(a^3)/si^2(ki^2)-bi^2(be)-a^2(a^3)/di^2-u^2m(u^4m)$ , - $si^2(ki^2)/bi^2-u^2m(u^4m)$ . Gr.,  $\alpha\lambda\kappa\iota\beta\acute{\alpha}\delta\iota\omicron\nu$  [Galen, Dioscorides], from  $\alpha\lambda\kappa\eta$ , protection, and  $\beta\iota\omicron\varsigma$ , life. The viper's bugloss (*Echium vulgare*), so called because used as an antidote to the bite of the viper. [A. 311, B. 78.]

**ALCICORNIS** (Lat.), adj.  $A^2(a^3)/si^2(ki^2)-ko^2r-ni^2s$ . For deriv., see *ALCES* and *CORNU*. Fr., *alcicorne*. Having horns resembling those of an elk. [A. 346.]

**ALCIMAD**, **ALCIMOD**, n's. Ar., *al-uthmad*, antimony. An alchemical term for antimony. [B. 52.]

**ALCMELELLA** (Lat.), n. f. A<sup>2</sup>l[ka<sup>2</sup>l]me<sup>2</sup>l<sup>2</sup>la<sup>2</sup>. Fr., *alcmelelle*. See **ACMELELLA**.—**A. ceylanica**. A name given by Slevogt (1703) to *Spilanthes acmella*. [B, 46.]—**A. Linnæi** [Cassini]. See **ACMELELLA Linnæi**.

**ALCOATE**, n. A<sup>2</sup>l'ko-at. For deriv., see **ALCOHOL**. A name given by Graham (1838) to an alcoholate. [B, 39.]

**ALCOB**, n. See **ALACAP**.

**ALCOCALUM** (Lat.), n. n. A<sup>2</sup>l(a<sup>2</sup>l)-ko<sup>2</sup>ka<sup>2</sup>(ka<sup>2</sup>)-lu<sup>2</sup>m(lu<sup>2</sup>m). Perhaps from ἀλκή, strength, and κόκκαλος, a pine cone. [B, 109.] The artichoke. [B, 109.]

**ALCOFOL**, n. See **ALCOHOL** (1st def.).

**ALCOGENE**, n. A<sup>2</sup>l'ko-je<sup>2</sup>l. From *alcohol*, and γερνᾶν, to beget. The cooler of a still. [B, 39.]

**ALCOGEL**, n. A<sup>2</sup>l'ko-je<sup>2</sup>l. For deriv., see **ALCOHOL** and **GELATIN**. The gelatinous compound of alcohol and silicic acid. [B, 2.] See **ALCOSOL**.

**ALCOHATE**, n. A<sup>2</sup>l'ko-hat. See **ALCOHOLATE**.

**ALCOHOL**, n. A<sup>2</sup>l'ko-ho<sup>2</sup>l. Deriv., Ar., *al-ko-hl*, a collyrium, from *kashala* (Hebr., *kākhāb*), to stain or paint. Lat., *alcohol* (m. or n.; gen., *alcoholis*). Fr., *alcool*. Ger., *Alkohol*. It., *alcool*, *alcol*. Sp., *alcohol*. Also written *alcoal* and *alkohol*. 1. Antimony or its trisulphide (used in the East as a pigment for the eyebrows). 2. A fine powder used as an application to the eyes. [Sandys (1615).] 3. Any very finely divided powder. "A. est pulvis subtilissimus." [B, 50.] 4. Hence, from the sense of tenuity thus acquired, the essence or inner principle of anything. 5. In its common acceptance, the essence or spirit of wine, *a. vini*. Common or ethyl a. [See **ETHYL A.**] 6. In chemistry, a generic term (first used in this sense by Dumas and Péligot in 1834 or 1835) for a series of compounds of which ethyl a. is a type, and which may be regarded as derived from the hydrocarbons by the replacement of one or more atoms of hydrogen in the latter by one or more molecules of hydroxyl; or they may be considered as formed by the substitution of a univalent, bivalent, or trivalent hydrocarbon for half the hydrogen in one, two, or three molecules of water (H<sub>2</sub>O). The a's have, accordingly, the general formula (C<sub>n</sub>H<sub>m</sub>)<sup>1</sup>OH, (C<sub>n</sub>H<sub>m</sub>)<sup>2</sup>(OH)<sub>2</sub>, (C<sub>n</sub>H<sub>m</sub>)<sup>3</sup>(OH)<sub>3</sub>, etc., being designated as monatomic, diatomic, triatomic, etc., according to the number of hydroxyl molecules which they contain, and receiving their specific names from that of the radicle (C<sub>n</sub>H<sub>m</sub>, etc.) combined with the hydroxyl (e. g., C<sub>2</sub>H<sub>5</sub>OH, ethyl a., C<sub>3</sub>H<sub>7</sub>(OH)<sub>2</sub>, glyceryl a.). The a's may be regarded as analogues of the inorganic hydrates, such as potassa, and, like the latter, they possess basic properties. On oxidation they are converted into aldehydes, ketones, and organic acids. [B, 2, 3, 4, 39, 50.] See also **GLYCOL**, **GLYCERIN**, **CARBINOL**, and **PHENOL**, and for the individual a's see the major list.—**Absolute a.** Lat., *a. absolutum* (sen *absolutus*). Fr., *alcool absolu*. Gr., *wasserfreier* (oder *absoluter*) *Alkohol*. It., *alcool assoluto*. Sp., *a. absoluto*. Syn.: *anhydrous a.* Ethyl a. deprived of water. See **ETHYL A.**—**Albuminous a.** A solution of white of egg in ordinary (ethyl) a. [B, 97.]—**A. absolutum**, **A. absolutus**. Absolute a. See **ETHYL A.**—**A. aceti**. Fr., *alcool de vinaigre*. **æthereum**. See **A. nitrico-æthereum**.—**A. of crystallization**. Fr., *alcool de cristallisation*. Ger., *Krystallisationsalkohol*. It., *alcool di cristallizzazione*. Sp., *a. de cristalización*. A. which unites molecule by molecule with a crystalline substance, and, like water of crystallization, helps to maintain the crystalline form of the latter. Thus sodium ethylate, when crystallized from an alcoholic solution, contains 2 molecules of a. of crystallization, C<sub>2</sub>H<sub>5</sub>O.Na + 2C<sub>2</sub>H<sub>5</sub>O, and in this form consists of colorless acicular crystals, but when deprived of its a. of crystallization becomes a white amorphous powder. Both methyl a. and ethyl a. unite in this way with salts. [B.]—**A. of sulphur**. See under **SULPHUR**.—**A. of the fatty series**. See **Fatty a.**—**A. opii dilutum**. The name (meaning spirit of wine) by which ethyl a. was known before the term a. was applied to that substance exclusively. [Paracelsus (B, 50).] See **A. 2.** In the old editions of the Sp. Ph., purified spirit obtained by the re-distillation of *a. vini commune*. [B, 97.]—**A. vini alcoholizatum**. Strong ethyl a. [B, 97.]—**A. vini commune**. Rectified spirit. [B, 97.]—**Aldehyde a.** Fr., *alcool-aldehyde*. Ger., *Aldehydalkohol*. A substance which has at once the structure and properties of an a. and an aldehyde. Al-dol, CH<sub>3</sub>.CH(OH).CH<sub>2</sub>.CH<sub>3</sub>:O, is an example, containing the molecule C<sub>4</sub>H<sub>9</sub>:O characteristic of the aldehydes, and being converted into a monobasic acid on oxidation, while it also contains a molecule of alcoholic hydroxyl (OH). The aldehyde a's may be regarded as glycols whose conversion into aldehydes has been incomplete, they being intermediate in structure between ordinary aldehydes and double aldehydes. [B.]—**Ammoniated a.** See **SPIRITUS AMMONIÆ**.—**Amylic a.** See **AMYL A.**—**Anhydrous a.** Fr., *alcool anhydre*. Ger., *wasserfreier Alkohol*. It., *alcool anidro*. See **Absolute a.**—**Aqueous a.** See **Hydrated a.**—**Aromatic a.** Fr., *alcool aromatique*. Ger., *aromatischer Alkohol*. It., *alcool aromatico*. Sp., *alcohol aromático*. An a. the radicle of which contains phenyl or one of its homologues. The aromatic a's proper are derived from the series of hydrocarbons homologous with benzene by the substitution of hydroxyl for an atom of hydrogen not in direct connection with a carbon atom of the benzene nucleus. Their constitution is, therefore, expressed by the general formula, C<sub>6</sub>H<sub>5</sub>.C<sub>n</sub>H<sub>2n+1</sub>(OH), in which the hydrogen of the benzene-residue, C<sub>6</sub>H<sub>5</sub>, admits of further replacement by various radicles. The aromatic a's may also be regarded as derived from the series of monatomic alcohols of the fatty series by the substitution of phenyl or any univalent radicle of the aromatic series for hydrogen. Thus, benzyl a., C<sub>6</sub>H<sub>5</sub>.CH<sub>2</sub>(OH), may be regarded as methyl a. in which phenyl replaces hydrogen. The aromatic a's are isomeric with the monatomic phenols, which are, indeed, frequently classed under the same head. [B, 4.] See also **Aromatic GLYCOL** and **PHENOL**.—**Caustic a.** Fr., *alcool caustique*. It., *alcool caustico*. Sp., *a. caustico*. Sodium ethylate. [B.]—**Common a.** Lat., *a. vini, spiritus rectificatus*. Fr., *alcool ordinaire* (ou *vintage*). Ger., *gewöhnlicher Alkohol*. Rectified spirit; the ordinary ethyl a. of the shops. See **ETHYL A.**—**Condensed a.** A term sometimes applied to saccharine and amylaceous substances, regarded as derivatives of the a's. [B, 63.]—**Dehydrogenated a.** Lat., *a. dehydrogenatum* (sen *dehydrogenatus*). Fr., *alcool déshydrogéné*. Aldehyde. [B.]—**Deodorized a.** Ethyl a. from which odorous and coloring matters have been removed by filtration through charcoal. [B, 14.]—**Di-acida a.** Fr., *alcool bi-acide*. Ger., *zweiwerthiger Alkohol*. See **DIATOMIC A.**—**Diatomic a.** Fr., *alcool biatomique*. Ger., *zweiatomiger Alkohol*. It., *alcool diatomico* (o *biatomico*). Sp., *a. diatómico*. An a. formed by the substitution of a bivalent organic radicle for half the hydrogen in 2 molecules of water, or by replacing 2 atoms of hydrogen in a hydrocarbon by 2 molecules of hydroxyl. There are 3 sets of diatomic a's: 1. The *glycols*, derived from hydrocarbons of the fatty series. 2. The *aromatic glycols*, derived from the glycols by the substitution of phenyl or its homologues for hydrogen. 3. The *diatomic phenols*, derived directly from hydrocarbons of the aromatic series. The last are often considered as forming a group distinct from the a's proper. The diatomic a's are also called *dihydric a's*, *diacid a's*, and *dibasic a's*, because they contain 2 molecules of hydroxyl replaceable by acid radicles, forming two sets of derived salts or compound ethers, and on oxidation giving rise to both monobasic and dibasic acids. [B, 2, 4, 6.]—**Dibasic a.** Fr., *alcool bibasique*. Ger., *zweibasischer Alkohol*. It., *alcool dibasico* (o *bibasico*). Sp., *a. dibásico*. See **Diatomic a.**—**Diglycosic a.** Fr., *alcool diglycosique*. A generic term for a class of hexatomic a's including sugar and gum. See **Polyglycosic a.**—**Dihydric a.** Fr., *alcool bihydrique*. Ger., *dihydricer Alkohol*. It., *alcool biidrico*. See **Diatomic a.**—**Dilute a.** Lat., *a. dilutum, spiritus dilutus* (sen *tenuor*). Fr., *alcool dilué*. Ger., *verdünnter Alkohol* (oder *Spiritus*). It., *alcool diluto*. Sp., *a. débil*. Ethyl a. containing more or less water. See **ETHYL A.**—**Diprimary a.** Fr., *alcool di-primaire*. Ger., *diprimärer Alkohol*. A diatomic a. in which the two alcoholic hydroxyl molecules are united to the two terminal carbon atoms of the hydrocarbon chain, e. g., CH<sub>3</sub>(OH).CH<sub>2</sub>.CH<sub>2</sub>.CH<sub>2</sub>(OH). [B, 4.]—**Disecundary a.** Fr., *alcool di-secondaire*. Ger., *disekundärer Alkohol*. A diatomic a. in which both the alcoholic hydroxyl molecules are united to carbon atoms which are themselves combined each with 2 other carbon atoms, e. g.,

$\text{CH}_3\text{--CH}_2(\text{OH})\text{--CH}_2(\text{OH})\text{--CH}_3$ . [B, 4].—**Ditertiary a.** Fr., *alcool di-tertiaire*. Ger., *ditertiärer Alkohol*. A diatomic a. in which both the alcoholic hydroxyl molecules are united to carbon atoms which are themselves each combined with 3 other carbon atoms, e. g.,  $\text{CH}_3\text{>C(OH)--C(OH)<CH}_3$ . [B, 4].—**Druggist's a.** Ordinary a. prepared by distillation as it is kept in the shops. [B, 14].—**Fatty a.** An a. derived from a hydrocarbon of the fatty series. [B.]—**Hexabasic a., Hexacid a., Hexatomic a., Hexhydric a.** Fr., *alcool hexabasique* (ou *hexatomique*, ou *hexhydrique*). Ger., *sechsbasischer* (oder *sechsatomiger*, oder *hexahydricher*) *Alkohol*. It., *alcool essabasco* (o *essatomico*, o *essadrico*). An a. formed by replacing half the hydrogen in 6 molecules of water by a sexvalent hydrocarbon, or by substituting 6 molecules of hydroxyl for 6 hydrogen atoms in a hydrocarbon. The hexatomic a's comprise nearly all of the saccharine proximate principles, such as cane- and milk-sugar; and their anhydrides constitute starch, cellulose, glycogen, etc. [B, 2].—**Hydrated a.** Fr., *alcool hydraté*. Ger., *wässriger Alkohol*. It., *alcool idrato*. Sp., *a. hidratado*. Syn.: *aqueous a.* Ethyl a. still containing water from which mere distillation will not free it. [B.]—**Iso-a.** Fr., *iso-alcool*. Ger., *Isalkohol*. It., *iso-alcool*. An a. derived from a hydrocarbon which does not present the normal form, i. e., contains carbon atoms which are directly united with more than 2 other carbon atoms, e. g., isobutyl a.,  $\text{CH}_3\text{--C(CH}_3)_2\text{H--CH}_2(\text{OH})$ , where the second carbon atom is directly united with 3 other carbon atoms. [B, 4].—**Monacid a., Monad a.** Fr., *alcool monacide*. Ger., *einwerthiger Alkohol*. See **Monatomic a.**—**Monatomic a.** Fr., *alcool monoatomique*. Ger., *einatomiger Alkohol*. It., *alcool monoatomico*. Sp., *a. monoatomico*. An a. formed by the substitution of a univalent hydrocarbon for half the hydrogen in 1 molecule of water, or by replacing 1 atom of hydrogen in a hydrocarbon by a molecule of hydroxyl. The monatomic a's comprise 3 varieties: 1. *Monatomic a's of the fatty series* derived from hydrocarbons of the fatty series. 2. *Aromatic a's* (q. v.). 3. *Monatomic phenols* derived directly from the aromatic hydrocarbons. The last are by many regarded as distinct from the a's proper. The monatomic a's are called also *monacid*, *monobasic*, and *monohydric a's*, because they contain but 1 molecule of hydroxyl replaceable by acid radicles, and hence form but one set of saline derivatives (compound ethers), and by their oxidation give rise to but one set of acids which are monobasic. [B, 2, 4, 6.] See also **PHENOL**.—**Monobasic a., Monohydric a.** Fr., *alcool monobasique* (ou *monohydrique*). Ger., *einsbasicher* (oder *monohydricher*) *Alkohol*. It., *alcool monobasico* (o *monoidrico*). Sp., *a. monobasico* (o *monohidrico*). See **Monatomic a.**—**Normal a.** Fr., *alcool normal*. Ger., *normaler Alkohol*. It., *alcool normale*. Sp., *a. normal*. An a. in which the hydrocarbon from which it is derived presents the normal form, i. e., consists of a chain of carbon radicles no one of which is directly connected with more than 2 other carbon radicles. [B, 4].—**Pentabasic a., Pentahydric a.** Fr., *alcool pentabasique* (ou *pentahydrique*). Ger., *fünfbasischer* (oder *pentahydricher*) *Alkohol*. It., *alcool pentabásico* (o *pentaidrico*). Sp., *a. pentabásico* (o *pentahidrico*). See **Pentatomic a.**—**Pentatomic a.** Fr., *alcool pentatomique*. Ger., *fünfatomiger Alkohol*. It., *alcool pentatomico*. Sp., *a. pentatomico*. An a. formed from 5 molecules of water by the substitution of a quinquivalent radicle for half the hydrogen; or derived from a hydrocarbon by replacing 5 hydrogen atoms by 5 molecules of hydroxyl. Instances of such a's are pinite and quercite. [B, 2].—**Pentylic a.** See **AMYL a.**—**Polyatomic a., Polybasic a., Polyhydric a.** Fr., *alcool polyatomique* (ou *polybasique*, ou *polyhydrique*). Ger., *mehratomiger* (oder *mehrbasischer*, oder *polyhydricher*) *Alkohol*. It., *alcool poliatómico* (o *polibásico*, o *polihidrico*). Sp., *a. poliatómico* (o *polibásico*, o *polihidrico*). An a. derived from a hydrocarbon by replacing more than 1 atom of hydrogen by an equivalent amount of hydroxyl, or formed by the substitution of a compound radicle for half the hydrogen in more than 1 molecule of water. [B.] See **Diatomic a.**, **Triatomic a.**, etc.—**Polyglucosic a.** Fr., *alcool polyglucosique*. A hexatomic a. which may be regarded as derived from 2 or more molecules of glucose ( $\text{C}_6\text{H}_{12}\text{O}_6$ ) by the subtraction of a number of water molecules which is less by one than the number of molecules of glucose. They have, accordingly, the general formula  $\text{nC}_6\text{H}_{12}\text{O}_6\text{--(n-1)H}_2\text{O} = \text{C}_{6n}\text{H}_{10n+2}\text{O}_{6n+1}$ , and are designated as *di-glucosic*, *triglucosic*, etc., according as  $n = 2, 3$ , etc.; but only the diglucosic a's are known. [B, 2].—**Primary a.** Fr., *alcool primaire*. Ger., *primärer Alkohol*. It., *alcool primario*. A monatomic a. in which the alcoholic hydroxyl is united to a carbon atom which itself is connected with only one other carbon atom, i. e., is united to the terminal carbon atom in the chain of radicles of which the hydrocarbon is composed. Such a's have evidently the general formula  $\text{CH}_2(\text{OH})\text{--CH}_2\text{--CH}_2\text{--etc.}$ , or  $\text{C}_n\text{H}_{2n+1}\text{CH}_2(\text{OH})$ , and they may be regarded as methyl a. (carbinol) in which a single hydrogen atom is replaced by a univalent hydrocarbon. See **CARBINOL**. The primary a's are converted by oxidizing agents into aldehydes (q. v.). [B, 4].—**Primary-secondary a.** Fr., *alcool primaire-secondaire*. Ger., *primär-sekundärer Alkohol*. A diatomic a. in which one of the alcoholic hydroxyl molecules is united with a terminal carbon atom of the hydrocarbon chain, the other with a carbon atom which is itself combined with three other carbon atoms; e. g., primary-tertiary isobutylene glycol,  $\text{CH}_3\text{>C(OH)--CH}_2(\text{OH})$ . [B, 4].—**Pseudo-a.** Fr., *pseudo-alcool*, *alcool d'hydratation*. Ger., *Pseudoalkohol*. A variety of a. so called by Wurtz on account of the facility with which it can be decomposed into water and the corresponding olefine, and which may, therefore, be regarded as the hydrate of that olefine. The term is particularly applied to the two secondary amyl a's (propylmethylcarbinol

and isopropylmethylcarbinol) and to secondary hexyl a. (isobutylmethylcarbinol). [B.]—**Pyroligneous a.** Fr., *esprit pyroligneux*. Ger., *Holzgeist*. Methyl a. [B.]—**Real a.** Absolute a. [B.]—**Rectified a.** Lat., *spiritus rectificatus*, *a. rectificatum*. Fr., *alcool rectifié*. Ger., *rectificirter Alkohol* (oder *Geist*). It., *alcool rettificato*. Sp., *a. rettificado*. Ethyl a. concentrated by distillation. See **ETHYL a.**—**Secondary a.** Fr., *alcool secondaire*. Ger., *sekundärer Alkohol*. It., *alcool secundario*. An a. in which the carbon atom which is in combination with the alcoholic hydroxyl is also in direct combination with two other carbon atoms; e. g., dimethylcarbinol,  $\text{CH}_3\text{--CH(OH)--CH}_3$ . Such a's have the general formula  $\text{C}_m\text{H}_n\text{--CH(OH)--C}_p\text{H}_q$ , and may be regarded as derived from methyl a. (carbinol) by the substitution of two univalent hydrocarbons for 2 hydrogen atoms. See **CARBINOL**. The secondary a's on oxidation give rise to the *ketones* (q. v.). [B, 2, 4.] See also **Disecundary a.** and **Primary-secondary a.**—**Secondary-tertiary a.** Fr., *alcool secondaire-tertiaire*. Ger., *sekundär-tertiärer Alkohol*. A diatomic a. in which the 2 alcoholic hydroxyl molecules are united with 2 atoms of carbon which are themselves combined directly with 2 and with 3 other carbon atoms respectively; e. g., beta isomylene glycol,  $\text{CH}_3\text{>C(OH)--CH(OH)--CH}_3$ . [B, 4].—**Standard a.** Ethyl a. of a sp. gr. of 0.825 in which Sikes's hydrometer registers zero at 60° F. A commercial term. [B, 2].—**Stronger a.** Lat., *a. fortius*. See **ETHYL a.**—**Tertiary a.** Fr., *alcool tertiaire*. Ger., *tertiärer Alkohol*. It., *alcool terziario*. An a. in which the carbon atom with which the alcoholic hydroxyl is united is also in direct combination with 3 other carbon atoms; e. g., trimethylcarbinol,  $\text{CH}_3\text{>C(OH)--CH}_3$ . Such a's have the general formula  $\text{C}_m\text{H}_n\text{>C(OH)--C}_p\text{H}_q$ , and may be regarded as methyl a. (carbinol) in which 3 atoms of hydrogen are replaced by 3 univalent radicles. [B, 2, 4.] See also **Ditertiary a.**, **Primary-tertiary a.**, **Secondary-tertiary a.**, and **CARBINOL**.—**Tetrabasic a., Tetradic a., Tetrahydric a., Tetraatomic a.** Fr., *alcool tétrabasique* (ou *tétrahydrique*, ou *tétratomique*). Ger., *vierbasicher* (oder *tétrahydricher*, oder *vierratomiger*) *Alkohol*. It., *alcool tetrabásico* (o *tétraidrico*, o *tétratomico*). Sp., *a. tetrabásico* (o *tétrahidrico*, o *tétratómico*). An a. derived from 4 molecules of water by replacement of half the hydrogen by a quadrivalent hydrocarbon, or formed by the substitution of 4 molecules of hydroxyl for 4 atoms of hydrogen in a hydrocarbon. Erythrite is an example of such an a. [B, 2, 4].—**Thio-a.** Fr., *thioalcool*. Ger., *Thioalkohol*. See **MERCAPTAN**.—**Triacid a., Triatomic a.** Fr., *alcool triacide* (ou *triatomique*). Ger., *dreierthiger* (oder *dreiatomiger*) *Alkohol*. It., *alcool triatomico*. Sp., *a. triatomico*. An a. formed by the substitution of a trivalent hydrocarbon for half the hydrogen in 3 molecules of water, or derived from a hydrocarbon by replacing 3 atoms of hydrogen by 3 molecules of hydroxyl. Such a's have the general formula  $\text{C}_m\text{H}_n(\text{OH})_3$ , and comprise two classes: 1. The *glycerins*, derived from hydrocarbons of the aromatic series. The latter, however, are by many not included among the a's. The triatomic a's are also called *tribasic* and *trihydric* because they contain 3 molecules of hydroxyl replaceable by acid radicles, and should theoretically give rise to 3 sets of saline derivatives (ethers) and to monobasic, dibasic, and tribasic acids. Few of these derivatives, however, are actually known. [B, 2, 4, 6.] See also **GLYCERIN** and **PHENOL**.—**Tribasic a.** Fr., *alcool tribasique*. Ger., *dreibasicher Alkohol*. It., *alcool tribásico*. Sp., *a. tribásico*. See **Triatomic a.**—**Triglucosic a.** Fr., *alcool triglucosique*. See **Polyglucosic a.**—**Trihydric a.** Fr., *alcool trihydrique*. Ger., *trihydricher Alkohol*. It., *alcool triidrico*. Sp., *a. trihidrico*. See **Triatomic a.**

**ALCOHOLATE**, n. A<sup>2</sup>/ko-ho<sup>2</sup>-lat. Fr., *alcoolate*. Ger., *Alkoholat*. Syn.: *alcohate*. 1. A chemical compound of alcohol with another body, such as *chloral a.* 2. A salt containing one or more molecules of alcohol of crystallization. 3. A preparation made with alcohol. [A, 316; B, 3, 4.]

**ALCOHOLATED**, adj. A<sup>2</sup>/ko-ho<sup>2</sup>-a<sup>2</sup>-te<sup>2</sup>d. Treated or prepared with alcohol, as *a. polish*. [B, 97.]

**ALCOHOLATIVUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>-la<sup>3</sup>-ti/(e)<sup>2</sup>/vu<sup>2</sup>m-(wu<sup>2</sup>m). See **ALCOOLOTIF**.

**ALCOHOLATUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>-la<sup>3</sup>/tu<sup>2</sup>m-(tu<sup>2</sup>m). See **ALCOOLAT**.

**ALCOHOLATURA** (Lat.), n. f. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>-la<sup>3</sup>-tu<sup>2</sup>/(tu)<sup>2</sup>ra<sup>3</sup>. See **ALCOOLATURE**. [B, 95.]

**ALCOHOLETUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>-le/(a<sup>2</sup>)/tu<sup>2</sup>m-(tu<sup>2</sup>m). A medicinal substance prepared with alcohol. In the Belg. ph. it is used to designate a class of preparations corresponding nearly to the spirits of the U. S. Ph. [B, 95.]

**ALCOHOLEUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>/le<sup>2</sup>-(le<sup>2</sup>)-u<sup>2</sup>m-(u<sup>2</sup>m). See **ALCOOLÉ**.

**ALCOHOLIC**, adj. A<sup>2</sup>/ko-ho<sup>2</sup>/i<sup>2</sup>qk. Lat., *alcoholicus*, *alcoholicus*. Fr., *alcoolique*. Ger., *alkoholisch*, *spirituös* (only in 1st and 2d senses). It., *alcolico*, *alcolico*. Sp., *alcohólico*. 1. Of or pertaining to an alcohol, especially to ethyl alcohol. 2. Prepared with or contained in alcohol, as an *a. specimen*. 3. Due to the effect of alcohol, as *a. ataxia*. 4. Suffering from the effects of alcoholism, as an *a. patient*. [B.] For special uses of the word see under **DELIRIUM**, **ATAXIA**, **CIRRHOISIS**, and **FERMENTATION**.

**ALCOHOLICA** (Lat.), n. n. pl. of adj. *alcoholicus*. A<sup>2</sup>/(a<sup>2</sup>)-ko-ho<sup>2</sup>/i<sup>2</sup>-ka<sup>3</sup>. Gen., *alcoholicorum*. Preparations containing alcohol as their active ingredient.

**ALCOHOLICALLY**, adv. A<sup>2</sup>/ko-ho<sup>2</sup>/i<sup>2</sup>-ka<sup>3</sup>/i<sup>2</sup>. Following the manner or habit of alcohol. [B, 31, 39.]

**ALCOHOLICITY**, n. A<sup>2</sup>/ko-ho<sup>2</sup>/i<sup>2</sup>s<sup>2</sup>/i<sup>2</sup>-ti<sup>2</sup>. Alcoholic quality or strength, as the a. of a wine. [B, 39.]

**ALCOHOLIMETER**, n. A<sup>21</sup>-ko-ho<sup>21</sup>-i<sup>2</sup>m'e<sup>2</sup>t-u<sup>6</sup>r. See ALCOHOLOMETER.

**ALCOHOLISATUS** (Lat.), adj. A<sup>21</sup>(a<sup>21</sup>)-ko-ho<sup>21</sup>-i<sup>2</sup>-za(sa<sup>3</sup>)/tu<sup>8</sup>s-(tu<sup>4</sup>s). Alcoholized.

**ALCOHOLISM**, n. A<sup>21</sup>/ko-ho<sup>21</sup>-i<sup>2</sup>zm. Lat., *alcoholismus*, *alcoholismus*. Fr., *alcoolisme*. Ger., *Alkoholismus*. It., *alcoolismo*. Sp., *alcoholismo*. A term, first used (in its Latin form) by Magnus Huss, of Stockholm, in 1848, comprising the various phenomena which collectively are traceable to the influence of alcoholic liquors taken into the system. [D, 1].—**Acute a.** Lat., *alcoholismus acutus*. Fr., *alcoolisme aigu*, *délire alcoolique*. Ger., *akuter Alkoholismus*. It., *alcoolismo acuto*. Sp., *alcoholismo agudo*. 1. Acute intoxication produced by alcohol. The symptoms of acute a. occur in two stages: (a) A stage of excitement characterized by perversion of intellect, evidenced by want of mental balance and by hallucinations, emotional excitement, and inco-ordination of movement giving rise to a peculiar staggering gait, to difficulty of speech, and to diplopia. (b) A stage of coma, with the breathing stertorous, the pulse full and slow, the pupils dilated and sluggish, and complete insensibility alternating sometimes with convulsive movements. The stage of coma is followed by a period of depression of mental and physical faculties, with headache, nausea, and vomiting. In less severe cases the stage of coma may be absent altogether. 2. Acute alcoholic delirium. [B; D, 25.] See **DELIRIUM TREMENS**.—**Chronic a.** Lat., *alcoholismus chronicus*. Fr., *alcoolisme chronique*. Ger., *chronischer Alkoholismus*, *Trunksucht*, *Säuferkrankheit*. It., *alcoolismo cronico*. Sp., *alcoholismo crónico*. Syn.: *chronic alcohol disease*, *chronic alcoholic intoxication*. The series of phenomena induced by the persistent and immoderate use of alcoholic beverages. Among these phenomena are a diminished power of resistance to fatigue, disease, and the effects of injuries, chronic gastro-intestinal catarrh producing dyspepsia, anorexia, nausea, and vomiting, a tendency to fatty and cirrhotic degeneration of various organs, especially the liver, kidneys, and heart, and various cerebral, spinal, and neural lesions, producing neuralgia, amaurosis, muscular tremors and inco-ordination of movement, circulatory disturbances, insomnia, and various forms of mental alienation, such as melancholia and general paralysis. [B.]

**ALCOHOLISMUS** (Lat.), n. m. A<sup>21</sup>(a<sup>21</sup>)-ko-ho<sup>21</sup>-i<sup>2</sup>z(i<sup>2</sup>s)/mu<sup>8</sup>s-(mu<sup>4</sup>s). Also written *alcoholismus*. Alcoholism.—**A. acutus**. See **ACUTE ALCOHOLISM**.—**A. acutus gravior**. The severer form of acute alcoholism; alcoholic delirium and mania. [D.].—**A. acutus levior**. The lighter form of acute alcoholism; ordinary alcoholic intoxication.—**A. chronicus**. See **CHRONIC ALCOHOLISM**. See also **ALCOOLISMUS**.

**ALCOHOLIST** (Ger.), n. m. A<sup>21</sup>/ko-ho<sup>21</sup>-i<sup>2</sup>st. One suffering from alcoholism. [Westphal, B.]

**ALCOHOLIZED**, adj. A<sup>21</sup>-ko-ho<sup>21</sup>/i<sup>2</sup>z-a-te<sup>2</sup>d. See **ALCOHOLIZED**.

**ALCOHOLIZATION**, n. A<sup>21</sup>-ko-ho<sup>21</sup>/i<sup>2</sup>z-a'shu<sup>3</sup>n. Fr., *alcoolisation*. Ger., *Alkoholisation*, *Alkoholisirung*. It., *alcoolizzazione*. Sp., *alcoholización*. 1. The act or process of reducing a solid substance to a fine powder. 2. The act or process of rendering alcoholic, either by transformation into alcohol or by mixing with alcohol; of an alcoholic liquid, conversion into a liquid containing a higher proportion of alcohol. 3. The product obtained by such transformation or mixture. 4. The production of alcoholism in the animal organism. [B, 38, 39, 78.]

**ALCOHOLIZATUS** (Lat.), adj. A<sup>21</sup>(a<sup>21</sup>)-ko-ho<sup>21</sup>-i<sup>2</sup>z-a(a<sup>2</sup>)/tu<sup>8</sup>s-(tu<sup>4</sup>s). Alcoholized.

**ALCOHOLIZE**, v. tr. A<sup>21</sup>/ko-ho<sup>21</sup>-iz. Fr., *alcooliser*. Ger., *alkoholisieren*. It., *alcoolizzare*. Sp., *alcoholizar*. 1. To convert into a very fine powder. (Obsolete.) 2. To transform into alcohol; of dilute alcohol, to free from water. 3. To mix with alcohol. [B.]

**ALCOHOLIZED**, adj. A<sup>21</sup>/ko-ho<sup>21</sup>-izd. Lat., *alcoholisatus*, *alcoholizatus*, *alcoholisatus*. Fr., *alcoolisé*. Ger., *alkoholisiert*. It., *alcoolizzato*. Sp., *alcoholizado*. 1. Of a solid body, reduced to the state of a very fine powder, as a. iron. 2. Transformed into alcohol, united or mixed with alcohol; of a liquid already containing alcohol, rendered more alcoholic. [B.]

**ALCOHOLMETER**, n. A<sup>21</sup>-ko-ho<sup>21</sup>/me<sup>2</sup>t-te<sup>2</sup>r. See **ALCOHOLOMETER**.

**ALCOHOLMETRICAL**, adj. A<sup>21</sup>/ko-ho<sup>21</sup>-me<sup>2</sup>t/ri<sup>2</sup>-ka<sup>2</sup>l. See **ALCOHOLOMETRIC**. [B, 37.]

**ALCOHOLOMETER**, n. A<sup>21</sup>-ko-ho<sup>21</sup>-o<sup>2</sup>m'e<sup>2</sup>t-u<sup>6</sup>r. From *alcohol*, and *μέτρον*, a measure. Fr., *alcoolmètre*, *alcoolomètre*. Ger., *Alkoholometer*. It., *alcoolimetro*, *alcoolometro*. Sp., *alcoholimetro*, *alcoholómetro*, *alcoolometro*. Syn.: *alcoholimeter*. An instrument (usually a hydrometer) for determining the amount of alcohol in a liquid. [B.] See also **DILATOMETER**, **EUBULIMETER**, **VAPORIMETER**, and **VINOMETER**.—**Cartier's a.** Fr., *alcoolimètre de Cartier*. Ger., *Alkoholometer von Cartier*. It., *alcoolimetro di Cartier*. Sp., *alcoolómetro de Cartier*. A hydrometer formerly much used in France for testing alcoholic liquids, having the scale so graduated as to register 10° in distilled water and 40° in absolute alcohol, the intermediate portion of the scale being divided into 34 equal parts. [B, 10, 38.]—**Centesimal a.** Fr., *alcoolmètre centesimal*. Ger., *hunderttheiliges Alkoholometer*. It., *alcoolimetro centesimale*. Sp., *alcoolómetro centesimal*. Gay-Lussac's a. A hydrometer so graduated that in a mixture of alcohol and water at 15° C. the reading of the scale indicates directly the number of parts by volume of absolute alcohol in 100 parts of the mixture. [B, 5, 37, 38.]—**Field's a.** An instrument for determining the alcoholic strength of a liquid by its boiling-point. It consists of a small boiler into which a very sensitive thermometer is inserted. [B, 37.]—**Gay-Lussac's a.** Fr., *alcoolmètre de Gay-Lussac*. It., *alcoolimetro di Gay-Lussac*. Sp., *alcoolómetro de Gay-Lussac*. See **Centesimal a.**—**Geissler's a.** An instrument for determining the alcoholic strength of a liquid by the

tension of the vapor given off at the boiling-point of the latter. It consists of a flask filled with the liquid to be examined and communicating with the upper end of a reservoir of mercury occupying one extremity of a U-tube. On immersing the flask in a water-bath and heating, the liquid boils and sets free vapor which by its expansion drives the mercury before it from the reservoir into the other arm of the U-tube, which is so graduated that the height to which the column of mercury rises indicates directly the amount of alcohol in the liquid examined. [B, 37.]—**Pharmaceutical a.** Fr., *alcoolmètre pharmaceutique*. Ger., *pharmaceutisches Alkoholometer*. It., *alcoolimetro farmaceutico*. An a. in use in Belgium. It is graduated like Baumé's hydrometer, except that the point to which the instrument sinks in distilled water is marked 0°, instead of 10°, and the reading of its scale is, therefore, constantly 10° less than that of Baumé's instrument. [B, 10.]—**Richter's a.** Fr., *alcoolmètre de Richter*. Ger., *Richter'sches Alkoholometer*. An a. consisting of a hydrometer so graduated as to show directly the percentage by weight of alcohol in a mixture of alcohol and water. [B.]—**Tralles's a.** Fr., *alcoolmètre de Tralles*. Ger., *Tralles'sches Alkoholometer*. It., *alcoolimetro di Tralles*. Sp., *alcoolómetro de Tralles*. A hydrometer so graduated as to indicate directly the percentage by volume of alcohol in a mixture of alcohol and water at a temperature of 60° F. In principle it is very like the centesimal a. It is much used in the United States. [B, 5, 37.]

**ALCOHOLOMETRIC**, adj. A<sup>21</sup>-ko-ho<sup>21</sup>/o<sup>2</sup>-me<sup>2</sup>t/ri<sup>2</sup>-ka<sup>2</sup>l. Fr., *alcoolométrique*. Ger., *alkoholometrisch*. Of or pertaining to alcoholometry. [B, 3.]

**ALCOHOMETRY**, n. A<sup>21</sup>/ko-ho<sup>21</sup>-o<sup>2</sup>m'e<sup>2</sup>t-ri<sup>2</sup>. Fr., *alcoolométrie*, *alcoolométrie*. Ger., *Alkoholometrie*. The determination of the quantity of alcohol present in a spirituous liquor, especially by ascertaining the density. [B, 2.]

**ALCOHOLOTIVUM** (Lat.), n. n. A<sup>21</sup>(a<sup>21</sup>)-ko-ho<sup>21</sup>-o-i(tē)/vu<sup>4</sup>m-(vu<sup>4</sup>m). See **ALCOOLOTIF**.

**ALCOHOLOPHILIA** (Lat.), n. f. A<sup>21</sup>(a<sup>21</sup>)-ko-ho<sup>21</sup>-o-fi<sup>2</sup>/i<sup>2</sup>-a<sup>3</sup>. From *alcohol* and *φίλειν*, to love. Inordinate craving for alcoholic beverages. [A, 316.]—**A. periodica**. Recurring paroxysmal attacks of the same. [A, 316.]

**ALCOHOLOSIS** (Lat.), n. f. A<sup>21</sup>(a<sup>21</sup>)/ko-ho<sup>21</sup>-o/si<sup>2</sup>s. Gen., *alcoholoses*. See **ALCOHOLISM**.

**ALCOHOLYDROLYTON** (Lat.), n. n. A<sup>21</sup>(a<sup>21</sup>)/ko-ho<sup>21</sup>-i<sup>2</sup>(u<sup>4</sup>)-dro<sup>2</sup>/i<sup>2</sup>t(u<sup>4</sup>t)-o<sup>2</sup>n. See **COHOLYDROLYTON**.

**ALCOHOMEL**, n. See **ALCOOMEL**.

**ALCOHOMETER**, n. A<sup>21</sup>-ko-ho<sup>21</sup>-me<sup>2</sup>t-u<sup>6</sup>r. An abbreviated form of alcoholometer. [Craig, 1847, B, 39.] Cf. **ALCOOMÈTRE**.

**ALCOL**, n. A<sup>21</sup>/ko<sup>2</sup>l. (Obsolete.) 1. Alcohol. 2. Vinegar. [B, 78, 111.]

**ALCOLA** (Lat.), n. f. A<sup>21</sup>(a<sup>21</sup>)/ko-la<sup>3</sup>. Deriv. (1st sense), Ar., *alqôla*, same sense, from *qalal*, to tear, or *qald*, to fry or stew [B, 78]; or perhaps from Hebr., *alash*, to be turbid [B, 59]; (2d sense), from alcohol (3d def.). 1. In the Arabic medical works and in Paracelsus, a painful spreading ulcer of the lips and mouth, which was said to produce mania. Perhaps aphthæ or anthrax. In this sense also in the pl., *alcole*. 2. In Paracelsus, urinary gravel or sediment. [B, 59, 78.]

**ALCOLAT** (Fr.), n. m. A<sup>21</sup>-ko-la<sup>3</sup>. See **ALCOOLAT**.

**ALCOLISMUS** (Lat.), n. m. A<sup>21</sup>(a<sup>21</sup>)-ko-i<sup>2</sup>z(i<sup>2</sup>s)/mu<sup>8</sup>s(mu<sup>4</sup>s). For deriv., see **ALCOHOL** (3d def.). The act or process of reducing a substance to powder by corrosion. [B, 50.]

**ALCOLITUS** (Lat.), adj. A<sup>21</sup>(a<sup>21</sup>)-ko-li<sup>2</sup>de/tu<sup>8</sup>s(tu<sup>4</sup>s). For deriv., see **ALCOLA** (2d def.). In Paracelsus, pertaining to or containing urinary sediment, as *urina alcolita*, urine containing sediment. [B, 78.]

**ALCOLIZED**, adj. A<sup>21</sup>-ko<sup>2</sup>l-i<sup>2</sup>z-a'te<sup>2</sup>d. See **ALCOHOLIZED**.

**ALCOMETRICAL**, adj. A<sup>21</sup>-ko-me<sup>2</sup>t/ri<sup>2</sup>-ka<sup>2</sup>l. Pertaining to alcoholometry. [B, 37.]

**ALCONE**, n. See **AURICHALCUM** (2d def.).

**ALCOOL** (Fr.), n. A<sup>21</sup>-ko-o<sup>2</sup>l. Also used by French authors as a Latin word. Alcohol.—**A. absol.** See **ABSOLUTE ALCOHOL**.—**A. acétique**. Ethyl alcohol. [B.]—**A. acétonique**. Acetone alcohol; acetol. [B.]—**A. acéto-phénonique**. Acetophenonic (secondary phenethyl) alcohol. [B.] See **PHENETHYL ALCOHOL**.—**A. acétylique**. Acetic aldehyde. [A, 256.]—**A. acide**. See under **ACIDE**.—**A. à 50° centésimaux**. A mixture of ethyl alcohol and water indicating 50° on the centesimal alcoholometer, i. e., containing 50 per cent. by volume of absolute alcohol. Analogous expressions are used by French writers to designate alcoholic solutions of any degree of strength. [B.]—**A. alcali**. See under **ALCALI**.—**A. allylique**. Allyl alcohol. [B.]—**A. allylique bibromé**. Allyl alcohol dibromide. [B.] See **DIBROMHYDRIN**.—**A. allylique bichloré**. Allyl alcohol dichloride. [B.] See **DICHLORHYDRIN**.—**A. ammoniacal**. See **SPIRITUS AMMONIÆ**.—**A. ammoniacal ambré**. See **Alcoolé d'ammoniaque ambré**.—**A. ammoniacal anisé**. See **Liquor ammoni anisatus**.—**A. ammoniacal cantharidé**. A diuretic liniment made of ammonia water and oil of turpentine each 6 parts and tincture of cantharides 3 parts. [B; L, 85.]—**A. ammoniacal fétide**. See **Spiritus ammoniæ fetidus**.—**A. ammoniacal galacné**. See **Tinctura guttae ammoniacæ**.—**A. ammoniacal lavandulé**. See **Alcoolé d'ammoniaque lavandulé**.—**A. ammoniacal romariné**. See **Alcoolé d'ammoniaque romariné**.—**A. ammoniacal savonneux**. See **LINIMENTUM SAPONATUM AMMONIUM**.—**A. ammoniacal succiné**. See **Alcoolé d'ammoniaque succiné**.—**A. ammoniacal térébenthiné**. A liniment of ammonia water 1 part, alcohol 8 parts, and oil of turpentine 2 parts. [B; L, 85.]—**A. ammonié**. See **Spiritus ammoniæ**.—**A. amylique**. Amylene glycol. [B.]—**A. amylique**. Amyl alcohol. [B.]—**A. amylique actif**. **A. amylique inactif**. Optically active, optically inactive, amyl alcohol. [B.] See **AMYL ALCOHOL**.—**A. amyl-**

thallique. Thallium amylate. [B. 93.]—A. anhydre. Anhydrous alcohol. See *Absolute alcohol*.—A. anisique. A. anisylque. Anisic alcohol. [B.]—A. aqueux. See *Hydrated alcohol*.—A. aromatique. See *Aromatic alcohol*.—A. aromatique ammoniacal. See *Spiritus ammoniac aromaticus*.—A. arsénulé. A preparation recommended for preserving insects, consisting of a saturated solution of arsenic trioxide in alcohol of a strength of 85 per cent. by volume. [B. 92.]—A. benzoïque. A. benzylque. Benzyl alcohol. [B. 93, 105.]—A. biacide. A. biatomique. A. bibasique. A. bilhydrique. See *Diatomic alcohol*.—A. brom-allylique. Bromallyl alcohol. [B.]—A. buténique. Butenyl alcohol. [B.]—A. butinique. Butine glycol. [B.]—A. butylénique. Butylene glycol. [B.]—A. butylique. Butyl alcohol. [B.]—A. butylique primaire. A. butylique tertiaire. See *Primary and Tertiary butyl alcohol*.—A. butyrique. Butyl alcohol. [B. 38.]—A. campholique. A name proposed for borneol. [B. 93.]—A. camphoratus [Fr. Cod.]. Teinture de camphre concentrée. See *Spiritus camphoratus*.—A. camphoratus debillior [Fr. Cod.]. Teinture de camphre faible. See *Spiritus camphoratus*.—A. camphré. Teinture de camphre concentrée. See *Spiritus camphoratus*.—A. camphré de Raspall. A solution of 3 parts of camphor in 10 parts of alcohol of a strength of 95 per cent. by volume. [B. 92.]—A. camphré safrané. An alcoholic solution of camphor colored with saffron. [B. 92.]—A. camphylique. Camphyl alcohol; borneol. [B.]—A. caprique. Decatyl alcohol. [B. 93.]—A. caproïlique. A. caproïque. Caproyl alcohol, caproic alcohol. [B. 38, 93.] See *HEXYL alcohol*.—A. caprylique. Capryl (octyl) alcohol. [B. 38.]—A. caustique. See *Caustic alcohol*.—A. cérotique. A. cérylique. Ceryl alcohol. [B. 38.]—A. cétique. A. cétylique. Cetyl alcohol. [B. 38, 107.]—A. chlor-éthylque. Chlorethyl alcohol. [B.]—A. cholestérique. Cholesterin. [B. 107.]—A. cinnamique. A. cinnamylique. A. cinnylique. Cinnamic alcohol. [B. 93.]—A. crésylique. Cresyl alcohol; cresol. [B.]—A. cuminique. Cuminal alcohol. [B.]—A. d'asphodèle. Ethyl alcohol obtained from different species of *Asphodelus*, especially *A. ramosus*. [B. 38.]—A. de betterave. Ethyl alcohol obtained from the sugar beet. [B. 92.]—A. de bois. Methyl alcohol. [B. 92.]—A. décatylique. Decatyl alcohol. [B.]—A. de cristallisation. See *Alcohol of crystallization*.—A. décylque. Decatyl alcohol. [B. 46.]—A. de dahlia. Ethyl alcohol obtained by fermentation of the starch or saccharine principles in various species of *Dahlia*. [B. 105.]—A. de féoule. Ethyl alcohol obtained by the fermentation of starch. [B. 92.]—A. de fer. See *Alcoholized iron*.—A. de grains. Ethyl alcohol obtained by the distillation of grain. [B. 92.]—A. de mélasse. Ethyl alcohol obtained by the fermentation of molasses, as that of beet sugar. [B. 38.]—A. de Montpeiller. Ethyl alcohol obtained by the distillation of wine. [B. 92.]—A. dépilegmé. Absolute alcohol. [B. 88.]—A. de pomme de terre. Ethyl alcohol (mixed with amyl alcohol) obtained by the distillation of potatoes. [B. 92.] See *Potato spirit*.—A. d'épreuve. Proof spirit. [B. 92.] See *ETHYL alcohol*.—A. de riz. Ethyl alcohol obtained by the fermentation of rice. [A. 324.]—A. déshydrogéné. Aldehyde. [B. 92.]—A. de sorgho. Ethyl alcohol obtained by the fermentation of sorghum. [B. 105.]—A. de soufre. See *Alcohol sulphureus*.—A. de Sylvius. See *Alcohol aromaticus ammoniacal*.—A. d'éther. See *Spiritus ætheris compositus*.—A. d'éthyle. Ethyl alcohol. [B. 107.]—A. de topinambour. Ethyl alcohol obtained from the Jerusalem artichoke. [B. 105.]—A. de vinaigre. Acetic acid. [B. 92.] Cf. *Alcohol aceti*.—A. d'hydratation. See *Pseudo-alcohol*.—A. diacide. A. diatomique. A. dibasique. See *Diatomic alcohol*.—A. dibromo-propylique. Dibromopropyl alcohol. [B.]—A. diéthylénique. Diethylene alcohol. [B.]—A. diglucosique. See *Diglucoic alcohol*.—A. diglycérique. Diglyceryl alcohol. [B. 93.]—A. dihydrique. Dihydric alcohol. [B.] See *Diatomic alcohol*.—A. dilué. See *Dilute alcohol*.—A. disécondaire. See *Discondary alcohol*.—A. distillé. A synonym for spirit, or *alcoholat*. [B. 88.]—A. ditertiaire. See *Tertiary alcohol*.—A. dodécacylique. Dodecatyl alcohol. [B.]—A. d'oxydation. An alcohol produced by the oxidation of a hydrocarbon; opposed to *a. d'hydratation*, which was regarded by Wurtz as formed by the union of a hydrocarbon with water. [B. 93.] See *Pseudo-alcohol*.—A. du commerce. Commercial alcohol. [B.]—A. du Nord. See *A. de betterave*.—A. éthalique. Cetyl alcohol. [B.]—A. éthéré. See *Spiritus ætheris compositus*.—A. éthylenique. Ethylene glycol. In the pl., *a's éthyleniques*, the polyethylenic alcohols. [B.]—A. éthylique. Ethyl alcohol. [B.]—A. formique. Methyl alcohol. [B. 92.]—A. furfurylique. Furfuryl alcohol. [B.]—A. glycérique. Glycerin. [B.]—A. glycidique. Glycidic alcohol; glycid. [B.]—A. gras. Fatty alcohol. [B. 38.]—A. hecdécacylique. Cetyl alcohol. **ALCOOLAT** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-la<sup>3</sup>. Lat., *alcoholatum* [Fr. Cod.], *alcoholatum* [Belg. Ph.]. It., *alcolato*, Sp., *alcoholato*. A class of preparations, corresponding in part to the spirits of the U. S. Ph., made by distilling volatile substances, especially such as are derived from fresh or dried aromatic plants, with dilute alcohol. In the last edition of the Fr. Codex this title has been retained only for the *a's composés*, the *a's simples* being now denominated *teintures d'essences*. [B, 113.]—**A. ammoniacal**. See *SPIRITUS AMMONIÆ*.—**A. ammoniacal aromatique**, **A. ammoniacal aromatique anglais**. See *SPIRITUS AMMONIÆ aromaticus*.—**A. ammoniacal fétide**. See *SPIRITUS AMMONIÆ fetidus* and *Aqua fetida antihysterica*.—**A. antiscorbutique**. See *SPIRITUS ARMORACIÆ compositus*.—**A. aromatique ammoniacal** [Fr. Cod.]. Lat., *alcoholatum aromaticum ammoniacale* [Fr. Cod.]. Syn.: *esprit volatil ammoniacal huileux de Sylvius*. A preparation made by macerating for 3 or 4 days 100 parts each of orange-peel and lemon-peel, 30 parts of vanilla, 15 parts of cinnamon, 10 parts of cloves, and 500 parts of ammonium chloride in 500 parts each of cinnamon water (*eau distillée de cannelle* [Fr. Cod.]), and alcohol of a strength of 80 per cent. (by volume), then adding 500 parts of potassium carbonate and distilling 500 parts of the mixture. [B, 113.] Cf. *SPIRITUS AMMONIÆ aromaticus*.—**A. aromatique de Sylvius**. Syn.: *esprit carminatif de Sylvius*. A preparation made by macerating 24 parts each of the dried leaves of sweet basil, marjoram, rosemary, and rue, 8 parts each of angelica, anise, and lovage seeds, 6 parts each of bay-berries, nutmegs, cinnamon, and angelica root, and 3 parts each of galanga rhizome, ginger, cloves, and orange-peel, in 700 parts of alcohol of a strength of 85 per cent. by volume, and distilling the product. Formerly in much repute as a cordial and carminative. [B, 92.]—**A. composé**. An a. made from a mixture of volatile substances. [B, 92.]—**A. de Fioravanti** [Fr. Cod.]. Lat., *balsamum Fioravanti* [Fr. Cod.], *spiritus balsamicus* [Swiss Ph.]. It., *alcolato di Fioravanti*. Sp., *alcohol de trementina compuesto* [Sp. Ph.]. Syn.: *baume de Fioravanti*. A preparation made according to the Fr. Codex, by macerating for 4 days 2 parts each of aloes, galanga rhizome, ginger, zedoary, cinnamon, cloves, nutmeg, and the flowers of Cretan dittany, with 4 parts of laurel berries, in 120 parts of alcohol of a strength of 80 per cent. by volume; then adding 4 parts each of amber, liquid styrax, elemi and tcamabac resin, galbanum, and myrrh, and 20 parts of larch turpentine, and, after further maceration, distilling the mixture till 100 parts of the distillate are obtained. The Swiss preparation differs from this chiefly in the absence of the dittany, the resins, the amber, and the larch turpentine, and in the addition of 1 part of cubeb, 2 parts each of oil of turpentine, angelica root, helenium root, and sweet flag rhizome, and 60 parts of distilled water. The Spanish preparation is almost identical with the French, except that the aloes is omitted, and dittany leaves, solid styrax, and ordinary turpentine are substituted for dittany flowers, liquid styrax, and larch turpentine. [B, 95, 113.]—**A. de Garus** [Fr. Cod.]. Lat., *alcoholatum Gari* [Fr. Cod.]. It., *alcolato di Garus*. Sp., *alcoholato de Garus*. Syn.: *esprit de Garus*. A preparation of the Fr. Cod., Belg. Ph., and Sard. Ph. of 1853, made by macerating 5 parts each of aloes, cloves, and saffron, 2 parts of myrrh, 10 parts of nutmeg, and 20

parts of cinnamon in 5,000 parts of alcohol of a strength of 80 per cent. by volume; and, after filtering and adding 1,000 parts of water to the filtrate, distilling until 4,500 parts of distillate are obtained. [B, 10, 113.]—**A. de labiées composé**, **A. polyaromatique**. See *A. vulnéraire*.—**A. sans pareil**. See *Eau sans pareille*.—**A. simple**. An a. made from a single volatile ingredient. The *a's simples* are termed *teintures d'essences* in the last edition of the Fr. Codex. [B, 113.]—**A. vulnéraire** [Fr. Cod.]. Lat., *alcoholatum vulnerarium* [Fr. Cod.]. Syn.: *eau vulnéraire spiritueuse*. A preparation made by macerating 100 parts each of the fresh leaves of wormwood, angelica, sweet basil, calamint (*Calamintha officinalis*), fennel, hyssop, marjoram, melissa, peppermint, origanum, rosemary, rue, summer savory, sage, thyme, and wild thyme (*Thymus serpyllum*), and 100 parts each of the flowering tops of hypericum (St. John's-wort) and lavender, in 4,500 parts of alcohol of a strength of 60 per cent. by volume, and, after macerating for 6 days, distilling off 3,000 parts. [B, 113.] Cf. *Aqua vulneraria spirituosus*.

**ALCOOLATE** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-la<sup>3</sup>t. See *ALCOHOLATE*.

**ALCOOLATIF** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-la<sup>3</sup>-te. See *ALCOOLOTIF*.

**ALCOOLATUM** (Lat.), n. n.  $A^1$ [(a<sup>1</sup>)-ko-o<sup>2</sup>-la<sup>3</sup>]/tu<sup>3</sup>m(tu<sup>3</sup>m). See *ALCOOLAT*.—**A. aromaticum ammoniacale** [Fr. Cod.]. See *ALCOOLAT aromatique ammoniacal*.—**A. fragrans**. Cologne water. [B, 92.] See *SPIRITUS odoratus*.—**A. Gari** [Fr. Cod.]. See *ALCOOLAT de Garus*.—**A. vulnerarium** [Fr. Cod.]. See *ALCOOLAT vulnéraire*.

**ALCOOLATURA** (Lat.), n. f.  $A^1$ [(a<sup>1</sup>)-ko-o<sup>2</sup>-la<sup>3</sup>-tu<sup>3</sup>]/ra<sup>3</sup>. See *ALCOOLATURE*.

**ALCOOLATURE** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-la<sup>3</sup>-tu<sup>3</sup>r. Lat., *alcoholatura* [Fr. Cod.], *alcoholatura*. It., *alcolatura*. Sp., *alcoholatura*. A class of preparations of the Fr. Codex, corresponding in part to the fluid extracts of the U. S. Ph., made by macerating portions of a fresh plant in the same bulk or twice the bulk of alcohol, and filtering with expression. [B, 113.]—**A. composé**. An a. made from several different plants. [B, 107.]—**A. hydragocoolique**, **A. hydrolitique**. An a. in which the alcohol used for extraction is dilute. [B, 93, 107.]—**A. simple**. An a. made from a single vegetable substance. [B, 107.]—**A. vulnéraire** [Fr. Cod.]. Lat., *tinctura vulneraria* [Fr. Cod.]. It., *acqua vulneraria*, *acqua vulneraria rossa*. Sp., *alcoholatura vulneraria*. A preparation containing the same vegetable ingredients in the same proportions as the *alcoholat vulnéraire*, but which, instead of being distilled, are macerated for 6 days in 3,000 parts of alcohol of a strength of 80 per cent. by volume, the resulting extract being drawn off by filtration. [B, 113.]—**Hydra'**. See *A. hydragocoolique*.

**ALCOOLÉ** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-la. It., *alcooleo*, *alcolito*. Sp., *alcoholado*. A tincture, especially one made from the dried plant. The preparations formerly so designated are denominated in the last edition of the Fr. Codex *teintures alcooliques*. [B, 38, 113.]—**A. acide**. See *ACIDUM dulcificatum*.—**A. aloétique**. See *Tinctura aloes*.—**A. ammoniacal alcoolique**. Syn.: *teinture ammoniacal alcoolique*. An alcoholic tincture containing ammonia. [B, 85.] Cf. *Ammoniated TINCTURE*.—**A. balsamique**, **A. balsamique composé**. See *TEINTURE balsamique*, *Tinctura benzoini composita*, and *BALSAMUM commendatoris*.—**A. chlorhydrique**. See *ACIDE CHLORHYDRIQUE alcoolisé*.—**A's concentrés**. Alcoholic liquids containing large amounts of a volatile oil in solution; the essences of the Br. Ph. [B, 81.]—**A. nitrique**. See *SPIRITUS ÆTHERIS NITROSI*.—**A. sans pareil**. See *Eau sans pareille*.—**A. sinapique**. A preparation made by mixing 2 parts of black mustard flour, 4 parts of water, and 1 part of alcohol, and distilling off 1 part of the product. [B, 92.]—**A. sucré**. A sort of liqueur. [B, 92.] See *RATAPIA*.—**A. sulfurique aromatique**. See *TEINTURE aromatique sulfurique*.—**A. tannique**. See *TEINTURE de NOIX de GALLE composée*.—**Saccharo-a**. See *A. sucré*.

**ALCOOLICUS** (Lat.), adj.  $A^1$ [(a<sup>1</sup>)-ko-o<sup>2</sup>-la<sup>3</sup>]/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Alcoholic.

**ALCOOLIDE** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-led. Sp., *alcoholido*. A preparation containing alcohol. [B, 38.]

**ALCOOLIFICATION** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-li<sup>2</sup>-fi<sup>2</sup>-ka<sup>3</sup>-se-o<sup>2</sup>n<sup>2</sup>. The act or process of alcoholic fermentation. [B, 38.]

**ALCOOLINE** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-len. A balsamic preparation used as a collutory. [B, 38.]

**ALCOOLIQUE** (Fr.), adj. and n.  $A^1$ -ko-o<sup>2</sup>-lek. 1. (Adj.) alcoholic. 2. (N.) an alcoholic beverage. 3. (N.) one suffering from the effects of alcoholism. [B.]

**ALCOOLISABLE** (Fr.), adj.  $A^1$ -ko-o<sup>2</sup>-le-za<sup>3</sup>bl. Capable of conversion into alcohol. [B, 38.]

**ALCOOLISATION** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-le-za<sup>3</sup>-se-o<sup>2</sup>n<sup>2</sup>. Alcoholization.

**ALCOOLISATUS** (Lat.), adj.  $A^1$ [(a<sup>1</sup>)-ko-o<sup>2</sup>-li<sup>2</sup>-za(sa<sup>3</sup>)/tu<sup>3</sup>s(tu<sup>3</sup>s)]. Alcoholized.

**ALCOOLISÉ** (Fr.), adj. and n.  $A^1$ -ko-o<sup>2</sup>-le-za. 1. (Adj.) alcoholized. 2. (N.) one suffering from the effects of alcoholism. [B.]

**ALCOOLISER** (Fr.), v. tr.  $A^1$ -ko-o<sup>2</sup>-le-za. To alcoholize. Reflex., *s'a.*, to become converted into alcohol. [B, 38.]

**ALCOOLISME** (Fr.), n.  $A^1$ -ko-o<sup>2</sup>-li<sup>2</sup>zm. Alcoholism.—**A. aigu**. Acute alcoholism.—**A. à la toilette**. Alcoholism from tipping with toilet articles containing alcohol, such as cologne, etc. [Grossin, "Bull. gén. de therap.", May 15, 1882, p. 383.]—**A. cérébro-spinal**. The train of disorders of the cerebro-spinal nervous system produced by acute alcoholism. [B, 46.]—**A. chronique**. Chronic alcoholism.—**A. pulmonaire**. Pulmonary disease produced by alcoholism. [Fabre, "Gaz. des hôp.", xlii, 1868, p. 493 (B).]

**ALCOOLISMUS** (Lat.), n. m.  $A^1$ [(a<sup>1</sup>)-ko-o<sup>2</sup>-li<sup>2</sup>z(li<sup>2</sup>s)/mu<sup>3</sup>s-

(mu's). Alcoholism. [B.]—*A. gastro-intestinalis acutus*. The gastro-intestinal disorders produced by acute alcoholism. [B, 46.]

**ALCOOLIZATIO** (Lat.), n. f.  $A^2(a^1)-ko-o^2-l^2-za(zs^3)/shi^2-(ti^2)-o$ . Gen. *alcoholizatio*'nis. The rectification of spirit. [B, 87.] See ALCOOLIZATION (3d def.).

**ALCOOLOMÈTRE** (Fr.), n.  $A^1-ko-o^2-lo-me^2tr$ . See ALCOLOMETER.

**ALCOOLOMÉTRIE** (Fr.), n.  $A^1-ko-o^2-lo-ma-tre$ . See ALCOLOMETRY.

**ALCOOLOMETRUM** (Lat.), n. n.  $A^1(a^1)/ko-o^2-lo-me^2tr/ru^4m-(ru^4m)$ . See ALCOLOMETER.

**ALCOOLOTIF** (Fr.), n.  $A^1-ko-o^2-lo-tef$ . Sp., *alcoholotivo*. A preparation containing alcohol and designed for external use. [B, 38.]

**ALCOOMEL** (Fr.), n.  $A^1-ko-o^2-me^2l$ . It., *alcoomele*. A name given by Bérat to a mixture of 1 part of alcohol and 3 parts of honey. [B, 38.]

**ALCOOMELLÉ** (Fr.), n.  $A^1-ko-o^2-mel-la$ . It., *alcoomellato*. A name given by Bérat to a syrupy liquid prepared by mixing 3 parts of honey with 1 part of an extract made with dilute alcohol (*alcoolature hydrolique*). [B, 38.]

**ALCOOMETER**, n.  $A^1/ko-o^2-me^2t-u^6r$ . See ALCOLOMETER.

**ALCOOMÈTRE** (Fr.), n.  $A^1-ko-o^2-me^2tr$ . Also written *alcoolo-mètre*, but a. is the more usual form. [B, 38, 113.] See ALCOLOMETER.

**ALCOOMETRICAL**, adj.  $A^1/ko-o^2-me^2tr/i^2-ka^2l$ . Fr., *alcoométrique*. Ger., *alkoholometrisch*. It., *alcolimetrico*. Sp., *alcoométrico*, *alcoholimétrico*. Of or pertaining to alcoholometry. [B, 37.]

**ALCOOMETRY**, n.  $A^1/ko-o^2-me^2t-r-i^2$ . Fr., *alcoométrie*. See ALCOLOMETRY. [B, 37.]

**ALCOOTHIONIC ACID**.  $A^1-ko'-o^2-thi-o^2-n^2k$ . From *alcohol* and *thionic*. See ALTHIONIC ACID.

**ALCOPHYRE**, n.  $A^1/ko-fir$ . Fr., *alcophyre*. Ger., *Alkophyr*. An albuminoid substance or mixture of substances prepared by treating fibrin with a digestive ferment together with phosphoric acid, adding calcium carbonate, evaporating the mixture, extracting the residue with 95-per cent. alcohol, and again evaporating to dryness. [Brücke, "Sitzungsab. d. Wien. Akad. der Wsensch.," lxxvii, 3, pp. 111, 141 (B).]

**ALCOR**, n. Calcined copper. [B, 87, 111.] See *Æs ustum*.

**ALCORNÉE** (Fr.), n.  $A^1-ko^2-na$ . See ALCHORNEA.

**ALCORNIN**, n.  $A^1-ko^2-ni^2n$ . For deriv., see ALCHORNOQUE. Fr., *alcornine*. Ger., *Alcornin*. It., Sp., *alcornina*. Also written *alchornin*. A fatty crystallizable principle obtained by Blitz from alcornoque bark. [B, 7, 93.]

**ALCORNOC** (Lat.), n. n.  $A^1(a^1)-ko^2-r-no^2k$ . Indeel. Alcornoque. —*A'* extract (Ger.). Extract of alcornoque bark. —*A'* rinde (Ger.). Alcornoque bark. —*Cortex a*. Alcornoque bark.

**ALCORNOCO** (Lat., Sp.), n.  $A^1(a^1)-ko^2-r-no^2ko$ . 1. Alcornoque. 2. A name given in South America to *Bouditchia virgilioides*. [B.] —*A'* rinde (Ger.). Alcornoque bark. —*Extractum cabarro a*. Extract of alcornoque bark.

**ALCORNOCQUE** (Sp.), n.  $A^1-ko^2-r-no^2ka$ . From Ar., *al*, the, and *qôrg*, a sandal with a cork sole [A, 334], or from Celtic *cran-airke*, the cork-tree [A, 335]. Also written *alcornoqué*, *alcornoc*, and *alcornoco*. 1. The cork-tree. 2. A South American tree; according to the older writers, *Alchornea latifolia*; according to others, *Bouditchia virgilioides*, or a species of *Byrsonima*, furnishing a bark. [B, 5, 19, 88, 92, 93.] —*A* bark. Lat., *cortex a* (see *alcornoc*). Fr., *écorce d'a*. Ger., *Alcornoquinde*. A bark obtained from the a. (3d def.), first imported into Europe in 1784, and valued as a sudorific and remedy for phthisis. It occurs in commerce under the form of thick fragments presenting two layers, an external, spongy in consistence and astringent in taste, and an internal, woody and possessed of a bitter taste and emetic properties. [B, 5, 88.] —*A* of Brazil. Fr., *a du Brésil*. The *Bouditchia major*. [B, 92.] —*American*. See *A*. (2d def.). —*Cortex a* (Lat.), *écorce d'a* (Fr.). See *A* bark. —*European a* bark, *Spanish a* bark. The bark of the young cork-tree, used in tanning. [B, 39.]

**ALCOSOL**, n.  $A^1/ko-so^2l$ . For deriv., see ALCOHOL and SILICIC (2d def.). Syn.: *alcolgel* (2d def.). 1. An alchemical name for antimony. 2. A gelatinous body obtained by the action of ethyl alcohol upon colloidal silicic acid. [A, 337; B, 2.]

**ALCUBA**, n. An old name for butter; "butyrum crudum." [A, 335.]

**ALCUBRID**, **ALCUBRITH**, n's. From Ar., *al-kibrîth*, sulphur. Alchemical names for sulphur. [A, 305; B, 59.]

**ALCULA** (Lat.), n. f.  $A^1(a^1)/ku^2(ku)-la^2$ . See ALCOLA.

**ALCUR**, n. An alchemical name for sulphur. [A, 305, 325.]

**ALCYON** (Fr.), n.  $A^1-se-o^2n^2$ . The botanical genus *Alcyonium*. [B, 93.]

**ALCYONARIA** (Lat.), n. n. pl.  $A^2(a^1)-si^2(ku^2)-o-na/na^3/ri^2-a^2$ . Gen., *alcyonari'um*. For deriv., see ALCYONIUM. Fr., *alcyonaires*. Syn.: *Ctenocera* [Blainville]. A name given by Milne-Edwards to an order of *Cœlenterea*, belonging to the class *Actinozoa*, the individuals of which are made up of polyps provided with 8 pinnately fringed tentacles and divided into parts which are always some multiple of four. The A. are divided into the families *Alcyoniidae*, *Tubiporidae*, *Pennatulidae*, and *Gorgoniidae*, the latter including also the *Isididae* and *Corallidae*, which by some are regarded as distinct families. [B, 28, 93.] See also OCTACORALLA.

**ALCYONEUM** (Lat.), n. n.  $A^2(a^1)-si^2(ku^2)-o-ne/na^3/u^3m/n^4m$ . Really an adjective agreeing with *medicamen*. From ἀλκυόνειον,

ἀλκυόνειον, bastard sponge. Also written *alcionium* and *halcionium*. A sort of sponge believed by the ancients to be the nest of a sea-bird or to resemble a sea-bird's nest, made out of the inspissated foam of the sea. According to Pliny, it was used to remove spots from the face, and Celsus gives it a place in his list of astringents ("ro-dentia"). [B, 45, 111, 113, 114.] —*A. foraminosum*, *A. molle*, *A. supposum*, *A. tuberosum*, *A. vermiculatum*. Varieties of a. described by Dioscorides and others. [B, 59.]

**ALCYONIDÆ** (Lat.), n. f. pl.  $A^2(a^1)-si^2(ku^2)-o^2n-i^2d-e-(a^3-e^2)$ . Fr., *alcyonidées*. Ger., *Alcyoniden*. A family of *Alcyonaria* comprising those genera in which the body is fixed and contains calcareous spicula of sclerodermic corallum imbedded in its substance, but no hard central axis. [B, 28.]

**ALCYONIDÆÆ** (Lat.), n. f. pl.  $A^2(a^1)-si^2(ku^2)-o^2n-i^2d-e^2-i-(a^3-e^2)$ . Gray's name for a division of *Algae* (*Thalassiphyte*) comprising *Alcyonidium* and allied genera. [B, 170.]

**ALCYONIDIEÆ** (Lat.), n. f. pl.  $A^2(a^1)-si^2(ku^2)-o^2n-i^2d-i-(e^2-e^2-i)(a^3-e^2)$ . An order of *Thalassiphyte* made by Lamouroux, comprising the single genus *Alcyonidium*. [B, 170.]

**ALCYONIUM** (Lat.), n. n.  $A^2(a^1)-si^2(ku^2)-o^2n-i^2d-i^2-u^3m-(u^3m)$ . Lamouroux's name for a genus of *Algae* now referred to *Nostoc*. [B, 173.]

**ALCYONIUM** (Lat.), n. n.  $A^2(a^1)-si^2(ku^2)-o^2n-i-(e^2)u^3m(u^4m)$ . For deriv., see ALCYONEUM. Fr., *alcyon*. 1. *Alcyonium*. 2. A genus of *Actinozoa* established by Linnaeus, belonging to the order *Alcyonaria* and the family *Alcyoniidae*. [B, 28, 93.] —*A. digitatum*. Syn.: *dead-man's-hand*, *dead-men's-fingers*. A species of A. occurring under the form of sponge-like crusts or masses of orange-color upon the surface of submarine objects. [B, 28.]

**ALDABARAN** (Ar.), n. See ALBADARAN.

**ALDANE**, n.  $A^1/dan$ . For deriv., see ALDEHYDE. Fr., *aldane*. A term proposed by Ribau for products formed by the union of 2 or more molecules of an aldehyde, with the elimination of the elements of water. Thus, crotonic aldehyde,  $C_6H_{10}O_2$ , = 3 molecules of acetic aldehyde, less the elements of one molecule of water. The number of aldehyde molecules thus condensed is designated by the prefix di-, tri-, etc. E.g., diacetalane. [B, 2.]

**ALDBOROUGH**, n.  $A^1/d/bu^4-ro$ . A place in Suffolk, Eng., noted for its sea-bathing. [B, 108.]

**ALDEHYD** (Eng., Ger.), n.  $A^1/de^2-hid$ ,  $A^1/de^2-hu^4d$ . Aldehyde. [B.] —*A'* alkoholat. Aldehyde alcoholate. —*A'* grün. See *Aldehyde GREEN*. —*A'* harz. See *Aldehyde RESIN*. —*Aromatischer A*. See *Aromatic ALDEHYDE*.

**ALDEHYDAMMONIA**, n.  $A^2l/de^2-hid-a^2m-mo^2ni^2-a^2$ . For deriv., see ALDEHYDE and AMMONIA. Fr., *aldéhyde-ammoniaque*. Ger., *Aldehydammoniak*. Also written *aldehyde-ammonia*. Syn.: *ammonium aldehydate*. 1. A compound of an aldehyde with ammonia. The a's have in general the formula  $C_nH_{2n+1}.CH(OH).NH_2$ , and are frequently designated as *hydrate-amides* or *hydramines*. 2. When used without qualification, the compound of acetic aldehyde with ammonia,  $CH_3CH(NH_2).OH$ . See ETHTYLIDENE hydramine. —*A*. sulphite. A crystalline body, isomeric with taurine, formed by the action of sulphurous acid upon ethylidene hydramine, having the constitution  $C_2H_7NSO_3 = CH_3CH(NH_2).SO_3H$ . [B, 2, 3, 4.] —*Butyric a*, *Isobutyric a*. See BUTYLIDENE hydramine. —*Isovaleric a*. See AMYLIDENE hydramine.

**ALDEHYDATE**, n.  $A^1/de^2-hi-dat$ . Fr., *aldéhydate*. Ger., *Aldehydat*. 1. A compound of an aldehyde with a base, as ammonium a. 2. A salt of aldehydic (acetylous) acid. [B.]

**ALDEHYDCOLLIDIN** (Ger.), n.  $A^1/de^2-hu^4d-ko^2-li^2-den^2$ . Aldehydecollidine. —*A'* hexahydriir. Aldehydecollidine hexahydride. [B, 79.]

**ALDEHYDE**, n.  $A^1/de^2-hid$ . A contraction of *alcohol dehydrogenatus*, alcohol deprived of water. Lat., *aldehydum*. Fr., *aldehyde*. Ger., *Aldehyd*. It., *aldeide*. Sp., *aldehida*, *aldeida*. Syn.: *alcohol dehydrogenatum* (see *dehydrogenatus*), *aldehyd*. A term given by Liebig to the body now known as acetic a., from the circumstance that it may be regarded as ethyl alcohol from which 2 atoms of hydrogen have been removed. When the term a. is used without qualification, this body is understood to be meant. See ACETIC A. The term was subsequently extended to all bodies of similar composition produced by the oxidation of a primary alcohol, and having the molecular constitution of the latter, less two atoms of hydrogen. The general formula of the a's is  $(C_nH_n).C(H)O$ , where  $C_nH_n$  is any univalent hydrocarbon, and these bodies may therefore be regarded as derivatives: 1. Of a molecule of hydrogen, HH, in which the hydrogen is replaced by an oxygenized hydrocarbon. 2. Of a molecule of water in which both hydrogen atoms are replaced by a bivalent hydrocarbon, i.e., they are oxides of the bivalent series of hydrocarbons. 3. Of formic a.,  $CH_3O$ , in which a univalent hydrocarbon replaces one of the hydrogen atoms. On oxidation the a's are converted into the corresponding monobasic acids, of the general formula  $(C_nH_n).C(OH)O$ , and by treatment with nascent hydrogen they are reconverted into the alcohols,  $(C_nH_n).CH_2OH$ , from which they were derived. The individual a's (for which see the major list) have in general specific names derived from the corresponding acids. Many are obtained directly from plants, either existing ready formed in the latter or being given off as volatile oils on distilling the plants with water. [B, 2, 3, 4.] See also *Aromatic a* and *KETONE*. —*A*. acid. See under ACID.

—*A*. alcohol. See under ALCOHOL. —*A*. alcoholate. Fr., *aldéhyde-alcoolate*. Ger., *Aldehydalkoholat*. An addition compound of acetic a. and ethyl alcohol, having the composition  $C_2H_4O.C_2H_5O = C_4H_8O_2$ . [B, 2.] —*A*. base. See ALDINE. —*A*. blue. See under BLUE. —*A*. characteristic. The univalent radicle  $C(H)O$ , common to the a's. [B.] —*A*. ether. See CROTONIC ALDEHYDE. —*A*. ethyl-chloride. A supposed addition compound of acetic a. and ethyl chloride:  $C_2H_4O.C_2H_5Cl$ . Really monochlor-

ether. [B, 2, 3.] See CHLORETHER.—**A. green.** See under GREEN.  
—**A. radicle.** See under RADICLE.—**A. resin.** See under RESIN.  
—**Aromatic a.** Fr., *aldéhyde aromatique*. Ger., *aromatischer Aldehyd*. It., *aldeide aromatica*. Sp., *aldeida aromática*. An a. produced by the oxidation of the primary aromatic alcohols and by their own oxidation giving rise to the monobasic aromatic acids. Thus, benzoic a.,  $C_6H_5C(H)=O$ , is derived from benzyl alcohol,  $C_6H_5CH_2OH$ , and on oxidation furnishes benzoic acid,  $C_6H_5C(OH)=O$ . As the aromatic alcohols are regarded as derived from methyl alcohol (carbinol) by the substitution of phenyl or its homologues for hydrogen, so the aromatic a's may be considered to be formed by similar substitution from formic a. [B.] See also *Aromatic ketone*.—**Double a.** An a. which bears the same relation to a glycol or diatomic alcohol that an ordinary a. does to a monatomic alcohol. Thus, glyoxal,  $C_2H_2O_2$ ,  $\begin{matrix} C(H)=O \\ | \\ CH_2=O \end{matrix}$ , is derived from glycol,  $\begin{matrix} CH_2-OH \\ | \\ CH_2-OH \end{matrix}$ , in the same way that formic a.,  $C(H)=O$ , is derived from methyl alcohol,  $CH_3OH$ . [B.]—**Hydroxy-a.** Fr., *hydroxy-aldehyde*. Ger., *Hydroxyaldehyd*. A body derived from an a. by the substitution of a molecule of hydroxyl for an atom of hydrogen not situated in the a. characteristic (e. g., oxyaldehyde and aldol [q. v.]). [B, 4.]—**Met-a.** See the major list.  
—**Oxy-a.** 1. An hydroxy-a. 2. A particular hydroxy-a. derived from acetic aldehyde. [B.] See OXYALDEHYDE.—**Par-a.** See the major list.—**Thio-a.** Fr., *thio-aldehyde*. Ger., *Thioaldehyd*. An a. in which sulphur replaces oxygen in the a. characteristic. They may be regarded as sulphides of the bivalent hydrocarbons, having the general formula  $C_nH_{2n}C(H)=S$ . They are known chiefly in their polymeric modifications. [B, 4.]—**Trichlorinated a.** Lat., *aldehyde trichloratum*. Fr., *aldéhyde trichloré*. It., *aldeide trichlorata*. Chloral. [B.]  
—**ALDEHYDE (Fr.)**, n. A<sup>1</sup>-da-ed. Aldehyde.—**Alcool-a.** See ALDEHYDE-ALCOHOL.—**A. acétique.** Acetic aldehyde. [B.]—**A. acrylique.** Acrolein. [B.]—**A. alcoolate.** See ALDEHYDE-ALCOHOLATE.—**A. ammoniacque.** See ALDEHYDAMMONIA.—**A. amylique.** Valeric aldehyde. [B, 107.]—**A. anisique.** Anisic aldehyde. [B, 38.]—**A. aromatique.** See Aromatic aldehyde.—**A. benzoïque.** A. benzylique. Benzoic aldehyde. [B, 38, 93.]—**A. butyrique.** A. butyrique. Butyric aldehyde. [B.]—**A. camphorique.** Camphor. [B, 93.]—**A. caprique.** Capric aldehyde. [B.]—**A. caproïque.** A. caproylique. Caproic aldehyde. [B.]—**A. caprylique.** Caprylic aldehyde. [B, 38.]—**A. cétylique.** Palmitic aldehyde. [B, 93.]—**A. chloro-benzoïque.** A. chloro-benzylique. Chlorobenzoic aldehyde. [B.]—**A. chloro-salicylique.** Chlorsalicylic (ortho-chlorobenzoic) aldehyde. [B.] See CHLOROBENZOIC aldehyde.—**A. cinnamique.** Cinnamic aldehyde. [B, 93.]—**A. crithmique.** Crithmic aldehyde. [B, 93.]—**A. crotonique.** Crotonic aldehyde. [B.]—**A. éuminique.** Cumin aldehyde. [B, 93.]—**A. éthallique.** Palmitic aldehyde. [B, 92, 107.]—**A. éthyl-méthyl-protocatélique.** Ethylvanillin. [B, 93.]—**A. évodique.** Euodic aldehyde. [B.]—**A. formique.** Formic aldehyde. [B.]—**A. fumarique.** Fumaric aldehyde. [B.]—**A. heptoiqne.** A. heptylique. Cenanthylic aldehyde; cenanthal. [B.]—**A. hydroxy-benzoïque.** Hydroxybenzoic aldehyde. [B.]—**A. iso-butyrique.** A. iso-butylique. Isobutyric aldehyde. [B.] See BUTYRIC aldehyde.—**A. iso-caprique.** Isocapric aldehyde. [B.]—**A. iso-valérique.** Isovaleric aldehyde. [B, 93.] See VALERIC aldehyde.—**A. laurique.** Lauric aldehyde. [B.]—**A. mannitique.** Mannitose. [B, 93.]—**A. méstitique.** Mesitic aldehyde. [B, 93.]—**A. méth-oxybenzoïque.** A. méthyl-oxybenzoïque. Methyloxybenzoic aldehyde. [B.]—**A. méthyl-protocatélique.** Methylprotocatechuic aldehyde; vanillin. [B.]—**A. méthyl-salicylique.** Methylsalicylic (methyloxybenzoic) aldehyde. [B.]—**A. myristique.** Myristic aldehyde. [B.]—**A. naphthoïque.** Naphthoic aldehyde. [B.]—**A. nitro-benzoïque.** A. nitro-benzylique. Nitrobenzoic aldehyde. [B.]—**A. énanthique.** A. énanthylque. Cenanthylic aldehyde; cenanthal. [B.]—**A. orthochloro-benzoïque.** A. orthochloro-benzylique. Orthochlorobenzoic aldehyde. [B.] See CHLOROBENZOIC aldehyde.—**A. orthohydroxy-benzoïque.** A. orthoxy-benzoïque. Salicylic aldehyde. [B.]—**A. oxy-benzoïque.** A. oxy-benzylique. Hydroxybenzoic aldehyde. [B.]—**A. palmitique.** Palmitic aldehyde. [B.]—**A. parachloro-benzoïque.** A. parachloro-benzylique. Parachlorobenzoic aldehyde. [B.] See CHLOROBENZOIC aldehyde. [B.]—**A. parahydroxy-benzoïque.** Parahydroxybenzoic aldehyde. [B.] See HYDROXYBENZOIC aldehyde.—**A. para-isobutyrique.** Para-isobutyric aldehyde. [B.] See BUTYRIC aldehyde.—**A. para-méthylque.** Paramethyl aldehyde. [B.]—**A. paraméthyl-oxybenzoïque.** Anisic aldehyde. [B.]—**A. paraoxy-benzoïque.** Parahydroxybenzoic aldehyde. [B.] See HYDROXYBENZOIC aldehyde.—**A. para-thioformique.** A. para-thiométhylque. Parathiomethyl (parathioformic) aldehyde. [B.]—**A. para-toluique.** A. para-toluylique. Paratolulic aldehyde. [B, 93.] See TOLUIC aldehyde.—**A. phényl-acétique.** Phenylacetic aldehyde. [B.]—**A. phthalique.** Phthalic aldehyde. [B, 38.]—**A. pipéronique.** Piperonal. [B.]—**A. propionique.** Propionic aldehyde. [B, 93.]—**A. pyromucique.** Pyromucic aldehyde; pyromucic aldehyde. [B.]—**A. rutique.** Rutic aldehyde. [B.]—**A. salicylique.** Salicylic aldehyde. [B.]—**A. sélénio-isovalérique.** Selenioisovaleric aldehyde. [B.]—**A. subérique.** Suberic aldehyde. [B.]—**A. sycoérylique.** Sycoerylic aldehyde. [B.]—**A. thio-acétique.** Thioacetic aldehyde. [B.]—**A. thio-formique.** Thioformic aldehyde; methylene sulphide. [B, 93.]—**A. toluïque.** A. toluylque. Toluic aldehyde. [B.]—**A. tribromé.** Bromal. [B.]—**A. trichloré.** Chloral. [B.]—**A. valérique.** Valeric aldehyde. [B.]—**A. vanillique.** Vanillin. [B.]—**A. vinique.** Acetic aldehyde. [B, 107.]—**Bleu d'a.** See ALDEHYDE BLEU.—**Brom-a.** Chlor-a. Substitution compounds of ethylene in which bromine or chlorine replaces one or more atoms of hydrogen. [B, 93.]—**Hydroxy-a.** Hydroxy-aldehyde. See under ALDEHYDE.—**Mét-a.**

Metaldehyde. [B.]—**Oxy-a.** See OXYALDEHYDE and Oxy-ALDEHYDE.—**Par-a.** Paraldehyde. [B.]—**Thio-a.** Thio-aldehyde. See under ALDEHYDE.—**Vert d'a.** See ALDEHYDE GREEN.

**ALDEHYDE-AMMONIA**, n. A<sup>21</sup>/de-hid-a<sup>2</sup>m-mo<sup>2</sup>/ni<sup>2</sup>-a<sup>3</sup>. See ALDEHYDAMMONIA.

**ALDEHYDECOLLIDINE**, n. A<sup>21</sup>/de<sup>2</sup>-hid-ko<sup>2</sup>/li<sup>2</sup>-den. Fr., *aldéhyde-collidine*. Ger., *Aldehydcolloidin*. Syn.: *Aldehydine*. See COLLIDINE.—**A. hexahydrique.** Fr., *hexahydrique d'aldéhyde-collidine*. Ger., *Aldehydcolloidinhexahydrique*. An oily liquid, boiling at 165°, having the constitution of a. with the addition of 6 atoms of hydrogen:  $C_6H_2(CH_2)_3N.H_6 = C_6H_{14}N$ . [B, 79.]

**ALDEHYDENE**, n. A<sup>21</sup>/de<sup>2</sup>-hi<sup>2</sup>/den. Acetylene. [B.]

**ALDEHYDE-SULPHUROUS ACID**, n. A<sup>21</sup>/de<sup>2</sup>-hid-su<sup>2</sup>/fu<sup>2</sup>-ru<sup>2</sup>s. Fr., *acide aldéhyde-sulfureux*. Ethyldihydroxy-sulphonic acid. [B.]

**ALDEHYDIC**, adj. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/di<sup>2</sup>k. Fr., *aldéhydrique*. It., *aldeidico*. Sp., *aldeidico*. Pertaining to aldehyde. [B.]

**ALDEHYDIC ACID**, n. Fr., *acide aldéhydrique*. Ger., *Aldehydsäure*. It., *acido aldeidico*. Sp., *ácido aldeidico* (6 aldeidico). See ACETYLIOUS ACID.

**ALDEHYDIN** (Ger.), n. A<sup>31</sup>-de<sup>2</sup>-hu<sup>2</sup>-den'. Aldehydine.—**A<sup>3</sup>thylchlorid.** Aldehydine ethyl-chloride. [B, 79.]—**A<sup>3</sup>thyl-jodid.** Aldehydine ethyl-iodide. [B, 79.]

**ALDEHYDINE**, n. A<sup>21</sup>/de<sup>2</sup>-hi<sup>2</sup>/den. Fr., *aldéhydine*. Ger., *Aldehydin*. 1. A name given by Strecker to hydracetamide (q. v.). [B, 4, 93.] 2. Aldehydecollidine, an isomeric form of collidine (q. v.). [B, 2, 79.]—**A. ethyl-chloride.** Fr., *éthyl-chlorure d'aldéhydine*. Ger., *Aldehydinäthylchlorid*. A compound of aldehydecollidine with ethyl chloride, having the composition  $C_{10}H_{14}NCl = C_6H_2(CH_2)_3N.C_2H_5Cl$ . [B, 79.]—**A. ethyl-iodide.** Ger., *Aldehydinäthyljodid*. A compound of aldehydecollidine with ethyl iodide, having the formula  $C_{10}H_{14}NI = C_6H_2(CH_2)_3N.C_2H_5I$ . [B, 79.]

**ALDEHYDODIMETHYLPYROTACATECHUIC ACID**, n. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/do-di-me<sup>2</sup>/thi<sup>2</sup>l-pro-to-ka<sup>2</sup>-te<sup>2</sup>-ku<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE, di<sup>2</sup>, METHYL, and PYROTACATECHUIC ACID. Fr., *acide aldéhydo-diméthyl-pyrotacétique*. Ger., *Aldehydodimethylpyrotacetsäure*. An aldehyde acid derived from dimethylpyrotacetic acid (veratric acid); opianic acid. [B, 4.]

**ALDEHYDOMETHYLPYROTACATECHUIC ACID**, n. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/do-me<sup>2</sup>/thi<sup>2</sup>l-pro-to-ka<sup>2</sup>-te<sup>2</sup>-ku<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE, METHYL, and PYROTACATECHUIC ACID. Fr., *acide aldéhydo-méthyl-pyrotacétique*. Ger., *Aldehydomethylpyrotacetsäure*. See ALDEHYDOVANILLIC ACID.

**ALDEHYDOPAROXYBENZOIC ACID**, n. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/do-pa<sup>2</sup>-ro<sup>2</sup>x<sup>2</sup>/i<sup>2</sup>z-be<sup>2</sup>n-zo<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE and PAROXYBENZOIC ACID. Fr., *acide aldéhydo-paroxy-benzoïque*. Ger., *Aldehydoparoxybenzoesäure*. See ALDEHYDOSALICYLIC ACID.

**ALDEHYDORTHOXYBENZOIC ACID**, n. A<sup>21</sup>/de<sup>2</sup>-hid-o<sup>2</sup>r-tho<sup>2</sup>x<sup>2</sup>/i<sup>2</sup>z-be<sup>2</sup>n-zo<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE and ORTHOXYBENZOIC ACID. Fr., *acide aldéhydo-orthoxy-benzoïque*. Ger., *Aldehydorthoxybenzoesäure*. See ALDEHYDOSALICYLIC ACID.

**ALDEHYDOSALICYLIC ACID**, n. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/do-sa<sup>2</sup>/i<sup>2</sup>-s<sup>2</sup>i<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE and SALICYLIC ACID. Fr., *acide aldéhydo-salicylique*. Ger., *Aldehydosalicylsäure*. Syn.: *aldehydorthoxybenzoic acid*. A monobasic crystalline acid having the composition  $C_6H_5O_4 = C_6H_5(OH)(CH)(O)CO.OH$ , or that of salicylic acid in which one atom of hydrogen is replaced by the aldehyde characteristic  $C(H)=O$ . Two acids of this constitution are known: 1. *Ortho-a.*,  $C_6(H,H,H,CH:O.OH.CO.OH)$ . 2. *Para-a.*,  $C_6(H,CH:O.H,H,OH.CO.OH)$ . An isomeric substance, *aldehydoparoxybenzoic acid*, derived from paroxybenzoic acid, has the constitution  $C_6(H,H,OH,CH:O.H.CO.OH)$  or  $C_6(H,H,OH,H,CH:O.CO.OH)$ . [B, 2, 4.]

**ALDEHYDOVANILLIC ACID**, n. A<sup>21</sup>-de<sup>2</sup>-hi<sup>2</sup>/do-va<sup>2</sup>-ni<sup>2</sup>/i<sup>2</sup>z. For deriv., see ALDEHYDE and VANILLIC ACID. Fr., *acide aldéhydo-vanillique*. Ger., *Aldehydovanillasäure*. Syn.: *aldehydomethylpyrotacetic acid*. A monobasic acid occurring under the form of silky acicular crystals of the composition  $C_9H_6O_6 = C_6H_4(OH)(OCH_3)(CH:O)CO.OH$ , or that of vanillic acid in which the aldehyde characteristic  $CH:O$  replaces an atom of hydrogen. [B, 4.]

**ALDEHYDOXYBENZOIC ACID**, n. A<sup>21</sup>/de<sup>2</sup>-hid-o<sup>2</sup>x<sup>2</sup>/i<sup>2</sup>z-be<sup>2</sup>n-zo<sup>2</sup>/i<sup>2</sup>k. For deriv., see ALDEHYDE and OXYBENZOIC ACID. Fr., *aldéhydo-oxybenzoïque*. Ger., *Aldehydoxybenzoesäure*. Oxybenzoic (hydroxybenzoic) acid in which the aldehyde characteristic  $CH:O$  replaces an atom of hydrogen. It includes aldehydoparoxybenzoic and aldehydorthoxybenzoic acids. [B.] See ALDEHYDOSALICYLIC ACID.

**ALDEHYDSÄURE** (Ger.), n. A<sup>31</sup>-de<sup>2</sup>-hu<sup>2</sup>/d<sup>2</sup>-zoi-re<sup>2</sup>. Aldehydic (acetylious) acid. [B.]

**ALDEHYDUM** (Lat.), n. n. A<sup>21</sup>(a<sup>3</sup>l)-de<sup>2</sup>-hi(hu<sup>2</sup>)/du<sup>2</sup>m(du<sup>2</sup>m). Aldehyde. [B.]—**A. trichloratum.** Chloral. [B, 81.]

**ALDEL**, n. A Peruvian plant belonging to the order *Boraginaceae*. [A, 337.]

**ALDENEU** (Fr.), n. A<sup>31</sup>d-nu<sup>2</sup>. A cold sulphurous alkaline mineral spring in Switzerland, the waters of which are drank, and used in the form of hot baths, in bronchitis, rheumatism, and cutaneous affections. [B, 93.]

**ALDER**, n. A<sup>41</sup>/du<sup>2</sup>r. From A.-S., *alor*, *aler*. O. H. Ger., *elira*, *erila*. Icel., *ell*, *ohn*. Perhaps from Celtic *al*, near, and *lan*, a river-bank. Lat., *alnus*. Fr., *aune*. Ger., *Erle*. It., *alno*. Sp., *aliso*. The common name for several species of *Alnus* and shrubs of similar appearance. [B, 34, 116.]—**A. bark.** See under *ALNUS glutinosa*.—**A. buckthorn.** *Rhamnus frangula*. [B.]—**American a.** *Alnus serrulata*. [B.]—**Berry-bearing a.** *Rhamnus frangula*. [B.]—**Black a.** Fr., *aune noire*. A name formerly

given in England to *Rhamnus frangula*; in the United States, applied to *Prinos verticillatus* and *Alnus incana*. [B, 19, 34].—**EUROPEAN a.** *Alnus glutinosa*. [B, 5, 19].—**Heart-leaved a.** *Alnus cordifolia*. [A, 327].—**Red a.** *Cunonia capensis*. [B, 19].—**Smooth a.** *Alnus serrulata*. [B, 19].—**Speckled a., Tag a., Turkey a.** *Alnus incana*. [A, 327; B, 34].—**White a.** A name given to *Clethra alnifolia* and other plants. [B, 19.]

**ALDEYRE** (Sp.), n. A<sup>2</sup>-da<sup>12</sup>-ra. A place near Granada, in Spain, where there are mineral springs. [B, 88.]

**ALDIDE**, n. A<sup>2</sup>-did. From *aldehyde*. Fr., *aldide*. Ger., *Aldid*. A term applied by Gmelin to the aldehydes as a class, as well as to several organic anhydrides and other bodies not generally regarded as aldehydes. [B, 2.]

**ALDINE**, n. A<sup>2</sup>-den. From *aldehyde*. Fr., *aldine*. Ger., *Aldin*. Syn.: *aldehyde base*. A name given to a series of amorphous bodies having basic properties, produced by the decomposition of aldehydammonia (ethylidene hydramine) in alcoholic solution. The a's include hydracetamide, oxytriadine, oxytetradine, and oxypentadine. [B, 3.]

**ALDOL**, n. A<sup>2</sup>-do<sup>21</sup>. For deriv., see ALDEHYDE and ALCOHOL. Fr., *aldol*. Ger., *Aldol*. Syn.: *Oxybutyric aldehyde*, *oxybutyraldehyde*. A viscid liquid, of bitter aromatic taste, produced by the action of hydrochloric acid upon aldehyde, and having the constitution, C<sub>4</sub>H<sub>8</sub>O<sub>3</sub> = CH<sub>3</sub>.CH(OH).CH<sub>2</sub>.CH<sub>2</sub>.O. of an aldehyde-alcohol derived from butylene glycol, and polymeric with acetic aldehyde. On oxidation it furnishes beta hydroxybutyric acid. It has a polymeric form, *paraldol*, and a related body is known as *paraldol*. [B, 2, 3, 4].—**A. anhydride**. A body of the constitution C<sub>8</sub>H<sub>14</sub>O<sub>3</sub> = 2C<sub>4</sub>H<sub>8</sub>O<sub>2</sub> - H<sub>2</sub>O. [B, 2.]

**ALDROVANDA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)-dro-va<sup>2</sup>n(wa<sup>2</sup>n)/da<sup>2</sup>. Named after Aldrovandi, an Italian of water-plants belonging to the *Droseraceae*, established by Monti. [B, 49].—**A. vesiculosa** [Linneus]. A species of A. found in ponds in northern Italy, France, Germany, and India, distinguished by the peculiar vesicular character of the ends of its leaves, which causes them to float upon the surface of the water and thus support the plant. [B, 19.]

**ALDUM**, n. See ALZUM.

**ALE**, n. Al. A-S., *eale*, *aloth*, etc., from *alan* (Lat., *alere*), to nourish. [B, 116.] Lat., *cerevisia*. Fr., *ale* (ou *aile*). A fermented liquor made from the wort of barley-malt by fermenting rapidly and at a high temperature, so as to prevent the complete conversion of the saccharine matter into alcohol. By the subsequent transformation of this residual saccharine matter into alcohol and gaseous carbon dioxide, a sparkling effervescent liquid is produced. A. is usually of a light color, and contains a large proportion of hops and from 6 to 8 per cent. of alcohol. [B, 19].—**A. de garde** (Fr.). An a. containing a large amount of alcohol. [B, 51].—**A. légère** (Fr.). A light ale. [B, 51].—**Antiscorbutic a.** See *CEREVISIA antiscorbutica*.—**Bitter a.** A light ale, bitter from the large amount of hops employed in its preparation, and usually pale in color. [B, 190].—**Bitter stomachic a.** See *CEREVISIA amara*.—**Burton a.** A. made at the town of Burton-on-Trent, England, said to owe its excellence to the peculiar quality of the spring-water in the place. [B, 190].—**Gill**. An infusion of ground-ivy (*Nepeta glechoma*) in a., formerly used in thoracic affections and internal wounds. [B, 59].—**India a.** **Indian pale a.** Bitter a.; so called because first made especially for exportation to India. [B, 190].—**Syrup of a.** A. inspissated before it has undergone thorough fermentation. It is essentially a thick mucilaginous infusion of malt, and was formerly employed as a demulcent. [B, 59.]

**ALE** (Lat.), n. f. A(a<sup>3</sup>)/le(la). Gen., *a/les*. Gr., *ἀλε*. Mental aberration. [B, 78.]

**ALEATICO** (It.), n. A<sup>3</sup>-la-a<sup>3</sup>/ti<sup>2</sup>-ko. A sweet, aromatic Muscatel wine from Florence or Elba. [A, 305.]

**ALE-BERRY**, n. Al/be<sup>2</sup>-ri<sup>2</sup>. From *ale* and O.-E., *brive*, potage. [B, 39.] A sudorific decoction made by boiling bread and mace in ale. [B, 59.]

**ALEC** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k. Gen., *ale/cis*. See ALEX.

**ALEC** (Ar.), n. An old term for vitriol. [A, 353.]

**ALECARITH** (Ar.), n. See ALCHARIT.

**ALECH**. See ALEC (Ar.).

**ALECHARITH** (Ar.), n. See ALCHARIT.

**ALECHIL**, n. A tripod. [B, 111.]

**ALE-COST**, n. Al/ko<sup>2</sup>-st. For deriv., see ALE and COSTUM. A name given to *Balsamita vulgaris* (*Pyrethrum tanacetum*), because used to flavor ale. [B, 19.]

**ALECTOIRE** (Fr.), n. A<sup>3</sup>-le<sup>2</sup>k-twa<sup>3</sup>r. See ALECTORIA (1st def.).

**ALECTOR** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to<sup>2</sup>r. Gen., *alecto/ris*. A person incapable of sleeping. [A, 316.]

**ALECTORIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to<sup>2</sup>ri<sup>2</sup>-a<sup>3</sup>. Deriv. (2d meaning), perhaps Gr., *ἀλεκτωρ*, unmarried, because the character of the male sexual organs was not understood. [B, 71.] Fr., *alectoïre* (1st def.), *alectoïre* (2d def.). 1. Fem. of adj. *alectorius* (*gemma* understood). Syn.: *alectorian*, *cock-stone*. A stone said to be generated in the body of a cock and reputed to possess magical properties. 2. A genus of Lichens established by Achard belonging to the tribe *Alectoriei* [Nylander] or the family *Usneae* [Tuckerm.] [B, 46, 71, 75, 77, 104, 114].—**A. Arabum** [Achard]. Ger., *wohlriechende Bartflechte*. Syn.: *Usnea Arabum* [Kostel]. A species with a forked branching thallus having an amber-like odor and used as a stomachic, anti-emetic, and hypnotic. It is said to be the *oskna* of Avicenna. [B, 180].—**A. jubata** [Achard]. Fr., *crinière*. Syn.: *Conicularia jubata* [De Candolle], *Parmelia* (seu *Setaria*,

seu *Usnea*) *jubata*. A European species, used in Lapland as food for the reindeer, and in France in the preparation of astringent lotions for cutaneous excoriations. [B, 46, 71].—**A. usneoides**. A species resembling *A. Arabum*, occurring under the form of long strips upon trees in the warmer parts of Asia, Africa, and America. It was used by the Arabians as a cordial and hypnotic. [B, 71, 180.]

**ALECTORIAN**, n. A<sup>2</sup>-le<sup>2</sup>k-to<sup>2</sup>ri<sup>2</sup>-a<sup>2</sup>n. See ALECTORIA (1st def.).

**ALECTORIEI** (Lat.), n. m. pl. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to<sup>2</sup>ri(re)/e<sup>2</sup>i(e). In Nylander's classification of Lichens, a tribe of the family *Lichenacei*, series *Ramulodei*, including *Alectoria* and one or two allied genera. [B, 77.]

**ALECTORIOID**, adj. A<sup>2</sup>-le<sup>2</sup>k-to<sup>2</sup>ri<sup>2</sup>-oid. From *alectoria* (2d def.), and *είδος*, likeness. Resembling the thallus of *Alectoria* in shape; thread-like. [A, 316.]

**ALECTORIUS** (Lat.), adj. and n. m. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to<sup>2</sup>ri<sup>2</sup>-n<sup>3</sup>s(u<sup>4</sup>s). Fr., *alectorien*. From *ἀλεκτωρ*, a cock. Of or pertaining to a cock. As a n. (*lapis* understood), the same as *alectoria* (1st def.). [B, 114.]

**ALECTOROCOTONUM** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to-ro<sup>2</sup>k/to<sup>2</sup>-nu<sup>3</sup>m(nu<sup>4</sup>m). From *ἀλεκτωρ*, a cock, and *κρόνος*, murder, from the poisonous effects of the juice upon fowls. Cf. Sp., *mata-gallinas*, the Mexican name for the indigenous species. A genus of euphorbiaceous plants established by de Schlechtendal, but referred by Baillon to the genus *Euphorbia*. [B, 46].—**A. cotinifolium**. See *EUPHORBIA cotinifolia*.—**A. petiolare**. See *EUPHORBIA petiolaris*.

**ALECTOROLITHOS** (Lat.), n. m. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to-ro<sup>2</sup>/i<sup>2</sup>-tho<sup>2</sup>s. From *ἀλεκτωρ*, a cock, and *λίθος*, a stone. *Alectoria* (1st def.). [A, 258.]

**ALECTOROLOPHOIDES** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/e<sup>2</sup>k-to<sup>2</sup>r-o<sup>2</sup>/i<sup>2</sup>-o<sup>2</sup>/e<sup>2</sup>/de<sup>2</sup>/de<sup>2</sup>s. Gen., *alectorolophoid/eos*. From *ἀλεκτορόλοφος*, a cock's comb, and *είδος*, likeness. A genus of *Fungi*. [B, 1].—**A. costis rectis**, *A. sulcis crispis* [Batarrja]. *Cantharellus cibarius*. [B, 173.]

**ALECTOROLOPHUS** (Lat.), adj. and n. f. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-to<sup>2</sup>r-o<sup>2</sup>/i<sup>2</sup>-o<sup>2</sup>/e<sup>2</sup>-u<sup>3</sup>s(u<sup>4</sup>s). Gr., *ἀλεκτορόλοφος*. Fr., *alectorolophe*. Ger., *Hahnenkamm*. Sp., *alectorolofia* (n.), *alectorolofa* (adj.). 1. A plant mentioned by Pliny; probably *Rhinanthus crista galli*. 2. A name given by Hallier to a section of the genus *Rhinanthus*, regarded by him as forming a distinct genus. In this sense used as a masc. noun. 3. The crista galli of the ethmoid bone. 4. (Adj.) having a crest or comb like a cock. [A, 316; B, 48, 78, 114, 115].—**A. crista galli**, *A. glaber*, *A. hirsutus*. See *RHINANTHUS crista galli*.—**A. major**, *A. minor*. See *RHINANTHUS major* and *RHINANTHUS minor*.

**ALECTOROMANCY**, n. A<sup>2</sup>-le<sup>2</sup>k-to-ro<sup>2</sup>-ma<sup>2</sup>n-si<sup>2</sup>. From *ἀλεκτωρ*, a cock, and *μαντεία*, prophecy. Fr., *alectromancie*. Ger., *Alektoromancie*. Sp., *alectromancia*. See ALECTRYOMANCY.

**ALECTRIDÆ** (Lat.), n. n. pl. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-tri<sup>2</sup>-de(da<sup>3</sup>-e<sup>2</sup>). Gen., *alectrida/rum*. Fr., *alectrides*. A family of gallinaceous birds, according to Vieillot, comprising only a single genus, but, according to other classifications, comprising all *Gallinaceæ* which have wings suitable for flight. [A, 348; B, 38.]

**ALECTRIDES** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-tri<sup>2</sup>-de(da<sup>3</sup>-e<sup>2</sup>). Gen., *alectrid/eos* (-eis). The crista galli of the ethmoid bone. [A, 316.]

**ALECTROPODION** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k'-tro<sup>2</sup>-po<sup>2</sup>/di<sup>2</sup>-o<sup>2</sup>n. From *ἀλεκτωρ*, a cock, and *πόδιον*, dim. of *πούς*, a foot. See *RANUNCULUS*.

**ALECTRUROUS**, adj. A<sup>2</sup>-le<sup>2</sup>k-tru<sup>2</sup>/ru<sup>3</sup>s. From *ἀλεκτωρ*, a cock, and *οὐρά*, a tail. Lat., *alectrurus*. Fr., *alectrure*. Having the tail-feathers arranged like those of a cock. [A, 346; B, 38.]

**ALECTRYDES** (Fr.), n. pl. A<sup>3</sup>-le<sup>2</sup>k-tred. See ALECTRIDES.

**ALECTRYOMANCY**, n. A<sup>2</sup>-le<sup>2</sup>k-tri<sup>2</sup>-o<sup>2</sup>-ma<sup>2</sup>n-si<sup>2</sup>. From *ἀλεκτωρ*, a cock, and *μαντεία*, divination. Lat., *alectromantia*. Fr., *alectromancie*. Ger., *Alektromantie*. Sp., *alectromancia*. A species of divination by means of cocks; usually practised by strewing grain over an area divided into squares, to each of which a specific significance was attached, and drawing the omen from the square chosen by the cock. [B, 78, 93.]

**ALECTRYON** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/le<sup>2</sup>k-tri<sup>2</sup>(tru<sup>2</sup>)-o<sup>2</sup>n. Sp., *alectrion*, *alectrio*. A genus of *Sapindaceæ*, established by Gärtner, bearing polygamous apetalous flowers, with from 5 to 8 stamens, and a trimerous ovary, 2 cells of which are non-fertile. [B, 38, 46].—**A. excelsum** [Gärtner]. A species of A. growing in New Zealand, bearing an acid edible fruit. [B, 46.]

**ALECY**, n. A<sup>2</sup>-le<sup>2</sup>-si<sup>2</sup>. For deriv., see ALE. Intoxication or mental disorder from drinking ale. [Lilly, 1598 (B, 39).]

**ALE-GAR**, n. Al/ga<sup>3</sup>-r. From *ale*, and *eager* (Fr., *aigre*), sour. Also written *allegar* and *allicar*. Vinegar made from ale. [B, 59, 116.]

**ALE-HOOF**, n. Al/hu<sup>4</sup>-f. From *ale*, and A-S., *heafð*, *heafod*, the head. The ground-ivy (*Nepeta glechoma*), used for flavoring ale. [B, 19, 39.]

**ALEIMMA** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/lim<sup>2</sup>(la<sup>2</sup>/im<sup>2</sup>)-ma<sup>3</sup>. Gen., *aleim/matos* (-tis). Gr., *ἀλειμμα*. An ointment. [B, 48.]

**ALEION** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>)/li<sup>2</sup>(a<sup>2</sup>/i<sup>2</sup>)o<sup>2</sup>n. From *ἀλής*, or *ἀλγής*, collected together. A variety of water, probably rain-water; "significans conferto imbre collectam aquam." [B, 111.]

**ALEIPHA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/li<sup>2</sup>(a<sup>2</sup>/i<sup>2</sup>)-fa<sup>3</sup>. Gr., *ἄλειφα*, *ἄλειφω*. A medicated oil or ointment, especially one made with vegetable juices. [B, 59, 111.]

**ALEIPSIS** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>)/li<sup>2</sup>(a<sup>2</sup>/i<sup>2</sup>)-psi<sup>2</sup>s. Gen., *aleip/seos*. Gr., *ἄλειψις*. Lit., an anointing. See *STEATOSIS*.—**A. aucta** [G, 33]. See *HYPERSTEATOSIS*.—**A. diminuta** [G, 33]. See *ASTEATOSIS*.

**ALEIPTERIUM** (Lat.), n. n.  $A^2(a^3) \cdot i(a^2) \cdot pte(pta) \cdot ri^2 \cdot u^3 \cdot m$  ( $u^4 m$ ). Gr., ἀλειπτήριον. The anointing-room of the ancients, used also as a sudatorium. [A, 311.]

**ALEIPTRON** (Lat.), n. n.  $A^2(a^3) \cdot i(a^2) \cdot pto^2 n$ . Gr., ἀλειπτρον (= ἐξάλειπτρον). An ointment-box. [A, 311.]

**ALEIS**, n.  $A^2/i^2s$ . An obsolete form of *aloes* (q. v.). [L, 73.]

**ALEISON** (Lat.), n. n.  $A^2(a^3) \cdot i(a^2) \cdot so^2 n$ . Gr., ἀλεισον. An old term for the acetabulum. [B, 115.]

**ALEKTRYOMANTIE** (Ger.), n.  $A^3 \cdot e^2 k \cdot tru^6 \cdot o \cdot ma^3 n \cdot te'$ . See ALEKTRYOMANCY.

**ALELAION** (Lat.), n. n.  $A^2(a^3) \cdot e^2 \cdot a' \cdot (a^3/i^2) \cdot o^2 n$ . See HALELEON.

**ALEMA** (Lat.), n. n.  $A^2(a^3) \cdot e(a) \cdot ma^3$ . Gen., *alem'atos (-tis)*. Gr., ἀλημα. Flour. [B, 111.]

**ALEMBIC**, n.  $A^2 \cdot e^2 m' \cdot bi^2 k$ . Ar., *al-āmbiq* (from *al*, the, and *āmbiq*, a cup). Lat., *alembicus*, *alembicum*. Fr., *alambic*. Ger., *Alembik*. It., *alambicco*, *lambico*. Sp., *alambique*. An old form of apparatus for distillation; consisting of a flask-shaped vessel, the body, to which was adapted a head (considered by some to be the a. proper), of conical shape, with its external circumference, or base, placed lower than the neck, so that the vapors that rose, and condensed against the sides, ran down into the circular channel formed by its depressed part, whence they passed through the nose, or beak, into the receiver. [B, 2, 52; L, 70, 104.]

**ALEMBIC, ALEMBICATE**, v's tr.  $A^2 \cdot e^2 m' \cdot bi^2 k$ ,  $a^2 \cdot e^2 m' \cdot bi^2 k \cdot at$ . To distill in an alembic. [B, 39.]

**ALEMBICUS** (Lat.), n. m.  $A^2(a^3) \cdot e^2 m' \cdot bi^2 k \cdot u^3 s \cdot u^4 s$ . An alembic.—**A. cæcus**. One without a beak. [L, 51.]—**A. rostratus**. One with a beak. [L, 104.]

**ALEMBROTH** (Chald.), n. Lat., *sal alembroth*. Fr., *alembroth*. Ger., *Alembrothsatz*. It., *sale d'alembrot*. Sp., *sal de la sabiduria*. Syn.: *salt of wisdom*. *sal ellebrat* (seu *Taberi*), *alkitron*. An alchemical term for a poisonous compound of sal ammoniac and corrosive sublimate (chlorides of ammonium and mercury), supposed to have the property of dissolving bodies and separating metals from their ores. [B, 7; L, 73.] A one-per-cent. solution has lately been used by Sir J. Lister in the preparation of antiseptic dressings for wounds. [E. E. King, "Canadian Practitioner," May, 1896, p. 130.]—**A. desiccatum** (Lat.). Normal carbonate of potassium. [B, 50.]—**Sel a. insoluble** (Fr.). See HYDRARGYRUM ammoniacum.—**Sel a. soluble** (Fr.). Equal parts of corrosive sublimate and sal ammoniac. [B, 97; L, 44.]

**ALEMZADAD, ALEMZADAR, ALEMZADAT**, n's. Alchemical names for sal ammoniac. [B, 50; L, 104.]

**ALÉNÉ** (Fr.), adj.  $A^3 \cdot la \cdot na$ . See SUBULATE.

**ALÉNÉS** (Fr.), n.  $A^3 \cdot le^2 n$ . The corn-cockle (*Agrostemma githago*). [B, 173.]

**ALÉNOIS** (Fr.), adj.  $A^3 \cdot lan \cdot wa^3$ . A corruption of *orlenois* [L, 42]. See CRESSON a.

**ALENON** (Lat.), n. n.  $A^2(a^3) \cdot e(a) \cdot no^2 n$ . Gr., ἄλνον. Almond-oil. [Aetius (L, 53).]

**ALEORE** (Lat.), n. f.  $A^2(a^3) \cdot e^2 \cdot o're(ra)$ . Gr., ἄλεωρη. A means of protection against or relief from disease. [Hippocrates (L, 53).]

**ALEPHANGINUS** (Lat.), adj.  $A^2(a^3) \cdot e^2 \cdot fa^2 n(fa^3 n) \cdot ji(ge) \cdot nu^3 s(nu^4 s)$ . See ALOEPHANGINUS.

**ALEPIDOTE**, adj.  $A^2 \cdot e^2 p'i^2 d \cdot ot$ . Gr., ἀλεπίδωτος. Lat., *alepidotus*. Fr., *alepidote*. Ger., *ungeschuppt*. Without scales (said of fishes). [L, 116.]

**ALEPPO BOIL, ALEPPO BUTTON, ALEPPO EVIL**, n's. See under BOIL.

**ALEPTIQUE** (Fr.), adj.  $A^3 \cdot le^2 p \cdot tek$ . See ALIPTIC.

**ALES** (Lat.), adj.  $A(a^3) \cdot lez(le^2 s)$ . Gr., ἄλῆς, ἄλῆς. Crowded into a mass (said of fœces); contracted (said of the uterus). [Hippocrates (A, 325); L, 84.]

**ALES**, n. An alchemical name for a compound salt. [Ruland, Johnson (L, 53).]—**A. erudum** (Lat.). "Those drops which often fall in the night in June." [L, 84.]

**ALESCH** (Ar.), n. See ALUMEN plumosum.

**ALÈSE** (Fr.), n. See ALÈZE.

**ALET** (Ar.), n. An old name for salt. [A, 325.]

**ALET** (Fr.), n.  $A^3 \cdot la$ . A town in the department of Aude, in France, at the base of the Eastern Pyrenees, having springs the waters of which, of various temperatures, contain iron, calcium, a little arsenic, carbonic acid, and (according to some authorities) phosphorus. They are used in chlorosis, anæmia, and dyspepsia. [A, 319; B, 93.]

**ALETRIDEÆ** (Lat.), n. f. pl.  $A^2(a^3) \cdot e^2 t \cdot ri^2 d' \cdot e^2 \cdot e(a^3 \cdot e^2)$ . Fr., *alétrides*. A tribe of hæmodoraceæ plants established by Ledebour. [B, 170.]

**ALETRINEÆ** (Lat.), n. f. pl.  $A^2(a^3) \cdot e^2 t \cdot ri^2 n' \cdot e^2 \cdot e(a^3 \cdot e^2)$ . Fr., *alétrinées*. A section of the *Dracnææ*, established by Reichenbach, including *Aletris* and other genera. [B, 170.]

**ALETRIS** (Lat.), n. f.  $A^2(a^3) \cdot e^2 t \cdot ri^2 s$ . Gen., *aletridos (-dis)*. From ἀλερίς, one of the noble maidens who prepared the meal for the offering-cakes (because the flowers of *A. farinosa* have a mealy appearance). [A, 311; B.] Fr., *alétris*. Ger., *Aletris*. It., *aletri*. A genus of hæmodoraceæ herbs established by Linnaeus, distinguished by the arrangement of the flowers in racemes and by the rugous appearance of the perianth. [B, 34.]—**A. alba** (Michaux). See *A. farinosa*.—**A. aurea**. A species having like properties with *A. farinosa*. [L, 63.]—**A. capensis** [Linnaeus]. Fr., *alétris du cap*. Syn.: *Vettheimia capensis* (Redouté) (seu *viridifolia* [Willdenow]). A species which furnishes a sweet syrupy liquid that exudes from

the glands of the receptacle and is used as an article of food. [B, 173.]—**A. farinosa** [Linnaeus]. Fr., *alétris farineux*. Ger., *mehlige A.* Star-grass, colic-root, aloeroot, bitter grass, black root, unicorn-root, ague-root, ague-grass, devil's-bit, starwort, mealy starwort, blazing star; a species growing throughout the United States, having a scape from 20 to 30 inches high, with oblong-tubular white flowers disposed on pedicels in a thin raceme. [B, 34.] Its rhizome, which is used in medicine, is dark-brown externally, white within, and  $1\frac{1}{2}$  to  $\frac{1}{2}$  inch thick. It contains starch, also a bitter principle which is tonic in small doses and emetocathartic in large doses. It is used as a tonic and stomachic, also in diseases of the chest and of the uterus. [B, 5, 33, 93; "Lancet," July 4, 1885, p. 36 (B); L, 45, 61, 65.]—**A. zeylanica** [Miller]. See SANSEVIERIA zeylanica.

—**Mehlige A.** (Ger.). See *A. farinosa*.

ALETRIS FARINOSA. (AFTER BIGELOW.)

**ALÉTRIS** (Fr.), n.  $A^3 \cdot la \cdot tre$ . See ALETRIS.—**A. du cap**. See ALETRIS capensis.—**A. farineux**. See ALETRIS farinosa.

**ALETUDO** (Lat.), n. f.  $A^2(a^3) \cdot e^2 t \cdot u^2 \cdot (u) \cdot do$ . Gen., *aletu'dinis*. Corpulence. [L, 48.]

**ALEURINEI** (Lat.), n. m. pl.  $A^2(a^3) \cdot u^2 \cdot ri^2 n' \cdot e^2 \cdot i(e)$ . A subdivision of the *Trichospori*, established by Léveillé, including the tribes *Isariei*, *Scoriadii*, *Periconi*, *Sporotrichei*, and *Menispori*. [B, 170.]

**ALEURITES, ALEURITIS** [Link] (Lat.), n. f.  $A^2(a^3) \cdot u^2 \cdot ri(ri) \cdot tez(te^2 s)$ ,  $ti^2 s$ . From ἀλευρίς, made of flour (from the white dusty substance on the plant). Gen., *aleuritidis*. Fr., *aleurites*, *aleurit*. Ger., *Gummilacbaum*, *Mehlbaum*. Syn.: *Ambinuz* [Cornelini], *Telopea* [Solander], *Camirum* [Rumphius], *Carda* [Noronha]. A genus of euphorbiaceous plants, of the tribe *Jatrophae*, established by Forster. [B, 19, 93, 170; L, 63, 64.]—**A. aubinox**. See *A. moluccana*.—**A. bancoulier** (Fr.). See *A. moluccana*.—**A. cordata** (Müller). Fr., *abrasin*, *arbre à l'huile* (ou à vernis). Ger., *Tungbaum*. Syn.: *Dryandra cordata* [Thunberg], *Elaeococca cordata*. The tung-tree, indigenous to China and Japan, where it is called *wu-lung*. It contains a fixed oil (candle-nut, kekune, or Bankul oil) which has been used both in the arts and in medicine. [B, 5, 49, 93.]—**A. Gomesii**. A Brazilian species, from the nut of which a purgative oil is obtained. [L, 77.]—**A. laccifera** [Willdenow]. Fr., *laquier*. Syn.: *Croton lacciferum* [Linnaeus]. An East Indian species furnishing lac. [B, 33.]—**A. moluccana** [Willdenow]. Fr., *a. bancoulier*. Syn.: *Croton moluccanum* [Linnaeus], *Camirum cordifolium* [Gärtner]. A species growing in the Moluccas and in Java, where it is called *camiri*. Its fruit (Fr., *noix de Bancoul*, *noix des Moluques*) contains an oil which is used in the arts, and the nut itself is employed as a purgative and aphrodisiac. [B, 93.]—**A. triloba** [Willdenow]. The akhrot, candle-nut-tree, or candleberry-tree; a species found on the islands of the Indian and South Pacific oceans, growing to the height of 30 or 40 feet. It bears a two-celled fleshy fruit, each cell containing one seed, resembling a small walnut in shape. These seeds contain a fixed oil (called country walnut-oil, artists' oil, kukui oil, kekune oil, Spanish walnut-oil, and Belgaum walnut-oil) which is extensively used in the arts, and to which drastic properties have been erroneously attributed. The nut is called Tutui nut, Bancoul nut, and Belgaum (or Indian) walnut. [B, 19, 49; L, 61, 63, 67.]

**ALEUROMETER**, n.  $A^2 \cdot u^2 \cdot ro^2 m' \cdot e^2 t \cdot u^2 r$ . From ἀλευρον, flour, and μέτρον, a measure. Fr., *aleuromètre*. Ger., *Aleurometer*, *Brotsdrückmesser*. An apparatus for testing the suitability of flour for breadmaking, invented by Boland. It consists essentially of a hollow copper cylinder about 6 inches long and  $\frac{3}{4}$  inch in diameter inside, having two principal parts, one of which, about 2 inches long, is closed at the lower end, forming a kind of cup, in which the gluten is placed, and which is then screwed to the other part of the cylinder. The apparatus and its contents are then heated to from 350° to 380° F. in an oven or, preferably, in an oil-bath. From the expansion of the gluten, as measured by a graduated scale, its quality is determined—the more it swells the better is the flour, and it should give off no odor but that of hot and highly baked bread. [A, 377; B, 49; L, 52.]

**ALEURON** (Lat.), n. n.  $A^2(a^1)u^2ro^2n$ . Gr.,  $\acute{\alpha}\lambda\epsilon\upsilon\rho\omicron\nu$ . Wheat flour. [L, 53.]

**ALEURONE**, n.  $A^2u^2ron'$ . From  $\acute{\alpha}\lambda\epsilon\upsilon\rho\omicron\nu$ , wheat flour. Fr., *aleurone*. Ger., *Aleuron*, *Klebermehl*. It., Sp., *aleurona*. An albuminoid substance occurring in the form of small round grains in the seeds of plants toward the end of the period of ripening. It is soluble in water and in a dilute watery solution of caustic potash, but insoluble in alcohol, in ether, and in chloroform. During the germination of the seed the grains become dissolved. [B, 75.]

**ALEURONIC**, adj.  $A^2u^2ro^2n'i^2k$ . Pertaining to aleurone. [B, 39.]

**ALEURONKÖRPER** (Ger.), n.  $A^3oi^2ron'ku^2rp-e^2r$ . An aleurone grain. [B, 49.]

**ALEUROTESIS** (Lat.), n. f.  $A^2(a^1)u^2ro^2te(ta)'si^2s$ . Gen., *aleurote'seos*. Gr.,  $\acute{\alpha}\lambda\epsilon\upsilon\rho\omicron\tau\eta\sigma\iota\varsigma$ . 1. A flour-sieve. 2. Sifted flour. [A, 311.]

**ALEX** (Lat.), n. f.  $A(a^3)le^2x$ . Written also *halex*, *alec*, *allec*, and *hallec*. Gen., *ale'cis*. An ancient fish-sauce, pickle, or brine, or the sediment of the same; said to have been used by the Romans as a vulnerary. [A, 312; Waring (L, 63).]

**ALEXANDERS**, n.  $A^2e^2x-a^2n'du^2r$ . A corruption of the species-name of either *Petroselinum alexandrinum* or *Smyrniolum olusatrum*. The common name of the genus *Smyrniolum* (q. v.). [B, 31, 39; L, 73.]

**ALEXANDERSBAD** (Ger.), n.  $A^2e^2x-a^2nd'e^2rz-ba^2d$ . 1. A watering-place in Bavarian Oberfranken, having effervescent springs containing calcium and bicarbonates, and a water-cure establishment. [A, 319; B, 93.] 2. A warm mineral spring in Circassia. [B, 93.]

**ALEXANDER'S-FOOT**, n. See *ANACYCLUS pyrethrum*.

**ALEXANDERSQUELLE** (Ger.), n.  $A^3e^2x-a^2nd'e^2rz-kwe^2l-le^2$ . See *ALEXANDERSBAD* (2d def.).

**ALEXANDRE** (Fr.), n.  $A^3e^2x-a^2ndr$ . One of the springs at Vals (q. v.), said to contain 90 grains of sodium bicarbonate to the quart.

**ALEXANDREÆ** (Lat.), n. f. pl.  $A^2(a^1)e^2x-a^2nd(a^2nd)'re^2e-(a^3-e^2)$ . A sub-tribe of the *Suaedææ*, established by Fenzl; named from *Alexandra*, one of the genera. [B, 170.]

**ALEXANDRIA** (Lat.), n. f.  $A^2(a^1)e^2x-a^2nd(a^2nd)'ri^2a^2$ . See *PRUNUS lauro-cerasus*.

**ALEXANDRINE**, n.  $A^2e^2x-a^2nd'ren$ . See *EMPLASTRUM alexandrinum viride*.

**ALEXANDRINENBAD, ALEXANDRINENQUELLE** (Ger.), n's.  $A^3e^2x-a^2nd're^2ne^2n-ba^2d$ , - $kwe^2l-le^2$ . A feebly alkaline spring at Marienbad (q. v.). [L, 57.]

**ALEXANDRINUM** (Lat.), n. n.  $A^2(a^1)e^2x-a^2nd(a^2nd)'ri(re)'nu^2m(nu^2m)$ . See *EMPLASTRUM alexandrinum viride*.

**ALEXANTHI**, n. An alchemical name for *flos æris* (q. v., under *ÆS*). [B, 50.]

**ALEXÈTÈRE** (Fr.), n.  $A^3e^2x-a-te^2r$ . See *ALEXETERIUM*.—**A. acétique**. The fumes arising from the action of acetic acid on crystals of potassium sulphate. [L, 87].—**A. ammoniacal**. Ammonium carbonate. [L, 85].—**A. chlorique**. See *ALEXETERIUM chloricum*.—**A. désinfectant nitro-muriatique**. See *FUMIGATION de Gaubius*.—**A. nitrique**. See *Species pro vaporibus ACIDI NITRICI*.

**ALEXETERIA** (Lat.), n. n., pl. of *alexeterium* (q. v.).

**ALEXETERIAL, ALEXETERIAN, ALEXETERIC, ALEXETERICAL**, adj's.  $A^2e^2x-e^2t'e^2ri^2a^2l$ , - $a^2n$ , - $te^2r'i^2k$ , - $i^2k$ . Lat., *alexeterius*. Fr., *alexétère*. Ger., *alexeterisch*. It., *alexeterico*. Sp., *alexitéreo*. Having the properties of an alexeterium (q. v.). [B, 39; L, 98, 116.]

**ALEXETERIUM** (Lat.), n. n.  $A^2(a^1)e^2x-e^2t'e(a)'ri^2u^2m(u^2m)$ . From  $\acute{\alpha}\lambda\epsilon\upsilon\tau\epsilon\rho\iota\sigma\iota\varsigma$ , protective, having the effect of a charm. Fr., *alexétère*. Ger., *Hülfsmittel, Rettungsmittel*. It., *alexeterio*. Sp., *alexitéreo*. An external protective measure, especially against infection or poison, as distinguished from an *alexipharmac*, which was used internally. Hippocrates used the word in the pl., *alexeteria*, to denote remedies in general, but later writers applied it particularly to remedies against the poisonous bites of animals. [B, 39; L, 44, 84].—**A. chloricum**. Fr., *alexétère chlorique*. See *SUFFUMIGATION guptoniana*.—**A. nitricum**. Fr., *alexétère nitrique*. See *Species pro vaporibus ACIDI NITRICI*.

**ALEXETERY**, n.  $A^2e^2x-e^2t-e^2ri^2$ . See *ALEXETERIUM*.

**ALEXÈTHÈRE** (Fr.), n. See *ALEXÈTÈRE*.

**ALEXIA** (Lat.), n. f.  $A^2(a^1)e^2x'i^2a^2$ . From *a priv.*, and  $\acute{\alpha}\lambda\epsilon\upsilon\omega$ , to speak. Fr., *alexie*. Ger., *Alexie*. A form of aphasia manifested by a defective understanding of written signs as shown by inability to read aloud correctly. [L. Lichtheim, "Brain," Jan., 1885, p. 433.]

**ALEXICACON, ALEXICACUM** (Lat.), n's n.  $A^2(a^1)e^2x-i^2k'a^2k(a^2k)-o^2n$ , - $u^2m(u^2m)$ . From  $\acute{\alpha}\lambda\epsilon\upsilon\kappa\alpha\iota\omicron\varsigma$ , protective. 1. An antidote, especially against poisons and infectious diseases. 2. An arrulet against poison. [A, 305; L, 51, 104.]

**ALEXIPHAIUMAC**, adj. and n.  $A^2e^2x-i^2fa^2rm'a^2k$ . Gr.,  $\acute{\alpha}\lambda\epsilon\upsilon\phi\acute{\alpha}\rho\mu\alpha\kappa\omicron\varsigma$ . Lat., *alexipharmacus* (adj.), *alexipharmacum*, *alexipharmacum* (n's). Fr., *alexipharmaque*. Ger., *Alexipharmakon* (n.). It., *alexipharmaco*. Sp., *alexipharmaco*. Acting as a prophylactic or as an antidote (said of internal remedies); as a n., a drug capable of so acting. [B, 39; L, 50, 51, 53.]

**ALEXIPHARMACAL, ALEXIPHARMACEUTIC, ALEXIPHARMATICAL, ALEXIPHARMIC, ALEXIPHARMICAL**, adj's.  $A^2e^2x-i^2fa^2rm'a^2k-a^2l$ , - $fa^2rm-a^2su^2t$   $i^2k'a^2k$ , - $a^2t'i^2k-a^2l$ , - $fa^2rm'i^2k$ , - $fa^2rm'i^2k-a^2l$ . See *ALEXIPHARMAC*.

**ALEXPYRECTION, ALEXPYRETICUM, ALEXPYRETICUS** (Lat.), n's n. and adj.  $A^2(a^1)e^2x-i^2pi(pu^2)-re^2k'$ , - $i^2k-o^2n$ , - $u^2m(u^2m)$ , - $u^2s(u^2s)$ . Preferable forms of *alexipyreticon*, etc. [L, 50.] See *ALEXPYRETIC*.

**ALEXPYRETIC**, adj. and n.  $A^2e^2x-i^2pi-re^2t'i^2k$ . From  $\acute{\alpha}\lambda\epsilon\upsilon\omega$ , to ward off, and  $\pi\upsilon\pi\epsilon\kappa\tau\iota\kappa\omicron\varsigma$ , feverish. Lat., *alexipyreticus* (adj.), *alexipyreticon*, *alexipyreticum* (n's). Fr., *alexipyrétique*. Ger., *alexipyretisch*, *feberwidrig* (adj's), *Alexipyretikon* (n.). It., *alexipiretico*. Sp., *alexipirético*. Preventive or curative of fever; as a n., a febrifuge. [B, 39; L, 50.]

**ALEXPYRETOS, ALEXPYRETUM** (Lat.), adj. and n.  $A^2(a^1)e^2x-i^2pi(pu^2)-re^2t-o^2s$ , - $u^2m(u^2m)$ . See *ALEXPYRETIC*.

**ALEXIR**, n. 1. An alchemical medicine. [B, 50.] 2. An elixir. [L, 93, 116.]

**ALEXISBAD** (Ger.), n.  $A^3e^2x'i^2s-ba^2d$ . A village in the duchy of Anhalt, in the Lower Harz region, having two ferruginous springs, the Alexisbrunnen and the Selkebrunnen (q. v.). [A, 319.] The waters contain sodium, calcium, magnesium, and iron sulphates and iron chloride, and are used in gastro-intestinal affections. [B, 93.]

**ALEXISBRUNNEN** (Ger.), n.  $A^3e^2x'i^2s-brun-ne^2n$ . One of the springs at Alexisbad, containing bicarbonate of iron and a small amount of free carbonic acid. [A, 319.]

**ALEXITERIUM** (Lat.), n. n.  $A^2(a^1)e^2x-i^2t'e(a)'ri^2u^2m(u^2m)$ . See *ALEXETERIUM*.

**ALEZARAM**, n. An alchemical term for the washing of lead. [L, 53, 116.]

**ALÈZE** (Fr.), n.  $A^3e^2z$ . From *à l'aise*, because it makes the patient comfortable. Ger., *Untertuch*. It., *alezo*, *giunta*. Sp., *alezo*, *hijuela*. A folded sheet of cotton, linen, or waterproof material, used to restrain a violent patient, to steady an injured limb, or to make counter-extension; also a draw-sheet (q. v.). [L, 49.]

**ALFACTA**, n. An alchemical term for distillation. [B, 50.]

**ALFADIDAM**, n. An alchemical name for the dross of various metals. [L, 53.]

**ALFALFA** (Sp.), n.  $A^3fa^3l'fa^3$ . From Ar., *alfac*, *façah*. The plant *lucerne* (*Medicago sativa*). [B, 39.]

**ALFAR** (Ar.), n. See *ADRARAGI*.

**ALFASARD** (Ar.), n. See *ALFESERA*.

**ALFATIDA** (Ar.), n. See *ALFADIDAM*.

**ALFATIDE** (Ar.), n. Sal ammoniac. [B, 50.]

**ALFÉNIDE** (Fr.), n.  $A^3l-fa^3ned$ . A white alloy of 50 parts of copper, 30 of zinc, 10 of nickel, and 1 part of iron. [L, 41.]

**ALFESERA**, n. The name of an old confection of the root of *Vitis alba*, used in spasmodic nervous affections. [Mesuen (L, 53).]

**ALFIANO** (It.), n.  $A^3l-fa^3no$ . A village in Italy, in the province of Casale, having sulphurous springs the water of which is diuretic and purgative. [A, 375.]

**ALFIDAS, ALFIDES** (Ar.), n's. Subcarbonate of lead. [L, 84, 104.]

**ALFILERILLA** (Sp.), n.  $A^3l-fe^3la-rel'ya^3$ . A Californian name for the *Erodium cicutarium*. [L, 67.]

**ALFOL, ALFOL**, n's. Alchemical names for sal ammoniac. [B, 50; L, 53.]

**ALFOMBRIILLA** (Sp.), n.  $A^3l-fom-brel'ya^3$ . Scarlet fever. [L, 70].—**A. silvestre** [Mex. Ph.]. See *VERBENA ciliata*.

**ALFONSIA** (Lat.), n. f.  $A^2(a^1)fo^2n'si^2a^2$ . Fr., *alfonsie*. A genus of palms (properly belonging to *Elais*) established by Humboldt and Bonpland. [L, 30, 87].—**A. oleifera** [Kunth]. Syn.: *Elais melanococca* [Martius]. A South American species bearing an edible fruit. An illuminating oil is obtained from the nut. [B, 173.]

**ALFÓNSIGO** (Sp.), n.  $A^3l-fo^2n'si^2go$ . The pistachio-tree. [B.] See *PRISTACIA vera*.

**ALFONSIN, ALPONTIN** (Fr.), n's.  $A^3l-fo^2n'sa^2n^2$ , - $ta^2n^2$ . It., *alfonsino*. An old instrument for extracting bullets from gunshot wounds, invented by Alfonso Ferri, a surgeon of the sixteenth century. [A, 314; L, 103, 109.]

**ALFRANKEN, ALFSRÄNKE** (Ger.), n's.  $A^3lf'ra^3n^2-ke^2n$ ,  $a^3lfs'ra^3n^2-ke^2$ . See *SOLANUM dulcamara*.

**ALTERBRUNNEN** (Ger.), n.  $A^3lf'te^2r-brun-ne^2n$ . A mineral spring at Roisdorf, in Prussia, on the railway between Cologne and Rolandseck. [A, 305, 375.]

**ALFUSA**, n. An alchemical name for tutty. [L, 53.]

**ALGA** (Lat.), n. f.  $A^2(a^1)l'ga^3$ . Fr., *algue*. Ger., *Alge*, *Meergras*. It., Sp., *alga*. 1. A sea-weed (the singular of *algæ* [q. v.]). 2. A genus of marine naidaceous plants established by Lamarck, now referred to *Zostera*. [B.]—**A. coralloides** [Rumphius]. The *Gracilaria lichenoides*. [B.]—**A. marina**. 1. The *Chondrus crispus*. [L, 78.] 2. Of Lamarck, the *Zostera marina*. [B, 173.]—**A. of the month**. See *LEPTOTHRIX buccalis*.—**A. zeylanica**. The *Gracilaria lichenoides*. [B.]

**ALGACEÆ** (Lat.), n. f. pl.  $A^2(a^1)l-ga^3/se^2(ke^2)-e(a^3-e^2)$ . Fr., *algacées*. A class of plants established by Gleditsch, corresponding in part to *Algae*, together with *Lichenes* and *Hepaticæ*, including the genera *Riccia*, *Nemella*, *Lichen*, *Fucus*, *Ulva*, *Conferva*, and *Spongia*. [B, 170.]

**ALGACEOUS**, adj.  $A^2l-ga^3shu^3s$ . Lat., *algaceus*. Fr., *algacé*. Sp., *algáceo*. Having the characteristics of *Algae* or of the *Algacææ*. [L, 46.]

**ALGACITES** (Lat.), n. f. pl.  $A^2(a^1)l-ga^3-si(ke)'tez(te)s$ . Fr., *algacites*. Ger., *Algaciten*. An order of fossil plants, established by

Sternberg, corresponding to the extant *Algæ*, including the suborders *Conferoidites*, *Ulvoidites*, *Floridoites*, and *Fucoidites*. [B, 170.]

**ALGÆ** (Lat.), n. f. pl.  $A^2(a^3)je(ga^3-e^2)$ . Fr., *algues*. Ger., *Algen*, *Tange*. It., *alghe*. Sp., *algas*. Syn.: *hydrophytes*, *Hydrophyta* [Lynghye]. In Linnæus's system, an order of the class *Cryptogamia*, comprising at first genera now ranked among the *A.*, *Lichenes*, and *Hepaticæ*. In Jussieu's classification, the *A.* embraced the true *A. (A. aquaticæ)* and the *Lichenes (A. terrestres)*. In the modern systems, the sea-weeds, a great division of cryptogams, comprising those plants of this section in which there is no differentiation into axis, root, and appendages (thallogens), but which are provided with chlorophyll and with distinct organs of reproduction, being thus distinguished from the *Protophyta* on the one hand and from the *Fungi* on the other. By many, the *A.* and the chlorophyllaceous *Protophyta* are grouped together (*vide infra*), and some include both *A.* and *Fungi* under one section as *Thallophyta (q. v.)*. By others, again, the division is entirely abandoned, and members formerly included in this class are now grouped with the allied *Fungi* under quite distinct divisions of the vegetable kingdom. See *CARPOSPORÆ*, *OOSPORÆ*, *PROTOPHYTA*, and *ZYGOSPORÆ*. The *A.* have been variously subdivided. The two main systems of classification at present in vogue are based respectively on the mode of reproduction and on the color of the spores. According to the former, the *A.* like the *Fungi* are divided into *Zygosporæ*, *Oosporæ*, and *Carpusporæ (q. v.)*; according to the latter, into *Chlorospermæ*, *Melanospermæ*, and *Rhodospormæ* [Berkeley]. The following table shows the equivalence of these two systems:

<p><b>A. ZYGOSPORÆ.</b>  <i>Zoosporæ</i>. } (<i>Diatomaceæ</i>)  <i>Conjugatæ</i>. }  <b>B. OOSPORÆ.</b>  <i>Volvocinæ</i> (now often assigned to the animal kingdom).  <i>Vaucheriaceæ (Cœloblasteæ)</i>.  <i>Edogoniaceæ (Confervaceæ, Ulvaceæ)</i>.  <i>Characeæ</i> (by some regarded as distinct from <i>A.</i>, by others classed with <i>Carpusporæ</i>).  <i>Fucoideæ (Fucaceæ)</i>. <b>MELANOSPERMÆ.</b>  <b>C. CARPOSPORÆ.</b>  <i>Florideæ (Ceramiceæ)</i>. <b>RHODOSPERMÆ.</b></p>	<p>CHLOROSPERMÆ (including also genera usually ranked among the protophytes).</p>
--	---

Thuret divides the *A.* into six orders: (1) *CRYPTOPHYCÆ*, comprising genera usually ranked among the protophytes; (2) *ZOOSPORÆ*, embracing all the *Zygosporæ* and *Carpusporæ* of the preceding table except a portion of the *Fucoideæ* made up of orders 3 and 4; (3) *DICTYOTÆ*; (4) *FUCACÆ*; (5) *TILOPOTRIDÆ* (a doubtful order); (6) *FLORIDEÆ*. For an older system of classification, see *ISOCARPÆ* and *HETEROCARPÆ*. [B, 19, 29, 35, 41, 62, 75.]—*A. aquaticæ*. *A.* in the ordinary sense. [B, 170.]—*A. figuratæ* [Hassall]. See *DESMIIDÆ*.—*A. filiformes* [Hassall]. A division including the families *Siphonæ*, *Thoreæ*, *Lemanæ*, *Callithamnæ*, *Characæ*, *Batrachospermæ*, *Chaetophoræ*, *Conjugatæ*, *Cystospermæ*, *Monocystæ*, *Hydrodictyonæ*, *Scytonemæ*, *Oscillatoricæ*, *Rivulariæ*, and *Nostochinæ*. [B, 170.]—*A. globuliferæ* [Hassall]. A division including the families *Ulvacæ*, *Palmellæ*, and *Protococceæ*. [B, 170.]—*A. infusorie* [Martius]. A family including the genera *Vaucheria* and *Oscillatoria*. [B, 170.]—*A. silicatæ* [Hassall]. See *DIATOMACÆ*.—*A. terrestres*. The lichens. [B, 170.]—*A. vegetantes* [Martius]. A family including the genera *Chara*, *Batrachospermum*, *Hydrodictyon*, *Conjugata*, *Conferva*, *Rivularia*, *Linckia*, and *Botrydium*. [B, 170.] Cf. *A. infusorie*.—**Dark-spored A.** See *MELANOSPERMÆ*.—**Green-spored A.** See *CHLOROSPERMÆ*.—**Olive-spored A.** See *MELANOSPERMÆ*.—**Rosy-spored A.** See *RHODOSPERMÆ*.

**ALGÆOLOGY**, n.  $A^2je-o^1j'o-j^2$ . See *ALGOLOGY*.

**ALGÆSTHESES** (Lat.), n. pl.  $A^2(a^3)je^2s(ga^3-e^2s)-the(th)a^3-sez(se^2s)$ . From *ἄλγος*, pain, and *αἴσθησις*, sensation. Painful diseases. [L, 50.]

**ALGAL**, adj.  $A^2/ga^2l$ . From *alga (q. v.)*. Belonging to the *Algæ*. [L, 56.] As a n., see *ALGALES*.

**ALGALÉE** (Fr.), n.  $A^2/ga^2-la$ . See *ALGALI*.

**ALGALES** (Lat.), n. pl.  $A^2(a^3)ga^2l(ga^3)-e^2z(e^2s)$ . From *alga*. In Lindley's classification of thallophytes, the algals; an alliance corresponding to the *Algæ* of other authors.

**ALGALI** (Ar.), n. From *أرغاليون*, an instrument for injecting water. Fr., *algalié*. Sp., It., *algalia*. 1. A catheter. 2. A sound. [A, 305; B, 93; L, 41, 42, 104.] 3. Nitre. [B, 50, 52.]

**ALGALIC**, **ALGALIE**, **ALGALY** (Ar.), n's. See *ALGALI* (1st and 2d def's).

**AL-GAM-BAY**, n. A Burmese name for a bitter root used as a tonic. [L, 63.]

**ALGAME**, n. Probably from Ar., *Al-jamāh*, union, or *al-jimāz*, the consummation of marriage. A mixture of gold and mercury. [B, 52.]

**ALGAMET** (Ar.), n. An alchemical name for carbon. [A, 305; L, 116.]

**ALGARAB** (Ar.), n. See *ÆGILOPS*.

**ALGARAH** (Ar.), n. See *ANCHILOPS*.

**ALGARAT**, **ALGAREL** (Ar.), n's. See *ALGAROTH*.

**ALGAROBIA** (Sp.), n.  $A^2/ga^2-ro-ba^2$ . 1. A Mexican name for *Prosopis juliflora* [De Candolle]. [B, 66.] 2. The fruit of the *Ceratonia siliqua*. [L, 67.]—South American *A.* The *Prosopis dulcis* and other species. [L, 67.]—*A. du Chili* (Fr.). The *Prosopis siliquastrum*. [L, 67.]

**ALGAROBIE** (Fr.), n.  $A^2/ga^2-ro-b$ . A name given in the Antilles to the pods of the *Prosopis juliflora*. [L.] See *ALGAROBIA*.

**ALGAROBIA** (Lat.), n. f.  $A^2(a^3)l-ga^2(ga^3)-ro^3-bi^2-a^3$ . Fr.,

*algarobie*. Sp., *algaroba*. Syn.: *Prosopis* [Kunth] (1st def.), *Algaroba* [G. Don] (1st def.). 1. A name given by Benthams to a genus of plants belonging to the natural order *Leguminosæ*, and the suborder *Mimosæ*, now referred to the genus *Prosopis*. [B, 93, 170.] 2. The resin extracted from the *Algarobia glandulosa*. [L, 55.]—*A. dulcis*. See *Prosopis dulcis*. [B, 170.]—*A. ferruginea*. A variety growing in India, the bark of which is used with jaggedy water in making an intoxicant. [L, 63.]—*A. glandulosa* [Torrey and Gray]. See *Prosopis glandulosa*.—*A. juliflora*, *A. juliflora*, *A. juliflora*. See *Prosopis juliflora*.—*A. leucophaea*. Used for the same purposes as *A. ferruginea*. [L, 63.]

**ALGAROBILIA** (Lat.), n. f.  $A^2(a^3)l-ga^2-ro-bi^2/i^2-a^3$ . See *ALGAROBILLA*.

**ALGAROBILLA** (Sp.), n.  $A^2/ga^2-ro-bel^2ya^3$ . The pod of the *Balsamocarpum brevifolium*, which contains a large amount of tannic and ellagic acids. [B, 5.]

**ALGAROTH**, **ALGAROTHUS**, **ALGAROTTO**. From the name of Algarotti, the discoverer. Fr., *Poudre angélique (ou de vie, ou émélique)*. Ger., *A'pulver*. It., *algarotti*. An alchemical name for the oxychloride of antimony.

**ALGAROVE** (Fr.), n.  $A^2/ga^2-ro-v$ . See *ALGAROBIA*.

**ALGAROVILLA** (It., Sp.), n.  $A^2/ga^2-ro-vi^2/la^3$ ,  $-vel^2ya^3$ . The seeds and husks of the fruit of the *Prosopis pallida*, containing tannin [L, 67], or of the *Juga marthæ*. [L, 56.]

**ALGARRÓBA** (Sp.), n.  $A^2/ga^2-ro-ba^2$ . Ar., *al-harrābah*. 1. The *Ceratonia siliqua* or its fruit. 2. An American *Mimosa*. [B, 39.]

**ALGARROBERA**, **ALGARROBO** (Sp.), n's.  $A^2/ga^2-ro-ba^2ra^3$ ,  $-ro^3bo$ . 1. The *Ceratonia siliqua*. 2. Chilian names for the *Balsamocarpum brevifolium*. 3. Panama names for the *Hymenaea courbaril*. [L, 67.]

**ALGASEF**, n. From Ar., *Al-asaf*, dirt. An eruption. [L, 63.]

**ALGEBRA**, n.  $A^2/j'e^2-bra^3$ . From Ar., *al-jabr*, the union of something broken. Sp., *álgebra*. 1. The surgical treatment of fractures. 2. Apparently the fracture itself. A term current in England in the sixteenth century. [B, 39.]

**ALGEDO**, **ALGEDON** (Lat.), n.  $A^2(a^3)l-je(ga^3)/do$ ,  $-do^2n$ . Gr., *ἀλγέδων*, a sense of pain. Fr., *algèdo*. It., *algedine*. A pain or swelling about the neck of the bladder, anus, or testicles following the sudden checking of a gonorrhœa; also the sudden cessation of a gonorrhœal discharge. [L, 41, 103, 109.]

**ALGEFACIENT**, adj.  $A^2/j'e^2-fa^3/she^2nt$ . From *algor*, cold, and *facere*, to make. Cooling. [L, 63.]

**ALGEMA**, **ALGEMATODES** (It.), n's n.  $A^2(a^3)l-je(ga^3)/ma^3$ ,  $-ma^3-to^2/dez(de^2s)$ . From *ἄλγμα*, pain. [Hippocrates (A, 311).] Pain or the disease which is the cause of the pain. [L, 51, 53.]

**ALGEN** (Ger.), n. pl.  $A^2/ge^2n$ . See *ALGÆ*.—**A'artig**. See *ALGOS*.—**A'öl**. Fucosol; an oily substance,  $C_{20}H_{32}O_{12}$ , closely resembling furfural, obtained by the distillation of *Algæ* with concentrated sulphuric acid. [L, 30.]—**A'pilze**. See *PHYCOMYCETES*.—**A'zucker**. See *PHYCITE*.

**ALGERIA**, n.  $Al-j'e^2ri-a^3$ . Fr., *Alger, algérie*. A province and town in Africa, on the Mediterranean, much frequented by invalids. During twenty-two years the maximum temperature was 40° C., the minimum 2°, and the average 19.17°; the mean height of the barometer 762 mm., the maximum 766, and the minimum 755. [L, 49.]

**ALGERIÆ** (Ar.), n. Fr., *algérie*. See *ALGERIT*.

**ALGÉRINE** (Fr.), n.  $A^2l-zha-ren$ . A drink having the qualities of beer and aerated lemonade. [L, 109.]

**ALGERIT**, n. From Ar., *al-jigar*, quicklime. Also written *gir*. An alchemical name for quicklime. [B, 52.]

**ALGEROT** (Fr.), n.  $A^2l-zha-ro$ . See *ALGAROTH*.

**ALGEROTH**, n. See *ALGAROTH*.

**ALGESIA** (Lat.), n. f.  $A^2(a^3)l-je(ga^3)/si^2(a^3)-a^3$ . From *ἀλγος*, a sense of pain. Fr., *algésie*. Ger., *Algesie*. Hyperæsthesia, pain. [L, 50, 54.]

**ALGESICHRONOMETER**, n.  $A^2/j'e^2-zi^2-kro^2n-o^2m^2/e^2t-u^2r$ . From *ἀλγος*, pain, *χρόνος*, time, and *μέτρον*, a measure. An instrument invented by Björnström for determining the time required for the response of the nervous system to a painful impression. [L, 57.]

**ALGESIMETER**, n.  $A^2/j'e^2-zim^2/e^2t-u^2r$ . From *ἀλγος*, pain, and *μέτρον*, a measure. An instrument invented by Björnström to determine the sensibility of the skin. [L, 57.]

**ALGESIS** (Lat.), n. f.  $A^2(a^3)l-je(ga^3)/si^2s$ . Gen., *alge^2seos*. See *ALGESIA*.

**ALGETIC**, adj.  $Al-je^2t^2ik$ . Lat., *algeticus*. Ger., *algetisch*. Painful. [L, 45, 50.]

**ALGIA** (Lat.), n. f.  $A^2(a^3)l-ji^2(gi^2)-a^2$ . From *ἄλγος*, pain. Fr., *algie*. Pain. [L, 50.]

**ALGIBIC**, n. From Ar., *al-kibrīt*. Sulphur. [B; L, 84.]

**ALGID**, adj.  $A^2/ji^2d$ . Lat., *algidus*. Fr., *algide*. Ger., *frostig*. It., *algente*. Sp., *alvido*. Characterized by extreme chilliness of the surface and extremities of the body (said particularly of the cold stage of fevers and of the condition during collapse [q. v.]). [D.] Cold; very cold. [L, 47, 56, 93.]

**ALGIDISM**, n.  $A^2/ji^2d-iz^2m$ . See *ALGIDITY*.

**ALGIDITY**, n.  $A^2l-ji^2d^2i-ti^2$ . Fr., *algidité*. Chilliness; a marked degree of coldness in disease. [L.]—**Progressive A.** Fr., *algidité progressive*. See *SCLEREMA neonatorum*.

**ALGIDNESS**, n.  $A^2/ji^2d-ne^2s$ . See *ALGIDITY*.

**ALGIFIC**, adj. A<sup>2</sup>l-j<sup>2</sup>f<sup>2</sup>i<sup>2</sup>k. Lat., *algificus*. Causing cold. [L, 58, 73.]

**ALGIN**, n. A<sup>2</sup>l/j<sup>2</sup>n. From *alga* (q. v.). Fr., *algine*. A nitrogenous principle closely resembling albumin, but not coagulable by heat; the residual product in the wet process of obtaining iodine from certain marine *Algæ*. It forms definite *alginates* with the metals. It has considerable alimentary value, and may be used instead of gum arabic. [“N. Y. Med. Jour.,” Dec. 5, 1885, p. 648.]

**ALGINÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)-ji(ge)<sup>2</sup>ne(a<sup>3</sup>e<sup>2</sup>). A term used by Leunis to include the lichens and *Algæ*. [B, 170.]

**ALGINATE**, n. A<sup>2</sup>l/j<sup>2</sup>n-at. A compound of algin with a metal.

**ALGOID**, adj. A<sup>2</sup>l/goid. Lat., *algoides*. Resembling the *Algæ*. —**A. cells**. Vegetable cells akin to various lower forms of *Algæ*, described by J. H. Salisbury as occurring in the stools of patients suffering from chronic diarrhoea. [B, 70.]

**ALGOIDEA** (Lat.), n. n. pl. A<sup>2</sup>l(a<sup>3</sup>l)-go-i<sup>2</sup>d<sup>2</sup>e<sup>2</sup>a<sup>3</sup>. A term used by Batsch to include *Algæ* and lichens. [B, 170.]

**ALGOIDES** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-go-i(ge)<sup>2</sup>dez(de<sup>2</sup>s). Algid; as a n., the water-aloe, a species of *Equisetum* the leaves of which resemble *Algæ*. [L, 116.]

**ALGOLOGY**, n. A<sup>2</sup>l-go<sup>2</sup>l'o-j<sup>2</sup>i. From *alga*, sea-weed, and *lógos* (see *logy*\*). Lat., *algologia*. Fr., *algologie*. Ger., *Algologie*. Sp., *algología*. The department of botany which treats of *Algæ*. [B, 93; L, 116.]

**ALGOMETRY**, n. A<sup>2</sup>l-gom<sup>2</sup>e<sup>2</sup>t-r<sup>2</sup>i. From *ἄλγος*, pain, and *μέτρον*, a measure. The measurement, or estimation, of pain.—**Electrical a.** It., *algometria elettrica*. A comparative measurement of the pain produced by an induced current of electricity. [L, 44.]

**ALGOR** (Lat.), n. m. A<sup>2</sup>l(a<sup>3</sup>l)/go<sup>2</sup>r. Gen., *algoris*. It., *algore*. See ALGIDITY.—**A. mortis**. It., *algore cadaverico*. The coldness of the body which succeeds death. [L, 54].—**A. progressivus neonatorum**. See *SCLEREMA neonatorum*.

**ALGOS** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)/go<sup>2</sup>s. Gen., *al'geos*. Gr., *ἄλγος*. See ALGEMA.

**ALGOSE**, adj. A<sup>2</sup>l/gos. Very cold. [L, 56.]

**ALGOSPASMICUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)/go-spa<sup>2</sup>z(spa<sup>2</sup>s)/mi<sup>2</sup>k-u<sup>2</sup>s(u<sup>2</sup>s). For deriv., see ALGOSPASMUS. Having the characteristics of, or resembling, painful cramps. [L, 50.]

**ALGOSPASMUS** (Lat.), n. m. From *ἄλγος*, pain, and *σπασμός*, spasm. Fr., *algospasme*. A painful cramp. [L, 116.]

**ALGOSPASTICUS** (Lat.), adj. From *ἄλγος*, pain, and *σπαστικός*, drawing. See ALGOSPASMICUS.

**ALGOUS**, adj. A<sup>2</sup>l/gu<sup>2</sup>s. Ger., *algenartig*. Belonging to the *Algæ*. [L, 46, 56.]

**ALGRE** (Sp.), n. A<sup>3</sup>l/gra. A mineral spring on the mountain of Montjuí, in Spain; used only as a table water. [L, 105.]

**ALGUADA**, n. Leprosy. [Avicenna (G).]

**ALGUE** (Fr.), n. A<sup>3</sup>lg. See ALGA.—**A. commune**. See *ZOSTERA marina*.—**A. de Java**. See AGAR-AGAR.—**A. de verriers**, *A. Marin*. See *ZOSTERA marina*.

**ALGUES** (Fr.), n. pl. A<sup>3</sup>lg. See ALGÆ.—**A. à frondes**. Those *Algæ* which are spread out in the form of membranes. They comprise the sea-*Algæ*, classed usually under the *Fucoideæ* and *Florideæ*. [B, 107].—**A. filamenteuses**. *Algæ* which consist of filaments made up either of a single elongated cell, or of several cells articulated in a row. [B, 107].—**A. isocarpées**. A group of *Algæ* comprising such as are made up of single cells either free or agglomerated into colonies, and imbedded often in granular or gelatinous material. They embrace the genera now usually classed with the protophytes. [B.]

**ALGUMIN** (Heb.), n. Also written *algum* and *almug*. Red sandal-wood. [B, 49; L, 73.]

**AL-GYOGY**, n. A warm mineral spring in Transylvania containing sodium bicarbonate; used in digestive and urinary disorders. [B, 93.]

**ALHAGEÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)-ha(ha<sup>3</sup>)je<sup>2</sup>(ge<sup>2</sup>)-e(a<sup>3</sup>e<sup>2</sup>). Fr., *alhagées*. A sub-tribe of the *Leguminosæ* established by De Candolle. [L, 106.]

**ALHAGEUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-ha(ha<sup>3</sup>)je<sup>2</sup>(ge<sup>2</sup>)-e(a<sup>3</sup>e<sup>2</sup>). Pertaining to the genus *Alhagi*; used as a n. in the fem. pl., *alhagæe* (q. v.).

**ALHAGI**, n. Ar., *al-hâji*. Sp., *alhagi*, *alhaji*. Syn.: *Manna* [Don], *Hedysarum* [Linnaeus], *Alhagia* [Reichenbach]. A genus of plants belonging to the natural order *Leguminosæ*, sub-order *Papilionaceæ*, characterized by bearing a stalked, woody pod, which, though contracted between the seeds, is not completely divided into jointed sections. [B, 19].—**A. camelorum**. See *A. maurorum*.—**A. manna**. See under MANNA.—**A. mannifera** [Desvaux], *A. maurorum*. Ger., *Alhagistrauch*. Syn.: *Manna hebraica* [Don], *Hedysarum a.* [Linnaeus]. A species growing in southern Asia, said to furnish a manna-like exudation, which collects on the leaves and branches. [B, 19, 80, 170; L, 80.]

**ALHAMA DE ARAGÓN** (Sp.), n. A<sup>3</sup>l-a<sup>3</sup>/ma<sup>3</sup> da a<sup>3</sup>-a<sup>3</sup>-gon<sup>2</sup>. A town in Aragon, Spain, near which there are warm mineral springs containing carbonic acid, magnesium and sodium chlorides, and the sulphates of calcium and iron. Used in renal, vesical, hæmorrhoidal, cutaneous, rheumatic, and nervous affections. [A, 255.]

**ALHAMA DE GRANADA**. A<sup>3</sup>l-a<sup>3</sup>/ma<sup>3</sup> da gra<sup>3</sup>-na<sup>3</sup>/da<sup>3</sup>. A city of Granada, in Spain, near which there are hot mineral springs containing carbonic acid, hydrogen sulphide, magnesium and sodium chlorides, magnesium and calcium sulphates, magnesium car-

bonate, and silica. Used in nervous, rheumatic, thoracic, cardiac, and cutaneous affections. [A, 255.]

**ALHAMA DE MURCIE**. A<sup>3</sup>l-a<sup>3</sup>/ma<sup>3</sup> da mur<sup>2</sup>/thi<sup>2</sup>-a. A town in the province of Murcia, Spain, where there are warm and hot mineral springs containing carbonic acid, calcium sulphate, potassium chloride, and iron. Used in anæmia and in urinary and intestinal disorders. [B, 93.]

**ALHAMILLA** (Sp.), n. A<sup>3</sup>l-a<sup>3</sup>-mel/ya<sup>3</sup>. A hot mineral spring near Almería, Spain, containing magnesium and calcium sulphates and chlorides, magnesium carbonate, and silica. [A, 89, 255.]

**ALHANDAL**, n. A<sup>3</sup>l-ha<sup>3</sup>n<sup>2</sup>/da<sup>3</sup>l. From Ar., *al-handhal*. See COLOCYNTH.—**Trochiscia** (Lat.). Fr., *trochisques* d'a. Ger., *A'küch-elen*, *A'küchen*, *A'täfelchen*. Syn.: *trochisci colocynthis*. Troches of colocynth pulp 5 parts and gum arabic 1 part. Official, with some variations, in several old pharmacopœias; used in doses of from 3 to 12 grains. [L, 85.]

**ALHANNA**, n. Tripoli. [L, 94.]

**ALHARMEL** (Ar.), n. See PEGANUM *harmala*.

**ALHASBA** (Ar.), n. Measles. [G.]

**ALHASEF** (Ar.), n. See HYDROA and SUDAMINA.

**ALHASUR** (Ar.), n. A sweet substance, perhaps alhagi manna, found on an herb in Egypt, and imputed to the presence of an insect. [L, 105.]

**ALHAUNE** (Fr.), n. A<sup>3</sup>l-on. A provincial name for the *Lawsonia inermis*. [B, 93.] Cf. ALHENA.

**ALHEMAKE**, n. Ar., *al-hemak*. A red rash (applied by Avicenna to a disease thought to have been measles). [L, 83.]

**ALHENNA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-he<sup>2</sup>n<sup>2</sup>/na<sup>3</sup>. From Ar., *al-khen-nâ*. See *LAWSONIA inermis*.

**ALHENOT**, n. Ar., *al-ânok* (Heb., *anak*). An alchemical name for lead. [B, 52.]

**ALHONONEC** (Ar.), n. See ADEHEMEST.

**ALI** (It.), n. A<sup>3</sup>le. A spring near Messina, Sicily, containing calcium sulphate, hydrochloric and carbonic acids, and chlorides; used in cutaneous and bronchial affections. [L, 49.]

**ALI**, n. A Telooogo name for flax. [B, 172.]

**ALIA**, n. An East Indian name for ginger. [L, 105.]

**ALIAKOO**, n. An East Indian name for the *Menecylon tinctorium*. [L, 67.]

**ALIBERTIA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)-i<sup>2</sup>-bar<sup>2</sup>/ti<sup>2</sup>-a<sup>3</sup>. Fr., *alibertie*. A genus of rubiaceous plants found in tropical America. [L, 49, 67.]

**ALIBILIS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)-i<sup>2</sup>b<sup>2</sup>/i<sup>2</sup>-i<sup>2</sup>s. From *alere*, to nourish. See ALIBLE.

**ALIBILITY**, n. A<sup>2</sup>l-i<sup>2</sup>-bi<sup>2</sup>/i<sup>2</sup>-i<sup>2</sup>. Fr., *alibilité*. Sp., *alibilidad*. A term used to indicate the nutritive value of a substance. [L, 42, 63, 98.]

**ALIBLE**, adj. A<sup>2</sup>l/i<sup>2</sup>bl. Lat., *alibilis*. Fr., *alible*. Ger., *nahrend*, *nahrhaft*. It., Sp., *alible*. Nutritious. [B, 39; L, 43, 44.]

**ALIBOUFIER**, **ALIBUSIER** (Fr.), n's. A<sup>3</sup>-le-bu-fe-a, -bu<sup>2</sup>-se-a. See *STRAX officinalis*.

**ALICA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)/i<sup>2</sup>k-a<sup>3</sup>. Spelt, a kind of barley, or the meal or a drink made from it; a food to which Hippocrates attributed very nourishing properties; Egyptian wheat. [L, 41, 53, 97, 103.]

**ALICANTE** (Sp.), n. A<sup>3</sup>-le-ka<sup>3</sup>n<sup>2</sup>/ta. A winter resort in Valencia, Spain. [L, 49.]

**ALICANTSEIFE** (Ger.), n. A<sup>3</sup>-le-ka<sup>3</sup>nt<sup>2</sup>/zi-fe<sup>2</sup>. Olive-oil soap. [L, 57.]

**ALICANTSODA** (Ger.), n. A<sup>3</sup>-le-ka<sup>3</sup>nt<sup>2</sup>/zo-da<sup>3</sup>. See BARILLA.

**ALICASTRUM** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)-i<sup>2</sup>k-a<sup>3</sup>s(a<sup>3</sup>s)/tru<sup>2</sup>m(tru<sup>2</sup>m). A grain resembling alica (q. v.). [L, 58.]

**ALICES** (Lat.), n. pl. A<sup>2</sup>l(a<sup>3</sup>l)-i<sup>2</sup>-sez(ke<sup>2</sup>s). The red spots which precede the pustules of small-pox. [G.]

**ALICONDE**, n. A Congo name for the *Adansonia digitata*. [L, 105.]

**ALICORNU** (Lat.), n. n. A<sup>2</sup>l(a<sup>3</sup>l)-i<sup>2</sup>-ko<sup>2</sup>r<sup>2</sup>/nu<sup>2</sup>(nu). See UNICORNU.

**ALICUA** (Sp.), n. A<sup>3</sup>-e<sup>2</sup>-kwa<sup>3</sup>. A saline mineral spring near Cadiz, Spain.

**ALICUM** (Sp.), n. A<sup>3</sup>-e<sup>2</sup>-kum. A mineral spring containing chlorides and sulphates, near Guadix. [L, 63].—**A. de Ortega**. A Spanish mineral spring containing earthy sulphates. [L, 57.]

**ALIENATED**, adj. A<sup>2</sup>l-i<sup>2</sup>-e<sup>2</sup>n-a-te<sup>2</sup>d. Lat., *alienatus*. Fr., *aliéné*. Ger., *geistesgestört*. It., *alienato*. Sp., *alienado*. 1. Insane, mad. 2. Gangrenous. 3. In botany, having given way to be replaced by others differing from them (said of the first leaves). [L, 44, 58, 70, 116.]

**ALIENATIO** (Lat.), n. f. A(a<sup>3</sup>)-li<sup>2</sup>-e<sup>2</sup>n-a(a<sup>3</sup>)/shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *alienatio'nis*. See ALIENATION.—**A. partis**. Gangrene of a part. [L, 50.]

**ALIENATION**, n. A<sup>2</sup>-li<sup>2</sup>-e<sup>2</sup>n-a<sup>3</sup>/shu<sup>2</sup>n. Lat., *alienatio*. Fr., *aliénation*. Ger., *Entfremdung*. It., *alienazione*. Sp., *alienación*. Insanity, delirium.—**A. d'esprit** (Fr.). A transitory delirium accompanied by fever, differing from other forms of mental trouble in duration only. [L, 112].—**Mental a.** Fr., *a. mentale*. Ger., *Geisteszerrüttung*. A generic term including every form of deviation from the normal action of the mind. [L, 50, 55, 56, 112.]

**ALIÉNÉ** (Fr.), adj. and n. A<sup>3</sup>-le-a-na. Insane. An insane person.—**A. accusateur**. A melancholic who falsely accuses himself of crime, or brings similar reproaches against others, feeling

himself persecuted. [Grislain, quoted by Cotard, "Arch. de neurol.," Sept., 1882, p. 152.]

**ALIENÉR** (Fr.), v. tr. A<sup>3</sup>-le-a-na. As a refl., s'a., to become insane.

**ALIENIST**, n. A<sup>1</sup>/i<sup>2</sup>-e<sup>2</sup>-n-i<sup>2</sup>st. Fr., *aliéniste*. Ger., *Irrenarzt*. It., Sp., *alienista*. One who investigates mental diseases. [L, 44, 95.]

**ALIENUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>-e/(a)<sup>3</sup>/nu<sup>3</sup>m(mu<sup>4</sup>m). 1. A foreign body. 2. Any substance injurious to the body. [L, 53, 94.]

**ALIENUS** (Lat.), adj. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>-e/(a)<sup>3</sup>/nu<sup>3</sup>s(nu<sup>4</sup>s). See **ALIENATED**.

**ALIFEROUS**, adj. A<sup>2</sup>/i<sup>2</sup>f'e<sup>2</sup>r-u<sup>3</sup>s. From *ala*, a wing, and *ferre*, to bear. Fr., *alifère*. Sp., *alifero*. Wing-bearing. [B, 39; L, 41, 95.]

**ALIFORM**, adj. A<sup>2</sup>/i<sup>2</sup>-fo<sup>2</sup>rm. Lat., *aliformis*. Fr., *aliforme*. Ger., *flügel förmig*. Sp., *aliforme*. Wing-shaped. [L, 46, 95, 106.]

**ALIGEROUS**, adj. A<sup>2</sup>/i<sup>2</sup>j'e<sup>2</sup>-ru<sup>3</sup>s. Fr., *aligère*. See **ALIFEROUS**.

**ALIGULUS** (Lat.), n. m. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>g'u<sup>2</sup>(u)-lu<sup>3</sup>s(lu<sup>4</sup>s). A confection. [B, 50.]

**ALILITAM**, n. A vine found in the Philippines, the bruised leaves of which are used to dissipate the tumors and allay the itching caused by a caterpillar called *basal*. [L, 105.]

**ALIMA** (Lat.), n. n. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>e/(e)<sup>3</sup>/ma<sup>3</sup>. From *ἀλμος*, without hunger. Alimentary substances. [L, 50.]

**ALIMENT**, n. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt. Lat., *alimentum*. Fr., *aliment*. Ger., *Nahrung*. It., Sp., *alimento*. Any substance capable of nourishing or of repairing the waste of the body.—**Accessory a.** Adjective a. A condiment. [K].—**Substantive a.** A term including all foods which have a real nutritive value, as distinguished from those which are used simply as condiments. [K.]

**ALIMENTAL, ALIMENTARY**, adj.s. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt/a<sup>2</sup>l, -a-ri<sup>2</sup>. Fr., *alimentaire*. Ger., *nährend*. It., *alimentario*. Sp., *alimentoso*. 1. Nourishing, nutritious. 2. Pertaining to alimentation. [L, 52, 56, 93, 103.]

**ALIMENTATION**, n. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt-a/shu<sup>3</sup>n. Lat., *alimentatio*. Fr., *alimentation*. Ger., *Nahrung*. It., *alimentazione*. Sp., *alimentación*. 1. A process or system of giving food. 2. The processes of digesting and absorbing food.—**Artificial a.** Fr., *a. artificielle*. The nourishing of persons who are unable or unwilling to take food in the ordinary way.—**A. artificielle forcée** (Fr.). The feeding of those who resist.—**A. volontaire** (Fr.). The feeding of those who are willing to take food, but who are unable to do so.—**A. curative** (Fr.). The treatment of disease with nothing but food.—**A. forcée** (Fr.). See **Forced a.**—**A. iodique** (Fr.). The administration of iodine by mixing it with the food.—**A. médicamenteuse** (Fr.). An indirect method of medication by impregnating the food with a drug, by administering the drug either to the mother (in the case of a nursing infant) or to an animal the flesh of which is to be used as food. [L, 87].—**Forced a.** 1. The feeding of a person against his will. 2. The giving of more food to a person than he craves. [L.] See also **GAVAGE**.—**Rectal a.** Feeding by means of nutrient enemata.

**ALIMENTATIVE**, adj. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt-a/ti<sup>2</sup>v. Of, or pertaining to, alimentation. [B, 39.]

**ALIMENTATIVENESS**, n. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt-a/ti<sup>2</sup>v-ne<sup>2</sup>s. See **ALIMENTIVENESS**.

**ALIMENTER** (Fr.), v. tr. A<sup>3</sup>-le-ma<sup>3</sup>-n-ta. To nourish, or supply nourishment. [L, 42.]

**ALIMENTEUX** (Fr.), adj. A<sup>3</sup>-le-ma<sup>3</sup>-n-tu<sup>3</sup>. Nourishing. [L, 42.]

**ALIMENTIVENESS**, n. A<sup>2</sup>/i<sup>2</sup>-me<sup>2</sup>nt/i<sup>2</sup>v-ne<sup>2</sup>s. Fr., *alimentivité*. Sp., *alimentividad*. A phrenological term for the instinct for taking food. [L, 42, 55, 98.]

**ALIMON** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>e/(e)<sup>3</sup>/mo<sup>2</sup>n. See **ALIMUM**.

**ALIMONTA** (Lat.), n. f. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>-mo<sup>2</sup>/ni<sup>2</sup>-a<sup>3</sup>. 1. Aliment. 2. In botany, sap. [L, 58, 106.]

**ALIMONIOUS**, adj. A<sup>2</sup>/i<sup>2</sup>-mo<sup>2</sup>/ni<sup>2</sup>-u<sup>3</sup>s. Affording food, nourishing. [L, 56.]

**ALIMOS** (Lat.), adj. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>e/(e)<sup>3</sup>/mo<sup>2</sup>s. Preventing hunger; without hunger. [L.]

**ALIMUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>e/(e)<sup>3</sup>/mu<sup>3</sup>m(mu<sup>4</sup>m). 1. A plant, the use of which prevents hunger and thirst. [L, 50.] 2. See **ARUM**.

**ALIMUS** (Lat.), adj. and n. m. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>e/(e)<sup>3</sup>/mu<sup>3</sup>s(mu<sup>4</sup>s). See **ALIMOS**, **ALIMUM**, and **GLYCRRHIZA glabra**.

**ALINASAL**, adj. A<sup>2</sup>/i<sup>2</sup>-na<sup>3</sup>/sa<sup>2</sup>l. From *ala*, a wing, and *nasus*, the nose. Belonging to the ala nasi. [L, 66.]

**ALINDESIS** (Lat.), n. f. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>n-de/(da)/si<sup>2</sup>s. Gen., *alinde/-seos*. From *ἀλινδης*, a rolling in the dust. An exercise recommended by Hippocrates, consisting in rolling in the dust after having been anointed with oil. [L, 94.]

**ALINGI**, n. A Tamil name for the *Alangium decapetalum*. [B, 172.]

**ALINTHISAR** (Ar.), n. Elongation of the uvula. [L, 94.]

**ALIOCAB** (Ar.). See **ALACAP**.

**ALIONE**, n. See **ALLIONE**.

**ALIPENA** (Lat.), n. n. pl. of *alipenos* (q. v.). A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-e'-(a<sup>3</sup>e<sup>2</sup>)-na<sup>3</sup>. Dry, external remedies containing no fat. [L, 53.]

**ALIPENOS** (Lat.), adj. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-e'-(a<sup>3</sup>e<sup>2</sup>)-no<sup>3</sup>s. From a priv., and *λίπος*, fatty. Free from, or lacking in, fat (said of remedies, and of lean persons). [L, 51, 94.]

**ALIPANTA** (Lat.), n. n. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-a<sup>2</sup>n(a<sup>3</sup>n)/ta<sup>3</sup>. See **ALIPÆNA**.

**ALIPANTOS** (Lat.), adj. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-a<sup>2</sup>n(a<sup>3</sup>n)/to<sup>3</sup>s. See **ALIPÆNOS**.

**ALIPASMA** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-a<sup>2</sup>z(a<sup>3</sup>s)/ma<sup>3</sup>. Gen., *alipas/matos* (-tis). From *ἀλείφειν*, to anoint, and *πλάσμα*, a plaster. A fine powder mixed with oil, used as an ointment to prevent sweating. [L, 51.]

**ALIPATA**, n. Fr., *aveuglant*. A euphorbiaceous tree found in the Philippines, of which the juice and the smoke of the burning wood are said to cause blindness. By some it is regarded as an *Eccecaria*. [L, 87, 109.]

**ALIPED**, adj. A<sup>2</sup>/i<sup>2</sup>p-ed. From *ala*, a wing, and *pes*, the foot. See **CHEIROPTEROUS**.

**ALIPÈDES** (Fr.), n. pl. A<sup>3</sup>-le-pe<sup>2</sup>d. See **CHEIROPTERA**.

**ALIPILI** (Lat.), n. m. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p/i<sup>2</sup>l-i<sup>2</sup>e. From *ala*, the axilla, and *pilus*, a hair. Servants, in the ancient Roman baths, who removed the axillary hairs. [L, 94.]

**ALIPON** (Fr.), n. A<sup>3</sup>-le-po<sup>2</sup>n<sup>2</sup>. A purgative and drastic species of turpeth found in Languedoc.

**ALIPTA** (Lat.), n. m. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p/ta<sup>3</sup>. From *ἀλείφειν*, to anoint, to train. The person who trained the ancient Grecian wrestlers and bathers; a teacher of gymnastics. [L, 50, 116.]

**ALIPTERIUM** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p-te<sup>2</sup>(ta)/ri<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). A place where anointing was done. [L, 81.]

**ALIPTES** (Lat.), n. m. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p/tez(te<sup>2</sup>s). See **ALIPTA**.

**ALIPTIC**, adj. A<sup>2</sup>/i<sup>2</sup>p/ti<sup>2</sup>k. Fr., *aleptique*, *aleptique*. 1. Pertaining to inunction. 2. Gymnastic. [L.]

**ALIPTICA** (Lat.), n. f. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>p/ti<sup>2</sup>k-a<sup>3</sup>. Gr., *ἀλειπτική* (*réx-vñ* understood). An ancient term for gymnastic training. [A, 311.]

**ALISANDERS**, n. A<sup>2</sup>/i<sup>2</sup>s-a<sup>2</sup>nd'u<sup>3</sup>rz. See **ALEXANDERS**.

**ALISE** (Fr.), n. A<sup>3</sup>-l-ez. The fruit of the lote-tree (*Pyrus aria*), eaten in some parts of France, and used as a medicine in diarrhoea. [D, 112; L, 67.]

**ALISEDA** (Sp.), n. A<sup>3</sup>/i<sup>2</sup>s-a<sup>2</sup>dth<sup>2</sup>a<sup>3</sup>. A chalybeate astrigent mineral spring in the Sierra Morena, in Spain, recommended for gastric weakness, chronic diarrhoea, amenorrhoea, and chlorosis. [D, 90; L, 57.]

**ALISIER** (Fr.), n. A<sup>3</sup>/i<sup>2</sup>s-i<sup>2</sup>-a. The lote-tree, service-tree, or beam-tree (the *Pyrus aria*). [D, 11, 79, 82].—**A. blanc**, **A. de Bourgogne**. The *Pyrus aria*. [D, 2, 79, 92].—**A. de Fontainebleau**. The *Cratægus dentata*. [D, 79].—**A. des bois**, **A. torminal**, **A. tranchant**. The *Cratægus torminalis*.—**Sorblie** a. See **A.**

**ALISMA** (Lat.), n. n. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)/ma<sup>3</sup>. Gen., *alis/matos* (-tis). Fr., *ἀλisma*. Fr., *alisme*. 1. A genus of perennial caulescent herbs of the natural order *Alismaceæ*, sub-order *Alismææ*, characterized by having 3 white petals and 6 stamens. [B, 2. A general name for a number of plants (including *Acuron*, *Arnica montana*, etc.). [D, 107].—**A. americanum** [Gray]. An American variety of *A. plantago*. [D, 115].—**A. damasonium** [Linnaeus]. See **DAMASONIUM**.—**A. graminifolia**, **A. lanceolata**. See *A. plantago*.—**A. plantago** [Linnaeus]. Fr., *alisme futeau*, *plantain d'eau*, *pain de grenouilles*. Ger., *grosser Froeschlöf*, *Wasserwegerich*, *Wasserwegbreit*. Syn.: *Plantago aquatica*. The water-plantain; an herb found in ditches and ponds in Europe and America. It has large, smooth radical leaves and a scape, rising 2 feet or less, with numerous small, rose-white flowers arranged in a panicle on pedicels from 8 to 12 inches long. [B, 34.] The root was formerly esteemed a remedy for rabies. [D, 133.] The rhizome and the leaves contain a butyrateous, pungent volatile oil and an acrid resin. The powder of the leaves is given in doses of 60 grains, and that of the root in doses of 30 grains, for renal calculi, dysentery, diarrhoea, chorea, and epilepsy. [D, 115].—**A. ranunculoides**. Fr., *futeau renonculier*. A species growing in wet places. [D, 12, 121].—**A. stellatum** [Lamarck]. See **DAMASONIUM**.

**ALISMACEÆ** (Lat.), n. f. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)-ma<sup>3</sup>(ma<sup>3</sup>)/se<sup>2</sup>(ke<sup>2</sup>)-e(a<sup>3</sup>e<sup>2</sup>). Fr., *alismacées*. Ger., *Alismaceen*, *Froschlöffelplanzen*. Sp., *alismáceas*. Syn.: *alismoidææ*. The alismads; a name given by the elder Richard to an order of endogenous phanerogams in the natural system of De Candolle, comprising herbs bearing petiole leaves with branching peduncles, and perfect, or monœcious, flowers provided with both calyx and corolla. There are 3 sepals and 3 petals; the stamens are hypogynous; and the ovaries, 3 or more in number, are converted into as many achenia. [B, 1, 19, 34.]

**ALISMACEOUS**, adj. A<sup>2</sup>/i<sup>2</sup>z-ma<sup>3</sup>/shu<sup>3</sup>s. Lat., *alismaceus*. Fr., *alismacé*. Ger., *froschlöffelartig*. Sp., *alismáceo*. Belonging to the genus *Alisma* or to the *Alismaceæ*. [D, 110.]

**ALISMADS**, n. pl. A<sup>2</sup>/i<sup>2</sup>z-ma<sup>3</sup>/dz. See **ALISMACEÆ**.

**ALISMÆ** (Lat.), n. f. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)/me<sup>3</sup>(ma<sup>3</sup>-e<sup>2</sup>). A subdivision of the *Alismææ* made by Reichenbach. [B, 170.]

**ALISMAL**, adj. A<sup>2</sup>/i<sup>2</sup>z-ma<sup>3</sup>l. See **ALISMALES**.

**ALISMALES** (Lat.), n. f. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)-ma<sup>3</sup>(ma<sup>3</sup>)/lez(le<sup>2</sup>s). The alismal alliance; according to Lindley, an alliance of endogens including the orders *Alismaceæ*, *Butomaceæ*, and *Juncaginaceæ*. [B, 170.]

**ALISMEÆ** (Lat.), n. f. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)/me<sup>2</sup>-e(a<sup>3</sup>e<sup>2</sup>). Fr., *alismées*. A sub-order of the *Alismaceæ*, comprising those genera in which the petals are white, the embryo being curved and the leaves usually laminate. [B, 34.]

**ALISMEOUS**, adj. A<sup>2</sup>/i<sup>2</sup>z-me<sup>2</sup>-us. Belonging to the *Alismææ*.

**ALISMIN**, n. A<sup>2</sup>/i<sup>2</sup>z-mi<sup>2</sup>n. Fr., *alimine*. An acrid, bitter extract, probably a mixture of several substances, obtained from the water-plantain (*Alisma plantago*). [B, 2.]

**ALISMINÆ** (Lat.), n. f. pl. A<sup>2</sup>/(a<sup>3</sup>)-i<sup>2</sup>z(i<sup>2</sup>s)-mi<sup>2</sup>(me<sup>3</sup>)/ne<sup>3</sup>(na<sup>3</sup>-e<sup>2</sup>). Link's term for the *Alismææ* (q. v.). [B, 170.]

**ALISMOID**, adj.  $A^1I^2Z^2$ /moid. Lat., *alismoides*. Fr., *alismôide*. See ALISMACEOUS.

**ALISMOIDEÆ** (Lat.), n. f. pl.  $A^1I^2(a^1I)^2I^2S^2$ -mo-i $d^2$ -e $^2$ -e $^2$ -e $^2$ . Fr., *alismoides*. Sp., *alismoides*. 1. A name given by Ventenat to a family of plants bearing a seed devoid of endosperm; comprising genera now distributed among the *Alismaceæ*, *Butomææ*, and *Juncaginææ*. [B, 1.] 2. The *Alismaceæ*. [B, 19.]

**ALISO** (Sp.), n.  $A^1I^2$ -e $^2$ -so. See *ALNUS glutinosa*.

**ALISPHEOID**, adj.  $A^1I^2S^2$ -fe $^2$ /noid. For deriv., see ALA and SPHENOID. Lat., *alispheoides*. Fr., *alispheoïde*. Pertaining to the greater wing of the sphenoid bone (see *A. CANAL*); as a n., that portion of the sphenoid bone of the fetus which subsequently forms the greater wing and the external pterygoid plate. [C.] In some of the lower animals it persists as a separate bone, but in man it becomes united with the basisphenoid (q. v.).

**ALISPHEOIDALIA** (Lat.), n. n. pl.  $A^1I^2(a^1I)^2I^2S^2$ -fe $^2$ (fa)-noid-a $^2$ (a $^3$ )/li $^2$ -a $^3$ . The greater wings of the sphenoid bone. [L, 113.]

**ALISSON** (Lat.), n. n.  $A^1I^2(a^1I)^2I^2S^2$ -so $^2$ n. See ALYSSON.

**ALISTELES**, n. An alchemical name for sal ammoniac. [B, 50.]

**ALITÉ** (Fr.), adj.  $A^3$ -le-ta. Bedridden. [D, 75.]

**ALITEMENT** (Fr.), n.  $A^3$ -let-ma $^2$ n $^2$ . Confinement to bed. [D, 92.]

**ALITH**, n. An old name for asafœtida. [D, 107.]

**ALITION** (Fr.), n.  $A^3$ -li $^2$ -shi $^2$ -o $^2$ n $^2$ . Alimentation. [D, 10.]

**ALITUS** (Lat.), n. m.  $A^1I^2(a^1I)^2I^2t$ -u $^2$ s(u $^2$ s). Gen., *alitus*. From *alere*, to nourish. Nourishment. [A, 312.]

**ALIUM** (Lat.), n. n.  $A^1I^2(a^1I)^2I^2u$ -m(u $^2$ m). See ALLIUM.

**ALIUMEIZ** (Ar.), n. The *Ficus sycomorus*. [D, 108.]

**ALIVÉRIE** (Fr.), n.  $A^3$ -le-va-re. A stimulating preparation of *Arabis chinensis*, used in India. [D, 79.]

**ALIXIA** (Lat.), n. f.  $A^1I^2(a^1I)^2I^2x$ /i $^2$ -a $^3$ . See ALYXIA.—*Cortex alixiæ*. See ALYXIA stellata.

**ALIZA** (Sp.), n.  $A^3$ -e $^2$ -thi $^2$ a $^3$ . The Colombian name of a shrub the juice of which is said to be a powerful hæmostatic. ["Lancet," Dec. 19, 1885, p. 1161.]

**ALIZARIMIDE**, n.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ /a $^2$ m-i $^2$ d. From *alizarin* and *amide*. Fr., *alizarimide*. Ger., *Alizarimid*. Syn.: *amidoxanthraquinone*. A substance crystallizing in brown needles, having the structural formula  $C_{14}H_6O_2 \begin{Bmatrix} OH \\ NH_2 \end{Bmatrix}$ , obtained by heating a dilute solution of pure alizarin in ammonia. [B.]

**ALIZAREIN**, n.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ -i $^2$ n. See ALIZARIMIDE.

**ALIZARI**, n. The Levant commercial name for madder. [B, 2.] —*Radix a.-æ.* Madder root. [B, 180.]

**ALIZARIC**, adj.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ /i $^2$ k. Fr., *alizarique*. Ger., *alizarisch*. It., *alzarico*. Sp., *alzarico*. Pertaining to alizarin. [B.] —*A. acid*. Fr., *acide alizarique*. Ger., *Alizarinsäure*. It., *acido alizarico*. Sp., *acido alzarico*. See PHTHALIC ACID.

**ALIZARIMIDE**, n.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ /i $^2$ m-i $^2$ d. From *alizarin* and *imide* (a derived form of *amide*). Fr., *alizarimide*. Ger., *Alizarimid*. Syn.: *alizarein*. A product obtained by heating flocculent precipitated alizarin with ammonia, and digesting with dilute hydrochloric acid,  $C_{14}H_7NO_3$  is  $C_{14}H_6O_2.NH_2$  of a violet-red color while moist, but nearly black when dried. [B, 2.]

**ALIZARIN**, n.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ -i $^2$ n. From *al-zari*, the Levant commercial name for madder. Lat., *alizarinum*. Fr., *alizarine*. Ger., *Alizarin*. It., *alzarina*. Sp., *alzarino*. Syn.: *anthraquinonic acid*; one of the isomeric varieties of dihydroxyanthraquinone, having the constitution  $C_{14}H_6O_4$ . It forms prismatic crystals, which when perfectly dry are red, but when freshly precipitated from an alcoholic solution are brownish-yellow. It is soluble with difficulty in boiling water, but dissolves more readily in alcohol and in ether. It was first obtained from madder-root, of which it constitutes the coloring principle, being identical with Runge's madder-red and Persoz and Gaultier de Claubry's *matière colorante rouge*. It is said also to be identical with morindone (a substance obtained by decomposing morindin with heat), but this is uncertain. Artificial a. is now made from anthracene, derived from coal-tar, and is largely used in dyeing. [B, 2.] —*A. blue*. Ger., *Alizarinblau*. A blue coloring matter, in the form of brownish-violet needles, of a metallic lustre, obtained by heating nitroalizarin with glycerin and sulphuric acid. The formula is  $C_{17}H_9NO_6$ . [B, 49, 79; Perkin, "Nature," July 30, 1885 (B).] —*A. blue amide*. Ger., *Alizarinblauamid*. A derivative of a.-blue in which a molecule of amidogen replaces one of hydroxyl,  $C_{17}H_9NO_5(NH_2)$ . It forms dark-blue acicular crystals. [B, 79.] —*A. brown*. Ger., *Alizarinbraun*. A brownish or olive-colored substance prepared by treating nitroalizarin with soda and stannous chloride, or with sodium hyposulphite. [B, 49.] —*A. carmine*. Ger., *Alizarinkarmün*. A red coloring matter, forming a very fast dye, consisting of the salts of the sulpho-acids of a. and purpurin. [B, 49.] —*A. orange*. Ger., *Alizarinorange*. See NITROALIZARIN.—*A'säure* (Ger.). Alizaric acid. See PHTHALIC ACID.

**ALIZARINIC ACID**, n.  $A^1I^2I^2Z^2$ -a $^2$ r $^2$ -i $^2$ n/i $^2$ k. See PHTHALIC ACID.

**ALIZARINSULPHONIC ACID**, n.  $A^1I^2I^2Z^2$ /a $^2$ r $^2$ -i $^2$ n-su $^2$ /i $^2$ -fo $^2$ n $^2$ -i $^2$ k. A product obtained by heating alizarin with fuming sulphuric acid. [B, 2.]

**ALIZARIQUE** (Fr.), adj.  $A^3$ -le-za $^3$ -rek. See ALIZARIC.

**ALIZARISCH** (Ger.), adj.  $A^3$ -le-dza $^3$ /i $^2$ sh. See ALIZARIC.

**ALIZELES**, n. See ALISTELES.

**ALIZIER** (Fr.), n.  $A^3$ -le-zi $^2$ -a. See ALISIER.

**ALJAMA** (Sp.), n.  $A^1I^2$ -ha $^3$ /ma $^2$ . See ALHAMA.

**ALJOSUCHA** (Sp.), n.  $A^1I^2$ -ho-su $^2$ /cha $^2$ . A Peruvian plant.

Rubbing it between the hands and then inhaling the odor is said to protect against tertian fever. [D, 101.]

**ALJUZAM** (Ar.), n. Lepra. [Kaposi (D, 18).]

**ALK**, n. A gum-resin obtained in northern Africa from the *Pistacia terebinthus*. [D, 117.]

**ALKAERT, ALKAES, ALKAEST**, n's. See ALCAHEST.

**ALKAFIAL, ALKAFIEL**, n's. Alchemical names for anti-mony. [B, 50.]

**ALKAHEST**, n. See ALCAHEST.

**ALKAHESTIC**, adj. See ALCAHESTIC.

**ALKAHOL**, n. See ALCOHOL and ALCAHOL.

**ALKAIN**, n. See ACAZDIR.

**ALKALALBUMINAT** (Ger.), n.  $A^3I^2$ -ka $^3$ -a $^3$ -I $^2$ -bu-mi $^2$ n-a $^3$ t'. See ALKALI ALBUMIN.

**ALKALAMIDE**, n.  $A^1I^2$ -ka $^3$ /a $^2$ m-i $^2$ d. From *alkali* and *amide*. Fr., *alkalamide*. Ger., *Alkalamid*. The a's are a class of compounds formed by the replacement of 2 or all 3 of the hydrogen atoms of ammonia by acid and base radicals. They are divided into *monalkalamides*, *dialkalamides*, and *trialkalamides*, according as they derive from 1, 2, or 3 molecules of ammonia. [B, 2.] —**Secondary a.** One in which 2 hydrogen atoms of ammonia are replaced, one by an acid and the other by a base radical. [B, 2.] —**Tertiary a.** One in which all 3 of the hydrogen atoms of ammonia are replaced, either (a) by 1 basic and 2 acid monatomic radicals, (b) by 2 basic and 1 acid monatomic radicals, or (c) by 1 basic monatomic and 1 acid diatomic radical. [B, 2.]

**ALKALAP**, n. Ar., *al-qalazi*. An alchemical name for tin. [B, 52.]

**ALKALE**, n. An alchemical name for hen's fat (*oleum gallinæ*). [Ruland (D, 83).]

**ALKALESCENCE, ALKALESCENCY**, n's.  $A^1I^2$ -ka $^3$ -e $^2$ s/-se $^2$ n's, -se $^2$ n's-i $^2$ . Lat., *alcalescentia*. Fr., *alcalescence*. Ger., *Alkaleszenz*. It., *alcalescenza*. Sp., *alcalescencia*. 1. Slight alkalinity. [B, 2.] 2. A tendency to alkalinity. [D, 77.]

**ALKALESCENT**, adj.  $A^1I^2$ -ka $^3$ -e $^2$ s/-se $^2$ nt. Lat., *alcalescens*. Fr., *alcalescent*. Ger., *alkalisierend*. It., Sp., *alcalescente*. Weakly alkaline, becoming alkaline. [D, 77.]

**ALKALI**, n.  $A^1I^2$ -ka $^3$ /i. Pl., *a'es* or *a's*. Written also *alkali*. From Ar., *al-qali*, soda-ash. Lat., Fr., *alkali*, *alkali*. Ger., *alkalisches Mittel*, *Laugensalz*. It., *alkali*. Sp., *alcali*. Originally, the soluble part of the ashes of plants, especially of sea-weed (carbonates of sodium and potassium). At a later period three kinds of a. were recognized—vegetable, mineral, and volatile, corresponding respectively to potash, soda, and ammonia and their carbonates. At present the word is used in various senses. In its most restricted but most usual sense it is applied to four substances only, the hydrates of potassium (potash), sodium (soda), lithium (lithia), and ammonium (supposed to exist in the aqueous solution of ammonia); in a more general sense it is applied to the hydrates of the so-called alkaline earths (baryta, strontia, and lime) and to a large number of organic substances, both natural and artificial, classed as alkaloids and as ammonium-bases. The following properties are common to the mineral and many of the organic alkalis: 1. They are more or less soluble in water, the a'es proper much more so than the alkaline earths. 2. They neutralize the strongest acids, and with weak acids form salts having alkaline properties in some degree. 3. Dissolved in water, they act as caustics or corrosives on vegetable and animal substances. 4. They precipitate the heavy metals from most of their acid solutions, as hydrates or as oxides. 5. They alter the tint of many coloring matters. [B, 2.] —**Acetated vegetable a.** Potassium acetate. [B, 69.] —**Acetated volatile a.** Ammonium acetate. [B, 69.] —**Aerated a.** Fr., *alkali aéré*. It., *alkali aerato*. A combination of an a. with aerial (carbonic) acid; a carbonate of potassium, sodium, or ammonium. [B, 93.] —**Aerated fixed mineral a.** Sodium carbonate. [B.] —**Aerated fixed vegetable a.** Potassium carbonate. [B.] —**Aerated volatile a.** Ammonium carbonate. [B.] —**A. ammoniacum acetatum, A. ammoniacum aquosum, A. ammoniacum causticum, A. ammoniacum fluidum, A. ammoniacum spirituosum, A. ammoniacum succinatum, A. ammoniacum vinosum, A. ammoniacum volatile** (Lat.), **A. animal** (Fr.). See under ALKALI.—**A'a carbonica** (Lat.). The carbonates of the a'es. [B, 95.] —**A'a caustica** (Lat.). Caustic a'es. [B, 95.] —**A'metalle** (Ger.). The a.-metals. [B.] —**A. minerale nitratum, A. minerale phosphoratum, A. minerale salinum, A. minerale sulphuricum** (Lat.). See under ALKALI.—**A. of nitre.** See ALKALI du nitre.—**A. of tartar.** See ALKALI tartari.—**Caustic a.** Lat., *alkali causticum*. One of sufficient purity to act as a caustic. [B.] —**Deliquescent a.** Potash. [D, 90.] —**Effervescing a.** A carbonate of one of the a'es. [B, 93.] —**Effervescing fixed mineral a.** Sodium carbonate. [B.] —**Effervescing fixed vegetable a.** Potassium carbonate. [B.] —**Effervescing volatile a.** Ammonium carbonate. [B.] —**Fixed a.** Lat., *alkali fixum*. Fr., *alkali fixe*. Sp., *alcali fijo*. A non-volatile a. (either soda or potash). —**Fixed mineral a.** A salt of sodium, especially the carbonate. [B.] —**Fixed vegetable a.** Lat., *alkali fixum herbarum*. A salt of potassium, especially the carbonate. [B.] —**A. fixum tartaricum.** See ALKALI fixum tartaricum.—**Fossil a.** Lat., Fr., *alkali fossile*. See Mineral a.—**Marine a.** Fr., *alkali marin*. Soda. [B.] —**Mephitic volatile a.** Ammonium carbonate. [B.] —**Mild a.** Lat., *alkali mite*. Fr., *alkali doux*. Ger., *mildes A.* An old name for an a. which had lost its causticity in some degree, as by combination with carbonic acid.—**Mild volatile a.** Ammonium carbonate. [B.] —**Mineral a.** Lat., *alkali minerale*. Fr., *alkali minéral*. Ger., *mineralisches A.* Syn.: *fossil a.* An old name for soda and sodium carbonate; now applied to all the inorganic a'es. [B.] —**Muriated vegetable fixed a.** Potassium chloride. [B.] —**Organic a.** An organic base. See ALKALOID.—**Phlogistic**

**a., Phlogisticated a.** Lat., *alkali phlogisticatum*. Fr., *alkali phlogistique*. Ger., *phlogistiertes A.* An old term variously applied to sodium chloride and potassium cyanide and ferrocyanide. [B. 3, 86, 93, 107; D. 90.]—**Prussian a.** A cyanide of one of the alkali-metals. [B.]—**Urinary a.** Ammonia. [D. 90.]—**Vegetable a.** Lat., *alkali vegetabile*. Fr., *alkali végétal*. An old name for potash and potassium carbonate; now sometimes applied to the alkaloïds. [B.]—**Volatile a.** Lat., *alkali volatile*. Fr., *alkali volatil*. Ger., *flüchtiges A.* An old name for ammonia and ammonium carbonate. For other sub-titles in Latin, see under **ALCALI**; see also **A-ALBUMINATE** and **A-METAL**.

**ALKALIA**, n. A vessel. [D. 107.]

**ALKALID**, n. An alchemical name for oxide of copper made by heating brass. [Ruland, Johnson (D. 83).]

**ALKALIFIABLE**, adj.  $A^2l\text{-}ka^2l\text{-}i^2\text{-}a^2\text{-}bl$ . Ger., *alkalisierbar*. Capable of conversion into an alkali. [D. 77.]

**ALKALIFY**, v. tr. and intr.  $A^2l\text{-}ka^2l\text{-}i^2\text{-}fl$ . Ger., *alkalisieren*. To convert or be converted into an alkali. [D. 77.]

**ALKALIGEN**, **ALKALIGENE**, n's.  $A^2l\text{-}ka^2l\text{-}i^2\text{-}je^2n$ , -jen. See **ALCALIGENOUS**.

**ALKALIGENOUS**, adj.  $A^2l\text{-}ka^2l\text{-}i^2\text{-}je^2n\text{-}u^2s$ . Lat., *alcaligenus*. Fr., *alcaligène, alcalifiant*. Ger., *alkaligen, alkalisierend*. Sp., *alcaligeno*. Producing or engendering alkalies; a term formerly applied to nitrogen. [B.] Cf. **ALCALIGENOUS**.

**ALKALIMETER**, n.  $A^2l\text{-}ka^2l\text{-}i^2m\text{-}e^2t\text{-}u^2r$ . From *alkali*, and *μέτρον*, a measure. Fr., *alcalimètre*. Ger., *Alkalimeter*. Sp., *alcalímetro*. An apparatus for determining the amount of real alkali present in a liquid; either by the gradual addition of an acid of known strength, the amount necessary to saturate the alkali being noted; or, in the case of the alkaline carbonates, by measuring the amount of carbonic acid set free by their decomposition on adding an acid. [B.]

**ALKALIMETRIC**, adj.  $A^2l\text{-}ka^2l\text{-}i^2m\text{-}e^2t\text{-}ri^2k$ . Fr., *alcalimétrique*. Ger., *alkalimetrisch*. Sp., *alcalimétrico*. Pertaining to alkalimetry.

**ALKALIMETRY**, n.  $A^2l\text{-}ka^2l\text{-}i^2m\text{-}e^2t\text{-}ri^2$ . Fr., *alcalimétrie*. Ger., *Alkalimetrie*. Sp., *alcalimetría*. The determination of the proportion of real alkali present in an alkaline liquid. [B. 2.] See **ALKALIMETER**.

**ALKALINE**, adj.  $A^2l\text{-}ka^2l\text{-}i^2n$  (in). Lat., *alcalinus*. Fr., *alcalin*. Ger., *alkalinisch, alkalisch*. It., Sp., *alcalino*. Having the properties of an alkali (q. v.).—**A-earthly**. Fr., *alcalino-terreux*. Ger., *alkalinerisch*. It., *alcalino-terroso*. Pertaining to the a. earths or their metals. [B.] See under **EARTH**. See also **A-METALS**, **A-PHOSPHATES**, **A-REACTION**, **A-SALTS**, and **A-WATERS**.

**ALKALINITY**, n.  $A^2l\text{-}ka^2l\text{-}i^2n\text{-}i^2t\text{-}i^2$ . Lat., *alcalinitas*. Fr., *alcalinité*. Ger., *Alkalinität*. It., *alcalinità*. Sp., *alcalinidad*. The state of being alkaline. [B.]

**ALKALINIZATION**, n.  $A^2l\text{-}ka^2l\text{-}i^2n\text{-}i^2z\text{-}a\text{-}shu^2n$ . Fr., *alcalinisation*. Ger., *Alkalinisation*. It., *alcalinizzazione*. Sp., *alcalinización*. The act or process of rendering alkaline. [B.]

**ALKALINIZE**, v. tr.  $A^2l\text{-}ka^2l\text{-}i^2n\text{-}iz$ . Fr., *alcaliniser*. Ger., *alkalinisieren*. It., *alcalinizzare*. Sp., *alcalinizar, alcalificar*. To render alkaline. [B.]

**ALKALINURIA**, n.  $A^2l\text{-}ka^2l\text{-}i^2n\text{-}u^2r\text{-}i^2a^2$ . From *alkali*, and *ούρον*, urine. Alkalinity of the urine. [D. 2.]

**ALKALIOUS**, adj.  $A^2l\text{-}ka^2l\text{-}i^2u^2s$ . Alkaline. [D. 77.]

**ALKALISCH** (Ger.), adj.  $A^2l\text{-}ka^2l\text{-}i^2sh$ . Alkaline.

**ALKALITÄT** (Ger.), n.  $A^2l\text{-}ka^2l\text{-}i^2t\text{-}at$ . Alkalinity. [D. 12.]

**ALKALIZATE**, v. tr., adj., and n.  $A^2l\text{-}ka^2l\text{-}i^2z\text{-}at$ . To alkalize; alkaline; a substance having alkaline qualities. [Sheridan (D. 122).]

**ALKALIZATION**, n.  $A^2l\text{-}ka^2l\text{-}i^2z\text{-}a\text{-}shu^2n$ . See **ALKALINIZATION**.

**ALKALIZE**, v. tr.  $A^2l\text{-}ka^2l\text{-}iz$ . See **ALKALINIZE**.

**ALKALOÏD**, n.  $A^2l\text{-}ka^2l\text{-}oid$ . From *alkali* and *είδος*, resemblance. Lat., *alcaloides, alcaloideum*. Fr., *alcaloïde*. Ger., *Alkaloid, Pflanzenbase*. It., *alcaloide*. Sp., *alcaloïde*. An organic alkali or base; an organic substance possessing more or less alkalinity. Many of the a's can not strictly be termed alkalies, but they are so connected with substances decidedly alkaline that they are regarded as of essentially the same chemical nature. Most of the artificial a's must be considered as ammonia, or hydrate of ammonium, in which the hydrogen is replaced wholly or in part by a compound radicle generally composed of carbon and hydrogen (amines). Less is known of the constitution of the natural a's, but probably they also are derivatives of ammonia. [B. 2.]—**Cadaveric a.** Fr., *alcaloïde cadavérique*. Ger., *Cadaveralkaloid, Leichenalkaloid*. It., *alcaloïde cadaverico*. Sp., *alcaloïde cadavérico*. An a. generated in dead bodies by the processes of putrefaction. [B.] See **PTOMAIN**.—**Cinchona a's.** See under **CINCHONA**.—**Glucoside a.** A substance which shows the properties and reactions of an a., but like a glucoside, can be decomposed by dilute acids into glucose and another compound. [B. 4.]

**ALKALOÏDAL**, adj.  $A^2l\text{-}ka^2l\text{-}oid\text{-}a^2l$ . Having the properties of an alkaloïd. [D. 90.]

**ALKALOÏDES**, **ALKALOÏDEUM** (Lat.), n's n.  $A^2l\text{-}(a^2l)\text{-}ka^2l\text{-}oid\text{-}(e^2z\text{-}de^2s)$ ,  $i^2d\text{-}e^2z\text{-}u^2m\text{-}(u^2m)$ . An alkaloïd.—**Alkaloïdea acris**. 1. Poisons containing strychnine, brucine, nux vomica, or veratrine. [Belg. Ph. (B. 95).] 2. A general term for tobacco, conium, veratrum, colchicum, aconite, and digitalis. [Russ. Ph. (B. 95).]—**Alkaloïdea narcotica**. 1. The narcotics, morphine, opium, stramonium, belladonna, hyoscyamus, scutella, conium, *Lactuca virosa*, etc. [Belg. Ph. (B. 95).] 2. Opium and its preparations.

[Rom. Ph. (B. 95).] 3. Belladonna, opium, hyoscyamus, nux vomica, and stramonium. [Russ. Ph. (B. 95).]

**ALKALOIMETER** (Ger.), n.  $A^2l\text{-}ka^2l\text{-}o\text{-}i^2m\text{-}e^2t\text{-}e^2r$ . A form of alkalimeter (q. v.) devised by O. Henry, for determining the quantity of alkaloïd in a solution, in which a solution of tannin is used instead of an acid. [D. 12.]

**ALKALURETIC**, adj.  $A^2l\text{-}ka^2l\text{-}u^2r\text{-}e^2t\text{-}i^2k$ . Promoting the secretion of alkaline urine (said of drugs). [B. 20.]

**ALKAMYE**, n. The mixed metal alchemy (q. v.). [Prompt. Parv. (D. 122).]

**ALKITRON**, n. See **ALEMBROTH**.

**ALKANET**, n.  $A^2l\text{-}ka^2n\text{-}e^2t$ . From Fr., *orcanette*, or *organette*. Lat., *alkanna*. Fr., *organette* [Fr. Cod.]. Ger., *Ochsenzunge*. It., *organetta*. Sp., *orcaneta*. A commercial name for several different plants belonging to the genera *Anchusa* (*Alkanna*, *Lithospermum*) and *Lawsonia*. [B.]—**A. green**. Fr., *vert d'alkanna*. Ger., *Alkannagrün*. A substance obtained by evaporating a tincture of a root. In ethereal solution it gives a green color. [D. 115.]—**A. root**. See *Dyers' a.*—**Bastard a.** *Lithospermum arvense*. [B. 71.]—**Dyers' a.**, **False a.** Lat., *radix alkannæ spuria*. Fr., *orcanette, organette* [Fr. Cod.]. Ger., *Alkannawurzel, unechte Alkanna*. It., *organetta, ancusa*. Sp., *orcaneta*. The root of *Anchusa tinctoria* (q. v.). [B.]—**Garden a.**, **Officinal a.** See *ANCHUSA officinalis*.—**True a.** Lat., *alkanna vera*. Ger., *echte Alkanna, Hennastrauch*. The leaves and root of *Lawsonia inermis* or *L. alba*.

**ALKANIN**, n. See **ALKANNIN**.

**ALKANNA** (Lat.), n. f.  $A^2l\text{-}(a^2l)\text{-}ka^2n\text{-}(ka^2n\text{'})na^2$ . From Ar., *al-khennā*, the *Lawsonia inermis*. Ger., *Alkanna, Alkanne*. It., *alcanna*. Sp., *alcana*. 1. Isinglass. [D. 119.] 2. Alkanet; a genus of boraginaceous plants separated by Tausch from *Anchusa*, from which it is distinguished by the absence of scales at the throat of the corolla and the absence of an excavation at the base of the nuts. [B. 19, 49.]—**Aechte a.** (Ger.). See *A. vera*.—**A-blätter** (Ger.). A. leaves. See *LAWSONIA inermis*.—**Alkannæ radix**, **Alkannæ spuria radix**. See *Radix alkannæ*.—**Alkannæ veræ radix**. See *Radix alkannæ veræ*.—**A-grün**. See *ALKANET green*.—**A. leaves**. Henna leaves. See *LAWSONIA inermis*.—**A. major latifolia dentata**. *Prinos verticillatus*. [D. 90.]—**A. Matthioli** [Tausch]. A species closely resembling *A. (Anchusa) tinctoria*. [B. 180.]—**A. orientalis**. Ger., *orientalische a., morgenländische a.* See *A. vera*.—**A. red**. Ger., *Alkannaroth*. It., *rosso di alcanna*. See *ANCHUSIC ACID*.—**A. spinosa** (Gärtner). *Lawsonia inermis*. [B. 173.]—**A. spuria**. False alkanet (*Anchusa tinctoria*). [D. 90.]—**A. tinctoria** [Tausch]. *Anchusa tinctoria*. [B.]—**A. vera**. Ger., *echte a.* True alkanet; the *Lawsonia inermis* and *L. alba*. [D.]—**A. vulgaris**. *Anchusa tinctoria*. [B.]—**A-wurzel** (Ger.). See the major list.—**Echte a.** (Ger.). See *A. vera*.—**Färbende a.** (Ger.). See *A. tinctoria*.—**Morgenländische a.**, **Orientalische a.** (Ger.). Oriental or true a. [B. 180.]—**Radix alkannæ**. Fr., *orcanette*. Ger., *Alkannawurzel, unechte Alkannawurzel*. The root of *Anchusa tinctoria*. [B.]—**Radix alkannæ orientalis**. See *Radix alkannæ veræ*.—**Radix alkannæ spuria**. See *Radix alkannæ*.—**Radix alkannæ veræ**. Ger., *echte Alkannawurzel*. The root of *Lawsonia inermis*. [B.]—**Vert d'a.** (Fr.). See *ALKANET green*.

**ALKANNAWURZEL** (Ger.), n.  $A^2l\text{-}ka^2n\text{'na}^2\text{-}vurtz\text{-}e^2l$ . Alkanet; radix alkannæ. [B.]—**Echte a.** See *Radix ALKANNE veræ*.—**Falsche a.**, **Uechte a.** See *Radix ALKANNE spuria*.

**ALKANNIN**, n.  $A^2l\text{-}ka^2n\text{'ni}^2n$ . A principle contained in *Alkanna (Anchusa) tinctoria*. [B.] See *ANCHUSIC ACID*.

**ALKAT**, n. An alchemical term for mercury; also a kind of ink. [Ruland (D. 83, 135).]

**ALKANTHUM**, **ALKANTUM** (Lat.), n's n.  $A^2l\text{-}(a^2l)\text{-}ka^2n\text{-}(ka^2n\text{'})tu^2m\text{-}(thu^2m)$ ,  $-tu^2m\text{-}(tu^2m)$ . Alchemical terms for (a) æs ustum; (b) a sort of arsenic, or arsenical preparation. [Ruland (D. 83, 105).]

**ALKANZI**, n. A sort of confection or electuary described by Mesuen. [D. 83.]

**ALKAPTONE**, n.  $A^2l\text{-}ka^2p\text{'ton}$ . Fr., *alcaptone*. Ger., *Alkapton*. An amorphous, brownish or yellow, nitrogenous substance discovered by Bodecker in the urine under certain pathological conditions. It stains the linen, particularly when the urine becomes alkaline, is readily soluble in water and in alcohol, and presents some of the reactions of glucose, reducing copper salts like the latter, but not fermenting with yeast, and when treated with cold liquor potassæ, striking a dark-brown color, the coloration proceeding from the surface of the liquid downward. ["Brit. Med. Jour.," Jan. 7, 1882; B. 107; K. 16.]

**ALKAPTONHARN** (Ger.), n.  $A^2l\text{-}ka^2p\text{'ton}\text{'ha}^2rn$ . Urine which contains alkaptone. [D. 18.]

**ALKAPTONURIA** (Lat.), n. f.  $A^2l\text{-}(a^2l)\text{-}ka^2p\text{-}(ka^2p)\text{-}to^2n\text{-}u^2r\text{-}i^2a^2$ . From *ALKAPTONE* and *ούρην*, to micturate. Fr., *alkaptonurie*. Ger., *Alkaptonurie*. The morbid condition in which alkaptone is present in the urine. [D. 87.]

**ALKAR**, n. See **ALCAR**.

**ALKARA**, n. See **ALCARA**.

**ALKARANUM** (Lat.), n. n.  $A^2l\text{-}(a^2l)\text{-}ka^2r\text{-}(ka^2r)\text{-}a\text{-}(a^2)\text{'nu}^2m$  ( $nu^2m$ ). An alchemical term for antimony. [B. 87; D. 83.]

**ALKARGEN**, n.  $A^2l\text{-}ka^2r\text{'je}^2n$ . From *alkarsine* (q. v.), and *γενάρ*, to beget. Cacodylic acid generated by the action of water upon alkarsine. [B. 48.]

**ALKARMES**, n. See **ALKERMES**.

**ALKARSINE**, n.  $A^2l\text{-}ka^2r\text{'si}^2n$ . From *alcohol* (Ger., *Alkohol*), and *arsenic*, because it was regarded as an alcohol in which arsenic replaced oxygen. Fr., *alcarsine*. Ger., *Alkarsin*. Syn.: *Cadet's*

*fuming arsenical liquid*. Bunsen's name for a liquid, first obtained by Cadet in 1760, prepared by the action of arsenic trioxide upon potassium acetate; a foetid, brown-red, oily liquid, very poisonous and spontaneously inflammable, consisting of a variable mixture of cacodyl and its oxide. [B, 2, 3.]

**ALKARVA**, n. An old name for the *Ricinus communis*. [B, 87.]

**ALKASA**, n. Probably from Ar., *al-qarāṣ*, a gourd. An alchemical term for a crucible. [B; Ruland (D, 83, 135).] Cf. *ALCARA*.

**ALKATRAN**, n. See *ALCHITRAN*.

**ALKAUT**, n. An old term for mercury. [B, 87.]

**ALKAZOAL**, n. See *ALKASA*.

**ALKÉKENGE** (Fr.), n.  $A^1$ -ka-ka<sup>2</sup>n<sup>2</sup>zh. Alkekengi. [B.]—*A. coqueret* [Fr. Cod.]. The *Physalis alkekengi*. [B.]

**ALKÉKENGİ**, n.  $A^1$ -ke<sup>2</sup>-ke<sup>2</sup>n<sup>2</sup>ji<sup>2</sup>. From Ar., *al-kākenj*. Lat., *alkekengi*. Fr., *alkekenge*, *alkekenge coqueret*. Ger., *Judenkirsche*. It., *alchechengi*. Sp., *alquequenje*. Also written *alchechingi*. The winter-cherry, or *Physalis* a. (q. v.), the *A. officinarum* of Tournefort, *A. Tournefortii* and *A. vulgaris* of others. A number of varieties are described by the older writers, such as *A. officinarum*, or the variety found commonly in the shops; *A. officinarum foliis variegatis*, a variety with variegated leaves; *A. fructu parvo verticillato*, with small fruit arranged in whorls upon the stalk; *A. virginianum fructu luteo*, a Virginian variety with yellow fruit; *A. indicum majus*, *A. americanum annuum ramosissimum fructu ex luteo virescenti*, an annual American variety with fruit changing from yellow to green; *A. americanum annuum maximum viscosum*, a large American variety; *A. barbadense patulum, parvo flore, fructu amplo, microne productiori*, a dwarf species from Barbadoes with a small flower and broad pointed fruit; *A. carassavicum, foliis origani incanis, flore viete sulphurea, fundo purpureo*, a species from Curaçao, with leaves resembling those of the *origanum*, and sulphur-yellow flowers, purple at the bottom; and *A. americanum frutescens, fructu globoso rubro, vesica atro-purpurea*, a shrubby American variety, with globose red fruit, having a dark-purple bladder. Some of these varieties are probably to be referred to distinct species of *Physalis*. [B, 200.]—*Baccæ a.* (Lat.). Winter-cherries; the fruit of *Physalis* a.—*Trochisci a.* (Lat.). Troches made up of fruit of *Physalis* a. 3 drs., gum arabic, tragacanth, oilbalm, pine-nuts, sweet almonds, starch, licorice, Armenian bole, and white-poppy seeds, of each, 6 drs., the seeds of melons, cucumbers, watermelons, and gourds, each, 3½ drs., and the seeds of smallage and of white henbane, white amber, Lemnian earth, and opium, each, 2 drs., mixed into a paste with a sufficient quantity of the fresh juice of the fruit of *Physalis* a. [B, 200.]

**ALKÉKENGİN**, n.  $A^1$ -ke<sup>2</sup>-ke<sup>2</sup>n<sup>2</sup>ji<sup>2</sup>n. Fr., *alkekengine*. Ger., *Alkekengin*. Phyalin. [B.]

**ALKÉKENGİNE** (Fr.), n.  $A^1$ -ka-ka<sup>2</sup>n<sup>2</sup>-zhen. Alkekengin. [B.]—*A. silicée*. Silicated alkekengin; a compound of alkekengin with silica, such as is thought to be present in Laville's pills. [B; D.]

**AL-KĒMELYEH** (Ar.), n. See *ALCHEMILLA*.

**ALKEN** (Ar.), n. Faulty enunciation. [D, 14.]

**ALKENYL**, n.  $A^1$ -ke<sup>2</sup>n<sup>2</sup>-i<sup>2</sup>. For deriv., see *ALCOHOL* and *-enyl*°. Ger., *Alkenyl*. A generic term for the trivalent series of hydrocarbons having the general formula  $C_nH_{2n+1}.CH=CH-$ . The chief members of this series are ethenyl and isobutenyl. [B, 4.]

**ALKERMES**, n.  $A^1$ -ku<sup>2</sup>mez. From Ar., *al-qirmiz*, from Sansc., *krimidja*, produced by a worm. Lat., *alkermes*. Fr., *alkermès*. It., *alcherme*. Sp., *alquermes, alquermes*. Also written *alchermes* and *kermes*. 1. A variety of the cochineal insect found in the Morea. See *KERMES*. 2. A name applied to various preparations containing either kermes or cochineal. [B.] See *Confectio a. et Elisir a.*—*A. aurificum minerale, A. minerale* (Lat.). See *KERMES mineral*.—*Confectio a.* (Lat.). Fr., *confection d'alkermès*. It., *electuario di alcherme*. Syn.: *confectio margaritarum kermesina*. A confection made by boiling sugar and kermes grains, each, 480 parts, with 300 parts of apple-juice, straining and adding aloes-wood and cinnamon, each, 22 parts, lapis lazuli and pearls, of each, 6 parts, gold leaf and ambergris, each, 1½ part, sugar 7 parts, and musk ½ part [Palat. Disp. (B, 119)]. The Br. Ph. has the same formula, omitting the lapis lazuli, pearls, and gold leaf, and with the addition of 2 parts of cochineal and a few drops of the *oleum tartari per deliquum*. The Turin Ph. prescribes 21 parts, each, of cinnamon and kermes, 14 parts, each, of yellow saunders and red coral, and 443 parts of syrup of kermes; the Sp. Ph., 7 parts, each, of pearls and lapis lazuli, 21 parts, each, of aloes-wood and cinnamon, and 518 parts of inspissated syrup of kermes; the Würtemb. Ph., juice of kermes 1,000 parts, rose-water 180 parts, oil of cinnamon ½ part, and sugar 360 parts; the Parma Cod., cassia lignea 14 parts, red roses 10½ parts, cinnamon 27 parts, cochineal 3¼ parts, and syrup of kermes 323 parts; the Amsterd. Ph., syrup of kermes 554 parts, and aloes-wood and cinnamon, of each, 23 parts. [B, 119.]—*Elisir a.* (Lat.). *Elisir of a.*, *Liquid a.* Fr., *élisir d'alkermès*. It., *elisire di alcherme*. A preparation made by digesting cloves and cinnamon, each, 11 parts, and vanilla 7 parts, in 1,080 parts of alcohol, adding a tincture made with cochineal 15 parts, alum 1½ parts, and alcohol 180 parts, continuing the digestion for 3 days, and adding cinnamon-water 720 parts, and sugar 2,000 parts. [Ferrara Ph. (B, 119).]—*Troches of a.* Fr., *trochisques d'alkermès*. Troches made of confection of a. 45 parts, lac 11 parts, amber and musk, each, 0.6 part, sugar 540 parts, and sufficient mucilage of tragacanth formed with rose-water. [Palat. Disp., Würtemb. Ph., 1798 (B, 119).]

**ALKERMÈS** (Fr.), n.  $A^1$ -kar-me<sup>2</sup>s. Alkermes. *A. liqvide*. See *Elisir ALKERMES*.—*Confection d'a.*, *Electuaire d'a.* See *Confectio ALKERMES*.—*Elisir d'a.* See *Elisir ALKERMES*.—*Trochisques d'a.* See *Troches of ALKERMES*.

**ALKERVA**, n. See *ALKARVA*.

**ALKES**, n. See *ÆS ustum*.

**ALKETRAN**, n. See *ALCHITRAN*.

**ALKHALI**, n. See *ALKALI*.

**ALKIAN**, n. An alchemical term for a spirit supposed to reside in man and to carry on the processes of digestion and nutrition. [B, 200.]

**ALKIBIADION** (Lat.), n. n. See *ALCIBIADION*.

**ALKIBRIC**, **ALKIBRIK**, n's. Ar., *al-kibrit*, sulphur. Also written *alchibric*, *alchibert*, *alchabrie*. Alchemical terms for sulphur. [B, 50.]

**ALKIMIA** (Lat.), n. f.  $A^1$ -(a<sup>2</sup>l)-ki<sup>2</sup>m<sup>2</sup>/i<sup>2</sup>-a<sup>2</sup>. 1. Alchemy. [B.] 2. A powder made from basilicon. [Ruland (D, 83).]

**ALKIN**, n. 1. An alchemical term for potash ("cinis clavellatus"). [B, 50.] 2. Coal-smoke. [B, 87.]

**ALKI PLUMBI** (Lat.), n. n.  $A^2$ -(a<sup>2</sup>l)'ki<sup>2</sup> plu<sup>2</sup>m(plu<sup>2</sup>m)/bi(be). An old term for acetate of lead. [D, 107.]

**ALKIR**, n. See *ALKIN*.

**ALKITRAM**, **ALKITRAN**, n's. See *ALCHITRAN*.

**ALKITRUM** (Lat.), n. n.  $A^1$ -(a<sup>2</sup>l)'ki<sup>2</sup>-tu<sup>2</sup>-ru<sup>2</sup>m(ru<sup>2</sup>m). See *ALCHITRAN*.

**ALKOEL**, n. For deriv., see *ALCOHOL*. 1. A kind of fine lead ore. 2. Lapis lazuli. 3. Antimony. [B, 200; Ruland (D, 83).]

**ALKOFOL**, n. See *ALCOHOL*.

**ALCOHOL** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l. Alcohol. The same form is occasionally used in Latin and English. [B.]—**Absoluter a.** Absolute alcohol. [B.]—**A<sup>2</sup>ther.** Acetone; so called because supposed to be intermediate in constitution between an alcohol and an ether. [B, 78.] Cf. *MESTRE*.—**A<sup>2</sup>mblyopie.** Alcoholic amblyopia. [D.]—**A<sup>2</sup>artig.** Alcoholic. [D.]—**A<sup>2</sup>dyscrasie.** Alcoholic dyscrasia; chronic alcoholism. [B; D.]—**A<sup>2</sup>haltig.** Alcoholic. [D.]—**A<sup>2</sup>messer.** Alcoholometer. [D, 129.]—**A<sup>2</sup>säuren.** The group of fatty acids (acetic acid, propionic acid, etc.) derived from the alcohol radicals. [B, 165.]—**A<sup>2</sup>vergiftung.** Poisoning by alcohol. [D, 12.]—**A<sup>2</sup>ydrollyton** (Lat.). See *COHOLYDROLYTON*.—**Aromatischer a.** See *Aromatic ALCOHOL*.—**Destillirter a.** Distilled alcohol. [B.]—**Dibasischer a., Dihydricer a.** Dihydric alcohol. [B.] See *Diatomic ALCOHOL*.—**Diprimärer a.** See *Diprimary ALCOHOL*.—**Disekundärer a.** See *Secondary ALCOHOL*.—**Ditertiärer a.** See *Tertiary ALCOHOL*.—**Drelatomiger a., Dreibasischer a., Dreiwerthiger a.** Triatomic, tribasic, and triacid alcohol [B.] See *Triatomic ALCOHOL*.—**Einatomiger a., Einbasischer a., Einwerthiger a.** Monatomic, monobasic, and monacid alcohol. [B.] See *Monatomic ALCOHOL*.—**Essig<sup>2</sup>a.** Alcohol aceti; acetic acid. [B.]—**Fünfatomiger a., Fünfbasischer a.** Pentatomic, pentabasic alcohol. [B.] See *Pentatomic ALCOHOL*.—**Gewöhnlicher a.** Ordinary alcohol. [B.] See *ETHYL ALCOHOL*.—**Hexabasischer a., Hexahydricer a.** Hexabasic, hexahydric alcohol. [B.] See *Hexatomic ALCOHOL*.—**Kautischer a.** See *Caustic ALCOHOL*.—**Krystallisations<sup>2</sup>a.** See *ALCOHOL of crystallization*.—**Mehratomiger a., Mehrbasischer a., Mehrwerthiger a.** Polyatomic, polybasic alcohol. [B.] See *Polyatomic ALCOHOL*.—**Monobasischer a., Monohydricer a.** Monobasic, monohydric alcohol. [B.] See *Monatomic ALCOHOL*.—**Normaler a.** See *Normal ALCOHOL*.—**Pentabasischer a., Pentahydricer a.** Pentabasic, pentahydric alcohol. [B.] See *Pentatomic ALCOHOL*.—**Polyatomiger a., Polybasischer a., Polyhydricer a.** Polyatomic, polybasic, and polyhydric alcohol. [B.] See *Polyatomic ALCOHOL*.—**Primärer a.** See *Primary ALCOHOL*.—**Primärsekundärer a.** See *Primary-secondary ALCOHOL*.—**Primärtertiärer a.** See *Primary-tertiary ALCOHOL*.—**Pseudoa<sup>2</sup>.** See *Pseudo-ALCOHOL*.—**Rectificirter a.** Rectified spirit. [B.]—**Schwefela<sup>2</sup>.** See *Alcohol SULPHURIS*.—**Sechsatomiger a., Sechsbasischer a., Sechswerthiger a.** Hexatomic, hexabasic, and hexacid alcohol. [B.] See *Hexatomic ALCOHOL*.—**Sekundärer a.** See *Secondary ALCOHOL*.—**Sekundärtertiärer a.** See *Secondary-tertiary ALCOHOL*.—**Tertiärer a.** See *Tertiary ALCOHOL*.—**Tetrabasischer a., Tetrahydricer a.** Tetrabasic, tetrahydric alcohol. [B.] See *Tetratomic ALCOHOL*.—**Thioa<sup>2</sup>.** See *Thio-ALCOHOL*.—**Tribasischer a., Trihydricer a.** Tribasic, trihydric alcohol. [B.] See *Triatomic ALCOHOL*.—**Verdünnter a.** Dilute alcohol. [B.]—**Vieratomiger a., Vierbasischer a., Vierwerthiger a.** Tetraatomic, tetrabasic, and tetracid alcohol. [B.] See *Tetratomic ALCOHOL*.—**Wasserfreier a.** Absolute alcohol. [B.]—**Wässriger a.** Aqueous (dilute) alcohol. [B.]

**ALCOHOLAT** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-a<sup>2</sup>t. Alcololate.

**ALCOHOLATUR** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-a<sup>2</sup>-tur. See *ALCOOLATURE*.

**ALCOHOLIC**, adj.  $A^1$ 'ko-ho<sup>2</sup>l'i<sup>2</sup>k. See *ALCOHOLIC*.

**ALCOHOLISATION** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-i<sup>2</sup>-za<sup>2</sup>tz-i<sup>2</sup>-on'. Alcoholization. [D, 12.]

**ALCOHOLISCH** (Ger.), adj.  $A^1$ 'ko-ho<sup>2</sup>l'i<sup>2</sup>sh. Alcoholic.

**ALCOHOLISIREN** (Ger.), v. tr.  $A^1$ 'ko-ho<sup>2</sup>l-i<sup>2</sup>-ze-er'e<sup>2</sup>n. To alcoholize. [D, 77.]

**ALCOHOLISIRUNG** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-i<sup>2</sup>-ze-er'ung. Alcoholization. [D, 77.]

**ALCOHOLISMUS** (Lat.), n. m. See *ALCOHOLISMUS*.

**ALCOHOLIST** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-i<sup>2</sup>st'. One suffering from alcoholism. [Fürstner (B, 137).]

**ALCOHOLOMETER** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-o<sup>2</sup>m-at'e<sup>2</sup>r. Alcoholometer. [D.]

**ALCOHOLOMETRIE** (Ger.), n.  $A^1$ 'ko-ho<sup>2</sup>l-o<sup>2</sup>-me<sup>2</sup>t'r'e. Alcoholometry.

**ALCOHOLOMETRISCH** (Ger.), adj.  $A^1$ 'ko-ho<sup>2</sup>l-o<sup>2</sup>-me<sup>2</sup>t'r'i<sup>2</sup>sh. Alcometrical. [B.]

**ALKOL**, n.  $A^{21}/ko^{21}$ . 1. An old name for alcohol. 2. Also tartar. 3. The essence or immost part of anything. "Purior substantia rei, segregata ab impuritate sua." [Theophrastus (B, 50).]

**ALKOOL**, n. See **ALCOHOL** (2d def.).

**ALKOOLISER** (Fr.), v. tr. See **ALCOOLISER**.

**ALKOOSHI** (Bengali), n. *Mucuna pruriens*. [B, 172.]

**ALKOPHYRE**, n.  $A^{21}/ko^{21}$ -fir. See **ALCOPHYRE**.

**ALKORNIN** (Ger.), n.  $A^{21}$ -ko<sup>21</sup>-rn-en'. See **ALCORNIN**.

**ALKORNOKRINDE** (Ger.), n.  $A^{21}$ -kor<sup>21</sup>-no<sup>21</sup>-k-ri<sup>21</sup>-n-de<sup>21</sup>. Alcornoque bark. [D.]

**ALKOSOR**, n. An alchemical term for camphor. [B, 50.]

**ALKOUBA** (Ar.), n. Eczema. [G.]

**ÁLKUSI** (Bengali), n. See **ALKOOSHI**.

**ALKYI**, n. See **ALKI PLUMBI**.

**ALKYL**, n.  $A^{21}/ki^{21}$ . Ger., *Alkyl*. The radicle of a monatomic alcohol; a hydrocarbon, like ethyl, methyl, etc., of the general formula  $C_nH_{2n+1}$ , which by combination with hydroxyl produces an alcohol. [B, 4.]—**A. allophanate**. Ger., *Alkylallophanat*. Syn.: *allophanic ether*. A compound of an a. with allophanic acid, of the general formula  $NH_2-CO-NH-CO-O.C_nH_{2n+1}$ . [B, 4.] See **ETHYL allophanate**, etc.—**A. amine**. See the major list.—**A. arsenate**. Ger., *Alkylarsenat*. A compound of an a. with arsenic acid, of the formula  $AsO_4H_2.C_nH_{2n+1}$  (hydric dialkyl or monalkyl arsenates),  $AsO_4H.C_nH_{2n+1}$  (hydric dialkyl or monalkyl arsenates),  $AsO_4(C_nH_{2n+1})_2$  (trialkyl arsenates). [B, 4.]—**A. arsenite**. Ger., *Alkylarsenit*. A compound of an a. with arsenious acid. Such compounds have the formulae  $AsO_3H_2.C_nH_{2n+1}$  (monalkyl arsenites),  $AsO_3H.C_nH_{2n+1}$  (dialkyl arsenites), and  $AsO_3(C_nH_{2n+1})_2$  (trialkyl arsenites). [B, 4.]—**A. arsine**. Ger., *Alkylarsin*. An arsine in which an a. replaces hydrogen. These compounds resemble in structure the alkylamines, and are similarly designated as *primary*, *secondary*, and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are replaced by an a. [B, 4.]—**A. borate**. Ger., *Alkylborat*. A compound of an a. with boric acid. See **ETHYL borate**, **METHYL borate**.—**A. bromide**. Ger., *Alkylbromid*. A compound of an a. with bromine, having the general formula  $C_nH_{2n+1}.Br$ . [B, 4.]—**A. carbonate**. Ger., *Alkylcarbonat*. A compound of an a. with carbonic acid. [B, 4.] See **URETHANE**.—**A. carbamate**. Ger., *Alkylcarbonat*. A compound of an a. with carbonic acid. Such compounds have the general formulae  $CO_4(C_nH_{2n+1})_4$  (tetraalkyl carbonates),  $CO_3(C_nH_{2n+1})_3$  (dialkyl carbonates), and  $CO_3R(C_nH_{2n+1})$  (metallic alkyl carbonates). [B, 4.]—**A. chloride**. Ger., *Alkylchlorid*. A compound of an a. with chlorine, of the general formula  $C_nH_{2n+1}.Cl$ . [B, 4.]—**A. cyanamide**. Ger., *Alkylcyanamid*. A cyanamide in which an a. replaces hydrogen: a body of the constitution  $(C\equiv N)-(C_nH_{2n+1})_2$ . [B, 4.]—**A. cyanate**. Ger., *Alkylcyanat*. A compound of an a. with cyanic acid, having the formula  $(C\equiv N)-O.C_nH_{2n+1}$ . [B, 4.]—**A. cyanide**. Ger., *Alkylcyanür*. A compound of an a. with cyanogen. [B, 4.] See **ACIDYL NITRILE**.—**A. cyanurate**. Ger., *Alkylcyanurat*. A compound of an a. with cyanuric acid, having the general formula  $C_3N_3(O.C_nH_{2n+1})_3$ . [B, 4.]—**A. guanidine**. Ger., *Alkylguanidin*. A compound in which one or more hydrogen atoms in guanidine are replaced by an a. [B, 4.]—**A. haloid**. Ger., *Alkylhaloid*. A compound of an a. with a haloid. [B, 4.] See **A. bromide**, **A. chloride**, and **A. iodide**.—**A. harnstoff** (Ger.). See **A. urea**.—**A. hydrate**. Ger., *Alkylhydrat*. See **ALCOHOL**.—**A. hydrazine**. Ger., *Alkylhydrazin*. A compound of an a. with the body  $NH_2-NH_2$ . These bodies may be either *primary*, having the constitution  $NH_2-NH.C_nH_{2n+1}$ , or *secondary* and having the formula  $NH_2-N(C_nH_{2n+1})_2$  (*unsymmetrical hydrazines*), or  $NH(C_nH_{2n+1})_3$  (*symmetrical hydrazines*). [B, 4.] See **HYDRAZINE**.—**A. iodide**. Ger., *Alkyljodür*. A compound of an a. with iodine, having the constitution  $C_nH_{2n+1}.I$ . [B, 4.]—**A. isocyanate**. Ger., *Alkylisocyanat*. See **A. pseudocyanate**.—**A. isocyanide**. Ger., *Alkylisocyanür*. A compound of an a. with isocyanogen, having the formula, isomeric with that of the a. cyanides,  $C\equiv N-C_nH_{2n+1}$ . [B, 4.]—**A. isocyanurate**. Ger., *Alkylisocyanurat*. A compound of an a. with isocyanuric acid. [B, 4.]—**A. isosulphocyanate**. A. *Isosulphocyanat*. Ger., *Alkylisosulphocyanat*, *Alkylisosulphocyanat*. A mustard-oil. A compound, isomeric with the corresponding a. thiocyanate, having the constitution  $S-C\equiv N-C_nH_{2n+1}$ . [B, 4.]—**A. iodür** (Ger.). See **A. iodide**.—**A. metaborate**. Ger., *Alkylmetaborat*. A compound of an a. with metaboric acid. [B, 4.]—**A. mustard-oil**. Ger., *Alkylsenföl*. See **A. isothiocyanate**.—**A. nitrate**. Ger., *Alkylnitrat*. A compound of an a. with nitric acid, of the general formula  $C_nH_{2n+1}.NO_3$ . [B, 4.] Cf. **ETHYL nitrate**.—**A. nitrite**. Ger., *Alkylnitrit*. A compound of an a. with nitrous acid, having the constitution  $C_nH_{2n+1}.NO_2$ . [B, 4.] Cf. **ETHYL nitrite**.—**A. orthoborate**. Ger., *Alkylorthoborat*. A compound of an a. with orthoboric acid. [B, 4.] See **ETHYL borate**.—**A. orthophosphate**. Ger., *Alkylorthophosphat*. A compound of an a. with orthophosphoric acid. See **A. phosphate**.—**A. oxide**. Ger., *Alkyl-oxid*. A compound of an a. and oxygen: a simple ether. [B, 4.] See **ETHER**.—**A. persulphide**. Ger., *Alkylpersulfid*. A compound of an a. with an excess of sulphur: a body having the constitution  $(C_nH_{2n+1})_2S_2$ . [B, 4.]—**A. phosphate**. Ger., *Alkylphosphat*. A compound of an a. with phosphoric acid. Such compounds are constituted and named like the analogous a. arsenates. [B, 4.]—**A. phosphine**. Ger., *Alkylphosphin*. A phosphine in which an a. replaces hydrogen. These compounds resemble in structure the alkylamines, and are similarly designated as *primary*, *secondary*, and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are thus replaced. [B, 4.]—**A. phosphite**. Ger., *Alkylphosphit*. A compound of an a. with phosphorous acid. Such compounds are constituted and named like the analogous a. arsenites. [B, 4.]—**A. pseudocyanate**. Ger., *Alkylpseudocyanat*. A compound of an a. with isocyanic (pseudocyanic) acid, having the general formula  $O=C\equiv N.C_nH_{2n+1}$ , and isomeric with the corresponding cyan-

ate. [B, 4.]—**A. pseudothiocyanate**. See **A. isothiocyanate**.—**A. schwefelsäure** (Ger.). See **A. sulphuric acid**.—**A. senföl** (Ger.). A mustard-oil. [B, 4.] See **A. isothiocyanate**.—**A. silicate**. Ger., *Alkylsilicat*. A compound of an a. with silicic acid. [B, 4.]—**A. stibine**. Ger., *Alkylstibin*. A stibine in which an a. replaces hydrogen. These stibines resemble the alkylamines in structure and are similarly designated as *primary*, *secondary* and *tertiary*, according as 1, 2, or 3 atoms of hydrogen are replaced. [B, 4.]—**A. sulfat**, **A. sulphydrat**, **A. sulfid**, **A. sulfinsäure**, **A. sulfid**, **A. sulfocyanat**, **A. sulfonsäure**, **A. sulfür** (Ger.). See **A. sulfate**, **A. sulphhydrate**, **A. sulphine**, **A. sulphinic acid**, **A. sulphite**, **A. sulphocyanate**, **A. sulphonic acid**, **A. sulphide**.—**A. sulphate**. Ger., *Alkylsulfat*. A compound of an a. with sulphuric acid, having the general formula  $(C_nH_{2n+1})_2SO_4$  (normal sulphates), or  $C_nH_{2n+1}.HSO_4$  (acid or hydric a. sulphates, *alkylsulphuric acids*). [B, 4.]—**A. sulphide**. Ger., *Alkylsulfid*, *Alkylsulfid*. Syn.: *thioether*. A compound of an a. with sulphur, having the general formula  $(C_nH_{2n+1})_2S$ , or that of an ether in which sulphur replaces oxygen. [B, 4.]—**A. sulphine**. Ger., *Alkylsulfid*. A trivalent radicle formed by the union of 3 molecules of an alkyl with sulphur,  $(C_nH_{2n+1})_3S$ . [B, 4.]—**A. sulphinic acid**. Ger., *Alkylsulfinsäure*. A sulphinic acid of the general formula  $C_nH_{2n+1}.SO.OH$ . [B, 4.]—**A. sulphite**. Ger., *Alkylsulfid*. A compound of an a. with sulphurous acid, having in general the formula  $(C_nH_{2n+1})_2SO_3$ . [B, 4.]—**A. sulphocyanate**. Ger., *Alkylsulfocyanat*. See **A. thiocyanate**.—**A. sulphonic acid**. Ger., *Alkylsulfonsäure*. A sulphonic acid of the composition  $C_nH_{2n+1}.SO_3.OH$ . [B, 4.]—**A. sulphurea**. See **A. thiourea**.—**A. sulphuric acid**. Ger., *Alkylschwefelsäure*. The acid a. sulphates, so called because they act like monobasic acids. [B, 4.] Cf. **ETHYL sulphuric acid** and **ETHYL sulphate**.—**A. sulphydrat**. Ger., *Alkylsulphydrat*. A mercaptan. [B, 4.]—**A. thiocyanate**. Ger., *Alkylthiocyanat*. A compound of an a. with thiocyanic acid, having the general formula  $N\equiv C-S-C_nH_{2n+1}$ . [B, 4.]—**A. thiourea**. Ger., *Alkylthioharnstoff*. Thiourea in which 1 or 2 atoms of hydrogen are replaced by an a. [B, 4.]—**A. urea**. Ger., *Alkylharnstoff*. A compound consisting of urea in which 1, 2, or 3 atoms of hydrogen are replaced by an a. [B, 4.]

**ALKYLAMINE**, n.  $A^{21}$ -ki<sup>21</sup>-a<sup>21</sup>-m-i<sup>21</sup>-n. From *alkyl* and *amine*. Ger., *Alkylamin*. A body having the constitution of ammonia in which an alkyl replaces hydrogen. The a's are designated, according as 1, 2, or 3 atoms of hydrogen are thus replaced, as *primary* a's (*monalkylamines*, a's of the general formula  $NH_2.C_nH_{2n+1}$ ); *secondary* a's (*dialkylamines*, a's of the general formula  $NH(C_nH_{2n+1})$ ); and *tertiary* a's (*trialkylamines*, a's of the general formula  $N(C_nH_{2n+1})_3$ ). [B, 4.] Cf. also **TETRAALKYLAMMONIUM**.

**ALKYLATE**, n.  $A^{21}/ki^{21}$ -at. Ger., *Alkylat*. A compound derived from a monatomic alcohol by the substitution of a metal for the hydroxylic hydrogen. The general formula of the a's is  $(C_nH_{2n+1}O)_x.R$ , where R is a radicle the quantivalence of which is p. [B, 4.] See **ETHYLATE** and **METHYLATE**.

**ALKYLENE**, n.  $A^{21}/ki^{21}$ -en. Ger., *Alkylen*. A hydrocarbon of the general formula  $C_nH_{2n+1}.CH=CH_2$ , which in composition acts as a bivalent radicle,  $C_nH_{2n+1}.CH=CH_2$ . [B, 4.] See **ETHYLENE**, **METHYLENE**, etc.

**ALKYLIC**, adj.  $A^{21}$ -ki<sup>21</sup>-ik. Of or pertaining to an alkyl. [B, 4.]

**ALKYLIDENE**, n.  $A^{21}$ -ki<sup>21</sup>-id-en. Ger., *Alkyliden*. A bivalent hydrocarbon radicle of the general formula  $C_nH_{2n+1}.CH_2-CH_2$ . [B, 4.] See **ETHYLIDENE**, etc.

**ALKYMA** (Lat.), n. f.  $A^{21}(a^{21})$ -ki<sup>21</sup>-m(ku<sup>21</sup>)-i(e)a<sup>21</sup>. See **ALKIMIA** (2d def.).

**ALKYMISTRE**, n.  $A^{21}/ki^{21}$ -m-i<sup>21</sup>-str. An alchemist. [D, 90.]

**ALKY PLUMBI** (Lat.), n. See **ALKI PLUMBI**.

**ALKYTRAN**, n. See **ALCHYTRAN**.

**ALLA** (Lat.), n. f.  $A^{21}(a^{21})$ -la<sup>21</sup>. Ale. [D, 107.]

**ALLABE**, n. See **ALABE**.

**ALLABOR**, n. See **ALABARI**.

**ALLABROT**, n. A sort of fictitious salt. [D, 107.]

**ALLÆANTHUS** (Lat.), n. m.  $A^{21}(a^{21})$ -le(la<sup>21</sup>-e<sup>21</sup>)-a<sup>21</sup>-n(a<sup>21</sup>)/thu<sup>21</sup>s-(thu<sup>21</sup>s). Fr., *allæanthe*. A genus of artocarpaceous plants, resembling *Maclura*, established by Thwaites. [B, 121, 170.]—**A. zeylanicus** [Thwaites]. *Allandoa, alandoo-gaha*. A tree, with milky juice, found in Ceylon, from the liber of which paper and sacking are made. [B, 121; D, 79.]

**ALLA-GALLI-GHEETSIA** (Teloogoo), n. The *Crotalaria verucosa*. [B, 172.]

**ALLAGE** (Lat.), n. f.  $A^{21}(a^{21})$ -a<sup>21</sup>(a<sup>21</sup>)-je(ga). Gen., *al'lages*. From ἀλλαγή, change. See **ALLAXIS**.

**ALLAGOSTEMON** (Lat.), adj. and n. m.  $A^{21}(a^{21})$ -la<sup>21</sup>g(la<sup>21</sup>g)-o-ste(sta)/mo<sup>21</sup>n. Gen., *allagostemonis*. From ἀλλαγή, change, and στήμων, a filament. Fr., *allagostemone*. A term invented by Mönch to designate flowers in which the stamens are alternately arranged opposite to the sepals and the petals. [B, 121; D, 11.]

**ALLAITANT** (Fr.), part. of *allaiter*.  $A^{21}$ -la-ta<sup>21</sup>-n<sup>21</sup>. Giving milk; in the condition of lactation. [D, 10.]

**ALLAITÉ** (Fr.), adj.  $A^{21}$ -la-ta. Suckled; nourished with milk. [D, 10.]

**ALLAITEMENT** (Fr.), n.  $A^{21}$ -la-ta<sup>21</sup>-n<sup>21</sup>. The act of suckling; nourishment by suckling. [D, 10.]—**A. animal**. Suckling which is accomplished by recourse to the udder of an animal, as of a goat or ass. [D, 11.]—**A. artificiel**. It., *allattamento artificiale*. The feeding of a suckling infant with cow's-milk or some food preparation administered in a bottle or in other ways. [D, 11.]—**A. étran-**  
**ger**. It., *allattamento straniero*. Suckling performed by a wom-

an who is not the mother of the child suckled. [D. 11.]—*A. maternal*. It, *allattamento materno*. Suckling performed by the mother of the child suckled. [D. 11.]—*A. mixte*. It, *allattamento misto*. Suckling by the mother, or a wet nurse, combined with nourishment by artificial means. [D. 11.]—*A. par adoption*. It, *allattamento per adozione*. The same as *A. étranger*, but applied to animals. [D. 11.]

**ALLAITER** (Fr.), v. tr.  $A^1I$ -la-ta. To nurse; to give suck to.

**ALLAMANDA** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>m(la<sup>3</sup>m)-a<sup>2</sup>n(a<sup>3</sup>n)<sup>de</sup>a<sup>3</sup>. Fr., *allamande*. A Linnaean genus of South American apocynaceous shrubs, having a unilocular ovary with 2 parietal placentae and a capsular fruit dehiscing by 2 valves. The species have decided purgative and frequently emetic properties, and are used by the natives, in decoction, for different sorts of colic. [B. 19, 121, 180; D. 92.]—*A. angustifolia* [Pohl]. A Brazilian species. [B. 180.]—*A. Aubletii* [Pohl]. Syn.: *Aurelia grandiflora* [Aublet]. A species growing in Guiana and on the banks of the Orinoco, with oblong-ovate acuminate leaves. [B. 17, 180.]—*A. cathartica*. 1. Of Linnaeus, the *A. Linnaei*. 2. Of Schrader, the *A. Schottii*. 3. Of other authors, the *A. Aubletii*. [B. 180.]—*A. grandiflora* [Lamarck]. The *A. Linnaei*. [B. 180.]—*A. Linnaei* [Pohl]. A species found in the West Indies and in South America, with subsessile ovate-oblong leaves and yellow flowers in villous fascicles. [B. 71, 180.]—*A. cnotharæfolia* [Pohl]. A Brazilian species. [B. 180.]—*A. Schottii* [Pohl]. A species growing near Rio de Janeiro, with oblong-acuminate sessile leaves. [B. 71, 180.]

**ALLAMANDEÆ** (Lat.), n. f. pl.  $A^2I(a^1I)$ -la<sup>3</sup>-ma<sup>2</sup>n(ma<sup>3</sup>n)<sup>de</sup>e<sup>2</sup>-a<sup>3</sup>(a<sup>2</sup>-e<sup>2</sup>). Fr., *allamandées*. 1. A subdivision of the *Apocynaceæ*, made by Reichenbach, comprising the genera *Allamanda* and *Aspidosperma*. 2. A sub-order [Endlicher] or tribe [De Candolle] of the *Apocynaceæ*, comprising the single genus *Allamanda*. [B. 121, 170.]

**ALLAMANDIÆ** (Lat.), n. f. pl.  $A^2I(a^1I)$ -la<sup>3</sup>-ma<sup>2</sup>n(ma<sup>3</sup>n)-di-(de)<sup>2</sup>-e<sup>2</sup>-a<sup>3</sup>(a<sup>2</sup>-e<sup>2</sup>). A tribe of the *Apocynaceæ*, made by G. Don, corresponding to *Allamandæ* (1st def.). [B. 170.]

**ALLANATE**, n.  $A^2I$ -a<sup>2</sup>n-at. Fr., *allanate*. A salt of allanic acid. [B.]

**ALLANDOA**, **ALLANDOO-GAHA**, n's. Ceylon names for the *Allanathus zeylanicus*. [B. 121.]

**ALLANIC ACID**, n.  $A^2I$ -a<sup>2</sup>n-ti<sup>2</sup>k. For deriv., see ALLANTOIS. Fr., *acide allanique*. A monobasic crystalline acid, of the constitution  $C_4H_6N_4O_6$ , produced by the action of nitric acid upon allantoin. [B. 2.]

**ALLANTIASIS** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-ti<sup>2</sup>-a<sup>3</sup>(a<sup>2</sup>-e<sup>2</sup>)<sup>2</sup>s. Gen., *allantias'eos* (-sis). From *ἀλλαντίασις*, a sausage. Ger., *Wurstvergiftung*. Syn.: *botulismus*. A morbid condition produced by eating unwholesome sausages. It is characterized by constipation, nausea, vomiting, dizziness, imperfect vision, muscular prostration, and enfeeblement of the circulation, and is frequently fatal. It is often observed in southwestern Germany, especially in Baden and Würtemberg. [D. 9, 18, 66.]

**ALLANTIS** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-ti<sup>2</sup>s. Gen., *allant'idis*. See ALLANTOIS.

**ALLANTOATE**, n.  $A^2I$ -a<sup>2</sup>n-to-at. For deriv., see ALLANTOIS. Lat., *allantodas*, *sul allantodicus*. Fr., *allantoate*. Ger., *Allantoat*, *allantoinsäures Salz*. A salt of allantoic acid. [D.]

**ALLANTOATES** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to<sup>2</sup>-dez(de<sup>2</sup>s). Gen., *allanto'ides* (-eis). From *ἀλλαντοειδής*, sausage-like. 1. A sausage. 2. The allantois. 3. The great toe. [B. 87; D. 80.]

**ALLANTODICUS** (Lat.), adj.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to<sup>2</sup>d'i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Allantoic. [D. 80.] See SAL a.

**ALLANTOIC**, adj.  $A^2I$ -a<sup>2</sup>n-to-i<sup>2</sup>k. For deriv., see ALLANTOIS. Lat., *allantodicus*, *allantoicus*. Fr., *allantoïque*. Ger., *allant'isch*. It., *allantoico*. Sp., *alantóico*. Of, pertaining to, or derived from the allantois. [A.]—**A. acid**. Lat., *acidum allantoinicum* (seu *allantodicum*). Fr., *acide allantoinique*. Ger., *Allantoin'säure*. It., *acido allantoinico*. Sp., *ácido alantóico*. A name at first given to allantoin under the supposition that it was a true acid; now applied to a monobasic crystalline acid of the composition  $C_4H_6N_4O_6$ , derived from allantoin by the addition of the elements of a molecule of water. [B. 3.]—**A. fluid**. Lat., *liquor amnii spurius*. Fr., *liquide allantoidien*. Ger., *falsches Frucht-wasser*, *allantoische Flüssigkeit*. It., *liquido allantoidico*. The fluid contained in the sac of the allantois, representing the oxidation products formed by the Wolffian bodies. As obtained from the embryo of the horse it is a turbid, yellowish, milky liquid, containing peculiar bodies called *hippomanes*. The a. fluid of the cow contains albumin, lactic acid, sugar, salts of calcium, potassium, and sodium, iron, urea, urates, and allantoin. [B. 108, 125.]—**A. vessels**. Balfour's name for the umbilical vessels. [A. Thomson (A. 5).]

**ALLANTOID**, adj. and n.  $A^2I$ -a<sup>2</sup>n-toid,  $a^2I$ -a<sup>2</sup>n-toid. Ger., *ἀλλαντοειδής*. Lat., *allantoides*, *allantodes*. Fr., *allantoïde*. Ger., *allant'oid*. It., *allantoides*. Sp., *allantóide*. 1. Pertaining to the allantois. 2. (N.) the allantois. —**A. animals**. 1. See ALLANTOIDEA. —**A. circulation**. See under CIRCULATION.—**A. liquid**. See ALLANTOIC fluid.—**A. membrane**. **A. vesicle**. See ALLANTOIS.—**A. vessels**. See ALLANTOIC vessels.

**ALLANTOIDEA** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to-i<sup>2</sup>d'e<sup>2</sup>-a<sup>3</sup>. Fem. of adj. *allantoides* (*tunica* understood). The allantois. [B. 78.]

**ALLANTOIDEA** (Lat.), n. n. pl.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to-i<sup>2</sup>d'e<sup>2</sup>-a<sup>3</sup>. Neut. pl. of adj. *allantoides* (*animalia* understood). A subdivision of vertebrate animals comprising all those in which the foetus is supplied with an allantois. It includes the classes *Reptilia*, *Aves*, and *Mammalia*, and is thus co-ordinate with the division *Amniota*. [B. 28.]

**ALLANTOIDES** (Lat.), adj. and n. f.  $A^2I(a^1I)$ -a<sup>2</sup>n(a<sup>3</sup>n)-to-i<sup>2</sup>(e<sup>2</sup>-dez(de<sup>2</sup>s)). 1. (Adj.) allantoid. 2. (N.) the allantois. 3. A sausage. 4. The great toe. [B. 87; D. 80.]

**ALLANTOINE**, n.  $A^2I$ -a<sup>2</sup>n-to-i<sup>2</sup>n. Lat., *allantoïna*. Fr., *allantoïne*. Ger., *Allantoïn*. It., Sp., *allantoïna*. Syn.: *allantoic* (or *amniotic*) acid. A colorless crystalline body found in the allantoic fluid of the cow, in the urine of new-born children, and occasionally in the urine of adults, especially after the ingestion of tannic or uric acid, and in some pathological conditions. It has also been discovered in the young leaves of the plane-tree. Artificially it may be produced from uric acid by the action of water and peroxide of lead. It acts like an acid, forming salts with metallic oxides, and like a base, combining with acids. Formula:  $C_4H_6N_4O_6$ , =  $CO \begin{matrix} \text{NH} - \text{CH} - \text{NH} \\ | \quad \quad | \\ \text{NH} - \text{CO} \end{matrix} \text{NH}_2$  CO. [B. 2, 3.]—**A. nitrate**. Fr., *azotate d'allantoïne*. Ger., *salpetersaures Allantoïn*. A compound of a with nitric acid, of the constitution  $C_4H_6N_4O_8.HNO_3$ . [B. 2.]

**ALLANTOÏQUE** (Fr.), adj.  $A^2I$ -la<sup>2</sup>n-to-ek. See ALLANTOIC.

**ALLANTOIS** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to-i<sup>2</sup>s. Gen., *allant'oidis*. From *ἀλλαντίασις*, a sausage, and *είδος*, likeness. Ger., *ἀλλαντοειδής*, *ὑμῆν* (*χίτων*) *ἀλλαντοειδής*. Lat., *allantoides*, *tunica farciminalis* (seu *farcimialis*), *membrana farciminoso*. Fr., *allantoïde*. Ger., *Allantoïs*, *Harusack*, *Wurstäutchen*. It., *allantoide*. Sp., *allantoïdes*. The urinary vesicle of the embryo; a flask-like diverticulum, connected with the intestine by a narrow pedicle, situated in the space between the umbilical vesicle, the amnion, and the subzonal membrane. It is found only in the *Amniota* (*allantoidea*). A dilatation of its pedicle ultimately forms the urinary bladder, and its vascular portion gives rise to the umbilical cord and the fetal elements of the placenta. [A. Thomson (A. 5); A. 11.] See figure under *Fetal ENVELOPES*.—**A. flüssigkeit** (Ger.). See ALLANTOIC fluid.—**A. höcken** (Ger.). Gasser's term for a thickening of the anterior wall of the a. which appears in the chicken-embryo in the latter part of the third day.—**A. höhle** (Ger.). See *Sac* of the a.—**A. stiel**. See *Pedicle* of the a.—**A. wulst** (Ger.). A thickened bulging portion of the visceral mesoblast, being a thick mass of cells at the posterior extremity of the embryo, which is the first rudiment of the allantois and contains a small diverticulum coming from the rectum, which is the beginning of the cavity of the allantois. [H.]—**Diverticulum allantoïdes**. See under DIVERTICULUM.—**Sac** of the a. Ger., *Allantoishöhle*. That portion of the original a. which remains outside the abdominal wall after the urinary bladder has been formed from another portion.—**Vascular layer** of the a. The mesoblastic or outer layer of the a., which lines the interior of the chorion. [A. Thomson (A. 5).]

**ALLANTOÏSCH** (Ger.), adj.  $A^2I$ -la<sup>2</sup>n-to-i<sup>2</sup>sh. See ALLANTOIC.

**ALLANTOTOXICON**, **ALLANTOTOXICUM** (Lat.), n's n.  $A^2I(a^1I)$ -la<sup>2</sup>n(la<sup>3</sup>n)-to-to<sup>2</sup>x'i<sup>2</sup>k-o<sup>2</sup>n, -u<sup>3</sup>m(u<sup>3</sup>m). From *ἀλλαντίασις*, a sausage, and *τοξικόν*, poison. Ger., *Wurstgift*. A poisonous principle sometimes found in sausages. [B. 78; D. 12.] Cf. ALLANTIASIS and BOTULINIC ACID.

**ALLANTURIC ACID**, n.  $A^2I$ -a<sup>2</sup>n-tu<sup>2</sup>ri<sup>2</sup>k. From *allantoine* and *uric*. Fr., *acide allanturique*. Ger., *Allantursäure*. It., *acido allanturico*. Sp., *ácido alantúrico*. A white, gummy, deliquescent substance, of slightly acid reaction, obtained by the action of nitric and hydrochloric acids and lead peroxide upon allantoin, and of nitric acid and chlorine upon uric acid; having the constitution  $C_8H_4N_2O_8$ . [B. 2, 3.]

**ALLARINCOH**, n. Ar., *al-ânok*, lead. An old term for lead. [B. 2; D. 107.]

**ALLASIA** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>(a<sup>3</sup>)zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. Fr., *allasie*. A Linnaean genus of eucurbitaceous plants. [B. 180; D. 108.]—**A. payson** (Loureiro). A species growing in southeastern Africa, the leaves of which are applied in the form of a poultice for the relief of labor-pains and to accelerate parturition. [B. 180.]

**ALLATAÏM DU HAREM** (Fr.), n. A farinaceous preparation analogous to the *rachout* des Arabes (q. v.). [D. 126.]

**ALLAXIS** (Lat.), n. f.  $A^2I(a^1I)$ -la<sup>2</sup>x(la<sup>3</sup>x)<sup>i</sup>2s. Gen., *alax'eos* (-xis). From *ἀλλάσσειν*, to change. Syn.: *allage*. Change. Metamorphosis; the act of transformation into another state or substance, or the process of being so transformed. [B. 78.]

**ALLAY**, n.  $A^2I$ -la'. See ALLOY.

**ALLAY**, **ALLAYE**, v's tr.  $A^2I$ -la'. See ALLOY.

**ALLEC** (Lat.), n. n.  $A^2I(a^1I)$ -le<sup>2</sup>k. Gen., *alle'cis*. See ALEX.

**ALLECRIM BRAHO**, n. From Port., *alecrim brabo*, wild rosemary. A Brazilian name for the *Hypericum laxiusculum*. [B. 90.]

**ALLECTUARY**, n.  $A^2I$ -le<sup>2</sup>k-tu<sup>2</sup>-a-ri<sup>2</sup>. An electuary. [D. 90.]

**ALLEENBAUM** (Ger.), n.  $A^2I$ -lan'ba<sup>3</sup>-um. *Salic alba*. [D. 75.]

**ALLEEVERAY** (Tamil), n. Flax (*Linum usitatissimum*). [B. 172.]

**ALLEGAR**, n.  $A^2I$ -le<sup>2</sup>-ga<sup>3</sup>r. See ALE-GAR.

**ALLÈGEMENT** (Fr.), n.  $A^2I$ -lazh-ma<sup>3</sup>n<sup>2</sup>. The amelioration of a disease. [D. 137.]

**ALLEGHANY MOUNTAIN SPRINGS**, n. See CRESSON SPRINGS.

**ALLEGHANY SPRING**, n.  $A^2I$ -le<sup>2</sup>-ga'ni<sup>2</sup>. A mineral spring in Montgomery County, Virginia, containing calcium sulphate (12 grs. to the pint), magnesium sulphate (5-3 grs. to the pint), the sulphates of sodium and potassium, the carbonates of iron, manganese, magnesium, calcium, barium, strontium, and lithium, sodium chloride, small quantities of other chlorides, fluorides, nitrates, and silicates, and free carbonic acid. It is cathartic and diuretic, and has been found useful in dyspepsia and hepatic disorders. [B. 15.]

**ALLEGREZZA** (It.), n.  $A^2I$ -le<sup>2</sup>-gze<sup>2</sup>-re<sup>2</sup>tz'a<sup>3</sup>. A cold mineral

spring in Tuscany, containing carbonates and probably hydrogen sulphide. Employed in gastric and calculous affections. [D, 79.]

**ALLELO**, n. An Egyptian name for the *Solanum nigrum*. [D, 90.]

**ALLELUCHIEÆ** (Lat.), n. f. pl.  $A^2(a^3)l\text{-}le^2\text{-}u^2(u)\text{-}kl(ke)^{e2}\text{-}e(a^3\text{-}e^2)$ . From  $\alpha\lambda\lambda\eta\lambda\omega\varsigma$ , continuous. A tribe of *Aroidæ*, established by Schott, characterized by the absence of sterile flowers and by the spadix being in part united with the spathe. [B, 121.]

**ALLELUJA** (Lat.), n. f.  $A^2(a^3)l\text{-}le^2\text{-}lu^2(lu^2)ja(ya^3)$ . Really the interj. a. (= Hebr. *hallel-û-yah*), praise the Lord. Fr., *alléluia*. The wood-sorrel (*Oxalis acetosella*); so called because appearing at the time that the canticle alleluia was directed by the church to be sung. [B; D, 11, 81.]

**ALLENE**, n.  $A^2l\text{-}len'$ . For deriv., see ALLYLENE. Fr., *allène*. Ger., *Allen*. It., *allene*. A name given to an isomeric form of allylene; otherwise called isallylene or beta-allylene. [B.] See ALLYLENE.—**A. chloride**. See ALLYLENE chloride.

**ALLENEE**, n. An old name for tin. [D, 107.]

**ALLENIMENTUM** (Lat.), n. n.  $A^2(a^3)l\text{-}le^2n\text{-}i^2\text{-}me^2n\text{-}tu^3m\text{-}(tu^3m)$ . From *ad*, to, and *lenire*, to soothe. See ADLENIMENTUM.

**ALLENTHESIS** (Lat.), n. f.  $A^2(a^3)l\text{-}le^2n\text{-}the^2s\text{-}i^2s$ . From  $\alpha\lambda\lambda\alpha\varsigma$ , another, and  $\epsilon\nu\theta\epsilon\sigma\iota\varsigma$ , introduction. Fr., *allenthèse*. Ger., *Allenthese*. It., *allentesi*. A name applied by Walther to the penetration of foreign bodies into, or their presence within, the organism. [D, 11.]

**ALLENTHETON, ALLENTHETUM** (Lat.), n's n.  $A^2(a^3)l\text{-}le^2n\text{-}the^2t\text{-}o^2n\text{-},\text{-}u^3m(u^3m)$ . A foreign body within the organism. [D, 11.]

**ALLENTOIS** (Lat.), n. f.  $A^2(a^3)l\text{-}le^2n\text{-}to\text{-}i^2s$ . A faulty spelling for allantois. According to Coxe, the great toe. [B, 87.]

**ALLEOTIC**, adj.  $A^2l\text{-}le\text{-}o^2t\text{-}i^2k$ . See ALLÆOTIC.

**ALLERBAUM** (Ger.), n.  $A^3l\text{-}le^2r\text{-}ba^3\text{-}um$ . The white poplar (*Populus alba*). [D, 75.]

**ALLERHEILIGEN** (Ger.), n.  $A^3l\text{-}le^2r\text{-}hil\text{-}i^2g\text{-}e^2n$ . A cold mineral spring in the canton of Soleure, Switzerland, containing carbonates and calcium sulphate; recommended in nervous affections. [D, 79.]

**ALLERIM BRABO**, n. See ALLECRIM BRAHO.

**ALLERLEIGEWÜRZ** (Ger.), n.  $A^3l\text{-}le^2r\text{-}li\text{-}ge^2\text{-}vu^3rtz$ . All-spice. [B, 180.] See PIMENTA.

**ALLERMANNSHARNISCH** (Ger.), n.  $A^3l\text{-}le^2r\text{-}ma^3ns\text{-}ha^3r\text{-}ni^2sh$ . *Allium victorale*. [D, 77.]—**A'wurzel**. The root of *Allium victorale*. [L, 30.]

**ALLEVAMENTUM** (Lat.), n. n.  $A^2(a^3)l\text{-}le^2(a)\text{-}va^2(wa^3)\text{-}me^2n\text{-}tu^3m(tu^3m)$ . From *allevere*, to relieve. An alleviation or means of alleviating. [D, 78.]

**ALLEVARD** (Fr.), n.  $A^3l\text{-}le^2\text{-}va^3r$ . A French health resort in the department of Isère, on the confines of Savoy, at which there are two springs: 1. A sulphur spring, the water of which is applied in the form of vapor-baths and douche-baths in the treatment of gastric disorders, constipation, diarrhoea, and inflammatory conditions of the throat and lungs. 2. A cold chalybeate spring, containing calcium carbonate, recommended for the treatment of anemia and chlorosis. [D, 18, 79.]

**ALLEVIATOR**, n.  $A^2l\text{-}le^2vi^2a\text{-}to^2r$ . From Lat., *allevere*, to raise up. Jenks's name for an apparatus consisting of 2 uprights with a windlass and supports of various kinds, designed for lifting invalids. [D, 2.]

**ALEX** (Lat.), n. f.  $A^2(a^3)l\text{-}le^2x$ . Gen., *al'licis* (1st def.), *al'le-cis* (2d def.). 1. The great toe. See HALUX. 2. See ALEX.

**ALLEZANI** (It.), n.  $A^3l\text{-}le^2t\text{-}a^3\text{-}ne$ . The site of two cold chalybeate springs in Corsica. [D, 79.]

**ALLFRESEND** (Ger.), adj.  $A^3l\text{-}fre^2s\text{-}se^2nd$ . Omnivorous. [D, 75.]

**ALLFRESSER** (Ger.), n.  $A^3l\text{-}fre^2s\text{-}se^2r$ . Pemphigus. [D, 129.]

**ALL-GOOD**, n.  $A^4l\text{-}gu^4d$ . Ger., *Allgut*. The *Chenopodium bonus Henricus*. [B, 19; D, 12.]

**ALL-HEAL**, n.  $A^4l\text{-}hel$ . Ger., *Allheil*. 1. A sovereign remedy; a panacea. 2. A name given to several species of plants. [D.]—**Æsculapius's a.-h.** An umbelliferous plant, formerly much vaunted as a universal remedy, apparently a species of *Ferula*. [B, 200.]—**Candy a.-h.** An umbelliferous plant obtained from Candia (Crete); apparently a species of *Ferula*. [B, 200.]—**Crown's a.-h.** The *Stachys palustris*. [B, 19.]—**Hercules's a.-h.** Lat., *panax heracleum*. The *Opopanax chironium*. [B, 19, 200.]

**ALLHEILSMITTEL** (Ger.), n.  $A^3l\text{-}hil\text{-}mi^2t\text{-}te^2l$ . A panacea. [D.]

**ALLIACEÆ** (Lat.), n. f. pl.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)se^2(ke^2)\text{-}e(a^3\text{-}e^2)$ . For deriv., see ALLIUM. Fr., *alliacees*. Ger., *Zwiebelpflanzen, Lauchpflanzen*. It., *agliacee*. Sp., *aliáceas*. 1. A family of plants, made by Batsch, including *Allium*, *Scilla*, *Albuca*, *Asphodelus*, etc. 2. A similar division made by Reichenbach, comprising *Allium*, *Scilla*, *Porrum*, etc. 3. Link's name for a tribe of *Liliaceæ* comprising the single genus *Allium*. 4. Bernhardi's name for an order (corresponding to a cohort of other systems) of Monocotyledons comprising the tribes (= orders of other systems) *Dioscorideæ*, *Smilacæ*, *Hypoxideæ*, *Amaryllideæ*, *Asphodelæ*, and *Juncaceæ*. [B, 170.]

**ALLIACEOUS**, adj.  $A^2l\text{-}li^2\text{-}a^3shu^3s$ . Lat., *alliaceus*. Fr., *alli-acé*. Ger., *knoblauchartig*. It., *agliaceo*. Sp., *aliáceo*. Garlicy; resembling garlic in odor or appearance.

**ALLIAGE** (Fr.), n.  $A^3l\text{-}li^2\text{-}a^3zh$ . An alloy. [B.]—**A. fusible**. See FUSIBLE ALLOY.

**ALLIAIRE** (Fr.), n.  $A^3l\text{-}li^2\text{-}a^3r$ . *Alliaria*. [L.]—**A. commun.** *Sisymbrium alliaria*. [L.]

**ALLIANCE**, n.  $A^2l\text{-}li^2a^3ns$ . From Fr., *allier*, to unite. Lat., *nivus*. Fr., *alliance*. Ger., *Allianz*. It., *alleanza*. In Lindley's classification of plants, a group of related orders, corresponding to the cohort of Bentham and Hooper's classification. There are 56 a's, comprising 303 orders arranged in 7 classes (see CLASS), which are distinguished by the termination *-ales*. [B.]—**Algal a.**, **Alismal a.**, **Amomal a.**, etc. See ALGALES, ALISMALES, AMOMALES, etc.

**ALLIARIS ÆRIS** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}a^3r\text{-}e(e^3\text{-}e^2)\text{-}ri^2s$ . See *Aqua MERCURI*.

**ALLIARIA** (Lat.), n. f.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)ri^2\text{-}a^3$ . From *allium*, on account of the garlicy odor of *A. officinalis*. Fr., *alliaire*. It., *alliarid*. Sp., *aliaria*. Jack-in-the-hedge; a genus of cruciferous plants established by Adanson. [D; L.]—**A. officinalis** [Andrzéj]. See *SISYMBRIUM a.*—**Herba alliariae**, **Semen alliariae**. The herb and seed of *Sisymbrium a.* (q. v.).

**ALLIARIS, ALLIARIUM** (Lat.), n's f. and n.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)ri^2s\text{-},\text{-}ri^2\text{-}u^3m(u^3m)$ . See ALLIARIA.

**ALLIARIUS** (Lat.), adj.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)ri^2\text{-}u^3s(u^3s)$ . Resembling garlic. [L, 50.]

**ALLIATRUM** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}a^2t(a^2t)ru^3m(ru^3m)$ . See *Acetum ALLII*.

**ALLIATUM** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)tu^3m(tu^3m)$ . A sort of sauce prepared with garlic. [L, 48.]

**ALLIATUS** (Lat.), adj.  $A^2(a^3)l\text{-}li^2\text{-}a(a^3)tu^3s(tu^3s)$ . Prepared or mixed with garlic. [L, 58.]

**ALLICAR**, n.  $A^2l\text{-}li^2k\text{-}a^3r$ . See ALE-GAR.

**ALLICOL**, n.  $A^2l\text{-}li^2k\text{-}o^2l$ . An old name for petroleum. [L, 104.]

**ALLIDENE**, n.  $A^2l\text{-}li^2d\text{-}en$ . From *allpl.* Fr., *allidène*. Ger., *Alliden*. A bivalent radicle,  $C_3H_4$ , found in acrolein. [B, 3.]

**ALLIÉ** (Fr.), adj.  $A^3l\text{-}li^2\text{-}a$ . Alloyed. [L, 103.]

**ALLIÆÆ** (Lat.), n. f. pl.  $A^2(a^3)l\text{-}li^2(e)^{e2}\text{-}e(a^3\text{-}e^2)$ . A tribe of *Asphodelæ*, made by Knuth, comprising *Allium* and allied genera. [B, 170.]

**ALLIER** (Fr.), n.  $A^3l\text{-}li^2\text{-}a$ . The *Pyrus aria*. [B, 173.]

**ALLIEZ** (Fr.), n.  $A^3l\text{-}li^2\text{-}a$ . The *Ervum ervilia*. [L, 67.]

**ALLIGAMEN** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}g\text{-}a(a^3)me^2n$ . Gen., *alligam'inis*. From *alligare*, to bind to. A bandage. [L, 63.]

**ALLIGANS** (Lat.), adj.  $A^2(a^3)l\text{-}li^2\text{-}g\text{-}a^3nz(a^3ns)$ . In botany, holding fast to anything, as by a tendril. [L, 38.]

**ALLIGATION**, n.  $A^2l\text{-}li^2g\text{-}a^3shu^3n$ . See ALLOY.

**ALLIGATOR** (Lat.), n. m.  $A^2(a^3)l\text{-}li^2g\text{-}a(a^3)tor$ . From *alligare*, to bind to (1st def.). From Sp., *el legarto*, the lizard (2d def.). Ger., *Alligator*. It., *alligatore*. 1. In botany, a part of a plant by which the latter attaches itself to any object. [B.] 2. A genus of *Reptilia* usually referred to the genus *Crocodylus*. [B.]—**A'birne** (Ger.). The a. pear. See *PERSEA gratissima*.—**A. forceps**. See under FORCEPS.—**A. sinensis**. The Chinese a. The scales are used by the Chinese in the treatment of syphilis. [L, 75.]

**ALLIGATURA** (Lat.), n. f.  $A^2(a^3)l\text{-}li^2g\text{-}a^3tu^2(tu^2)ra^3$ . Fr., *alligature*. A term used by Scribonius Largus to denote a bandage or ligature; also the act of ligation or binding up. [L, 53.]

**ALLIGIREN** (Ger.), v. tr.  $A^3l\text{-}li^2g\text{-}er\text{-}e^2n$ . To alloy. [L, 46.]

**ALLINERE** (Lat.), v. tr.  $A^2(a^3)l\text{-}li^2n\text{-}e^2r\text{-}e^2$ . To anoint. [L, 58.]

**ALLIONIA** (Lat.), n. f.  $A^2(a^3)l\text{-}li^2\text{-}o^2ni^2\text{-}a^3$ . From Allioni, an Italian botanist. Fr., *allione*. A genus of nyctaginaceous plants, natives of Central America. [L, 67.]

**ALLIONIACEÆ** (Lat.), n. f. pl.  $A^2(a^3)l\text{-}li^2\text{-}o^2n\text{-}i^2\text{-}a(a^3)se^2(ke^2)\text{-}e(a^3\text{-}e^2)$ . 1. Of Reichenbach, a division of the order *Nyctagineæ*, comprising *Allionia* and allied genera. 2. Of other authors, the order *Nyctagineæ*. [B, 170.]

**ALLIONIÆÆ** (Lat.), n. f. pl.  $A^2(a^3)l\text{-}li^2\text{-}o^2n\text{-}i^2(e)^{e2}\text{-}e(a^3\text{-}e^2)$ . See ALLIONIACEÆ (1st def.).

**ALLIOPORRUM** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}o\text{-}po^2r\text{-}ru^3m(ru^3m)$ . From *allium* and *porrum*. An old name for *Allium scorodoprasum*. [L, 63.]

**ALLIOTIC**, adj. and n.  $A^2l\text{-}li^2\text{-}o^2t\text{-}i^2k$ . See ALLÆOTIC and ALLÆOTICS.

**ALLITURATE**, n.  $A^2l\text{-}li^2t\text{-}u^2\text{-}rat$ . Fr., *alliturate*. Ger., *Alliturat*. A salt of allitric acid.

**ALLITURIC ACID**, n.  $A^2l\text{-}li^2t\text{-}u^2\text{-}ri^2k$ . Fr., *acide allitrique*. Ger., *Allitursäure*. A yellowish-white crystalline substance, soluble with difficulty in water, obtained by the action of hydrochloric acid upon alloxantine, and having the constitution  $C_6H_3N_4O_4$ . [B, 2, 158.]

**ALLIUM** (Lat.), n. n.  $A^2(a^3)l\text{-}li^2\text{-}u^3m(u^3m)$ . Perhaps allied to  $\alpha\lambda\lambda\alpha\varsigma$ , a sausage; or to Celtic, *all*, hot. Fr., *ail*. Ger., *Lauch*. It., *aglio*. Sp., *ajo*. Garlic. 1. A genus of bulbiferous liliaceous plants belonging to the tribe *Asphodelæ*, having white or rose-colored flowers, disposed in umbels and provided with straight stamens. 2. In the U. S. Ph., the bulb of *A. sativum* (q. v.).—**Acetum allii**. Fr., *vinagre d'ail*, *oxoéol d'ail*. It., *aceto di aglio*. Sp., *vinagre de ajo*. Syn.: *alliatrum*. A preparation consisting of 1 part of sliced garlic (bulb of *A. sativum*) infused in 9 parts [Ph. Wurzb. (1796)], or 12 parts [Ph. Sax. (1837)] of strong vinegar. [L, 85.]—**Acetum allii compositum**. See *ACETUM antisepticum*.—**Allii bulbosus** [Greek Ph.]. The bulb of *A. sativum*. [B, 95.]—**A. acutangulum** [Schrader]. A European species closely related to *A. fallax*. [B, 64.]—**A. aginum**. The *A. ophioscorodon*. [L, 104.]—**A. albescens**. See *A. ampeloprasum*.—**A. alpinum**. See the major list.—**A. altaicum** [Pallas]. Fr., *ail renflé*. Syn.: *Cepa ventricosa* [Bernhardi]. A variety of *A. fistulosum*. [B, 173.]—**A. ampeloprasum** [Linnaeus]. Fr., *ail ampélopase* (ou d'orient), *poireau d'été*. Ger., *Sommerlauch*. Syn.: *Porrum ampeloprasum*. A European species flower-

ing in July and August, distinguished by its purplish flowers. It is related to *A. porrum*, and was formerly much esteemed as a diuretic, as an emmenagogue, and as an antidote to the bites of serpents. [B. 71, 200.]—*A. anguinum* [Matthioli]. The *A. victorialis*. [B. 173.]—*A. angulosum*. Fr., *ail anguleux*, *ail de mulot*. Syn.: *Cepa angulosa* [Bernhardi]. 1. Of Jacquin, the *A. fallax*. 2. Of Pollich, the *A. acutangulum*. [B. 64, 177.]—*A. angustifolium umbellatum album*. See *A. nigrum*.—*A. arenarium*. Fr., *ail des sables*. 1. Of Linnaeus, a variety of *A. vineale*. 2. Of Smith, the *A. scorodoprasum*. [B. 64.]—*A. ascalonicum* [Linnaeus]. Lat., *ascalonia cepa* [Pliny]. Fr., *échalotte*. Ger., *Eschlauch*, *Schalotte*. It., *scalogno*, *cipolla d'inverno*. Sp., *chalote*, *escaluka*. Shallot; a perennial species found in great abundance about the city of Ascalon, in Palestine, whence its specific name. It has an edible compound bulb like that of garlic. [B. 19.]—*A. ascendens*. The *A. ampeloprasum*. [B. 177.]—*A. aureum* [Lamarck]. The *A. moly*. [B. 173.]—*A. Bertolonii*. The *A. ampeloprasum*. [B. 177.]—*A. bulbo composito*. The *A. sativum*. [L. 84.]—*A. canadense* [Kalm]. A North American species, distinguished by the umbels being capitate and bearing sessile bracteolate bulbs. The stamens and sepals are equal in length. It has been substituted for the common garlic and is equally useful. [B. 34; L. 61.]—*A. capillare* [Lamarck]. The *A. moschatum*. [B. 173.]—*A. carinatum*. Ger., *Berglauch* (1st def.). 1. Of Linnaeus, a species found in Germany, Switzerland, and the Tyrol. 2. Of others, a variety of *A. oleraceum*. [B. 64.]—*A. carneum* [Tenor]. The *A. roseum*. [B. 177.]—*A. cepa*. See the major list.—*A. chinense* [Don]. A Chinese species. [B. 180.]—*A. compactum* [Thunberg]. Fr., *ail compact*. A variety of *A. vineale*. [B. 173.]—*A. controversum* [Schrader]. See *A. ophioscorodon* (2d def.). [B. 180.]—*A. descendens*. 1. Of Linnaeus, the *A. sphaerocephalum*. 2. Of Koch, a variety of *A. vineale*. [B. 64.]—*A. Dioscoridis* [Sibthorp]. An undescribed species, made as an equivalent for the *moly* of Homer. [B. 180.]—*A. fallax* [Don]. A German species, allied to *A. acutangulum*. [B. 64.]—*A. fistulosum* [Linnaeus]. Fr., *ciboule*, *oignon d'hiver*. Ger., *Winterzwiebel*, *Röhrenlauch*. Rock onion, stone onion, Welsh onion; a species indigenous to Siberia and Russia, and cultivated in western Europe, where it is eaten. It has a long tapering root without a bulb. [B. 19.]—*A. flexum*, *A. flexuosum*. See *A. carinatum* (1st def.).—*A. foliosum* [Clarion]. The *A. schœnoprasum*. [B. 173.]—*A. gallicum* [Marcellus Empiricus]. 1. The *Portulaca oleracea*, or purslane. 2. The comfrey, or *Symphytum officinale*. [B. 200; L. 104.]—*A. Gasparinii*. The *A. ampeloprasum*. [B. 177.]—*A. illyricum*. The *A. roseum*. [B. 177.]—*A. latifolium*. See the major list.—*A. leptophyllum*. Fr., *ail leptophylle* (ou à feuilles étroites). An East Indian species, the bulbs of which are eaten and the dried leaves used as a condiment. [D. 92; L. 30.]—*A. longum*. The *A. victorialis*. [D. 92.]—*A. lusitanicum* [Lamarck]. Fr., *ail de Portugal*, *ciboule de Saint Jacques*. A species the leaves of which are made into salad. [B. 173.]—*A. magicum* [Curtis]. The *A. nigrum*. [B. 180.]—*A. majale*. The *A. roseum*. [B. 177.]—*A. moly* [Linnaeus]. Fr., *ail moly*, *ail doré*. Ger., *goldgelber Lauch*. Syn.: *Cepa moly* [Möench]. Garden garlic; a species, distinguished by its yellow flowers, believed by Linnaeus to be the *moly* of the ancients, which is now referred to *A. nigrum*. The *A. moly* grows in the south of France, where its seeds and rootlets are used as an aperient, and is cultivated in the United States. [B. 138, 173.]—*A. montanum*. See the major list.—*A. moschatum* [Linnaeus]. Fr., *ail musqué*. A species growing in the south of France, the bulbs of which are diuretic. [B. 173.]—*A. multibulbosum* [Jacquin]. See *A. nigrum*.—*A. multiflorum* [Desfontaines]. The *A. ampeloprasum*. [B. 177.]—*A. nigrum* [Linnaeus]. It., *cipollone*, *cipollaccio*. Syn.: *Moly homericum* [Cesalpinus] (seu *album*, seu *montanum*, seu *Theophrasti* [Clusius]), *Ornithogalum indicum*. A European species allied to *A. ursinum*, with radical, non-fistular, lanceolate leaves and whitish flowers with spreading sepals. The *moly* of Theophrastus and of Dioscorides, which was recommended by the latter author to be applied as a pessary for "relaxations of the uterus," is usually identified with this species, although Linnaeus identified it with his *A. moly*, and Sibthorp created for it a separate species, the *A. Dioscoridis*. [B. 64, 177, 180, 200.]—*A. obliquum* [Linnaeus]. Fr., *ail oblique*. Syn.: *Cepa obliqua* [Möench]. An edible Siberian species. [B. 173.]—*A. odorum* [Linnaeus]. An edible European species. [B. 180.]—*A. oleraceum* [Linnaeus]. Fr., *ail des potages*. Field garlic; a European species, used in cooking. The bulb is said to be diuretic. [D. 92; L. 63.]—*A. ophioscorodon*. 1. Of Don, a species closely allied to *A. sativum*, and perhaps only a variety of the latter. The separate bulblets (cloves) of the bulb are more rounded than in *A. sativum*. 2. Of Link, a species distinguished from *A. sativum* by its non-compound bulb. [B. 178.]—*A. parviflorum* [Thunberg]. The *A. oleraceum*. [D. 92.]—*A. petiolatum* [Lamarck]. The *A. ursinum*. [B. 173.]—*A. plantaginifolium* [Lamarck]. The *A. victorialis*. [B. 173.]—*A. porrum* [Linnaeus]. Fr., *porreau*. Ger., *Porree*, *Aschlauch*, *gemeiner Lauch*. It., *porro*. Sp.,

THE ALLIUM PORRUM. [A. 327.]

*puerro*. The leek. A species having flat lanceolate leaves, tricuspidate stamens rather longer than the sepals, and a globous umbel of white flowers. The scaly cylindrical bulb is used in cooking, and has occasionally been employed medicinally as a stimulant. [B. 34, 97.]—*A. pratense*. A variety of *A. vineale*. [B. 173.]—*A. ramosissimum* [Jacquin]. The *A. obliquum*. [B. 173.]—*A. redolens*. The *Teucrium scordium*. [L. 116.]—*A. roseum* [Linnaeus]. Ger., *Rosenlauch*. It., *aglietto*, *aglio salvatico*. Sp., *ajo de calebra*. A species with rose-red flowers, cultivated in France. [B. 178; L. 30.]—*A. rotundum* [Linnaeus]. A European species related to *A. ampeloprasum*. [B. 64.]—*A. sativum*. See the major list.—*A. scalonicum*. The *A. ascalonicum*. [L. 74.]—*A. schœnoprasum*

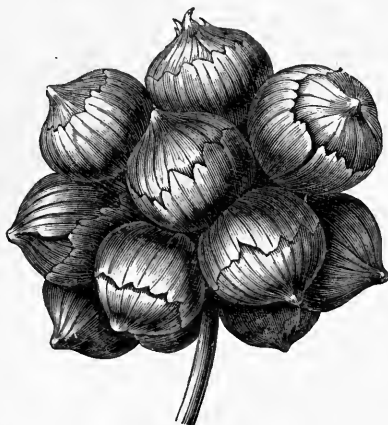

THE ALLIUM SCHœNOPRASUM. [A. 327.]

[Linnaeus]. Fr., *civette*, *ciboulette*, *fausse échalotte*. Ger., *Schnittlauch*, *Suppenlauch*. It., *erba cipollina*. Sp., *cibollino francés*, *ajo morisco*. Syn.: *Cepa schœnoprasa* [Möench]. Chive or cive; a species cultivated in Europe and the United States, with terete, filiform, fistulous leaves, purple flowers, and a small oval bulb. The leaves are used for seasoning food. [B. 19, 34.]—*A. scorodoprasum* [Linnaeus]. Fr., *rocamboule*, *ail d'Espagne*. Ger., *Roggenbole*, *Rokamboll*. Sp., *ajo fino* (6 pardo). Syn.: *Porrum scorodoprasum*. Rocamboule; a perennial European species closely resembling *A. sativum*, but with smaller bulblets and a more delicate flavor than the latter. It is the *ophioscorodon* of Dioscorides, and is sometimes confounded with the *A. ophioscorodon*. It is used for the same purposes as *A. sativum*. [B. 115, 178, 180, 200.]—*A. senescens* [Linnaeus]. Ger., *Narcissenlauch*. A European species with leaves like those of the narcissus. [L. 30.]—*A. setaceum* [Waldstein and Kitaibel]. The *A. moschatum*. [B. 178.]—*A. sibiricum* [Linnaeus]. The *A. roseum*. [B. 180], or the *A. schœnoprasum*. [B. 178.]—*A. spectabile*. The *A. ampeloprasum*. [B. 177.]—*A. sphaerocephalum* [Linnaeus]. A German species. [B. 64, 180.]—*A. stamineum triepidatis*. The *A. sativum*. [L. 84.]—*A. suaveolens* [Jacquin]. An Austrian species with bright purple flowers. [B. 178; L. 30.]—*A. subhirsutum* [Linnaeus]. A European species with linear ciliated leaves. According to some, the *moly* of Dioscorides. [B. 71, 180.]—*A. subrotundum*. The *A. ophioscorodon*. [D. 92.]—*A. Tenorii* [Sprengel]. The *A. roseum*. [B. 178.]—*A. tuberosum*. Fr., *ail tubereux*. A species cultivated in India. [D. 92.]—*A. uliginosum* [Don]. An Asiatic species, used in China as a depurative of the blood, and given in urinary troubles, hemorrhages, and spermatorrhœa. Locally it is applied as a remedy in toothache. [L. 75.]—*A. ursinum*. See the major list.—*A. victorialis*, *A. victoralis* [Linnaeus]. Fr., *ail serpentin*, *faux nard*, *faux spicanard*. Ger., *Siegwurz*, *netzswurzeliger Lauch*. It., *aglio serpentino*, *radice vittoriale*. Syn.: *Cepa victoralis*. *Victoralis longa*. A European species with a capitate umbel, flat elliptical non-fistular leaves, and a long rhizome along which the bulbs are disposed. The rhizome and bulbs were formerly regarded as prophylactic against wounds, accident, and enchantment, and were also used to relieve abdominal pain in pregnant women; and the emanations from the plant were believed by the miners of Silesia and Bohemia to counteract the effect of the noxious vapors rising from the mines. [B. 49, 71, 173; L. 84.]—*A. vineale* [Linnaeus]. Fr., *ail des vignes*. Ger., *Weinberglauch*. Crow garlic; a European species which has become naturalized in the United States. It gives a disagreeable odor to the milk and butter of the cows feeding upon it, and to wheat with which it becomes mixed by growing in the same field. [B. 34, 138; D. 92.]—*A. vulgare*. See the major list.—*Bulbus alii* [Belg. Ph., Swed. Ph.], *Radix alii*. The bulb of *A. sativum* (q. v.).—*Syrupus alii* [U. S. Ph.], *Syrupus de alio*. Fr., *sirap d'ail*. Ger., *Knoblauchsyrop*. It., *sciroppo di aglio*. Sp., *jirabe de ajo*. A preparation made by macerating 15 parts of garlic in 25 parts of dilute acetic acid for 4 days, adding 15 parts of filtrate of dilute acetic acid, expressing and filtering until 40 parts of filtrate are obtained, and adding 60 parts of sugar. A similar preparation, made by infusing 1 part of garlic in 2 parts of boiling water, and adding 2 of sugar, was formerly official in various continental pharmacopœias. [L. 65, 85.]

**ALLIUM ALPINUM** (Lat., n. n. A<sup>2</sup>(a<sup>3</sup>)-pi(pe)nu<sup>3</sup>m(nu<sup>4</sup>m). The *A. victorialis*. [B. 180.]—*Radix alii alpini*. The rhizome of *A. victorialis*. [B. 97, 180.]

**ALLIUM CEPA** (Lat.), n. n. Se(ka')pa<sup>3</sup>. Fr., *ognon commun* [Fr. Cod.], *ognon* [Fr. Cod.], Ger., *Zwiebel*, *Zwiebellauch*. It., *cipolla*. Sp., *cebolla*. Syn.: *Cepa* (vel *Cepa*), *Cepa vulgaris* [Bernhardt]. The onion; a biennial garden herb, botanically distinguished by having a naked fistulous scape swelling at the base, longer than the leaves, which are fistulous and terete, and bearing at its summit a large globose umbel of greenish-white flowers. The bulb is round or oblong and not compound, and consists of a series of concentric layers, the outer dry and membranous, the inner fleshy and succulent. A variety, *A. cepa*, var. *bulbiferum*, *A. cepa*, var. *proliferum*, tree onion, top onion, is distinguished by the flower stalk producing at its summit a cluster of small green bulbs instead of flowers and seeds. Another variety, the potato onion, or multiplier onion, produces a large number of small bulbs. The bulb of the onion is stimulant, expectorant, and diuretic, and has been given in infantile catarrhal affections, in dropsy, and in calculous affections; externally it acts as a mild irritant by virtue of a volatile oil which it contains, and is applied hot to the ear for the relief of earache, to the soles of the feet as a derivative in convulsive disorders, and as a

THE TOP ONION. [A, 327.]

Cod.] *ajo* [Sp. Ph.]. It has properties and uses similar to those of the onion (*q. v.* under *A. cepa*). [B, 34, 81.] See *Acetum ALLII*, *Syrupus ALLII*, *Liniment d'ail*, *OXYMEL alliatum*, and *ACETUM antihistemicum*.—*A. s. alterum*. The *A. ophioscorodon*. [B, 200.]—*A. s. caule planifolium bulbiferum*. The *A. s.* [L, 84.]—*Bulbus allii sativi*, *Radix allii sativi*. The bulb of *A. s.* [B, 108, 180.]—*Succus allii sativi*. The juice of the bulb of *A. s.* [B, 180.]

**ALLIUM URSINUM** [Linnaeus] (Lat.), n. n. U<sup>3</sup>(ur)si(sey)nu<sup>4</sup>m. Fr., *ail des ours* (ou *des bois*). Ger., *Bärenlauch*, *Waldknoblauch*. It., *aglio orsino*. Syn.: *Cepa ursina*. A species distinguished by its long-petiolate elliptical-lanceolate leaves and its snow-white flowers. It is found in Siberia, where it is eaten when young, and in Central Europe, where it is occasionally employed as a diuretic and antelmintic, and as a remedy in scurvy. [B, 173, 178, 180.]—*Herba allii ursini latifolii*, *Radix allii ursini latifolii*. The herb and rhizome of *A. u.*, both of which have been employed in medicine. [B, 180.]

**ALLIUM VULGARE** (Lat.), n. n. Vu<sup>3</sup>(wu)l-ga(ga<sup>3</sup>)re(re<sup>2</sup>). Fr., *ail commun*. Ger., *gemeiner Lauch*. It., *aglio commune*. Sp., *ajo comun*. Common garlic (*A. sativum*). [B, 180.]—*Radix allii vulgaris*. The bulb of *A. sativum*. [B, 180.]

**ALLMANHAUSEN** (Ger.), n. A<sup>3</sup>l'ma-ha<sup>3</sup>-u-ze-n. A spring in Bavaria, containing hydrogen sulphide, carbonates, chlorides, and iron. [L, 105.]

**ALLOCHETIA, ALLOCHEZIA** (Lat.), n's f. A<sup>2</sup>(a<sup>3</sup>l)-lo-ke-(ch<sup>2</sup>e'y)shi<sup>2</sup>(ti<sup>2</sup>)a<sup>3</sup>-zhi<sup>2</sup>(zi<sup>2</sup>)a<sup>3</sup>. From *ἄλλος*, another, and *χέειν*, to empty the bowels. Fr., *allockézie*. Ger., *Allochezie*. 1. A discharge of other than fecal matter from the bowels. 2. The passage of feces from an abnormal opening. [L, 50.]

**ALLOCHIRIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-lo-ki(ch<sup>2</sup>e'y)ri<sup>2</sup>-a<sup>3</sup>. From *ἄλλος*, another, and *χείρ*, hand. Fr., *allochirie*. Ger., *Allochirie*. Obersteiner's term for a derangement of the sense of touch in which a tactile impression made on one side of the body is apt to be referred by the patient to the corresponding point on the opposite side; observed in hysteria and in locomotor ataxia. [A, 319; "Brain," iv, 1881, p. 153 (D, 35).]

**ALLOCHOOS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>l)-lo-k<sup>2</sup>(lo<sup>2</sup>ch<sup>2</sup>)o'-o-s. From *ἄλλος*. Talking deliriously. [L, 53.]

**ALLOCHROIC**, adj. A<sup>2</sup>l-lo-kro'i<sup>2</sup>k. Gr., *ἄλλοχρῶος*. Fr., *allochroé*. Ger., *anderfarbig*. Sp., *alocroado*. 1. Changeable in color. 2. Not of the same color throughout. [L, 41, 63.]

**ALLOCHROISM**, n. A<sup>2</sup>l-lo-k'ro-i<sup>2</sup>zm. Lat., *allochroismus*. Fr., *alochroïsme*. Sp., *alochroismo*. 1. A gradual change of color. 2. Diversity of color. [L, 30, 41.]

**ALLOCHROMASIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-lo-kro(ch<sup>2</sup>ro)-ma-(ma<sup>3</sup>)zi<sup>2</sup>(si<sup>2</sup>)a<sup>3</sup>. From *ἄλλος*, another, and *χρῶμα*, color. Fr., *alochromasie*. Ger., *Allochromasie*. It., *alocromasia*. Sp., *alocromasia*. Color-blindness. [L, 50, 55.]

**ALLOCHROMATIC**, adj. A<sup>2</sup>l-lo-kro-ma'ti<sup>2</sup>k. Gr., *ἄλλοχρωματικός*. Lat., *allochromaticus*. Varying in color. [L, 50, 63.]

**ALLOCHROOUS**, adj. A<sup>2</sup>l-lo-k'ro-u<sup>3</sup>s. See *ALLOCHROIC*.

**ALLOCI-NETIC**, adj. A<sup>2</sup>l-lo-si<sup>2</sup>n-e<sup>2</sup>t'i<sup>2</sup>k. From *ἄλλος*, foreign, and *κίνησις*, setting in motion. Ger., *allokinetisch*. Occasioned by external impressions on motor nerves (said of muscular movements—the opposite of *autocineti*c). [W. Freyer (A, 319).]

**ALLODAPA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-lo-d'a<sup>3</sup>-pa<sup>3</sup>. From *ἄλλοδαπός*, foreign, strange. Fr., *alloadape*. Sp., *alloadapo*. 1. A genus of epidermaceous plants. [L, 41.] 2. A genus of *Orygidae*. [Diesig (L, 16).]—*A. typica*. A species of *A.* (2d def.) found in the cæcum of *Dichotylus cristatus*. [L, 63.]

**ALLODINTA** (Lat.), n. n. pl. A<sup>2</sup>(a<sup>3</sup>l)-lo-di<sup>2</sup>n'i<sup>2</sup>-a<sup>3</sup>. A subfamily of *Sambucideæ*, including *Sambucus* and 5 other genera. [B, 170.]

**ALLOMORPHIA, ALLOMORPHOSIS, ALLOEOPATHIA, ALLOEOPATHIC, ALLOEOPATHY**. See *ALLOMORPHIA*, *ALLOPATHIC*, and *ALLOPATHY*.

**ALLOEOSIS** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-le(lo-e<sup>2</sup>)o-s'i<sup>2</sup>s. Gen., *alloeosis* (-is). Gr., *ἄλλοίωσις*. 1. A change, as from disease to health. [L, 104.] 2. Mental aberration. [A, 311.]

**ALLOEOTIC**, adj. A<sup>2</sup>l-le-o<sup>2</sup>t'i<sup>2</sup>k. Lat., *alloeoticus*. Alterative.

**ALLOEOTICS**, n. pl. A<sup>2</sup>l-le-o<sup>2</sup>t'i<sup>2</sup>ks. From *ἄλλοιῶν*, to change. Lat., *alloeotici*. Fr., *alloeotiques*. It., *alloeotici*. Alteratives; substances which, according to the humoral pathologists, had the property of changing the composition of the humors, especially the blood. [D, 76.]

**ALLOGOTROPHIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-lo-g-o-tro'fi<sup>2</sup>-a<sup>3</sup>. From *ἄλλος*, another, and *τρέφειν*, to nourish. A condition in which one part of the body is nourished at the expense of another. [L, 104.]

**ALLOIOSIS, ALLOIOTICS**. See *ALLOEOSIS* and *ALLOEOTICS*.

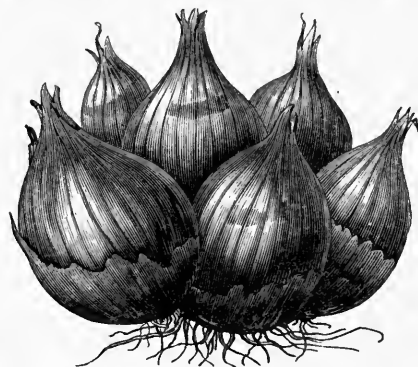

**ALLOKINETISCH** (Ger.), adj. A<sup>2</sup>l-lo-ki<sup>2</sup>n-e<sup>2</sup>t'i<sup>2</sup>sh. See *ALLOCI-NETIC*.

**ALLOLALIA** (Lat.), n. f. A<sup>2</sup>(a<sup>3</sup>l)-lo-la(la<sup>3</sup>)l'i<sup>2</sup>-a<sup>3</sup>. From *ἄλλος*, different, and *λαλέειν*, to speak. Fr., *allogalie*. Ger., *Allogalie*. A general term for affections of the faculty of speech. [L, 50, 116.]

**ALLOLALUS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>l)-lo-la<sup>3</sup>-lu<sup>3</sup>s(lu<sup>3</sup>s). Gr., *ἄλλοδαλος*. Affected with *allogalia* (*q. v.*). [L, 50.]

**ALLOMERISM**, n. A<sup>2</sup>l-lo<sup>2</sup>m'e<sup>2</sup>r-i<sup>2</sup>zm. Cooke's name for the principle which preserves the crystalline form of a substance, notwithstanding a change in its constituents. [B, 196.]

**ALLOMORPHISM**, n. A<sup>2</sup>l-lo-mo<sup>2</sup>r'f-i<sup>2</sup>zm. From *ἄλλος*, different, and *μορφή*, shape. Lat., *allomorpha*, *allomorphosis*. Fr., *allomorphie*. Ger., *Allomorphie*. It., *allomorfia*. 1. A change of shape (said, in teratology, of gross developmental abnormalities un-

THE MULTIPLIER ONION. [A, 327.]

discutient application to inflammatory swellings. The pulp is official in the Fr. Codex. [B, 5, 34, 119, 138.] See also *CATAPLASMA maturans* and *UNGUENTUM suppurans*.—*Bulbus allii cepæ*. The bulb of the onion. See *supra*.

**ALLIUM LATIFOLIUM** (Lat.), n. n. La<sup>2</sup>t(la<sup>3</sup>)l'i<sup>2</sup>fo'li<sup>2</sup>-u<sup>3</sup>m(u<sup>4</sup>m). A broad-leaved species of *A.*; probably the *A. victoriale*. [B.]—*A. l. hiflorum*. The moly of Theophrastus. [B, 200.] See *A. nigrum*.—*A. l. montanum maculatum*. *A. victoriale*. [B, 200.]—*Radix allii latifolii*. The rhizome of *A. victoriale*. [B, 180.]

**ALLIUM MONTANUM** (Lat.), n. n. Mo<sup>2</sup>n-ta(ta<sup>3</sup>)nu<sup>3</sup>m(u<sup>4</sup>m). 1. Of Schmidt, the *A. fallax*. 2. Of Sibthorp and Smith, a variety of the *A. carinatum* of Linnaeus. [B, 64.]—*A. m. bicorne*, *A. m. bicornum purpureum proliferum*. The *A. ampeloprasum*. [B, 200.]—*A. m. majus anglicum* Newton. The *A. scorodoprasum*. [B, 200.]—*Radix allii montani latifolii maculati*. The rhizome of *A. victoriale*. [B, 97.]

**ALLIUM SATIVUM** [Linnaeus] (Lat.), n. n. Sa<sup>2</sup>t(sa<sup>3</sup>)t(i'e)y-vu<sup>3</sup>m(u<sup>4</sup>m). Fr., *ail* [Fr. Cod.], *ail cultivé*. Ger., *Knoblauch*, *Gartenlauch*. It., *aglio*. Sp., *ajo cultivado*. Syn.: *Porrum sativum* [Reichenbach]. Common garlic, English garlic; a perennial species with a scape about 2 feet high, having linear-lanceolate leaves, pink or purplish flowers with tricuspidate stamens, and a compound bulb consisting of several small bulblets (cloves) inclosed in a common scaly membrane. These bulblets are oblong, laterally compressed, rounded on the back, and wedge-shaped anteriorly, and consist of an envelope of fleshy scales surrounding a fleshy center. They have a pungent, disagreeable odor and acrid taste, due to the presence of 1 per cent. of a nauseous volatile oil (oil of garlic), which, in the crude state, is a brownish-yellow liquid, heavier than water, made up of a mixture of allyl sulphide and oxide, but which, when rectified, is colorless and lighter than water, and consists mainly of allyl sulphide. Garlic also contains a little albumin, starch, and sugar, 35 per cent. of mucilage, and from 50 to 60 per cent. of water. The bulb is official as *allium* [U. S. Ph.], *allii bulbus* [Greek Ph.], *bulbus allii* [Belg. Ph., Swed. Ph.], *ail* [Fr.

accompanied by apparent histological changes). [A, 314.] 2. Metamorphosis. [A, 322.]

**ALLOMORPHOSIS** (Lat.), n. f.  $A^2(l(a^3l)-lo-mo^2rf-o'si^2s$ . Gen., *allomorphos'eo*s. See ALLOMORPHISM.

**ALLOMORPHUS** (Lat.), adj.  $A^2(l(a^3l)-lo-mo^2rf-u^3s(u^4s)$ . Affected with allomorphy (q. v.). [A, 322.]

**ALLON**, n. A Hebrew name for the oak. [L, 105.]

**ALLONBY**, n.  $A^2(l'o^2n-bi^2$ . A sea-bathing resort in the county of Cumberland, England. [A, 375; L, 57.]

**ALLONGE** (Fr.), n.  $A^2(l'o^2n^2zh$ . See ADAPTER.

**ALLONGEMENT** (Fr.), n.  $A^3(l'o^2n^2zh-ma^3n^2$ . Elongation.—**A. oedémateux avec prolapsus du col utérin**. A term applied by Guéniot to a special variety of swelling of the cervix uteri during labor, dependent on great hyperemia, and characterized by the rapidity with which it comes on and subsides. [<sup>1</sup> Arch. gén. de méd., April, 1873, p. 402; A, 24.]—**A. opératoire**. Any procedure for elongating a uterine tumor after it has been severed from its connections, and is lying in the vagina, thus so reducing its bulk in the other diameters as to admit of its extraction through the vulva. [Bandl (A, 319).]

**ALLOPALLADIUM**, n.  $A^2(l'o-pa^2l-di^2u^3m$ . A native crystalline variety of palladium. [B.]

**ALLOPATII**, n.  $A^2(l'o-pa^2th$ . See ALLOPATHIST.

**ALLOPATHETIC**, **ALLOPATHIC**, adj's.  $A^2(l'o-pa^2th-e^2t'-i^2k, -lo^2p'a^2th-i^2k$ . Lat., *allopathes, allopathicus*. Fr., *allopathique*. Ger., *alopathisch*. Sp., *alopático*. Pertaining to allopathy. [L.]

**ALLOPATHISER** (Fr.), v. tr.  $A^3(l'o-pa^3t-e-z$ . Sp., *alopatizar*. To treat according to allopathic principles. [L, 55.]

**ALLOPATHIST**, n.  $A^2(l'o^2p'a^2th-i^2st$ . Fr., *allopathe, allopathiste*. Ger., *Allopathist*. Sp., *alopalista*. One who practises or believes in allopathy (3d def.). [L.]

**ALLOPATHY**, n.  $A^2(l'o^2p'a^2th-i^2$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , another, and  $\pi\acute{\alpha}\theta\omicron\varsigma$ , pain or disease. Lat., *allopathia*. Fr., *allopathie*. Ger., *Allopathie*. It., *allopattia*. Sp., *alopatia*. 1. Pain or disease due to an agency working on the body from without. [A, 322.] 2. Disease in one part of the body occurring as the consequence of disease or injury in another part (e. g., in the liver as the result of injury to the head); also fracture by *contrecoup*. [A, 322.] 3. That therapeutical doctrine which teaches that diseases are to be cured by establishing artificial morbid conditions of an opposite character. Some homeopaths falsely apply the term to all medical practice which does not rest upon their own doctrine. Cf. HOMEOPATHY and ISOPATHY.

**ALLOPHANATE**, n.  $A^2(l'o^2f'a^2n-at$ . Fr., *allophanate*. Ger., *Allophanat*. It., *alofanato*. Sp., *alofanato*. A salt of allophanic acid. [B.]

**ALLOPHANIC**, adj.  $A^2(l'o-fa^2n-i^2k$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , different, and  $\phi\alpha\iota\nu\epsilon\sigma\theta\alpha\iota$ , to seem. Fr., *allophanique*. Ger., *allophanisch*. It., *alofanico*. Sp., *alofánico*.—**A. acid**. Fr., *acide allophanique*. Ger., *Allophansäure*. It., *acido alofanico*. Sp., *ácido alofánico*. Syn.: *ureocarbonic acid*. A supposititious substance,  $C_2H_4N_2O_3 = NH_2-CO-NH-CO-OH$ , acting as a monobasic acid, forming a series of salts called allophanates and a ethers, of the constitution  $NH_2-CO-NH-CO-O-R'$ , and bearing the same relation to biuret that the carbonates bear to urea. [B, 4.]—**A. amide**. See BIURET.—**A. ether**. Fr., *ether allophanique*. Ger., *Allophan-säure-Ester*. It., *etere alofanico*. An allophanate of a hydrocarbon radicle. [B.] See ALLYL allophanate, ETHYL allophanate, etc.

**ALLOPHANSÄURE** (Ger.), n.  $A^3(l'o-fa^2n^2zoi-re^2$ . Allophanic acid. [A, 324.]—**A. Aethylester**. Ethylene allophanate. [B.]—**A. Aethylester**. Ethyl allophanate. [B.]—**A. Ester**. Allophanic ether. [B.]—**A. Glycylester**. Glycyl allophanate. [B.]—**A. Methylster**. Methyl allophanate. [B.]—**A. Phenylester**. Phenyl allophanate. [B.]

**ALLOPHASIS** (Lat.), n. f.  $A^2(l(a^3l)-lo^2f'a^2s-si^2s$ . Gen., *allopha'se*o(s). From  $\alpha\lambda\lambda\omicron\varsigma$ , strange, unreal, and  $\phi\acute{\alpha}\nu\alpha\iota$ , to speak. Delirium.

**ALLOPHILLUS** (Lat.), n. m.  $A^2(l(a^3l)-lo-fi^2l'u^3s(lu^4s)$ . See ALLOPHYLUS.

**ALLOPHYLEÆ** (Lat.), n. f. pl.  $A^2(l(a^3l)-lo-fi^2l'u^3e^2-c(a^3-e^2)$ . For deriv., see ALLOPHYLUS. A tribe of sapindaceous plants established by Blume. [B.]

**ALLOPHYLUS** (Lat.), n. m.  $A^2(l(a^3l)-lo-fi^2l'u^3s(lu^4s)$ . Gleditsch's term for the genus *Allophylus* of Linnaeus. [B.]—**A. ternatus** [Loureiro]. The *Schmidelia cochinchinensis*, a Cochinchina species; used as a resolvent. [B, 180; L, 87.]

**ALLOPHYLUS** (Lat.), n. m.  $A^2(l(a^3l)-lo-fi^2l'u^3s(lu^4s)$ . From  $\alpha\lambda\lambda\omicron\phi\upsilon\lambda\omicron\varsigma$ , of another tribe, strange, foreign. Written also *allophylus* and *allophilus*. A genus of plants of the natural order *Hesperideæ*, established by Linnaeus. [B.]

**ALLOPTEROUS**, adj.  $A^2(l'o^2p'te^2-ru^3s$ . Lat., *alopterus* (from  $\alpha\lambda\lambda\omicron\varsigma$ , different, and  $\pi\tau\epsilon\rho\acute{o}\nu$ , a wing or fin). Fr., *aloptère*. Ger., *anderflügelicht*. Having the wings or the pectoral fins in an unusual situation. [Duméril (A, 385); L, 116.]

**ALLORO** (It.), n.  $A^3(l'o-ro$ . The bay-tree (*Laurus nobilis*). [B.]

**ALLORHYTHMIA** (Lat.), n. f.  $A^2(l(a^3l)-lo-r-i^2th^2(ru^4th^2)-mi^2-a^3$ . Fr., *allorhythmie*. Ger., *Allorhythmie*. From  $\alpha\lambda\lambda\omicron\varsigma$ , strange, and  $\rho\upsilon\theta\mu\acute{o}\varsigma$ , a regular motion. Written also *allorhythmia*. Any pathological deviation from the rhythm of the heart's action. [A, 319.]

**ALLOSORUS** (Lat.), n. f.  $A^2(l(a^3l)-lo-so^2ru^3s(ru^4s)$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , various, and  $\sigma\upsilon\rho\acute{o}\varsigma$ , a heap (see SORUS). Fr., *allosore*. Sp., *alósoro*. Bernhardi's name for a genus of polypodiaceous ferns. [A, 248; L, 49, 67.]—**A. crispus** [Bernhardi]. Syn.: *Osmunda crisp*

[Linnaeus]. Rock-brake; curled a.; a species found in Europe and North America. A decoction has been used in pulmonary catarrh. [L, 49.]

**ALLOSTEATODES** (Lat.), adj.  $A^2(l(a^3l)-lo-ste^2(sta)-a^3-to^2-dez$  (de's). From  $\alpha\lambda\lambda\omicron\varsigma$ , altered, and  $\sigma\tau\epsilon\alpha\tau\acute{o}\delta\eta\varsigma$ , tallow-like. Relating to an alteration of the sebaceous secretion, especially in color, as in *stearrhea flavescens* and *s. nigricans*. [G.]

**ALLOSTEMONES** (Lat.), n. m. pl.  $A^2(l(a^3l)-lo-ste^2m-o-ne^2s$ . A sub-class of exogenous plants established by Link, comprising the orders *Violariæ*, *Loaseæ*, *Passifloræ*, *Eunariaceæ*, *Papaveraceæ*, *Cruciferae*, *Capparidæ*, *Melanthææ*, *Besediaceæ*, *Oxalidæ*, *Balsaminææ*, *Cardaminææ*, *Geraniaceæ*, *Meliaceæ*, *Hippocastaneæ*, *Acerinææ*, *Malpighiaceæ*, *Erythroxyleæ*, *Guttiferae*, *Hypericinææ*, *Aurantia*, *Camelliaceæ*, *Tiliaceæ*, *Büttneriaceæ*, *Bombaceæ*, *Malvaceæ*, *Cistinææ*, *Bixinææ*, *Anonaceæ*, *Magnoliaceæ*, *Dilleniaceæ*, *Ranunculaceæ*, *Hypophytides*, *Sarraceniacææ*, and *Nymphaeaceæ*. [B, 170.]

**ALLOTHERM** (Ger.), n.  $A^3(l'o-te^2rm$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , foreign, and  $\theta\acute{\epsilon}\rho\mu\eta$ , heat. An animal whose temperature is immediately dependent on that of the medium in which it lives. [W. Preyer (A, 319).]

**ALLOTRIAPOSTEMA** (Lat.), n. n.  $A^2(l(a^3l)-lo^2t'/ri^2-o^2p(a^2p)-o^2st-e(a^2y)ma^3$ . Gen., *allotriapostem'atos*. From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, and  $\acute{\alpha}\pi\sigma\tau\eta\mu\alpha$ , an abscess. Fr., *allotriapostème*. Senffleben's term for an abscess containing a foreign body. [A, 322.]

**ALLOTRIECRISIS** (Lat.), n. f.  $A^2(l(a^3l)-lo^2t'/ri^2-e^2k-kri^2s-i^2s$ . Gen., *allotriecris'eos*. From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, and  $\acute{\epsilon}\kappa\kappa\rho\rho\rho\iota\varsigma$  (=  $\acute{\epsilon}\kappa\rho\rho\rho\mu\alpha$ , excrement). Fr., *allotriecrise*. Ger., *Allotriekrise*. The discharge of foreign substances with the excretions. [L, 50.]

**ALLOTRIECRITICUS** (Lat.), adj.  $A^2(l(a^3l)-lo^2t'/ri^2-e^2k-kri^2t'-i^2k-u^3s(u^4s)$ . Pertaining to allotriecrisis. [L, 50.]

**ALLOTRIOCHETIA**, **ALLOTRIOCHEZIA** (Lat.), n's f.  $A^2(l(a^3l)-lo^2t'/ri^2-o-ke(ch^2e^2)shi^2(t^2i)-a^3, -zi^2-a^3$ . Fr., *allotriochézie*. See ALLOCHEZIA.

**ALLOTRIODONTIA** (Lat.), n. f.  $A^2(l(a^3l)-lo^2t'/ri^2-o-do^2n'shi^2(t^2i)-a^3$ . From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, strange, and  $\acute{\omicron}\delta\omicron\upsilon\varsigma$ , a tooth. Fr., *allotriodontie*. Ger., *Allotriodontie*. It., *allotriodontia*. 1. The transplantation of teeth from one person to another. 2. An abnormal situation of teeth. [L, 30, 44, 55, 116.]

**ALLOTRIODONTICUS** (Lat.), adj.  $A^2(l(a^3l)-lo^2t'/ri^2-o-do^2nt'-i^2k-u^3s(u^4s)$ . Pertaining to *allotriodontia*. [L, 50.]

**ALLOTROGEUSIA**, **ALLOTROGEUSTIA** (Lat.), n's f.  $A^2(l(a^3l)-lo^2t'/ri^2-o-ju^2t'(ge^2-u)-si^2-a, -ju^2t'(ge^2-u)-sti^2-a^3$ . From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, and  $\gamma\epsilon\upsilon\sigma\iota\varsigma$ , the sense of taste. Fr., *allotrogeusie*. Ger., *Allotrogeusie*. A depraved or abnormal appetite. [L, 45, 54, 63.]

**ALLOTRIOLITHIASIS** (Lat.), n. f.  $A^2(l(a^3l)-lo^2t'/ri^2-o-li^2th-i(e^2-a^3-si^2s$ . Gen., *allotriolithia'seo*s. From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, and  $\lambda\iota\theta\iota\alpha\sigma\iota\varsigma$  (see LITHIASIS). Fr., *allotriolithiase*. Ger., *Allotriolithiase*. The formation of a calculus from foreign substances. [L, 50, 116.]

**ALLOTRIOLITHUS** (Lat.), n. m.  $A^2(l(a^3l)-lo^2t'-ri^2-o-li^2th-u^3s(u^4s)$ . Fr., *allotriolithe*. A calculous concrement formed in an unusual situation. [A, 385.]

**ALLOTRIOPHAGIST**, n.  $A^2(l'o^2t'/ri^2-o^2f'a^2-j^2i^2st$ . Gr.,  $\acute{\alpha}\lambda\lambda\omicron\tau\rho\iota\phi\acute{\alpha}\gamma\iota\varsigma$  (from  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , foreign, and  $\phi\alpha\gamma\epsilon\iota\nu$ , to eat). Lat., *allotriophagus*. Fr., *allotriophage*. Ger., *Allotriophag*. One addicted to allotriophagy. [L, 30, 41.]

**ALLOTRIOPHAGOUS**, adj.  $A^2(l'o^2t'/ri^2-o^2f'a^2g-u^3s$ . Lat., *allotriophagus*. Fr., *allotriophagique*. Ger., *allotriophagisch*. Sp., *alotriófago*. Pertaining to allotriophagy. [L, 41, 50, 98.]

**ALLOTRIOPHAGY**, n.  $A^2(l'o^2t'/ri^2-o^2f'a^2-j^2i^2$ . Lat., *allotriophagia*. Fr., *allotriophagie*. Ger., *Allotriophagie*. It., *allotriofagia*. Sp., *alotriofagia*. 1. A morbid propensity to eat innutritious or unsuitable substances. 2. The eating of such substances. [L, 44, 54, 55, 56, 98.]

**ALLOTRIOTECNIE** (Fr.), n.  $A^3(l'o^2t'-ri^2-o-te^2k-ne$ . See ALLOTRIOTEXIS.

**ALLOTRIOTECTICUS** (Lat.), adj.  $A^2(l(a^3l)-lo^2t'/ri^2-o-te^2k'-ti^2k-u^3s(u^4s)$ . 1. Born in an unusual manner. 2. Pertaining to an unusual delivery. [L, 50.]

**ALLOTRIOTEXIS** (Lat.), n. f.  $A^2(l(a^3l)-lo^2t'/ri^2-o-te^2x'i^2s$ . Gen., *allotriotex'eos*. From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , abnormal, and  $\tau\acute{\epsilon}\xi\iota\varsigma$ , parturition. Fr., *allotriotexie*. Ger., *Allotrioteknie*. It., *allotriotecnica*. 1. An abnormal delivery. 2. The birth of a foetal monster or mole. [L, 50.]

**ALLOTRIURIA** (Lat.), n. f.  $A^2(l(a^3l)-lo^2t'/ri^2-u^2(u)/ri^2-a^3$ . From  $\alpha\lambda\lambda\omicron\tau\rho\iota\omicron\varsigma$ , abnormal, and  $\omicron\upsilon\rho\epsilon\iota\nu$ , to pass urine. Fr., *allotriurie*. Ger., *Allotriurie*. The passing of urine containing unusual substances. [L, 30, 50.]

**ALLOTROPE**, n.  $A^2(l'o-trop$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , different, and  $\tau\rho\omicron\pi\eta$ , a change. Fr., *allotrope*. Ger., *Allotrope*. One of two or more isomeric forms of the same element. [B.] See also ISOMERISM.

**ALLOTROPHIC**, adj.  $A^2(l'o-tro^2f'i^2k$ . From  $\alpha\lambda\lambda\omicron\varsigma$ , different, and  $\tau\rho\omicron\phi\eta$ , nourishment. Fr., *allotrophique*. Lacking its ordinary nutritious properties, with or without having acquired injurious characters, in consequence of isomeric molecular changes occurring during its preparation or preservation (said of an alimentary albuminoid). [C. Robin (A, 385).]

**ALLOTROPIC**, adj.  $A^2(l'o-tro^2p'i^2k$ . Fr., *allotropique*. Ger., *allotropisch*. It., *allotropico*. Sp., *alotrópico*. Belonging to, or consisting of, an allotrope. [B; L, 55, 98.]

**ALLOTROPISM**, **ALLOTROPY**, n's.  $A^2(l'o-tro^2p-i^2zm, -pi^2$ . Lat., *allotropismus*. Fr., *allotropie*. Ger., *Allotropie*. It., *allotropia*. Sp., *alotropia*. See ISOMERISM. [L, 30, 44, 55, 98.]

**ALLOUCHIER** (Fr.), n.  $A^3$ -lu-shi<sup>2</sup>-a. See *Pyrus aria*.

**ALLOULA**, n. A Carib name for the *Solanum tuberosum*. [L. 105.]

**ALLOXAMIDE**, n.  $A^2$ -lo<sup>2</sup>x<sup>2</sup>a<sup>2</sup>m-i<sup>2</sup>d(id). Fr., *alloxamide*. A substance,  $C_4H_4N_4O_4 \cdot HO$ , produced by the action of ammonia on alloxan. [A. 385.]

**ALLOXAN**, n.  $A^2$ -lo<sup>2</sup>x<sup>2</sup>a<sup>2</sup>n. Lat., *alloxanum*. Fr., *alloxane*. Ger., *Alloxan*. It., *allossana*. Sp., *aloxano*. Syn.: *erythric acid*, *mesoxalylurea*. A substance obtained by the action of nitric acid or of nascent chlorine upon uric acid. It occurs in the form of large, colorless, efflorescent prismatic crystals of the constitution  $C_4H_2N_2O_4 + 4H_2O$ , or as small crystals of the constitution  $C_4H_2N_2O_4 + H_2O$ , and, the molecule of water being regarded as an integral part of its composition, its structural formula is probably  $CO(H)_2 \cdot CO \cdot NH \cdot CO$ . It is decomposed by dilute acids, forming urea, oxalic acid, and alloxantin. It has been found in the intestinal mucus in catarrhal enteritis. It gives a red color to the skin, and has been used as the basis of cosmetic preparations. [B. 3, 4; L. 44, 57, 77, 98.] — **A'saure** (Ger.). See *ALLOXANIC acid*.

**ALLOXANATE**, n.  $A^2$ -lo<sup>2</sup>x<sup>2</sup>a<sup>2</sup>n-at. Fr., *alloxanate*. Ger., *Alloxanat*. It., *allossanato*. Sp., *aloxanato*. A salt of alloxanic acid. There are probably three varieties: 1. *Acid a's*, of the general formula  $CO(NH_2) \cdot NR \cdot CO \cdot CO \cdot CO \cdot OR$ . 2. *Normal a's*, of the general formula  $CO(NH_2) \cdot NH \cdot CO \cdot CO \cdot CO \cdot OR$ . 3. *Basic a's*, or compounds of the oxides of some heavy metals with alloxanic acid.

**ALLOXANIC**, adj.  $A^2$ -lo<sup>2</sup>x<sup>2</sup>a<sup>2</sup>n-i<sup>2</sup>q. Fr., *alloxanique*. It., *allossanico*. Sp., *aloxánico*. Derived from, or belonging to, alloxan. [B. 1, 98.] — **A. acid**. Fr., *acide alloxanique*. Ger., *Alloxansäure*. It., *acido allossanico*. Sp., *ácido aloxánico*. A crystalline acid derived from alloxan by treatment with alkalis, having the composition  $CO(NH_2) \cdot NH \cdot CO \cdot CO \cdot CO \cdot OH = C_4H_4N_2O_6$ . It is regularly monobasic, but, the hydrogen atom attached to the second nitrogen atom being also replaceable, it acts as a dibasic acid. [B. 3, 4.]

**ALLOXANTHINE, ALLOXANTINE**, n's.  $A^2$ -lo<sup>2</sup>x<sup>2</sup>a<sup>2</sup>n'-then, -ten. Fr., *alloxantine*. Ger., *Alloxantin*. It., *allossantina*. Sp., *aloxantina*. Syn.: *urocin*. A substance occurring in small, hard prismatic or rhombic crystals, having the composition  $C_8H_4N_2O_7 + 3H_2O$ . It is formed by the action of warm dilute nitric acid on uric acid or alloxan, and in numerous other ways. [B. 3, 4.]

**ALLOY**, n.  $A^2$ -loi'. From Fr., *aloi* (= à loi, according to law, i. e., according to a standard of purity in metals to be coined). [A. 302.] Lat., *alligatio*. Fr., *alliage*. Ger., *Vermischung*. It., *lega*. Sp., *aleación*. A compound of two or more metals. [L. 52, 56, 69, 111.] Cf. **AMALGAM**. — **Fusible a.** A term denoting an alloy which melts at low temperatures, and into the composition of which mercury enters.

**ALLOY**, v. tr.  $A^2$ -loi'. Fr., *allier*. Ger., *vermischen*. It., *allegare*. Sp., *alear*. To reduce the purity of a metal by mixing one less valuable with it. [L. 46, 56, 95.]

**ALLSEED**, n.  $A^4$ -sed. A popular name for the *Polycarpus*; also applied to the *Chenopodium polyspermum*, the *Radiola millegrana*, and other plants. [L. 67.]

**ALLSEITSWENDIG** (Ger.), adj.  $A^3$ /zits-ve<sup>2</sup>nd-i<sup>2</sup>g. See **VAGUS** (adj.).

**ALLSPICE**, n.  $A^4$ -spis. See **PIMENTA** and **CALYCANTHUS**. — **A-tree**. See *Pimenta vulgaris* and *Calycanthus floridus*. — **Bush a.** See *Benzoïn odoriferum*. — **Carollina a.** See *Calycanthus floridus*. — **Japan a.** See *Chimonanthus fragrans*. — **Oil of a.** See *Oleum pimentæ*. — **Wild a.** See *Benzoïn odoriferum*.

**ALLTÄGIG, ALLTÄGLICH** (Ger.), adj's.  $A^3$ /tag-i<sup>2</sup>g, -li<sup>2</sup>ch<sup>2</sup>. Daily. [L. 80.] See **QUOTIDIAN**.

**ALLU-BATSALA**, n. A Telooogo name for the *Basella alba*. [B. 172.]

**ALLUBODON**, n. A Ceylonese name for the wood of the *Calyptranthes jambolana*. [L. 67.]

**ALLUCINATION** (Lat.), n. f.  $A^2$ (a<sup>3</sup>l)-lu<sup>2</sup>(lu)-si<sup>2</sup>n(ki<sup>2</sup>n)-a(a<sup>3</sup>)-shi<sup>2</sup>(ti<sup>2</sup>)-o. Gen., *allucinatio*'nis. See **HALLUCINATION**.

**ALLUF** (Ar.), n. See **ARUM serpentaria**.

**ALLUM**, n. See **ALUM**.

**ALLUME** (It.), n.  $A^3$ -lu'ma. Chalybeate springs in the island of Giglio. [L. 63.]

**ALLURE** (Fr.), n.  $A^3$ -lu'ar. See **GAIT**.

**ALLUS** (Lat.), n. m.  $A^2$ (a<sup>3</sup>l)/lu<sup>2</sup>s(lu<sup>2</sup>s). The great toe. [L. 48.] — **A. pollex**. The thumb. [L. 45.]

**ALLUX** (Lat.), n. m.  $A^2$ (a<sup>3</sup>l)/lu<sup>2</sup>x(lu<sup>2</sup>x). See **HALLUX**.

**ALLVOECHENTLICH** (Ger.), adv.  $A^1$ /voch<sup>2</sup>-e<sup>2</sup>nt-li<sup>2</sup>ch<sup>2</sup>. Weekly, once a week. [L. 46.] See **HEBDOMADAL**.

**ALLYL**, n.  $A^2$ /l<sup>2</sup>. For deriv., see **ALLIUM** and **-yl**\*. Lat., *alylum*. Fr., *allyle*. Ger., *Allyl*. It., *allile*. Sp., *alilo*. Syn.: *acryl*, *propylene*. A univalent radicle of the composition  $CH_2 = CH \cdot CH_2$ , differing from the trivalent radicle glyceryl,  $CH_2 = CH_2 \cdot CH_2$ , in the double linking of its first 2 carbon atoms. Its compounds occur in oil of garlic and oil of mustard. A in the free state always occurs as a double molecule. [B. 2, 4.] See **DIALLYL**. — **Acid a. sulphate**. See **A. sulphate**. — **A'acetessigester**, **A'acetessigsäure-Aethyl ester**. See **ETHYL allylacetacetate**. — **A. acetate**. Fr., *acétate d'allyle*. Ger., *Essigsäure-Allylester*. A liquid of the constitution  $CH_2 \cdot CO \cdot O(C_3H_5) = C_5H_8O_2$ . [B. 4.] — **A'acetate**. Fr., *almit-acétate*. Ger., *Allylacetates Salz*. A salt of allyl-acetic acid. [B.] — **A'acetic acid**. Fr., *acide allyl-acétique*. Ger., *Allylessigsäure*. It., *acido alit-acetico*. Sp., *ácido alit-acético*. A colorless oily liquid having the properties of a monobasic

acid and the constitution  $C_3H_5O_2 = CH_2(C_2H_5) \cdot CO \cdot OH$ , or that of acetic acid in which allyl replaces hydrogen. It is isomeric with tiglic and angelic acids. [B. 4.] — **A'acetic ether**. Fr., *ether allyl-acétique*. Ger., *Allylessigsäure-Ester*. It., *etere alit-acetico*. An allylacetate of a compound radicle, usually applied to ethyl a-e. (ethyl allylacetate). [B. 2.] — **A'acetocetate**. An acetocetate in which a replaces the radicle hydrogen. [B.] See **ETHYL allylacetocetate**. — **A. acetone**. See **METHYLLSCROTYL KETONE**. — **A. alcohol**. Fr., *alcool allylique*. Ger., *Allylalkohol*. It., *alcool alilico*. A mobile liquid of pungent odor prepared by the action of oxalic acid upon glycerin and having the constitution  $C_3H_5O = CH_2 \cdot CH \cdot CH_2 \cdot OH$ , isomeric with propionic aldehyde. [B. 3, 4.] — **A. alcohol bromide**, **A. alcohol chloride**, **A. alcohol cyanide**. Fr., *bromure d'alcool allylique*, *chlorure d'alcool allylique*, *cyanure d'alcool allylique*. Ger., *Allylalkoholbromür*, *Allylalkoholchlorür*, *Allylalkoholcyanür*. Addition compounds of a. with chlorine, bromine, and cyanogen. See **A. alcohol dibromide**, **A. alcohol dichloride**, **A. alcohol dicyanide**. — **A. alcohol dibromide**. Fr., *dibromure d'alcool allylique*, *alcool allylique bibromé*. Ger., *Allylalkoholdibromür*. See **DIBROMHYDRIN**. — **A. alcohol dichloride**. Fr., *dichlorure d'alcool allylique*, *alcool allylique bichlore*. Ger., *Allylalkoholdichlorür*. See **DICHLORHYDRIN**. — **A. alcohol dicyanide**. Fr., *dicyanure d'alcool allylique*. Ger., *Allylalkoholdicyanür*. See **DICYANHYDRIN**. — **A. aldehyde**. Acrolein. [L. 65.] — **A'alkohol**, **A'alkoholbromür**, **A'alkoholchlorür**, **A'alkoholdibromür**, **A'alkoholdichlorür**, **A'alkoholdicyanür** (Ger.). See **A. alcohol**, **A. alcohol bromide**, etc. — **A. amine**. See **ALLYLAMINE**. — **A. and ethyl oxide**. See **ALLYLETHYL ether**. — **A. and glyceryl oxide**. See **TRIALLYLIN**. — **A. and hydrogen sulphate**. Fr., *sulfate d'allyle et d'hydrogène*. Acid a. sulphate. See **A. sulphate**. — **A. and hydrogen sulphide**. Fr., *sulfure d'allyle et d'hydrogène*. See **A. mercaptan**. — **A. and methyloxyde**. See **ALLYLMETHYL ether**. — **A. and phenyl oxide**. See **ALLYLPHENYL ether**. — **A'aniline**. Fr., *allyl-aniline*. Ger., *Allylanilin*. It., *alil-anilina*. Aniline in which a replaces hydrogen:  $N(C_2H_5)(C_2H_5)H = C_6H_{11}N$ . [B. 2.] — **A. arsenide**. Fr., *arsénure d'allyle*. Ger., *Allylarсениür*. See **TETRAALLYLARSONIUM**. — **A'äther** (Ger.). See **A. ether**. — **A'äthylather**, **A'äthylöxyd** (Ger.). See **ALLYLETHYL ether**. — **A'benzene**. Fr., *allyl-benzine*. Ger., *Allylbenzol*. It., *alil-benzina*. Beta phenylpropylene. [B.] See **PHENYLPROPYLENE**. — **A. borate**. Fr., *borate d'allyle*. Ger., *Allylborat*. *Borsäure-Allylester*. It., *borato di alile*. Sp., *borato de alilo*. A liquid emitting pungent irritating vapors and having the composition  $(C_3H_5)_3BO_2$ . [B. 3.] — **A. bromide**. Fr., *bromure d'allyle*. Ger., *Allylbromür*. *Bromallyl*. It., *bromuro di alile*. Sp., *bromuro de alilo*. A liquid of pungent odor, having the composition  $C_3H_5Br = CH_2 \cdot CH \cdot CH_2Br$ . [B. 3.] For the other bodies called bromides of a., see **DIALLYL tetrabromide** and **TRIBROMHYDRIN**. — **A'carbamide**. Fr., *allyl-carbamide*. Ger., *Allylcarbamid*. See **ALLYLUREA**. — **A. carbamine**. Fr., *allyl-carbamine*. Ger., *Allylcarbamin*. A. isocyanide. [B. 3.] See **A. cyanide**. — **A. carbimide**. Fr., *allyl-carbimide*. Ger., *Allylcarbimid*. See **A. pseudocyanate**. — **A. carbonyl**, and **hydrogen sulphide**. See **ALLYLTHIOCARBONIC acid**. — **A. carboxylamine**. Fr., *allyl-carboxylamine*. Ger., *Allylcarboxylamin*. See **A. pseudocyanate**. — **A. chloride**. Fr., *chlorure d'allyle*. Ger., *Allylchlorür*. It., *cloruro di alile*. Sp., *cloruro de alilo*. A liquid of pungent odor, boiling at 44° C., and having the composition  $C_3H_5Cl = CH_2 \cdot CH \cdot CH_2Cl$ . [B. 3.] — **A. chlorobromhydrin**. Fr., *allyl-chlorobromhydrine*. Ger., *Allylchlorbromhydrin*. See **CHLOROBROMHYDRIN**. — **A'cyanamide**. Fr., *allyl-cyanamide*. Ger., *Allylcyanamid*. Syn.: *sinamine*. A substance of the constitution  $C_3N_2H_5 = CN \cdot NH \cdot C_2H_5$ , or, according to Hofmann,  $C_3N_2(C_2H_5)(NH \cdot C_2H_5)_2$ , obtained by the action of lead hydroxide upon allylthiourea. It is a syrupy liquid, which, combined with water of crystallization ( $2C_3N_2H_5 + H_2O$ ), forms prismatic crystals. It has a very bitter taste and a strong alkaline reaction, and possesses marked basic properties. [B. 3, 4.] — **A. cyanide**. Fr., *cyanure d'allyle*. Ger., *Allylcyanür*. It., *cianuro di alile*. Sp., *cianuro de alilo*. A compound of a. with cyanogen. A. isocyanide, *allylcarbamine*,  $C_3H_5N = C \equiv N \cdot CH_2 \cdot CH \cdot CH_2$ , is a mobile liquid, having an exceedingly penetrating and permanent disagreeable odor. [B. 3.] — **A. cyano-carbonate**. Fr., *cyanocarbone d'allyle*. Ger., *Cyanacarbonat-Allylester*. A body of the constitution  $CO(CN) \cdot O \cdot C_3H_5 = C_5H_5NO_2$ . [B. 2.] — **A. cyanoformate**. Fr., *cyanofornate d'allyle*. Ger., *Cyanameisensäure-Allylester*. A colorless liquid, having an odor of mustard, formed by the decomposition of a. alcohol dicyanide. [B. 3.] — **A. dibromide**. Fr., *dibromure d'allyle*. Ger., *Allyldibromür*. It., *dibromuro di alile*. Sp., *dibromuro de alilo*. See **DIALLYL tetrabromide**. — **A. dichlorhydrin**. Fr., *allyl-dichlorhydrine*. Ger., *Allyldichlorhydrin*. A. alcohol dichloride. [B. 2.] See **DICHLORHYDRIN**. — **A'diethylcarbinol**. Fr., *allyl-diethylcarbinol*. Ger., *Allyldiäthylcarbinol*. A tertiary alcohol of the composition  $C_9H_{19}O = (C_2H_5)_2(C_3H_5)_2COH$ . [B. 3.] — **A. diiodide**. Fr., *diiodure d'allyle*. Ger., *Allyldiödyd*. See **DIALLYL tetraiodide**. — **A'diisopropylcarbinol**. Fr., *allyl-diisopropylcarbinol*. Ger., *Allyldiisopropylcarbinol*. A tertiary alcohol of the composition  $C_{10}H_{20}O = (C_3H_7)_2(C_2H_5)(CH_3)COH$ . [B. 3.] — **A'dimethylcarbinol**. Fr., *allyl-diméthylcarbinol*. Ger., *Allyldimethylcarbinol*. A tertiary alcohol of the composition  $C_{10}H_{20}O = (C_2H_5)(CH_3)_2(C_3H_7)COH$ . [B. 2.] — **A'dipropylcarbinol**. Fr., *allyl-dipropylcarbinol*. Ger., *Allyldipropylcarbinol*. A tertiary alcohol of the composition  $C_{10}H_{20}O = (C_3H_7)_2(C_2H_5)(CH_3)COH$ . [B. 3.] — **A'dithiocarbamate**. A salt of allyldithiocarbamic acid. [B.] — **A. dithiocarbamic acid**. Fr., *acide allyl-dithiocarbamique*. Ger., *Allyldithiocarbaminsäure*. Syn.: *sulphosinapic acid*, *allylsulphocarbanic (allylthiocarbamic) acid*. A monobasic acid, known only through its salts, having the composition  $NH(C_2H_5)_2 \cdot CS = S \cdot H = C_2H_5 \cdot NS_2$ . [B. 3.] — **A'essigsäure** (Ger.). Allylactic acid. [B.] — **A'essigsäure-Aethyl ester** (Ger.). Ethyl allylacetate. [B.] — **A'essigsäure-Ester** (Ger.). Allylactic ether. [B.] — **A'ester** (Ger.). A compound a. ether; a salt of a. [B.] — **A. ether**. Fr., *ether allylique*. Ger., *Allyläther*, *Allylester*. It., *etere alilico*. Any compound of a.

with a non-metallic element or an acid radicle; particularly the compound of a. with oxygen, or diallyl oxide,  $C_3H_5O = CH_2 : CH - CH_2 - O - CH_2 - CH_2$ ; a liquid lighter than water, having an odor of horse-radish, contained in crude oil of garlic. [B. 2, 3.]—**A'ethyl.** Fr., *allyl-éthyle*. Ger., *Allyl-äthyl*. It., *allil-étile*. See **AMYLENE**.—**A'ethyl ether.** Fr., *éthér (ou oxyde) allyl-éthyl-éthylique*. Ger., *Allyl-äthyl-äther, Allyl-äthyl-äther*. It., *etere (o ossido allil-étile)*. A liquid of the constitution  $C_3H_5 - O - C_2H_5 = C_5H_{10}O$ . [B. 3, 4.]—**A'ethylic.** Fr., *allyl-éthyl-éthylique*. Containing both a. and ethyl. [B.]—**A'ethylic oxide, A'ethyl oxide.** See **A'ethyl ether**.—**A'eugenol.** Fr., *allyl-eugénol*. Ger., *Allyleugenol*. A liquid having the composition  $C_{11}H_{16}O_2 = C_6H_5(O.C_3H_5)(O.CH_3)$ . [B. 2.]—**A. formate.** Fr., *formiate d'allyle*. Ger., *Amcisensäure-Allylester*. It., *formiato di allile*. A liquid of pungent odor resembling that of mustard, having the composition  $C_3H_5O_2 = CHO.O.C_3H_5$ . [B. 3.]—**A'harnstoff** (Ger.). Allylurea. [B.]—**A. hydrate.** Fr., *hydrate d'allyle*. Ger., *Allylhydrat*. It., *idrato di allile*. Sp., *hidrato de alilo*. A. alcohol.—**A. hydride.** Fr., *hydrure d'allyle*. Ger., *Allylhydrür*. It., *idruo di allile*. Propylene. [B. 2, 4.]—**A. hydrosulphide.** See **A. mercaptan**.—**A. iodide.** Fr., *iodeure d'allyle*. Ger., *Allyljodür*. It., *iolduro di allile*. Sp., *ióduro de alilo*. A liquid of pungent garlicky odor having the constitution  $C_3H_5I = CH_2 : CH - CH_2I$ . [B. 3.] For the so-called diiodide of a., see **DIALYL tetraiodide**.—**A. iodo-dichloride.** Fr., *iodo-dichlorure d'allyle*. Ger., *Allyljodürdichlorür*. See **IODODICHLORHYDRIN**.—**A. isocyanate.** Fr., *isocyanate d'allyle*. Ger., *Allylisocyanat, Isocyan-säure-Allylester*. It., *isocianato di allile*. See **A. pseudocyanate**.—**A. isocyanide.** Fr., *isocyanure d'allyle*. Ger., *Allylisocyanür*. It., *isocianuro di allile*. Sp., *isocianuro de alilo*. See **A. cyanide**.—**A. isosulphocyanate, A. isosulphocyanide, A. isothiocyanate.** Fr., *isosulfo-cyanure (ou isosulfo-cyanate ou isothiocyanate) d'allyle*. Ger., *Allyl-isosulfo-cyanür, Allylsulfo-cyanat, Allylthiocyanat*. It., *isosolfocianuro (ou isosolfocianato) di allile*. See **A. pseudothiocyanate**.—**A. iodür** (Ger.). See **A. iodide**.—**A. iodürdichlorür** (Ger.). See **A. iodo-dichloride**.—**A. malonic acid.** Fr., *acide allyl-malonique*. Ger., *Allylmalonsäure*. It., *acido allil-malonico*. A dibasic acid, isomeric with hydromucic acid, having the constitution  $C_6H_8O_4 = C(C_3H_5)H - (CO.OH)_2$ , of malonic acid in which a. replaces hydrogen. [B. 4.]—**A. mercaptan.** Fr., *allyl-mercaptan*. Ger., *Allyl-mercaptan*. A liquid of ethereal garlicky odor having the composition  $C_3H_5SH$ , or that of a. alcohol in which sulphur replaces oxygen. [B. 3, 4.]—**A. mercaptide.** Fr., *allyl-mercaptide*. Ger., *Allylmercaptid*. A compound of allyl mercaptan with a metal, of the general formula  $(C_3H_5S)_nR$ , where R is a radicle of the quantivalence of n; an allylate in which sulphur replaces oxygen. [B.]—**A. methyl.** Fr., *allyl-méthyle*. Ger., *Allylmethyl*. It., *allil-metile*. Sp., *alil-metilo*. A radicle compounded of a. and methyl; normal butylene. [B.] See **BUTYLENE**.—**A. methyl ether.** Fr., *éthér (ou oxyde) allyl-méthyl-éthylique*. Ger., *Allylmethyl-äther, Allyl-methyl-äther*. It., *etere (o ossido) allil-mettilico*. A colorless liquid of the constitution  $C_4H_8O = CH_2 : CH - CH_2 - O - CH_3$ , formed by the action of a. iodide upon sodium methylate. [B. 4.]—**A. methyl-ic.** Fr., *allyl-méthyl-éthylique*. It., *allil-mettilico*. Pertaining to or consisting of a. and methyl. [B.]—**A. methylic oxide, A. methylic oxide.** See **A. methyl ether**.—**A. methylpropylcarbinol.** Fr., *allyl-méthyl-propyl-carbinol*. Ger., *Allylmethylpropyl-carbinol*. A tertiary alcohol of the composition  $C_8H_{16}O = (C_3H_5)(CH_3)(C_3H_5)COH$ . [B. 3.]—**A. monobromide.** Fr., *monobromure d'allyle*. Ger., *Allylmonobromür*. It., *monobromuro di allile*. Sp., *monobromuro de alilo*. See **A. bromide**.—**A. monochloride.** Fr., *monochlorure d'allyle*. Ger., *Allylmonochlorür*. It., *monochloruro di allile*. Sp., *monochloruro de alilo*. See **A. chloride**.—**A. moniodide.** Fr., *moniodure d'allyle*. Ger., *Allylmoniodür*. It., *monioduro di allile*. See **A. iodide**.—**A. mustard-oil.** Ger., *Allylsenföl*. See **A. pseudothiocyanate**.—**A. nitrate.** Fr., *azotate d'allyle*. Ger., *Allylnitrat*. *Sulphate-säure-Allylester*. It., *nitrate di allile*. Sp., *nitrate de alilo*. A mobile liquid of pungent odor having the constitution  $C_3H_5NO_3$ . [B. 3.]—**A. oxalate.** Fr., *oxalate d'allyle*. Ger., *Allyloxalat*. *Oxal-säure-Allylester*. It., *ossalato di allile*. Sp., *ossalato de alilo*. An oily liquid, having an odor of mustard, of the composition  $C_8H_8O_4 = C_2O_3.O_2(C_3H_5)_2$ . [B. 2, 3.]—**A. oxide.** Fr., *oxyde d'allyle*. Ger., *Allyloxide*. It., *ossido di allile*. Sp., *óxido de alilo*. See **A. ether**.—**A. oxybutyric acid.** Fr., *acide allyl-oxybutyrique*. Ger., *Allyloxybuttersäure*. It., *acido allil-ossibutirico*. A monobasic acid having the constitution  $C_7H_{10}O_3 = CH_2 : CH(OH).CH(C_3H_5) - CO.OH$ , or that of hydroxybutyric acid in which a. replaces hydrogen. [B. 4.]—**A. phenol.** Fr., *allyl-phénol*. Ger., *Allylphenol*. It., *allil-fenolo*. Syn.: *anol*. A substance forming laminar crystals of the constitution  $C_9H_{10}O = C_6H_5(OH)(C_3H_5)$ , prepared by the action of potash upon anisic aldehyde. [B. 18.]—**A. phenylether.** Fr., *éthér (ou oxyde) allyl-phénylique*. Ger., *Allylphenyl-äther, Allylphenyl-äther*. It., *etere (o ossido) allil-fenilico*. A colorless, strongly refracting liquid, of the same density as water, formed by the action of sodium phenylate upon a. bromide, and having the composition  $C_9H_{10}O = C_6H_5O - CH_2$ , isomeric with allylphenol. [B. 2.]—**A. phenylic.** Fr., *allyl-phénylique*. It., *allil-fenilico*. Containing both a. and phenyl. [B.]—**A. phenylic oxide, A. phenylic oxide.** See **A. phenyl ether**.—**A. piperidine.** Fr., *allyl-pipéridine*. Ger., *Allylpiperidin*. A liquid, boiling at 140° C., having the composition  $C_8H_{11}N = C_3H_5N.C_3H_5$ . [B. 79.]—**A. pseudocyanate.** Fr., *pseudocyanate d'allyle*. Ger., *Allylpseudocyanat, Pseudocyan-säure-Allylester*. Syn.: *allylcarbocyanamine, a. isocyanate*. An oily liquid, of pungent irritating odor, formed by the action of potassium pseudocyanate upon a. iodide, and having the constitution  $C_3H_5NO = CH_2 : CH - CH_2 - N : C : O$ . [B. 4.]—**A. pseudosulphocyanate, A. pseudothiocyanate.** Fr., *pseudosulfo-cyanate (ou pseudothiocyanate) d'allyle*. Ger., *Allylpseudosulfo-cyanat, Allylpseudothiocyanat*. Syn.: *a. isothiocyanate, a. isosulphocyanate, a. mustard-oil*. A substance of the composition  $C_3H_5NS = CH_2 : CH.CH_2 - N : C : S$ , produced by the decomposition of myronic acid (a glucoside contained in mustard-

seed) under the combined action of water and myrosin (an albuminous ferment present in the seeds); also produced artificially by the action of potassium thiocyanate upon a. iodide. It is a colorless oily liquid, of the sp. gr. of 1.036, at 0° C., insoluble in water, soluble in alcohol and in ether; has an exceedingly penetrating pungent odor, and sharp biting taste; is very irritant to the mucous membranes when inhaled; and, locally applied, is a vesicant. It has been employed as a counter-irritant. [B. 2, 3, 4.]—**A. rhodanür** (Ger.). A. thiocyanate. [B. 49.]—**A. schwefelharzstoff** (Ger.). A. thiourea. [B.]—**A. schwefelsäure** (Ger.). A. sulphuric acid. [B.]—**A. schwefelwasserstoff** (Ger.). A. mercaptan. [B.]—**A. senföl** (Ger.). A. mustard-oil. [B.] See **A. pseudothiocyanate**.—**A. sulfat** (Ger.). 1. A. sulphate. 2. Allylthiourea. [B.]—**A. sulfur, A. sulfuret** (Ger.). A. sulphide. [B. 37.]—**A. sulfurique** (Fr.). See **A. sulphuric acid**.—**A. sulfate.** Fr., *sulfate d'allyle*. Ger., *Allylsulfat, Schwefelsäure-Allylester*. It., *solfato di allile*. Sp., *sulfato de alilo*. A compound of a. and sulphuric acid. The only known sulphate of a. is *acid a. sulphate*, or *allylsulphuric acid*, a substance of the composition  $C_3H_5HSO_4$ , acting as a monobasic acid, forming salts called allylsulphates. [B. 3.]—**A. sulphate.** (Fr.), *allyl-sulfate*. Ger., *Allylsulfat*. It., *allil-solfato*. A salt of allylsulphuric acid; a compound of a base with acid a. sulphate, of the general formula  $(C_3H_5SO_4)_nR$ , in which R is a radicle of the quantivalence of n.—**A. sulphide.** Fr., *sulfure d'allyle*. Ger., *Allylsulfür*. It., *solfuro di allile*. Sp., *sulfuro de alilo*. Syn.: *diallyl sulphide, thioallyl ether*. A substance of the constitution  $C_4H_8S = CH_2 : CH.CH_2 - S - CH_2.CH_2 - CH_2$ , forming the chief constituent of rectified oil of garlic (*q. v.* under *Allium sativum*), and developed in the leaves and seeds of many cruciferous plants; also obtainable artificially by the action of potassium sulphide upon a. iodide. When pure, it is a colorless, oily liquid of powerful alliaceous odor. [B. 3, 4.]—**A. sulphocarbamate.** Fr., *allyl-sulfo-carbamate*. Ger., *Allylsulphocarbamat*. See **A. dithiocarbamate**.—**A. sulphocarbamic acid.** Fr., *acide allyl-sulfo-carbamique*. Ger., *Allylsulphocarbaminsäure*. It., *acido allil-sulfo-carbamico*. Ger., *Allylthiocarbonat*. A salt of allylthiocarbonic acid. [B.]—**A. thiocarbonic acid.** Fr., *acide allyl-thiocarbonique*. Ger., *Allylthiocarbaminsäure*. A substance, occurring under the form of yellow acicular crystals, having the properties of a monobasic acid, and the formula  $C_3H_5S_2O = (C_3H_5)S - CO - SH$ , or that of thiocarbonic acid in which a. replaces hydrogen. [B. 2.]—**A. thiocyanate.** Fr., *thiocyanate d'allyle*. Ger., *Allylthiocyanat, Thiocyan-säure-Allylester*. A substance of the composition  $C_3H_5SN = N \equiv C - S - CH_2.CH_2 - CH_2$ , isomeric with a. pseudothiocyanate, and readily convertible into the latter. It is a colorless, highly refracting, oily liquid, having an odor resembling at once that of garlic and that of hydrocyanic acid. It produces headache, nausea, and nervous disorders when inhaled. [B. 2, 3.]—**A. thioether.** Fr., *allyl-thioether*. Ger., *Allylthioäther*. See **A. sulphide**.—**A. thioharzstoff** (Ger.). A. thiourea. [B.]—**A. thiourea.** Fr., *allyl-thiouree*. Ger., *Allylthioharzstoff*. Syn.: *siamine* [Will.], *mustard-oil ammonia, allylthiocarbamine*. A base, formed by the action of ammonia on oil of mustard, and having the constitution of thiourea in which a. replaces an atom of hydrogen;  $C_3H_5N_2S = H_2N - CS - NH(C_3H_5)$ . It forms crystals moderately soluble in water, readily soluble in alcohol. Given internally, it produces cardiac palpitation and insomnia, and is excreted by the urine as ammonium thiocyanate. [Wöhler and Frerichs (B. 3).]—**A. tribromide.** Fr., *tribromure d'allyle*. Ger., *Allyltribromür*. It., *tribromuro di allile*. Sp., *tribromuro de alilo*. See **TRIBROMHYDRIN**.—**A. trichloride.** Fr., *trichlorure d'allyle*. Ger., *Allyltrichlorür*. It., *trichloruro di allile*. Sp., *trichloruro de alilo*. See **TRICHLORHYDRIN**.—**A. urea.** Fr., *allyl-urée*. Ger., *Allylharzstoff*. It., *allil-urea*. A substance forming prismatic crystals readily soluble in water, having the constitution  $C_3H_5N_2O = NH_2 - CO - NH(C_3H_5)$ , being that of urea in which a. replaces 1 atom of hydrogen. [B. 3.] Cf. **DIALYL urea**.—**A. xanthic acid.** Fr., *acide allyl-xanthique*. See **A. thiocarbonic acid**.—**Ameisensäure** (A. Ger.). See **A. formate**.—**Borsaures A.** (Ger.). **ALLYLAMINE**, n.  $A^2I^2I^2a^2m$ -en. From *allyl* and *amine*. Fr., *allylamine*. Ger., *Allylamin*. It., *allilamina*, *allilamina*. A base,  $C_3H_7N = N(C_3H_5)_2$ , formed by the substitution of allyl for an atom of hydrogen in ammonia. It is a liquid, of strong ammoniacal odor, the vapor of which when inhaled produces sneezing and lachrimation. It combines with acids to form crystalline salts. [B, 3.] See also TRIALLYLAMINE and TETRALLYLAMMONIUM.

**ALLYLATE**, n.  $A^2I^2I^2at$ -at. Fr., *allylate*. Ger., *Allylat*. It., *allilato*. Sp., *alilato*. A derivative of allyl alcohol in which the hydrogen of the latter is replaced by a base. The general formula of the a's is  $(CH_2 : CH.CH_2.O)_nR$ , where R is a radicle the quantitative value of which is  $n$ . [B, 4.]

[B.]—**Trichlorure d'a.** Allyl trichloride. [B.]

**ALLYLENE** (Ger.), n.  $A^2I^2lu^2an$ . Allylene.—**A'acetat.** Allylene acetate. [B.]—**A'bromür.** Allylene bromide. [B.]—**A'chlorür.** Allylene chloride. [B.]—**A'diacetat.** Allylene acetate. [B.]—**A'dibromür.** Allylene dibromide. [B.]—**A'dichlorür.** Allylene dichloride. [B.]—**A'dijodür.** Allylene diiodide. [B.]—**A'jodür.** Allylene iodide. [B.]—**A'oxyd.** Allylene oxide. [B.]—**A'tetrabromür.** Allylene tetrabromide. [B.]—**A'tetrachlorür.** Allylene tetrachloride. [B.]

**ALLYLENE**, n.  $A^2I^2lu^2en$ . From *allyl* and *-ene*. Fr., *allylène*. Ger., *Allylen*. It., *allilene*. Syn.: *propine*. A colorless gas, having the constitution  $C_3H_4 = CH_2 - C \equiv CH$ , i. e., bearing the same relation to allyl that ethylene bears to ethyl. In composition it acts as a bivalent radicle,  $CH_2 - C \equiv CH$ , or a quadrivalent radicle,  $CH_2 - C' - CH$ .—An isomeric modification, *allene*, or *isobutylene*, has the composition  $CH_2 = C = CH_2$ . [B, 2, 4.]—**Aa.** *Alpha*.—**Ordinary a.**—**Acetate.** Fr., *acétate d'allylène*. Ger., *Allylenacetat*. A compound of a. and acetic acid. The *diacetate*,  $C_7H_{10}O_4 = C_3H_4(C_2H_3O_2)_2$ , is known. [B, 2.]—**A. bromide.** Fr., *bromure d'allylène*. Ger., *Allylenbromür*. See *A. dibromide* and *bromure d'allylène*.—**A. chloride.** Fr., *chlorure d'allylène*. Ger., *Allylenchlorür*. See *A. dichloride* and *A. tetrachloride*.—**A. diacetate.** Fr., *diacétate d'allylène*. Ger., *Allylendiacetat*. See *A. acetate*.—**A. dibromide.** Fr., *bromure d'allylène*. Ger., *Allylendibromür*. An oily liquid of the composition  $C_5H_6Br_2 = CH_2.CBr = CH.Br$ . [B, 4.]—**A. dichloride.** Fr., *bichlorure d'allylène*. Ger., *Allylendichlorür*. A liquid of the composition  $C_3H_4Cl_2 = CH_2.CCl = CH.Cl$ . [B, 4.]—**A. dihydriodide.** A substance of the composition  $C_3H_4I_2 = C_3H_4(HI)_2$ . [B, 2.]—**A. dihydrobromide.** A substance of the composition  $C_3H_4Br_2 = C_3H_4(HBr)_2$ . [B, 2.]—**A. diiodide.** Fr., *biiodure d'allylène*. Ger., *Allylendiiodür*. A liquid of the composition  $C_3H_4I_2 = CH_2.CI = CH.I$ . [B, 4.]—**A. hydriodate.**—**A. hydriodide.** A compound of a. with hydriodic acid, of the formula  $C_3H_4.HI$ . [B, 2.] See also *A. dihydriodide*.—**A. hydrobromate.**—**A. hydrobromide.** A compound of a. with hydrobromic acid, of the composition  $C_3H_4.HBr$ . [B, 2.] See also *A. dihydrobromide* and *A. hydrobromide*.—**A. hydrobromioidide.** A substance of the composition  $C_3H_4.HBr.HI$ . [B, 2.]—**A. hydrochlorate.**—**A. hydrochloride.** A compound of a. with hydrochloric acid.—**A. iodide.** Fr., *iodure d'allylène*. Ger., *Allylenjodür*. See *A. diiodide* and *A. tetraiodide*.—**A. monohydriodide.**—**A. monohydrobromide.** See *A. hydriodide* and *A. hydrobromide*.—**A. oxide.** Fr., *oxyde d'allylène*. Ger., *Allylenoxyd*. A body of the constitution  $C_3H_4O = CH_2.C \equiv CH$ . According to Watts, acrolein (formed by the oxidation of a.) has this formula. [B, 2, 4.]—**A. tetrabromide.** Fr., *tétrabromure d'allylène*. Ger., *Allylentetrabromür*. An oily liquid of the constitution  $C_5H_6Br_4 = CH_2.CBr_2 = CH.Br_2$ . An isomeric form, *allene tetrabromide*,  $CH_2Br - CBr_2 - CH_2Br$ , is also known. [B, 2, 158.]—**A. tetrachloride.** Fr., *tétrachlorure d'allylène*. Ger., *Allylentetrachlorür*. A liquid of the composition  $C_3H_4Cl_4 = CH_2.CCl_2 = CH.Cl_2$ . [B, 4.]

**ALLYLENIC**, adj.  $A^2I^2lu^2en^2ik$ . Fr., *allylénique*. Of or pertaining to allylene. [B.]

**ALLYLIC**, adj.  $A^2I^2lu^2ik$ . Fr., *allylique*. It., *allitico*. Sp., *alilico*. Of or pertaining to allyl.—**A. alcohol.**—**A. ether.** See under ALLYL.

**ALLYLIDE**, n.  $A^2I^2lu^2id$ . Fr., *allylide*. Ger., *Allylid*. A compound of allyl directly with a base. [B, 3.]

**ALLYLIN**, n.  $A^2I^2lu^2in$ . Fr., *allyline*. Ger., *Allylin*. A substance having the composition  $C_8H_{12}O_3 = C_3H_5(OH)_2.O(C_3H_5)$ , being that of glycerin in which a molecule of allyl replaces an atom of hydroxylic hydrogen; a viscid liquid obtained from the syrupy residue left behind in the process of rectification of crude allyl alcohol. [B, 2, 3.] See TRIALLYLIN.

**ALLYLOXYD** (Ger.), n.  $A^2I^2lu^2ox^2d$ . Allyl oxide; allyl ether. [B.]—**Borsäures A.**, **Essigsäures A.**, etc. See *Borsäures ALLYL*, *Essigsäures ALLYL*, etc.

**ALLYLUM** (Lat.), n. n.  $A^2I^2(a^2I^2lu^2lu^2)u^2m(u^2m)$ . Allyl. [B, 93.]

**ALLYSSINEÆ** (Lat.), n. f. pl.  $A^2I^2(a^2I^2lu^2lu^2)si^2n^2e^2c(a^2e^2)$ . A tribe of cruciferous plants established by Brongniart. [B, 170.]

**ALLZEIT-SCHMERGEL** (Ger.), n.  $A^2I^2tztit-shmar-ge^2l$ . The *Chenopodium bonus Henricus*. [B, 180.]

**ALMA** (Lat.), n. f.  $A^2I^2(a^2I^2ma^2)$ . Gr., *ἄλμα*. 1. Sea-water, brine. 2. A salt incrustation. 3. Saltiness, especially in the juices of plants. [Theophrastus (A, 311).]

**ALMA** (Lat.), n. n.  $A^2I^2(a^2I^2ma^2)$ . Gen., *al'matos(-tis)*. Gr., *ἄλμα*. 1. A foetal movement. [L, 84.] 2. A pulsation, palpitation. [Hippocrates (A, 311).]

**ALMABRI**, n. An alchemical term for a stone resembling amber. [Ruland (L, 53).]

**ALMACIGA** (Sp.), n.  $A^2I^2ma^2thi^2ga^2$ . Mastic. [B.]

**ALMAFALA** (Port.), n. A cold saline spring in Portugal. [L, 105.]

**ALMAGER**, n. See ALMAGRA.

**ALMAGI**, n. See ALHAGI.

**ALMAGRA**, **ALMAGRE**, n's. Alchemical names for: 1. A washing, or the thing washed. [Ruland (L, 84), L, 116.] 2. Red earth, red bole. [L, 53, 73.] 3. White sulphur. [L, 104.]

**ALMAGRO** (Sp.), n.  $A^2I^2ma^2gro$ . See NAVA.

**ALMAKANDA**, **ALMAKIST**, n's. See ALMETAT.

**ALMANDA CATHARTICA** (Lat.), n. f.  $A^2I^2(a^2I^2ma^2nd^2ma^2nd^2a^2)$ . A plant growing in Cayenne and Surinam; used by the natives as a remedy for colic; supposed to be cathartic. [L, 97.]

**ALMARAGO**, n. See CORAL.

**ALMARCAR**, **ALMARCARIDA**, **ALMARCAT**, **ALMARCAZIDA**, **ALMARCHAZ**, n's. See ALMETAT.

**ALMARGAN**, **ALMARGE**, **ALMARGEN**, n's. Alchemical names for coral. [Ruland (L, 53), L, 84, 104.]

**ALMARIAB**, n. See ALMETAT.

**ALMARKASITA**, n. An alchemical name for mercury. [Ruland, Johnson (L, 53).]

**ALMARTACK**, **ALMARTAK**, n's. Sp., *almartaga*. See ALMETAT.

**ALMAS**, n. A Hungarian village where there are warm springs containing hydrogen sulphide. [L, 49, 63.]

**ALMASTIGA** (Sp.), n.  $A^2I^2ma^2sti^2ga^2$ . Mastic. [B.]

**ALMATATICA**, n. An alchemical name for copper. [Ruland, Johnson (L, 53).]

**ALME** (Lat.), n. f.  $A^2I^2(a^2I^2me^2ma^2)$ . See ALMA, n. f.

**ALMECASIDE**, **ALMECAT**, n's. Alchemical names for copper. [B, 50; L, 53, 104.]

**ALMECEGA** (Port.), n. Mastic. [A, 381.]

**ALMECHASIDE**, **ALMECHASITE**, n's. See ALMECASIDE.

**ALMECIGA** (Sp.), n.  $A^2I^2ma^2thi^2ga^2$ . Mastic. [A, 334.]—**A. molle** [Nees v. Esenbeck] (Lat.). A Brazilian resin, apparently identical with elemi resin, derived from the almecigo (*Icica icicaria*); gray or yellowish opaque pieces, mixed with purer translucent specimens, completely soluble in ether, partially soluble in alcohol, and inflammable. [B, 180.]

**ALMECIGO** (Port.), n. A Brazilian tree, said to be the *Icica icicaria* of De Candolle. [B, 180.]

**ALMEIDA DE SAYAGO** (Sp.), n.  $A^2I^2ma^2e^2da^2sa^2ya^2go$ . A village in the province of Zamora, in Spain, where there is an alkaline sulphurous spring, the waters of which are used for dropsy, paralysis, rheumatism, and diseases of the kidneys, liver, etc. [A, 255.]

**ALMELLETU** (Ar.), n. A name applied by Avicenna to the heat left after a fever, also to an unnatural heat less than that of fever. [L, 53, 84.]

**ALMENDORA**, n. A South American name for the *Geoffroya superba*. [L, 67.]

**ALMENE**, n. See *SAL gemmæ*.

**ALMERIA** (Sp.), n.  $A^2I^2ma^2re^2a^2$ . See ALHAMILLA.

**ALMÉSIGA**, n. A native name for a tree found on the Congo, and for its gum, which is used by the natives for a variety of diseases. [L, 105.]

**ALMETAT**, n. Ar., *al-mourtak* or *al-martak*. An alchemical name for litharge. [B, 52.]

**ALMEZERION** (Ar.), n. The *Theonorum tricornum*. [L, 105.]

**ALMISA** (Ar.), n. Musk. [L, 84.]

**ALMISADIR, ALMISADRE**, n's. Ar., *al-noshaddir*. Al-chemical names for sal ammoniac and verdigris. [B, 50, 52.]

**ALMISARAB** (Ar.), n. Earth. [L, 104.]

**ALMISDACH, ALMISHDACH** (Ar.), n's. See MISDACH.

**ALMIZADIR**, n. See ALMISADIR.

**ALMOGIA** (Sp.), n. A<sup>3</sup>l-mo-he-a<sup>3</sup>. A town in Andalusia, Spain, having cold sulphurous springs. [A, 385.]

**ALMOHARIN** (Sp.), n. A<sup>3</sup>l-mo-a-ren'. A village in the province of Badajoz, in the capitanía of Estramadura, Spain, where there is a mineral spring called Carasco (q. v.). [A, 375.]

**ALMOND**, n. A<sup>2</sup>m'u<sup>3</sup>nd. Gr., ἀμυγδαλή. Lat., *amygdala*. Fr., *amande*. Ger., *Mandel*. It., *mandorla*. Sp., *almendra*. The seed or nut of the *Amygdalus communis*. [B.]—**African a.** The *Brabejum stellatifolium*. [L, 67.]—**A. biscuits.** See *A. bread*.—**A. bloom.** A cosmetic preparation made by boiling 4 parts of Brazil dust in 96 of water, straining and adding 3 of singlass, 8 of grana silvestrica (or 1 part of cochineal), 4 of alum, and 2 of borax. [L, 45.]—**A. bread.** Bread made of flour of sweet a's and white of egg; used as a food for diabetics. [L, 65.]—**A. cake.** Lat., *placenta amygdale*. The mass left after the oil has been expressed from a's. Used for washing the skin. [A, 377.]—**A. coffee.** See *Roasted a's*.—**A. flavor.** A liquid preparation made from bitter a's, used in cookery; poisoning is said to have occurred from its use. [L, 63.]—**A. legumin.** See *AMANDIN*.—**A. milk.** See *Mistura AMYGDALÆ*.—**A. mixture.** See *Mistura AMYGDALÆ*.—**A. of the Amazon.** The *Geoffroya superba*. [L, 67.]—**A's of the ears, A's of the throat.** The tonsils. [L, 84.]—**A. oil.** See *Oleum AMYGDALÆ*.—**A. paste.** See *Pasta AMYGDALÆ*.—**A. powder.** Powdered a cake, used for washing the hands. [L, 63.]—**Artificial oil of bitter a's.** Nitrobenzene. [B.]—**Bitter a.** Lat., *amygdala amara* [U. S. Ph., Br. Ph.], *amygdale amare* [Ger. Ph.]. Fr., *amande amère*. Ger., *bittere Mandeln*. It., *mandorle amare*. Sp., *almendras amargas*. The seed of the *Amygdalus communis*, var. *amara*; an oblong flattened seed, covered with a brownish testa, linearly marked, and containing a white, oily, dicotyledonous embryo (kernel). It has a bitter taste, and, triturated with water, forms an emulsion having the odor of hydrocyanic acid. It contains a crystalline substance (*amygdalin*) and about 43 per cent. of volatile oil. There are three varieties, French, Sicilian, and Barbary. It was formerly used in pulmonary and dyspeptic affections, but is now seldom used except for flavoring. In large quantities it is poisonous. [A, 377; B, 5; L, 78.]—**Bitter-a. water.** See *Aqua AMYGDALÆ amare*.—**Blanched a's.** Lat., *amygdale decorticate*. A kernels deprived of their husks previously softened by soaking for a short time in warm water. [A, 377; B.]—**Burnt a's.** See *Roasted a's*.—**Compound powder of a's, Confection of a's.** See *Pulvis AMYGDALÆ compositus*.—**Country a.** The fruit of the *Terminalia catappa*. [B, 172; L, 67.]—**Earth-a.** See *ARACHIS hypogæa*.—**Emulsion of a's.** See *Mistura AMYGDALÆ*.—**Essence of bitter a.**—**Essential oil of a.** See *Oleum AMYGDALÆ amare*.—**Expressed oil of a.** See *Oleum AMYGDALÆ expressum*.—**Gulana a's.** Brazil nuts. [A, 377.]—**Indian a.** See *Country a.*—**Java a's.** The nuts or kernels of *Canarium commune*. [A, 377; B, 172.]—**Jordan a's.** A fine variety of sweet a's brought from Malaga. [B.]—**Milk of a's.** See *Mistura AMYGDALÆ*.—**Oil of a's.** See *Oleum AMYGDALÆ*.—**Oil of bitter a's.** See *Oleum AMYGDALÆ amare*.—**Oil of sweet a's.** See *Oleum AMYGDALÆ dulcis*.—**Paper-shelled a's.** A's derived from the *Amygdalus fragilis*, having a thin shell easily broken with the fingers. [B.]—**Purified oil of bitter a.** Oil of bitter a, freed from hydrocyanic acid and benzoic; benzoic aldehyde. [B.]—**Roasted a's.** Used for coloring and flavoring liqueurs and confectionery, and formerly as a substitute for coffee. [A, 377.]—**Sweet a.** See *AMYGDALA dulcis*.—**Syrup of a.** See *Syrupus AMYGDALÆ*.—**Valencia a's.** A variety of sweet a's brought from Valencia, Spain. [B, 5.]—**Volatile oil of a.**—**Volatile oil of bitter a.** See *Oleum AMYGDALÆ amare*.

**ALMONDWORTS**, n. pl. A<sup>2</sup>m'u<sup>3</sup>nd-wu<sup>3</sup>rtz. Lindley's name for the *Amygdaleæ* (*Drupaceæ*). [B.]

**ALMORADUZ** (Sp.), n. A<sup>3</sup>l-mo-ra<sup>3</sup>duth<sup>2</sup>. The sweet marjoram (*Origanum heracleoticum*).

**ALMOTI**, n. Allspice. [B, 180.]

**ALMUCHABALA** (Ar.), n. The search for the philosopher's stone. [L, 41.]

**ALMUG** (Heb.), n. See *ALGUMMIN*.

**ALMURADIEL, ALMURADUL** (Sp.), n's. A<sup>3</sup>l-mu-ra<sup>3</sup>-de-<sup>2</sup>l', <sup>2</sup>ul'. A town in Spain having ferruginous springs. [A, 385.]

**ALMURI** (Ar.), n. A cathartic preparation mentioned by Rhazes. [L, 116.]

**ALMYZA, ALMYZINTHRA** (Ar.), n's. Quicklime. [L, 104.]

**ALNABATI** (Ar.), n. 1. A gentle cathartic. [Avicenna, Serapion (L, 97).] 2. The fruit of the carob-tree. [Avicenna (L, 63).]

**ALNEÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)'ne<sup>2</sup>-e(a<sup>3</sup>.e<sup>2</sup>). A tribe of betulaceous plants established by Spach, including *Alnus*. [B, 170.]

**ALNEC**, n. An alchemical name for tin. [B, 50.]

**ALNERIC**, n. See *SCULPHUR vivum*.

**ALNICOLUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)'nu<sup>3</sup>s(nu<sup>4</sup>s). From *alnus*, the alder, and *colere*, to live on. Parasitic on alders. [L, 116.]

**ALNIFOLIUS** (Lat.), adj. A<sup>2</sup>l(a<sup>3</sup>l)'ni<sup>2</sup>-fo<sup>2</sup>/li<sup>2</sup>-n<sup>3</sup>s(nu<sup>4</sup>s). From *alnus*, the alder, and *folium*, a leaf. Having leaves resembling those of the alder (e. g., *Clethra alnifolia*). [B.]

**ALNUS** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)'nu<sup>3</sup>s(nu<sup>4</sup>s). From Celtic, *al*, near, and *lan*, a river-bank. Fr., *aune*. Ger., *Erle*. Eller. It., *alno*. Sp., *alamo*. The alder, a genus of betulaceous trees and shrubs. [B, 19.]—**Alni nigre bacciferae cortex, Alni nigre cortex.** The bark

of *Rhamnus frangula*. [B, 180.]—**A. communis** [Desfontaines]. See *A. glutinosa*.—**A. emarginata** [Krocker]. Fr., *aune rogné*. Syn.: *Betula emarginata*. A variety of *A. glutinosa*. [B, 173.]—**A. frangula.** See *RHAMNUS frangula*.—**A. glauca.** See *A. incana*.—**A. glutinosa** [Gärtner]. Fr., *aune commun, verne*. Ger., *Eller*. Sp., *aliso*. The common European alder; found in warm and moist regions as a tree upward of 40 feet high, but in cold, mountainous districts as a bushy shrub. Its leaves and young shoots are covered with a glutinous substance; hence its specific name. The bark (Lat., *cortex alni* [seu *betule alni*]; Fr., *écorce d'aune*; Ger., *Erlenrinde*) is found in commerce in quills or curved pieces of a brownish or ash-gray color, the young bark having reddish or brownish dots. The bark of the American variety is of a darker color. Alder bark contains from 15 to 20 per cent. of tannin, and has been used for astringent gargles, also in diarrhoea and hæmaturia. The leaves also are astringent and bitter, and have been used locally for excessive sweating of the feet, and as a discutient and antilactescient applied to the breast. [B, 5, 19, 97, 180; L, 65, 85.]—**A. incana** [Willdenow]. A shrub or small tree growing in Canada and the northern part of the United States, having serrated leaves pubescent inferiorly. The bark is used as a hæmostatic. [L, 65, 85.]—**A. nigra, A. nigra baccifera.** Fr., *aune noir*. Ger., *Schwärzeller*. The black, or berry-bearing, alder. [L.] See *RHAMNUS frangula*.—**A. papyrifera** [Michaux]. See *BETULA papyracea*.—**A. rotundifolia.** See *A. glutinosa*.—**A. rubra** [Tuckerman]. See *A. serrulata*.—**A. serrulata** [Willdenow]. The common American (or smooth) alder; a shrub from 15 to 20

ALNUS GLUTINOSA. (AFTER B. FRANK [A, 304].)

feet high, growing in swamps and by river-banks. The leaves are serrulate and smooth inferiorly. Its medicinal properties are the same as those of *A. glutinosa*. [B, 5; L, 61.]—**Cortex alni.** Fr., *écorce d'aune*. Ger., *Erlenrinde*. The bark of *A. glutinosa* (q. v.). [B.]—**Folia alni.** Ger., *Ellerblätter*. The leaves of *A. glutinosa* (q. v.). [B, 180.]

**ALO**, n. An African name for the dried and powdered leaves of *Adansonia digitata*, used as a condiment and antihidrotic. [B, 173.]

**ALOÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)'o-e(a<sup>3</sup>.e<sup>2</sup>). A family of plants comprising *Aloe*, *Agave*, *Yucca*, *Dracæna*, and other genera. [B, 170.]

**ALONAC** (Ar.), n. See *ALHENOT*.

**ALOCASIA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)'o-ka(ka<sup>3</sup>/zi<sup>2</sup>(si<sup>2</sup>)-a<sup>3</sup>. Fr., *alocasia*. Ger., *Alocasie*. A section of the botanical genus *Colocasia*, regarded by some as a separate genus. [L, 67.]—**A. metallica.** A Borneo variety, with leaves resembling large polished metallic shields. [L, 67.]—**A. montana.** An East Indian variety, the juice of which is used by the natives as a stimulant and rubefacient. [L, 63.]

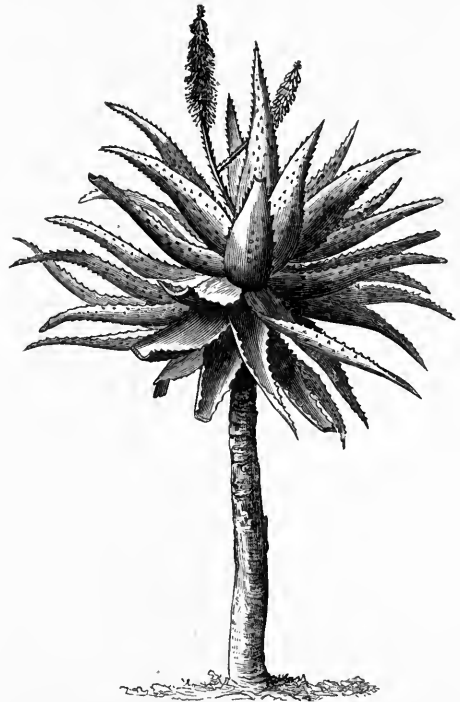

**ALOCASINÆ** (Lat.), n. f. pl. A<sup>2</sup>l(a<sup>3</sup>l)'o-ka(ka<sup>3</sup>s)(i)(e)'ne(na<sup>3</sup>.e<sup>2</sup>). A sub-tribe of araceaceous plants of the tribe *Caladieæ*, established by Schott, including the genus *Alocasia*. [B, 170.]

**ALOECHIA** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)'o-ki<sup>2</sup>(ch<sup>2</sup>i<sup>2</sup>)-a<sup>3</sup>. From a priv., and *lôxia*, the lochia. Absence of the lochial discharge. [L, 47.]

**ALOE** (Lat.), n. f. A<sup>2</sup>l(a<sup>3</sup>l)'o-e(a). Written also *Alôë* [Ger. Ph.]. Gen., *aloes*. Gr., *ἀλόη* [Dioscorides]. Fr., *aloës*. Ger., *Alôë*. Aloe. It., *aloe*. Sp., *aloes*. 1. A genus of liliaceous plants, belonging to the suborder *Asphodelæ*, established by Tournefort, characterized by their permanent fleshy leaves; flowers, disposed in erect spikes or in clusters, with a 6-parted cylindrical perianth, which, with the 6 stamens, is inferior to the ovary; and the membranous 3-celled fruit, containing many seeds. The term is now frequently restricted to those species which have tall stems, the acaulescent and sub-caulescent varieties being referred to *Gasteria*, *Haworthia*, and other genera. 2. In the U. S. Ph., Br. Ph., Ger. Ph., and Belg. Ph., aloes,

or the inspissated juice of the leaves of several species of *A.*, especially the *A. barbadensis*, *A. soccotrina*, *A. Perryi*, *A. purpurascens*, *A. rubescens*, *A. spicata*, *A. ferox*, *A. africana*, *A. arborescens*, *A. abyssinica*, and their varieties. The leaves are cut off near the ground, and the bitter yellowish juice which is contained in them near their surface is collected in vessels, in which it is evaporated either by the heat of the sun or by a fire, the value of the product depending largely upon the care with which this is done. Aloes is a yellowish or brownish, hard, amorphous substance, of peculiar saffron-like odor, and very disagreeable, persistent, bitter taste. It is almost completely soluble in boiling water and in alcohol. Its chief constituent is a crystalline glucoside, *aloin*, of which several varieties (*barbaloin*, *nataloin*, *socaloin*) are known. Aloetic, chrysanthemic, picric, and oxalic acids are produced by decomposing the aloins with acids; a hot aqueous solution of aloes deposits on cooling *a. resin*, which, along with *a. bitter*, *aloetin*, and other amorphous principles formerly described, appears to be a modified aloin. Other substances obtained from aloes by various processes are *alorcinic acid*, *aloisol*, *paracumaric acid*, *paroxybenzoic acid*, *anthracene*, and *methylanthracene*. The physical and chemical properties of aloes vary according to the source and method of preparation. See *A. BARBADENSIS*, *A. SOCOTRINA*, *A. lucida*, *A. capensis*, *A. caballina*, *A. hepatica*, etc. Aloes is purgative, affecting principally the pelvic portion of the large intestine and acting upon the muscular coat of the latter rather than upon the vessels. It also acts as an emmenagogue. Among the Mohammedans it has a religious symbolic significance, being borne by the pilgrims from Mecca, and is believed to ward off evil spirits. [B, 2, 19, 81, 185, 188; L, 41, 61, 65, 67.]—**Aehrenförmige A.** (Ger.). See *A. spicata*.—**Alcohol cum a.** See *Tinctura aloes*.—**A. abyssinica** [Lamarck]. Syn.: *A. vulgaris*, var. *abyssinica* [De Candolle]. A species closely related to *A. barbadensis*, distinguished chiefly by its long-pedicelled, yellowish-green flowers. It is believed to yield the Jafferbad aloes. [B, 188; L, 87.]—**A. acinacifolia** [Salm-Dyck]. A species 2 varieties of which are now included in *A. elongata* [Salm-Dyck]. [B, 188.]—**A. acuminata**. 1. Of Haworth, a species growing at the Cape of Good Hope, distinguished by its acuminate leaves and flowers which are red before their expansion, and yellow, streaked with green, afterward. 2. Of Salm-Dyck, includes *A. acuminata* [Haworth] and *A. suberecta*. 3. Of Lamarck, *A. verrucosa*.—**A. africana** [Miller]. Syn.: *Pachidendron africanum* [Haworth]. African a., sword-leaved a.; a species found in the Cape Colony, yielding a weak variety of a. lucida. [A; B, 169, 188.]—**A. africana foliis longis, conjugatis, supra cavis**, etc. [Boerhaave]. The *A. verrucosa*. [B, 188.]—**A. africana mitreiformis spinosa** [Dillenius]. The *A. Commelyni*. [B, 169, 188.]—**A. americana anone foliis, floribus suave rubentibus**, *A. americana serrata*, *floribus coccineis*. *A. soccotrina*. [B, 200.]—**A. angustifolia** [Salm-Dyck]. Syn.: *A. lingua*, var. *angustifolia* [Haworth], *A. linguiformis*, var.  $\beta$  [Lamarck], *A. linguiformis*, var. *C verrucosa* [De Candolle], *Gasteria angustifolia* [Haworth]. An acaulescent species growing at the Cape of Good Hope, having spreading, incurved, tongue-shaped, dark-green leaves, spotted with white and green flowers, red at the base. [B, 188.]—**A. apicra**. A subgenus including species with irregular small 2-lipped flowers; by Willdenow made a separate genus *Apicra*. [B, 48, 118.]—**A. arabica** [Lamarck]. Syn.: *A. variegata* [Forskål]. An Arabian species with a subfruticose stem, and stiff, smooth, long-lanceolate leaves, spotted with white, and having stiff reddish spines on their margins. It is said to furnish the *A. hepatica*. [B, 172, 188.]—**A. arachnoides**, *A. arachnoides*. Syn.: *A. pumila*, var.  $\delta$  *arachnoides* [Linnaeus], *Apicra arachnoides* [Willdenow], *Haworthia arachnoides* [Haworth]. A South African species; acaulescent, with triangular cuspidate stem-leaves, oblong-lanceolate, acuminate radical leaves with hairy margin, and flowers in erect cylindrical spikes. [B, 179, 188.]—**A. arborea**, *A. arborescens* [Miller]. Fr., *aloès corne de belier*. Syn.: *A. perfoliata*, var.  $\eta$  [Willdenow] (seu var.  $\alpha$  *arborescens* [Aiton]), *A. fruticosa* [Lamarck], *Catevala arborescens*. A species growing at the Cape of Good Hope and also at Barbadoes, producing a variety of a. lucida. The leaves are nearly linear, lanceolate, and thorny. [A; B, 180, 188.]—**A. aromatica**. Aloes-wood. [L, 104.]—**A. barbadensis**. See the major list.—**A'baum** (Ger.). *Agave americana*. [L, 80.]—**A'bitter**. Ger., *Aloëbitter*. See the major list.—**A. brasiliensis**. The caraguata; a Brazilian plant resembling the *A.* in appearance; perhaps a species of *Agave* or *Yucca*. [B, 200.]—**A. brevifolia**. See *A. distans*.—**A. caballina** [Belg. Ph., Netherl. Ph.]. Fr., *aloès caballin*. Ger., *Rossaloe*, *Pferdaloë*. It., *aloe caballino* (o *cavallino*). Sp., *aloès (ó acibar) caballuno*. Foetid, caballine, or horse aloes. A name given to an inferior variety of aloes, having a very foetid odor, dark and opaque in appearance, and never used except in veterinary practice. [B, 5, 95; L, 57, 67.]—**A. caballina vulgari similis sed tota maculata**. An old name for a variety of *A.* resembling the *A. vulgaris* (*A. barbadensis*), but spotted with white. [B; L, 102.]—**A. caesia** [Salm-Dyck]. A species which has but little bitterness and yields aloes in small quantity. [L, 87.]—**A. capensis**. Fr., *aloès du Cap* [Fr. Cod.]. Ger., *kap'sche Aloe*. It., *aloe del Capo*. Sp., *aloes del Cabo*. A variety of a. lucida obtained at the Cape of Good Hope from *A. ferox*, *A. africana*, *A. spicata*, *A. arborescens*, *A. purpurascens*, *A. Commelyni*, *A. multifloris*, and *A. plicatilis*. It is of a dark, blackish-brown color, a glossy surface, and a conchoidal fracture. It yields a light, yellowish-brown or greenish-brown powder. Either dissolves from 1 to 7 per cent. of it. [A; L.]—**A. carinata**. See *A. verrucosa*.—**A. Commelyni** [Willdenow]. Syn.: *A. perfoliata*, var.  $\nu$  [Linnaeus] (seu var.  $\kappa$  [Willdenow], seu var.  $\sigma$  *mitreiformis* [Aiton], *A. mitreiformis* [De Candolle (in part)], *A. mitreiformis*, var.  $\alpha$  [Lamarck] (seu var. *humilior et elatior* [Haworth]). A species growing at the Cape of Good Hope, having ovate-oblong, attenuate, spreading leaves, with dentate margins fringed with whitish spines, and red flowers in racemes. It furnishes part of the a. capensis of commerce. [B, 188.]—**A. communis**. *A. caballina*. [B, 180.]—**A. de Capo**. *A. capensis*. [B, 180.]—**A. depressa** [Haworth]. Syn.: *A. perfoliata*, var.  $\zeta$  [Linnaeus] (seu var.

*\gamma depressa* [Aiton]). Flat-leaved a.; a species growing at the Cape of Good Hope, having acute, oblong-ovate, glaucous leaves with white dentate margins and apex, and red flowers streaked with yellow. [B, 169, 188.]—**A. depurata**. See *Extractum aloes aequosum*.—**A. dichotoma** [Linnaeus]. Fr., *arbre à fleche*. Syn.: *Rhipidodendrum dichotomum* [Willdenow]. A species growing near the Cape of Good Hope, characterized by its dichotomous, very smooth, fruticose stem, and ensiform leaves. It yields a variety of a. capensis. [B, 188; L, 87.]—**A. discoridis**. Common or Barbadoes aloes. [B, 200.]—**A. distans** [Haworth]. Syn.: *A. brevifolia* [Salm-Dyck]. A species related to *A. mitreiformis* [Willdenow], but differing in its widely separated leaves. It includes several varieties formerly referred to *A. perfoliata*, var.  $\pi$  [Aiton], and *A. mitreiformis*, var.  $\beta$  [Willdenow, Aiton]. [B, 188.]—**A. disticha**. 1. Of Linnaeus, a species now referred to several species of *A.* 2. Of Thunberg, the *A. verrucosa*. 3. Of Römer and Schultes, a species, also known as *A. lingua* [Salm-Dyck], *Gasteria disticha* [Haworth], growing at the Cape of Good Hope. It is acaulescent and bears distichous leaves and red flowers. [B, 188.]—**A. echinata** [Willdenow]. Syn.: *A. perfoliata*, var.  $\theta$  *humilis* [Linnaeus] (seu var.  $\xi$  *humilis* [Aiton], *A. humilis* [Thunberg], *A. humilis*, var.  $\beta$  [Haworth], *Catevala humilis*). A species growing at the Cape of Good Hope; acaulescent, and bearing subulate aculeate leaves and flowers in reflexed racemes with a blood-red corolla. It is rich in resinous matter. [B, 179, 188; L, 87.]—**A'elixir** (Ger.). See *ELIXIR PROPRIETATIS PARACELSI*.—**A. elongata**. Fr., *aloès allongé*. 1. Of Salm-Dyck, a species otherwise known as *A. trigona* (Römer and Schultes), *A. acinacifolia*, var.  $\gamma$  *angustifolia* et var.  $\delta$  *latevirens* [Salm-Dyck], and *Gasteria trigona* [Haworth]. It is acaulescent with triangular, spirally multiflorous, elongated leaves. 2. Of Murray, the *A. barbadensis*, var.  $\beta$ . [B, 188.]—**A'essigextract** (Ger.). An acetic extract of aloes. [L, 80.]—**A. excavata** [Willdenow]. Syn.: *A. lingua*, var.  $\alpha$  *angustifolia* [Willdenow] (seu var. *latifolia* [Haworth], et var.  $\beta$  *multiflora* [Haworth]), *A. disticha*, var.  $\delta$  [Linnaeus], *A. obscura*, var.  $\alpha$  et  $\beta$  [Salm-Dyck], *Gasteria excavata* (et *latifolia*) [Haworth]. A species growing at the Cape of Good Hope; acaulescent, with tongue-shaped leaves, and flowers green at the apex, white in the middle, and red at the base. [B, 188.]—**A'extract** (Ger.). See *Extractum aloes*.—**A. ferox** [Miller]. Syn.: *A. perfoliata*, var.  $\gamma$  [Linnaeus] (seu var.  $\theta$  *ferox* [Aiton]), *A. horrida* (et *muricata*) [Haworth], *Pachidendron ferox* [Haworth]. A species found at the Cape Colony, yielding the better sort of a. lucida. It is distinguished by its large size, its very broad leaves armed on both sides with very

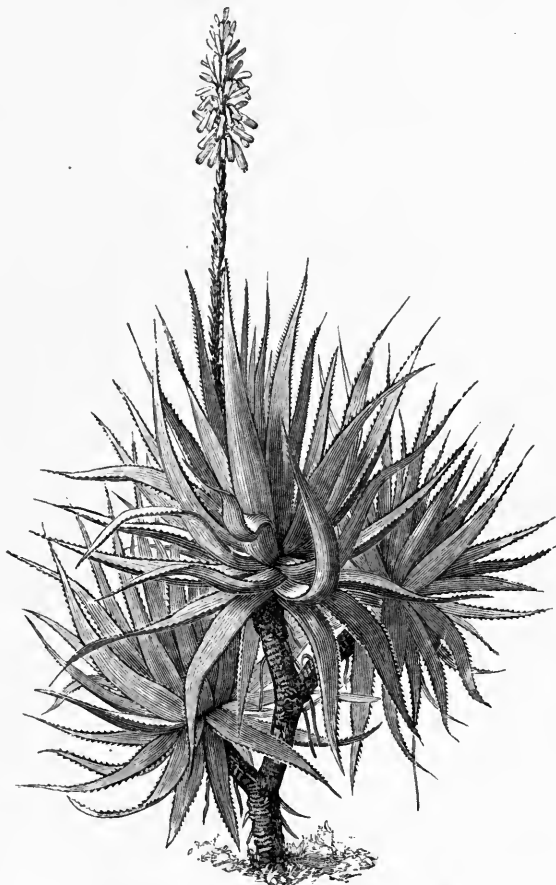

ALOE FEROX. (AFTER B. FRANK [A, 304].)

stout prickles, and by its reddish or reddish-yellow flowers with strongly exerted stamens. It is crossed with a number of other varieties, making numerous hybrids. [A; B, 5, 188; L, 78.] See also *A. subferox*.—**A. foetida**. *A. caballina*. [B, 180.]—**A. foliis spinosis, confertis, dentatis, vaginantibus, planis, maculatis**. The *A. barbadensis*. [L, 102.]—**A. frutescens** [Salm-Dyck]. A variety, closely resembling the *A. arborescens*, found at the Cape of Good Hope, and furnishing aloes in small quantities. [B, 118; L, 87.]—**A. fruticosa**. See *A. arborescens*.—**A. gallica**. A bitter drug; perhaps gentian. [L, 63.]—**A. gasteria**. A subgenus of *A.* including species with bent cylindrical flowers; often raised into a separate genus *Gasteria*. [B, 48, 188.]—**A. glauca** [Miller]. Syn.:

*A. perfoliata*, var.  $\zeta$  [Willdenow] (seu var.  $\xi$  *glauca* [Aiton]). *A. rhodacantha*. A species found at the Cape of Good Hope with very glaucous oblong-ensiform leaves, having margins beset with red spines. Several varieties are described. It yields but a small amount of bitter principle with a large amount of coloring matter. [B, 188; L, 87.]—*A. guineensis*, *A. guineensis caballina*. See *A. caballina* and *A. hepatica*.—*A. gummii*. See *A.* (2d def.).—*A'gummi* (Ger.). See ALOE-BITTER.—*A'haltig* (Ger.). Aloetic. [L, 44.]—*A'hanf* (Ger.). Pita thread; the fibre of the *Agave* used in the manufacture of ropes. [L, 37.]—*A'harz* (Ger.). See *A. resin*.—*A. hepatica*. Fr., *aloës hépatique*. Ger., *Leberaloe*. It., *aloe epatico*. Sp., *aloes (ó acibar) epático*. Liver aloes, hepatic aloes. A name formerly applied to a variety of Socotrine aloes, or in the United States to Barbadoes aloes; now applied to aloes, from any source, occurring in the form of dry, blackish, liver-colored, opaque lumps, which have a dull fatty lustre and break readily into angular fragments. [B, 5; L, 1.]—*A'holz* (Ger.). See ALOES-WOOD.—*A. horrida*. See *A. ferox*.—*A. humilis*. 1. Of Lamarek, a species resembling *A. echinata*, growing at the Cape of Good Hope. It is rich in resinous matter. 2. Of Thunberg, the *A. echinata*. [B, 188.]—*A. hyacinthoides* [Linnaeus]. The *Sansevieria zeylanica*. [B, 173.]—*A. India orientalis serrata*. *A. soccotrina*. [B, 200.]—*A. indica* [Royle]. Syn.: *A. perfoliata* [Roxburgh]. A species with red flowers, growing in sandy plains in northwestern India. It furnishes part of the Indian aloes of commerce. [B, 172; L, 87.]—*A. insuccata*. A preparation made by dissolving aloes 1 lb. in the juice of roses 2 lbs., and the juices of violets, borage, and bugloss, of each 15 oz., filtering, and evaporating to the consistence of an extract. [B, 57.]—*A. insuccata tartarea*. The same as *A. insuccata* with the addition of one third of its weight of cream of tartar. [L, 97.]—*A. intermedia* [Haworth]. Syn.: *A. linguiformis*, var. *verrucosa* [De Candolle], *A. lingua*, var. *a. Gasteria intermedia* [Haworth]. A species found at the Cape of Good Hope with narrow tongue-shaped leaves. [B, 188.]—*A. ispicata*. The *A. spicata*. [L, 63.]—*A'klystier* (Ger.). See *Enema aloes*.—*A. leptocaulon*. A variety found in Madagascar, said to furnish aloes. [B, 5.]—*A. lingua*, *A. linguiformis*, *A. linguiformis*. A species with tongue-shaped leaves containing a great number of varieties, which have all been referred to other species, especially to *A. disticha*. [B, 118.] See *A. disticha* (1st def.), *A. excavata*, *A. sulcata*, *A. intermedia*, and *A. angustifolia*.—*A. litoralis* [König]. A species found on the sea-coast of India, furnishing a very good variety of aloes. The juice of the leaves, freshly expressed, is extensively used as a refrigerant lotion in external inflammations, and, mixed with alum, as a local application in ophthalmia. [B, 172.]—*A. lota*. See *Extractum aloes aquosum*.—*A. lucida* [Greek Ph.]. Ger., *glänzende* (oder *durchsichtige*) *A.* Sp., *aloes lucido*. Shining aloes; a variety occurring as a nearly uniform mass of a vitreous lustre, breaking readily into conchoidal, sharp-edged lumps, or into small reddish or yellowish-brown splinters which are translucent; obtained from the various species of *A.* enumerated under *A. capensis*.—*A. maculata* [Lamarck]. See *A. obscura* and *A. saponaria*.—*A. mitreiformis*. 1. Of Willdenow, a species growing at the Cape of Good Hope, with acute ovate leaves subsinuous on the margin. Cf. *A. distans*. 2. Of Aiton, the *A. Commelyni* and *A. distans*. [B, 188.]—*A. multifloris*. A species yielding *A. lucida*, found in the Cape Colony. [B, 5.]—*A. muricata*. See *A. ferox*.—*A. Musambon*, *A. Musambon*. Indian or Barbadoes aloes. [B, 180.]—*A. natalensis*. Natal aloes. [L, 65.] A variety obtained in Natal from an undetermined species of *A.*, of a greenish slate-color, and a duller appearance than cape aloes when fractured. —*A. obscura*. 1. Of Miller, the common soap *A.*, the *A. perfoliata*, var.  $\mu$  [Linnaeus] (seu var.  $\kappa$  *obscura* [Aiton]), *A. saponaria*, var. *obscura* [Haworth], *A. picta*, var.  $\alpha$  [Aiton] (seu var.  $\alpha$  *major* [Willdenow]), *A. maculata*, var.  $\beta$  [Lamarck]; a species found at the Cape of Good Hope, with reddish flowers and elliptical-lanceolate green leaves spotted with white. 2. Of Willdenow, the *A. excavata*. 3. Of Salm-Dyck, the *A. excavata* and *A. sulcata*. [B, 188.]—*A. oenanthæ*. A substance recommended by Celsus as an application to phagedenic ulcers; called by the commentator "red aloes." [B, 45.]—*A. officinalis* [Forskål]. An Arabian variety with red flowers; probably the *A. rubescens*. [B, 188; L, 87.]—*A. palustris*. See STRATIOTES *aloides*.—*A. pellucida*. See *A. lucida*.—*A. perfoliata*. 1. Of Linnaeus, Willdenow, Aiton, and others, a species comprising a great many varieties, all of which have since been elevated into distinct species. See *A. arborescens*, *A. africana*, *A. ferox*, *A. subferox*, *A. depressa*, *A. glauca*, *A. soccotrina*, *A. purpurascens*, *A. Commelyni*, *A. obscura*, *A. saponaria*, *A. serrulata*, *A. echinata*, *A. suberecta*, *A. distans*, and *A. BARBADENSIS*. 2. Of Roxburgh, *A. indica*. [B, 169, 172, 188.]—*A. perfoliata, floribus pedunculatis, cernuis, corymbosis subcylindricis*. *A. barbadensis*. [L, 102.]—*A. Ferryi* [Baker]. A species growing on the island of Socotra and said to be one of the sources of Socotrine aloes. [L, 65, 74.]—*A. picta*. See *A. obscura* (1st def.) and *A. saponaria*.—*A. pille* (Ger.). See the major list.—*A. plicatilis* [Miller]. Syn.: *A. disticha*, var.  $\epsilon$  [Linnaeus], *A. tripetala*, *Rhipidodendron distichum* [Willdenow], *Rhipidodendron plicatile* [Haworth]. A species found at the Cape of Good Hope, yielding a weak variety of *A. lucida*, characterized by its dichotomous stem and smooth, tongue-shaped, obtuse leaves. [B, 5, 188.]—*A. pseudo-ferox*. See *A. subferox*.—*A'pulver* (Ger.). Powdered aloes. [L, 80.]—*A. pumila* [Linnaeus, Haworth]. A species with several varieties, now referred to *A. arachnoides* and other distinct species of *A.* [B, 179, 188.]—*A. punctata*. See *A. variegata* (1st def.).—*A. purgans*. Aloes. [L, 104.]—*A. purificata* [U. S. Ph.]. Fr., *aloes dépuré*. Ger., *gereinigte A.* Purified aloes; aloes freed from foreign ingredients by mixing 100 parts with alcohol 15 parts, heating on a water bath, straining, and driving off the alcohol by evaporation. [B, 5; L, 1.]—*A'purpur* (Ger.). Aloetic acid. [A, 324.]—*A. purpurascens* [Haworth]. Syn.: *A. perfoliata*, var.  $\epsilon$  *purpurascens* [Aiton], *A. soccotrina*, var.  $\beta$  *purpurascens*, *A. sinuata* [Thunberg], *A. ramosa* [Haworth]. A species growing at the Cape of Good Hope and at Barbadoes, closely related to *A. soccotrina*, and distinguished

by its large dichotomous stem, and flowers with deep-violet bracts and the calyx yellowish at the apex. It furnishes hepatic aloes. [B, 5, 188; L, 64.]—*A. ramosi*. See *A. purpurascens*.—*A. resin*. Ger., *Aloeharz*. The amorphous, resinous substance, probably an altered form of aloin, which is deposited from a hot aqueous solution of aloes on cooling. It is dissolved by alkalis and re-precipitated by acids. A portion of it can be rendered permanently soluble in water by continued boiling. According to Kosmann, it has the composition  $C_{22}H_{36}O_{10}$ , polymeric with that of soluble aloes. The gripping qualities of aloes are supposed to depend upon this constituent. [B, 2; L, 65.]—*A'resinsäure* (Ger.). See ALOERESINIC ACID.—*A. retusa* [Linnaeus]. Syn.: *Haworthia retusa* [Haworth], *Apicra retusa* [Willdenow], *Catevala retusa*. A species growing at the Cape of Good Hope; acaulescent, with smooth quinquefarius leaves. [B, 188.]—*A. rhodacantha*. See *A. glauca*.—*A. root*. The *Aletris farinosa*. [L, 45.]—*A. rosata*. A preparation made by dissolving aloes in the juice of roses, filtering, and evaporating to the consistence of an extract. [B, 57.]—*A. rosata tartarea*. *A. rosata* mixed with one third its weight of cream of tartar. [L, 97.]—*A. rubescens* [De Candolle]. Syn.: *A. vera* [Lamarck]. An East Indian species, allied to *A. barbadensis*, having amplexicaul leaves with spinose margins. It yields Socotrine aloes. [B, 188; L, 87.]—*A'saft* (Ger.). See *Succus aloes*.—*A. sahndra*. A Madagascar species said to furnish aloes. [B, 5.]—*A'salz* (Ger.). A salt of aloetic acid. [L, 90.]—*A. saponaria* [Haworth]. Syn.:

ALOE SOCCOTRINA. (AFTER B. FRANK [A, 304].)

*A. perfoliata*, var.  $\theta$  et  $\lambda$  [Linnaeus] (seu var.  $\epsilon$  *saponaria* [Aiton]), *A. umbellata* [De Candolle], *A. disticha* [Miller], *A. picta*, var.  $\beta$  *minor* [Willdenow], *A. maculata*, var.  $\alpha$  [Lamarck]. Great soap-*a.*; a species growing at the Cape of Good Hope, having red flowers and oblong-lanceolate, dirty-green leaves, covered with large, oblong, transverse white spots and furnished with reddish spines. [B, 169, 188.]—*A'säure* (Ger.). Aloetic acid; chrysamic acid. [B, 49; L, 1.]—*A. serra*. 1. Of Willdenow, the *A. depressa*. 2. Of De Candolle, a species found at the Cape of Good Hope, having red flowers and caespitose leaves with spinose margins. [B, 188.]—*A. serrulata* [Haworth]. Syn.: *A. perfoliata*, var.  $\lambda$  *serrulata* [Aiton]. Saw-leaved *a.*; a species growing at the Cape of Good Hope. [B, 169, 188.]—*Aloes gummi*. See *A.* (2d def.).—*A. sinensis*. An Asiatic variety, employed by the Chinese. [L, 75.]—*A. sinuata*. See *A. purpurascens*.—*Aloes lignum*. See ALOES-WOOD.—*A. soccotrina* [Lamarck]. *A. soccotrina*. Fr., *aloës socotrin* (ou *sucotrin*). Syn.: *A. perfoliata*, var.  $\xi$  [Linnaeus] (seu var.  $\delta$  *soccotrina* [Aiton]), *A. vera* [Miller]. Socotrine *a.*; a species believed to be indigenous to the island of Socotra, but by some said not to grow

there, the *A.* of this island being, according to these authorities, the *A. Perryi*. It is also cultivated on the East African coast, in South Africa, and in Barbadoes. It furnishes Socotrine and Barbadoes aloes. It is characterized by its dichotomous stem, its very long, ensiform, attenuate leaves, spotted with white and furnished with white spines, and by its flowers, rose-red in color and green at the apex. *A. purpurascens* is sometimes regarded as a variety of this species. [B. 5, 49, 180, 188.]—*A. socotrina*. See the major list.—*A. spicata* [Linnaeus]. Fr., *aloes en épis*. Spiked *a.*; a species growing at the Cape of Good Hope, and furnishing the greater part of *a. capensis*, distinguished by its flat lanceolate-ensiform leaves beset with reddish spines, and by its yellowish and orange-colored flowers disposed in closely set horizontal spikes. [B. 5, 172, 188.]—*A. spuria*. See AGAVE.—*Aloes spicatae extractum*. See *ALOE SOCOTRINA* (2d def.).—*Aloes succus*. See *A.* (2d def.).—*A'stiff* (Ger.). Aloin or aloetin. [L. 30.]—*A. suberecta* [Haworth]. Syn.: *A. perfoliata*, var.  $\mu$  *suberecta* [Aiton], *A. acuminata*, var.  $\beta$  *major* [Salm-Dyck]. Lesser hedgehog *a.*; a species indigenous to the Cape of Good Hope, with acuminate leaves, resembling the *A. acuminata*, but much larger than the latter. [B. 169, 188.]—*A. subferox* [Sprengel]. Syn.: *A. pseudo-ferox* [Salm-Dyck], *A. perfoliata*, var.  $\epsilon$  [Linnaeus], *Pachidendron pseudo-ferox* [Haworth]. A species, related to *A. ferox*, found at the Cape of Good Hope, and distinguished by its simple fruticose stem and its lanceolate leaves, smooth on the upper surface and covered on the margin and inferior surface with dark-red stiff spines. [B. 188.]—*A. succotrina*. See *A. socotrina* and *A. SOCOTRINA*.—*A. sulcata* [Salm-Dyck]. Syn.: *A. obscura*, var.  $\gamma$  *truncata* [Salm-Dyck], *A. lingua*, var. *angulata* [Salm-Dyck] (seu var.  $\delta$ ), *A. linguiformis*, var.  $\beta$  [De Candolle], *A. linguiformis* [Lamarck], *Gasteria angulata* (et *sulcata*) [Haworth]. A species growing at the Cape of Good Hope, closely related to *A. excavata*, but larger than the latter. [B. 188.]—*Aloes vulgaris extractum*. See *A. hepatica*.—*A'tinctur* (Ger.). See the major list.—*A. triangularis*. See *A. viscosa*.—*A. trigona*. See *A. elongata* (1st def.).—*A. tripetala*. See *A. plicatilis*.—*A. umbellata* [De Candolle]. The *A. saponaria* and a related species. [B. 183.]—*A.-* and *Asafetida-Pillen* (Ger.). See *Pilule aloes et asafetide*.—*A.-* and *Eisen-Pillen* (Ger.). See *Pilule aloes et ferri*.—*A.-* and *Mastic-Pillen* (Ger.). See *Pilule aloes et mastiche*.—*A. variegata*. 1. Of Linnaeus, a species; also known as *A. punctata* [Haworth] and partridge-breast *a.*, growing at the Cape of Good Hope and in Mexico. It is subcaulescent, with thick, short leaves, and is one of the species referred to the section or genus *Gasteria*. It is official in the Mexican Ph. as *zábila*; the juice of the leaves, which, according to Llamas, contains barbaloin, a bitter resin, a volatile oil, albumin, gum, etc., is drastic and antelmintic. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 163 (A); B. 185, 188.] 2. Of Forskål, the *A. arabica*. [B. 188.]—*A. vera*. 1. Of Miller, the *A. socotrina*. 2. Of Lamarck, the *A. rubescens*. [B. 173, 188.]—*A. vera minor*. A small variety, furnishing Socotrine aloes, leafy and with red flowers. [B. 200.]—*A. vera vulgaris*. The *A. barbadensis*. [B. 200.]—*A. verrucosa* [Miller]. Fr., *aloes verruqueux*. Syn.: *A. disticha* [Thunberg], *A. disticha*, var.  $\beta$  [Linnaeus], *A. acuminata* [Lamarck], *A. carinata* [De Candolle], *A. serrata*, var.  $\beta$  *verrucosa* [Persoon], *Gasteria verrucosa* [Haworth]. A species growing at the Cape of Good Hope; aculeous and having narrow, tongue-shaped, distichous leaves covered with white warts. [B. 173, 188.]—*A. violata*. A preparation resembling *a. rosata*, but made with the juice of violets. [B. 57.]—*A. viscosa* [Linnaeus]. Syn.: *Haworthia viscosa* [Haworth], *Apiera viscosa* [Willdenow]. A species growing at the Cape of Good Hope, the leaves of which are viscous in the wild plant, but rarely so in the cultivated variety. [B. 179, 188.]—*A. von Barbadoes* (Ger.). See *A. BARBADENSIS* (2d def.).—*A. von Mocha* (Ger.). See *Mocha aloes*.—*A. vulgaris*. See *A. abyssinica* and *A. BARBADENSIS*.—*A'wein* (Ger.). See *Vinum aloes*.—*A. wood*. See *Suppositoires d'ALOES*.—*Sword-leaved a.* See *A. africana*.—*Tinctura aloes*. Fr., *teinture d'aloes*. Ger., *Aloetinctur*. It., *tintura di aloes*. Sp., *tintura de aloes*. A preparation official in nearly all pharmacopœias. That of the U. S. Ph. represents in 100 parts of the tincture 10 parts of aloes and 10 of extract of licorice; that of the Br. Ph. 3 parts of aloes and 9 of licorice; that of the Ger. Ph., and that of the Fr. Cod., 20 parts of aloes. Other official preparations contain from 4 to 12 parts of alcohol to 1 of aloes. [B. 1; L. 57, 65, 68, 70, 85.]—*Tinctura aloes atherea*. A preparation official in many European pharmacopœias, differing but slightly from that of the Edinburgh Pharmacopœia, 1813, which orders 46 parts of myrrh and 393 parts of spirits of ether to be digested for 4 days, and 46 parts of aloes and 31 parts of saffron added, and the whole again digested for 4 days. [L. 85.]—*Tinctura aloes composita* [Ger. Ph.]. Fr., *teinture d'aloes composée*. Ger., *zusammengesetzte Aloetinctur*. It., *tintura di aloes composta*. Sp., *tintura de aloes compuesta*. Syn.: *tinctura de aloes composita* [Fr. Cod.]. A preparation made by macerating 6 parts of aloes and 1 part each of rhubarb, zedoary, gentian root, and saffron in 200 parts of dilute alcohol, and filtering at the end of 7 days. In the old London Ph. this name was given to the *tinctura aloes et myrrhæ*. The Hamburg Codex of 1835 orders 3 parts each of the tinctures of aloes and saffron, and 4 of tincture of myrrh. The Edinburgh Ph. of 1813 orders 2 parts each of aloes and myrrh, 1 part of saffron, and 24 parts of alcohol. The Batavian Ph. of 1805 and the

Amsterdam Ph. of 1792 order 31 parts of saffron and 937 parts of alcohol to be digested for 24 hours, and to the expressed filtrate 31 parts each of aloes and myrrh added, and the whole again digested for 3 days and filtered. The U. S. Ph. of 1820 orders myrrh 62 parts, alcohol 590, and water 190, to be digested for 4 days, and 46 parts of aloes and 31 of saffron added, and the whole digested for 3 days and decanted. See also *Teinture d'aloës composée*.—*Tinctura aloes crocata*, *Tinctura aloes cum myrrha crocata*. See *Tinctura aloes composita*.—*Tinctura aloes et myrrha* [U. S. Ph.]. Fr., *élixir de propriété*. Ger., *Aloe-elixir*. It., *tintura di aloes e myrra*. Sp., *tintura de aloes y de mirra*. Syn.: *elixir proprietatis Paracelsi*. Made by macerating 10 parts each of aloes and myrrh in 80 of alcohol for 7 days, and, after filtering, adding sufficient alcohol to bring the whole quantity up to 100 parts. [L. 65, 68.]—*Tinctura de a. composita* [Fr. Cod.]. See *Teinture d'aloës composée*.—*Tinctura rhei et aloes*. See under RHEUM.—*Vinum aloes*. Fr., *vin d'aloës*. Ger., *Aloewein*. It., *vino d'aloë*. Sp., *vino di aloes*. The U. S. Ph. orders 6 parts of aloes, 1 part of cardamom seeds, and 1 part of ginger, in 90 parts of strong white wine, to be macerated and filtered, and sufficient of the same wine added to bring the whole up to 100 parts. The preparation of the Br. Ph. contains about 4 parts of aloes and  $\frac{1}{2}$  part each of cardamom seeds and ginger in 100 parts of sherry. The Edinburgh Ph. of 1813 orders Socotrine aloes 31 parts, cardamom seeds and ginger each 4 parts, and Spanish white wine 786 parts. The Dublin Ph. of 1826 orders 25 parts of Socotrine aloes, 6 of canella, 280 of Spanish white wine, and 94 of alcohol. The Geneva Ph. of 1780 orders 30 parts of Socotrine aloes, 7 of canella, and 540 of Spanish white wine. The Turin Ph. of 1833 orders 16 parts of the species *Hieracium picra*, 1 part of cochineal, and 96 parts of Malaga wine. [B.; L. 65, 68, 85.]—*Water a.* See *STRATIOTES aloides*.—*Yellow-flowered a.*, *Yellow-flowering a.* See ALOE BARBADENSIS.

**ALOE** (Ger.), n. A<sup>3</sup>lo-e<sup>2</sup>. For this word and its compounds, see under ALOE.

**ALOE BARBADENSIS** (Lat.), n. m. Ba<sup>3</sup>r-ba<sup>2</sup>d(ba<sup>2</sup>d)-e<sup>2</sup>n<sup>2</sup>si<sup>2</sup>s. From Barbadoes, its source. Fr., *aloës des Barbades* [Fr. Cod.]. It., *aloe delle Barbadoes*. Sp., *aloes de las Barbadas*. 1. A species of Aloe established by Miller, also called *A. perfoliata*, var.  $\pi$  *vera* [Linneus] (seu var.  $\lambda$  *vera* [Willdenow], seu var.  $\nu$  *barbadensis* [Aiton], seu var. *vulgaris* [Aublet], *A. vulgaris* [Lamarck], *A. vulgaris*, var. *barbadensis* [De Candolle]). It is indigenous to America, but has been brought into the Mediterranean countries of Europe and Africa. It is distinguished by its subfruticose stem, ensiform leaves, and yellow flowers. A variety, *A. b.*, var.  $\beta$ , the *Aloe elongata* [Murray], *A. humilis*, var.  $\beta$  [Willdenow], and *A. vulgaris* [Willdenow], is described; also a small variety, the *A. b.*, var. *chinensis*. The *A. b.* furnishes most of the Barbadoes aloes of commerce. [B. 188.] 2. A brown, or orange-brown, variety of aloes, which is translucent in thin pieces and opaque in masses, and breaks with a smooth, waxy, slightly conchoidal fracture. When breathed upon it emits a distinct saffron-like odor. Ether dissolves about 10 per cent. of this variety. Formerly it was known as hepatic, or liver, aloes. It is usually imported in calabashes. It is mostly derived from the *Aloe barbadensis*, although several other varieties furnish a portion of it. The active principle is barbaloin. [B.; L.]—*A. b. mitior* [Dillenius]. See *A. purpurascens*.—*Extractum aloes b.* See *Extractum ALOES aquosum*.—*Pilula aloes b.* See *Pilula ALOES*, under ALOE.

**ALOE-BITTER**, n. A<sup>2</sup>lo-e<sup>2</sup> bi<sup>2</sup>t<sup>2</sup>tn<sup>2</sup>r. Fr., *résino-amer*. Ger., *Aloe-Bitter*. Syn.: *aloebitter*. A bitter principle extracted from aloes by evaporation of the aqueous extract from which the aloes-resin has been removed. It is probably modified aloin. [B. 48, 81.]—*Artificial a.-b.* Ger., *künstliches A.-B.* A substance formed by treating aloes with nitric acid. [B. 48.]

**ALOE-DARIUM** (Lat.), n. n. A<sup>2</sup>(a<sup>3</sup>l)-o-e(e<sup>2</sup>)-da(da<sup>3</sup>)/ri<sup>2</sup>-u<sup>3</sup>m(u<sup>3</sup>m). A compound cathartic medicine containing aloes.—*A. marocostinum*. An aloetic panacea highly vaunted by Mindereus. [L. 53, 87.]

**ALOE-DARY**, n. A<sup>2</sup>lo-e<sup>2</sup>-d-a-ri<sup>2</sup>. See ALOE-DARIUM.

**ALOE-PATICUS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>l)-o-e(e<sup>2</sup>)-pa<sup>2</sup>(pa<sup>2</sup>t)/i<sup>2</sup>k-u<sup>3</sup>s(u<sup>3</sup>s). Made of aloes. [L. 63.]

**ALOE-PHANGINUS** (Lat.), adj. A<sup>2</sup>(a<sup>3</sup>l)-o-e(e<sup>2</sup>)-fa<sup>2</sup>n(fa<sup>3</sup>n)-ji-(ge)/nu<sup>3</sup>s(nu<sup>3</sup>s). Aloetic. [L. 50.]

**ALOEPILEN** (Ger.), n. pl. A<sup>3</sup>lo-e<sup>2</sup>-pi<sup>2</sup>l-le<sup>2</sup>n. See *Pilula ALOES*.—*Eisenhaltige a.* See *Pilula ALOES et ferri*.

**ALOERESINIC ACID**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>s/i<sup>2</sup>k. Fr., *acide aloé-résique*. A yellowish-brown, micro-crystalline, resinous acid of the formula C<sub>30</sub>H<sub>32</sub>O<sub>14</sub>, obtained from that portion of Cape aloes which is soluble in water, by boiling with dilute sulphuric acid. It is insoluble in ether. See also ALOERESINIC ACID. [B. 2.]

**ALOERESIN**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>z/i<sup>2</sup>n. See ALOE RESIN.

**ALOERESINIC ACID**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>z-i<sup>2</sup>n/i<sup>2</sup>k. A resinous acid, of the formula C<sub>16</sub>H<sub>16</sub>O<sub>6</sub>, obtained by boiling with dilute sulphuric acid that portion of Cape aloes which is insoluble in water. It is soluble in ether. [B. 2.] See ALOERESINIC ACID and ALOERETINIC ACID.

**ALOERETIC ACID**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>t/i<sup>2</sup>k. Fr., *acide aloé-rétique*. 1. A brown, micro-crystalline, resinous acid, of the formula C<sub>30</sub>H<sub>32</sub>O<sub>14</sub>, nearly insoluble in water and in ether, but sparingly soluble in alcohol; obtained, along with aloeresinic acid, from that portion of Cape aloes which is soluble in water by boiling with dilute sulphuric acid. 2. A name also applied to chrysatriac acid. [B. 2.]

**ALOERETIN**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>t/i<sup>2</sup>n. A brown amorphous resin, insoluble in ether; obtained, along with aloeresinic and aloeretic acids, by boiling with dilute sulphuric acid that portion of Cape aloes which is soluble in water. [B. 2.]

**ALOERETINIC ACID**, n. A<sup>2</sup>lo-e<sup>2</sup>-re<sup>2</sup>t-i<sup>2</sup>n/i<sup>2</sup>k. Fr., *acide aloé-*

*rétinique*. A resinous acid, insoluble in ether; obtained, along with aloeresinic acid, by boiling that portion of Cape aloes which is soluble in water with dilute sulphuric acid. [B. 2.]

**ALOE**, n. pl. A<sup>2</sup>lo-oz. Fr., *aloës*. Ger., *Aloe*. It., *aloe*. Sp., *aloes*, *acibar*. In medicine, applied both to the plants of the genus *Aloe* and to the inspissated juice of several of the species. For the compound terms in Latin, see under ALOE.—*African a.* See *Aloe africana*.—*American a.* See *AGAVE americana*.—*Aqueous extract of a.* See *Extractum ALOES aquosum*, under ALOE.—*Artificial bitter of a.* See ALOETIC ACID.—*Barbadoes a.* See ALOE BARBADENSIS.—*Benares a.* A variety of Indian *a.* resembling Barbadoes *a.*, but of a darker color and more glossy. [L. 65.]—*Bethelsdorp a.* The most esteemed variety of Cape aloes; so called because collected at the Bethelsdorp mission. [L. 103.]—*Bitter of a.* See ALOE-BITTER.—*Bombay a.* Fr., *aloës de l'Inde*. A variety of hepatic aloes obtained from Bombay, of a lighter color than the ordinary variety. [L. 77.]—*Bonaire a.* See *Benares a.*—*Caballine a.* See ALOE *caballina*.—*Cape a.* See ALOE *capensis*.—*Capey a.*, *Capey Barbadoes a.* A variety of Barbadoes *a.* presenting a smooth glossy surface on fracture.—*Cold-drawn Barbadoes a.* The pure inspissated juice of the *Aloe barbadensis*, as distinguished from the ordinary Barbadoes *a.*, which is the residue of a decoction of the plant. [L.]—*Compound decoction of a.* See *Decoctum ALOES compositum*, under ALOE.—*Curaçoa a.* A West Indian variety, resembling Barbadoes *a.*, but darker and more glossy.—*Cyprus a.* A variety of *a.* obtained from Cyprus. Cod. of 1837, made of 2 parts each of Socotrine aloes, *Arum maculatum*, and calomel, 3 each of pulvis oxydii stibii compositum and rhubarb, 4 each of senna, gum ammoniac, and scales of iron, and 48 of compound syrup of senna. [L. 85.]—**Électuaire d'a. composé.** See **Electuarium ALOES compositum,** under **ALOE.**—**Élixir d'a. savonneux, Essence d'a. composée.** See **ELIXIR ALOES saponaceum,** under **ALOE.**—**Extrait d'a., Extrait gommeux d'a.** See **Extractum ALOES aquosum,** under **ALOE.**—**Extrait gomme-résineux d'a.** A preparation official in the Frankfurt Ph. of 1791; made by mixing the aqueous and alcoholic extracts of aloes, and evaporating to the proper consistence.—**Extrait résineux d'a.** See **Extrait gomme-résineux d'a.**—**Enolature d'a., Enolé d'a.** See **Vinum ALOES,** under **ALOE.**—**Pilules d'a., de myrrhe et de gayac.** A preparation official in the Geneva Ph. of 1780; made of 15 parts each of Socotrine aloes, oxide of antimony, and gualiacum resin, 8 each of saffron and myrrh, and sufficient copaiba balsam to make a pill mass. [L. 85.]—**Pilules d'a. et d'agaric.** Syn.: *pilule hierre picre.* A preparation official in the Sard. Ph. of 1773; made of 1 part each of the species *hierre picre* and powdered troches of agaric, 2 parts of aloes, and sufficient alcohol to make into a pill mass. [L. 85.]—**Pilules d'a. et d'asafétide.** See **Pilule ALOES et asafetide,** under **ALOE.**—**Pilules d'a. et de coloquinte.** See **Extractum COLOCYNTHIDIS compositum.**—**Pilules d'a. et de fer.** See **Pilule ALOES et ferri,** under **ALOE.**—**Pilules d'a. et de gayac.** A preparation official in the Geneva Ph. of 1780; made of 3 parts of Socotrine aloes, 2 of gualiacum resin, 1 part each of aromatic powder and Peruvian balsam and sufficient syrup of orange peel to make a pill mass. [L. 85.]—**Pilules d'a. et de gentiane.** The Amsterdam Ph. of 1792 and the Batavian Ph. of 1805 order this pill to be made of equal parts of Socotrine aloes and extract of gentian. The Swedish Ph. of 1817 orders 3 parts of the pill mass of aloes and myrrh, and 2 of extract of gentian. The Brunswick Dispens. of 1777 and the Span. Ph. of 1798 order 12 parts of Socotrine aloes, 6 of extract of gentian, 1 part of oil of cloves, and sufficient syrup of ginger to make a pill mass. [L. 85.]—**Pilules d'a. et de gomme-gutte.** Syn.: *pilule de Anderson.* A preparation official in the Fr. Cod., each pill containing 10 centigrammes each of aloes and gamboge, with a little honey and oil of anise. The Ferrara Ph. of 1832 orders a pill mass to be made of 2 parts of Socotrine aloes and 1 part of gamboge, with syrup. See also **Pilule GAMBOGIE composite.**—**Pilules d'a. et de mastic.** See **Pilule ALOES et mastic,** under **ALOE.**—**Pilules d'a. et de myrrhe.** See **Pilule ALOES et myrrhe,** under **ALOE.**—**Pilules d'a. et de quinquina.** A preparation official in the Fr. Cod. of 1837; made of 6 parts of Socotrine aloes, 3 of extract of cinchona, 2 of cinnamon, and sufficient syrup of wormwood to make a pill mass. [L. 85.]—**Pilules d'a. et de rhubarbe.** See **Extractum RHEI compositum.**—**Pilules d'a. et de savon** [Fr. Cod.]. See **Pilule ALOES,** under **ALOE.**—**Pilules d'a. et de scammonée.** See **PILULE de duobus.**—**Pilules d'a. et de succin.** A preparation official in several old European pharmacopoeias, containing 2 parts of Socotrine aloes to 1 of ambra flava. [L. 85.]—**Pilules d'a. et d'opium.** See **PILULE angliae.**—**Pilules d'a. gentianées.** See **Pilules d'a. et de gentiane.**—**Pilules d'a. gentiano-savonneuses.** A preparation official in the Brunswick Ph. of 1777; made of 4 parts of Socotrine aloes, 2 of extract of gentian, 1 part of powdered ginger, and soap sufficient to make a pill mass. [L. 85.]—**Pilules d'a. gommeuses.** A preparation official in the Geneva Ph. of 1780; made of equal parts of Socotrine aloes and gum arabic. [L. 85.]—**Pilules d'a. maritales.** A preparation official in the Geneva Ph. of 1780; made of 1 part of Socotrine aloes, 12 parts of black oxide of iron, and sufficient syrup to make a pill mass. [L. 85.]—**Pilules d'a. rosées.** See **ALOE rosata.**—**Pilules d'a. safranées.** See **Pilule ALOES et myrrhe,** under **ALOE.**—**Pilules d'a. simples.** A preparation official in the Fr. Cod.; made of equal parts of powdered aloes and honey. [L. 76.]—**Poudre d'a.** A preparation official in the Fr. Cod.; made by powdering aloes in a mortar, drying, and then triturating to a fine powder and passing through a sieve containing 100 meshes to the French square inch.—**Poudre d'a. composée.** See **Pulvis ALOES compositus,** under **ALOE.** The Würzburg Ph. of 1796 orders under this name 1 drachm each of Socotrine aloes, myrrh, and sulphate of iron, 12 drops of the essential oil of savin, and a sufficient quantity of sugar. [L. 85.]—**Suc d'a.** See **Succus ALOES,** under **ALOE.**—**Suppositoires d'a.** A suppository official in the Fr. Cod., containing 50 centigrammes of aloes and 4 grammes of cacao-butter.—**Teinture d'a.** See **Tinctura ALOES,** under **ALOE.**—**Teinture d'a. composée.** A preparation official in the Fr. Cod.; made by macerating for 10 days 40 parts of aloes and 5 each of gentian root, zedoary, saffron, white agaric, and *electuaire theriacal* in 2,000 parts of 60 per cent. alcohol, and filtering. See also **Tinctura ALOES composita,** under **ALOE.**—**Teinture d'a. et de benjoin.** See **Tinctura BENZOINI composita.**—**Teinture d'a. et de mastic.** A preparation official in the Spanish Ph. of 1798; made of 29 parts each of aloes, olibanum gum, and mastic, 14 of colophony, and 1.75 of alcohol.—**Teinture d'a. et de myrrhe.** A preparation official in the Würzburg Ph. of 1796; made of 2 parts of hepatic aloes, 3 of myrrh, and 60 of alcohol. [L. 85.] See also **Tinctura ALOES et myrrhe,** under **ALOE.**—**Teinture d'a. et de myrrhe safranée.** See **Tinctura ALOES composita,** under **ALOE.**—**Teinture d'a. et de réglisse.** A preparation official in the Batavian Ph. of 1805; made of 15 parts of aloes, 46 of extract of licorice, and 250 each of alcohol and water. [L. 85.]—**Teinture d'a. et de rhubarbe.** See **Tinctura RHEI et aloes.**—**Vin d'a.** See **Vinum ALOES,** under **ALOE.**

**ALOESIN**, n. A<sup>1</sup>l-o-e<sup>2</sup>s-i<sup>2</sup>n. Fr., *aloésine*. See **ALOE-BITTER.**

**ALOESINIC ACID**, n. A<sup>1</sup>l-o-e<sup>2</sup>s-i<sup>2</sup>n-i<sup>2</sup>k. Fr., *acide aloésinique*.

**ALOE SOCOTRINA** (Lat.), n. f. So-ko-tri(tre)'na<sup>3</sup>. Fr., *aloès socotrin*. Ger., *Socotrinische Aloe*. It., *aloe socotrinio* (o *sucotrinio*). Sp., *acibar socotrinio*, *aloes socotrinio*. 1. See **ALOE socotrina**. 2. A variety of aloes procured from the ports on the Red Sea and East African coast. It is derived from unknown varieties of the *Aloe*. It is of a yellowish-brown color, with a dull conchoidal fracture, and when breathed upon emits an agreeable saffron-like odor, pleasanter than that of the other varieties. Ether dissolves from 4 to 5.5 per cent. of this variety. It formerly occurred in commerce in skins, but now is seen in kegs and tin-lined boxes. [L. 65, 78.] See also **Liquid Socotrine ALOES.**—**Extractum aloes socotrinæ** [Br. Ph.]. See **Extractum ALOES aquosum,** under **ALOE.**—**Phila aloes socotrinæ** [Br. Ph.]. See **Pilule ALOES,** under **ALOE.**—**Vinum aloes socotrinæ.** See **Vinum ALOES,** under **ALOE.**

**ALOES-WOOD**, n. A<sup>1</sup>l'oz-wu<sup>4</sup>d. Fr., *bois d'aloès*. Ger., *Aloe-holz*. Sp., *leño de aloes*. Syn.: *agallochum*, *calambac*, *xyloos*. Ainslie and Martius make three varieties: 1. *Agallochum*, *xyloos*, or *calambac*, derived from the *Alcorythum agallochum*, a heavy resinous wood rarely found in commerce, said to be odorless in the natural state, but to become fragrant from a diseased condition of the wood. 2. The lignum asphaltum officinale, lignum aspalathi, derived from the *Aquilaria malaccensis* [Lamarck], occurring in heavy, nodular, grayish-black pieces, of a fragrant odor and bitter taste. It is the kind most frequently found in commerce. 3. *Lignum aquilariae*, *l. aquilinum*, *l. agallochum spurium* (Ger., *Adlerholz*); derived from the *Exceccaria agallocha* [Linnaeus]. It has a greenish hue, is not very resinous, has a somewhat musky odor and an aromatic but not bitter taste. It is impossible to determine to which of these varieties the aloes-wood so much used formerly belongs. It was used as a perfume to flavor medicinal preparations, and for fumigations. [B. 180; L. 55, 78, 97.] The Chinese regard it as being tonic, stimulant, aphrodisiac, and diuretic, but it is chiefly used by them for incense. Good specimens should yield 48 per cent. of matter soluble in alcohol. [Stroud, "Brit. and Colon. Druggist," May 1, 1886, p. 279.]—**False A.-w.** See **A.-w.** (3d def.).

**ALOETAMIDE**, n. A<sup>2</sup>l-o-e<sup>2</sup>t'a<sup>2</sup>m-i<sup>2</sup>d. A substance of the composition C<sub>17</sub>H<sub>5</sub>(NH<sub>2</sub>)(NO<sub>2</sub>), formed by the action of dilute ammoniacal gas upon acetic acid. It is said to be darker in color and more soluble than chrysammide. [B. 140.]

**ALOETIC**, adj. A<sup>2</sup>l-o-e<sup>2</sup>t'i<sup>2</sup>k. Lat., *aloeticus*. Fr., *aloétique*. Ger., *aloëtisch*. It., *aloetico*. Sp., *aloético*. Derived from or containing aloes. As a n., a preparation containing aloes. [L. 30, 44, 50.]

**ALOETIC ACID**, n. Fr., *acide aloétique*. Ger., *Alöëtinsäure*. It., *acido aloetico*. Sp., *acido aloético*. Syn.: *artificial bitter of aloes*. An orange-red, amorphous, solid acid of the composition C<sub>12</sub>H<sub>5</sub>N<sub>2</sub>O<sub>6</sub>, or more probably C<sub>14</sub>H<sub>7</sub>N<sub>2</sub>O<sub>10</sub> = C<sub>14</sub>H<sub>7</sub>(N<sub>2</sub>O<sub>2</sub>)<sub>5</sub>, obtained by the decomposition of aloin with nitric acid. By the continued action of nitric acid a. a. is converted into chrysammic acid. [B. 2, 4.]

**ALOETICA** (Lat.), n. n. pl. A<sup>2</sup>l(a<sup>2</sup>l)-o-e<sup>2</sup>t'i<sup>2</sup>k-a<sup>3</sup>. Aloetic compounds. [L. 57.]

**ALOETICAL**, adj. A<sup>2</sup>l-o-e<sup>2</sup>t'i<sup>2</sup>k-a<sup>2</sup>l. See **ALOETIC**.

**ALOETIN**, n. A<sup>2</sup>l-o-e<sup>2</sup>t-i<sup>2</sup>n. Fr., *aloétine*. Ger., *Alöetin*. It., Sp., *aloetina*. A substance soluble in water, obtained by Robiquet from aloes; it probably represents the active principle associated with various impurities. [B. 5; L. 44, 55, 78, 95.]

**ALOETINIC ACID**, n. A<sup>2</sup>l-o-e<sup>2</sup>t-i<sup>2</sup>n-i<sup>2</sup>k. Ger., *Alöëtinsäure*. See **ALOETIC ACID**.

**ALOËTINCTUR** (Ger.), n. A<sup>2</sup>l'o-e<sup>2</sup>t-i<sup>2</sup>nk-tur'. See **Tinctura ALOES**, under **ALOE.**—**Zusammengesetzte A.** See **Tinctura ALOES composita**, under **ALOE**.

**ALOËTINÉ** (Fr.), n. A<sup>3</sup>l-o-a-te-na. Pertaining to the genus *Aloe*; as a n. f. pl., *aloétinées*, a section of liliaceous plants. [A. 385.]
